Due for MMA level which had been normal in the past. Check Ferritin given mildly low hct.
Plan: METHYLMALONIC ACID, FERRITIN

William E Neighbor, MD

10/22/2014 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Clinical Professor
Department of Family Medicine
University of Washington

11/6/2014
Addendum:
X ray showed worsening of old compression fracture. Patient to follow up with me and will arrange PT for her. Ferritin was 35. MMA is pending.

Electronically signed by Neighbor Jr., William E at 11/6/2014 6:54 PM

X-RAY LUMBAR SPINE 4 VW

Order status: Completed Filed on: 11/10/14 1209
Performed: 10/22/14 1117 - 10/22/14 1117 Accession number: 8760605
Resulting lab: UW RADIOLOGY Lab Technician: AJAY CHHABRA HALL HEALTH TECH
Narrative:
Examination:
XR L SPINE MIN 4 VIEWS/FALLRISK

Indication:
low back pain

Comparison:
December 6, 2012

Findings:
Lumbar levoscoliosis is again noted. Old T12, L2, and L3 compression fractures
are seen. There has been slight interval worsening of L1 height loss
suggesting age indeterminate compression fracture. Alignment is unchanged.
Abdominal aortic calcification is seen. Right hip screw partially visualized.

X-RAY FEMUR 2 VIEW RIGHT

Order status: Completed Filed on: 11/10/14 1209
Performed: 10/22/14 1117 - 10/22/14 1117 Accession number: 8760606
Resulting lab: UW RADIOLOGY Lab Technician: AJAY CHHABRA HALL HEALTH TECH
Narrative:
EXAMINATION:
XR FEMUR 2 VIEW RIGHT/FALLRISK
RIGHT

Indication:
right hip and thigh pain. Prior plate in femur by patient report

Comparison:
December 6, 2012 pelvis radiographs

Findings:
Similar to December 2012, patient has undergone dynamic screw fixation
bridging an old intertrochanteric fracture. Hardware is intact, without
evidence of complications.
No femoral fracture.
Alignment is normal.
Arterial calcifications indicate atherosclerosis.
ATTENDING RADIOLOGIST AND PAGER NUMBER

Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool	10/20/2014 9:09 AM

Dear William,

Subject: Hearing Impaired

I am shouting and yelling at people.

My hearing aids are not functioning properly.
COSCO Aids are not supported by UWMC.

Unsupported Hearing Test, that provide no support for aging seniors on limited pension....provide's "no resolve" to hearing problems and issue, nor aid repair options.
Medical hearing has not been researched.

Let's find a solution

Hi, I am covering for Dr. Neighbor and wanted to let you know that your anticoagulation level continues to be within the recommended range. Please make sure that you come in monthly since you are currently at the higher endo f anticoagulation at 2.9.
Sincerely,
Evelyn Vinopal,MD

Medical Advice

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool	10/2/2014 6:39 PM

Dear William,

Louis and I have returned.

My hearing is causing problems, as I am yelling and misunderstanding what is being said.

My "cosco" hearing aids have problems and may not be working properly.

Unable to test them. Cosco Membership is not current.

I need to fine a "UWMC" or other solution to restore my hearing.

I had a hearing test with "Miracle Ear Hearing Aid" on Lake City Way.

Clinical Notes

Progress Notes

Neighbor Jr., William E at 8/27/2014 0825

Jeanne Leonie Hoffman is a 89 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  Check-up
- Refill Request
  Losartan, Codeine, Warfarin

(451.19) DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
Jeanne has chronic venous stasis disease particularly of left lower leg for which she uses compression stockings. She ahs recently had some dryness, scaling and small areas of superficial sores that heal. There has been no change in mild swelling that is controlled with compression stockings.

(V58.61) AFTERCARE LONG TERM ANTICOAG USE
In for INR. Stable dose of coumadin.

(788.30) Urine incontinence
For many years she has used pose pads, about 3-4 per day. There has been no change. However, she is seeking coverage for these thru her monthly allowance and needs a lettere.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [721.3]	08/30/2013
• Vertebral fracture [805.8] Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months, that is May 2013	12/13/2012
• Thyroid nodule, uninodular [241.0] CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.	12/13/2012
• OSTEOPOROSIS NOS [733.00] T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continue for five years, then stop	03/04/2008
• AFTERCARE LONG TERM ANTICOAG USE [V58.61] Reason for anticoagulation: Recurrent dvts Duration of anticoagulation: life INR goal: 2.-3 She has also been on Trental for many years because of recurrent venous stasis disease despite adequate anticoagulation. Her last arterial vascular study showed ABIs of 1.0 in 2007. 2/12/2010 repeat arterial vascular studies of lower extremities ordered.	01/08/2008
• FX FEMUR INTRCAPS NOS-CLOSE [820.00] Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.	05/01/2007
• VITAMIN B DEFICIENCY NOS [266.9] Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency	05/01/2007
• Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00]	03/27/2007

08/27/2014 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Year onset: Dx March 2007
Metformin discontinued 2011 as A1c in target range without it.
Diet and weight controlled.

- Other convulsions [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013
  No recurrence

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- CATARACT NOS [366.9] 11/20/2006
  Extraction left eye in 1989

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

Objective:

BP 126/63 | Pulse 55 | Temp(Src) 97.5 °F (36.4 °C) (Oral)
Estimated body mass index is 23.03 kg/(m^2) as calculated from the following:
Height as of 7/30/14: 5' 1.02" (1.55 m).
Weight as of 7/30/14: 55.339 kg (122 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 126/63
General: NAD
Skin: With compression stocking removed, she has some skin dryness and one area of superficial skin break down and a second similar area that is healing. There is no redness or discharge. No edema. Good perfusions.

INR 2.0

08/27/2014 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Assessment and Plan:
(451.19) DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
Skin dryness and superficial break down. Advise moisturizing lotion applied twice daily.

(V58.61) AFTERCARE LONG TERM ANTICOAG USE
INR 2.0. No change in dose particularly before their train trip. Recheck when return.

(788.30) Urine incontinence
Letter describing number of visits for various issues and need for pose pads written and given to her son who is with her today. As no change in pattern, did not obtain UA today. She did have evidence of UTI on UA in Feb 2013 so when she returns from train trip could repeat UA. Culture however was not done in 2013 and epithelial cells were present in the specimen.

Time-based visit (attending time): 30 minutes were spent by the attending in direct face to face contact with the patient over 50 percent of which was spent in advising and counseling the patient about above.

Jeanne Leonie Hoffman

08/27/2014 - Office Visit in Hall Health Primary Care Center (continued)

Letters (continued)

RE: Jeanne Leonie Hoffman
DOB: 1/6/1925
MRN: N3927850

To whom it may concern:

I am the primary care physician for the above individual at University of Washington Medicine Hall Health on the UW campus.

Visits
Betweeen July 30, 2013 and July 30, 2014, Jean made 12 visits to my office.
Between April 2014 and August 2014, Jean made 5 visits including today.

Between July 30, 2013 and July 30, 2014, there were 13 visits for lab tests. 1 of these visits was not associate with a visit to me..
Between April 2014 and August 2014, 7 visits for lab tests

She comes to the UW from Bainbridge Island via ferry and bus. She uses a walker and because of this needs a bus that has a lift. Because of her need for a walker and her marked hearing impairment, she does need her son Louis to accompany her to and from visist. Jean with the help of her son has good knowledge of how to use the transit service to get to and from our office.

Need for Pose Adult Pads.
Due to age associate urine incontinence, Jean uses 3-4 Adult Pose Pads per day.

Sincerely,

Electronically signed by
William E Neighbor JR, MD

ADVANCE BENEFICIARY NOTICE OF NONCOVERAGE (ABN)

***NOTE*: If Medicare doesn't pay for** Visit **below, you may have to pay.**

Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the _____ below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost:
Code 99213 visit Description: related labs	**Check reason code (see back)** A ☐ B ☒ C ☐ D ☐	257.00 $

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the _____ listed above.

Note: If you choose Options 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

Options: **Check only one box. We cannot choose a box for you.**

☒ **OPTION 1**. I want the Visit listed above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I am responsible for payment, but **I can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2**. I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3**. I don't want the _____ listed above. I understand with this choice I am not responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-Medicare** (1-800-633-4227/**TTY**: 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

Clinical Notes

Telephone Encounter

Voronchuk, Eleonora at 8/25/2014 1449

Received a request to refill Losartan 25 mg. Please advise, patient has an appointment on 08/27/14

Electronically signed by Voronchuk, Eleonora at 8/25/2014 2:54 PM

Neighbor Jr., William E at 8/25/2014 1512

Earlier had tried reduction to one half tab daily, but at last visit she said she felt better on one tab daily. Felt cold when reduced to one half tab. Don't know why that might be. BP reasonable on 25 mg daily dose. Refilled. CMP showed normal electrolytes in February 2014.

RE: Referral Question

From	To	Sent and Delivered
William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	8/25/2014 3:42 PM

Last Read in MyChart
8/29/2014 2:56 PM by Hoffman, Jeanne Leonie

This requires a visit to make sure we get the letter correct. Usually there is a form they send to you to bring to the doctor, but I can write a letter instead. Please schedule a visit for this Wednesday. She should have an INR done as her last one was 1.8. I had written about getting a repeat done before your next train trip.

William E Neighbor JR, MD

Referral Question

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool	8/22/2014 1:41 PM

Dear Dill,

DSHS/EBT Program is requiring a Letter from You or Hall Health Center as to:

1). Number of visits since April to August, 2014

08/22/2014 - Patient E-mail in Hall Health Primary Care Center (continued)

Messages (continued)

2). Number of Visit to Roosevelt Clinic for 'Blood INR Testing" Visits.
3). Medical need for "Pose Adult Pads", as to urine leaks or Prescription for such.
4). Knowledge of or Handicap/Wheelchair Service offer by Bus/Transits or use of transit to get to UWMC Medical Services.

This is to estimate the cost of Medical Transportation and Medical Supply needs & Cost.
The information is used to determine how much EBT/Food Stamp Funds Jean will be entitled too.

This is a Proof of Cost to get to and from UWMC Services, that is being revalued.

Jean current estimate was $160 per month, with out proof statement.

Louis for Jean

Will pick-up on August 28 Visit, as it will be mailed that day. so jean can continue with food program.

08/12/2014 - Orders Only in Hall Health Family Health

Reason for Visit

Visit diagnoses:

- (primary)
- AFTERCARE LONG TERM ANTICOAG USE
- DEEP VENOUS PHLEBITIS-LEG NEC

Clinical Notes

Progress Notes

Neighbor Jr., William E at 7/30/2014 1118

Jeanne Leonie Hoffman is a 89 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up

(451.19) DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
(V58.61) AFTERCARE LONG TERM ANTICOAG USE
No recurrent phlebitis. Using elastic stockings. Compliant with coumadin. NO bleeding. In for INR.

(365.9) GLAUCOMA NOS
Need refill on drops. No eye visit since 2006. No acute change, but needs follow up

(401.1) BENIGN HYPERTENSION
At last visit had reduced losartan to 25 mg one half tab daily. She has generally done this but some days she feels

"cold" when she takes the half tab so takes a full tab and feels "warm" again.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [721.3]	08/30/2013
• Vertebral fracture [805.8] Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months, that is May 2013	12/13/2012
• Thyroid nodule, uninodular [241.0] CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.	12/13/2012
• OSTEOPOROSIS NOS [733.00] T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continue for five years, then stop	03/04/2008
• AFTERCARE LONG TERM ANTICOAG USE [V58.61] Reason for anticoagulation: Recurrent dvts Duration of anticoagulation: life INR goal: 2.-3 She has also been on Trental for many years because of recurrent venous stasis disease despite adequate anticoagulation. Her last arterial vascular study showed ABIs of 1.0 in 2007. 2/12/2010 repeat arterial vascular studies of lower extremities ordered.	01/08/2008
• ADULT FAILURE TO THRIVE [783.7] Lives in subsidized housing on Bainbridge Bremerton APS at 1-888-833-4925 Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved. Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait	10/19/2007
• TREMOR NEC [333.1] Noted by Melanie Parker. Consider Parkinson's disease med trial.	08/17/2007
• FX FEMUR INTRCAPS NOS-CLOSE [820.00] Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.	05/01/2007

- VITAMIN B DEFICIENCY NOS [266.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.

- Other convulsions [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- UTERINE LEIOMYOMA NOS [218.9] 11/20/2006
  S/P hysterectomy with BSO in 1991

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- CATARACT NOS [366.9] 11/20/2006
  Extraction left eye in 1989

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- Unspecified glaucoma(365.9) [365.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

Objective:

07/30/2014 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

BP 128/67 | Pulse 60 | Ht 5' 1.02" (1.55 m) | Wt 55.339 kg (122 lb) | BMI 23.03 kg/m2
Estimated body mass index is 23.03 kg/(m^2) as calculated from the following:
Height as of this encounter: 5' 1.02" (1.55 m).
Weight as of this encounter: 55.339 kg (122 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 128/67
General: NAD
Voice a bit hoarse from recent allergies.
Chest: Clear
Extr: No edema
Skin: Son had been concerned about "black head" on right cheek. I do not note any unusual mole or other blemish.

INR 2.8

Assessment and Plan:
(451.19) DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
No recurrence

(365.9) GLAUCOMA NOS
Refilled med. Due for eye referral.
Plan: Timolol Maleate 0.5 % Ophthalmic Solution,
REFERRAL TO EYE CARE

(401.1) BENIGN HYPERTENSION
Blood pressure adequately controlled on half dose of losartan. Would stay with this does in general. I am not sure of the occasional feeling of "coldness" when she just takes the half tab.

(V58.61) AFTERCARE LONG TERM ANTICOAG USE
INR in desired range.

Letter for train trip in September done.

Follow up plans: One month

RE: Jeanne Leonie Hoffman
DOB: 1/6/1925
MRN: N3927850

Dear Ms. Hoffman:

In preparation for your train trip in September, I have indicated below your health issues, medications, and immunizations records.

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [721.3]	08/30/2013
• Vertebral fracture [805.8]	12/13/2012
Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months, that is May 2013	
• Thyroid nodule, uninodular [241.0]	12/13/2012
CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.	
• OSTEOPOROSIS NOS [733.00]	03/04/2008
T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continue for five years, then stop	
• AFTERCARE LONG TERM ANTICOAG USE [V58.61]	01/08/2008
Reason for anticoagulation: Recurrent dvts Duration of anticoagulation: life INR goal: 2.-3	

She has also been on Trental for many years because of recurrent venous stasis disease despite adequate anticoagulation. Her last arterial vascular study showed ABIs of 1.0 in 2007. 2/12/2010 repeat arterial vascular studies of lower extremities ordered.

- FX FEMUR INTRCAPS NOS-CLOSE [820.00] 05/01/2007
  Pinned April 2007.
  Post op hematocrit 25
  Has walker with wheels for use outside of home. Uses cane in home.

- VITAMIN B DEFICIENCY NOS [266.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

- Other convulsions [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013
  No recurrence

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- CATARACT NOS [366.9] 11/20/2006
  Extraction left eye in 1989

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006

07/30/2014 - Office Visit in Hall Health Primary Care Center (continued)

Letters (continued)

LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- Unspecified glaucoma(365.9) [365.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [V70.0] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: yes
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

Current Outpatient Prescriptions

Scan (below)

Washington State Health Care Authority

Agreement to Pay for Healthcare Services

WAC 182-502-0160 ("Billing a Client")

This is an agreement between a "client" and a "provider," as defined below. The client agrees to pay the provider for healthcare service(s) that the Health Care Authority (HCA) will not pay. Both parties must sign this Agreement. For the purposes of this Agreement, "services" include but are not limited to healthcare treatment, equipment, supplies, and medications.

Client - A recipient of Medicaid or other healthcare benefits through the HCA or a managed care organization (MCO) that contracts with the HCA.
Provider - An institution, agency, business, or person that provides healthcare services to HCA clients and has a signed agreement with the HCA or authorization from an MCO.

This Agreement and WAC 182-502-0160 apply to billing a client for covered and noncovered services as described in WAC 182-501-0050 through WAC 182-501-0070. Providers may not bill any HCA client (including those enrolled with an MCO that contracts with the HCA) for services which the HCA or an MCO that contracts with the HCA may have paid until the provider has completed all requirements for obtaining authorization.

CLIENT'S PRINTED NAME	Jeanne Hoffman	CLIENT'S ID NUMBER	100675000 JHU
PROVIDER'S PRINTED NAME	Dr. William Dighiera	PROVIDER NUMBER	1760575 1878 95

Directions:

- Both the provider and the client must fully complete this form **before** an HCA client receives any service for which this Agreement is required.
- You must complete this form no more than 90 calendar days before the date of the service. If the service is not provided within 90 calendar days, the provider and client must complete and sign a new form.
- The provider and the client must complete this form only **after** they exhaust all applicable HCA or HCA-contracted MCO processes which are necessary to obtain authorization for the requested service(s). These may include the exception to rule (ETR) process for noncovered services as described in WAC 182-501-0160 or the administrative hearing process, if the client chooses to pursue these processes.
- Limited English proficient (LEP) clients must be able to understand this form in their primary language. This may include a translated form or interpretation of the form. If the form is interpreted for the client, the interpreter must also sign and date the form. Both the client and the provider must sign a translated form.

Fully complete the table on back of this form. If needed, attach another sheet for additional services. The client, provider, and interpreter (if applicable) must sign and date each additional page.

Important Note from HCA:

- This agreement is void and unenforceable if the provider fails to comply with the requirements of this form and WAC 182-502-0160 or does not satisfy HCA conditions of payment as described in applicable Washington Administrative Code (WAC) and Billing Instructions. The provider must reimburse the client for the full amount paid by the client.
- See WAC 182-502-0160(9) for a list of services that cannot be billed to a client, regardless of a written agreement.
- Keep the original agreement in the client's medical record for 6 years from the date this agreement is signed. Give a copy of this completed, signed agreement to the client.
- Providers are responsible for ensuring that translation or interpretation of this form and its content is provided to LEP clients. Translated forms are available at http://hrsa.dshs.wa.gov/mpforms.shtml.

office visit & related labs		84-404 $	☑ Noncovered service ☐ Noncovered service, ETR waived ☐ Non-formulary drug, NFJ waived ☐ Covered but denied as not medically necessary ☐ Covered, but specific type not paid for ☐ Order, prescribed, or referred by non-enrolled licensed health care professional		ETR REQUESTED OR WAIVED PA REQUEST	ETR DENIAL (ATTACH HCA NOTICE) PA DENIAL (ATTACH HCA NOTICE)
			☐ Noncovered service ☐ Noncovered service, ETR waived ☐ Non-formulary drug, NFJ waived ☐ Covered but denied as not medically necessary ☐ Covered, but specific type not paid for ☐ Order, prescribed, or referred by non-enrolled licensed health care professional		ETR REQUESTED OR WAIVED PA REQUEST	ETR DENIAL (ATTACH HCA NOTICE) PA DENIAL (ATTACH HCA NOTICE)
			☐ Noncovered service ☐ Noncovered service, ETR waived ☐ Non-formulary drug, NFJ waived ☐ Covered but denied as not medically necessary ☐ Covered, but specific type not paid for ☐ Order, prescribed, or referred by non-enrolled licensed health care professional		ETR REQUESTED OR WAIVED PA REQUEST	ETR DENIAL (ATTACH HCA NOTICE) PA DENIAL (ATTACH HCA NOTICE)

- I understand that HCA or an MCO that contracts with HCA will not pay for the specific service(s) being requested for one of the following reasons, as indicated in the above table: 1) HCA does not cover the service(s); 2) the service(s) was denied as not medically necessary for me, or 3) the service(s) is covered but the type I requested is not.
- I understand that I can, but may choose not to: 1) ask for an Exception to Rule (ETR) after an HCA or HCA-contracted MCO denial of a request for a noncovered service; 2) submit a Non-Formulary Justification (NFJ) with the help of my prescriber fro a non-formulary medication; or 3) ask for a hearing to appeal an HCA or HCA-contracted MCO denial of a requested service.
- I have been fully informed by this provider of all available medically appropriate treatment, including services that may be paid for by the HCA or an HCA-contracted MCO, and I still choose to get the specified service(s) above.
- I understand that HCA does not cover services ordered by, prescribed by, or are a result of a referral from a healthcare provider who is not contracted with HCA as described in Chapter 182-502 WAC.
- ***I agree to pay the provider directly for the specific service(s) listed above.***
- I understand the purpose of this form is to allow me to pay for and receive service(s) for which HCA or an HCA-contracted MCO will not pay. This provider answered all my questions to my satisfaction and has given me a completed copy of this form.
- I understand that I can call HCA at 1-800-562-3022 to receive additional information about my rights or services covered by HCA under fee-for-service or managed care.

I AFFIRM: I understand and agree with this form's content, including the bullet points above.	CLIENT'S OR CLIENT'S LEGAL REPRESENTATIVE'S SIGNATURE	DATE 7-30-14
I AFFIRM: I have complied with all responsibilities and requirements as specified in WAC 182-502-0160.	PROVIDER OF SERVICE(S) SIGNATURE	DATE 7/30/14
I AFFIRM: I have accurately interpreted this form to the best of my ability for the client signing above.	INTERPRETER'S PRINTED NAME AND SIGNATURE	DATE

Review of Systems:
Constitutional: Denies weight gain.
Respiratory: Denies cough, shortness of breath.
Cardiovascular: Denies chest pain, palpitations, syncope, orthopnea, paroxysmal noctural dyspnea, lower extremity edema.

Studies reviewed
US carotids carotids May 2014 nl
CT had June 2012 lacunar infarcs internal capsule on right

Objective:
BP 127/74 | Pulse 64 | Temp(Src) 98.6 °F (37 °C) (Oral) | Wt 55.792 kg (123 lb) | BMI 19.26 kg/m2
Estimated body mass index is 19.26 kg/(m^2) as calculated from the following:
Height as of 2/27/07: 5' 7" (1.702 m).

06/25/2014 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Weight as of this encounter: 55.792 kg (123 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 127/74
General: NAD
Right second toe shows small persistent bruising distal tuft. Tender at tuft. Less tender pip joint and no tenderness at base of toe. No subungual hematoma.

INR pending.

Assessment and Plan:
(V58.61) AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
INR to be done today. She did not get it done before visit. I will contact her tomorrow with results.

(451.19) DEEP VENOUS PHLEBITIS-LEG NEC
No recurrence

(401.1) BENIGN HYPERTENSION
Some dizziness periodically which could be due to blood pressure over treatment. Her blood pressure is good today. Weight is down over time consistent with age. Suggest that we reduce losartan 25 mg to one half tablet daily. See me in one month.

Right second toe contusion.
Cannot rule out fracture of the tuft of the distal portion of the toe. The injury was a month ago. There is nothing we would do differently and she is tolerating the discomfort well. Expect gradual healing.

Has not been weight for some time. Gradual decline in weight consistent with age. Spoke with son who said living situation improved. He is her care provider at home.

Time-based symptom visit: 30 minutes were spent by the attending in direct face to face contact with the patient over 50 percent of which was spent in advising and counseling the patient about above.

Last Read in MyChart
6/3/2014 8:25 AM by Hoffman, Jeanne Leonie

Hi Jeanne,
Your INR is 2.4, back in therapeutic range. I know your INR has jumped around a little, and sounds from our discussion yesterday that your diet has varied in regard to some of the foods that can change the INR. We discussed trying to keep your diet very similar day to day in regard to those foods.
I recommend that today you take 7.5 mg coumadin dose today (one and one half of the 5 mg tablets), then 5 mg every day after that.
Please recheck your INR in 1 week (same day as appointment with Dr. Neighbor).
Also make an appointment with Dr. Neighbor for in 1 week, to discuss the result.
Please call us if any concerns or questions.
Lili L Church, MD

Clinical Notes

Progress Notes

Church, Lili L at 5/29/2014 1138

Jeanne Leonie Hoffman is a 89 year old female very HOH

Chief Complaint

Patient presents with

- Lab Test

Is anticoagulated for recurrent LE DVTs since 1982. She notes her INRs vary a lot, with dose needing to be changed every 6 months or so. Gets INRs usually 1x/mo.

Dose last changed from 10 to 5 mg daily about 1 year ago, but after most recent INR last week was instructed to take 7.5mg one day, then resume 5 mg q d, all of which she has done.

Diet, including alternating green with back tea, hasn't changed per pt. Later pt's son Louis joined and noted lately diet, esp certain cruciferous veggies have varied quite a lot and recently increased several times weekly.

Pt denies any bleeding sxs eg gums, stool, easy brusing more than typical, new rashes. Doesn't have falls. She has no sxs of concern. Is HOH but shouting works.

05/29/2014 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Pt notes tries to keep INR about 2.0. ProbList suggests 2-3.

INRs:
5/14/14 1.6
4/14/14 2.0

Lives at home, active in garden. Son lives with her and helps care for her, and her for him per pt!

Per LOV w/ Dr. Neighbor 5/14/14: " In Dec and Jan was about 2.4, then dropped to 2.2, then 2. Then 1.6 today" A/P then was: "Unclear cause. Complaint with medication and no changes diet. She does not take vitamins other than B12 and Vitamin D. This pattern of unexpected drop in INR has occurred with her before and seems to resolve with slight temporary change in med.
Plan is to take extra half tab of coumadin 5 mg tonight and Friday night. Continue regular daily 5 mg. Recheck in May 29"

Sees Dr. Neighbor about 1x/month, more frequent PRN when coumadin changing.

Reviewed her extensive hx: Allergies, Medications, Problem List, Past Medical History, Surgical History, Social Documentation

O: BP 118/68 | Pulse 63 | Temp(Src) 97.9 °F (36.6 °C)
Alert, NAD.
MS: In good spirits. With shouting, pt demonstrates logical thought process. Speech nl.

Labs: see HPI re INRs. No INR done yet today

Imp:
(V58.61) AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
Comment: Recent subtherapeutic INR, in context of INRs that have generally otherwise been stable, may be explained (or not) by recent diet variation. Disc'd w/ pt and son (who does the cooking), rationale for consistency with diet, and ok to have most foods as long as consistent. No sxs bleeding. Challenging interaction d/t pt's HOH, and son seeking support.
Plan:
Get rapid INR at Roos lab now
I will call son Louis w/ INR results and med plan: 206-855-0815. If unable to reach him, send ecare message to Jeanne. He has access to her eCAre, which pt today confirms is fine

This 25 minute visit spent greater than half on counseling.

Lili L Church, MD

Addendum: eCare message sent re: INR 2.4. Rec incr coumadin to 7.5 x 1 day, then 5 mg daily. In 1 wk check INR and RTC see Dr. Neighbor to disc result. -LC

ADVANCE BENEFICIARY NOTICE OF NONCOVERAGE (ABN)

NOTE: If Medicare doesn't pay for Visit **below, you may have to pay.**

Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the _____ below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost:
Code _____ Description: Routine Visit	Check reason code (see back) A ☐ B ☑ C ☐ D ☐	$98 - $406

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the _____ listed above.

Note: If you choose Options 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

Options: Check only one box. We cannot choose a box for you.

☐ **OPTION 1.** I want the Visit listed above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I am responsible for payment, but I **can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2.** I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3.** I don't want the _____ listed above. I understand with this choice I am not responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-Medicare** (1-800-633-4227/**TTY**: 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

RE: Results Question

From	To	Sent and Delivered
William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	5/16/2014 5:04 PM

Last Read in MyChart
Not Read

Louis: I would not go overboard. She should eat the food she enjoys eating and the main thing is general consistency. If any of the foods you listed below are new additions to her diet in reasonable amounts then they may account for the change. However, if she enjoys those, then we can adjust the coumadin dose rather than have her remove foods that she likes. Does this make sense.

William E Neighbor JR, MD

Results Question

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool	5/15/2014 3:43 PM

POSSIBLE LINKS TO "K".

As diet includes the following from time to time.
Will cut frm diet

HERBS: Long used for medicinal purposes, herbs are packed with nutrients and vitamin K is no exception. Dried Basil, Dried Sage, and Dried Thyme all contain the most with 1715μg (2143% DV) per 100g serving, or up to 51μg (64% DV) per tablespoon. They are followed by Fresh Parsley (82% DV per tblsp), Dried Coriander, Dried Marjoram, Dried Oregano, and finally fresh basil with 10μg (13% DV) per tablespoon

BROCOLLI: Vitamin K is just another reason to eat everyone's favorite vegetable. Broccoli contains 141μg (176% DV) of vitamin K per 100g serving, that is 220μg (276% DV) per cup, and 52μg (65% DV) in an average spear, or piece, of brocolli.

PRUNES:High in fiber, zinc, and even iron, prunes are great health food. 100 grams will provide 60μg (74% DV) of vitamin K, or 104μg (129% DV) per cup, and 6μg (7% DV) in a single prune.

ASPARAGUS: 100 grams will provide 80μg (100% DV) of vitamin K, that is 144μg (180% DV) per cup, and 48μg (60% DV) in 4 spears.

Progress Notes

Neighbor Jr., William E at 5/14/2014 1124

Jeanne Leonie Hoffman is a 89 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Check Up
  f/u per provider

(451.19) DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
(V58.61) AFTERCARE LONG TERM ANTICOAG USE
In for INR today. Compliant with med. No changes in diet. Drinks green tea alternating with black tea but this is not a change for her. No bleeding. NO LE pain or swelling. Wears compression stockings.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [721.3]	08/30/2013

05/14/2014 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

- Vertebral fracture [805.8] 12/13/2012
  Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months, that is May 2013

- Thyroid nodule, uninodular [241.0] 12/13/2012
  CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011.
  5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.

- OSTEOPOROSIS NOS [733.00] 03/04/2008
  T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
  Began fosamax spring 2008. Continue for five years, then stop

- AFTERCARE LONG TERM ANTICOAG USE [V58.61] 01/08/2008
  Reason for anticoagulation: Recurrent dvts
  Duration of anticoagulation: life
  INR goal: 2.-3

  She has also been on Trental for many years because of recurrent venous stasis disease despite adequate anticoagulation. Her last arterial vascular study showed ABIs of 1.0 in 2007. 2/12/2010 repeat arterial vascular studies of lower extremities ordered.

- ADULT FAILURE TO THRIVE [783.7] 10/19/2007
  Lives in subsidized housing on Bainbridge
  Bremerton APS at 1-888-833-4925
  Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
  Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait

- TREMOR NEC [333.1] 08/17/2007
  Noted by Melanie Parker. Consider Parkinson's disease med trial.

- FX FEMUR INTRCAPS NOS-CLOSE [820.00] 05/01/2007
  Pinned April 2007.
  Post op hematocrit 25
  Has walker with wheels for use outside of home. Uses cane in home.

- VITAMIN B DEFICIENCY NOS [266.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without 03/27/2007

mention of complication, not stated as uncontrolled
[250.00]
Year onset: Dx March 2007
Metformin discontinued 2011 as A1c in target range without it.

- Other convulsions [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- UTERINE LEIOMYOMA NOS [218.9] 11/20/2006
  S/P hysterectomy with BSO in 1991

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- CATARACT NOS [366.9] 11/20/2006
  Extraction left eye in 1989

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- Unspecified glaucoma(365.9) [365.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- ROUTINE MEDICAL EXAM [V70.0] 11/20/2006
  Td/Tdap (q 10 yr): 2006
  Pneumococcal (65 yoa and high risk x1): 2010
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.

Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
Tobacco: no
Alcohol: no
Drugs: no
Sexual practice/contraception: Not active
Advanced directives: yes
Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
Advise Vit D 800 IU daily.

Objective:

BP 147/83 | Pulse 62
Estimated body mass index is 20.04 kg/(m^2) as calculated from the following:
Height as of 2/27/07: 5' 7" (1.702 m).
Weight as of 11/7/12: 58.06 kg (128 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 147/83
General: NAD
Hard o hearing

INR 1.6. In Dec and Jan was about 2.4, then dropped to 2.2, then 2. Then 1.6 today

Assessment and Plan:

(451.19) DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
(V58.61) AFTERCARE LONG TERM ANTICOAG USE
Unclear cause. Complaint with medication and no changes diet. She does not take vitamins other than B12 and Vitamin D. This pattern of unexpected drop in INR has occurred with her before and seems to resolve with slight

05/14/2014 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

temporary change in med.

Plan is to take extra half tab of coumadin 5 mg tonight and Friday night. Continue regular daily 5 mg. Recheck in May 29 When they will be at the U.

Other issues discussed were her hearing loss. She wants to pay off some other bills before getting new more expensive hearing aids.

She mentions her nails have been brittle. Will check iron level at next blood draw.

Spoke with son Louis to review above. Housing situation is improved and final plan is being worked out.

I don't quit understand the message. Are they going to send me a form to fill out--the usual; or do they want me to call them first. My experience is that if I call, all they say is that they are sending me a form on which to provide a report. Happy to call though if it is needed.

Reasonable Accommodation and/or Modification Tenant Information Sheet

A reasonable accommodation is some exception or change that a housing provider makes to rules, policies, services, or regulations that will assist a resident or applicant with a disability in taking advantage of a housing program and/or dwelling. A reasonable modification is an alteration to the physical premises allowing a person with a disability to overcome obstacles that interfere with his or her use of the dwelling and or common areas. The accommodation and/ or modification must be **necessary** for the individual with the disability to enjoy and/or fully use services offered to other residents and/or the individual dwelling unit.

Reasonable accommodations can include but are not limited to:

- A change in the rules or policies or how a housing provider does things that would make it easier for you to live in the dwelling;
- Permitting a seeing eye dog for a household in a community where pets are not allowed, or not charging a deposit for a service animal though the housing provider charges deposits for pets;
- Permitting an outside agency to assist a disabled resident to meet the terms of the lease;
- Permitting a live-in Personal Care Attendant to live with a disabled resident who might need 24 hour assistance;
- A change in the way a housing provider communicates with or gives information, such as increasing font size of typed documents to a person with a visual impairment.

Reasonable modifications can include, but are not limited to:

- A structural change or repair in your apartment or another part of the apartment complex that would make it easier for you to live in the dwelling;
- Modifying a unit to accommodate sight or hearing impaired individuals.

KCCHA will grant reasonable accommodation and modification requests that are not unduly burdensome and/or do not represent a fundamental alteration of the housing program. You will receive a response in writing to any request. If a request is denied, the reasons for denial will be stated in the response.

There must be a verifiable disability involved in order for the household to qualify for a reasonable accommodation and/or modification. The housing provider is required by law to keep all information about the disability confidential. A person has a disability if he or she has a physical or mental impairment that substantially limits one or more major life activities, has a record of such impairment, or is regarded as having such impairment. A disabled resident must still be able to meet essential obligations of tenancy—they must be able to pay rent, to care for the apartment, to report required information to the manager, avoid disturbing neighbors, etc., but there is no requirement that they be able to do these things without assistance.

Using the attached forms will help you and your housing provider to better formulate the request and implement any follow up necessary. The attached forms include:

- A Request for a Reasonable Accommodation and/or Modification. This form verifies your request and authorizes your medical provider and/or social services professional to certify your status as a person with a disability and your need for the accommodation and/or modification. (For you to complete)
- Verification of the Need for an Accommodation and/or Modification. (For your health care provider, such as a doctor, nurse, therapist, or social worker, to compete)

If you need any assistance completing any of the forms you may have someone assist you.

Housing Kitsap (HK) welcomes qualified tenants without regard to race, color, national origin, creed, religion, sex, marital status, familial status, disability or due to ownership of a service animal. HK provides reasonable accommodations to persons with disabilities. If you need this document in an alternate format, please contact HK's Section 504 Coordinator, Leah Noldan, at (360) 535-6174.

Verification of a Reasonable Accommodation For a Person with a Disability (REVISON 4.29.14)

To: Dr. William E. Neighbor, Jr. MD (206) 616-4683
(Name of professional or organization) (Address or Fax Number)

Re: Name of resident or applicant: Jean Hoffman
Address: 245 High School Rd NW #2, Bainbridge Island, WA 98110

The above resident or applicant has informed Housing Kitsap (HK) that he/she is disabled and, as an accommodation to his/her disability, has asked HK to make an exception to its rules or practices or to pay for a modification to his/her apartment. This person has listed you as someone who can help us understand the request better and to verify information so HK can respond to this request.

Please fill out this form. It poses three questions on the following pages. When you are done please return the form via fax (360) 535-6165, Attention: Leah Noldan.

NOTE: IF NECESSARY ACCOMMODATION IS FOR ☐ TRANSFER, ☐ ASHTMA, ☑ LIVE-IN AIDE AND/OR EXTRA BEDROOM, PLEASE ALSO COMPLETE THE ADDITIONAL RELATED QUESTIONNAIRE FORM.

DISABILITY DEFINITIONS

Washington State Law (RCW 49.60) Disability is defined as, the presence of a sensory, mental, or physical disability when a condition is medically cognizable or diagnosable, exists as a record or history, or is perceived to exist whether or not it exists in fact.

Federal Law—Disability is defined as, "Any person who has a physical or mental impairment that substantially limits one or more major life activities; has a record of such impairment; or is regarded as having such impairment." *Major life activity means functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning and working.*

This is not a request for medical records or detailed information about the disability. Please limit your remarks to describing functional limitation(s) and to confirming that the accommodation that is requested above is relevant to the client's need.

Please check only those that apply to the following:

1) How current is your knowledge of the household member's disability?
- ☒ I have met with this individual to discuss his/her disability **within the last six months**
- ☐ The last time I met with this individual to discuss his/her disability **was over six months ago**
- ☐ Other (please explain): _____

2) In my professional opinion and assessment:
- ☒ **The household member requesting the accommodation(s) HAS a disability** based on one or both of the legal definitions above
- ☐ **The household member requesting the accommodation(s) does NOT have a disability** *(proceed to last page, sign and return)*
- ☐ I do not have enough information or training to make this assessment

3) Please indicate in your professional opinion and assessment whether the accommodation/modification is **necessary** to allow this household member equal opportunity to use and enjoy the housing and/or facilities in question for reasons related to the disability you believe the person to have:

Received Time May. 6. 2014 4:17PM No. 1952

Housing Kitsap (HK) welcomes qualified [illegible] regard to race, color, national origin, creed, religion, sex, marital status, familial status, disability or due to ownership of a service animal. LIVE-IN AIDE AND / OR EXTRA BEDROOM QUESTIONNAIRE

(Request for More Information to Qualified Provider Regarding Reasonable Accommodation)

The household member listed below has applied for, or is a participant in, a housing program provided by Housing Kitsap. A Live-In Aide and / or extra bedroom has been requested for this household member and we must obtain verification that the Live-In Aide is essential to the care and well-being of the household member or that the extra bedroom is required.

Household Member Who Requests Accommodation: ***Jean Hoffman***
☑ ***Family member identified as the Live-In Aide:*** ***Louis Hoffman***

A) LIVE-IN AIDE REQUEST:

Live-In Aide means *a person who resides with one or more elderly persons, or near-elderly person, or persons with disabilities, and who 1) Is determined to be essential to the care and well-being of the persons; 2) Is not obligated for the support of the persons; and 3) Would not be living in the unit except to provide the necessary supportive services.*

1) **In reviewing the patient's file, it is your professional opinion that:**
   - a) ☒ **Live-In Aide is Necessary** to ensure the care and well-being of the household member**
   - b) ☐ **Live-In Aide is NOT Necessary as Alternative/s available, ie Daily In-Home Worker**
   - c) ☐ **Live-In Aide is Beneficial** but NOT Necessary
   - d) ☐ **Live-In Aide is NOT Beneficial** and NOT Necessary
   - e) ☐ Lack enough information to say

If you selected option b) – e) please skip to section B) Extra Bedroom Request.

**If you indicated a Live-In Aide is Necessary then using the checklist below, indicate the activities of daily living (ADLs) with which the person requesting a live-in aide requires assistance and with which the live-in aide would provide assistance.

☐ Walking	☐ Standing	☐ Sitting
☒ Cooking/food preparation	☐ Feeding him or herself	☐ Drinking
☒ Shopping	☒ Housecleaning	☒ Laundry
☐ Bathing	☐ Grooming	☐ Dressing (clothes)
☒ Taking medication	☐ Handling financial matters	☐ Decision-making
☐ Memory	☐ Lifting	☐ Reaching
☐ Transfer to from bed, chair/couch, bathtub and/or shower	☐ Application of wound dressings (changing/applying cloth or adhesive bandages, antiseptics, etc	☐ Other *(Please specify in non-technical term that simply describe the ADLs with which the client needs assistance)*

Other Explained:

Received Time to May. 6. 2014 4:17PM No. 1952

Housing Kitsap (HK) welcomes qualified tenants without regard to race, color, national origin, creed, religion, sex, marital status, familial status, disability or due accommodations to persons with disabilities. May. 6. 2014 4:01PM NO. 4147 P. 1

Live-In Aide / Extra Bedroom Questionnaire Continued from Page 1:

2) **Does the Household Member require a Live-In Aide on a temporary basis only?**
☐ Yes ☒ No ☐ Not Applicable
➢ If you indicated yes please provide an estimate of the duration of time (in months and/or years) during which the Live-In Aide must provide services that are essential to the care and well-being of the Household Member.

3) **If a family member is identified as the Live-In Aide, per your professional opinion and assessment that individual is qualified to perform the required duties.**
☒ Yes ☐ No ☐ Not Applicable

4) **A Daily In-Home Worker would not be an equal alternative accommodation because** ***(please explain)***

NEED FOR ASSISTANCE EVENINGS & NIGHTS

B) EXTRA BEDROOM REQUEST:

1) **In my professional opinion and assessment of the disabled Household Member's needs I certify that:**
a) ☒ Live-In Aide **DOES Require** an additional bedroom
b) ☐ Medical equipment or assistive device **DOES Require** an additional bedroom *(please describe equipment or device)*_____
c) ☐ Medical equipment or assistive device **could be used/stored in a place other than an additional bedroom**
d) ☐ **Other** reason additional bedroom is required_____
e) ☐ Lack enough information to say

Failure to provide all the applicable information can result in the disapproval of the request.

NOTE: Section 1001 of Title 18 of the US Code makes it a criminal offense to make any willful false statements or misrepresentations to any Department or Agency of the United States as to any matter within its jurisdiction, punishable by fine not to exceed $250,000 and/or imprisonment of not more than 5 years.

Telephone Encounter

Crites, Stacy R at 3/26/2014 1302

Received call from Julie Stone, Housing Board @ 206-842-1909, X 2#.
She is calling in concern for Jeanne and Louis Hoffman who are both patients of Dr. Neighbor.
This family has immediate housing concerns and they are currently facing imminent eviction.
She request Dr. Neighbor contact her for help arrange support for this family. Julie will be in her office today and tomorrow 11-4pm.
Stacy Crites, RN

Electronically signed by Crites, Stacy R at 3/26/2014 1:07 PM

Voronchuk, Eleonora at 3/26/2014 1652

Patient's son called and left a message stated that Jeanne needs to be placed in the safe house temporarily because she is experiences a lot or dangerous situation and hate and he think that her life is in danger. He also mentioned if UW has a place for both of them temporarily. They can be reached at 206-780-6885.

Clinical Notes

Progress Notes

Neighbor Jr., William E at 4/7/2014 1851

Jeanne Leonie Hoffman is a 89 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  per provider

(V58.61) AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
(451.19) DEEP VENOUS PHLEBITIS-LEG NEC
No recurrent leg swelling. Wearing compression stockings daily. Taking Coumadin as prescribed. Denies bleeding or unexpected bruising.

(389.10) SENSORNEUR HEAR LOSS NOS
See last visit note. She stopped vitamin B12 for two weeks to see if this made any change in the "rumbling" noises she hears. It did not. She believes she needs new hearing aids, but does not want to have them checked out right now.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [721.3]	08/30/2013
• Vertebral fracture [805.8]	12/13/2012

Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months, that is May 2013

- Thyroid nodule, uninodular [241.0] 12/13/2012

CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011.
5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.

- OSTEOPOROSIS NOS [733.00] 03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continue for five years, then stop

- AFTERCARE LONG TERM ANTICOAG USE [V58.61] 01/08/2008

Reason for anticoagulation: Recurrent dvts
Duration of anticoagulation: life
INR goal: 2.-3

She has also been on Trental for many years because of recurrent venous stasis disease despite adequate anticoagulation. Her last arterial vascular study showed ABIs of 1.0 in 2007. 2/12/2010 repeat arterial vascular studies of lower extremities ordered.

- ADULT FAILURE TO THRIVE [783.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait

- TREMOR NEC [333.1] 08/17/2007

Noted by Melanie Parker. Consider Parkinson's disease med trial.

- FX FEMUR INTRCAPS NOS-CLOSE [820.00] 05/01/2007

Pinned April 2007.
Post op hematocrit 25
Has walker with wheels for use outside of home. Uses cane in home.

- VITAMIN B DEFICIENCY NOS [266.9] 05/01/2007

Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.

- Other convulsions [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- UTERINE LEIOMYOMA NOS [218.9] 11/20/2006
  S/P hysterectomy with BSO in 1991

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- CATARACT NOS [366.9] 11/20/2006
  Extraction left eye in 1989

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- Unspecified glaucoma(365.9) [365.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- ROUTINE MEDICAL EXAM [V70.0] 11/20/2006
  Td/Tdap (q 10 yr): 2006
  Pneumococcal (65 yoa and high risk x1): 2010

Blood pressure: Dx hypertension
Cholesterol: dx hyperlipidemia
Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
Pap smear (q2-3 yrs to age 65)--82 years old
Colorectal cancer screening: Sig to 30 cm in May 2001.
Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
Tobacco: no
Alcohol: no
Drugs: no
Sexual practice/contraception: Not active
Advanced directives: yes
Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
Advise Vit D 800 IU daily.

Clinical Notes (continued)

Assessment and Plan:
(V58.61) AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
(451.19) DEEP VENOUS PHLEBITIS-LEG NEC
INR therapeutic. Continue current dose. REcheck one month. Continue wearing compression stockings. Report any unexpected bruising.

(389.10) SENSORNEUR HEAR LOSS NOS
Stable. She does not want to see audiology right now. As there was no change with stopping Vit B12, (would not have expected any) she should return to taking vitamin B12 as prescribed.

She is concerned because of a housing hearing coming up on Bainbridge in a few days after this visit. She asked me to talk with her son who is here for appointment further about this.

Telephone Encounter

Mercado, Mila N at 3/10/2014 1406

Pt's son called saying that Jeanne is now being threatened with eviction and doesn't have a place to go to. He wants to know if you know a safe place where Jeanne can go and prefers the Seattle area. Their apartment manager is Heather Ladou.

Electronically signed by Mercado, Mila N at 3/10/2014 2:13 PM

Neighbor Jr., William E at 3/10/2014 1701

I have been trying to respond to a handwritten message someone left on my desk to call Debbie from Adult Care Center ph 360-473-2167 regarding this patient.
I would appreciate your calling her to set up an telephone meeting with me. Ken Gloria upstairs has my calendar if this cannot be accommodated during one of my clinic sessions.

Thanks.

William E Neighbor JR, MD

Electronically signed by Neighbor Jr., William E at 3/10/2014 5:04 PM

Voronchuk, Eleonora at 3/12/2014 1027

Called Debbie and left a msg to call me ASAP to set a phone meeting with Dr.Neighbor. Also provided my e-mail for better communication

Electronically signed by Voronchuk, Eleonora at 3/12/2014 10:28 AM

03/10/2014 - Telephone in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Voronchuk, Eleonora at 3/12/2014 1450

Debbie called and I set phone meeting for 03/14/14 at 10:20 am

Electronically signed by Voronchuk, Eleonora at 3/12/2014 2:52 PM

Neighbor Jr., William E at 3/14/2014 1054

Spoke with Debbie at Adult Protective Services (not Adult Care Center as I wrote below). Phone number was correct. She has visited the apartment. Some wiring has been fixed by the apt managers. She did not note moisture problems. An issue is the clutter related to computers that son Louise keeps. Seemed that relationship between mother and son was supportive. An issue is that if Jeanne wer to move out, her son would not be able to join her for legal reasons. No further action needed at this time.

Clinical Notes

Progress Notes

Neighbor Jr., William E at 2/21/2014 1120

Jeanne Leonie Hoffman is a 89 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Medication management
- Headache
  L) side

(388.30) Tinnitus (primary encounter diagnosis)
In last two weeks has noted pounding alternating with high pitched sound in left ear which occurs intermittently. She has not noted changing hearing. No ear pain. Hearing aids fitting properly and recently changed batteries. Although initially said had not experienced this before, later she say she has intermitently noted this, but it is more persistent in the last two weeks.

She denies recent URI, fever, chills, sinus symptoms. She has had no change in vision, speak, swallowing. She has

noted a buzzing sensation throughout her body which is apparently new, but no other paresthesias and no weakness. Balance has been similar to what it has been in the past. She uses a walker.

The only change in her meds has been addition of what she says is high potency vitamin B complex. I had tod her to take a vitamin B 12 and folate supplement because of a mildly elevated MMA. She did not bring the vitamins in today.

(451.19) DEEP VENOUS PHLEBITIS-LEG NEC
Stable dose of coumain one daily. No bleeding. No recurrence of leg swelling.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [721.3]	08/30/2013
• Vertebral fracture [805.8] Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months, that is May 2013	12/13/2012
• Thyroid nodule, uninodular [241.0] CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.	12/13/2012
• OSTEOPOROSIS NOS [733.00] T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continue for five years, then stop	03/04/2008
• AFTERCARE LONG TERM ANTICOAG USE [V58.61] Reason for anticoagulation: Recurrent dvts Duration of anticoagulation: life INR goal: 2.-3 She has also been on Trental for many years because of recurrent venous stasis disease despite adequate anticoagulation. Her last arterial vascular study showed ABIs of 1.0 in 2007. 2/12/2010 repeat arterial vascular studies of lower extremities ordered.	01/08/2008
• ADULT FAILURE TO THRIVE [783.7] Lives in subsidized housing on Bainbridge Bremerton APS at 1-888-833-4925 Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved. Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait	10/19/2007

02/21/2014 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

- TREMOR NEC [333.1] 08/17/2007
  Noted by Melanie Parker. Consider Parkinson's disease med trial.

- FX FEMUR INTRCAPS NOS-CLOSE [820.00] 05/01/2007
  Pinned April 2007.
  Post op hematocrit 25
  Has walker with wheels for use outside of home. Uses cane in home.

- VITAMIN B DEFICIENCY NOS [266.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.

- Other convulsions [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- UTERINE LEIOMYOMA NOS [218.9] 11/20/2006
  S/P hysterectomy with BSO in 1991

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- CATARACT NOS [366.9] 11/20/2006
  Extraction left eye in 1989

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- GLAUCOMA NOS [365.9] 11/20/2006
- ROUTINE MEDICAL EXAM [V70.0] 11/20/2006

  Td/Tdap (q 10 yr): 2006
  Pneumococcal (65 yoa and high risk x1): 2010
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: yes
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

1/30/2007 Nancy at Helpline House, 282 Knechtel Ave NE, Bainbridge Island , WA 98110 Voice 842-7624, Fax 842.9867, called last week. See RN telephone. Note. The plan is to call Nancy once I have assessed Mrs. Hoffman's needs when I see her at an upcoming visit.

6/15/2010 Grew up on Bainbridge. Both parents from Paris. Spoke French at home and English in Public. She recalls her first clot was in her legs when she was 30. She also developed clot in her arms later. She states her grandmother had the same problem.

History

Substance Use Topics

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used
- Alcohol Use: Not on file

Objective:
BP 180/74 | Pulse 61 | Temp(Src) 98.3 °F (36.8 °C)
Estimated body mass index is 20.04 kg/(m^2) as calculated from the following:
Height as of 2/27/07: 5' 7" (1.702 m).
Weight as of 11/7/12: 58.06 kg (128 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 180/74
General: NAD. Wearing hearing aids.
Ears; Externally normal. With aides removed, canals and TMS are clear bilaterally.

02/21/2014 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Head: No tenderness of scalp.
CV: Carotids clear. Heart without murmur. Pulses sym and regular at wrists.
Neuro: Speech normal. RAM and FTN normal for age and sym. No pronator drift.
Gait with walkers normal for her.

Assessment and Plan:
(388.30) Tinnitus (primary encounter diagnosis)
Pounding sound in ear and high pitched sound on left side. Exam is normal. Carotid and vertebral US a year ago was normal. No recent falls or head injury. Only change in meds has been taking a high dose multiple vitmain. Advise hold that for two weeks and see if symptoms perchance resolves. Will check some basic labs.

(266.9) VITAMIN B DEFICIENCY NOS
As above. Hold on the high dose vit B complex for two weeks.
Plan: Unclassified (OTHER MEDS, SEE COMMENTS,)

(451.19) DEEP VENOUS PHLEBITIS-LEG NEC
INR due today.

There was a fire in her fuse box. This has been attended to. She was appreciative that we had aging and disabilities visit her. She does sleep on the couch but says she has always done so even when her mother was alive.

Telephone Encounter

Gillespie, Megan M at 2/7/2014 1453

Got a call from Julie Stone on 2/6/14 from Bainbridge Housing Resource Board. She meet with both Louis and Jeanne Hoffman on 1/23/14. Later that day, the Hoffmans met with their landlords. Julie states that the Hoffmans are food hoarders (they have canned a lot of their own food, and it is taking up a lot of floor space). Louis sleep on the floor, and Jeanne sleeps on the couch every night. There is mold growing inside the cabinets per Julie. There have been electrical outlets that have been broken and not working in their one bedroom unit. Louis is not on the lease, and seems to think that if he is added to the lease that it will affect their subsidized housing situation. The landlords came in and made a list of things that needed fixing: electrical outlets, shelves built for closets (to store canned items), bathtub needs fixing. Julie believes they need a 2 bedroom unit. She has contacted Kipsap Housing, but they do not have any 2 bedrooms available at this time. Also, to get COPES or DSHS to come in and help them with the ADLs, there needs to be more room for them to work. Louis needs to stop trying to fix things inside the unit because he is not on the lease. She wishes Dr. Neighbor to address this with Louis. She also thinks the carpet in the unit is a fall risk for Jeanne (and both of them) and recommends either pulling it out or replacing it.

Julie's number is 206-842-1909. Kipsap Housing's number is 360-535-6100.

I told her I would forward this information on to patient's PCP, Dr. Neighbor. Perhaps we could call Kipsap Housing and make an argument for finding them a 2 bedroom unit?

Telephone Encounter

Gillespie, Megan M at 1/23/2014 1140

S: Was asked by Dr. Neighbor to follow up on some housing issues with this patient in her Bainbridge Island apartment. Apparently she told him there is water damage, and she is having to plug in her microwave in the bathroom because the outlets in the kitchen don't work. Tried calling the patient first to ascertain if there are any more issues that need fixing. Called her at 206-780-6885 two times, with no answer, and answering machine was not set up so could not leave a message.

First I called Helpline House (206-842-7624) and talked with Dianna. They deal mostly with Food Bank related issues. She suggested I call Housing Resources and talk with Julie Stone.

Then I called the patient's apartment complex (at Rhododendron Apartments), and spoke with the new site Manager, Heather (206-842-8144). We discussed briefly Jeanne's apartment. Heather states that Jeanne and Louis both live in the apartment (although Louis is the caregiver, and officially not her tenant). She states that there is so much stuff in her apartment, that it is blocking the wall heaters. They have 7-9 computers running, all off extension cords. They have space heaters pulled in, which are a fire hazard. She can't even walk into the apartment its so full. She sent Jeanne a letter yesterday, stating she has until Jan. 30, 2014 to remove all the extension cords. She had until Feb. 6, 2014 to get the apartment tidy. These were not eviction notices, Heather assures me. She wants to work collaboratively to help Jeanne be successful, but needs Jeanne's help. Jeanne won't let others into her apartment to help.

I then called Housing Resources Board on Bainbridge Island and spoke with Julie Stone (206-842-2041). They work on cases like this, to assist the tenant by enhancing independent living. She works Mon-Thursday of each week (today is Thursday). She will try calling Jeanne, and coordinate with Heather at Rhododendron Apartments, about what needs to be fixed or improved. She will call me back next week with an update. She states these issues can be tricky, and so she'd appreciate more information on the situation (ie. Does the patient want this? Etc)

I will cc this note to patient's PCP, Dr. Neighbor (who is not in today), and follow up appropriately.

Megan Gillespie, RN

01/23/2014 - Telephone in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Gill, Margaret Lee at 1/27/2014 1559

Returned call from Heather Ladue, Manager of Rhododendron Apartments, who left a message today regarding Jeanne Hoffman.
Please see note below from Megan Gillespie for background hx.

Heather states she has an inspection scheduled for Jeanne's apartment for this Thursday, 1/30/14.
Heather states Jeanne's son Louis is angry about the inspection and has become belligerent with Heather so Heather has turned the inspection over to the Apartment owner.
Heather has contacted Housing Resources Board and Helpline House and both have stated that until Jeanne requests support or advocacy, they are unable to do anything.

Heather was calling us today to see if we have heard from Jeanne or if we might be able to find an advocate for her.
Heather states her goal is to not involve senior protective services unless absolutely necessary.

I told Heather I would pass the updated information on to Dr. Neighbor should he have any additional information to add.

Progress Notes

Neighbor Jr., William E at 1/17/2014 0842

Jeanne Leonie Hoffman is a 89 year old female here to discuss the following: No chief complaint on file.

(V58.61) AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
(451.19) DEEP VENOUS PHLEBITIS-LEG NEC
Stable dose of med. Brought in all of her medications today which were reviewed.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [721.3]	08/30/2013
• Vertebral fracture [805.8]	12/13/2012
Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months, that is May 2013	
• Thyroid nodule, uninodular [241.0]	12/13/2012
CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011.	

5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.

- OSTEOPOROSIS NOS [733.00] 03/04/2008
  T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
  Began fosamax spring 2008. Continue for five years, then stop

- AFTERCARE LONG TERM ANTICOAG USE [V58.61] 01/08/2008
  Reason for anticoagulation: Recurrent dvts
  Duration of anticoagulation: life
  INR goal: 2.-3

  She has also been on Trental for many years because of recurrent venous stasis disease despite adequate anticoagulation. Her last arterial vascular study showed ABIs of 1.0 in 2007. 2/12/2010 repeat arterial vascular studies of lower extremities ordered.

- ADULT FAILURE TO THRIVE [783.7] 10/19/2007
  Lives in subsidized housing on Bainbridge
  Bremerton APS at 1-888-833-4925
  Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
  Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait

- TREMOR NEC [333.1] 08/17/2007
  Noted by Melanie Parker. Consider Parkinson's disease med trial.

- FX FEMUR INTRCAPS NOS-CLOSE [820.00] 05/01/2007
  Pinned April 2007.
  Post op hematocrit 25
  Has walker with wheels for use outside of home. Uses cane in home.

- VITAMIN B DEFICIENCY NOS [266.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.

- Other convulsions [780.39] 11/20/2006
  Petit Mal since 1975

Carbamazepine level 7.6 on Feb 2007
Discontinued based on ER neuro consult in early 2013

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- UTERINE LEIOMYOMA NOS [218.9] 11/20/2006
  S/P hysterectomy with BSO in 1991

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- CATARACT NOS [366.9] 11/20/2006
  Extraction left eye in 1989

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- GLAUCOMA NOS [365.9] 11/20/2006
- ROUTINE MEDICAL EXAM [V70.0] 11/20/2006
  Td/Tdap (q 10 yr): 2006
  Pneumococcal (65 yoa and high risk x1): 2010
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: yes
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

No outpatient prescriptions have been marked as taking for the 1/17/14 encounter (Appointment) with Neighbor Jr., William E.

No Facility-Administered Medications for the 1/17/14 encounter (Appointment) with Neighbor Jr., William E.

History

Substance Use Topics

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used
- Alcohol Use: Not on file

Objective:
There were no vitals taken for this visit.
Estimated body mass index is 20.04 kg/(m^2) as calculated from the following:
Height as of 2/27/07: 5' 7" (1.702 m).
Weight as of 11/7/12: 58.06 kg (128 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter:
General: NAD

INR 2.5

Assessment and Plan:
(V58.61) AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
Plan: INR is 2.5 which is excellent. Repeat in one month.

(266.9) VITAMIN B DEFICIENCY NOS
Plan: Vitamin B12 measures indicated slight deficiency. She should be taking a Vitamin B12 and folate supplement over the counter supplement once daily.

(451.19) DEEP VENOUS PHLEBITIS-LEG NEC
Plan: No recurrence. Doing well.

All of her medications were reviewed today. Correctly, she is no longer taking carbazipine which is correct.

Her apartment sounds like there is problems with water damage and electrical wiring. I am asking our nurse to call Aging and Disabilities services to see if a visit can be made.

Follow up plans: One month

Time-based symptom visit: 20 minutes were spent by the attending in direct face to face contact with the patient over 50 percent of which was spent in advising and counseling the patient about aboev.

Active at the End of Visit

Acetaminophen (TYLENOL) 500 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 6/22/2016
Instructions: 2 in am 2 in pm and 3 before bed
Entered by: Smith, Courtney A, CM
Entered on: 3/8/2010
End date: 6/22/2016

Losartan Potassium 25 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 2/4/2014
Reason for discontinuation: Reorder
Instructions: TAKE ONE TABLET BY MOUTH ONE TIME DAILY
Authorized by: Neighbor Jr., William E, MD
Ordered on: 1/30/2013
Start date: 1/29/2013
End date: 2/4/2014
Quantity: 90 Tab
Refill: 3

Timolol Maleate 0.5 % ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/1/2014
Reason for discontinuation: Reorder
Instructions: INSTILL ONE DROP INTO EACH EYE TWICE DAILY
Authorized by: Neighbor Jr., William E, MD
Ordered on: 3/12/2013
Start date: 3/12/2013
End date: 3/31/2014
Quantity: 5 mL
Refill: 12

Warfarin Sodium (COUMADIN) 5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 6/25/2014
Reason for discontinuation: Reorder
Instructions: 1 TAB PO ONCE each evening
Authorized by: Neighbor Jr., William E, MD
Ordered on: 8/30/2013
Start date: 8/30/2013
End date: 6/25/2014
Quantity: 30 Tab
Refill: 6

Pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 5/20/2014
Reason for discontinuation: Reorder
Instructions: TAKE ONE TABLET BY MOUTH THREE TIMES DAILY
Authorized by: Neighbor Jr., William E, MD
Ordered on: 11/1/2013
Start date: 10/29/2013
End date: 5/19/2014
Quantity: 90 Tab
Refill: 5

Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 7/9/2014
Reason for discontinuation: Reorder
Instructions: one po once daily for arthritic pain
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/11/2013
Start date: 12/11/2013
End date: 7/9/2014
Quantity: 30 Tab

Clinical Notes

Progress Notes

Neighbor Jr., William E at 12/11/2013 1319

Jeanne Leonie Hoffman is a 88 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  medications, labs

(V58.61) AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
(721.3) DJD (degenerative joint disease) of lumbar spine
Jeanne returns today to followup on her anticoagulation. About 10 days ago her INR was elevated. She was instructed by E care message (could not be reached by phone) to hold one dose. However she did not do so. She is continued on Coumadin 5 mg daily. She reports no bruising or unexplained bleeding. She has not had any swelling in her lower extremities. She has had no fever or chills. Her appetite is good. Her stools have been normal. There's been no melena.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [721.3]	08/30/2013
• Vertebral fracture [805.8]	12/13/2012

Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months, that is May 2013

- Thyroid nodule, uninodular [241.0] 12/13/2012

CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011.
5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.

- OSTEOPOROSIS NOS [733.00] 03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continue for five years, then stop

- AFTERCARE LONG TERM ANTICOAG USE [V58.61] 01/08/2008

Reason for anticoagulation: Recurrent dvts
Duration of anticoagulation: life
INR goal: 2.-3

She has also been on Trental for many years because of recurrent venous stasis disease despite adequate anticoagulation. Her last arterial vascular study showed ABIs of 1.0 in 2007. 2/12/2010 repeat arterial vascular studies of lower extremities ordered.

- ADULT FAILURE TO THRIVE [783.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait

- TREMOR NEC [333.1] 08/17/2007

Noted by Melanie Parker. Consider Parkinson's disease med trial.

- FX FEMUR INTRCAPS NOS-CLOSE [820.00] 05/01/2007

Pinned April 2007.
Post op hematocrit 25
Has walker with wheels for use outside of home. Uses cane in

home.

- VITAMIN B DEFICIENCY NOS [266.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.

- Other convulsions [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- UTERINE LEIOMYOMA NOS [218.9] 11/20/2006
  S/P hysterectomy with BSO in 1991

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- CATARACT NOS [366.9] 11/20/2006
  Extraction left eye in 1989

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- GLAUCOMA NOS [365.9] 11/20/2006
- ROUTINE MEDICAL EXAM [V70.0] 11/20/2006
  Td/Tdap (q 10 yr): 2006
  Pneumococcal (65 yoa and high risk x1): 2010
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia

Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
Pap smear (q2-3 yrs to age 65)--82 years old
Colorectal cancer screening: Sig to 30 cm in May 2001.
Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
Tobacco: no
Alcohol: no
Drugs: no
Sexual practice/contraception: Not active
Advanced directives: yes
Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
Advise Vit D 800 IU daily.

Social History Narrative

Soc Hx.
1/30/2007 Nancy at Helpline House, 282 Knechtel Ave NE, Bainbridge Island , WA 98110 Voice 842-7624, Fax 842.9867, called last week. See RN telephone. Note. The plan is to call Nancy once I have assessed Mrs. Hoffman's needs when I see her at an upcoming visit.

6/15/2010 Grew up on Bainbridge. Both parents from Paris. Spoke French at home and English in Public. She recalls her first clot was in her legs when she was 30. She also developed clot in her arms later. She states her grandmother had the same problem.

Review of Systems:

Objective:

BP 140/57 | Pulse 58 | Temp(Src) 98.4 °F (36.9 °C)
Estimated body mass index is 20.04 kg/(m^2) as calculated from the following:
Height as of 2/27/07: 5' 7" (1.702 m).
Weight as of 11/7/12: 58.06 kg (128 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 140/57
General: NAD. Uses walker
She has her compression stockings on. These are soaked open and there is no underlying swelling.

Her last labs for A1c, lipid, basic metabolic panel, and followup on prior diagnosis of vitamin B12 deficiency are over a year old.

Assessment and Plan:
(V58.61) AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
INR is 2.6 in target range. She did not make the change in her dose advised last week when her INR was above 3. That was simply to hold on dose. So the value today reflects taking coumadin 5 mg once daily. Will keep at that dose and repeat in one month.

(721.3) DJD (degenerative joint disease) of lumbar spine
She has benefitted from one tylenol with codeine daily without side effects. She had previously been given low dose of oxycodone for acute exacerbation but feels the one daily codeine is sufficient now. She is taking tylenol otherwise.
Plan: Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE
#3) 300-30 MG Oral Tab

(266.9) VITAMIN B DEFICIENCY NOS
She is due for follow up MMA level. The last was a 1-2 year agos and was normal.
Plan: METHYLMALONIC ACID

(250.00) Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled
Her A1c has been in the normal range without metformin. Recheck now.
Plan: HEMOGLOBIN A1C, HPLC

(272.4) HYPERLIPIDEMIA NEC/NOS
She is still taking statin. Will recheck labs
Plan: LIPID PANEL, THYROID STIMULATING HORMONE

(401.1) BENIGN HYPERTENSION
Controlled. Check bmp.
Plan: BASIC METABOLIC PANEL

(451.19) DEEP VENOUS PHLEBITIS-LEG NEC
No recurrence

Follow up plans: One month. Bring in all her meds at that time. Have the above labs done along with INR prior to that visit.

William E Neighbor JR, MD
Clinical Professor
Department of Family Medicine
University of Washington

How to contact us:
For urgent problems, contact the Hall Health Triage Nurse line at 206-221-2517 (Mon-Fri, 8a-5p)
For non urgent problems, contact us through E care or by calling my medical assistant Ella Voronchuk at 206-616-

12/11/2013 - Office Visit in Hall Health Primary Care Center (continued)

BP	140/57
Temp	36.9 °C
Pulse	58

Patient Instructions

Assessment and Plan:
(V58.61) AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
INR is 2.6 in target range. She did not make the change in her dose advised last week when her INR was above 3. That was simply to hold on dose. So the value today reflects taking coumadin 5 mg once daily. Will keep at that dose and repeat in one month.

(721.3) DJD (degenerative joint disease) of lumbar spine
She has benefitted from one tylenol with codeine daily without side effects. She had previously been given low dose of oxycodone for acute exacerbation but feels the one daily codeine is sufficient now. She is taking tylenol otherwise.
Plan: Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE
#3) 300-30 MG Oral Tab

(266.9) VITAMIN B DEFICIENCY NOS
She is due for follow up MMA level. The last was a 1-2 year agos and was normal.
Plan: METHYLMALONIC ACID

(250.00) Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled
Her A1c has been in the normal range without metformin. Recheck now.
Plan: HEMOGLOBIN A1C, HPLC

(272.4) HYPERLIPIDEMIA NEC/NOS
She is still taking statin. Will recheck labs
Plan: LIPID PANEL, THYROID STIMULATING HORMONE

(401.1) BENIGN HYPERTENSION
Controlled. Check bmp.
Plan: BASIC METABOLIC PANEL

(451.19) DEEP VENOUS PHLEBITIS-LEG NEC
No recurrence

Follow up plans: One month. Bring in all her meds at that time. Have the above labs done along with INR prior to that visit.

ADVANCE BENEFICIARY NOTICE OF NONCOVERAGE (ABN)

***NOTE*: If Medicare doesn't pay for** Visit **below, you may have to pay.**

Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the _____ below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost:
Code _____ Description: Office Visit	**Check reason code (see back)** A ☐ B ☒ C ☐ D ☐	$108 - $406

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the _____ listed above.

Note: If you choose Options 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

Options: Check only one box. We cannot choose a box for you.

☐ **OPTION 1**. I want the Visit listed above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I am responsible for payment, but **I can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2**. I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3**. I don't want the _____ listed above. I understand with this choice I am not responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-Medicare** (1-800-633-4227/TTY: 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

Active at the End of Visit

Acetaminophen (TYLENOL) 500 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 6/22/2016
Instructions: 2 in am 2 in pm and 3 before bed
Entered by: Smith, Courtney A, CM
Entered on: 3/8/2010
End date: 6/22/2016

Unclassified (OTHER MEDS, SEE COMMENTS,)

Discontinued by: Ong, Thuan Duc, MD
Discontinued on: 6/7/2018
Instructions: Vitamin B12 500 mcg once daily over the counter
Entered by: Neighbor Jr., William E, MD
Entered on: 2/21/2014
Start date: 2/21/2014
End date: 6/7/2018

Losartan Potassium 25 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 3/31/2016
Reason for discontinuation: Reorder
Instructions: One half tablet daily
Authorized by: Neighbor Jr., William E, MD
Ordered on: 7/29/2015
Start date: 7/29/2015
End date: 3/31/2016
Quantity: 45 tablet
Refill: 3

Pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 6/2/2016
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 7/29/2015
Start date: 7/29/2015
End date: 6/2/2016
Quantity: 270 tablet
Refill: 0

Timolol Maleate 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 3/7/2016
Reason for discontinuation: Reorder
Instructions: Place 1 drop in each EYE 2 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/18/2015
Start date: 12/18/2015
End date: 3/7/2016
Quantity: 5 mL
Refill: 1

12/03/2013 - Orders Only in Hall Health Primary Care Center (continued)

Medication List (continued)

Atorvastatin Calcium 20 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 3/31/2016
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (20 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/18/2015
Start date: 12/18/2015
End date: 3/31/2016
Quantity: 30 tablet
Refill: 2

Warfarin Sodium (COUMADIN) 5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 5/27/2016
Reason for discontinuation: Reorder
Instructions: 1 TAB PO ONCE each evening
Authorized by: Neighbor Jr., William E, MD
Ordered on: 1/6/2016
Start date: 1/6/2016
End date: 5/27/2016
Quantity: 90 tablet
Refill: 0

Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/29/2016
Reason for discontinuation: Reorder
Instructions: one po once daily for arthritic pain as needed
Authorized by: Neighbor Jr., William E, MD
Ordered on: 1/6/2016
Start date: 1/6/2016
End date: 4/28/2016
Quantity: 20 tablet
Refill: 0

Clinical Notes

Progress Notes

Neighbor Jr., William E at 9/20/2013 1157

Jeanne Leonie Hoffman is a 88 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
V58.61 AFTERCARE LONG TERM ANTICOAG USE
Taking coumadin 5 mg once daily without missing dose. No bleeding. No LE swelling. Waring compression stockings. Leaving Monday for west coast train trip. First stop in Napa, Ca. Going with her son.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [721.3]	08/30/2013
• Vertebral fracture [805.8]	12/13/2012

Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months, that is May 2013

- Thyroid nodule, uninodular [241.0] 12/13/2012
  CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011.
  5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.

- OSTEOPOROSIS NOS [733.00] 03/04/2008
  T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
  Began fosamax spring 2008. Continue for five years, then stop

- AFTERCARE LONG TERM ANTICOAG USE [V58.61] 01/08/2008
  Reason for anticoagulation: Recurrent dvts
  Duration of anticoagulation: life
  INR goal: 2.-3

  She has also been on Trental for many years because of recurrent venous stasis disease despite adequate anticoagulation. Her last arterial vascular study showed ABIs of 1.0 in 2007. 2/12/2010 repeat arterial vascular studies of lower extremities ordered.

- ADULT FAILURE TO THRIVE [783.7] 10/19/2007
  Lives in subsidized housing on Bainbridge
  Bremerton APS at 1-888-833-4925
  Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
  Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait

- TREMOR NEC [333.1] 08/17/2007
  Noted by Melanie Parker. Consider Parkinson's disease med trial.

- FX FEMUR INTRCAPS NOS-CLOSE [820.00] 05/01/2007
  Pinned April 2007.
  Post op hematocrit 25
  Has walker with wheels for use outside of home. Uses cane in home.

- VITAMIN B DEFICIENCY NOS [266.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled 03/27/2007

[250.00]
Year onset: Dx March 2007
Metformin discontinued 2011 as A1c in target range without it.

- Other convulsions [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- UTERINE LEIOMYOMA NOS [218.9] 11/20/2006
  S/P hysterectomy with BSO in 1991

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- CATARACT NOS [366.9] 11/20/2006
  Extraction left eye in 1989

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- GLAUCOMA NOS [365.9] 11/20/2006
- ROUTINE MEDICAL EXAM [V70.0] 11/20/2006
  Td/Tdap (q 10 yr): 2006
  Pneumococcal (65 yoa and high risk x1): 2010
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active

Advanced directives: yes
Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
Advise Vit D 800 IU daily.

Social History Narrative

Soc Hx. 1/30/2007 Nancy at Helpline House, 282 Knechtel Ave NE, Bainbridge Island , WA 98110 Voice 842-7624, Fax 842.9867, called last week. See RN telephone. Note. The plan is to call Nancy once I have assessed Mrs. Hoffman's needs when I see her at an upcoming visit.6/15/2010 Grew up on Bainbridge. Both parents from Paris. Spoke French at home and English in Public. She recalls her first clot was in her legs when she was 30. She also developed clot in her arms later. She states her

grandmother had the same problem.William E Neighbor, MD

Objective:

BP 127/64 | Pulse 63 | Temp 98.7 °F (37.1 °C)
Estimated Body mass index is 20.05 kg/(m^2) as calculated from the following:
Height as of 2/27/07: 5' 7"(1.702 m).
Weight as of 11/7/12: 128 lb(58.06 kg).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 127/64
General: NAD
No other exam

PRORPD 1.7 9/20/2013
PRORPD 2.3 8/30/2013
PRORPD 2.6 7/31/2013
PRORPD 3.7 7/26/2013
PRORPD 6.9 7/24/2013
PRORPD Run in main coag lab, not a rapid protime result. 7/24/2013
PRORPD Telephoned with read back to: 7/24/2013
PRORPD DR WILLIAM NEIGHBOR @ 1041 7/24/13 7/24/2013
PRORPD 3.4 6/12/2013

Assessment and Plan:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
V58.61 AFTERCARE LONG TERM ANTICOAG USE
Compliant with taking coumadin 5 mg once daily. INR lately has been in therapeutic range except today is 1.7. She has not missed a dose. She is leaving for a month for a triain trip on west coast. Will increase coumadin to one tablet daily except a extra half tablet on Fridays. She should have a repeat INRi n 5 days. She believes she can get this done at a local lab as she did when she went on a train before. I explained this to her son. They will arrange to have INR in Napa and have result faxed to me.

ADVANCE BENEFICIARY NOTICE OF NONCOVERAGE (ABN)

NOTE: If Medicare doesn't pay for VISIT **below, you may have to pay.**

Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the _____ below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost:
Code _____ Description: OFFICE VISIT	**Check reason code (see back)** A ☐ B ☒ C ☐ D ☐	$ 300 - 500

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the _____ listed above.

Note: If you choose Options 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

Options: Check only one box. We cannot choose a box for you.

☑ **OPTION 1.** I want the VISIT listed above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I am responsible for payment, but I **can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2.** I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3.** I don't want the _____ listed above. I understand with this choice I am not responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-Medicare** (1-800-633-4227/TTY: 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

Clinical Notes

Progress Notes

Neighbor Jr., William E at 8/30/2013 1143

Jeanne Leonie Hoffman is a 88 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  mutiple issues

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
She is compliant with her current dose of Coumadin. She has had no bleeding or bruising.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
She's had no recurrent swelling of her lower legs or feet. She continues to use compression stockings as she has done for years.

721.3 DJD (degenerative joint disease) of lumbar spine
She continues to have some low back pain which is quite bothersome to her at times. The pain is isolated to her back. There is no radiation into the legs. She has notr had any physical therapy recently.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [721.3]	08/30/2013
• Vertebral fracture [805.8]	12/13/2012

Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months, that is May 2013

- Thyroid nodule, uninodular [241.0] 12/13/2012

CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011.
5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.

- OSTEOPOROSIS NOS [733.00] 03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continue for five years, then stop

- AFTERCARE LONG TERM ANTICOAG USE [V58.61] 01/08/2008

Reason for anticoagulation: Recurrent dvts
Duration of anticoagulation: life
INR goal: 2.-3

She has also been on Trental for many years because of recurrent venous stasis disease despite adequate anticoagulation. Her last arterial vascular study showed ABIs of 1.0 in 2007. 2/12/2010 repeat arterial vascular studies of lower extremities ordered.

- ADULT FAILURE TO THRIVE [783.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait

- TREMOR NEC [333.1] 08/17/2007

Noted by Melanie Parker. Consider Parkinson's disease med trial.

- FX FEMUR INTRCAPS NOS-CLOSE [820.00] 05/01/2007

Pinned April 2007.
Post op hematocrit 25
Has walker with wheels for use outside of home. Uses cane in home.

08/30/2013 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

- VITAMIN B DEFICIENCY NOS [266.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.

Tobacco and Alcohol Use:

History

Substance Use Topics

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used
- Alcohol Use: Not on file

Objective:

BP 121/57 | Pulse 61 | Temp 97.8 °F (36.6 °C) (Oral)
Estimated Body mass index is 20.05 kg/(m^2) as calculated from the following:
Height as of 2/27/07: 5' 7"(1.702 m).
Weight as of 11/7/12: 128 lb(58.06 kg).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 121/57
General: Pain in back, hips, legs, chronic
Back: Paraspinal muscle tenderness along the lumbar spine without any midline tenderness. Strength in her lower extremities is intact. Reflexes are symmetrical. She uses a walker.

X-rays of the LS-spine done within last year showed no acute changes but showed chronic degenerative changes.

Assessment and Plan:

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
Her INR is in therapeutic range today. She has been taking Coumadin 5 mg one each evening. We will continue with that dosage and she will return just before she leaves on a train trip at the end of September.
Plan: Warfarin Sodium (COUMADIN) 5 MG Oral Tab

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
There's been no recurrence

721.3 DJD (degenerative joint disease) of lumbar spine
She continues to have a bit of low back pain related to wedge deformities of vertebrae and DJD in her lumbar spine. Her x-rays were within the last year. There's been no abrupt change. She has not had physical therapy recently so we'll try to arrange for physical therapy for her near where she lives on Bainbridge Island.
Plan: REFERRAL TO PHYSICAL THERAPY

William E Neighbor JR, MD

9/5/2013
Son sent message that Jean may have problems paying her bills. I responded that we will have them meet with our financial folks when she next comes in.

Other - Scan on 9/6/2013 11:14 AM: agreement to Pay for Healthcare Services

Scan (below)

Department of Social & Health Services
HRSA Health & Recovery Services Administration

Agreement to Pay for Healthcare Services

WAC 388-502-0160 ("Billing a Client")

This is an agreement between a "client" and a "provider," as defined below. The client agrees to pay the provider for healthcare service(s) for which the Department of Social and Health Services (DSHS) will not pay. Both parties must sign this Agreement. For the purposes of this Agreement, "services" include but are not limited to healthcare treatment, equipment, supplies, and medications.

1. **Client** - is a recipient of Medicaid or other healthcare benefits through the DSHS or a managed care organization (MCO) that contracts with DSHS; and
2. **Provider** - is an institution, agency, business, or person that furnishes healthcare services to DSHS clients and has a signed agreement with DSHS or authorization from an MCO.

This Agreement and WAC 388-502-0160 apply to billing a client for covered and noncovered services as described in WAC 388-501-0050 through WAC 388-501-0070. Providers may not bill any DSHS client (including those enrolled with an MCO that contracts with DSHS) for services which DSHS or an MCO that contracts with DSHS may have paid until the provider has completed all requirements for obtaining authorization.

CLIENT'S PRINTED NAME	CLIENT'S DSHS ID NUMBER
Hoffman, Jeanne Leonie	LOOL75002WA
PROVIDER'S PRINTED NAME	**PROVIDER NUMBER**
Neighbor, William	1226551899

This form:

- Must be fully completed by both the provider and the client **before** any service for which this Agreement is required is provided to a DSHS client.
- Must be completed no more than 90 calendar days before the service is provided. If the service is not provided within 90 calendar days, a new form must be completed and signed by both the provider and the client.
- Must be completed only **after** the provider and the client have exhausted all applicable DSHS or DSHS-contracted MCO processes which are necessary to obtain authorization for the requested service(s). These may include the exception to rule (ETR) process for noncovered services as described in WAC 388-501-0160 or the administrative hearing process as described in WAC 388-526-2610, if the client chooses to pursue these processes.
- Must be understandable to a limited English proficient (LEP) client in his or her primary language. This may include a translated form or interpretation of the form. If the form is interpreted for the client, the interpreter must also sign and date the form. A translated form must be signed by both the client and the provider.

The table on back of this form must be fully completed. If needed, attach another sheet for additional services. Each additional page must be signed and dated by the client, provider, and interpreter (if applicable).

Important Note from DSHS:

- This agreement is void and unenforceable if the provider fails to comply with the requirements of this form and WAC 388-502-0160 or does not satisfy DSHS conditions of payment as described in applicable Washington Administrative Code (WAC) and Billing Instructions. The provider must reimburse the client for the full amount paid by the client.
- See WAC 388-502-0160(9) for a list of services that cannot be billed to a client, regardless of a written agreement.
- Keep the original agreement in the client's medical record for 6 years from the date this agreement is signed. A copy of this completed, signed agreement must also be given to the client.
- Providers are responsible for ensuring that translation or interpretation of this form and its content is provided to LEP clients. Translated forms are available at http://www.dshs.wa.gov/msa/forms/eforms.html.

- I understand that DSHS or an MCO that contracts with DSHS will not pay for the specific service(s) being requested for one of the following reasons, as indicated in the above table: 1) DSHS does not cover the service(s); 2) the service(s) was denied as not medically necessary for me, or 3) the service(s) is covered but the type I requested is not.
- I understand that I can, but may choose not to: 1) ask for an Exception to Rule (ETR) after a DSHS or DSHS-contracted MCO denial of a request for a noncovered service; or 2) ask for a hearing to appeal a DSHS or DSHS-contracted MCO denial of a requested service.
- I have been fully informed by this provider of all available medically appropriate treatment, including services that may be paid for by DSHS or DSHS-contracted MCO, and I still choose to get the specified service(s) above.
- ***I agree to pay the provider directly for the specific service(s) listed above.***
- I understand the purpose of this form is to allow me to pay for and receive service(s) for which DSHS or a DSHS-contracted MCO will not pay. This provider answered all my questions to my satisfaction and has given me a completed copy of this form.
- I understand that I can call DSHS at 1-800-562-3022 if I want to receive additional information about my rights or services covered by DSHS under fee-for-service or managed care.

I AFFIRM: I understand and agree with this form's content, including the bullet points above.	CLIENT'S OR CLIENT'S LEGAL REPRESENTATIVE'S SIGNATURE X [signature] LCHH	DATE X 8/30/13

ADVANCE BENEFICIARY NOTICE OF NONCOVERAGE (ABN)

***NOTE*: If Medicare doesn't pay for** VISIT **below, you may have to pay.**

Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the _____ below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost:
Code _____ Description: Office visit + all related services	**Check reason code (see back)** A ☐ B ☒ C ☐ D ☐	72-1000

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the _____ listed above.

Note: If you choose Options 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

Options: Check only one box. We cannot choose a box for you.

☒ **OPTION 1**. I want the VISIT listed above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I am responsible for payment, but **I can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2**. I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3**. I don't want the _____ listed above. I understand with this choice I am not responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional Information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-Medicare** (1-800-633-4227/TTY: 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

General Diagnostic Text	--	—	—	UW RAD

Result: Examination:A digital screening mammogram was performed and computer-aided detection was applied. The patient will be notified by letter of these findings. (Patients with findings requiring additional imaging will also be sent instructions on how to schedule this appointment). ComparisonComparison is made to images from 08/24/2012 (bilateral) and images from 07/06/2011 (bilateral) and images from 06/15/2010 (bilateral) and images from 06/05/2009 (bilateral) and images from 06/03/2008 (bilateral) and images from 03/22/2007 (bilateral) and images from 01/11/2006 and images from 12/07/2004. FindingsBilateral Breast Findings: There are scattered fibroglandular densities (25% - 50% fibroglandular). No significant masses, calcifications or other abnormalities are seen. Positioning is limited by the patient's mobility constraints. ImpressionBILATERAL BREASTS Negative, no evidence of malignancy. Normal interval follow-up is recommended in 12 months. Clinical Notes

Progress Notes

Neighbor Jr., William E at 7/26/2013 1148

Jeanne Leonie Hoffman is a 88 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
Jeanne Comes in for a brief visit to followup on her INR. Please see the visit note from last Wednesday 2 days ago. She is not taking any Coumadin he did Wednesday night Thursday night.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
There's been no recurrence

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Vertebral fracture [805.8]	12/13/2012

Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months, that is May 2013

- Thyroid nodule, uninodular [241.0] 12/13/2012
  CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011.
  5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.

- OSTEOPOROSIS NOS [733.00] 03/04/2008
  T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
  Began fosamax spring 2008. Continue for five years, then stop

- AFTERCARE LONG TERM ANTICOAG USE [V58.61] 01/08/2008
  Reason for anticoagulation: Recurrent dvts
  Duration of anticoagulation: life
  INR goal: 2.-3

  She has also been on Trental for many years because of recurrent venous stasis disease despite adequate anticoagulation. Her last arterial vascular study showed ABIs of 1.0 in 2007. 2/12/2010 repeat arterial vascular studies of lower extremities ordered.

- ADULT FAILURE TO THRIVE [783.7] 10/19/2007
  Lives in subsidized housing on Bainbridge
  Bremerton APS at 1-888-833-4925
  Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
  Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait

- TREMOR NEC [333.1] 08/17/2007
  Noted by Melanie Parker. Consider Parkinson's disease med trial.

- FX FEMUR INTRCAPS NOS-CLOSE [820.00] 05/01/2007
  Pinned April 2007.
  Post op hematocrit 25
  Has walker with wheels for use outside of home. Uses cane in home.

- VITAMIN B DEFICIENCY NOS [266.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled 03/27/2007

[250.00]
Year onset: Dx March 2007
Metformin discontinued 2011 as A1c in target range without it.

- Other convulsions [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- UTERINE LEIOMYOMA NOS [218.9] 11/20/2006
  S/P hysterectomy with BSO in 1991

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- CATARACT NOS [366.9] 11/20/2006
  Extraction left eye in 1989

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- GLAUCOMA NOS [365.9] 11/20/2006
- ROUTINE MEDICAL EXAM [V70.0] 11/20/2006
  Td/Tdap (q 10 yr): 2006
  Pneumococcal (65 yoa and high risk x1): 2010
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active

Advanced directives: yes
Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
Advise Vit D 800 IU daily.

Review of Systems:
She denies any bleeding or unexpected bruising

Objective:
BP 124/54 | Pulse 58 | Temp 97.7 °F (36.5 °C) (Oral)
Estimated Body mass index is 20.05 kg/(m^2) as calculated from the following:
Height as of 2/27/07: 5' 7"(1.702 m).
Weight as of 11/7/12: 128 lb(58.06 kg).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 124/54
General: NAD

INR 3.7

Assessment and Plan:
V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
INR today 3.7 after not taking any coumadin for the last two days. This is down from 6.9. She is scheduled for tooth extraction next Wednesday. Because this had to be canceled last Wednesday because of excess anticoagulation, we would like to avoid having canceled this coming Wednesday.

Plan:
Tonight, Friday, do not take any
Saturday begin taking 5 mg each evening and continue this. This is a half of the 10 mg tab she has.
Wednesday, Have an INR done before dental surgery.

Remember that when next due for a refill, contact me so I can switch you to 5 mg tabs.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
No recurrence.

Follow up plans: INR next Wednesday prior to dental surgery

Jeanne: Your INR today 7/31/2013 was 2.6. That is in the target range. You should continue taking just 5 mg (one half a 10 mg tab) daily. I am submitting a prescription for 5 mg tabs to your pharmacy so it will be on file.
You should have a repeat INR and visit with me in one month.

Other - Scan on 9/6/2013 11:05 AM: Agreement to Pay for Healthcare Services

Scan (below)

Department of Social & Health Services
HRSA Health & Recovery Services Administration

Agreement to Pay for Healthcare Services
WAC 388-502-0160 ("Billing a Client")

This is an agreement between a "client" and a "provider," as defined below. The client agrees to pay the provider for healthcare service(s) for which the Department of Social and Health Services (DSHS) will not pay. Both parties must sign this Agreement. For the purposes of this Agreement, "services" include but are not limited to healthcare treatment, equipment, supplies, and medications.

1. **Client** - is a recipient of Medicaid or other healthcare benefits through the DSHS or a managed care organization (MCO) that contracts with DSHS; and
2. **Provider** - is an institution, agency, business, or person that furnishes healthcare services to DSHS clients and has a signed agreement with DSHS or authorization from an MCO.

This Agreement and WAC 388-502-0160 apply to billing a client for covered and noncovered services as described in WAC 388-501-0050 through WAC 388-501-0070. Providers may not bill any DSHS client (including those enrolled with an MCO that contracts with DSHS) for services which DSHS or an MCO that contracts with DSHS may have paid until the provider has completed all requirements for obtaining authorization.

CLIENT'S PRINTED NAME	CLIENT'S DSHS ID NUMBER
Hoffman, Jeanne Leonie	10067500 2 MA
PROVIDER'S PRINTED NAME	PROVIDER NUMBER
Neighbor, William	1265518989

This form:

- Must be fully completed by both the provider and the client **before** any service for which this Agreement is required is provided to a DSHS client.
- Must be completed no more than 90 calendar days before the service is provided. If the service is not provided within 90 calendar days, a new form must be completed and signed by both the provider and the client.
- Must be completed only **after** the provider and the client have exhausted all applicable DSHS or DSHS-contracted MCO processes which are necessary to obtain authorization for the requested service(s). These may include the exception to rule (ETR) process for noncovered services as described in WAC 388-501-0160 or the administrative hearing process as described in WAC 388-526-2610, if the client chooses to pursue these processes.
- Must be understandable to a limited English proficient (LEP) client in his or her primary language. This may include a translated form or interpretation of the form. If the form is interpreted for the client, the interpreter must also sign and date the form. A translated form must be signed by both the client and the provider.

The table on back of this form must be fully completed. If needed, attach another sheet for additional services. Each additional page must be signed and dated by the client, provider, and interpreter (if applicable).

Important Note from DSHS:

- This agreement is void and unenforceable if the provider fails to comply with the requirements of this form and WAC 388-502-0160 or does not satisfy DSHS conditions of payment as described in applicable Washington Administrative Code (WAC) and Billing Instructions. The provider must reimburse the client for the full amount paid by the client.
- See WAC 388-502-0160(9) for a list of services that cannot be billed to a client, regardless of a written agreement.
- Keep the original agreement in the client's medical record for 6 years from the date this agreement is signed. A copy of this completed, signed agreement must also be given to the client.
- Providers are responsible for ensuring that translation or interpretation of this form and its content is provided to LEP clients. Translated forms are available at http://www.dshs.wa.gov/msa/forms/eforms.html.

					PA REQUEST	PA DENIAL (ATTACH DSHS NOTICE)

- I understand that DSHS or an MCO that contracts with DSHS will not pay for the specific service(s) being requested for one of the following reasons, as indicated in the above table: 1) DSHS does not cover the service(s); 2) the service(s) was denied as not medically necessary for me, or 3) the service(s) is covered but the type I requested is not.
- I understand that I can, but may choose not to: 1) ask for an Exception to Rule (ETR) after a DSHS or DSHS-contracted MCO denial of a request for a noncovered service; or 2) ask for a hearing to appeal a DSHS or DSHS-contracted MCO denial of a requested service.
- I have been fully informed by this provider of all available medically appropriate treatment, including services that may be paid for by DSHS or DSHS-contracted MCO, and I still choose to get the specified service(s) above.
- ***I agree to pay the provider directly for the specific service(s) listed above.***
- I understand the purpose of this form is to allow me to pay for and receive service(s) for which DSHS or a DSHS-contracted MCO will not pay. This provider answered all my questions to my satisfaction and has given me a completed copy of this form.
- I understand that I can call DSHS at 1-800-562-3022 if I want to receive additional information about my rights or services covered by DSHS under fee-for-service or managed care.

I AFFIRM: I understand and agree with this form's content, including the bullet points above.	CLIENT'S OR CLIENT'S LEGAL REPRESENTATIVE'S SIGNATURE X LCHH	DATE X 8/30/17
I AFFIRM: I have complied with all responsibilities and requirements as specified in WAC 388-502-0160.	PROVIDER OF SERVICE(S) SIGNATURE	DATE 8/30/17
I AFFIRM: I have accurately interpreted this form to the best of my ability for the client signing above.	INTERPRETER'S PRINTED NAME AND SIGNATURE	DATE

Soc Hx. 1/30/2007 Nancy at Helpline House, 282 Knechtel Ave NE, Bainbridge Island , WA 98110 Voice 842-7624, Fax 842.9867, called last week. See RN telephone. Note. The plan is to call Nancy once I have assessed Mrs. Hoffman's needs when I see her at an upcoming visit.6/15/2010 Grew up on Bainbridge. Both parents from Paris. Spoke French at home and English in Public. She recalls her first clot was in her legs when she was 30. She also developed clot in her arms later. She states her grandmother had the same problem.William E Neighbor, MD

07/24/2013 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Assessment and Plan:
V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
INR today is 6.9 without bleeding or unexpected bruising. This also happened last spring at which time we gave her vitamin K but she took a higher dose than desired which in turn resulted in an INR of 1.2 which was difficult to get into the therapeutic range again. Plan for coumadin now is:
--NO coumadin tonight, Wednesday, or tomorrow, Thursday night.
--Beginning Friday take Coumadin 5 mg once daily every day. Next time due for refill, I will write the prescription for 5 mg tabs. She is fine now with cutting the 10 mg tabs in half.
--Retest INR in one week.

715.00 GENERAL OSTEOARTHROSIS
Uses oxycodone sparingly for back pain. Last fill was in April. She uses tylenol. She should not take non steroidals because of being on coumadin. Refilled today.
Plan: OxyCODONE HCl 5 MG Oral Tab

401.1 BENIGN HYPERTENSION
Blood pressure a bit elevated today. However, safe level. She is to continue current dose of losartan of 25 mg daily. See me in 1 week and will re evaluate whether to increase losaratan or to restart HCTZ.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
No recurrence.

Follow up plans: 1 week
Return sooner if: Call me if any bleeding

William E Neighbor JR, MD

Addendum: As her son who also lives with her on Bainbridge Island is being seen on Friday we will see Jean on that day. She is to have an INR done before the visit.

ADVANCE BENEFICIARY NOTICE OF NONCOVERAGE (ABN)

***NOTE*: If Medicare doesn't pay for** VISIT **below, you may have to pay.**

Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the _____ below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost:
Code _____ Description: Office visit + all related services	**Check reason code (see back)** A ☐ B ☒ C ☐ D ☐	72-1000

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the _____ listed above.

Note: If you choose Options 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

Options: Check only one box. We cannot choose a box for you.

☒ **OPTION 1**. I want the VISIT listed above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I am responsible for payment, but **I can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2**. I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3**. I don't want the _____ listed above. I understand with this choice I am not responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-Medicare** (1-800-633-4227/TTY: 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

Clinical Notes

Progress Notes

Neighbor Jr., William E at 6/12/2013 1318

Jeanne Leonie Hoffman is a 88 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  per provider

401.1 BENIGN HYPERTENSION (primary encounter diagnosis)
She has now stopped hydrochlorothiazide and is taking losartan 25 mg daily. No dizziness with standing. No interval blood pressure measurements.

V58.61 AFTERCARE LONG TERM ANTICOAG USE
She confirmed she is taking Coumadin as directed and her medication list

241.0 Thyroid nodule, uninodular

06/12/2013 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

She is in to review results of thyroid ultrasound

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Vertebral fracture [805.8] Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months, that is May 2013	12/13/2012
• Thyroid nodule, uninodular [241.0] CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.	12/13/2012
• OSTEOPOROSIS NOS [733.00] T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continue for five years, then stop	03/04/2008
• AFTERCARE LONG TERM ANTICOAG USE [V58.61] Reason for anticoagulation: Recurrent dvts Duration of anticoagulation: life INR goal: 2.-3 She has also been on Trental for many years because of recurrent venous stasis disease despite adequate anticoagulation. Her last arterial vascular study showed ABIs of 1.0 in 2007. 2/12/2010 repeat arterial vascular studies of lower extremities ordered.	01/08/2008
• ADULT FAILURE TO THRIVE [783.7] Lives in subsidized housing on Bainbridge Bremerton APS at 1-888-833-4925 Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved. Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait	10/19/2007
• TREMOR NEC [333.1] Noted by Melanie Parker. Consider Parkinson's disease med trial.	08/17/2007
• FX FEMUR INTRCAPS NOS-CLOSE [820.00] Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.	05/01/2007

06/12/2013 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

- VITAMIN B DEFICIENCY NOS [266.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.

- Other convulsions [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- UTERINE LEIOMYOMA NOS [218.9] 11/20/2006
  S/P hysterectomy with BSO in 1991

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- CATARACT NOS [366.9] 11/20/2006
  Extraction left eye in 1989

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- GLAUCOMA NOS [365.9] 11/20/2006
- ROUTINE MEDICAL EXAM [V70.0] 11/20/2006
  Td/Tdap (q 10 yr): 2006
  Pneumococcal (65 yoa and high risk x1): 2010
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old

Colorectal cancer screening: Sig to 30 cm in May 2001.
Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
Tobacco: no
Alcohol: no
Drugs: no
Sexual practice/contraception: Not active
Advanced directives: yes
Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
Advise Vit D 800 IU daily.

06/12/2013 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Assessment and Plan:
401.1 BENIGN HYPERTENSION (primary encounter diagnosis)
She is no longer taking Hydrochlorothiazide. Blood pressure remains well controlled. She is now just on losartan 25 mg daily. She has no orthostatic symptoms. Will recheck in one month. Main be able to stop losartan.

V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR 3.4 today. Plan is to further reduce coumadin to:
Coumadin 10 mg
M, W, F, S, Sun one half tab
T and Th full tab
Recheck in one week particularly given that her dentist is starting clindamycin for a week. At next refill may change her to 5 mg tabs if what she requires now is mostly 5 mg on most days of the week.

241.0 Thyroid nodule, uninodular
Thyroid ultrasound showed benign small cysts. No further follow up needed.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
No recurrence. Remains on meds.

See me week of July 7.

Clinical Notes

Telephone Encounter

Neighbor Jr., William E at 6/3/2013 1501

Called her pharmacy. The prescription they have is for one tablet daily. However, it has been since April that Jeanne had this filled, so she is likely taking it as directed. At last visit, she was taking a half tab on Mon, Wed, Fri and full tab remaining days of the week. This was adjusted down to a half tab on Mon, Wed, Fri, Sun and a full tab on the remaining three days of the week. This was clarified with the pharmacy and new prescription sent.

DURABLE POWER OF ATTORNEY FOR HEALTH CARE

Indexing information required by the Washington State Auditor's/Recorder's Office, RCW 36.18 and RCW 65.04) 1/97: (please print last name first)
Reference # (if applicable):
Grantor(s) (Principal): (1) (2) Addl'. on pg
Grantee(s) (Attorney in Fact) (1) (2) Addl'. on pg
Legal Description (abbreviated):
Addl'. legal is on page Assessor's Property Tax Parcel/Account#

1. **DESIGNATION OF ATTORNEY-IN-FACT AS HEALTH CARE AGENT**
I, Jeanette Leonie Caillet Allain Hoffman, 245 High School Road NW 2, Bainbridge Island Washington 98110 (insert name, and address), do hereby designate and appoint Louis Charles Hoffmann Allain, 245 High School Rd, NW 2 Bainbridge Island, Washington 98110. (insert name, address, and telephone of designated health care agent), as my attorney-in-fact (agent), to make health care decisions for me as authorized in this document. For the purposes of this document, "health care decision" means consent, refusal of consent, or withdrawal of consent to any care, treatment, non-treatment, as provided in Chapter 7.70 RCW, service, or procedure to maintain, diagnose, or treat an individual's physical condition.
2. **CREATION OF DURABLE POWER OF ATTORNEY FOR HEALTH CARE**
By this document I intend to create a durable power of attorney for health care. This power of attorney shall not be affected by my disability or incompetence and shall continue in full force and effect until revoked or terminated as set forth in paragraph 9.
3. **GENERAL STATEMENT OF AUTHORITY GRANTED**
Subject to any limitations in this document, I hereby grant to my agent full power and authority to make health care decisions for me to the same extent that I could make such decisions for myself if I had the capacity to do so. In exercising this authority, my agent shall make health care decisions that are consistent with my desires as stated in this document or otherwise made known to my agent, including, but not limited to, my desires concerning obtaining or refusing or withdrawing life-prolonging care, treatment, services and procedures. Provided, however, my agent may not consent, without court approval, to any procedure referred to in R.C.W. 11.92.040(3) that requires court approval before a guardian may consent to such.
4. **STATEMENT OF DESIRES, SPECIAL PROVISIONS, AND LIMITATIONS**
In exercising the authority under this durable power of attorney for health care, my agent shall act consistently with my desires and is subject to the special provisions and limitations stated in any living will which I have executed.
5. **INSPECTION AND DISCLOSURE OF INFORMATION RELATING TO MY PHYSICAL OR MENTAL HEALTH**
Subject to any limitations in this document, my agent has the power and authority to do all of the following:
   a. Request, review, and receive any information, verbal or written, regarding my physical or mental health, including, but not limited to, medical and hospital records.
   b. Execute on my behalf any releases or other documents that may be required in order to obtain this information.
   c. Consent to the disclosure of this information.
   d. Consent to the donation of any of my organs for medical purposes.

Durable Power Of Attorney for Health Care

05/22/2013 - Abstract in Hall Health Health Data Service (continued)

Documents (continued)

6. **SIGNING DOCUMENTS, WAIVERS AND RELEASES**
Where necessary to implement the health care decisions that my agent is authorized by this document to make, my agent has the power and authority to execute on my behalf all of the following:
a. Documents titled or purporting to be a "Refusal to Permit Treatment" and "Leaving Hospital Against Medical Advice".
b. Any necessary waiver or release from liability required by a hospital or physician.
c. Any documents pursuant to the power of substitution in the premises, which I hereby, grant to my agent subject to my choice of alternates below.

7. **DESIGNATION OF ALTERNATE AGENTS**
If the person designated as my agent in paragraph 1 is not available or becomes ineligible to act as my agent to make a health care decision for me or loses the mental capacity to make health care decisions for me, or if I revoke that person's appointment or authority to act as my agent to make health care decisions for me, then I designate and appoint the following persons to serve as my agent to make health care decisions for me as authorized in this document, such persons to serve in the order listed below: None
a. First Alternate Agent: [redacted] (insert name, address and telephone number of first alternate agent)
b. Second Alternate Agent: None (insert name, address and telephone number of second alternate agent)

8. **PRIOR DESIGNATIONS REVOKED**
I revoke any prior durable power of attorney for health care.

9. **TERMINATION**
This power of attorney may be terminated by written notice, court approval of revocation, recording a notice with the County Auditor/Recorder, and shall be automatically revoked upon my death but only upon actual notice or knowledge of such by my agent.

10. **APPLICABLE LAW**
The laws of the State of Washington of the United States of America shall govern this power of attorney.

Dated: June 9, 2006 Jeanne L Hoffman

William,

I can no longer help Jean.
I will "No Longer" repond to eCare.
I will no longer answer phone calls.
I will no longer help Jean to her appointments.

As Gale McKiernan is calling me abussive and mentally abusing jean for administrating Jean Email and Phone Communications.

Gale is supporting White Supremacy and hatred.

05/15/2013 - Office Visit in Hall Health Primary Care Center

Reason for Visit

Chief complaint: Follow-Up
Visit diagnoses:

- DEEP VENOUS PHLEBITIS-LEG NEC (primary)
- BENIGN HYPERTENSION
- AFTERCARE LONG TERM ANTICOAG USE
- Thyroid nodule, uninodular

Clinical Notes

Progress Notes

Neighbor Jr., William E at 5/15/2013 1335

Jeanne Leonie Hoffman is a 88 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  several issues

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
V58.61 AFTERCARE LONG TERM ANTICOAG USE
Jean is in for follow up. She is taking coumadin as directed in med list. She has had no bleeding. As noted in telephone encounters, her INR last week become subtherapeutic after being too high when she took more vitamin K than advised. She followed the regimen noted in those telephone encounters for correcting her INR and moving it back to the therapeutic range.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Vertebral fracture [805.8]	12/13/2012
Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months, that is May 2013	

05/15/2013 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

- Thyroid nodule, uninodular [241.0] 12/13/2012
  CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011.

- OSTEOPOROSIS NOS [733.00] 03/04/2008
  T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
  Began fosamax spring 2008. Continue for five years, then stop

- AFTERCARE LONG TERM ANTICOAG USE [V58.61] 01/08/2008
  Reason for anticoagulation: Recurrent dvts
  Duration of anticoagulation: life
  INR goal: 2.-3

  She has also been on Trental for many years because of recurrent venous stasis disease despite adequate anticoagulation. Her last arterial vascular study showed ABIs of 1.0 in 2007. 2/12/2010 repeat arterial vascular studies of lower extremities ordered.

- ADULT FAILURE TO THRIVE [783.7] 10/19/2007
  Lives in subsidized housing on Bainbridge
  Bremerton APS at 1-888-833-4925
  Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
  Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait

- TREMOR NEC [333.1] 08/17/2007
  Noted by Melanie Parker. Consider Parkinson's disease med trial.

- FX FEMUR INTRCAPS NOS-CLOSE [820.00] 05/01/2007
  Pinned April 2007.
  Post op hematocrit 25
  Has walker with wheels for use outside of home. Uses cane in home.

- VITAMIN B DEFICIENCY NOS [266.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.

- Other convulsions [780.39] 11/20/2006

05/15/2013 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Petit Mal since 1975
Carbamazepine level 7.6 on Feb 2007
Discontinued based on ER neuro consult in early 2013

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- UTERINE LEIOMYOMA NOS [218.9] 11/20/2006
  S/P hysterectomy with BSO in 1991

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- CATARACT NOS [366.9] 11/20/2006
  Extraction left eye in 1989

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- GLAUCOMA NOS [365.9] 11/20/2006
- ROUTINE MEDICAL EXAM [V70.0] 11/20/2006
  Td/Tdap (q 10 yr): 2006
  Pneumococcal (65 yoa and high risk x1): 2010
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: yes
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

PRORPD Telephoned with read back to: 3/29/2013
PRORPD STEPHEN AT 1446 3/29/2013

Assessment and Plan:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
See telephone encounters. Ultrasound last week was negative except for question of small distal clot. She has had no unexpected leg swelling. See INR below.

401.1 BENIGN HYPERTENSION
Blood pressure is doing very well and actually a bit low. I think we can discontinue hydrochlorothiazide at this time so that her only blood pressure medication would be losartan 25 mg daily. Follow up in one month.

05/15/2013 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR 5.1 today. She has had no bleeding. Plan is:
Wednesday evening (today): No coumadin
Thursday: One half tab
Friday: One half tab
Saturday: Whole tab
Sunday: One half tab.
Thereafter: Coumadin 10 mg one half tab on Mon, Wed, Frid, Sunday and one on the remaining three days of the week.

241.0 Thyroid nodule, uninodular
She has not yet had her thyroid ultrasound which was ordered last visit. She should call Roosevelt radiology to schedule: UWMC Radiology 206-598-7200

See me in one month.

She reports that she is very happy with the care Louis her son is providing. The manager of her apartment has put in a new ramp with which she is pleased and has made repairs in the floor in the inside of her apartment. There is some electrical work being done right now in the kitchen. She did express that there is something not right with her other son Doug who will pound on her door. She thinks he is jealous of Louis.

ADVANCE BENEFICIARY NOTICE OF NONCOVERAGE (ABN)

NOTE: If Medicare doesn't pay for office visit and all related services **below, you may have to pay.**

Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the _____ below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost:
Code _____ Description: Office visit and all related services	**Check reason code (see back)** A ☐ B ☑ C ☐ D ☐	$41 to $284

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the _____ listed above.

Note: If you choose Options 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

Options: **Check only one box. We cannot choose a box for you.**

☑ **OPTION 1.** I want the office visit and all related services listed above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I am responsible for payment, but **I can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2.** I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3.** I don't want the _____ listed above. I understand with this choice I am not responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional Information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-Medicare** (1-800-633-4227/TTY: 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

Clinical Notes

Telephone Encounter

Neighbor Jr., William E at 5/15/2013 1215

Received call from Gale at APS 360-c516-3319/w473-2160. She is following up with Jean and trying to determine what services she may need. I explained that our nurse had involved Kitsap county community services last fall when Jean had sustained a vertebral fracture. I will follow up with Jean when she visits this afternoon.
William E Neighbor JR, MD

5/16/2013
Spoke with Gale at APS again today after my visit with Jean yesterday. See that clinic note. Gale will be visiting Jean and son Louis tomorrow and reapproaching the idea of COPES services as well as evaluating further the relationship with the other son Doug.

Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool	5/15/2013 8:34 AM

Dear Gale,

Yes, Friday at !0:am will be fine.

Please contact: William E. Neighbor, Jr MD/206-221.2517.

Please note: My Legal Name: Louis Alloin, My Full Legal Name: Louis Charles Hoffmann Alloin.

It appears that Douglas Hoffman has affected your agency.

We need to Stop Douglas and his wife Chris Ann Hill are confirmed White Supremacy. Douglas has also Attack KC Jone my ex-husband. They have also attack other Gay Citizens who have contact with Jean or me.

BE ADVISED: Douglas Has made statements, that he will be organizing Bainbridge Island White Supremacy Group and individual to attack Jean and I. Police are aware of Douglas White Supremacy Activities

Both Jean and I are disabled.

Note: Jean has hearing issues and will require assistance.

I am Power of Attorney for Jean and caregiver.

I will need to know, if you are involved in White Supremacy or have been involved in Anti-Gay Hate Activities, with in your personal life or career.

If you are involved in Hatred toward Gay Citizens. Please assign another non-bias interviewer.

I am being treated for injuries caused by White Supremacy citizens who have hatred.

NOTE: Douglas also has Anti-Family activities toward all Hoffmann Families Members.

NOTE: Douglas "Hoffman" name is not legal family name. Charles Hoffmann changed family name do to anti Jewish and German Hatred and Violence.

Louis Alloin

CC: Dr Neighbor

Dear Mr. Louis Hoffman: I received your voice message regarding your concern about your brother. I would like to discuss this matter in person versus by phone. I would also like to interview you and your mother separately so I can ascertain what actually applies to you and what applies to your mother
Please advise if this meets your schedule. If not, I can reschedule.

Medical Advice

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool	5/13/2013 9:20 AM

William,

On Sturday, My Son Douglas, came to my Apt.
I was bug try to take a bat and was not prepared for visit.
Nor did Douglas, follow my request, that he email me or us postal-card-letter.

It was determined, not to answer door, nor let him in the apt.

Douglas began pound on the door, yelling obcenities, White supremacy hate statements of intolerance. Try to get other residents, to participate in the hate attack, by yelling and directing the rambling hate to other apt's.

He was walking in the flower garden, stomping braking plants.

Louis called Police, who ask him to leave. The avowed to organize Island Hate groups, to attack Jean and I .

Douglas is refusing to stop his anger, which is increasing. Refusing to stop his hatred, refusing

05/13/2013 - Patient E-mail in Hall Health Primary Care Center (continued)

Messages (continued)

to promote family relations and positive, we-being communitications between families.

It was in Jean's and I best interests not to let him in the Apt, knowing that he will start promoting hatred and make Jean upset, which will cause health issues.

Subject: RE: Home Care Reply

"Russell, Kathleen (DSHS/HCS)" < RusseKJ@dshs.wa.gov>

Hello: Per your email. Your mother does not need personal care. You said she is getting it done, slow, but doing it. So…. She is not eligible for housekeeping tasks if there are no personal care needs. Thus she is no longer eligible for COPES in home care. I am happy to hear that she is doing better. Hope things are getting better for you as well. I will be closing

05/10/2013 - Patient E-mail in Hall Health Primary Care Center (continued)

Messages (continued)

your mother’s case but you may re-apply as needed if you see personal care needs arise.
Kathy

Clinical Notes

Telephone Encounter

Neighbor Jr., William E at 5/6/2013 1629

INR now subtherapeutic. Because of bleeding and fall risk and supratherapeutic INR, patient prescribed Vit K. At local pharmacy only 5 mg tabs were available. Prescribed to take half of 5 mg tab (2.5 mg) but son called me Friday evening and she had taken a full 5 mg tab. She was told then to take coumadin 10 mg on Sunday rather than a half tab after holding coumadin for Friday and Saturday.

INR results:
PRORPD 1.2 5/6/2013
PRORPD 7.8 5/3/2013
PRORPD Run in main coag lab, not a rapid protime result. 5/3/2013
PRORPD 3.0 4/12/2013
PRORPD 2.2 4/4/2013
PRORPD 5.3 3/29/2013
PRORPD Run in main coag lab, not a rapid protime result. 3/29/2013
PRORPD Telephoned with read back to: 3/29/2013
PRORPD STEPHEN AT 1446 3/29/2013
PRORPD 2.0 3/8/2013

Recommendation for coumadin this week:
Monday: Full tab of 10 mg
Tuesday: Full tab of 10 mg
Wednesday: Half tab, 5 mg
Thurs: Full tab 10 mg
Friday: Half tab, 5 mg
Saturday: Full tab, 10 mg

05/06/2013 - Patient E-mail in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Then resume Coumadin 10 mg one half tab on Mon, Wed, Friday, and full tab remaining days of each week.

Retest INR in 2 weeks.

5/8/2013
12:09 PM
I was called from dental clinic where Jean mentioned that she felt she had a clot in her right leg. Given that her INR was low, I think we should get a vascular ultrasound before she seems me this afternoon in order to expedite care. I have ordered this. I can be reached on cell 697-1376. AC 206.

Subject: INR results Monday May 6 and recomendations

Jeanne: As written to you earlier today, your INR was 1.2. This is the effect of taking more than the prescribed amount of Vitamin K. Because your INR is below the desired level of 2-3, you are at risk for clot formation, so we need to temporarily increase your coumadin dose.

Regarding Coumadin, you should have taken a full tablet of 10 mg of Coumadin on Sunday, yesterday. My recommendations at this point are:

Recommendation for coumadin this week:

05/06/2013 - Patient E-mail in Hall Health Primary Care Center (continued)

PRORPD 2.9 3/1/2013

Attempted to reach by phone, but as usual, no answer. They do check e mail. E mail sent.
At last visit clarified that she is to take coumadin 10 mg one half tab on MWF and one tab on remaining days of the week. At that time she appeared to be taking a full tablet daily.

Plan if not bleeding is hold two doses and recheck INR ideally on Sunday.
If any gum or nose bleeding or black stools, she is to hold coumadin, take Vitamin K 1 mg, and definitely recheck INR tomorrow or Sunday.
She may be able to have this done on Bainbridge as she has seen a provider there in the past.
I provided my cell phone number to them.

5/3/2013 5:59 PM

05/03/2013 - Patient E-mail in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

After message sent to patient I did hear back from her son Louis. She has had no signs of bleeding; however, because of her age and risk of falls plan is to reverse anticoagulation a bit. Usual pharmacy on Bainbridge does not carry vit K po. Rite Aid Bainbridge phone 842-4065 carries only Vit K 5 mg scored tabs. Prescription for Vit K 5 mg one half tab (2.5 mg) taken tonight x 1. I called back son and went over the following plan with him which I have e care messaged to him.

Vitamin K 5 mg take one half (2.5) mg tonight
Do not take warfarin (coumadin) tonight, Friday, or Saturday night
Take one half tab of coumadin on Sunday.
Have INR done Monday morning.

Note usual dose of coumadin should be 10 mg tab one half tab on M, W, F, full tab remaining four days of the week.

William E Neighbor JR, MD

Electronically signed by Neighbor Jr., William E at 5/3/2013 6:07 PM

Voronchuk, Eleonora at 5/6/2013 0809

Confirmed:
Will get Vitamin K 1 mg by mouth prescription Tonight if possible.
Will not take coumadin tonight Friday thru Saturday, or Sunday.
Re test Monday.

Louis for Jean

Jean is doing well, will check for problems

As we discussed by phone Friday evening, because she took a higher amount of Vitamin K, she should have taken a full tab of coumadin 10 mg on Sunday. She should have an INR today, Monday. As I long as I can reach you later today, you can return home after the blood test; but I would be happy to see you for a special appointment. I have meetings from 11:30 to 1, but otherwise am available.

Mephyton/K 5mg

From	To	Sent
Hoffman, Jeanne Leonie	William E Neighbor Jr., MD	5/3/2013 8:16 PM

Jean took 5mg...as she saw only one tab.
I did not have time to cut tab, before she eat it.

Now what...?

Subject: Follow up after our phone call to document plan

Louis: As discussed by phone just now, the plan is as follows--re your mother Jeanne:
--Vitamin K 5 mg take one half (2.5) mg tonight. It is important that it just be half a tab. Do not take the other half--save it in a safe place for the future if it is needed.
--Do not take warfarin (coumadin) tonight, Friday, or Saturday night
--Take actually just a half tab of coumadin on Sunday.
--Have INR done Monday morning.

Note that her usual dose of Coumadin current is 10 mg one half tab on Mon, Wed, Fri, and a full tab on the remaining four days of the week. This Sunday she should just take a half tab and then have the blood test on Monday.

From: William E Neighbor JR, MD
Sent: 5/3/2013 5:26 PM PDT
To: Jeanne Leonie Hoffman
Subject: critically elevated anticoagulation test

Jeanne: Your INR was 7.8 which is the highest it has been and it quite critical I would like your son to call my beeper at 986-3554 (enter your phone number, then hit the # sign to send the number to my beeper). I will call back If I don't call hospital paging at 598-6190 and ask them to page me.

What we do depends on if you have had any nose bleeding, gum bleeding, blood in your stool, or black stools.
If you do not, then simply do not take coumadin tonight, Friday, Saturday, or Sunday, and have your INR checked on Monday morning.
If you do have any signs of bleeding, you should also not take coumadin as above, but should also take Vitamin K 1 mg by mouth. I have sent a prescription to your pharmacy

Clinical Notes

Progress Notes

Neighbor Jr., William E at 4/17/2013 1411

Jeanne Leonie Hoffman is a 88 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up

780.4 Vertigo (primary encounter diagnosis)
Jeanne reports that she was in her usual health until 2 weeks ago when while staring at a window she suddenly experienced a sense of the building spinning. She states the symptoms lasted for 5 minutes. She had no other symptoms, no change in hearing, and no double vision. The episode resolved spontaneously. She did not fall. 2 days later she had a similar but less severe and shorter episode. 2 days after that she had a similar shorter episode. She has not experienced any symptoms in the last 8-9 days. She denies any headache, double vision, paresthesias or paresthesias, difficulty swallowing, change in hearing, positional vertigo. Of note she had a CT scan of her head done earlier this year in the emergency room because of an episode of confusion which was felt to be due to psychosocial distress related to relationships between her 2 sons

.
241.0 Thyroid nodule, uninodular
A CT scan of her neck done in December 2012 at the time of lumbosacral spine fracture related to a fall showed incidental finding of small thyroid nodule. Recommendation was ultrasound followup. This has not been scheduled.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
She has had no recurrent swelling or other signs of thrombosis in her lower extremities

V58.61 AFTERCARE LONG TERM ANTICOAG USE
She tells me today that she is taking Coumadin 10 mg one tablet daily. This is rather than what is recorded on her med list has been a half tablet on Monday, Wednesday, Friday and a full tablet on the remaining days of the week. It is unclear why she has returned to taking one tablet daily. It may be that she has been confused related to changes over the last one to 2 months making short-term adjustments because of INR is out of range.

She comes in today alone though her son is in the waiting room. She did not want her son to know about the episode of vertigo.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Vertebral fracture [805.8] Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months, that is May 2013	12/13/2012
• Thyroid nodule, uninodular [241.0] CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011.	12/13/2012
• OSTEOPOROSIS NOS [733.00] T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continue for five years, then stop	03/04/2008
• AFTERCARE LONG TERM ANTICOAG USE [V58.61] Reason for anticoagulation: Recurrent dvts Duration of anticoagulation: life INR goal: 2.-3 She has also been on Trental for many years because of recurrent venous stasis disease despite adequate anticoagulation. Her last arterial vascular study showed ABIs of 1.0 in 2007. 2/12/2010 repeat arterial vascular studies of lower extremities ordered.	01/08/2008
• ADULT FAILURE TO THRIVE [783.7] Lives in subsidized housing on Bainbridge Bremerton APS at 1-888-833-4925 Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved. Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is	10/19/2007

likely at least a 2 year wait

- TREMOR NEC [333.1] 08/17/2007
  Noted by Melanie Parker. Consider Parkinson's disease med trial.

- FX FEMUR INTRCAPS NOS-CLOSE [820.00] 05/01/2007
  Pinned April 2007.
  Post op hematocrit 25
  Has walker with wheels for use outside of home. Uses cane in home.

- VITAMIN B DEFICIENCY NOS [266.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.

- Other convulsions [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- UTERINE LEIOMYOMA NOS [218.9] 11/20/2006
  S/P hysterectomy with BSO in 1991

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- CATARACT NOS [366.9] 11/20/2006
  Extraction left eye in 1989

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006

LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- GLAUCOMA NOS [365.9] 11/20/2006
- ROUTINE MEDICAL EXAM [V70.0] 11/20/2006

  Td/Tdap (q 10 yr): 2006
  Pneumococcal (65 yoa and high risk x1): 2010
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: yes
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

Assessment and Plan:
780.4 Vertigo (primary encounter diagnosis)
3 episodes of vertigo occuring 2 weeks ago separated by two days. Longest was 5 minutes by her report. Occurred while looking out window. Neuro exam does not point to cause. She has no symptoms with positional change. INR has been most recently 3.0. Plan is vascular dopper of Vertbrobasilar and cartotid systems. She had normal CT of head done for other reasons earlier this year. Consider MR.

241.0 Thyroid nodule, uninodular
Incidental finding of thyroid nodule on CT of spine. TSH normal in last year. Thyroid ultrasound ordered.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
No recurrence

V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR 3.0. She is to be sure to take coumadin 10 mg tab one half on M, W, F, and full tab on the other days of the week. I reviewed this carefully with her. Repeat INR in two weeks.

Follow up plans: Two weeks
Return sooner if: Recurrent vertigo

Agreement to Pay for Healthcare Services

WAC 388-502-0160 ("Billing a Client")

This is an agreement between a "client" and a "provider," as defined below. The client agrees to pay the provider for healthcare service(s) for which the Department of Social and Health Services (DSHS) will not pay. Both parties must sign this Agreement. For the purposes of this Agreement, "services" include but are not limited to healthcare treatment, equipment, supplies, and medications.

1. **Client** - is a recipient of Medicaid or other healthcare benefits through the DSHS or a managed care organization (MCO) that contracts with DSHS; and
2. **Provider** is an institution, agency, business, or person that furnishes healthcare services to DSHS clients and has a signed agreement with DSHS or authorization from an MCO

This Agreement and WAC 388-502-0160 apply to billing a client for covered and noncovered services as described in WAC 388-501-0050 through WAC 388-501-0070. Providers may not bill any DSHS client (including those enrolled with an MCO that contracts with DSHS) for services which DSHS or an MCO that contracts with DSHS may have paid until the provider has completed all requirements for obtaining authorization.

CLIENT'S PRINTED NAME	CLIENT'S DSHS ID NUMBER
Hoffman, Jeanne	107675002 WA
PROVIDER'S PRINTED NAME	PROVIDER NUMBER
William Neighbor	1265518989

This form:

- Must be fully completed by both the provider and the client **before** any service for which this Agreement is required is provided to a DSHS client
- Must be completed no more than 90 calendar days before the service is provided. If the service is not provided within 90 calendar days, a new form must be completed and signed by both the provider and the client
- Must be completed only **after** the provider and the client have exhausted all applicable DSHS or DSHS-contracted MCO processes which are necessary to obtain authorization for the requested service(s). These may include the exception to rule (ETR) process for noncovered services as described in WAC 388-501-0160 or the administrative hearing process as described in WAC 388-526-2610, if the client chooses to pursue these processes.
- Must be understandable to a limited English proficient (LEP) client in his or her primary language. This may include a translated form or interpretation of the form. If the form is interpreted for the client, the interpreter must also sign and date the form. A translated form must be signed by both the client and the provider.

The table on back of this form must be fully completed. If needed, attach another sheet for additional services. Each additional page must be signed and dated by the client, provider, and interpreter (if applicable).

Important Note from DSHS:

- This agreement is void and unenforceable if the provider fails to comply with the requirements of this form and WAC 388-502-0160 or does not satisfy DSHS conditions of payment as described in applicable Washington Administrative Code (WAC) and Billing Instructions. The provider must reimburse the client for the full amount paid by the client.
- See WAC 388-502-0160(9) for a list of services that cannot be billed to a client, regardless of a written agreement.
- Keep the original agreement in the client's medical record for 6 years from the date this agreement is signed. A copy of this completed, signed agreement must also be given to the client.
- Providers are responsible for ensuring that translation or interpretation of this form and its content is provided to LEP clients. Translated forms are available at http://www.dshs.wa.gov/msa/forms/eforms.html.

					PA REQUEST	PA DENIAL (ATTACH DSHS NOTICE)

- I understand that DSHS or an MCO that contracts with DSHS will not pay for the specific service(s) being requested for one of the following reasons, as indicated in the above table: 1) DSHS does not cover the service(s); 2) the service(s) was denied as not medically necessary for me, or 3) the service(s) is covered but the type I requested is not.
- I understand that I can, but may choose not to: 1) ask for an Exception to Rule (ETR) after a DSHS or DSHS-contracted MCO denial of a request for a noncovered service; or 2) ask for a hearing to appeal a DSHS or DSHS-contracted MCO denial of a requested service.
- I have been fully informed by this provider of all available medically appropriate treatment, including services that may be paid for by DSHS or DSHS-contracted MCO, and I still choose to get the specified service(s) above.
- ***I agree to pay the provider directly for the specific service(s) listed above.***
- I understand the purpose of this form is to allow me to pay for and receive service(s) for which DSHS or a DSHS-contracted MCO will not pay. This provider answered all my quest ons to my satisfaction and has given me a completed copy of this form.
- I understand that I can call DSHS at 1-800-562-3022 if I want to receive additional information about my rights or services covered by DSHS under fee-for-service or managed care.

I AFFIRM: I understand and agree with this form's content, including the bullet points above.	CLIENT'S OR CLIENT'S LEGAL REPRESENTATIVE'S SIGNATURE X Jeanne L Hoffman	DATE 4.17.13
I AFFIRM: I have complied with all responsibilities and requirements as specified in WAC 388-502-0160.	PROVIDER OF SERVICE(S) SIGNATURE William Keogh	DATE 4/17/13
I AFFIRM: I have accurately interpreted this form to the best of my ability for the client signing above.	INTERPRETER'S PRINTED NAME AND SIGNATURE	DATE

ADVANCE BENEFICIARY NOTICE OF NONCOVERAGE (ABN)

NOTE: If Medicare doesn't pay for office visit and all related services **below, you may have to pay.**

Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the _____ below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost:
Code _____ Description: office visit and all related services	**Check reason code (see back)** A ☐ B ☑ C ☐ D ☐	$341.50 $284

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the _____ listed above.

Note: If you choose Options 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

Options: Check only one box. We cannot choose a box for you.

☑ **OPTION 1.** I want the office visit and all related services listed above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I am responsible for payment, but **I can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2.** I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3.** I don't want the _____ listed above. I understand with this choice I am not responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-Medicare** (1-800-633-4227/TTY: 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	4/2/2013 5:23 PM

Last Read in MyChart
4/18/2013 10:50 AM by Hoffman, Jeanne Leonie

I see that you will be over here on Thursday. I just wrote saying that Friday might be a better for the test as I could see you in my regular clinic on Friday morning after the INR> That would be best. Ordinarily I would try to fit you in specially on Thursday, but I have meetings from 8 am to mid afternoon and then some other things to take care of.

William E Neighbor JR, MD

Hoffman, Jeanne Leonie	William E Neighbor Jr., MD	4/2/2013 3:26 PM

Jim Everett, MA, LMHC
1-800-422-7114 Bremerton

Jean has signed document to allow you both to communicate on Douglas Hoffman Behavior and mal-treatment of his mother and Louis.

Once Doug starts attacking Jean, I try to get him to change his anger toward me. and try to get him to leave.

Jean has order new locks, so door is locked at all times.

Messages (continued)

However there was a problem on Island Bus, Jean hearing was poor and she did not understand what was going on.

Remeber this is young son, who has been mis-instructed/etc..

Jean is doing well, some depress over weeken.

Planning to go to Woodinville on thurday to get-away from Island.

She has hair cut planned for Wed. and Laundry away from Apt.

Louis:

1. Please reply to separate message I sent to follow up on Jean's elevated INR.
2. Related to the present E care message, I know that Adult Protective Services has been contacted. I would like to speak with her case worker if that is ok. Please send me a name and number. Thank you.

Thank you for responding. I am glad you got the message to reduce the dose and will get a repeat TSH. Thinking about the timing, I think it would be best to get the test on Friday morning and then come over to see me so if it is elevated we can develop a plan in person. That would be safer. Please call for the appointment. I presently have openings on Friday morning.

Subject: INR from last Friday

Jeanne and Louis: Please confirm that you received this message about Jean's INR with the instructions for decreasing her dose. Because of the unpredicatability of Jean's INRs recently I again would recommend that you seek care on Bainbridge for this. Alternatively, you should have tests done on Wednesday or Friday mornings and then come over to see me so we can discuss changes in coumadin dose in person rather than via E care messaging.

Hi Jeanne,

Just got your INR results and they are 5.3.

03/29/2013 - Telephone in Hall Health Primary Care Center (continued)

Messages (continued)

I contacted Dr. Neighbor and he wants you to not take your coumadin this evening or on Saturday.
He would than like you to take 1/2 dose on Sunday and then a full dose on Monday and contact Dr. Neighbor.

Please respond to this so that I know that you got the message.

Thanks for using ECare,
Stephen Willis MA

Clinical Notes

Progress Notes

Neighbor Jr., William E at 3/13/2013 1408

Jeanne Leonie Hoffman is a 88 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
- Immunization or Injection
  Td 6/7/06

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
Her INRs have ranged between 3 and 2. Part of the variation is that Jean recently was taking just a half tab daily. Now beginning this week she decided to take a full tab daily.

780.39 CONVULSIONS, OTHER
When she was seen in the emergency department recently for nonresponsive episodes a neurologist consulted. It was felt that she was not having seizures and that rather the episodes were stress related in part related to conflict between her and the son who does not live with her. She subsequently discontinued Tegretol and has not noted any worsening. Adult Protective Services has been contacted by the son who lives with her.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
She's had no recurrence of symptoms of clots.

V61.9 Family discord
Her 2 sons had disagreements. One son Louis lives with her and she gets along well with him. The other son who does not live with her husband threatening. However she feels safe and apparently is encountered this kind of behavior from him before. Louis has contacted Adult Protective Services.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Vertebral fracture [805.8] Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months, that is May 2013	12/13/2012
• Thyroid nodule, uninodular [241.0] CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011.	12/13/2012
• SKIN SENSATION DISTURB [782.0] 6/3/2008 labs ordered. Return in one month for exm.	06/03/2008
• OSTEOPOROSIS NOS [733.00] T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continue for five years, then stop	03/04/2008
• AFTERCARE LONG TERM ANTICOAG USE [V58.61] Reason for anticoagulation: Recurrent dvts Duration of anticoagulation: life INR goal: 2.-3 She has also been on Trental for many years because of recurrent venous stasis disease despite adequate anticoagulation. Her last arterial vascular study showed ABIs of 1.0 in 2007. 2/12/2010 repeat arterial vascular studies of lower extremities ordered.	01/08/2008
• ADULT FAILURE TO THRIVE [783.7] Lives in subsidized housing on Bainbridge Bremerton APS at 1-888-833-4925 Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved. Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait	10/19/2007
• TREMOR NEC [333.1] Noted by Melanie Parker. Consider Parkinson's disease med trial.	08/17/2007
• FX FEMUR INTRCAPS NOS-CLOSE [820.00]	05/01/2007

Pinned April 2007.
Post op hematocrit 25
Has walker with wheels for use outside of home. Uses cane in home.

- VITAMIN B DEFICIENCY NOS [266.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.

- CONVULSIONS, OTHER [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin

Social History Narrative

Soc Hx. 1/30/2007 Nancy at Helpline House, 282 Knechtel Ave NE, Bainbridge Island , WA 98110 Voice 842-7624, Fax 842.9867, called last week. See RN telephone. Note. The plan is to call Nancy once I have assessed Mrs. Hoffman's needs when I see her at an upcoming visit.6/15/2010 Grew up on Bainbridge. Both parents from Paris. Spoke French at home and English in Public. She recalls her first clot was in her legs when she was 30. She also developed clot in her arms later. She states her grandmother had the same problem.William E Neighbor, MD

Objective:
BP 122/75 | Pulse 89 | Temp(Src) 97.8 °F (36.6 °C) (Oral)
Estimated Body mass index is 20.05 kg/(m^2) as calculated from the following:
Height as of 2/27/07: 5' 7"(1.702 m).
Weight as of 11/7/12: 128 lb(58.06 kg).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 122/75
General: healthy, alert, no distress
Jeanne Seems in her usual positive good spirits. She seems to be taking the family stresses and stride.

Assessment and Plan:
V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
Her INRs have ranged between 3 and 2. Part of the variation is that Jean recently was taking just a half tab daily. Now beginning this week she decided to take a full tab daily. Her correct, most current dose, should actually be as written on the bottle: One half tab on M, W, F, and one the remaining days of the week. Though my initial advise after her last reading was to recheck in one month, I would revise this to have it rechecked in two weeks.

03/13/2013 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

780.39 CONVULSIONS, OTHER
ER Neurology note reviewed. She is no longer on tegretol which was for petit mal seizures dating from 1975. She is doing well.

401.1 BENIGN HYPERTENSION
Well controlled

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
No recurrence

V61.9 Family discord
Louis agreed to my contacting aging and disability services to ask them to visit. He will send me their current phone number.

I have give Louis $30. to purchase new Door Lock, as Douglas has a Key, that I want returned.

I asked Louis to disconnect Ph:206-855-0815.
My home is now quite and I am a little more security from Douglas violant anger.

Jean

Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool	3/11/2013 7:31 PM

Dear William,

I went to court today RO against Douglas Frank Alloin Hoffman,

Louis Lost a Full RO to protect me. Douglas is try to have Louis Arrested for being Gay. Douglas is using the sex offender laws to have Louis Arrest.
Remember it was once a crime to be Gay, to support Gays or know Gay People in Washington. People Arrested for support Gay Rights were subject to Gay Sodemy Laws. It was not necessary to prove a sexual relation. The Court just required 3 or more people to testiy the Gay person was a Fag and off to the big house or worse to medical facility to be tortured and abused.

I am very depressed and so is Louis. Louis told me it could be any day now before he is arrested. Police and Courts anre conducting investigation to support arresting Louis.

03/11/2013 - Patient E-mail in Hall Health Primary Care Center (continued)

Messages (continued)

Louis is Gay and being abuse, his love was threaten by Douglas. Then by the state...to end a loving relationship. Louis has been abuse by hate people all his life. His hip was injured in 1997 by hate gang. The DSHS refused to treat injury and UWMC followed to futher abuse Louis...Because he is Gay.

Douglas's hatred to Louis goes back to when Louis Came-out and told every he wanted to marry guy at age 6 on Douglas 5 Birthday Party.

Louis will be going to jail soon for 5 or more year for Been Gay and forced to be a sex offender. I will be forced to be abused by Douglas. I told Louis I just want to die now. My family was denied help. Douglas tried to hug me in Court... I Pushed him away and yelled....No one cared.

Louis is depressed too. After all his brother is trying to imprison Louis for Being Gay and I will be forced to be abused by Douglas.

I have kept silent to long.

Louis and I are both very sad, as Louis waits be be arrested.

As you know Louis wrote this letter. Louis has been my care-giver now for 30 years now.

I feel that you will continue to allow Douglas to abuse me and Louis.

See you on Wednesday.

Results Question

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool	3/6/2013 1:53 PM

I will be at Rosevl-Clinic on 3-8-13 for a follow-up IR-Test at 10:15am.

I am in good spirits and doing wel, since Louis enacted a "No Contact Order" against Douglas.
I feel great.

However, I am hoping that Douglas get some help to stop his anger and hatred.
I signed a General Power of Attorney for Louis to care for me.
Now Louis has two power of Attorney: one for medical and one for my general legal requirements to act on my behalf.

Jean

William,
Louis For Jean,

Today Jean & I went to court for protection.
I was granted a two week temporary order, pending a March 11, review.

Jean has refused protection.

I am unable to continue caring for Jean when she has no concern for her health & welfare.

William,

Jean was unreponsive this morming.
911 Called, she is on "Pending Status" for UWMC-ER.
Left on 9:35am BI Ferry.

Jean has been under extreme stress do to Douglas & Chris Hoffman violence behavior wanting her DEAD.

This type of treatment that Douglas is deeply involve in, is cuasing Jean to be depressed.

She wants her family to stop the hatred and she is trying to do it on her own.

I signed RO last night with BI Court, will be in court on Monday at 2:pm.

Each time Douglas & Chris attack her with hatred she has emergency medical issue.

William, We must protect her....Douglas is attempting to kill her with acts of hatred to cause medical issues.

I AM VERY CONCERNED.

DOUGLAS FAMILY MUST BE BLOCK FROM SEEING HER AT UWMC. THEY WILL CONTINUE WITH THE HATRED.

I am unable to call police (Long Distance) Please advise police 360-308-5400.

Active at the End of Visit

Acetaminophen (TYLENOL) 500 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 6/22/2016
Instructions: 2 in am 2 in pm and 3 before bed
Entered by: Smith, Courtney A, CM
Entered on: 3/8/2010
End date: 6/22/2016

Timolol Maleate 0.5 % (DAILY) ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 3/13/2013
Instructions: instill one drop into each eye twice daily
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/13/2012
Start date: 2/13/2012
End date: 3/13/2013
Quantity: 5 mL
Refill: prn

Hydrochlorothiazide 25 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 5/15/2013
Reason for discontinuation: Dose adjustment
Instructions: take on half tab daily
Authorized by: Neighbor Jr., William E, MD
Ordered on: 7/9/2012
Start date: 7/9/2012
End date: 5/15/2013
Quantity: 15 Tab
Refill: 6

CarBAMazepine 200 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 3/13/2013
Instructions: TAKE ONE TABLET BY MOUTH THREE TIMES DAILY
Authorized by: Neighbor Jr., William E, MD
Ordered on: 7/23/2012
Start date: 7/21/2012
End date: 3/13/2013
Quantity: 90 Tab
Refill: 6

Pentoxifylline CR 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 5/10/2013
Reason for discontinuation: Reorder
Instructions: TAKE ONE TABLET BY MOUTH THREE TIMES DAILY
Authorized by: Neighbor Jr., William E, MD
Ordered on: 8/28/2012
Start date: 8/27/2012

RE: Results Question

From	To	Sent
Hoffman, Jeanne Leonie	William E Neighbor Jr., MD	2/27/2013 9:04 AM

A Temp-RO has been iss untill March 11, 2013 11:30am, Then FULL-RO maybe issued or dropped.

Jean is doing well, still depressed, however improving. She has not left apt., keeping indoor's and sitting all day long. She made dinner.

She will be going to cafe' on pre-arranged invitation to meet Douglas for a Lunch.
However, Douglas did not confirm a time or willingness to confirm calendar/Schedule.
I am concerned, as Douglas may continue to threaten her at Cafe'.

So Jean will go for a 12:-1:pm Luncheon

RE: Results Question

From	To	Sent
Hoffman, Jeanne Leonie	William E Neighbor Jr., MD	2/20/2013 11:55 AM

William,

Jean is very depressed this morning. There are problems and issues concerning restraining order.

1). Jean is in denial, possible in fear that if she cooperates with Police and her Doctor....She will lose further family and her sons' be imprisoned and denied visits/etc.

2). Jean is blaming herself and is in deep self talk whish that she was never born, never married, never had children.

3). She is mutter/whispering to herself, then responding to whispers out load.

I called Island Senior Center to see if she can visit to meet other seniors.
[Problem: Jack, her bother and Douglas/Chris use the center to deny existance of Jean]. I discovered this by talking to a senior who had knowledge of Family, inwhich, Jean and I were not known to him.

I will be talking to Sue, Facility director at 1:30pm, to see Jean will be safe to interact with other seniors. Remmber the Island has a large population of "White Supremist" in which Doug & Jack have conradeship.

Jean is feeling sad, that her birthday invitation to take Doug & I out to lunch has failed. She was attempting and hoping to see both her sons and other family member together for this special occasion.

She is planning to go to cafe on Wedesday 27th.

Messages (continued)

Jean's whole behavior/guise has changed. No longer happy moods and swings to deep water-eyed glares of deep thought.

"The Problem" now is that she has no interest in "restraining order" nor can I talk to her, that this court order wiil get Douglas help with his anger and stop the violence.

Thus the only option the court advised me, " that I issue the order on myself to Jean's Apt..

As I need to become "Jean's Legal Guardian", which will take time and Jean's cooperation.

What conversation we had, she fears losing her son's and her attempt failed.

If she see Douglas on Wedesday, we can expect more family violence.

Jean is refusing to get a blood test this week.

Results Question

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool	2/19/2013 3:09 PM

William,
On thurday 14th Douglass Hoffman Attacked Jean and Louis.
Jean went into a deep depression on Sat & Sun.
She is blaming herself and want to die.

Today atuesday 19th douglas attacked me pushing me violently , I fell against walker. He began his hatred remarks and threating me with further violence.
Doug call police with itnent to harm Jean and Louis.

Police are helping to get restraining order.

Douglas intent is cause jean to have a heartattack by causing Jean to get overexcited.

Doulas has threaten to return on WEDESDAY.
I am concern for both our lives.

Louis for Jean

Results Question

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool	2/14/2013 9:55 AM

William,

During week of high levels, it was discovered that Jean was "snacking" during sleep time hours. many cookies.

When cookies snacking was addressed and stopped,,,,levels when down quickly.

Only possiblity

Result: HISTORY: multiple compression fractures EXAM: XR L SPINE 2-3 VIEWS COMPARISON: CT thoracic spine 12/7/12, CT lumbar spine 12/6/12. FINDINGS:As before, unchanged wedging deformities of T12, L2 and L3. Previously noted L1 superior endplate compression has increased settling with standing causing new focal kyphosis at L1 level; kyphosis angle measures 13 degrees approximately. Unchanged grade 1 anterolisthesis of L5 over S1 related to degenerative facet arthropathy. As before, left convex scoliosis centered at L2. Moderate to severe multilevel degenerative disk disease and facet arthropathy of the lumbar spine. Partially visualized right intramedullary femoral head screw. Large sliding hiatal hernia.ATTENDING RADIOLOGIST AND PAGER NUMBER336510 Fink III James Russell MD(206)540-1747

To: Jeanne Leonie Hoffman
Subject: INR elevated

Your INR today was 4.3. Your current schedule of warfarin (coumadin) based on my last visit and subsequent e care messages with you should be: Warfarin 10 mg one tab daily except one-half on Mondays, Wednesday and Fridays.

At this time, we need to bring your INR down.
Tonight you would ordinarily take a full tablet. I would like you not to take any coumadin tonight. Tomorrow, Friday, take a half tablet. Take a full tablet on Saturday. Then on Sunday begin the following schedule:
One tab daily except one half tab on Sunday, Monday, Wednesday, and Friday. Repeat blood test in ten days.

Contact me if you have questions. Do confirm that you received this message.

Subject: INR 3.7

Your INR is 3.7 today. That is the same as it was last week. I had changed your warfarin (coumadin) dose to one tab daily except a half tab on Mondays and Fridays. I think we need to adjust it lower.

First we need to get the 3.7 down. So I advise not taking any coumadin this evening, take the usual half tab on Friday and then begin the following weekly regimen: Warfarin (Coumadin) 10 mg one half on Monday, Wednesday, and Friday (3 times a week) and a full tab on the other four days.

Retest your INR in 10 days. Contact me if you have any signs of bleeding from your gums or nose, or have black stools.

Dear Russell,

January 11, 2013 at 2:pm
Location 245 High School Rd, NW 2
Bainbridge, WA-98110

Would be fine for appointment

To:Jeanne Leonie Hoffman
From:William E Neighbor JR, MD
Received:12/21/2012 2:34 PM PST
I am glad that the social worker will hopefully be setting up an appointment to visit with you both.
William E Neighbor JR, MD

REPLY: William, be advised that DSHS has been supporting white Supremcy group in Washington State. DSHS is responsible for my injuries, and my son's, as they have directed

hate groups and individuals to attact me and louis.

Note: DSHS has been involved supporting attacks on citizens who were Gay/Lesbians, by subjecting groups to hate and mal-treatment and directing hate group to attack.

Note: Currently, DSHS is operating facilities desgined to de-human people which hate/white supremcy groups support.

Note: As past contact with DSHS have lead to more attacts and more dehumanization.

Note: DSHS/HCS has knowledge of my and my son's situation for past 30 years and has done nothing to help us, as I refuse to accept White Supremcy.

Note: Kitsap County is known for supporting White Supremcy Groups (Ref: Southern Poverty Law Group)

William, DSHS had my son stock for 2 years, then raped and subjected to terrorizing attacts that have lead to my son's injuries.

Louis for Jean

PRORPD 2.5 9/18/2012
PRORPD 2.3 8/24/2012

ASSESSMENT AND PLAN:

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
INR 3.7. Reviewed diet and other meds. She has been taking Vit D and Calcium supplement but over last three months takes this in the morning rather than in the evening with Wafarin. I am not able to identify any other changes that have resulted in INRs above the therapeutic range over the last several weeks.

In order to adjust the INR downward, her dose for the remainder of this week should be:
Wednesday evening, today, one half
Thursday evening, one half
Friday, full tab
Saturday, half tab
Sunday, full tab

Beginning Monday, her new weekly regimen will be
Warfarin 10 mg one tab daily except on-half on Mondays and Fridays

Repeat INR in 10 days

788.1 Dysuria
She did not tolerate nitrofurantoin this time even after one pill. I ordered UA but she could not go while in clinic. As she is allergic to Sulfa and Penicillins, will tx with Cipro for five days.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
No recurrence

Subject: Interview date and time

Dear Russell,

Thank You, for using our contact policy. Jean get too many phone advetisers that interfer with privacy.

HISTORY:

1). I (son #1) am the power of attorney for Jean, Jean is my mother, I am also primary caregive and have jean best interest for past 30 years.

2). I am also crippled do to a white supremcy hate attack, that injured my hip and a dentist who was anti-gay, criminally gave me a bone infection, which has stopped all medical treatments & surgeries, untill infection has been suppressed.

3). Jean has been a victim of white supremcy hate attacks and attacks from Douglas (son #2) and Chris (wife) Hoffman Family, who have continued active white supremcy hatred toward Jean for over past 30 years and is expected to continue.

4). Douglas & Chris's white supremcy behavior is the leading cause of Jeans injuries and was instrumental in white supremcy attacks on me! This is do to Douglas & Chris support of those involved in white supremcy hatred.

APPOINTMENT SCHEDULING:

Since this is a Major Holiday Month. I suggest some time in mid-January.

As Jean has many medical appointment that we must schedule interview that does not conflict with UWMC, UW-Dental, Harborview and UW-Hall Health Clinic Appointments.

Also: Jean enjoys Seattle outings and family re-unions, which I make all escoted-travel arrangements.

Both Jean & I have William E Neighbor, Jr as primary health care provider at UW-Hall Health/ Ella-206-616-9358/clinic 206-616-2495 and ecare services.

MAJOR CONCERN:

Currently our major concern is to stop Douglas & Chris Family from interfering in Health-Care, Stop Hatred Actives that cause Jean's Injuries, Stop un-announce drop-in.

Jean and I Are not against family interaction (Positive and Benefical Family contacts & activities are encourages), it just needs to be organized visit, outting, re-unions, tea-dinner and that hate attacks are notthe intent of visits.

OTHER INFORMATION:

DSHS-Home & Community Services has mail both Jean & I information package's and applications, which I have reviewed and openned ecare dialog with William on DSHS-Issues & Concerns.

Let's open a email dialog on care issues, concerns, requirements, necessary support information required.
This will allow us to focus on care programs and services, so that Home Visit is productive and that necessary person involved in Jean's & my health care can be part of the overall interview objectives for a positive haetl care plan of action.

Looking forward to working with you

Louis for Jean Leonie Callet Alloin Hoffman(n)

Subject: Assessment date and time

Mr. Hoffman: I am a social worker with the COPES program with DSHS. I was sent a referral per your request for in home care for your mother. I have tried to call your home but have not been able to leave a message or speak with you. I just received a call from Megan at Hall Health and she gave me your e-mail address. I would like to schedule an assessment date and time to do an assessment on your mother to see if she qualifies for our program. Please contact me as soon as possible so I can schedule a time to come to your home to do the assessment. My phone number is (360) 473-2191 or we can e-mail back and forth to take care of this.

Thanks…

Willian and UW Social Worker,

Please note that all DSHS Office Interviews or Home Care appointment should be scheduled for Seattle (Lenora Intake Office), any Social Security Appointment should be scheduled for 9th & Lenora or Chinatown Office.

Any appointments scheduled in Kitsap will be "cancel" do to NO BUS SERVICES and DANGER OF WHITE SUPREMCY according to Law Poverty Group that track hate groups andas kitsa is tolerant of the 16 operating hate group in Washington State. City of Seattle is intolerant of hate group and takes action
again them.

Clinical Notes

Progress Notes

Neighbor Jr., William E at 12/19/2012 1403

Jeanne Leonie Hoffman is a 87 year old female here to discuss the following:

599.0 Urinary tract infection, site not specified (primary encounter diagnosis)
2 day history of dysuria without fever, chills, abdominal pain, flank pain, hematuria in patient who has had bladder infection in past. In 2008 when given macrodantin she apparently had some confusion, but when treated in Jan 2012 with same med she tolerated it well.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
V58.61 AFTERCARE LONG TERM ANTICOAG USE

12/19/2012 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

In for follow up INR. See last clinic note. INR was about 4.0 last week. She was given instructions to hold dose and return today for repeat.

OBJECTIVE:
There were no vitals taken for this visit.
Last blood pressure recorded in this encounter:
General: healthy, alert, no distress
Alert and interactive. Son Louis at visit today.

ASSESSMENT AND PLAN:

599.0 Urinary tract infection, site not specified (primary encounter diagnosis)
2 day history of dysuria without fever, chills, abdominal pain, flank pain, hematuria in patient who has had bladder infection in past. In 2008 when given macrodantin she apparently had some confusion, but when treated in Jan 2012 with same med she tolerated it well. Retreat with nitrofurantoin.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
No recurrent clost

V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR 2.1. She is taking coumadin 10 mg once daily. At her last visit when level was elevated, we had had her hold a dose. She is now back on her daily schedule. Plan is repeat in one week. If not in range, then make longer term change in her med regimen.

Nurse met with patient and her husband to review the arrangement that have been made for a social worker to visit their home with the goal of assessing long term care needs. Reviewed plans with Jeanne and son Louis.

William,

Thank You, for all the assistance,,,Today.
Louis will be doing all my ecare communication for me.

Please have Home Care Assistance Representative
email: jeanhoffman@usa.com
to setup phone appointment date and time for intervene and home visit appointment.

I perfer contact to be in Seattle or (206) area code.
Outside of Bainbridge Island or kitsap county is a (360) long distance charges.
Jean can not afford long distance charges.

Note: Douglas is attempting to interfer with home care.

Telephone Encounter

Neighbor Jr., William E at 12/13/2012 1540

HH Nurse. I would appreciate your calling visiting nurses to arrange a home visit for this patient who lives on Bainbridge Is with her son Louis. She is 87 year old alert female who recently sustained L3 fracture due to fall at home. She was admitted to HMC and discharged on Dec 7. She saw me yesterday. She is doing pretty well. I made some med adjustments as noted in her record. She would benefit from a home visit by visiting nurse to assess how she is doing and get a sense of how Louis her son is coping with caring for her. They may benefit from some care giver relieve/assistance at this time.

Thank you.

William E Neighbor JR, MD

Electronically signed by Neighbor Jr., William E at 12/13/2012 3:43 PM

Gillespie, Megan M at 12/14/2012 1623

Pt is an 87 year old complex patient on Medicare and is home after sustaining an L3 fracture. She has multiple medical needs (see problem list). She is a patient of Dr. William Neighbor. She is wearing a TLSO brace and living on Bainbridge Island with her son, Louis. She needs an assessment for fall risk, ADLs, toileting, transportation,meal help, and possibly much more. She may also need nursing services.

Started off calling, Kitsap Home Care (1-888-449-9048). They only provide non-medical help and don't accept Medicare; they charge $22.50/hour. The patient can not afford this care. They gave me other resources to call. For medical help (ie. Nursing Services) call Gentiva or Harrison Home Health. For Non-Medical help (ie. Meal prep, transportation, laundry, bathing, etc) call State Support Services at 1-800-442-7114. Discussed with Dr. Neighbor, who at this time felt she needed non-medical help/assessment.

Called Sate Support Services today and spoke with Chai. She took the patient's information an assigned her an ID #3181555. She will send paperwork to the patient's home to fill out. The RN at HH needs to follow up with the Region

12/13/2012 - Telephone in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

3 Intake Center: 1-800-786-3799. This RN called that number, and left a detailed message of our needs.

I will forward this information to the RN pool for follow-up on Monday, Dec. 17th, 2012. For further questions, please direct them to Dr. Neighbor, and document follow-up for her intake in her records.

Gillespie, Megan M at 12/19/2012 1011

Again this morning, called Region 3 Home and Community Services Intake Center at 1-800-786-3799. Tried dialing 0 to be connected to an actual person, but got the recording "sorry, no one is available to help you right now." Called again and left detailed vm with Region 3 Intake (gave them JH's address, phone number, my number, etc).

On their vm they say that someone should get back with us in 24-48 hours. We have left 3 voicemails and have not gotten a return call from this agency (vms were left on 12/12,12/17 and 12/19/12).

Gillespie, Megan M at 12/20/2012 1157

On 12/19/12, this RN finally spoke with someone at Social Services office/ Region 3 Home and Community Services Center. Her name was Jamie (360-664-9131). She had already reviewed Jeanne's application, and assigned her to a Social Worker. The Social Worker's name is Kathy Russell (360-473-2191), and is based out of Bremerton, WA (but does home Intakes on Bainbridge Island, WA). Jeanne's client I.D.# is 3181555.

This nurse then spoke with Jeanne and her son, Louis. Louis said it is best for Kathy to contact him via e-mail (because they rarely pick up their telephone line). He gave me permission to give her his e-mail address.

This RN later spoke with Kathy Russell, the Social Worker. She will e-mail Louis to set up a time to talk either over the phone or at their house. She said that she had also spoke with Jeanne's other son, Douglas, about having a home intake done.

Jeanne was set up on e-care to help with this communication on 12/19/12. Her e-mail address was sent to us later in the day.

This RN called Kathy Russell again on 12/20/12, and left Jeanne's e-mail (so now she has both). Will wait to see if they talked, to set up a meeting time. My hope is they did.

Clinical Notes

Progress Notes

Neighbor Jr., William E at 12/13/2012 1512

Jeanne Leonie Hoffman is a 87 year old female here to discuss the following:

805.8 Vertebral fracture (primary encounter diagnosis)
Early December sustained L3 compression fracture related to fall in her kitchen. Placed in TLSO brace and neurosurgery recommended follow up imaging in 6 months. Patient was admitted for elevated INR (see below). She was discharged from HMC on the following meds for compression fracture:
Oxycodone 5 mg q 4 hrs as needed. She is taking three per day according to son Louis who lives with and cares for her.
Methocarbamol 500 mg every 6 hours as needed for muscle spasm
docustate 250 mg daily for prevention of constipation.
With respect to pain she reports she is doing well. She is requiring three oxycodone per day. She has taken a muscle relaxant periodically but makes her "loopy".

250.00 DIABETES UNCOMPL ADULT-TYPE II
The discharge record from HMC indicates she is taking metformin. However, this was discontinued in 2011 under my care as her
A1cs were lower than currently recommended. Her follow up A1cs have been in the low 6 range.

V58.61 AFTERCARE LONG TERM ANTICOAG USE
451.19 DEEP VENOUS PHLEBITIS-LEG NEC
She was admitted to HMC because of INR of 6. She was discharged on warfarin 10 mg M, W, F, Su; and 5 mg on T, Th, Sat. However as confirmed with her Bainbridge Is. Pharmacy and our records, she has always been taking 10 mg daily. There have been times when she temporarily needed less but the most frequent dose has been 10 mg. She and her son confirm today that since hospital discharge she has been taking 10 mg daily.

ASSESSMENT AND PLAN:

805.8 Vertebral fracture (primary encounter diagnosis)
Early December sustained L3 compression fracture related to fall in her kitchen. Placed in TLSO brace and neurosurgery recommended follow up imaging in 6 months. Patient was admitted for elevated INR (see below). She can continue to take oxycodone but would try to minimize the dose and try half tablets. She should certainly take docusate to prevent constipation. I would not advise taking iron as her hematocrit was normal on Dec 7, and the iron will exacerbate constipation. I do not advise taking methocarbamol at her age in combination with oxycodone. Will check Vit D level which had been in lower end of normal range in the past. She is on tegretol which as an antiseizure med can interfere with vitamin D absorption.
Plan: VITAMIN D (25 HYDROXY)

250.00 DIABETES UNCOMPL ADULT-TYPE II
Diet controlled. She does not need metformin and does not appear to be taking this presently. Will recheck A1c.
Plan: HEMOGLOBIN A1C, HPLC

V58.61 AFTERCARE LONG TERM ANTICOAG USE
451.19 DEEP VENOUS PHLEBITIS-LEG NEC

12/12/2012 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

INR was 6.0 in hospital for unclear reasons. While she was discharged on the alternating 10 mg and 5 mg regimen listed above, based on conversation today it appears she has been taking 10 mg daily which is her usual dose. Recheck INR at this visit
Plan: PROTHROMBIN TIME

Other issues:
--Conflict between Louis and his brother Doug. This seems to be under control, but family would benefit from a home visit from social worker or from visiting nurse. I will first see if we can arrange visiting nurse visit.
--CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011.

William E Neighbor JR, MD

12/13/2012
Office Visit on 12/12/12
HEMOGLOBIN A1C, HPLC

Component	Value	Range
Hemoglobin A1C, HPLC	6.0	4.0 - 6.0 %

PROTHROMBIN TIME

Component	Value	Range
PRO TIME PATIENT	36.7 (*)	10.7 - 15.6 s
PROTHROMBIN INR	4.2 (*)	0.8 - 1.3

A1c in acceptable range without metformin which our records show she has not taken for over a year.

INR above target range. Spoke with son whom I had tried to reach last evening but there was no answer. Spoke with him today. There is no bruising or bleeding. Unfortunately, she had taken her coumadin dose this noon rather than in the evening. She is to not take coumadin tomorrow, Friday, take half dose on Saturday, and then resume regular dose. Recheck INR on Wednesday and see me then. This correction strategy has worked for her in the past.

Louis reported that they had picked up a prescription for Tizanidine (Xanaflex) that had been sent from HMC to her pharmacy as substitute for Methocarbamol. Based on what I saw yesterday, she does not need a muscle relaxant at this time. I am concerned that in combination with her age and being on oxycodone she will have another fall and it will make her "loopy". It may interfere with INR control.

Vit D (25_Hydroxy) Interp Value: For more information see http://web.labmed.washington.edu/tests/chemistry/VITDG2

.

I called you about making adjustments to the warfarin (coumadin) to adjust your INR to the 2-3 range. I did want to report that your vitamin D level is excellent. That is good news.

Sincerely,

William E Neighbor JR, MD

Clinical Notes

Progress Notes

Collins V, Marta at 12/12/2012 1445

Pt observed sitting alone in the waiting room with her neck hyperextended, deeply asleep. Her status was concerning to the other patients in the waiting room. I shook her gently until she awakened, it was then that her son came forward. Pt was unable to hear anything but learned from her son she was here for a 1:00 appointment with Dr Neighbor. It was approx 11:30 and I was concerned about the pt sitting for another hour and half. I requested they follow me and I assisted pt to a room with a comfortable bed and assisted her son to get her supine. She had been in the hospital for back surgery and was wearing a brace that did not fit well and I assisted him to get a repositioned. I let the RN and Dr Neighbor know where the pt was and told her son how to get assistance if needed.
30 minutes spent on the above activities and documentation of encounter.
Marta Collins RN

Clinical Notes

Progress Notes

Neighbor Jr., William E at 11/16/2012 1745

Jeanne Leonie Hoffman is a 87 year old female here to discuss the following:

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
451.19 DEEP VENOUS PHLEBITIS-LEG NEC
After a reduction in dose, for two days, she is back to usual dose of coumadin. Reports no bleeding, easy bruising, and no leg swelling.

715.00 GENERAL OSTEOARTHROSIS
Documented Chronic back and hip pain due to DJD. Provider she has seen on Bainbridge has given her small dose

of codeine once daily which she has used appropriately and sparingly. She is no longer seeing him simply because she prefers to get out to Seattle and see us. I have seen her for many years.

Patient Active Problem List

Diagnoses

- CONVULSIONS, OTHER
- ESOPHAGEAL REFLUX
- SENSORNEUR HEAR LOSS NOS
- DEEP VENOUS PHLEBITIS-LEG NEC
- UTERINE LEIOMYOMA NOS
- HYPERLIPIDEMIA NEC/NOS
- CARPAL TUNNEL SYNDROME
- CATARACT NOS
- ALLERGIC RHINITIS NOS
- GENERAL OSTEOARTHROSIS
- BENIGN HYPERTENSION
- DIAPHRAGMATIC HERNIA
- GLAUCOMA NOS
- ROUTINE MEDICAL EXAM
- DIABETES UNCOMPL ADULT-TYPE II
- FX FEMUR INTRCAPS NOS-CLOSE
- VITAMIN B DEFICIENCY NOS
- TREMOR NEC
- ADULT FAILURE TO THRIVE
- AFTERCARE LONG TERM ANTICOAG USE
- OSTEOPOROSIS NOS
- SKIN SENSATION DISTURB

Outpatient Prescriptions Marked as Taking for the 11/16/12 encounter (Office Visit) with Neighbor Jr., William E

Medication	Sig	Dispense	Refill
• Atorvastatin Calcium 40 MG Oral Tab	TAKE ONE TABLET BY MOUTH ONE TIME DAILY	90 Tab	2
• CarBAMazepine 200 MG Oral Tab	TAKE ONE TABLET BY MOUTH THREE TIMES DAILY	90 Tab	6
• Hydrochlorothiazide 25 MG Oral Tab	take on half tab daily	15 Tab	6
• Losartan Potassium 25 MG Oral Tab	TAKE ONE TABLET BY MOUTH ONE TIME DAILY	90 Tab	1
• Timolol Maleate 0.5 % (DAILY) ophthalmic Solution	instill one drop into each eye twice daily	5 mL	prn
• Warfarin Sodium 10 MG Oral Tab	TAKE ONE TABLET BY MOUTH ONE TIME DAILY	30 Tab	6

OBJECTIVE:
BP 148/54 | Pulse 54
Last blood pressure recorded in this encounter: 148/54
General: healthy, alert, no distress
Hips with some pain and limited motion on internal and external rotation bilaterally. She uses a walker but is slow in getting around. Nevertheless as usual she is determined.

11/16/2012 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

ASSESSMENT AND PLAN:

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
INR now back to normal range. As in the past, there is no clear reason why her INR went above target. After a brief reduction is dose, she is now back to usual dose of coumadin as above. Recheck one month

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
No recurrence

715.00 GENERAL OSTEOARTHROSIS
Chronic back and hip pain due to DJD. Provider she has seen on Bainbridge has given her small dose of codeine once daily which she has used appropriately and sparingly. I do not want to use NSAIDs in her given her age and anticoagulation. I think a low dose of codeine which she tolerates well is fine. She should continue tylenol as well.
Plan: Acetaminophen-Codeine #3 (TYLENOL/CODEINE #3)
300-30 MG Oral Tab

Clinical Notes

Progress Notes

Neighbor Jr., William E at 11/7/2012 1406

Jeanne Leonie Hoffman is a 87 year old female here to discuss the following:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
In for INR review. No bleeding. No recurrent swelling in leg. Wearing compression stockings

V58.61 AFTERCARE LONG TERM ANTICOAG USE
Taking coumadin one daily as prescribed.

783.21 Loss of weight
Returned from month long travels with son. Did not eat as much as usually eats at home. Also problems with teeth for which she is seeing dentist.

Patient Active Problem List

11/07/2012 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Diagnoses	Date Noted

- SKIN SENSATION DISTURB [782.0] 06/03/2008
  6/3/2008 labs ordered. Return in one month for exm.

- OSTEOPOROSIS NOS [733.00] 03/04/2008
  T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
  Began fosamax spring 2008. Continue for five years, then stop

- AFTERCARE LONG TERM ANTICOAG USE [V58.61] 01/08/2008
  Reason for anticoagulation: Recurrent dvts
  Duration of anticoagulation: life
  INR goal: 2.-3

  She has also been on Trental for many years because of recurrent venous stasis disease despite adequate anticoagulation. Her last arterial vascular study showed ABIs of 1.0 in 2007. 2/12/2010 repeat arterial vascular studies of lower extremities ordered.

- ADULT FAILURE TO THRIVE [783.7] 10/19/2007
  Lives in subsidized housing on Bainbridge
  Bremerton APS at 1-888-833-4925
  Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
  Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait

- TREMOR NEC [333.1] 08/17/2007
  Noted by Melanie Parker. Consider Parkinson's disease med trial.

- FX FEMUR INTRCAPS NOS-CLOSE [820.00] 05/01/2007
  Pinned April 2007.
  Post op hematocrit 25
  Has walker with wheels for use outside of home. Uses cane in home.

- VITAMIN B DEFICIENCY NOS [266.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- DIABETES UNCOMPL ADULT-TYPE II [250.00] 03/27/2007
  Year onset: Dx March 2007
  Complications:

- CONVULSIONS, OTHER [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006

Recurrent DVT and phlebitis since 1982
Per Vascular Surgery note 5/9/2006: continue warfarin
3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- UTERINE LEIOMYOMA NOS [218.9] 11/20/2006
  S/P hysterectomy with BSO in 1991

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- CARPAL TUNNEL SYNDROME [354.0] 11/20/2006
  Carpal tunnel release right wrist in 1989

- CATARACT NOS [366.9] 11/20/2006
  Extraction left eye in 1989

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- DIAPHRAGMATIC HERNIA [553.3] 11/20/2006
  CT of abdomen in 2006

- GLAUCOMA NOS [365.9] 11/20/2006
- ROUTINE MEDICAL EXAM [V70.0] 11/20/2006
  Td/Tdap (q 10 yr): 2006
  Pneumococcal (65 yoa and high risk x1): 2010
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001. Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: yes
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 . Advise Vit D 800 IU daily.

PRORPD 2.3 6/20/2012

ASSESSMENT AND PLAN:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
No recurrence. No bleeding. INR is 5.0. She has already taken her coumadin dose today.
Advise:
1. Thursday, tomorrow, do not take coumadin
2. Friday, take half a tab of coumadin
3. Saturday return to regular coumadin schedule
4. Monday, return for INR.
In general I advise taking coumadin in the evening rather than morning so that when she comes in and we need to make dose adjustment we can make it that day.

401.1 BENIGN HYPERTENSION
Values here in 140-150 range. Would like a bit lower. She did not take hctz while on her trip and just recnelty restarted. Will review at next visit.

V58.61 AFTERCARE LONG TERM ANTICOAG USE
As above

V04.81 Need for prophylactic vaccination and inoculation against influenza
Due for flu vaccine but wait until INR in desired range.
Plan: FLU VACC, 3 YRS & >, 0.5 ML / IM

11/07/2012 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

V06.1 Need for prophylactic vaccination with combined diphtheria-tetanus-pertussis (DTP) vaccine
Due for Tdap but wait until INR in desired range.
Plan: TDAP VACC, >7 YRS, 0.5 ML/IM

783.21 Loss of weight
Lost weight on the month long trip because of change in food. Will recheck weight in one month. She does of dental issues for which she has dental extraction planned in 2-3 weeks.

To whom it may concern

RE: Jeanne Leonie Hoffman
DOB: 1/6/1925

I am the primary care provider for Jeanne Leonie Hoffman who is 87 year old. She has difficulties walking because of arthritis and a history of blood clots and requires use of a walker. On August 20 she fell while trying to get herself and her walker up a step at her apartment complex to get to a landing. She sustained a rib fracture due to this fall. Falls are a risk to her both because of her age and because of being on blood thinner medication.

I request that a ramp be placed so Jeanne may safely get herself and her walker up to the level of her apartment.

Sincerely,

William E Neighbor JR, MD

Bainbridge Island WA 98110

8/27/2012

Dear Ms. Hoffman:

This letter is to inform you about the laboratory tests that were done at your last clinic visit.

Prothrombin time is 2.3.

(Goal range per Dr. Neighbor is from 2-3).

If you have any questions, please plan to discuss them at your next clinic visit, or call and leave a message with my medical assistant, Ella Voronchuk, MA -- 206-616-9358.

Sincerely,

Anne Terry, NP covering for Bill Neighbor, MD

NEW FEATURE!! - Would you like to get your lab results via the web instead of by mail? Schedule appointments on line? Order refills, message your care team, or review your health history? eCare is now available at Hall Health. To find out more, go to **www.hallhealthcenter.com** and click on the eCare icon. Sign up next time you are in the clinic!

Clinical Notes

Progress Notes

Jacokes, Mark Warner at 8/24/2012 1253

Jeanne Leonie Hoffman is a 87 year old female who is a patient of Dr. Neighbor. She came in today for her monthly INR for chronic anticoagulation for a prior DVT. She thought she was seeing Dr. Neighbor but he is out of the office and she did not get the message that was left for her and her son (who is also here for an appt) that the appointment needed to be rescheduled. She is doing well and has no new complaints. She is going on a several week trip around Oct. 1 and wanted to get refills on all of her meds to get here through that trip. I have reviewed all of her meds and Dr. Neighbor has refilled all of them in the past few months with several refills of each (#90 per refill except warfarin #30

but with multiple refills).

Patient Active Problem List

08/24/2012 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Temp: 97.5 °F (36.4 °C)
TempSrc: Oral
NAD
Chest is clear, no wheezing or rales. Normal symmetric air entry throughout both lung fields. No chest wall deformities or tenderness.
S1 and S2 normal, no murmurs, clicks, gallops or rubs. Regular rate and rhythm. No edema or JVD.

INR today=2.3 (no change since 7/20/12)

ASSESSMENT:
1. Med refills: I advised her to contact her pharmacy directly to request refills or all medications. She does not need new prescription refills at present.

2. Anticoagulation: INR still in therapeutic range. Continue current warfarin dose, repeat in 1 month prior to her trip.

3. Hypercholesterolemia: Well controlled based on lipids 1 month ago.

4. HTN: Well controlled. BMP normal 7/20/12.

PLAN: See patient instructions and after visit summary (AVS).

Patient Instructions

Your INR today is 2.3 which is good. You should continue the same dose of warfarin (coumadin) 10 mg once daily. You should have a repeat INR in 1 month before your trip.

All of your medications have refills for 90 tablets (except warfarin is 30 tablets). You can contact the pharmacy directly to request refills.

If you have questions or problems, contact me through the eCare messaging system or by calling my medical assistant Abby at 206-685-0793. If you have problems after regular office hours, you may call a consulting nurse at 206-744-2500.

Calcium

Calcium, the most abundant mineral in the human body, has several important functions. More than 99% of total body calcium is stored in the bones and teeth where it functions to support their structure. Calcium is also needed for muscle contraction, blood vessel contraction and expansion, the secretion of hormones and enzymes, and sending messages through the nervous system.

Dietary Reference Intake (DRI) for Calcium

Infants	
0-6 mo	210 mg/day
7-12 mo	270 mg/day
Children/Adolescents	
1-3 yrs	500 mg/day
4-8 yrs	800 mg/day
9-18 yrs	1,300 mg/day
Adults	
19-50 yrs	1,000 mg/day
51+	1,200 mg/day
Pregnant and lactating women	Same as for other women of comparable age

Source: National Academy of Sciences, 2004

Sources of calcium

The best source of calcium is gained from eating foods high in calcium. Milk, yogurt and cheese are major contributors of calcium in the typical diet. The USDA's Food Guide Pyramid recommends that individuals two years and older eat 2-3 servings of dairy products per day.

Calcium supplements can also increase your calcium intake. The most common supplements include **calcium carbonate** and **calcium citrate** and are adequate to meet your needs. Calcium carbonate is best absorbed with food, while calcium citrate can be taken on an empty stomach.

Make sure you pay attention to the amount of actual calcium in the supplement, as that is the amount available to your body. Check the label for the percentage of RDA (recommended daily allowance) provided. If your RDA is 1,000 mg/day and the supplement provides 50% per dose, you can figure you are getting 500 mg of calcium. Naturally-occurring calcium sources such as oyster shell, bone meal, and dolomite may contain contaminants such as lead and are *not* recommended.

Newer sources of calcium supplements are the calcium-fortified flavored caramel-like chews. Antacids such as Tums are a good source of calcium; however, to get adequate amounts of actual calcium through antacids only, you may have to take large amounts which may affect the normal acidity of your stomach.

If you use any supplement, avoid amounts larger than the RDA, as they may be toxic to your body or may interfere with other nutrients. Remember also, that you only absorb 500 mg of calcium at one time, so divide your intake to get the maximum benefit.

Calcium absorption and Vitamin D

Dietary Reference Intake (DRI) for Vitamin D

Age Group	
Ages 9-18	200 IU's / day
Ages 19-49	400 IU's / day
Ages 50+	800-1,000 IU's / day

Vitamin D is central to promoting calcium absorption and helping to form and maintain bones. While osteoporosis is most often associated with inadequate calcium intake, a deficiency of vitamin D also contributes to osteoporosis by reducing the body's ability to absorb calcium.

Vitamin D is found in foods such as vitamin D-fortified milk, egg yolks, salmon, and tuna. It is also made in your body after exposure to ultraviolet (UV) rays from the sun.

Vitamin D is also found in calcium and multivitamin supplements. Be careful that you don't exceed 2,000 IU daily. Excessive doses can be toxic.

Calcium content of selected foods

These amounts are averages for each type of food. Different brands of the same food can vary in calcium content. Check package labels for actual amounts.

Food	Serving Size	Calcium (mg)
Dairy		
Yogurt, plain (whole milk)	8 oz container	245
Ricotta cheese, part skim	1/2 cup	335
Cheese (parmesan only)	1 tbsp	55
Milk, non-fat	1 cup	306
Milk, 2%	1 cup	285
Milk, whole	1 cup	276
Buttermilk	1 cup	284
Yogurt, fruit , low-fat	8 oz container	345
Mozzarella cheese, part skim	1 oz	207
Cheddar cheese	1 oz	204
American cheese	1 oz	162
Pudding, vanilla, ready-to-eat	4 oz container	99
Frozen yogurt, chocolate	1/2 cup	106
Ice cream, vanilla	1/2 cup	113
Meat, Fish, and Other Foods		
Fish, tuna salad	1 cup	35
Red salmon, canned, w/bones	3 oz	181
Halibut, cooked	1/2 fillet	95
Peas, green, frozen, cooked	1 cup	67
Refried beans, canned	1 cup	88
White beans, canned	1 cup	191

Clinical Notes

Progress Notes

Neighbor Jr., William E at 7/20/2012 1147

Jeanne Leonie Hoffman is a 87 year old female here to discuss the following:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
Patient reports she has been seeing provider on Bainbridge for the last couple of months. She states he has had her taking warfarin 10 mg daily except 15 mg on Mondays. She does not know what her INRs have run there. However, in the last two weeks she reduced back to 10 mg every day which has been her standard dose for many years.

451.9 superficial thrombophlebitis
She reports that earlier this week she had swelling and increased warm of the lower left leg for a couple of days which then resolved.

780.39 CONVULSIONS, OTHER
She is on stable dose of tegretol without seizures.

07/20/2012 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

PRORPD	2.0	1/6/2012

OBJECTIVE:
BP 147/71 | Pulse 60 | Temp 97.8 °F (36.6 °C)

07/20/2012 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Last blood pressure recorded in this encounter: 147/71
General: healthy, alert, no distress
Left lower extremity examined without stocking does not show any increased warmth, redness, edema, tenderness

ASSESSMENT AND PLAN:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
Waring stockings. INR in therapeutic range. Recheck one month.

V58.61 AFTERCARE LONG TERM ANTICOAG USE
As above.

451.9 superficial thrombophlebitis
Earlier this week had episode of what sounds like superficial thrombophlebitis which has resolved. INR therapeutic. She apparently had been seeing a doctor on Bainbridge for a couple of months, Coumadin had been increased to 15 mg on Mondays rather than 10, but then she went back to ten which she has been onfor the last two weeks. INR is in the desired range. If she has another episode of thrombophlebitis will increase her dose. See me in one month.

780.39 CONVULSIONS, OTHER
She has had no seizures. Due for blood work.
Plan: CarBAMazepine 200 MG Oral Tab

Also has A1c and other previously order labs pending today. Will write her with the results.

Flowsheets (continued)

BP	147/71
Temp	36.6 °C
Pulse	60

Patient Instructions

ASSESSMENT AND PLAN:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
Waring stockings. INR in therapeutic range. Recheck one month.

V58.61 AFTERCARE LONG TERM ANTICOAG USE
As above.

451.9 superficial thrombophlebitis
Earlier this week had episode of what sounds like superficial thrombophlebitis which has resolved. INR therapeutic. She apparently had been seeing a doctor on Bainbridge for a couple of months, Coumadin had been increased to 15 mg on Mondays rather than 10, but then she went back to ten which she has been onfor the last two weeks. INR is in the desired range. If she has another episode of thrombophlebitis will increase her dose. See me in one month.

780.39 CONVULSIONS, OTHER
She has had no seizures. Due for blood work.
Plan: CarBAMazepine 200 MG Oral Tab

Also has A1c and other previously order labs pending today. Will write her with the results.

William E Neighbor JR, MD

Electronically signed by Neighbor Jr., William E at 7/20/2012 11:50 AM

07/09/2012 - Telephone in Hall Health Primary Care Center

Reason for Visit

Chief complaint: Refill Request
Visit diagnoses:

- (primary)
- Other convulsions
- Other and unspecified hyperlipidemia
- Essential hypertension, benign
- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled

Clinical Notes

Progress Notes

Neighbor Jr., William E at 6/20/2012 1246

Jeanne Leonie Hoffman is a 87 year old female here to discuss the following:

959.01 HEAD INJURY UNSPECIFIED (primary encounter diagnosis)
Patient was in usual health until Monday when she climbed two to three steps up a step ladder to get food of a shelf in the kitchen. She lost balance, fell, hit head on cutting board and fell to floor. She believe she lost consciousness, but is not certain. She felt sore in right posterior head, neck, and upper extrremiities after fall. Fall was not observed.

Since the fall she has had pain in right occiput but denies neuro changes including confusion, dysarthria, double vision, dysphagia, weakness, numbness.

Importantly, she is on coumadin with therapeutic INRs. Reason for visit today originally was for INR.

Soc hx: Lives with son Lious who was not around at time of the fall.

OBJECTIVE:
BP 113/71 | Pulse 66 | Temp(Src) 97.2 °F (36.2 °C) (Oral)

06/20/2012 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Last blood pressure recorded in this encounter: 113/71
General: healthy, alert, no distress
Neuro: Mental status: 0x4. Stubborn. No change noted by examiner who has known her for years. Speech pattern normal for her. Cranial nerves II-XII intact. Sensation Upper Extremities nl; Lower extremities nl. Strength upper extremities nl; lower extremities nl. Reflexes: Triceps sym one plus, biceps sym one plus, brachioradialis sym one plus, patellar sym 0, ankle sym 0. Babinski not tested. Finger to nose testing nl. Rhomberg nl. Pronator drift absent. Tandem gait not done. She is using wheeled walker as usual.
Eyes: Pupils equal nl, round nl, reactive nl, accomodation nl. Direct reflex nl. Consensual reflex nl. EOM full. Visual fields full. On fundoscopic exam, disks not done, retina not examined.
ENT: TM without blood. Scalp tender right occiput without ecchymoses. Neck tender over trapezius muscles..
MSK: Shoulders diffuse tenderness. Normal range of motion for age. Upper extremities no focal interness. Gait normal for her. Hip int and ext rotation normal.

PRORPD 2.3 6/20/2012
PRORPD 2.2 5/30/2012
PRORPD 2.6 3/9/2012
PRORPD 2.2 2/8/2012
PRORPD 2.0 1/6/2012
PRORPD 2.3 12/7/2011

ASSESSMENT AND PLAN:

959.01 HEAD INJURY UNSPECIFIED (primary encounter diagnosis)
Head injury due to fall from second or third step of ladder with good memory for event. However, patient believes she lost consciouness and given that she is on coumadin, despite non focal neuro exam, I would like her to have a head CT without contrast today to exclude intracranial bleed. She really does not have any signs of significant concussion which is reassurig
Plan: CT SCAN HEAD W/O CONTRAST
Son will transport her to Roosevelt for CT. They are to have radiologist page me before they leave as they live on Bainbridge.

Components

Component	Value	Reference Range	Flag	Lab
General Diagnostic Text	--	—	***CRITICAL***	UW RAD
Result: Examination:CT HEAD WO CONT Indication:CT head wo contrast, 87 year old female who on Monday fell from 2 or 3 steps up a ladder hit her head on chopping block, believes she lost consciousness (unobserved). She is on coumadin. Now compalins of right occipital headache. ENT and Neuro exam un revealing. Comparison:3/30/2007 Technique:Non-contrast axial 5 mm contiguous sections were obtained through the head. Patient age specific scan parameters were used for radiation exposure. Findings:Brain parenchyma: Multiple focal hypodensities within the basal ganglia and posterior limb of the right internal capsule likely represent lacunar infarcts and are similar in appearance to March 30, 2007.There is moderate diffuse cerebral volume loss and hypoattenuation within the subcortical white matter are non specific but consistent with microvascular ischemic change. Calcifications within the basal ganglia and posterior left parietal lobe white matter are similar compared to 2007. No acute infarct, hemorrhage or mass lesion. Ventricles, sulci and cisterns: Symmetric and midline. The basal cisterns are patent.Extra-axial: No extra-axial fluid collections.Sinuses, mastoids, bony structures: normal, no fractures				
Impression	--	—	***CRITICAL***	UW RAD
Result: Impression:No acute intracranial abnormality. No mass, acute infarct, or hemorrhage. Multiple small hypodensities within the basal ganglia and posterior limb of the right internal capsule likely represent prior lacunar infarcts. Critical Results CommunicationA critical finding was noted on 06/20/2012 3:36 PM.Findings were communicated by Dale, Jarrod Donald, MD to Neighbor, William E, MD on 06/20/2012 3:36 PM.

Clinical Notes

Progress Notes

Neighbor Jr., William E at 5/30/2012 1401

Jeanne Leonie Hoffman is a 87 year old female here to discuss the following:

V58.61 AFTERCARE LONG TERM ANTICOAG USE
451.19 DEEP VENOUS PHLEBITIS-LEG NEC
Somewhat past due for INR. Stable dose. No bleeding. No recurrent clot symptoms. No change in other medications.

719.47 JOINT PAIN-ANKLE
Jeanne reports that in late April to trip on uneven concrete side walk, fell on left side and sustained rib fracture for which she was seen by a friend's doctor on Bainbridge. Today she reports that her left heel, medial aspect, has been painful with walking. She is unclear how long this has been present and whether it is at all temporally related to the fall in late April. She does not recall other injuries. She has not experience swelling, or redness in the area.

05/30/2012 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

OBJECTIVE:
BP 116/75 | Pulse 58 | Temp(Src) 97.1 °F (36.2 °C) (Oral)

Jeanne Leonie Hoffman
245 High School Rd Nw
Unit 2
Bainbridge Island WA 98110

Dear Mrs. Hoffman:

The x ray of your foot did not show any evidence of fracture. I advise soaking your foot in warm water for 30 minutes twice daily for a week. If after that you continue to have pain, I would consider a CT of your foot to exclude a stress fracture. I hope though that your foot pain resolves with the use of the warm soaks.

Best regards,

William E Neighbor JR, MD

Dear Mrs. Hoffman:

I refilled your medication today warfarin (coumadin).

On review of your record, I see that you are due for INR monthly. This is a reminder to have that blood test done.

I will report the results to you at your visit or by letter or phone within 2 weeks of the tests being done. Please call if you have not received your test results by 2 weeks after the tests.

Best regards,

William E Neighbor JR, MD

Reason for discontinuation: Cost

Clinical Notes

Progress Notes

Neighbor Jr., William E at 3/9/2012 1819

Jeanne Leonie Hoffman is a 87 year old female here to discuss the following:

BENIGN HYPERTENSION (primary encounter diagnosis)
Patient stopped taking lisinopril because she found that when she was taking it she had more leg pain than when she did not take it. She has not had blood pressure measurements at home.

AFTERCARE LONG TERM ANTICOAG USE
DEEP VENOUS PHLEBITIS-LEG NEC
She has been on stable dose of coumadin. No recurrent clots. No bleeding.

03/09/2012 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

OBJECTIVE:
BP 175/80 | Pulse 77 | Temp(Src) 97.8 °F (36.6 °C) (Oral)
Last blood pressure recorded in this encounter: 175/80
General: healthy, alert, no distress
Chest: Clear
Cor: RR
Extr: Elastic stockings in place without foot edema.

CHLORIDE 105 10/21/2011
CARBON 25 10/21/2011
BUN 16 10/21/2011
CREATININE 0.67 10/21/2011
CREATININE **Note new reference range.** 10/21/2011
GLUCOSE 145 10/21/2011
CALCIUM 9.1 10/21/2011
IONGAP 8 10/21/2011

ASSESSMENT AND PLAN:

BENIGN HYPERTENSION (primary encounter diagnosis)
Blood pressure inadequate controlled on HCTZ 12.5 mg alone without lisinopril. Lisinopril caused leg cramps in her. Her labs are current. Will change to losartan 25 mg daily. She also wanted HCTZ 25 mg tabs one half daily because her local pharmacy does not carry 12.5 mg HCTZ. I wrote prescriptions for this. She is to check her blood pressure at local pharmacy with goal of 140/80. If not achieve, she is to contact me or schedule visit. Otherwise recheck in one month.

AFTERCARE LONG TERM ANTICOAG USE
INR stable in target range. Recheck in one month.

DEEP VENOUS PHLEBITIS-LEG NEC
No recurrence.

Washington State Department of Social & Health Services
HRSA Health & Recovery Services Administration

Agreement to Pay for Healthcare Services

WAC 388-502-0160 ("Billing a Client")

This is an agreement between a "client" and a "provider," as defined below. The client agrees to pay the provider for healthcare service(s) for which the Department of Social and Health Services (DSHS) will not pay. Both parties must sign this Agreement. For the purposes of this Agreement, "services" include but are not limited to healthcare treatment, equipment, supplies, and medications.

1. **Client** - is a recipient of Medicaid or other healthcare benefits through the DSHS or a managed care organization (MCO) that contracts with DSHS; and
2. **Provider** - is an institution, agency, business, or person that furnishes healthcare services to DSHS clients and has a signed agreement with DSHS or authorization from an MCO.

This Agreement and WAC 388-502-0160 apply to billing a client for covered and noncovered services as described in WAC 388-501-0050 through WAC 388-501-0070. Providers may not bill any DSHS client (including those enrolled with an MCO that contracts with DSHS) for services which DSHS or an MCO that contracts with DSHS may have paid until the provider has completed all requirements for obtaining authorization.

CLIENT'S PRINTED NAME	CLIENT'S DSHS ID NUMBER
Hoffman, Jeanne	100675002 WA
PROVIDER'S PRINTED NAME	PROVIDER NUMBER
Dr Neighbor	[redacted] 126551898

This form:

- Must be fully completed by both the provider and the client **before** any service for which this Agreement is required is provided to a DSHS client.
- Must be completed no more than 90 calendar days before the service is provided. If the service is not provided within 90 calendar days, a new form must be completed and signed by both the provider and the client.
- Must be completed only **after** the provider and the client have exhausted all applicable DSHS or DSHS-contracted MCO processes which are necessary to obtain authorization for the requested service(s). These may include the exception to rule (ETR) process for noncovered services as described in WAC 388-501-0160 or the administrative hearing process as described in WAC 388-526-2610, if the client chooses to pursue these processes.
- Must be understandable to a limited English proficient (LEP) client in his or her primary language. This may include a translated form or interpretation of the form. If the form is interpreted for the client, the interpreter must also sign and date the form. A translated form must be signed by both the client and the provider.

The table on back of this form must be fully completed. If needed, attach another sheet for additional services. Each additional page must be signed and dated by the client, provider, and interpreter (if applicable).

Important Note from DSHS:

- This agreement is void and unenforceable if the provider fails to comply with the requirements of this form and WAC 388-502-0160 or does not satisfy DSHS conditions of payment as described in applicable Washington Administrative Code (WAC) and Billing Instructions. The provider must reimburse the client for the full amount paid by the client.
- See WAC 388-502-0160(9) for a list of services that cannot be billed to a client, regardless of a written agreement.
- Keep the original agreement in the client's medical record for 6 years from the date this agreement is signed. A copy of this completed, signed agreement must also be given to the client.
- Providers are responsible for ensuring that translation or interpretation of this form and its content is provided to LEP clients. Translated forms are available at http://www.dshs.wa.gov/msa/forms/eforms.html.

- I understand that DSHS or an MCO that contracts with DSHS will not pay for the specific service(s) being requested for one of the following reasons, as *indicated in the above table*: 1) *DSHS does not cover the service*(s); 2) the service(s) was denied as not medically necessary for me, or 3) the service(s) is covered but the type I requested is not.
- I understand that I can, but may choose not to: 1) ask for an Exception to Rule (ETR) after a DSHS or DSHS-contracted MCO denial of a request for a noncovered service; or 2) ask for a hearing to appeal *a DSHS or DSHS-contracted MCO denial of a requested service.*
- I have been fully informed by this provider of all available medically appropriate treatment, including services that may be paid for by DSHS or DSHS-contracted MCO, and I still choose to get the specified service(s) above.
- ***I agree to pay the provider directly for the specific service(s) listed above.***
- I understand the purpose of this form is to allow me to pay for and receive service(s) for which DSHS or a DSHS-contracted MCO will not pay. This provider answered all my questions to my satisfaction and has given me a completed copy of this form.
- I understand that I can call DSHS at 1-800-562-3022 if I want to receive additional information about my rights or services covered by DSHS under fee-for-service or managed care.

I AFFIRM: I understand and agree with this form's content, including the bullet points above.	CLIENT'S OR CLIENT'S LEGAL REPRESENTATIVE'S SIGNATURE Jeanne L Hoffman	DATE 3/9/12
I AFFIRM: I have complied with all responsibilities and requirements as specified in WAC 388-502-0160.	PROVIDER OF SERVICE(S) SIGNATURE Wal Keyphen MD	DATE 3/9/12
I AFFIRM: I have accurately interpreted this form to the best of my ability for the client signing above.	INTERPRETER'S PRINTED NAME AND SIGNATURE	DATE

Clinical Notes

Progress Notes

Neighbor Jr., William E at 2/8/2012 1208

Jeanne Leonie Hoffman is a 87 year old female here to discuss the following:

BENIGN HYPERTENSION (primary encounter diagnosis)
Taking lisinopril which was started at last visit. No interval bp measurement.s

DEEP VENOUS PHLEBITIS-LEG NEC
No recurrent symptoms. Compliant with coumadin. No bleeding or brusing.

Leg pain
Complains of right anterior leg pain that began after starting lisinopril. She does not notice any bruising or swelling. Does not recall any injury.

OBJECTIVE:
BP 130/70 | Pulse 71 | Temp(Src) 97.9 °F (36.6 °C) (Oral)

02/08/2012 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Last blood pressure recorded in this encounter: 130/70
General: healthy, alert, no distress
Extr: Right thigh without bruising or swelling. She is tender over the mediolaterall quads in the mid portion. Hip FROM including int and ext rotation without pain. Knee without tenderness or swelling.

PRORPD 2.2 2/8/2012
PRORPD 2.0 1/6/2012
PRORPD 2.3 12/7/2011
PRORPD 3.7 11/30/2011
PRORPD 2.6 10/27/2011
PRORPD 2.4 9/20/2011

ASSESSMENT AND PLAN:

BENIGN HYPERTENSION (primary encounter diagnosis)
BP improved. Recheck one month. Continue lisinopril and HCTZ at low doses.

DEEP VENOUS PHLEBITIS-LEG NEC
INR 2.2.

AFTERCARE LONG TERM ANTICOAG USE
INR 2.2.

Right thigh pain likely related to strain. No evidence of bleeding into muscle, or hip or knee acute changes. Pain is improving with self massage and I would expect it to continue to do so.

Documents

Other - Scan on 2/15/2012 1:49 PM: Agreement to Pay for Healthcare Services

Scan (below)

Department of Social & Health Services
MRSA Health & Recovery Services Administration

Agreement to Pay for Healthcare Services

WAC 388-502-0160 ("Billing a Client")

This is an agreement between a "client" and a "provider," as defined below. The client agrees to pay the provider for healthcare service(s) for which the Department of Social and Health Services (DSHS) will not pay. Both parties must sign this Agreement. For the purposes of this Agreement, "services" include but are not limited to healthcare treatment, equipment, supplies, and medications.

1. **Client** - is a recipient of Medicaid or other healthcare benefits through the DSHS or a managed care organization (MCO) that contracts with DSHS; and
2. **Provider** - is an institution, agency, business, or person that furnishes healthcare services to DSHS clients and has a signed agreement with DSHS or authorization from an MCO.

This Agreement and WAC 388-502-0160 apply to billing a client for covered and noncovered services as described in WAC 388-501-0050 through WAC 388-501-0070. Providers may not bill any DSHS client (including those enrolled with an MCO that contracts with DSHS) for services which DSHS or an MCO that contracts with DSHS may have paid until the provider has completed all requirements for obtaining authorization.

CLIENT'S PRINTED NAME	CLIENT'S DSHS ID NUMBER
JEANNE HOFFMAN	018A 3181555
PROVIDER'S PRINTED NAME	PROVIDER NUMBER
WILLIAM NEIGHBOR	1265518989

This form:

- Must be fully completed by both the provider and the client **before** any service for which this Agreement is required is provided to a DSHS client.
- Must be completed no more than 90 calendar days before the service is provided. If the service is not provided within 90 calendar days, a new form must be completed and signed by both the provider and the client.
- Must be completed only **after** the provider and the client have exhausted all applicable DSHS or DSHS-contracted MCO processes which are necessary to obtain authorization for the requested service(s). These may include the exception to rule (ETR) process for noncovered services as described in WAC 388-501-0160 or the administrative hearing process as described in WAC 388-526-2610, if the client chooses to pursue these processes.
- Must be understandable to a limited English proficient (LEP) client in his or her primary language. This may include a translated form or interpretation of the form. If the form is interpreted for the client, the interpreter must also sign and date the form. A translated form must be signed by both the client and the provider.

The table on back of this form must be fully completed. If needed, attach another sheet for additional services. Each additional page must be signed and dated by the client, provider, and interpreter (if applicable).

Important Note from DSHS:

- This agreement is void and unenforceable if the provider fails to comply with the requirements of this form and WAC 388-502-0160 or does not satisfy DSHS conditions of payment as described in applicable Washington Administrative Code (WAC) and Billing Instructions. The provider must reimburse the client for the full amount paid by the client.
- See WAC 388-502-0160(9) for a list of services that cannot be billed to a client, regardless of a written agreement.
- Keep the original agreement in the client's medical record for 6 years from the date this agreement is signed. A copy of this completed, signed agreement must also be given to the client.
- Providers are responsible for ensuring that translation or interpretation of this form and its content is provided to LEP clients. Translated forms are available at http://www.dshs.wa.gov/msa/forms/eforms.html.

ADVANCE BENEFICIARY NOTICE OF NONCOVERAGE (ABN)

***NOTE*: If Medicare doesn't pay for** OFF VISIT & ALL REL SVCS **below, you may have to pay.**

Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the _____ below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost:
Code 99211-99215 Description: OFF VISIT & ALL REL SVC	**Check reason code (see back)** A ☐ B ☑ C ☑ D ☐	$41 – $284 —

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading. & ALL REL SVCS
- Choose an option below about whether to receive the OFF VISIT _____ listed above.

Note: If you choose Options 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

Options: **Check only one box. We cannot choose a box for you.**

☑ **OPTION 1**. I want the OFF VISIT & ALL REL SVC listed above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I am responsible for payment, but **I can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2**. I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3**. I don't want the _____ listed above. I understand with this choice I am not responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-Medicare** (1-800-633-4227/**TTY**: 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

Clinical Notes

Progress Notes

Neighbor Jr., William E at 1/6/2012 1104

Jeanne Leonie Hoffman is a 87 year old female here to discuss the following:

DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
No swelling. Using compression stockings

AFTERCARE LONG TERM ANTICOAG USE
Compliant with coumadin once daily.

DIABETES UNCOMPL ADULT-TYPE II
Diet controlled. Son does cooking.

BENIGN HYPERTENSION
Taking blood pressure meds. No home readings.

Patient Active Problem List

Diagnoses	Date Noted
• SKIN SENSATION DISTURB *Priority: High* 6/3/2008 labs ordered. Return in one month for exm.	06/03/2008
• OSTEOPOROSIS NOS *Priority: High* T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continue for five years, then stop	03/04/2008
• AFTERCARE LONG TERM ANTICOAG USE *Priority: High* Reason for anticoagulation: Recurrent dvts Duration of anticoagulation: life INR goal: 2.-3 She has also been on Trental for many years because of recurrent venous stasis disease despite adequate anticoagulation. Her last arterial vascular study showed ABIs of 1.0 in 2007. 2/12/2010 repeat arterial vascular studies of lower extremities ordered.	01/08/2008
• ADULT FAILURE TO THRIVE *Priority: High* Lives in subsidized housing on Bainbridge Bremerton APS at 1-888-833-4925 Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved. Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait	10/19/2007
• TREMOR NEC *Priority: High* Noted by Melanie Parker. Consider Parkinson's disease med trial.	08/17/2007
• FX FEMUR INTRCAPS NOS-CLOSE *Priority: High* Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.	05/01/2007
• VITAMIN B DEFICIENCY NOS *Priority: High* Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency	05/01/2007

01/06/2012 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

- DIABETES UNCOMPL ADULT-TYPE II 03/27/2007
  Priority: High
  Year onset: Dx March 2007
  Complications:

- CONVULSIONS, OTHER 11/20/2006
  Priority: High
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007

- ESOPHAGEAL REFLUX 11/20/2006
  Priority: High
- SENSORNEUR HEAR LOSS NOS 11/20/2006
  Priority: High
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC 11/20/2006
  Priority: High
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- UTERINE LEIOMYOMA NOS 11/20/2006
  Priority: High
  S/P hysterectomy with BSO in 1991

- HYPERLIPIDEMIA NEC/NOS 11/20/2006
  Priority: High
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- CARPAL TUNNEL SYNDROME 11/20/2006
  Priority: High
  Carpal tunnel release right wrist in 1989

- CATARACT NOS 11/20/2006
  Priority: High
  Extraction left eye in 1989

- ALLERGIC RHINITIS NOS 11/20/2006
  Priority: High
- GENERAL OSTEOARTHROSIS 11/20/2006
  Priority: High
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION 11/20/2006
  Priority: High
- DIAPHRAGMATIC HERNIA 11/20/2006
  Priority: High

CT of abdomen in 2006

- GLAUCOMA NOS 11/20/2006
  Priority: High
- ROUTINE MEDICAL EXAM 11/20/2006
  Priority: High
  Td/Tdap (q 10 yr): 2006
  Pneumococcal (65 yoa and high risk x1): 2010
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001. Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: yes
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 . Advise Vit D 800 IU daily.

Outpatient Prescriptions Prior to Visit

Medication	Sig	Dispense	Refill
• Acetaminophen (TYLENOL) 500 MG OR TABS	2 in am 2 in pm and 3 before bed

A1C 6.1 7/21/2008
A1C 6.2 4/29/2008
A1C * 4/29/2008
Value: Due to a significant change from previous results, the assay was repeated for quality assurance purposes.
A1C 6.4 3/11/2008
A1C 9.3 2/25/2008

ASSESSMENT AND PLAN:

DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
No recurrence

AFTERCARE LONG TERM ANTICOAG USE
INR in desired range. Recheck in 1 month.

DIABETES UNCOMPL ADULT-TYPE II
Well controlled with A1c in target range. Labs current.

HYPERLIPIDEMIA NEC/NOS
Well controlled on statin. Lipids done in October in range.

BENIGN HYPERTENSION
Blood pressure has been trending upward and is now out of range.
Last BP recorded at encounter: 145/79
Will add low dose of lisinopril to improve control. Take one daily.
Continue to take Hydrochlorothiazide. I am switching her from HCTZ 25 mg one half daily to 12.5 mg tabs one full tab daily so she does not need to cut pills in half.
Plan: Lisinopril 2.5 MG Oral Tab, Hydrochlorothiazide
(MICROZIDE) 12.5 MG Oral Cap

ADVANCE BENEFICIARY NOTICE OF NONCOVERAGE (ABN)

***NOTE*: If Medicare doesn't pay for** MY Consultation **below, you may have to pay.**

Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the _____ below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost:
Code _____ Description: Consultation and related Services	**Check reason code (see back)** A ☐ B ☒ C ☐ D ☐	79.00 - 1000.00

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the _____ listed above.

Note: If you choose Options 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

Options: Check only one box. We cannot choose a box for you.

☒ **OPTION 1.** I want the Consultation listed above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I am responsible for payment, but I **can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2.** I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3.** I don't want the _____ listed above. I understand with this choice I am not responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-Medicare** (1-800-633-4227/**TTY**: 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

Scan (below)

Washington State Department of Social & Health Services
HRSA Health & Recovery Services Administration

Agreement to Pay for Healthcare Services

WAC 388-502-0160 ("Billing a Client")

This is an agreement between a "client" and a "provider," as defined below. The client agrees to pay the provider for healthcare service(s) for which the Department of Social and Health Services (DSHS) will not pay. Both parties must sign this Agreement. For the purposes of this Agreement, "services" include but are not limited to healthcare treatment, equipment, supplies, and medications.

1. **Client** - is a recipient of Medicaid or other healthcare benefits through the DSHS or a managed care organization (MCO) that contracts with DSHS; and
2. **Provider** - is an institution, agency, business, or person that furnishes healthcare services to DSHS clients and has a signed agreement with DSHS or authorization from an MCO.

This Agreement and WAC 388-502-0160 apply to billing a client for covered and noncovered services as described in WAC 388-501-0050 through WAC 388-501-0070. Providers may not bill any DSHS client (including those enrolled with an MCO that contracts with DSHS) for services which DSHS or an MCO that contracts with DSHS may have paid until the provider has completed all requirements for obtaining authorization.

CLIENT'S PRINTED NAME	CLIENT'S DSHS ID NUMBER
Hoffman, Jeanne L	100675002 WA
PROVIDER'S PRINTED NAME	**PROVIDER NUMBER**
William Neighbor	126551889

This form:

- Must be fully completed by both the provider and the client **before** any service for which this Agreement is required is provided to a DSHS client.
- Must be completed no more than 90 calendar days before the service is provided. If the service is not provided within 90 calendar days, a new form must be completed and signed by both the provider and the client.
- Must be completed only **after** the provider and the client have exhausted all applicable DSHS or DSHS-contracted MCO processes which are necessary to obtain authorization for the requested service(s). These may include the exception to rule (ETR) process for noncovered services as described in WAC 388-501-0160 or the administrative hearing process as described in WAC 388-526-2610, if the client chooses to pursue these processes.
- Must be understandable to a limited English proficient (LEP) client in his or her primary language. This may include a translated form or interpretation of the form. If the form is interpreted for the client, the interpreter must also sign and date the form. A translated form must be signed by both the client and the provider.

The table on back of this form must be fully completed. If needed, attach another sheet for additional services. Each additional page must be signed and dated by the client, provider, and interpreter (if applicable).

Important Note from DSHS:

- This agreement is void and unenforceable if the provider fails to comply with the requirements of this form and WAC 388-502-0160 or does not satisfy DSHS conditions of payment as described in applicable Washington Administrative Code (WAC) and Billing Instructions. The provider must reimburse the client for the full amount paid by the client.
- See WAC 388-502-0160(9) for a list of services that cannot be billed to a client, regardless of a written agreement.
- Keep the original agreement in the client's medical record for 6 years from the date this agreement is signed. A copy of this completed, signed agreement must also be given to the client.
- Providers are responsible for ensuring that translation or interpretation of this form and its content is provided to LEP clients. Translated forms are available at http://www.dshs.wa.gov/msa/forms/eforms.html.

					PA REQUEST	PA DENIAL (ATTACH DSHS NOTICE)

- I understand that DSHS or an MCO that contracts with DSHS will not pay for the specific service(s) being requested for one of the following reasons, as indicated in the above table: 1) DSHS does not cover the service(s); 2) the service(s) was denied as not medically necessary for me, or 3) the service(s) is covered but the type I requested is not.
- I understand that I can, but may choose not to: 1) ask for an Exception to Rule (ETR) after a DSHS or DSHS-contracted MCO denial of a request for a noncovered service; or 2) ask for a hearing to appeal a DSHS or DSHS-contracted MCO denial of a requested service.
- I have been fully informed by this provider of all available medically appropriate treatment, including services that may be paid for by DSHS or DSHS-contracted MCO, and I still choose to get the specified service(s) above.
- ***I agree to pay the provider directly for the specific service(s) listed above.***
- I understand the purpose of this form is to allow me to pay for and receive service(s) for which DSHS or a DSHS-contracted MCO will not pay. This provider answered all my questions to my satisfaction and has given me a completed copy of this form.
- I understand that I can call DSHS at 1-800-562-3022 if I want to receive additional information about my rights or services covered by DSHS under fee-for-service or managed care.

I AFFIRM: I understand and agree with this form's content, including the bullet points above.	CLIENT'S OR CLIENT'S LEGAL REPRESENTATIVE'S SIGNATURE	DATE 1/6/2012
I AFFIRM: I have complied with all responsibilities and requirements as specified in WAC 388-502-0160.	PROVIDER OF SERVICE(S) SIGNATURE	DATE 1/6/2012
I AFFIRM: I have accurately interpreted this form to the best of my ability for the client signing above.	INTERPRETER'S PRINTED NAME AND SIGNATURE	DATE

ADVANCE BENEFICIARY NOTICE OF NONCOVERAGE (ABN)

***NOTE*: If Medicare doesn't pay for** Office Visit **below, you may have to pay.**

Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the _____ below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost:
Code _____ Description: office visit and related services	**Check reason code (see back)** A ☐ B ☑ C ☐ D ☐	72.00 - 1000.00

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the _____ listed above.

Note: If you choose Options 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

Options: **Check only one box. We cannot choose a box for you.**

☑ **OPTION 1.** I want the office visit listed above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I am responsible for payment, but I **can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2.** I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3.** I don't want the _____ listed above. I understand with this choice I am not responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-Medicare** (1-800-633-4227/**TTY**: 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the _____ listed above.

Note: If you choose Options 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

Options: **Check only one box. We cannot choose a box for you.**

☑ **OPTION 1.** I want the Office Visit listed above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I am responsible for payment, but I **can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2.** I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3.** I don't want the _____ listed above. I understand with this choice I am not responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-Medicare** (1-800-633-4227/**TTY**: 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

Medication List

Medication List

This report is for documentation purposes only. The patient should not follow medication instructions within. For accurate instructions regarding medications, the patient should instead consult their physician or after visit summary.

Active at the End of Visit

Acetaminophen (TYLENOL) 500 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 6/22/2016
Instructions: 2 in am 2 in pm and 3 before bed
Entered by: Smith, Courtney A, CM
Entered on: 3/8/2010
End date: 6/22/2016

Hydrochlorothiazide 25 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 1/6/2012
Instructions: Take 1/2 tablet by mouth every day
Authorized by: Neighbor Jr., William E, MD
Ordered on: 1/7/2011
Start date: 1/7/2011
End date: 1/6/2012
Quantity: 15 Tab
Refill: 11

Timolol Maleate 0.5 % (DAILY) OP SOLN

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 2/13/2012
Reason for discontinuation: Reorder
Instructions: instill one drop into each eye twice daily
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/10/2011
Start date: 2/10/2011
End date: 2/13/2012
Quantity: 5 mL
Refill: prn

Atorvastatin Calcium (LIPITOR) 40 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/4/2012
Reason for discontinuation: Reorder
Instructions: 1 po QD
Authorized by: Neighbor Jr., William E, MD
Ordered on: 3/16/2011
Start date: 3/16/2011
End date: 3/20/2012
Quantity: 90 Tab
Refill: 3

Pentoxifylline (PENTOXIL) 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 1/3/2012
Reason for discontinuation: Reorder
Instructions: One tablet three times daily (Pentoxifylline)(Trental)
Authorized by: Neighbor Jr., William E, MD
Ordered on: 5/16/2011
Start date: 5/16/2011
End date: 1/3/2012
Quantity: 90 Tab
Refill: 6

Warfarin Sodium 10 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 5/15/2012
Reason for discontinuation: Reorder
Instructions: TAKE ONE TABLET BY MOUTH ONE TIME DAILY
Authorized by: Neighbor Jr., William E, MD
Ordered on: 11/9/2011
Start date: 11/9/2011
End date: 5/14/2012
Quantity: 30 Tab
Refill: 5

11/30/2011 - Telephone in UWMC Family Medicine (continued)

Medication List (continued)

Nitrofurantoin Macrocrystal 50 MG Oral Cap

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 1/6/2012
Instructions: 1 CAPSULE EVERY 6 HOURS for three days
Authorized by: Neighbor Jr., William E, MD
Ordered on: 11/9/2011
Start date: 11/9/2011
End date: 1/6/2012
Quantity: 12 Cap
Refill: 0

CarBAMazepine 200 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 7/20/2012
Reason for discontinuation: Reorder
Instructions: 1 TABLET 3 TIMES DAILY
Authorized by: Neighbor Jr., William E, MD
Ordered on: 11/30/2011
Start date: 11/30/2011
End date: 7/20/2012
Quantity: 90 Tab
Refill: 6

Atorvastatin Calcium (LIPITOR) 40 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/4/2012
Reason for discontinuation: Reorder
Instructions: 1 po QD
Authorized by: Neighbor Jr., William E, MD
Ordered on: 3/16/2011
Start date: 3/16/2011
End date: 3/20/2012
Quantity: 90 Tab
Refill: 3

Pentoxifylline (PENTOXIL) 400 MG Oral Tab CR

11/30/2011 - Office Visit in Hall Health Primary Care Center (continued)

Medication List (continued)

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 1/3/2012
Reason for discontinuation: Reorder
Instructions: One tablet three times daily (Pentoxifylline)(Trental)
Authorized by: Neighbor Jr., William E, MD — Ordered on: 5/16/2011
Start date: 5/16/2011 — End date: 1/3/2012
Quantity: 90 Tab — Refill: 6

Warfarin Sodium 10 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 5/15/2012
Reason for discontinuation: Reorder
Instructions: TAKE ONE TABLET BY MOUTH ONE TIME DAILY
Authorized by: Neighbor Jr., William E, MD — Ordered on: 11/9/2011
Start date: 11/9/2011 — End date: 5/14/2012
Quantity: 30 Tab — Refill: 5

Nitrofurantoin Macrocrystal 50 MG Oral Cap

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 1/6/2012
Instructions: 1 CAPSULE EVERY 6 HOURS for three days
Authorized by: Neighbor Jr., William E, MD — Ordered on: 11/9/2011
Start date: 11/9/2011 — End date: 1/6/2012
Quantity: 12 Cap — Refill: 0

CarBAMazepine 200 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 7/20/2012
Reason for discontinuation: Reorder
Instructions: 1 TABLET 3 TIMES DAILY
Authorized by: Neighbor Jr., William E, MD — Ordered on: 11/30/2011
Start date: 11/30/2011 — End date: 7/20/2012
Quantity: 90 Tab — Refill: 6

Stopped in Visit

None

Clinical Notes

Progress Notes

Neighbor Jr., William E at 11/30/2011 1159

Jeanne Leonie Hoffman is a 86 year old female here to discuss the following:

DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
No recurrence. Continues to religiously use compression stockings.

ACUTE CYSTITIS
After last visit at which time she mentioned intermitent left flank pain, she developed dysuria. She called in for a prescription for antibiotic which resolved the symptoms within a few days. No hx of recurrent UTIs. Currently without symptoms.

AFTERCARE LONG TERM ANTICOAG USE
Stable dose of Coumadin. Son, who cooks for her, reports he gives her leafy vegetables, but this has not changed in frequency or amount. No change in vitamins or teas. Does not drink alcohol.

REVIEW OF SYSTEMS:

11/30/2011 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

No bleeding of gums, nose, or easy bruising.

OBJECTIVE:
BP 145/83 | Pulse 64 | Temp(Src) 97.4 °F (36.3 °C) (Oral)
Last blood pressure recorded in this encounter: 145/83
General: healthy, alert, no distress
No brusing

INR 3.4

PRORPD 3.7 11/30/2011
PRORPD 2.6 10/27/2011
PRORPD 2.4 9/20/2011
PRORPD 2.4 9/15/2011
PRORPD 2.8 9/7/2011
PRORPD 2.4 7/29/2011

ASSESSMENT AND PLAN:

DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
No recurrence

ACUTE CYSTITIS
Developed bladder infection that resolved with antibiotic she was prescribed. Will recheck UA today.

AFTERCARE LONG TERM ANTICOAG USE
Consistent in taking coumadin once daily. INR today high at 3.4. No bleeding. She is to take half a dose tonight and then resume daily dosing. Recheck in 7-10 days. She ordinarily has had INRs in the desired range of 2-3.

Department of Social & Health Services
HRSA Health & Recovery Services Administration

Agreement to Pay for Healthcare Services

WAC 388-502-0160 ("Billing a Client")

This is an agreement between a "client" and a "provider," as defined below. The client agrees to pay the provider for healthcare service(s) for which the Department of Social and Health Services (DSHS) will not pay. Both parties must sign this Agreement. For the purposes of this Agreement, "services" include but are not limited to healthcare treatment, equipment, supplies, and medications.

1. **Client** - is a recipient of Medicaid or other healthcare benefits through the DSHS or a managed care organization (MCO) that contracts with DSHS; and
2. **Provider** - is an institution, agency, business, or person that furnishes healthcare services to DSHS clients and has a signed agreement with DSHS or authorization from an MCO.

This Agreement and WAC 388-502-0160 apply to billing a client for covered and noncovered services as described in WAC 388-501-0050 through WAC 388-501-0070. Providers may not bill any DSHS client (including those enrolled with an MCO that contracts with DSHS) for services which DSHS or an MCO that contracts with DSHS may have paid until the provider has completed all requirements for obtaining authorization.

CLIENT'S PRINTED NAME	CLIENT'S DSHS ID NUMBER
Hoffman, Jeanne	10067502WA
PROVIDER'S PRINTED NAME	**PROVIDER NUMBER**
WILLIAM NEIGHBOR	126951969

This form:

- Must be fully completed by both the provider and the client **before** any service for which this Agreement is required is provided to a DSHS client.
- Must be completed no more than 90 calendar days before the service is provided. If the service is not provided within 90 calendar days, a new form must be completed and signed by both the provider and the client.
- Must be completed only **after** the provider and the client have exhausted all applicable DSHS or DSHS-contracted MCO processes which are necessary to obtain authorization for the requested service(s). These may include the exception to rule (ETR) process for noncovered services as described in WAC 388-501-0160 or the administrative hearing process as described in WAC 388-526-2610, if the client chooses to pursue these processes.
- Must be understandable to a limited English proficient (LEP) client in his or her primary language. This may include a translated form or interpretation of the form. If the form is interpreted for the client, the interpreter must also sign and date the form. A translated form must be signed by both the client and the provider.

The table on back of this form must be fully completed. If needed, attach another sheet for additional services. Each additional page must be signed and dated by the client, provider, and interpreter (if applicable).

Important Note from DSHS:

- This agreement is void and unenforceable if the provider fails to comply with the requirements of this form and WAC 388-502-0160 or does not satisfy DSHS conditions of payment as described in applicable Washington Administrative Code (WAC) and Billing Instructions. The provider must reimburse the client for the full amount paid by the client.
- See WAC 388-502-0160(9) for a list of services that cannot be billed to a client, regardless of a written agreement.
- Keep the original agreement in the client's medical record for 6 years from the date this agreement is signed. A copy of this completed, signed agreement must also be given to the client.
- Providers are responsible for ensuring that translation or interpretation of this form and its content is provided to LEP clients. Translated forms are available at http://www.dshs.wa.gov/msa/forms/eforms.html.

- I understand that DSHS or an MCO that contracts with DSHS will not pay for the specific service(s) being requested for one of the following reasons, as indicated in the above table: 1) DSHS does not cover the service(s); 2) the service(s) was denied as not medically necessary for me, or 3) the service(s) is covered but the type I requested is not.
- I understand that I can, but may choose not to: 1) ask for an Exception to Rule (ETR) after a DSHS or DSHS-contracted MCO denial of a request for a noncovered service; or 2) ask for a hearing to appeal a DSHS or DSHS-contracted MCO denial of a requested service.
- I have been fully informed by this provider of all available medically appropriate treatment, including services that may be paid for by DSHS or DSHS-contracted MCO, and I still choose to get the specified service(s) above.
- ***I agree to pay the provider directly for the specific service(s) listed above.***
- I understand the purpose of this form is to allow me to pay for and receive service(s) for which DSHS or a DSHS-contracted MCO will not pay. This provider answered all my questions to my satisfaction and has given me a completed copy of this form.
- I understand that I can call DSHS at 1-800-562-3022 if I want to receive additional information about my rights or services covered by DSHS under fee-for-service or managed care.

I AFFIRM: I understand and agree with this form's content, including the bullet points above.	CLIENT'S OR CLIENT'S LEGAL REPRESENTATIVE'S SIGNATURE X Jeanne E Hoffman	DATE X 11.30.11

ADVANCE BENEFICIARY NOTICE OF NONCOVERAGE (ABN)

***NOTE*: If Medicare doesn't pay for** office visit and all related services **below, you may have to pay.**

Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the _____ below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost:
Code _____ Description: office visit and all related services	**Check reason code (see back)** A ☐ B ☒ C ☒ D ☐	$41 TO $284

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the _____ listed above.

Note: If you choose Options 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

Options: **Check only one box. We cannot choose a box for you.**

☒ **OPTION 1**. I want the office visit and all related services listed above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I am responsible for payment, but **I can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2**. I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3**. I don't want the _____ listed above. I understand with this choice I am not responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-Medicare** (1-800-633-4227/**TTY**: 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

Clinical Notes

Telephone Encounter

Neighbor Jr., William E at 10/28/2011 1332

Patient came in today because she believes she was called and asked to bring in her meds for review. No one here had called her. I did review her meds and the list is accurate.

She also had an INR done which was :
PRORPD 2.6 10/27/2011
PRORPD 2.4 9/20/2011
PRORPD 2.4 9/15/2011
PRORPD 2.8 9/7/2011
PRORPD 2.4 7/29/2011
PRORPD 2.4 7/6/2011
This is stable and she will continue current dose.

She reported that she has continued to have intermittent sharp left lower quadrant abdominal pain that occurs often after eating, not during sleep, and not during activity There is no radiation or other associated symptoms. Her bowel movements have been normal in frequency and appearance. No change in urination or urine.
Abdomen : Contour nl; Bowel tones nl; Tenderness none; Guarding no; Rebound tenderness no; Liver nl; Murphy's sign neg; Spleen nl; Psoas sign: Not done
Skin: Jaundice none
WBC 5.16 10/21/2011
RBC 4.11 10/21/2011
HEMOGLOBIN 12.8 10/21/2011
HEMATOCRIT 39 10/21/2011
MCV 94 10/21/2011
MCH 31.1 10/21/2011
MCHC 33.0 10/21/2011
PLATELET 240 10/21/2011
No results found for this basename: rbcm
She could not produce a urine.
A/P: Recurrent 2-3 week hx of LLQ sharp abd pain occurring often after eating and not at other times with no other symptoms. CBC was normal last week. Normal exam. No urinary symptoms but would be well to obtain UA if possible. Differential includes: Diverticulitis. Though CBC was normal this continues to be a possibililty. Renal colic though pattern and severity is not typical. Ovarian torsion though episodes are quite brief. Other ovarian pathology possible. Best option for further evaluation would be a CT scan, but patient declined this a prefers to wait to see if it resolves.

History

Social History Narrative

Soc Hx. 1/30/2007 Nancy at Helpline House, 282 Knechtel Ave NE, Bainbridge Island , WA 98110 Voice 842-7624, Fax 842.9867, called last week. See RN telephone. Note. The plan is to call Nancy once I have assessed Mrs. Hoffman's needs when I see her at an upcoming visit.6/15/2010 Grew up on Bainbridge. Both parents from Paris. Spoke French at home and English in Public. She recalls her first clot was in her legs when she was 30. She also developed clot in her arms later. She states her grandmother had the same problem.William E Neighbor, MD

10/21/2011 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

REVIEW OF SYSTEMS:
Weight: without significant change.
Chest: Clear without rales or wheezes.
COR: HR regular. No murmur, gallop or rub. No JVD.
Extr: No edema.

OBJECTIVE:
BP 162/82 | Pulse 69 | Temp(Src) 97.4 °F (36.3 °C) (Oral)
Last blood pressure recorded in this encounter: 162/82
General: healthy, alert, no distress
Eyes: Conjunctiva: clear.
ENT: External ears and canals not examined due to lack of ear complaints and hearing aids in place. Nose clear; Sinuses non tender; Oropharynx clear. Neck supple. Anterior cervical nodes neg. Posterior cervical nodes neg.
Occipital nodes: neg.
Lungs: Auscultation: clear. Percussion not done.
Skin: Rash: none.
Weight trend :
Wt Readings from Last 3 Encounters:
07/06/11 61.689 kg (136 lb)
05/26/11 62.143 kg (137 lb)
03/29/11 61.236 kg (135 lb)

CV: Heart rate reg; S1, S2: nl; Murmur no; Gallop: no; Rub: no; JVD no.
Extremities: Edema none. Pulses: Not examined

ASSESSMENT AND PLAN:

DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
No recurrent blood clot . Due for INR today. The blood tests at Hall Health are sent to the hospital so we cannot get a rapid test here. Next month an alternative would be for her to have her blood test done at Roosevelt and then come over to Hall health with the result. Another option is to simply have the blood test and then I would call her with the result. However, this means she and her son would need to answer the phone.

HYPERLIPIDEMIA NEC/NOS
She is on atorvastatin. Due for lipid panel which is ordered. She is fasting today.
Plan: LIPID PANEL

BENIGN HYPERTENSION
Blood pressures have been creeping up. May need to add another blood pressure med. Will re evaluate in one month. She could have her blood pressures checked at a local pharmacy on Bainbridge.
Plan: BASIC METABOLIC PANEL

DIABETES UNCOMPL ADULT-TYPE II
On diet alone. Due for blood sugar testing.
Plan: BASIC METABOLIC PANEL, HEMOGLOBIN A1C, HPLC

AFTERCARE LONG TERM ANTICOAG USE
Last INR one month ago was 2.4 Due for repeat today. Stable dose of couomadin.

ABDOMINAL PAIN LLQ
2 week hx of intermitent sharp left lower abdominal pain without other symptoms. Plan is to check blood count to exclude infection such as diverticulitis but otherwise observe.
Plan: CBC, DIFF

ACUTE NASOPHARYNGITIS
Mild cold. No evidence of pneumonia.

JOINT PAIN-LOWER LEG
Left knee pain after fall at ferry dock one month ago. Exam shows medial and lateral joint line tenderness without effussion or other evidence of significant injury. Expect healing. May use warm compresses.

cold intolerance

10/21/2011 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Notes so cold intolerance. Will recheck thyroid as last test was done in 2008.
Plan: THYROID STIMULATING HORMONE

VACCINE FOR INFLUENZA
Flu vaccine today.
Plan: FLU VACC, 3 YRS & >, 0.5 ML / IM, IMMUNIZATION ADMIN, SINGLE IMM

William E Neighbor JR, MD

Voronchuk, Eleonora at 10/21/2011 1154

Flu Vaccine Screening Questions

Are you sick today, or have a fever? No

Have you ever had a serious allergic reaction to eggs? No

Have you had Guillan-Barre syndrome associated with a vaccine? No

Do you, or any person who lives with you, or any person in your care, have cancer, AIDS, leukemia, or any other immune deficiency disorder? No

Do you take any medications or receive any treatments that may affect the immune system? No

Do you take any anti-viral medications? No
(examples, acyclovir, valacyclovir)

During the past year, have you received a transfusion of blood or plasma, or been given immune globulin? No

Have you received any vaccinations in the past month? No

Are you allergic to latex? No

FOR WOMEN: Are you pregnant, or considering becoming pregnant in the next month? No

Patient has reviewed the Influenza VIS and had all questions answered? YES

Verbal informed consent for Influenza vaccine obtained: YES

Flu vaccine given today without initial adverse effect.

Electronically signed by Voronchuk, Eleonora at 10/21/2011 12:28 PM

Immature Granulocytes	0.01	0.00 - 0.05 (THOU/uL)

Your thyroid blood test is normal.

Your lipid panel shows good control of your LDL or bad cholesterol. Your triglycerides are mildly elevated, but in the presence of good control of your LDL and non HDL cholesterol, this is not a concern. You should continue on your cholesterol medication.

Your electrolytes and kidney tests are normal. Your fasting blood sugar is mildly elevated.

Your INR is in the desired range, though toward the lower end of that range. Repeat in 2-4 weeks.

Your Hemoglobin A1c which measures blood sugar is in the target range of less than 7.0.

Your Complete blood cell count is normal.

Sincerely,

William E Neighbor JR, MD

Documents

Other - Scan on 10/25/2011 2:00 PM: Agreement to Pay for Healthcare Services

Scan (below)

Washington State Department of Social & Health Services
MHSA Health & Recovery Services Administration

Agreement to Pay for Healthcare Services
WAC 388-502-0160 ("Billing a Client")

This is an agreement between a "client" and a "provider," as defined below. The client agrees to pay the provider for healthcare service(s) for which the Department of Social and Health Services (DSHS) will not pay. Both parties must sign this Agreement. For the purposes of this Agreement, "services" include but are not limited to healthcare treatment, equipment, supplies, and medications.

1. **Client** - is a recipient of Medicaid or other healthcare benefits through the DSHS or a managed care organization (MCO) that contracts with DSHS; and
2. **Provider** - is an institution, agency, business, or person that furnishes healthcare services to DSHS clients and has a signed agreement with DSHS or authorization from an MCO.

This Agreement and WAC 388-502-0160 apply to billing a client for covered and noncovered services as described in WAC 388-501-0050 through WAC 388-501-0070. Providers may not bill any DSHS client (including those enrolled with an MCO that contracts with DSHS) for services which DSHS or an MCO that contracts with DSHS may have paid until the provider has completed all requirements for obtaining authorization.

CLIENT'S PRINTED NAME	CLIENT'S DSHS ID NUMBER
Jeanne Hoffman	100675 002 WA
PROVIDER'S PRINTED NAME	PROVIDER NUMBER
William Neighbor, MD	1265518989

This form:

- Must be fully completed by both the provider and the client **before** any service for which this Agreement is required is provided to a DSHS client.
- Must be completed no more than 90 calendar days before the service is provided. If the service is not provided within 90 calendar days, a new form must be completed and signed by both the provider and the client.
- Must be completed only **after** the provider and the client have exhausted all applicable DSHS or DSHS-contracted MCO processes which are necessary to obtain authorization for the requested service(s). These may include the exception to rule (ETR) process for noncovered services as described in WAC 388-501-0160 or the administrative hearing process as described in WAC 388-526-2610, if the client chooses to pursue these processes.
- Must be understandable to a limited English proficient (LEP) client in his or her primary language. This may include a translated form or interpretation of the form. If the form is interpreted for the client, the interpreter must also sign and date the form. A translated form must be signed by both the client and the provider.

The table on back of this form must be fully completed. If needed, attach another sheet for additional services. Each additional page must be signed and dated by the client, provider, and interpreter (if applicable).

Important Note from DSHS:

- This agreement is void and unenforceable if the provider fails to comply with the requirements of this form and WAC 388-502-0160 or does not satisfy DSHS conditions of payment as described in applicable Washington Administrative Code (WAC) and Billing Instructions. The provider must reimburse the client for the full amount paid by the client.
- See WAC 388-502-0160(9) for a list of services that cannot be billed to a client, regardless of a written agreement.
- Keep the original agreement in the client's medical record for 6 years from the date this agreement is signed. A copy of this completed, signed agreement must also be given to the client.
- Providers are responsible for ensuring that translation or interpretation of this form and its content is provided to LEP clients. Translated forms are available at http://www.dshs.wa.gov/msa/forms/eforms.html.

					PA REQUEST	PA DENIAL (ATTACH DSHS NOTICE)

- I understand that DSHS or an MCO that contracts with DSHS will not pay for the specific service(s) being requested for one of the following reasons, as indicated in the above table: 1) DSHS does not cover the service(s); 2) the service(s) was denied as not medically necessary for me, or 3) the service(s) is covered but the type I requested is not.
- I understand that I can, but may choose not to: 1) ask for an Exception to Rule (ETR) after a DSHS or DSHS-contracted MCO denial of a request for a noncovered service; or 2) ask for a hearing to appeal a DSHS or DSHS-contracted MCO denial of a requested service.
- I have been fully informed by this provider of all available medically appropriate treatment, including services that may be paid for by DSHS or DSHS-contracted MCO, and I still choose to get the specified service(s) above.
- ***I agree to pay the provider directly for the specific service(s) listed above.***
- I understand the purpose of this form is to allow me to pay for and receive service(s) for which DSHS or a DSHS-contracted MCO will not pay. This provider answered all my questions to my satisfaction and has given me a completed copy of this form.
- I understand that I can call DSHS at 1-800-562-3022 if I want to receive additional information about my rights or services covered by DSHS under fee-for-service or managed care.

X **I AFFIRM: I understand and agree with this form's content, including the bullet points above.**	CLIENT'S OR CLIENT'S LEGAL REPRESENTATIVE'S SIGNATURE	DATE 10/21/2011
I AFFIRM: I have complied with all responsibilities and requirements as specified in WAC 388-502-0160.	PROVIDER OF SERVICE(S) SIGNATURE	DATE 10/21/2011
I AFFIRM: I have accurately interpreted this form to the best of my ability for the client signing above.	INTERPRETER'S PRINTED NAME AND SIGNATURE	DATE

Clinical Notes

Telephone Encounter

Voronchuk, Eleonora at 10/17/2011 1314

Patient son called and stated that his mother will have an appointment this coming Friday at 11:00 am and will need to have some blood work. The patient would like to be notified by e-mail jeannehoffman@usa.com. Please advise

Electronically signed by Voronchuk, Eleonora at 10/17/2011 1:19 PM

Neighbor Jr., William E at 10/18/2011 1749

There is a standing INR order in Epic for them. I called the patient to let her know the order is a standing order. She can have this done either at Roosevelt or here. (I did not e mail the son, as I do not use my campus e mail address for patient care). They should sign up for E care at their visit.

Status: Sent
Letter body:

10/11/2011

Jeanne Leonie Hoffman
245 HIGH SCHOOL RD NW
UNIT 2
Bainbridge Island 98110

Dear Mrs. Hoffman,

I will be leaving my current practice at UW Family Medicine Roosevelt on October 17, 2011, to assume a position as Chief of Staff at Hall Health on the University of Washington Campus. I have valued the 25 years I have practiced at the Family Medical Center and it is, of course, with mixed emotions that I have chosen to assume my new position. It has been a privilege to participate in your health care.

I would be pleased to continue to provide care for you in my new position at Hall Health on the UW Campus where I will have 3-4 clinics per week. Appointments can be made by calling 206-616-2495.

If it is more convenient for you to continue your care at the UW Family Medicine Roosevelt clinic, providers at Family Medicine who have joined our patient are team are Drs. Tom Greer, Jeanne Cawse-Lucas and Misbah Keen. Resident physicians Drs. Megan Wilson and David Norris are also accepting new patients. Appointments can be made by calling 206-598-4055.

Sincerely,

William E Neighbor JR, MD

Letters

Results by Neighbor Jr., William E on 6/1/2011

Status: Sent
Letter body:

CONFIDENTIAL PATIENT INFORMATION- for addressee only.

6/1/2011

Jeanne Leonie Hoffman
245 HIGH SCHOOL RD NW
UNIT 2
Bainbridge Island, WA 98110

Dear Ms. Hoffman,

This letter is to inform you about the laboratory tests that were done at or since your last clinic visit.

Orders Only on 05/26/11

PROTHROMBIN TIME (RAPID INR)

Component	Value	Range
• Prothrombin Time (Rapid INR)	3.7 (*)	0.8 - 1.3

HEMOGLOBIN A1C, HPLC

Component	Value	Range
• Hemoglobin A1C, HPLC	6.4 (*)	4.0 - 6.0 (%)

We discussed the plan for your elevated INR at your last visit.

Your blood sugar test is in the desired range which is below 7.0 in diabetes at your current age.

Sincerely,

William E Neighbor JR, MD

05/26/2011 - Office Visit in UWMC Family Medicine

Reason for Visit

Chief complaint: Anticoagulation
Visit diagnoses:

- Phlebitis and thrombophlebitis of other deep vessels of lower extremities (primary)
- Long term (current) use of anticoagulants

Clinical Notes

Progress Notes

Neighbor Jr., William E at 5/26/2011 1127

Jeanne Leonie Hoffman is a 86 year old female here to discuss the following:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
V58.61 AFTERCARE LONG TERM ANTICOAG USE

Problem: Anticoagulation visit

Reason for anticoagulation: DVT recurrent
INR goal: 2-3

Missed doses in the past week: no

Recent changes in other medications including non-prescription medicines, vitamins (particularly, Vit. K), herbals: no

Tobacco use: no
Change in alcohol or toabcco use since last visit: no
Change in diet since last visit (vegetables, oils, herbal and green tea): no
Symptoms of stroke: no
Symptoms of blood clot: no
Bleeding or unusual bruising: no

Prior Encounter Medications

Medication	Sig	Dispense	Refill
• Acetaminophen (TYLENOL) 500 MG OR TABS	2 in am 2 in pm and 3 before bed		
• Atorvastatin Calcium (LIPITOR) 40 MG OR TABS	1 po QD	90 Tab	3
• CarBAMazepine 200 MG OR TABS	1 TABLET 3 TIMES DAILY	90 Tab	6
• Hydrochlorothiazide 25 MG OR TABS	Take 1/2 tablet by mouth every day	15 Tab	11
• Pentoxifylline (PENTOXIL) 400 MG Oral Tab CR	One tablet three times daily (Pentoxifylline)(Trental)	90 Tab	6
• Timolol Maleate 0.5 % (DAILY) OP SOLN	instill one drop into each eye twice daily	5 mL	prn
• Warfarin Sodium 10 MG OR TABS	one tablet daily	30 Tab	6

OBJECTIVE:
BP 152/80 | Pulse 71 | Wt 137 lb (62.143 kg)
Last blood pressure recorded in this encounter: 152/80
General: healthy, alert, no distress

PRORPD 3.7 5/26/11
PRORPD 2.0 3/29/11
PRORPD 2.4 2/28/11
PRORPD 2.3 2/9/11
PRORPD 1.3 1/14/11

ASSESSMENT AND PLAN:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
No recurrent thrombosis

V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR 3.7 today. Unclear why. She has been doing well on coumadin 10 mg once daily which historically also has been her usual dose. I asked her to take only a half tab this evening but otherwise continue one each evening. Return in 5-7 days for repeat blood test.

Clinical Notes

Telephone Encounter

Smith, Courtney at 5/16/2011 0910

The pharmacy is requesting refills on the attached medication and/or supply, please advise.
The fax was received 5/13/11
The patient was last seen in clinic on 4/21/11
The medication was last prescribed on 9/27/10
Thanks, Courtney Smith CMA

Electronically signed by Smith, Courtney at 5/16/2011 9:10 AM

Other Orders

Medications

Pentoxifylline (PENTOXIL) 400 MG Oral Tab CR (Discontinued)

Electronically signed by: **Neighbor Jr., William E on 05/16/11 1253** Status: **Discontinued**
Ordering user: Neighbor Jr., William E 05/16/11 1253 Authorized by: Neighbor Jr., William E
Ordering mode: Standard
Frequency: Routine 05/16/11 - 01/03/12 Class: E-RX
Released by: Neighbor Jr., William E 05/16/11 1253 Discontinued by: Neighbor Jr., William E 01/03/12 1555 [Reorder]
Diagnoses
Phlebitis and thrombophlebitis of other deep vessels of lower extremities [451.19 (ICD-9-CM)]

Indications

DEEP VENOUS PHLEBITIS-LEG NEC (HCC) [451.19 (ICD-9-CM)]

04/21/2011 - Orders Only in UWMC Family Medicine

Reason for Visit

Visit diagnoses:

- (primary)
- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled
- Pain in joint, site unspecified
- Other convulsions

Medication List

Medication List

This report is for documentation purposes only. The patient should not follow medication instructions within. For accurate instructions regarding medications, the patient should instead consult their physician or after visit summary.

Active at the End of Visit

Acetaminophen (TYLENOL) 500 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 6/22/2016
Instructions: 2 in am 2 in pm and 3 before bed
Entered by: Smith, Courtney A, CM
Entered on: 3/8/2010
End date: 6/22/2016

Pentoxifylline (PENTOXIL) 400 MG OR TBCR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 5/16/2011
Reason for discontinuation: Reorder
Instructions: One tablet three times daily (Pentoxifylline)(Trental)
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/27/2010
Start date: 9/27/2010
End date: 5/16/2011
Quantity: 90
Refill: 6

Hydrochlorothiazide 25 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 1/6/2012
Instructions: Take 1/2 tablet by mouth every day
Authorized by: Neighbor Jr., William E, MD
Ordered on: 1/7/2011
Start date: 1/7/2011
End date: 1/6/2012
Quantity: 15 Tab
Refill: 11

Timolol Maleate 0.5 % (DAILY) OP SOLN

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 2/13/2012
Reason for discontinuation: Reorder
Instructions: instill one drop into each eye twice daily
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/10/2011
Start date: 2/10/2011
End date: 2/13/2012
Quantity: 5 mL
Refill: prn

Atorvastatin Calcium (LIPITOR) 40 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/4/2012
Reason for discontinuation: Reorder
Instructions: 1 po QD
Authorized by: Neighbor Jr., William E, MD
Ordered on: 3/16/2011
Start date: 3/16/2011
End date: 3/20/2012
Quantity: 90 Tab
Refill: 3

04/21/2011 - Orders Only in UWMC Family Medicine (continued)

Medication List (continued)

Warfarin Sodium 10 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 11/9/2011
Reason for discontinuation: Reorder
Instructions: one tablet daily
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/11/2011
Start date: 4/11/2011
End date: 11/9/2011
Quantity: 30 Tab
Refill: 6

CarBAMazepine 200 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 11/30/2011
Reason for discontinuation: Reorder
Instructions: 1 TABLET 3 TIMES DAILY
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/15/2011
Start date: 4/15/2011
End date: 11/30/2011
Quantity: 90 Tab
Refill: 6

Results by Neighbor Jr., William E on 4/22/2011

Status: Sent
Letter body:

CONFIDENTIAL PATIENT INFORMATION- for addressee only.

4/22/2011

Jeanne Leonie Hoffman
245 HIGH SCHOOL RD NW
UNIT 2
Bainbridge Island, WA 98110

Dear Ms. Hoffman,

This letter is to inform you about the laboratory tests that were done at or since your last clinic visit.

Orders Only on 04/21/11
LIPID PANEL

Component	Value	Range
• CHOLESTEROL (TOTAL)	179	> <200 (mg/dL)
• TRIGLYCERIDE	186 (*)	> <150 (mg/dL)
• CHOLESTEROL (HDL)	68	> >40 (mg/dL)
• CHOLESTEROL (LDL)	74	> <130 (mg/dL)

04/21/2011 - Orders Only in UWMC Family Medicine (continued)

Letters (continued)

• Non-HDL Cholesterol	111	0 - 159 (mg/dL)
• CHOLESTEROL/HDL RATIO	2.6	
• Lipid Panel, Additional Info.		

Value:
(NOTE)
For complete information to help interpret the lipid panel, please
use the National Cholesterol Education Program (NCEP) guideline based
reference range comments found here:
http://web.labmed.washington.edu/tests/chemistry/LIPID

BASIC METABOLIC PANEL

Component	Value	Range
• SODIUM	144	136 - 145 (mEq/L)
• POTASSIUM	3.9	3.7 - 5.2 (mEq/L)
• CHLORIDE	111 (*)	98 - 108 (mEq/L)
• CARBON DIOXIDE	26	22 - 32 (mEq/L)
• ION GAP	7	3 - 11
• GLUCOSE	115	62 - 125 (mg/dL)
• UREA NITROGEN	20	8 - 21 (mg/dL)
• CREATININE	0.75	0.20 - 1.10 (mg/dL)
• CALCIUM	9.1	8.9 - 10.2 (mg/dL)
• GFR, Calc, European American	>60	> >59 (mL/min)
• GFR, Calc, African American	>60	> >59 (mL/min)
• GFR, Information		

Value: Calculated GFR in mL/min/1.73 m2 by MDRD equation.
Fairly accurate in outpatients in chronic kidney disease. May underestimate in others. Inaccurate with changing renal function. See
http://depts.washington.edu/labweb/test/bclim/cGFR.html

SED RATE

Component	Value	Range
• ERYTHROCYTE SEDIMENTATION RATE	17	0 - 20 (mm/hr)

ANTI C. CITRULLINATED PEPTIDE2

Component	Value	Range
• Anti CCP2 Level	0.6	0.0 - 1.5 (U/mL)
• Anti CCP2 Level		

Value: New method in use as of 12/15/10. Please note new reference range.

• Anti CCP2 Comment	Negative	

ANA GROUP (PATTERN,TITER,ACEN)

Component	Value	Range
• ANA	Negative	> NRN
• ANA PATTERN	None	
• ANA Screen Comment 2		

Value: IFA screen for anti nuclear antibodies which may not detect anti SSA/Ro or anti Jo1.

• ANA Screen Comment 2

Value: For additional testing options contact the Clinical Immunology Laboratory at (206) 598 6149.

CBC, DIFF

Clinical Notes

Progress Notes

Neighbor Jr., William E at 4/21/2011 1232

Jeanne Leonie Hoffman is a 86 year old female here to discuss the following:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
V58.61 AFTERCARE LONG TERM ANTICOAG USE
Patient on stable dose of Coumadin. Comes in for INR. She reports no unexpected swelling in her legs. She continues to wear compression stockings.

724.5 BACKACHE NOS
Yesterday after walking a greater distance than normal up and down some hills carrying groceries she in the evening developed some back pain which has persisted today. There's been no radiation of the pain. She has had intermittent back pain in the past.

OBJECTIVE:
BP 136/66 | Pulse 64
Last blood pressure recorded in this encounter: 136/66
General: healthy, alert, no distress
Back: Spine is straight. Chest tenderness over the paraspinal muscles on the left at L4-L5. No midline tenderness. No deformity. Straight-leg test negative. Strength and gait are normal. Reflexes symmetrical.

Lab:

04/21/2011 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

PRORPD 2.0 3/29/11
PRORPD 2.4 2/28/11
PRORPD 2.3 2/9/11
PRORPD 1.3 1/14/11
PRORPD 2.2 12/16/10

ASSESSMENT AND PLAN:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
No recurrence.

V58.61 AFTERCARE LONG TERM ANTICOAG USE
In therapeutic range. Continue same dose. Recheck one month

724.5 BACKACHE NOS
Hx intermitent back pain worsened after walking more than usual yesterday and carrying grocery bags. No evidence of nerve impingement. Recheck if does not resolve.

UNIT 2
Bainbridge Island, WA 98110

Dear Ms. Hoffman,

I refilled your Tegretol today. On review of your record you are due for a complete blood cell count and liver tests which have not been done for a year and should be periodically checked when individuals are taking Tegretol. This can be done with your next anticoagulation / INR blood test. The order has been placed.

Sincerely,

William E Neighbor JR, MD

Jeanne Leonie Hoffman
245 HIGH SCHOOL RD NW
UNIT 2
Bainbridge Island, WA 98110

Dear Ms. Hoffman,

The x ray of your hand shows osteoarthritis without evidence of rheumatoid arthritis.

Your urine protein test was normal.

Sincerely,

William E Neighbor JR, MD

03/29/2011 - Office Visit in UWMC Family Medicine

Reason for Visit

Chief complaint: Anticoagulation
Visit diagnoses:

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled (primary)
- Long term (current) use of anticoagulants
- Other and unspecified hyperlipidemia
- Phlebitis and thrombophlebitis of other deep vessels of lower extremities
- Pain in joint, site unspecified

Clinical Notes

Progress Notes

Neighbor Jr., William E at 3/29/2011 1139

Jeanne Leonie Hoffman is a 86 year old female here to discuss the following:

250.00 DIABETES UNCOMPL ADULT-TYPE II (primary encounter diagnosis)
Has held metformin though for some reason started again last evening.

V58.61 AFTERCARE LONG TERM ANTICOAG USE
Stable dose of coumadin. Compliant. No missed doses.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
Continues to wear stockings regularly.

719.40 JOINT PAIN-UNSPEC
Long hx of pain in fingers due to DJD but lately has had more pain and swelling over PIP joints of hands symmetrical. Stiffness throughout the day but a little worse in the mornings.

OBJECTIVE:
BP 151/67 | Pulse 67 | Wt 135 lb (61.236 kg)
Last blood pressure recorded in this encounter: 151/67

03/29/2011 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

General: healthy, alert, no distress
Hands: Herberdens nodes DIP joints. Swelling of PIP joints without increased warmth or redness, some ulnar deviation.

A1C 6.3 5/27/10
A1C 6.2 4/29/08
GLUCOSE 122 5/27/10
CREATININE 0.7 5/27/10
MICROALBUMIN 14.7 3/29/11
TOTAL 189 4/29/10
LDL 99 4/29/10
HDL 67 4/29/10
TRIG 114 4/29/10

ASSESSMENT AND PLAN:

250.00 DIABETES UNCOMPL ADULT-TYPE II (primary encounter diagnosis)
Off metformin. Had urine protein test today. In one month she should have:
Plan: HEMOGLOBIN A1C, HPLC, LIPID PANEL, BASIC
METABOLIC PANEL

V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR 2.0. Recheck in one month. Continue same dose of coumadin.

272.4 HYPERLIPIDEMIA NEC/NOS
Fasting lipid panel due in one month.
Instruction for fasting is to not eating or drinking anything except water for 8-10 hours before the blood test.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
No recurrence. Wearing stockings.

719.40 JOINT PAIN-UNSPEC
Chronic pain and some deformity in hands now more prominent at PIP joints than noted before. Has stiffness all day long, not worse in am particularly. Will check X ray and with blood tests in one month check sed rate and anti CCP and ANA

General Diagnostic Text	--	—	—	UW RAD

Result: EXAMINATION:XR HAND 2 VIEWS BILAT/RT/LFT BILATERAL Indication:rule out erosive arthritis Comparison:July 2001 Findings:Right: Asymmetric joint space narrowing with osteophyte formation and subchondral sclerosis is most pronounced at the DIP joints of the 2nd through 5th digit interphalangeal joint of 1st digit. These findings are consistent with osteoarthritis. Lesser degrees of similar changes are seen at the PIP and MCP joints as well as involving the 1st CMC joint. No erosions are demonstrated. No acute fracture or dislocation. There is soft tissue swelling adjacent to the DIP and PIP joints. Left: Asymmetric joint space narrowing with osteophyte formation and subchondral sclerosis involves the DIP joints of the 2nd through 5th digits. This is consistent with osteoarthritis. Similar, but lesser degrees, are seen involving the PIP and MCP joints of the 2nd digit, interphalangeal joint of the 1st digit, and 1st CMC joint. The included wrist shows osteoarthritis at the radiocarpal articulation. No acute fracture or dislocation. No erosions. There is soft tissue swelling adjacent to the DIP and PIP joints. Patient Instructions

ASSESSMENT AND PLAN:

250.00 DIABETES UNCOMPL ADULT-TYPE II (primary encounter diagnosis)
Off metformin. Had urine protein test today. In one month she should have:
Plan: HEMOGLOBIN A1C, HPLC, LIPID PANEL, BASIC
METABOLIC PANEL

V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR 2.0. Recheck in one month. Continue same dose of coumadin.

272.4 HYPERLIPIDEMIA NEC/NOS
Fasting lipid panel due in one month.
Instruction for fasting is to not eating or drinking anything except water for 8-10 hours before the blood test.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
No recurrence. Wearing stockings.

719.40 JOINT PAIN-UNSPEC
Chronic pain and some deformity in hands now more prominent at PIP joints than noted before. Has stiffness all day long, not worse in am particularly. Will check X ray and with blood tests in one month check sed rate and anti CCP and ANA

Jeanne Leonie Hoffman
245 HIGH SCHOOL RD NW
UNIT 2
Bainbridge Island, WA 98110

Dear Ms. Hoffman,

The following is the latest laboratory test that we have on file related to diabetes:

Hemoglobin A1c every 6 months: A1C 6.3 5/27/10
Cholesterol panel every 12 months: LDL 99 4/29/10
Urine protein test every 12 months : MICROALBUMIN 12.3 11/13/09
Kidney blood test every 12 months: CREATININE 0.7 5/27/10

You are past due for the following tests: Urine protein. I have ordered these tests. Please come to the lab between 8 and 5:30 on a weekday to have the tests. I will write you with the test results within two weeks of the lab tests.

If you are due for a cholesterol test, please fast for 10 hours before the blood test. If you are due for a urine protein test, collect some of your first urine in the morning in a clean container and refrigerate until you bring the container to the lab.

Sincerely,

William E Neighbor JR, MD

Clinical Notes

Progress Notes

Neighbor Jr., William E at 1/14/2011 1215

Jeanne Leonie Hoffman is a 86 year old female here to discuss the following:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
V58.61 AFTERCARE LONG TERM ANTICOAG USE
In for INR. Had dental surgery. No new meds. Reports compliance with coumadin 10 mg once daily.

OBJECTIVE:
BP 139/77 | Pulse 72
General: healthy, alert, no distress

01/14/2011 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

No exam

INR 1.3

ASSESSMENT AND PLAN:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR 1.3 today. She states she has been taking coumadin 10 mg once daily. No new medications. She did not bring in her pills today, but she has been on coumadin for so long that I cannot imagine that she is confused about which pill is which.

She is to take an extra half tab (5 mg) this evening, continue 10 mg daily, and recheck here for INR on Tuesday.

Clinical Notes

Progress Notes

Neighbor Jr., William E at 12/16/2010 1141

Jeanne Leonie Hoffman is a 85 year old female here to discuss the following:

719.47 JOINT PAIN-ANKLE (primary encounter diagnosis)
2 week hx of left ankle instep pain after dental surgery. She did not stop coumadin related to dental surgery. No injury

Current outpatient prescriptions

Medication	Sig
• Acetaminophen (TYLENOL) 500 MG OR TABS	2 in am 2 in pm and 3 before bed
• Acetaminophen-Codeine #3	1 TABLET at bed time

12/16/2010 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

(TYLENOL/CODEINE #3) 300-30 MG OR TABS	
• Atorvastatin Calcium (LIPITOR) 40 MG OR TABS	1 po QD
• CarBAMazepine 200 MG OR TABS	1 TABLET 3 TIMES DAILY
• Hydrochlorothiazide 25 MG OR TABS	Take 1/2 tablet by mouth every day
• MetFORMIN HCl 500 MG OR TABS	one tab twice daily for diabetes
• Pentoxifylline (PENTOXIL) 400 MG OR TBCR	One tablet three times daily (Pentoxifylline)(Trental)
• TIMOLOL MALEATE 0.5 % (DAILY) OP SOLN	instill one drop into each eye twice daily
• Warfarin Sodium 10 MG OR TABS	one tablet daily

OBJECTIVE:
BP 123/62 | Pulse 67
General: healthy, alert, no distress
Tender over instep of left ankle. There is a slightly distended vein nearby which is tender but she also seems to be tender over the bony structures. Remainder of hind foot, midfoot, and forefoot exam normal

INR 2.2

ASSESSMENT AND PLAN:

719.47 JOINT PAIN-ANKLE (primary encounter diagnosis)
2 week hx of left ankle instep pain after dental surgery. She did not stop coumadin related to dental surgery. Her INR today is 2.2. Exam shows tenderness over instep. There is a small dilated vein which patient states was not there before dental surgery. She may have superficial phlebitis in which case she should use arm compresses. However, will obtain X ray to rule out occult fracture though patient denies any trauma.

Addendum: X ray without fracture. Advised warm compresses. See letter to patient.

Jeanne Leonie Hoffman
245 HIGH SCHOOL RD NW
UNIT 2
Bainbridge Island, WA 98110

Dear Ms. Hoffman,

The x ray of your ankle showed no evidence of fracture. The tenderness you have noted may be due to some superficial vein irritation as you suggested. Your anticoagulation is in the desired range. I would advise warm compresses on the area is assist in healing.

Sincerely,

William E Neighbor JR, MD

Dr. Neighbour; Appreciate the Medical History update on Ms. Hoffman. She has been treatment planned for extraction of 3 broken teeth. We are comfortable with local measures for hemostasis and a pre-op INR <3.0. We will obtain an INR on the day of the scheduled procedure, and there should be no disruption in her Coumadin regimen. Please respond with any questions or recommendations. her appointment has been scheduled for Dec. 1. 2010.

Clinical Notes

Progress Notes

Neighbor Jr., William E at 11/9/2010 1238

Jeanne Leonie Hoffman is a 85 year old female here to discuss the following:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
V58.61 AFTERCARE LONG TERM ANTICOAG USE
In for INR. No signs of DVT by her report. Complaint with meds. No bleeding.

521.00 UNSPEC DENTAL CARIES

11/09/2010 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

Being seen in dental clinic. She quit fosamax in mid September as they want her off of this medication for three months before dental surgery. Patient's son who is present with her today says they have tried to contact us to assure she is not taking fosamax and also for management of her anticoagulation around the time of surgery. I reviewed our records and do not find that we have heard from them. Son does not have a phone number.

OBJECTIVE:
BP 142/71 | Wt 128 lb 3.2 oz (58.151 kg)
General: healthy, alert, no distress
No other exam.

ASSESSMENT AND PLAN:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
No recurrent clot.

V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR 2.2. Recheck after dental surgery.

521.00 UNSPEC DENTAL CARIES
Has dental surgery planned for Nov 18 by her report She does not bring in any request for preop assessment and I do not have access to dental records. I will call dental surgery. She has not been taking fosamax since early or mid September by her report. This was removed from her med list. Regarding anticoagulation she could be off coumadin for three days but no longer given prior hx of recurrent clots.

Clinical Notes

Progress Notes

Neighbor Jr., William E at 10/21/2010 1135

Jeanne Leonie Hoffman is a 85 year old female here to discuss the following:

10/21/2010 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
V58.61 AFTERCARE LONG TERM ANTICOAG USE
She is now taking Coumadin 10 mg one tablet daily. This is increased of one half tablet weekly. She's had no leaking and no swelling in her lower extremities.

OBJECTIVE:
BP 123/66 | Pulse 64
General: healthy, alert,
INR 2.2

ASSESSMENT AND PLAN:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
No recurrent clot

V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR 2.2. Dose now should be coumadin 10 mg one tab daily. Recheck in 2 weeks. She may scheudle a longer visit at that time for knee and hip pain.

She is having increasing problems with left hip pain. She is scheduled for a longer visit at her next appointment with me in 2 weeks.

Clinical Notes

Telephone Encounter

Neighbor Jr., William E at 10/15/2010 1110

INR 1.7. While it was prescribed for her to take Coumadin 10 one daily, she has continued to take a half on Sundays.

Plan is to take an extra half, 15 mg, tonight, Friday, and on Sunday take her regular one half, but after that take a full tablet daily.

I prefer that she not take an extra half tonight and the extra half on Sunday (to make a full tab), because she may overshoot as has happened in the past.

I wrote this out for her.

William E Neighbor JR, MD

VIS given to patient.
Patient has no allergies to vaccine or components.
Patient or their caregiver gave verbal consent for immunization.

I administered the injection. Courtney Smith, Medical Assistant

Electronically signed by Smith, Courtney at 10/15/2010 11:33 AM

Neighbor Jr., William E at 10/15/2010 1708

Jeanne Leonie Hoffman is a 85 year old female here to discuss the following:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
No leg swellling

V04.81 VACCINE FOR INFLUENZA
Requested

V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR 1.7. Taking coumadin 10mg once daily except half on Sunday. Prescribed dose is once daily.

OBJECTIVE:
There were no vitals taken for this visit.
General: alert. Complains of exacerbation of hip pain

INR 1.7

ASSESSMENT AND PLAN:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
No recurrence

V04.81 VACCINE FOR INFLUENZA
given

V58.61 AFTERCARE LONG TERM ANTICOAG USE
Coumadin dose should be 10 mg daily. Advise taking an extra half tab tonight, that is, 15 mg, then one daily except for this week would take a half on Sunday. Basically, we are boosting her weekly dose by a half tab but doing this this week on Friday rather than on Sunday.

After that she will take one daily. She understands this and it was drawn out for her.

She is to have an INR repeated in 10 days.

She should schedule a visit for hip pain should it persist. She did not report any falls.

09/09/2010 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

Jeanne Leonie Hoffman is a 85 year old female here to discuss the following:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
V58.61 AFTERCARE LONG TERM ANTICOAG USE
Is not taking Coumadin one tablet on every day of the week. The first day there was actually an increased dose was last Sunday, 5 days ago. She's had no bleeding or change in bruising.

Current outpatient prescriptions

Medication	Sig
• Acetaminophen (TYLENOL) 500 MG OR TABS	2 in am 2 in pm and 3 before bed
• Acetaminophen-Codeine #3 (TYLENOL/CODEINE #3) 300-30 MG OR TABS	1 TABLET at bed time
• Atorvastatin Calcium (LIPITOR) 40 MG OR TABS	1 po QD
• CarBAMazepine 200 MG OR TABS	1 TABLET 3 TIMES DAILY
• FOSAMAX 70 MG OR TABS	Take on talbet once a week on Sunday. Remain upright for 30-60 minutes after taking
• HYDROCHLOROTHIAZIDE 25 MG OR TABS	Take 1/2 tablet by mouth every day
• MetFORMIN HCl 500 MG OR TABS	one tab twice daily for diabetes
• PENTOXIL 400 MG OR TBCR	One tablet three times daily (Pentoxifylline)(Trental)
• TIMOLOL MALEATE 0.5 % (DAILY) OP SOLN	instill one drop into each eye twice daily
• Warfarin Sodium 10 MG OR TABS	one tablet daily

OBJECTIVE:
BP 159/66 | Pulse 62 | Wt 128 lb (58.06 kg)
General: healthy, alert, no distress

INR 2.5

ASSESSMENT AND PLAN:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
No recurrent clot

V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR 2.5. As recent dose adjust advise second repeat in 2 weeks. Does not require appointment for that.

Progress Notes

Neighbor Jr., William E at 9/2/2010 1101

09/02/2010 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

Jeanne Leonie Hoffman is a 85 year old female here to discuss the following:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
No clot sx.

V58.61 AFTERCARE LONG TERM ANTICOAG USE
She states that despite recent travels she does not believe she's missed any doses of Coumadin.

OBJECTIVE:
BP 116/59 | Pulse 59 | Wt 128 lb (58.06 kg)
General: healthy, alert, no distress
Lower extremity compression stockings in place

ASSESSMENT AND PLAN:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
No recurrent clots

V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR 1.8. No missed doses. Will increase coumadin to 10 mg daily. Recheck INR in 10-14 days.
She at times has required even higher weekly doses in the past.

Clinical Notes (continued)

Jeanne Leonie Hoffman is a 85 year old female here to discuss the following:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
V58.61 AFTERCARE LONG TERM ANTICOAG USE
She has been taking Coumadin 10 mg one tablet daily except for a half tablet 2 days a week. She comes in for an INR. She has had no signs of DVT.

OBJECTIVE:
BP 134/62 | Pulse 62 | Wt 125 lb (56.7 kg)
General: healthy, alert, no distress

Labs: INR 1.7

ASSESSMENT AND PLAN:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
No recurrence

V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR subtherapeutic at 1.7. She is now to take Coumadin 10 mg one daily except one half on Sundays, (that is one day of the week rather than two days of week as before). Recheck in 7-10 days.

06/15/2010 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

Jeanne Leonie Hoffman is a 85 year old female here to discuss the following:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
V58.61 AFTERCARE LONG TERM ANTICOAG USE
In for INR. No swelling of extremities.

Current outpatient prescriptions

Medication	Sig
• Acetaminophen (TYLENOL) 500 MG OR TABS	2 in am 2 in pm and 3 before bed
• Acetaminophen-Codeine #3 (TYLENOL/CODEINE #3) 300-30 MG OR TABS	1 TABLET at bed time
• Atorvastatin Calcium (LIPITOR) 40 MG OR TABS	1 po QD
• CARBAMAZEPINE 200 MG OR TABS	1 TABLET 3 TIMES DAILY
• FOSAMAX 70 MG OR TABS	Take on talbet once a week on Sunday. Remain upright for 30-60 minutes after taking
• HYDROCHLOROTHIAZIDE 25 MG OR TABS	Take 1/2 tablet by mouth every day
• MetFORMIN HCl 500 MG OR TABS	one tab twice daily for diabetes
• PENTOXIL 400 MG OR TBCR	One tablet three times daily (Pentoxifylline)(Trental)
• TIMOLOL MALEATE 0.5 % (DAILY) OP SOLN	instill one drop into each eye twice daily
• Warfarin Sodium 10 MG OR TABS	one tablet daily except a half tablet on Wednesday and Sunday

OBJECTIVE:
BP 118/72 | Pulse 82 | Wt 128 lb (58.06 kg)
General: healthy, alert, no distress
Talkative today as always. Pleasant to see. Talked about her childhood on Bainbridge.

Lab: INR 2.3

ASSESSMENT AND PLAN:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
No recurrent clot

V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR therapeutic after dose adjustment. Recheck 2-4 weeks.

General Diagnostic Text	--	—	—	UW RAD

Result: Examination:A digital screening mammogram was performed and computer-aided detection was applied. The patient will be notified by letter of these findings. (Patients with findings requiring additional imaging will also be sent instructions on how to schedule this appointment). ComparisonComparison is made to films from 6/5/2009 (bilateral - Enterprise) and films from 6/3/2008 (bilateral - Enterprise) and films from 3/22/2007 (bilateral - Enterprise) and films from 1/11/2006 (Enterprise) and films from 12/7/2004 (Enterprise). FindingsBilateral Breast Findings: There are scattered fibroglandular densities (11% - 50% fibroglandular). No significant masses, calcifications or other abnormalities are seen. Impression BILATERAL BREASTS Negative, no evidence of malignancy. Normal interval follow-up is recommended in 12 months. OVERALL ASSESSMENT - CATEGORY 1 - NEGATIVE ATTENDING RADIOLOGIST AND PAGER NUMBER263330 EBY PETER REIST MD(206)663-13

06/02/2010 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

Jeanne Leonie Hoffman is a 85 year old female here to discuss the following:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
V58.61 AFTERCARE LONG TERM ANTICOAG USE
She took an extra half tab last week in case she had happened to have missed a dose as a cause for her low INR last week. No bleeding. No leg swelling.

OBJECTIVE:
BP 132/78 | Pulse 59
General: healthy, alert, no distress

Lab. INR 1.8

ASSESSMENT AND PLAN:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR is 1.8. She took an extra half tab last week. Although she has been well controlled until recently on her current dose of coumadin, it looks like we will need to increase it by a half tab for the week at this time.
Her new regimen will be:
Coumadin one tab daily except for a half on Wed and Sunday. The change is that she will take a full tab on Friday rather than a half tab.

Recheck in 2 weeks.

Progress Notes

Neighbor Jr., William E at 5/27/2010 1206

Clinical Notes (continued)

Jeanne Leonie Hoffman is a 85 year old female here to discuss the following:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
V58.61 AFTERCARE LONG TERM ANTICOAG USE
She has a complaint with anticoagulation as listed below. No new medications. No change in diet. No bleeding and no evidence of clotting.

V76.51 SPECIAL SCREENING FOR MALIGNANT NEOPLASMS, COLON
She does not recall receiving stool test cards at her last visit in April.

Current outpatient prescriptions

Medication	Sig
• Acetaminophen (TYLENOL) 500 MG OR TABS	2 in am 2 in pm and 3 before bed
• Acetaminophen-Codeine #3 (TYLENOL/CODEINE #3) 300-30 MG OR TABS	1 TABLET at bed time
• Atorvastatin Calcium (LIPITOR) 40 MG OR TABS	1 po QD
• CARBAMAZEPINE 200 MG OR TABS	1 TABLET 3 TIMES DAILY
• FOSAMAX 70 MG OR TABS	Take on talbet once a week on Sunday. Remain upright for 30-60 minutes after taking
• HYDROCHLOROTHIAZIDE 25 MG OR TABS	Take 1/2 tablet by mouth every day
• MetFORMIN HCl 500 MG OR TABS	one tab twice daily for diabetes
• PENTOXIL 400 MG OR TBCR	One tablet three times daily (Pentoxifylline)(Trental)
• TIMOLOL MALEATE 0.5 % (DAILY) OP SOLN	instill one drop into each eye twice daily
• Warfarin Sodium 10 MG OR TABS	one tablet daily except a half tablet on Wednesday, Friday, and Sunday

OBJECTIVE:
BP 133/68 | Pulse 64 | Wt 132 lb (59.875 kg)
General: healthy, alert, no distress
INR 1.4

ASSESSMENT AND PLAN:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
V58.61 AFTERCARE LONG TERM ANTICOAG USE
Surprisingly subtherapeutic INR which has recently been stable in the therapeutic range on her current dose of Coumadin. She does not recall missing any doses. There's been no change in diet or other medications. Ordinarily tomorrow evening she would take a half tablet of Coumadin. I asked her to take a full tablet and then return early next week for repeat INR.

Active at the End of Visit

HYDROCHLOROTHIAZIDE 25 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 11/22/2010
Reason for discontinuation: Reorder
Instructions: Take 1/2 tablet by mouth every day
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/7/2009
Start date: 12/7/2009
End date: 11/22/2010
Quantity: 15
Refill: 11

CARBAMAZEPINE 200 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 8/19/2010
Reason for discontinuation: Reorder
Instructions: 1 TABLET 3 TIMES DAILY
Authorized by: Neighbor Jr., William E, MD
Ordered on: 1/5/2010
Start date: 1/4/2010
End date: 8/18/2010
Quantity: 90
Refill: 6

TIMOLOL MALEATE 0.5 % (DAILY) OP SOLN

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 2/10/2011
Reason for discontinuation: Reorder
Instructions: instill one drop into each eye twice daily
Authorized by: Neighbor Jr., William E, MD
Ordered on: 1/19/2010
Start date: 1/19/2010
End date: 2/10/2011
Quantity: 5ml
Refill: prn

PENTOXIL 400 MG OR TBCR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/27/2010
Reason for discontinuation: Reorder
Instructions: One tablet three times daily (Pentoxifylline)(Trental)
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/12/2010
Start date: 2/12/2010
End date: 9/27/2010
Quantity: 90
Refill: 6

FOSAMAX 70 MG OR TABS

Discontinued by: Deering, Dale E
Discontinued on: 11/9/2010
Reason for discontinuation: Discontinued by patient
Instructions: Take on talbet once a week on Sunday. Remain upright for 30-60 minutes after taking
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/17/2010
Start date: 2/16/2010
End date: 11/9/2010
Quantity: 4
Refill: 12

05/27/2010 - Orders Only in UWMC Family Medicine (continued)

Medication List (continued)

Acetaminophen (TYLENOL) 500 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 6/22/2016
Instructions: 2 in am 2 in pm and 3 before bed
Entered by: Smith, Courtney A, CM
Entered on: 3/8/2010
End date: 6/22/2016

Warfarin Sodium 10 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 6/2/2010
Reason for discontinuation: Reorder
Instructions: one tablet daily except a half tablet on Wednesday, Friday, and Sunday
Authorized by: Neighbor Jr., William E, MD
Ordered on: 3/22/2010
Start date: 3/22/2010
End date: 6/2/2010
Quantity: 30
Refill: 6

Atorvastatin Calcium (LIPITOR) 40 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 3/16/2011
Reason for discontinuation: Reorder
Instructions: 1 po QD
Authorized by: Neighbor Jr., William E, MD
Ordered on: 3/25/2010
Start date: 3/25/2010
End date: 3/16/2011
Quantity: 90
Refill: 3

MetFORMIN HCl 500 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 11/1/2010
Reason for discontinuation: Reorder
Instructions: one tab twice daily for diabetes
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/5/2010
Start date: 4/5/2010
End date: 11/1/2010
Quantity: 60
Refill: 6

Acetaminophen-Codeine #3 (TYLENOL/CODEINE #3) 300-30 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/21/2010
Reason for discontinuation: Reorder
Instructions: 1 TABLET at bed time
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/8/2010
Start date: 4/8/2010
End date: 10/21/2010
Quantity: 30
Refill: 0

Letters

Results by Neighbor Jr., William E on 6/1/2010

Status: Sent
Letter body:

05/27/2010 - Orders Only in UWMC Family Medicine (continued)

Letters (continued)

CONFIDENTIAL PATIENT INFORMATION- for addressee only.

6/1/2010

Jeanne Leonie Hoffman
245 HIGH SCHOOL RD NW
UNIT 2
Bainbridge Island, WA 98110

Dear Ms. Hoffman,

This letter is to inform you about the laboratory tests that were done at or since your last clinic visit.

Orders Only on 05/27/10

HEMOGLOBIN A1C, HPLC

Component	Value	Range
• Hemoglobin A1C, HPLC	6.3 (*)	4.0 - 6.0 (%)

BASIC METABOLIC PANEL

Component	Value	Range
• SODIUM	136	136 - 145 (mEq/L)
• POTASSIUM	4.6	3.7 - 5.2 (mEq/L)
• CHLORIDE	102	98 - 108 (mEq/L)
• CARBON DIOXIDE	29	22 - 32 (mEq/L)
• ION GAP	5	3 - 11
• GLUCOSE	122	62 - 125 (mg/dL)
• UREA NITROGEN	13	8 - 21 (mg/dL)
• CREATININE	0.7	0.2 - 1.1 (mg/dL)
• CALCIUM	9.3	8.9 - 10.2 (mg/dL)
• GFR, Calc, European American	>60	> >59 (mL/min)
• GFR, Calc, African American	>60	> >59 (mL/min)

• GFR, Information
Value: Calculated GFR in mL/min/1.73 m2 by MDRD equation. Fairly accurate in outpatients in chronic kidney disease. May underestimate in others. Inaccurate with changing renal function. See http://depts.washington.edu/labweb/test/bclim/cGFR.html

Your A1c reflects good control of your blood sugars. Your non fasting blood sugar of 122 was in the desired range. Your electrolytes and kidney function tests were normal.

Sincerely,

William E Neighbor, MD

05/27/2010 - Orders Only in UWMC Family Medicine (continued)

Letters (continued)

04/29/2010 - Office Visit in UWMC Family Medicine

Reason for Visit

Chief complaint: Anticoagulation
Visit diagnoses:

- Phlebitis and thrombophlebitis of other deep vessels of lower extremities (primary)
- Long term (current) use of anticoagulants
- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled

Clinical Notes

Progress Notes

Neighbor Jr., William E at 4/29/2010 1122

Jeanne Leonie Hoffman is a 85 year old female here to discuss the following:

V58.61 AFTERCARE LONG TERM ANTICOAG USE
A stable dose of Coumadin listed below. No bleeding. No recurrent leg swelling.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
No recurrent leg swelling.

Patient Active Problem List

Diagnoses	Date Noted
SKIN SENSATION DISTURB [782.0]	**06/03/2008**

Priority: High
Overview Note:
6/3/2008 labs ordered. Return in one month for exm.

OSTEOPOROSIS NOS [733.00] **03/04/2008**
Priority: High
Overview Note:
T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continue for five years, then stop

AFTERCARE LONG TERM ANTICOAG USE [V58.61] **01/08/2008**
Priority: High
Overview Note:
Reason for anticoagulation: Recurrent dvts
Duration of anticoagulation: life
INR goal: 2.-3

She has also been on Trental for many years because of recurrent venous stasis disease despite adequate anticoagulation. Her last arterial vascular study showed ABIs of 1.0 in 2007. 2/12/2010 repeat arterial vascular studies of lower extremities ordered.

ADULT FAILURE TO THRIVE [783.7] **10/19/2007**
Priority: High
Overview Note:
Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait

TREMOR NEC [333.1] **08/17/2007**
Priority: High
Overview Note:
Noted by Melanie Parker. Consider Parkinson's disease med trial.

FX FEMUR INTRCAPS NOS-CLOSE [820.00] **05/01/2007**
Priority: High
Overview Note:

Pinned April 2007.
Post op hematocrit 25
Has walker with wheels for use outside of home. Uses cane in home.

VITAMIN B DEFICIENCY NOS [266.9] **05/01/2007**
Priority: High
Overview Note:
Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

DIABETES UNCOMPL ADULT-TYPE II [250.00] **03/27/2007**
Priority: High
Overview Note:
Year onset: Dx March 2007
Complications:
Last A1c: March 2007 7.1. Aug 2007 6.3; Nov 2007 7.1; March 2008 6.4 on metformin; 10/5/2009 6.4
Last Cr: Nov 2007 0.9
Last Urine Alb/Cr ratio: 3/3/2008 normal; Nov 2009 nl
Last foot exam: 2/5/2008 normal
Last monofilament test: 2/5/2008 slight decrease
Last eye exam: 2/5/2008 due
Last Lipid Panel: On atorvastatin. Lipids Fall 2009
Blood pressure: 2/5/2008 normal
Last EKG:
Glucometer review:
Nutrition consult: 2/5/2008 ordered

CONVULSIONS, OTHER [780.39] **11/20/2006**
Priority: High
Overview Note:
Petit Mal since 1975
Carbamazepine level 7.6 on Feb 2007

ESOPHAGEAL REFLUX [530.81] **11/20/2006**
Priority: High

SENSORNEUR HEAR LOSS NOS [389.10] **11/20/2006**
Priority: High
Overview Note:
Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

DEEP VENOUS PHLEBITIS-LEG NEC [451.19] **11/20/2006**
Priority: High
Overview Note:
Recurrent DVT and phlebitis since 1982
Per Vascular Surgery note 5/9/2006: continue warfarin
3/9/2010 Lower extremity arterial vascular ultrasound studies normal

UTERINE LEIOMYOMA NOS [218.9] **11/20/2006**
Priority: High

Overview Note:
S/P hysterectomy with BSO in 1991

HYPERLIPIDEMIA NEC/NOS [272.4] **11/20/2006**
Priority: High
Overview Note:
On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

CARPAL TUNNEL SYNDROME [354.0] **11/20/2006**
Priority: High
Overview Note:
Carpal tunnel release right wrist in 1989

CATARACT NOS [366.9] **11/20/2006**
Priority: High
Overview Note:
Extraction left eye in 1989

ALLERGIC RHINITIS NOS [477.9] **11/20/2006**
Priority: High

GENERAL OSTEOARTHROSIS [715.00] **11/20/2006**
Priority: High
Overview Note:
LS spine. Bilateral talonavicular arthritis since 1994.

BENIGN HYPERTENSION [401.1] **11/20/2006**
Priority: High

DIAPHRAGMATIC HERNIA [553.3] **11/20/2006**
Priority: High
Overview Note:
CT of abdomen in 2006

GLAUCOMA NOS [365.9] **11/20/2006**
Priority: High

ROUTINE MEDICAL EXAM [V70.0] **11/20/2006**
Priority: High
Overview Note:
Td/Tdap (q 10 yr): 2006
Pneumococcal (65 yoa and high risk x1):
Blood pressure: Dx hypertension
Cholesterol: dx hyperlipidemia
Mammogram (q 1 yr begin at age 40-50 yrs): neg Jan 2006. March 2007 normal. May 2008 normal, June 2009 nl
Pap smear (q2-3 yrs to age 65)--82 years old
Colorectal cancer screening: Sig to 30 cm in May 2001. Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme cards given. Willing to consider colonoscopy.
Tobacco: no
Alcohol: no
Drugs: no

Sexual practice/contraception: Not active
Advanced directives: yes
Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 . Advise Vit D 800 IU daily.

Current outpatient prescriptions

Medication	Sig
• Acetaminophen (TYLENOL) 500 MG OR TABS	2 in am 2 in pm and 3 before bed
• Acetaminophen-Codeine #3 (TYLENOL/CODEINE #3) 300-30 MG OR TABS	1 TABLET at bed time
• Atorvastatin Calcium (LIPITOR) 40 MG OR TABS	1 po QD
• CARBAMAZEPINE 200 MG OR TABS	1 TABLET 3 TIMES DAILY
• FOSAMAX 70 MG OR TABS	Take on talbet once a week on Sunday. Remain upright for 30-60 minutes after taking
• HYDROCHLOROTHIAZIDE 25 MG OR TABS	Take 1/2 tablet by mouth every day
• MetFORMIN HCl 500 MG OR TABS	one tab twice daily for diabetes
• PENTOXIL 400 MG OR TBCR	One tablet three times daily (Pentoxifylline)(Trental)
• TIMOLOL MALEATE 0.5 % (DAILY) OP SOLN	instill one drop into each eye twice daily
• Warfarin Sodium 10 MG OR TABS	one tablet daily except a half tablet on Wednesday, Friday, and Sunday

OBJECTIVE:
BP 110/66 | Pulse 70 | Wt 126 lb (57.153 kg)
General: healthy, alert, no distress
No other exam. She was having some recurrence of her chronic and recurrent left hip pain today.

INR 2.3

ASSESSMENT AND PLAN:

V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR 2.3. Stable dose. No side effects Recheck in one month.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
No recurrence.

250.00 DIABETES UNCOMPL ADULT-TYPE II
Diabetes care reviewed. On metformin. Due for BMP and A1c with next blood draw.

Letter body:

CONFIDENTIAL PATIENT INFORMATION-for addressee only

4/12/2010

Jeanne Leonie Hoffman
245 High School Rd Nw
Unit 2
Bainbridge Island WA 98110

04/12/2010 - Appointment in UWMC Family Medicine (continued)

Letters (continued)

Dear Ms. Hoffman,

It appears that you missed (or canceled with less than 24 hours notice) your scheduled appointment at the Family Medical Center on 4/12/10. We are concerned that you were not able to make it, and hope it was not something serious. Please call to reschedule your appointment with us if you still have medical concerns with which we can help.

Please write your appointment date and time on your calendar to help you remember them. You will receive an automated reminder phone call three days before an appointment.

If you are not able to keep your appointment, we ask that you call the clinic at least 24 hours before your appointment at 206-598-4055 to cancel or reschedule. If there are circumstances that make it difficult for you to keep your appointments, please discuss this with us at your next visit. Missed appointments impact our ability to provide health care to you, and also limit the availability of appointments for other patients.

If you think that you received this letter in error, please contact the clinic at 598-4055. We look forward to continuing to provide health care for you in the future.

Sincerely,

Family Medical Center

der)
Completed by Courtney Smith

Electronically signed by Smith, Courtney at 3/8/2010 2:19 PM

Neighbor Jr., William E at 3/8/2010 1433

Jeanne Leonie Hoffman is a 85 year old female here to discuss the following:

V58.61 AFTERCARE LONG TERM ANTICOAG USE
451.19 DEEP VENOUS PHLEBITIS-LEG NEC
She has been taking Coumadin 10 mg one tablet daily except a half tablet on Sundays which she did on the prior to Sundays. She has had no bleeding. She has had no symptoms of deep venous thrombosis. She also comes in today to followup on results of ankle-brachial indices were measured. One of the reasons these were checked was because she's been on Plental for many years because of recurrent deep venous thrombosis. The patient reports today that when she misses a dose upon call she has pains in her calves and also notes pain in her calves when walking.

OBJECTIVE:
BP 121/63 | Pulse 62 | Wt 130 lb (58.968 kg)
General: healthy, alert, no distress
INR 3.4

Vascular study showed ankle-brachial indices greater than 1.0 bilaterally in the lower extremities

ASSESSMENT AND PLAN:

V58.61 AFTERCARE LONG TERM ANTICOAG USE
451.19 DEEP VENOUS PHLEBITIS-LEG NEC
1. INR 3.4. Will reduce coumadin 10 mg to one daily except a half on Wednesday and Sunday. Recheck in 2 weeks.
2. Vascular doppler showed ABIs greater than 1 bilaterally indicating good peripheral vascular flow. Except patient develops claudication sx if she does not take Pentoifyll (Trental). There is a national shortage, but she is getting with taking a half tab daily which is fine.

Clinical Notes

Progress Notes

Neighbor Jr., William E at 2/24/2010 1215

Jeanne Leonie Hoffman is a 85 year old female here to discuss the following:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
V58.61 AFTERCARE LONG TERM ANTICOAG USE
She comes in today for followup INR. At her last visit the dose of her medication had been reduced but she forgot and continued at her regular dose of a full tablet daily. She's had no symptoms of recurrent phlebitis.

02/24/2010 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

715.00 GENERAL OSTEOARTHROSIS
She has used Tylenol with Codeine sparingly in the past and needs a refill to be taken when Tylenol alone is not sufficient.

OBJECTIVE:
BP 154/81 | Pulse 67 | Wt 131 lb 12.8 oz (59.784 kg)
General: healthy, alert, no distress
INR 3.0

ASSESSMENT AND PLAN:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
Remind her that her new dose of Coumadin is 10 mg daily except a half tablet on Sundays. Repeat INR in 2 weeks.

V58.61 AFTERCARE LONG TERM ANTICOAG USE
As above

715.00 GENERAL OSTEOARTHROSIS
Occasional need for Tylenol with codeine. Refill provided. No history of medication abuse.

Neighbor Jr., William E at 2/11/2010 1638

Pentoxifylline (Trental) is still listed as a formulary drug as far as I know. Please call pharmacy to clarify if it is simply that they do not have it in stock, is there a national shortage, or is it indeed no longer available anywhere. Thank you.
William E Neighbor, MD

Banuelos, Heather at 2/12/2010 0943

Pentoxifyll is on long term back order. They are asking it to be changed to another Rx. Thanks

Electronically signed by Banuelos, Heather at 2/12/2010 9:43 AM

Neighbor Jr., William E at 2/12/2010 1621

UW pharmacy has it in stock. I have directed a prescription to our pharmacy.
I called the patient twice, but no answer. It is unlikely to be harmful if she runs out of Trental for a few days.
Letter sent to patient stating prescription sent to UW pharmacy.
It has been three years since her last vascular study. She was initially placed on Trental years ago by vascular surgery because of recurrent venous stasis though there was no clear evidence of arterial vascular disease. She has done well for many years and I am wondering if she continues to need to be on Trental. I am ordering repeat vascular studies and then may reconsult vascular clinic.

2/12/2010

Jeanne Leonie Hoffman
245 HIGH SCHOOL RD NW
UNIT 2
Bainbridge Island, WA 98110

Dear Ms. Hoffman,

We received a message from your pharmacy that they do not have Trental in stock. The UWMC pharmacy does have this medication is stock so I have directed your prescription there.

Additionally on review of your record I see that your last vascular studies were in about 2007. I would like to repeat the arterial duplex ultrasound study of her lower extremities to see if there is any evidence of atherosclerosis in the lower extremities. This will help us decide whether you need to continue on Trental.

Sincerely,

William E Neighbor, MD

Clinical Notes

Progress Notes

Neighbor Jr., William E at 2/3/2010 1614

Jeanne Leonie Hoffman is a 85 year old female here to discuss the following:

V58.61 AFTERCARE LONG TERM ANTICOAG USE
451.19 DEEP VENOUS PHLEBITIS-LEG NEC
Under last visit we decreased her Coumadin dose to 10 mg daily except a half tablet on 2 days of the week. There's been no change in her diet. She's been compliant with the regimen. She has not noticed any swelling or pain in her lower legs.

OBJECTIVE:
BP 134/76 | Pulse 89
General: healthy, alert, no distress
Lower extremities showed no evidence of new DVT.

02/03/2010 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

INR 1.8

ASSESSMENT AND PLAN:

V58.61 AFTERCARE LONG TERM ANTICOAG USE
451.19 DEEP VENOUS PHLEBITIS-LEG NEC
INR is not therapeutic. Will increase Coumadin to 10 mg one tablet daily except a half tablet on Sundays. This represents an increase of 5 mg per week. Repeat INR in 2 weeks.

Clinical Notes

Progress Notes

Neighbor Jr., William E at 1/26/2010 1232

Jeanne Leonie Hoffman is a 85 year old female here to discuss the following:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
V58.61 AFTERCARE LONG TERM ANTICOAG USE
Last clinic visit note reviewed . She is now taking Coumadin 10 mg daily except for a half tablet on 2 days of the week. She was previously taking Coumadin 10 mg daily but her INR was supratherapeutic.

OBJECTIVE:
BP 131/70 | Pulse 68 | Wt 130 lb (58.968 kg)
General: healthy, alert, no distress
INR 2.2

01/26/2010 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

ASSESSMENT AND PLAN:

451.19 DEEP VENOUS PHLEBITIS-LEG NEC (primary encounter diagnosis)
V58.61 AFTERCARE LONG TERM ANTICOAG USE
Her INR is in the therapeutic range. I would like her to return in 4-7 days for repeat INR to assure that remains there. If her INR dropped below 2.0 would increase her dose by half tablet.

Jeanne Leonie Hoffman is a 85 year old female here to discuss the following:

V58.61 AFTERCARE LONG TERM ANTICOAG USE
On stable dose of Coumadin 10 mg daily

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
No leg swelling or redness.

OBJECTIVE:
BP 130/70 | Pulse 76
General: healthy, alert, no distress

Orders Only on 01/19/10
PROTHROMBIN TIME (RAPID INR)

Component	Value	Range
• Prothrombin Time (Rapid INR)	3.7 (*)	0.8 - 1.3

ASSESSMENT AND PLAN:

V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR above desired range today. No bleeding. Her standard dose of coumadin is 10 mg once daily.

I would like her to take half tab of coumadin tonight, which is Tuesday.

Beginning tomorrow she is to begin the following regimen:
One tablet daily except a half tablet on Wednesday and Sundays.

Return next Wednesday for blood test.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
No recurrence

She may also return next week for therapeutic muscle injection for greater trocanter and gluteal tendenitis on left.

Jeanne Leonie Hoffman is a 84 year old female here to discuss the following:

719.45 JOINT PAIN-PELVIS (primary encounter diagnosis)
Two-week history of left hip pain located over the posterior lateral buttock. Does not recall any fall. Occasional radiation to the knee.

V58.61 AFTERCARE LONG TERM ANTICOAG USE
451.19 DEEP VENOUS PHLEBITIS-LEG NEC
And her INR today. Stable dose of Coumadin.

OBJECTIVE:
BP 154/82 | Pulse 77
General: healthy, alert, no distress
Extr: Left hip examination shows full range of motion including internal and external rotation without significant discomfort. On palpation she has tenderness over the gluteal muscles and the posterior lateral quadrant of the buttock. There is no tenderness over the ischial tuberosity or the greater trochanter area.

Office Visit on 12/29/09
XR PELVIS W 2 VIEW HIP

Component	Value	Range

- General Diagnostic Text
  Value: Examination: Pelvis, single view; left hip, single view

  Comparison: 6/5/09

  Clinical Indication: Left posterolateral pain

  Findings:

  As before, patient is status post fixation of an intertrochanteric femur fracture on the right with a dynamic hip screw. There is no evidence of hardware complication. There is moderate right hip osteoarthritis.

  There is moderate left hip osteoarthritis. However, no left hip fracture is identified.

  There is mild degeneration of both SI joints and the symphysis

12/29/2009 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

pubis. Bones are osteopenic. There is significant lumbar degeneration

INR 3.0

ASSESSMENT AND PLAN:

719.45 JOINT PAIN-PELVIS (primary encounter diagnosis)
X-ray showed no acute changes from x-rays obtained last June. Patient has chronic recurrent pain in this area. Likely gluteal bursitis. Educated about stretching and strengthening exercises. Offered injection today which patient declined. Take Tylenol for pain. Avoid nonsteroidal anti-inflammatory medications given she is on chronic Coumadin therapy. Followup as needed.

V58.61 AFTERCARE LONG TERM ANTICOAG USE
Continue same dose of Coumadin. Recheck INR in 2-4 weeks.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
No recurrence.

CHOLESTEROL (LDL)	Low: <130 mg/dL	76
NON-HDL CHOLESTEROL	0 - 159 mg/dL	111
CHOLESTEROL/HDL RATIO		3.1
LIPID PANEL, ADDITIONAL INFO.		. . .
PROTHROMBIN TIME (RAPID INR)	0.8 - 1.3	3.0 (H)
ALANINE AMINOTRANSFERASE (GPT)	6 - 40 U/L	26

12/29/2009 - Orders Only in UWMC Family Medicine (continued)

Letters (continued)

POTASSIUM	3.7 - 5.2 mEq/L	3.7
MAGNESIUM	1.8 - 2.4 mg/dL	2.0

Your labs are normal except for a mild elevation of triglycerides which is not a real concern given that your HDL and LDL cholesterol are very favorable.

Your INR is 3.0. Recheck this in 4 weeks. You have been on a stable dose of Warfarin (Coumadin).

Sincerely,

William E Neighbor, MD

12/16/2009 - Appointment in UWMC Family Medicine (continued)

Letters (continued)

Dear Ms. Hoffman,

It appears that you missed (or canceled with less than 24 hours notice) your scheduled appointment at the Family Medical Center on 12/16/09. We are concerned that you were not able to make it, and hope it was not something serious. Please call to reschedule your appointment with us if you still have medical concerns with which we can help.

Please write your appointment date and time on your calendar to help you remember them. You will receive an automated reminder phone call three days before an appointment.

If you are not able to keep your appointment, we ask that you call the clinic at least 24 hours before your appointment at 206-598-4055 to cancel or reschedule. If there are circumstances that make it difficult for you to keep your appointments, please discuss this with us at your next visit. Missed appointments impact our ability to provide health care to you, and also limit the availability of appointments for other patients.

If you think that you received this letter in error, please contact the clinic at 598-4055. We look forward to continuing to provide health care for you in the future.

Sincerely,

Family Medical Center

CONFIDENTIAL PATIENT INFORMATION- for addressee only.

12/7/2009

Jeanne Leonie Hoffman
245 HIGH SCHOOL RD NW
UNIT 2
Bainbridge Island, WA 98110

Dear Ms. Hoffman,

I refilled your medication today. On review of your record, I see that you are due for potassium, lipid panel and other labs. I have ordered this test through the lab and you may come in for it at any time. The lab hours are 8 to 5:30 on week days.

Sincerely,

William E Neighbor, MD

11/13/2009 - Office Visit in UWMC Family Medicine

Reason for Visit

Chief complaint: Anticoagulation
Visit diagnoses:

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled (primary)
- Long term (current) use of anticoagulants
- Other and unspecified hyperlipidemia
- Essential hypertension, benign

Jeanne Leonie Hoffman is a 84 year old female here to discuss the following:

250.00 DIABETES UNCOMPL ADULT-TYPE II (primary encounter diagnosis)
She is in to review her blood sugar testing

V58.61 AFTERCARE LONG TERM ANTICOAG USE
She continues on a stable dose of Coumadin and had an INR today

272.4 HYPERLIPIDEMIA NEC/NOS
She is due for a lipid panel. She is compliant with diet and statin
.
401.1 BENIGN HYPERTENSION
She does not check her blood pressures at home.

Patient Active Problem List

Diagnoses	Date Noted
SKIN SENSATION DISTURB [782.0]	**06/03/2008**

Priority: High
Overview Note:
6/3/2008 labs ordered. Return in one month for exm.

OSTEOPOROSIS NOS [733.00] **03/04/2008**
Priority: High
Overview Note:
T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continue for five years, then stop

AFTERCARE LONG TERM ANTICOAG USE [V58.61] **01/08/2008**

11/13/2009 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

Priority: High
Overview Note:
Reason for anticoagulation: Recurrent dvts
Duration of anticoagulation: life
INR goal: 2.-3

ADULT FAILURE TO THRIVE [783.7] **10/19/2007**
Priority: High
Overview Note:
Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait

TREMOR NEC [333.1] **08/17/2007**
Priority: High
Overview Note:
Noted by Melanie Parker. Consider Parkinson's disease med trial.

FX FEMUR INTRCAPS NOS-CLOSE [820.00] **05/01/2007**
Priority: High
Overview Note:
Pinned April 2007.
Post op hematocrit 25
Has walker with wheels for use outside of home. Uses cane in home.

VITAMIN B DEFICIENCY NOS [266.9] **05/01/2007**
Priority: High
Overview Note:
Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

DIABETES UNCOMPL ADULT-TYPE II [250.00] **03/27/2007**
Priority: High
Overview Note:
Year onset: Dx March 2007
Complications:
Last A1c: March 2007 7.1. Aug 2007 6.3; Nov 2007 7.1; March 2008 6.4 on metformin; 10/5/2009 6.4
Last Cr: Nov 2007 0.9
Last Urine Alb/Cr ratio: 3/3/2008 normal
Last foot exam: 2/5/2008 normal
Last monofilament test: 2/5/2008 slight decrease
Last eye exam: 2/5/2008 due
Last Lipid Panel: LDL 109 in March 22, 2007
Blood pressure: 2/5/2008 normal
Last EKG:
Glucometer review:
Nutrition consult: 2/5/2008 ordered

CONVULSIONS, OTHER [780.39] **11/20/2006**

11/13/2009 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

Priority: High
Overview Note:
Petit Mal since 1975
Carbamazepine level 7.6 on Feb 2007

ESOPHAGEAL REFLUX [530.81] **11/20/2006**
Priority: High

SENSORNEUR HEAR LOSS NOS [389.10] **11/20/2006**
Priority: High
Overview Note:
Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

DEEP VENOUS PHLEBITIS-LEG NEC [451.19] **11/20/2006**
Priority: High
Overview Note:
Recurrent DVT and phlebitis since 1982
Per Vascular Surgery note 5/9/2006: continue warfarin

UTERINE LEIOMYOMA NOS [218.9] **11/20/2006**
Priority: High
Overview Note:
S/P hysterectomy with BSO in 1991

HYPERLIPIDEMIA NEC/NOS [272.4] **11/20/2006**
Priority: High
Overview Note:
On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

CARPAL TUNNEL SYNDROME [354.0] **11/20/2006**
Priority: High
Overview Note:
Carpal tunnel release right wrist in 1989

CATARACT NOS [366.9] **11/20/2006**
Priority: High
Overview Note:
Extraction left eye in 1989

ALLERGIC RHINITIS NOS [477.9] **11/20/2006**
Priority: High

GENERAL OSTEOARTHROSIS [715.00] **11/20/2006**
Priority: High
Overview Note:
LS spine. Bilateral talonavicular arthritis since 1994.

BENIGN HYPERTENSION [401.1] **11/20/2006**
Priority: High

11/13/2009 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

DIAPHRAGMATIC HERNIA [553.3] **11/20/2006**
Priority: High
Overview Note:
CT of abdomen in 2006

GLAUCOMA NOS [365.9] **11/20/2006**
Priority: High

ROUTINE MEDICAL EXAM [V70.0] **11/20/2006**
Priority: High
Overview Note:
Td/Tdap (q 10 yr): 2006
Pneumococcal (65 yoa and high risk x1):
Blood pressure: Dx hypertension
Cholesterol: dx hyperlipidemia
Mammogram (q 1 yr begin at age 40-50 yrs): neg Jan 2006. March 2007 normal. May 2008 normal
Pap smear (q2-3 yrs to age 65)--82 years old
Colorectal cancer screening: Sig to 30 cm in May 2001. Previoiusly had refused studies. Heme cards given in 2005.
Tobacco: no
Alcohol: no
Drugs: no
Sexual practice/contraception: Not active
Advanced directives: yes
Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 . Advise Vit D 800 IU daily.

Current outpatient prescriptions

Medication	Sig
• PENTOXIL 400 MG OR TBCR	One tablet three times daily
• METFORMIN HCL 500 MG OR TABS	one tab twice daily for diabetes
• WARFARIN SODIUM 10 MG OR TABS	One tablet daily
• CARBAMAZEPINE 200 MG OR TABS	1 TABLET 3 TIMES DAILY
• LIPITOR 40 MG OR TABS	1 po QD
• FOSAMAX 70 MG OR TABS	Take on talbet once a week on Sunday. Remain upright for 30-60 minutes after taking
• TIMOLOL MALEATE 0.5 % (DAILY) OP SOLN	instill one drop into each eye twice daily
• HYDROCHLOROTHIAZIDE 25 MG OR TABS	Take 1/2 tablet by mouth every day
• RANITIDINE HCL 150 MG OR TABS	Take 1 tablet by mouth 2 times per day

REVIEW OF SYSTEMS:
Constitutional: Denies weight gain.
Respiratory: Denies cough, shortness of breath.
Cardiovascular: Denies chest pain, palpitations, syncope, orthopnea, paroxysmal noctural dyspnea, lower extremity edema.

OBJECTIVE:

11/13/2009 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

BP 132/69 | Pulse 68 | Wt 131 lb (59.421 kg)
General: healthy, alert, no distress, alert and oriented x 3
Chest clear
Compression stockings in place

INR 2.6

Labs: A1c in September was 6.4. Her potassium at that time was slightly low at 3.4.

ASSESSMENT AND PLAN:

250.00 DIABETES UNCOMPL ADULT-TYPE II (primary encounter diagnosis)
A1c reflux good control on diet And metformin. Her renal function in September was normal. She is due for urine for albumin creatinine ratio.

V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR in therapeutic range of 2.0-3.0. Stable dose of Coumadin. Recheck one month.

272.4 HYPERLIPIDEMIA NEC/NOS
Stable dose of statin. Due for lipid panel and SGPT.

401.1 BENIGN HYPERTENSION
Blood pressure well controlled based on blood pressure visit today. Advised blood pressures at local pharmacy as outpatient. Continue current medications. Last potassium in September was slightly low which will be rechecked. Prior potassiums have been normal. We'll check magnesium as well as she is on a diuretic.

CONFIDENTIAL PATIENT INFORMATION- for addressee only.

11/15/2009

11/13/2009 - Office Visit in UWMC Family Medicine (continued)

Letters (continued)

Jeanne Leonie Hoffman
245 HIGH SCHOOL RD NW
UNIT 2
Bainbridge Island, WA 98110

Dear Ms. Hoffman,

This letter is to inform you about the laboratory tests that were done at or since your last clinic visit.

Office Visit on 11/13/09
URINE SCREEN, MICROALBUMINURIA

Component	Value	Range
• CREATININE/UNIT, URINE	203	(mg/dL)
• ALBUMIN (MICRO)	2.50	(mg/dL)
• ALBUMIN/CREATININE RATIO	12.3	> <30 (mg/g Creat)

Your urine test for protein was normal. That is good news. See you next month. We can discuss your back pain then..

Sincerely,

William E Neighbor, MD

Letter by Neighbor Jr., William E on 10/2/2009

Status: Sent
Letter body:

10/2/2009

Jeanne Leonie Hoffman
245 High School Rd Nw
Unit 2
Bainbridge Island WA 98110

Dear Ms. Hoffman,

Thank you for enrolling in UW Neighborhood *e*Care. Please follow the instructions below to securely access your online medical record. UW Neighborhood *e*Care allows you to send messages to your care team, request prescription refills, request appointments, view your personal health information, and more.

How do I sign up?

1. Using your internet browser, go to: https://ecare.uwpn.org
2. Click on "**Complete your eCare registration here**" in the First Time Users box. You will be directed to the Sign Up page.
3. Enter your UW Neighborhood *e*Care Access code exactly as it appears below. You will not need to use this Access code again after you have completed the sign up process. If you do not complete the sign up process before the expiration date, you will need to request a new Access code.
   V767X-VRAXN
   Expires: 12/1/09 08:35 AM
4. Enter your Social Security Number and Date of Birth as indicated and click "**Next**". You will be directed to the next sign up page.
5. Create a UW Neighborhood *e*Care ID. This will be your login ID and, once assigned, it cannot be changed. Please choose one that is secure and easy to remember.
6. Create a UW Neighborhood *e*Care password. You can change your password at any time.
7. Enter your Password Reset Question and Answer. This can be used at a later time if you forget your password. Click **"Next"**
8. Enter your email address. You will receive email notification when new information is available in your UW Neighborhood *e*Care account.
9. Click **Sign In**.

Additional information

If you have questions, you can email kcnolan@u.washington.edu, or call 206.598.2533 to talk to the UW Neighborhood *e*Care customer service staff.

10/02/2009 - Letter (Out) in UWMC Family Medicine (continued)

Letters (continued)

Please remember that UW Neighborhood *e*Care is **NOT** to be used for urgent needs. For medical emergencies, dial 911.

Sincerely,

The UW Medicine Neighborhood Clinics Providers and Staff

Clinical - Scan on 5/10/2012 11:48 AM: 09/29/09 FMC eCare Access Agreement

Scan (below)

Family Medical Center at UWMC *eCare* Access Agreement

Thank you for your interest in *eCare* at the Family Medical Center at UWMC (FMC). We are pleased to offer this service to our **adult patients over the age of 18**.

If you have questions about completing this form, please ask the Patient Service Specialist at the FMC reception desk.

After we receive your completed access agreement form, you will receive your start-up information in the mail, including *eCare* access information, and the terms and conditions for use of *eCare*.

Adult patients must have a valid e-mail address and a primary care provider at FMC to participate in *eCare*.

Once enrolled in *eCare*, patients can use the secure internet site to:

- request appointments,
- send messages to their care team,
- request prescription refills, and
- view their personal health information.

Your Information (please print clearly):

Your name: Jean L A Hoffman

Previous names you have used: Neighbor

Last 4 digits of your social security number: _____ Date of birth: 1/6/25

Mailing address: 245 High School Rd, NW

City: Bainbridge Island State: WA Zip: 98110

Primary phone: 206 855-0815 Secondary phone: _____

FMC primary care provider: _____

Access to Protected Health Information

- I understand that I am requesting that this information be released for personal use only.
- I understand that *eCare* access includes access to information available from visits to the FMC.
- I understand that I may revoke this agreement by written request at any time.
- I understand that failure to comply with the terms and conditions of use for *eCare* may result in the termination of my access privileges.

Jean Hoffman

Documents (continued)

Family Medical Center at UWMC eCare User Agreement

This agreement sets forth responsibilities of users of eCare for patients. It requires you to abide by all terms and conditions set forth in this agreement.

About eCare: The Family Medical Center at UWMC (FMC) takes strong measures to provide a secure website to allow patients to access their own personal health information when available. Patients can access this information by logging in to **eCare** at **https://ecare.uwpn.org** with their username and a unique password. By using these enhanced online services offered by the FMC, you understand and agree that your personal health information will be transmitted via a secure channel over the Internet. You understand that you must follow the security responsibilities listed below to ensure that the security of your health information remains strong. You will only be allowed to use these enhanced services upon agreeing to the terms contained in this User Agreement.

Access to eCare: You may only access or attempt to access or view personal health information pertaining to yourself. Unauthorized access to the personal health information of anyone else, or disclosure of another's personal health information to any other person may be a violation of federal or state law, and grounds for immediate termination of your access to **eCare** as determined by the FMC in its sole discretion.

Your security responsibilities: You agree to take reasonable precautions to prevent the disclosure of your password. Do not share it with anyone else, even with someone who claims to represent the FMC. Avoid writing down your username and password or storing them near your computer. If you must commit them to writing, keep them in a secure location away from your computer.

We recommend that you change your password on a regular basis. If you suspect that someone else knows your user name or password, change your password immediately.

It is your responsibility, once you have accessed your personal health information, not to share that access, or any electronic or written versions of your personal health information, with unauthorized persons. This includes leaving your computer unattended while logged in to the website, and leaving printed or electronic copies in unsecured areas.

Terms of Use: You agree to read and comply with any additional terms and policies regarding the FMC's online services that the FMC may post on **eCare** from time to time. Links to these policies will be clearly displayed on the site.

The FMC may modify these access responsibilities, security responsibilities and terms of use at any time at its sole discretion. For your protection, the FMC may suspend, restrict or terminate your access to **eCare** at its sole discretion if there is reason to believe your **eCare** username and/or website password was used by an unauthorized third party for any purpose, and/or that information obtained through the use of your username and/or password has been misused. Additionally, you may terminate your access to **eCare** at any time.

Your signature below indicates your agreement to abide by the terms outlined in this FMC **eCare** agreement.

Dear Ms. Hoffman,

I refilled your medication (Metformin) today. On review of your record, I see that you are due for basic metabolic panel and A1c. I have ordered this test through the lab and you may come in for it at any time. The lab hours are 8 to 5:30 on week days.

Sincerely,

William E Neighbor, MD

Bainbridge Island, WA 98110

Dear Ms. Hoffman,

You left a copy of a letter from your prescription insurance suggesting that she might want to switch from Lipitor to a generic which would be less expensive. We would be happy to discuss this with you. Please call to schedule a visit with myself or a member of my team. He could schedule this on a day that you are due for your INR blood test.

Sincerely,

William E Neighbor, MD

Telephone Encounter

Nolan, Karen C at 8/20/2009 1630

08/20/2009 - Telephone in UWMC Family Medicine (continued)

Clinical Notes (continued)

Pt here with INR of 1.7. She is currently taking 10 mg QD and states that she missed a full dose two nights ago. Gentleman accompanying states that she takes her coumadin late at night and sometimes falls asleep before she takes her dose. Advised that she should try to take it earlier in the evening to avoid missed doses. Per Dr Neighbor, pt is to take an extra 1/2 tab tonight and have her INR rechecked in two weeks. Also patient is c/o legs falling asleep while walking, and that this has been going on for "a long long time". Advised making an appt to discuss, suggested that she could be put on the schedule in two weeks and have her INR checked at the same time.

Letter body:

CONFIDENTIAL PATIENT INFORMATION- for addressee only.

4/22/2009

JEANNE LEONIE HOFFMAN
245 HIGH SCHOOLRD NW UNIT 2
Bainbridge Island, WA 98110

Dear Ms. Hoffman,

Your INR is 2.2. The therapeutic goal is an INR of 2 to 3. I recommend the dose of Coumadin be unchanged. I recommend repeat INR test in one month.

Sincerely,

William E Neighbor, MD

Letters

Results by Neighbor, William E on 2/25/2009

Status: Sent
Letter body:

CONFIDENTIAL PATIENT INFORMATION- for addressee only.

2/25/2009

Jeanne Leonie Hoffman
245 HIGH SCHOOLRD NW UNIT 2
Bainbridge Island, WA 98110

Dear Ms. Hoffman,

This letter is to inform you about the laboratory tests that were done at or since your last clinic visit.

Orders Only on 02/25/2009
PROTHROMBIN TIME (RAPID INR)

Component	Value	Range
• Prothrombin Time (Rapid INR)	2.0 (*)	0.8-1.3

Your INR is 2.0. The therapeutic goal is an INR of 2-3. I recommend the dose of Coumadin be as you have been taking. I recommend repeat INR test in 1 month.

Sincerely,

William E Neighbor, MD

Telephone Encounter

Smith, Courtney at 12/30/2008 1600

Pharmacy is requesting refills on the attached, please advise.
Fax received 12/30/08
Thanks, Courtney Smith.

Electronically signed by Smith, Courtney at 12/30/2008 4:00 PM

Neighbor, William E at 12/30/2008 1627

Reviewed her record. Carbamazepine or Tegretol dose is correct.

Coumadin dose has been 10 mg once daily based on office visit Oct 15. Review of subsequent TEs does not show a change in dose. My letter to her in mid December regarding a low INR indicated she should take an extra one time half tablet but otherwise continue same dose. Therefore, I have refilled her prescription for 10 mg once daily. This assessment was recorded in a comment appended to the prescription sent to the pharmacy.

Letter body:

CONFIDENTIAL PATIENT INFORMATION- for addressee only.

12/8/2008

Jeanne Leonie Hoffman
245 HIGH SCHOOLRD NW UNIT 2
Bainbridge Island, WA 98110

Dear Ms. Hoffman,

This letter is to inform you about the laboratory tests that were done at or since your last clinic visit.

Orders Only on 12/02/2008
PROTHROMBIN TIME (RAPID INR)

Component	Value	Range
• Prothrombin Time (Rapid INR)	1.8 (*)	0.8-1.3

Your INR was below the therapeutic range. I advise taking an extra half dose of coumadin and rechecking in two weeks. I would like to see you aswe may need to make an adjustment in your standard dosing.

Sincerely,

12/02/2008 - Orders Only in UWMC FAMILY MED CENTER (continued)

Bui, Quynh Thanh at 9/2/2008 1235

.----------
Attending: Quynh T Bui, MD
I discussed this patient's history and physical findings with the resident, as well as the plan for this patient. I have reviewed and confirm the findings and plan as documented in the resident's note .
Key findings based upon this discussion: On coumadin for recurrent DVTs. INR 3.8 today. No new meds or change in diet. Will decrease coumadin to 10mg daily and 15 mg on Sunday. (decreased 5mg total/week - will take half dose tonight) F/u in one week

Electronically signed by Bui, Quynh Thanh at 9/2/2008 12:35 PM

Hills, Rachel Woodcock at 9/2/2008 1309

S:
1. F/u INR: INR today at 3.8. Pt has not changed any meds or eating habits. Is taking 10 mg coumadin daily except for Wednesday and Sunday when she takes 15 mg. Pt had stable dose of 10 mg daily until being low in clinic a few weeks ago. Dose eventually increased to 10 mg daily except three times per week when she was taking 15 mg. Dose then decreased to 15 mg twice per week as INR high at 3.7. Dose remained stable after last check with INR at 2.5. Pt denies any new bleeding

O:
Blood pressure 128/72, pulse 66.
Gen: NAD
Neuro: Walking slowly with cane, slow to rise

A/P:
1. INR: Goal 2-3. Elevated today. Pt will take 5 mg tonight which is a half dose to lower INR. Will then take 10 mg daily except Sunday where she will take 15 mg. This is an overall 5 mg decrease as she is decreasing her Wednesday 15 mg to 10 mg.

RTC- 1-2 weeks

Jeanne Leonie Hoffman is a 83 year old female here to discuss the following:

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)

Pt has been taking 10 mg daily of coumadin except Tuesday and Sunday when she takes 15 mg. Pt had been taking 10 mg daily until dose became subtherapeutic. Then dose increased to eventually 15 mg three times weekly and 10 mg all other days. Recently supratherapeutic and dose brought back down.

No problems with bleeding or calf pain. No change in diet or medications.

OBJECTIVE:

Blood pressure 110/66, pulse 61, weight 130 lb (58.968 kg).

Psych: healthy, alert, no distress

Neuro: Uses walker and slow from rising in chair

INR 2.5

ASSESSMENT AND PLAN:

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)

INR 2.5 today.

08/27/2008 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

To continue on 10 mg daily except 15 mg on Tuesday and Sunday. Given appropriate INR today, will see patient in 1-2 weeks (closer to 2 weeks).

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
For two weeks she has been taking coumadin 10 mg one daily except for one and a half on Sunday, Tuesday, and Friday. Before that she was taking one daily except one and a half on one day of the week but INR was subtherapeutic. Her long term dose which was stable for years was one tablet daily. No bleeding

OBJECTIVE:
BP 110/66 | Pulse 56 | Wt 130 lb (58.968 kg)
General: healthy, alert, no distress

INR 3.7

ASSESSMENT AND PLAN:

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
INR 3.7 today. For two weeks she has been taking coumadin 10 mg one daily except for one and a half on Sunday, Tuesday, and Friday. Before that she was taking one daily except one and a half on one day of the week but INR was subtherapeutic. Her long term dose which was stable for years was one tablet daily.

At this point because her INR is high I advise:
1. Take just one half tablet tonight to reduce INR
2. Then take one tablet daily except one and a half on Sunday and Wednesday.

08/20/2008 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

Recheck in one week rather than two.

Capoccia, Kam Lee at 8/5/2008 1124

Patient of Dr Nieghbors for INR evaluation

Even after increase one week ago her INR remains at 1.6. She denies missing a dose, dietary or activity changes. She reports a system to remember her meds. It sounds reliable based on her med list. She denies and symptoms of stroke or of bleeding.

O:.BP 120/60 | Pulse 72 INR 1.6

A: Subtherapeutic INR without etiology. Will increase by about 14% to bump into range of 2-3. Weekly dose increase from 75mg/week to 85mg/week.

P: Increase warfarin to 1.5 tablets on Sundays, Tuesdays, and Fridays with 1 tablet on all other days. She will return to see Dr Nieghbor on August 20th (appt already scheduled). We reviewed signs of bleeding. I completed a pink card for her that she took with her describing this new dose.

ANTICOAGULATION VISIT

Subjective:
1. Jeanne Leonie Hoffman presents to discuss her INR level today. She is on Coumadin 10 mg po q day. Which she reports taking regularly. She has not had any bleeding or bruising episodes. No falls recently. Has not changed her diet. Current Medication is Coumadin 10 mg every day.

2. Recently diagnosed with UTI at last visit. Given prescription of Nitrofurantoin. Took one days dose. Had increase in confusion, nausea, abdominal pain. Discontinued and symptoms resolved. She had complete resolution of UTI complaints. Including no dysuria, hematuria, abdominal or flank pain. Remained afebrile.

Objective:
BP 125/64 | Pulse 70
General: Talkative, well appearing female in no acute distress.

INR today is 1.7. Up from 1.1 two weeks ago

Assessment Plan:
Anticoagulation Management: Subtherapeutic on Coumadin therapy for chronic DVTs, venous stasis. With goal INR 2-3. Has had a difficult time regulating INR levels.
-- Increase Coumadin from 10 mg every day to 10 mg Su, M, Tu, Th, Fr, Sa and 10.5 mg on Wed.

UTI: UTI on UA at last visit. Took one day course of nitrofurantoin with complete resolution of symptoms. Discontinued medication secondary to confusion. Does not want UA or treatment with other medication today. Will return if symptoms resolve.

Follow up plans:
-- Appointment with Pharmacist on August 5 at 10 AM.
-- Recheck INR on August 5 before pharmacy appointment.
-- Consider patient for geriatric clinic.

07/21/2008 - Orders Only in UWMC FAMILY MED CENTER (continued)

Letters (continued)

FOLATE		-
• FOLATE	by Beckman DxI	-
• FOLATE	Sample checked before reporting.	-
• VITAMIN B12 (COBALAMIN)	244	180-914 (pg/mL)
• VITAMIN B12 (COBALAMIN)	Normal: 180-914 pg/mL	-
• VITAMIN B12 (COBALAMIN)	Indeterminate: 145-179 pg/mL	-
• VITAMIN B12 (COBALAMIN)	Deficient: <145 pg/mL	-
• VITAMIN B12 (COBALAMIN)		-
• VITAMIN B12 (COBALAMIN)	by Beckman DxI	-

We discussed your INR at your visit this week. You must be seen later this week or early next week for this.

Your basic metabolic panel is fine. The potassium and kidney tests are normal. Your A1c is 6.1 which is excellent.

Your Vitamin B12 and Folate levels are normal.

Sincerely,

William E Neighbor, MD

07/21/2008 - Office Visit in UWMC Family Medicine

Reason for Visit

Chief complaint: Follow-Up
Visit diagnoses:

- Long term (current) use of anticoagulants (primary)
- Dysuria

Start date: 1/2/2008 — End date: 1/13/2009
Quantity: 5ml — Refill: prn

HYDROCHLOROTHIAZIDE 25 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 12/11/2008
Reason for discontinuation: Reorder
Instructions: Take 1/2 tablet by mouth every day
Authorized by: Neighbor Jr., William E, MD — Ordered on: 1/4/2008
Start date: 1/2/2008 — End date: 12/11/2008
Quantity: 15 — Refill: 11

FOSAMAX 70 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 2/27/2009
Reason for discontinuation: Reorder
Instructions: Take on talbet once a week on Sunday. Remain upright for 30-60 minutes after taking
Authorized by: Neighbor Jr., William E, MD — Ordered on: 3/11/2008
Start date: 3/11/2008 — End date: 2/27/2009
Quantity: 4 — Refill: 12

COUMADIN 10 MG OR TABS

Discontinued by: Nolan, Karen C — Discontinued on: 8/5/2008
Instructions: Take 10 mg every day
Authorized by: Neighbor Jr., William E, MD — Ordered on: 4/29/2008
Start date: 4/29/2008 — End date: 8/5/2008
Quantity: 30 — Refill: 3

METFORMIN HCL 500 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 10/7/2008
Reason for discontinuation: Reorder
Instructions: one tab twice daily for diabetes
Authorized by: Neighbor Jr., William E, MD — Ordered on: 6/4/2008
Start date: 6/4/2008 — End date: 10/6/2008
Quantity: 60 — Refill: 3

PENTOXIL 400 MG OR TBCR

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 2/17/2009
Reason for discontinuation: Reorder
Instructions: One tablet three times daily
Authorized by: Neighbor Jr., William E, MD — Ordered on: 6/23/2008
Start date: 6/23/2008 — End date: 2/17/2009
Quantity: 90 — Refill: 5

TEGRETOL 200 MG OR TABS

Discontinued by: Ellsworth, Allan J, PharmD — Discontinued on: 6/5/2009
Instructions: take one tablet po three times daily
Authorized by: Neighbor Jr., William E, MD — Ordered on: 6/23/2008
Start date: 6/23/2008 — End date: 6/5/2009

Jeanne Leonie Hoffman is a 83 year old female here to discuss the following:

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
Compliant with med. IN for INR today. No bleeding. She has had minor discomfort right lower leg laterally. No engorgement of veins. Wearing compression stockings.

REVIEW OF SYSTEMS:
Compalints of few day his of dysuria and frequency without fever or chills. Increased fluid intake.

OBJECTIVE:
BP 122/82 | Pulse 78 | Wt 134 lb (60.782 kg)
General: healthy, alert, no distress
Right lower leg shows no discoloration or pain on palpation or vein encouragement.

ASSESSMENT AND PLAN:

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
INR today 1.1. She denies change in meds, diet, and confirms compliance with Coumadin 10 mg once daily. I am having her seen our clinical pharmacist this week with all her med bottles and pills to review. There have not been any changes in her diet that I can surmise.

Addendum.. No appt with pharm until Aug 5. She is to have INR done again later this week.

788.1 DYSURIA

07/21/2008 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

Dysuria for the last week. Increased frequency. Will check UA today to confrim UTI before treating with antibiotics given that we do not want to cause further problems with her anticoagulation if not needed.

Addendum: UA c/w with UTI. Treated with macrodantin 50 mg 4 x daily for 3 days.

Neighbor, William E at 6/3/2008 1156

Jeanne Leonie Hoffman is a 83 year old female here to discuss the following:

V58.61 AFTERCARE LONG TERM ANTICOAG USE
Current dose:

Warfarin tablet size: 10

Number of tablets on each day of the week:

Sunday: 1

Monday: 1

Tuesday: 1

Wednesday: One and a half

Thursday: 1

Friday: 1

Saturday: 1

250.00 DIABETES UNCOMPL ADULT-TYPE II
Compliant with diet and med.

389.10 SENSORNEUR HEAR LOSS NOS
Has noted decrease in hearing in both ears. She has bilateral hearing aids.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
Wears compressoin stockings. No exacerbatoins.

782.0 SKIN SENSATION DISTURB
She reports today that she has decreased sensation in both legs intermitently for several months. Denies back pain.

REVIEW OF SYSTEMS:
Constitutional: Denies weight gain.
Respiratory: Denies cough, shortness of breath.
Cardiovascular: Denies chest pain, palpitations, syncope, orthopnea, paroxysmal noctural dyspnea, lower extremity edema.

OBJECTIVE:
BP 122/60 | Pulse 68 | Wt 132 lbs (59.875 kg)
General: healthy, alert, no distress
Weight: Down by 10 lbs over last year with gradual decline in weight
ENT: TM clear bilaterally with some scaring.

06/03/2008 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

Chest: Clear without rales or wheezes.
COR: HR regular. No murmur, gallop or rub. No JVD.
Extr: No edema.

INR today 2.0

ASSESSMENT AND PLAN:

V58.61 AFTERCARE LONG TERM ANTICOAG USE
Dose changed at last visit to Coumadin 10 mg once daily except 15 mg on Wednesday. INR today is 2.0. Recheck in one month.

250.00 DIABETES UNCOMPL ADULT-TYPE II
Due for A1c and blood sugar testing in one month at next blood test.

389.10 SENSORNEUR HEAR LOSS NOS
Worsening hearing with normal ear exam. She has bilateral hearing aids. Advise follow up with audiologist.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
Stable. Continues to use stockings.

782.0 SKIN SENSATION DISTURB
Complains of decreased sensation in legs. Had TSH earlier this year. Does have diabetes. Will check Vit B12 level and see her in one month for further exam.

Recheck weight at next visit as well.

Patient Instructions

ASSESSMENT AND PLAN:

V58.61 AFTERCARE LONG TERM ANTICOAG USE
Dose changed at last visit to Coumadin 10 mg once daily except 15 mg on Wednesday. INR today is 2.0. Recheck in one month.

250.00 DIABETES UNCOMPL ADULT-TYPE II
Due for A1c and blood sugar testing in one month at next blood test.

389.10 SENSORNEUR HEAR LOSS NOS
Worsening hearing with normal ear exam. She has bilateral hearing aids. Advise follow up with audiologist.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
Stable. Continues to use stockings.

782.0 SKIN SENSATION DISTURB
Complains of decreased sensation in legs. Had TSH earlier this year. Does have diabetes. Will check Vit B12 level and see her in one month for further exam.

Created: Tue Jun 3, 2008 9:24 AM
Regarding: compression stockings
Contact: 206-842-7621

Nancy,Helpline House,regarding compression stockings.

Electronically signed by Gamboa, Elizabeth L at 6/3/2008 9:40 AM

Gamboa, Elizabeth L at 6/3/2008 0956

Nancy is an MSW at this social services agancy. She is trying to figure out how to fill a prescription for compression stockings that Jeanne was given by Dr. Clowes last October.

There is a place in Bremerton that can fit her and Nancy can help arrange transport. That soundslike the best option.

Neighbor, William E at 5/20/2008 1325

Problem: Anticoagulation visit

Reason for anticoagulation: Recurrent thrombophlebitis
INR goal: 2-3

Warfarin tablet size: 10 mg

Number of tablets on each day of the week:

Sunday: 1

Monday: 1

Tuesday: 1

Wednesday: 1

Thursday: 1

Friday: 1

Saturday: 1

Which was prescribed at her last visit, but she is actually continuing to take Coumadin 10 mg daily except a half tablet one one day of the week. At her last visit our instruction had been to boost her dose that evening by 5 mg and then begin the regimen listed above. She did take the extra dose but did not make a change in her regular regimen.
Missed doses in the past week: none

Recent changes in other medications including non-prescription medicines, vitamins (particularly, Vit. K), herbals: no

Tobacco use: no
Change in alcohol or toabcco use since last visit: no
Change in diet since last visit (vegetables, oils, herbal and green tea): no
Symptoms of stroke: no
Symptoms of blood clot: Yes, she thinks she ahs had some phlebitis in her legs but none right now
Bleeding or unusual bruising: no

Refill of Coumadin (wafarin) needed: no

INR today: 1.7

Assessment and Plan:
Anticoagulation inadequate

Recommended change in Warfarin dose: yes
Warfarin tablet size: 10
Number of tablets on each day of the week:

05/20/2008 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

Sunday: 1
Monday: 1
Tuesday: 1
Wednesday: One and a half
Thursday: 1
Friday: 1
Saturday: 1

She is also to take an extra half tablet this evening.

Next blood test and anti-coagulation visit: 7-10 days
The blood test should be done prior to the visit. The visit should be scheduled.

Letter body:

CONFIDENTIAL PATIENT INFORMATION- for addressee only.

4/29/2008

Jeanne Leonie Hoffman
245 HIGH SCHOOL RD NW
UNIT 2
Bainbridge Island, WA 98110

Dear Ms. Hoffman,

This letter is to inform you about the laboratory tests that were done at or since your last clinic visit.

Orders Only on 04/29/2008

PROTHROMBIN TIME (RAPID INR)

Component	Value	Range
• Prothrombin Time (Rapid INR)	1.4 (*)	0.8-1.3

HEMOGLOBIN A1C, RAPID

Component	Value	Range
• Hemoglobin A1C, Rapid	6.2 (*)	4.0-6.0 (%)
• Hemoglobin A1C, Rapid		-
Value:	Due to a significant change from previous results, the assay was repeated for quality assurance purposes.	

BASIC METABOLIC PANEL

Component	Value	Range
• SODIUM	142	136-145 (mEq/L)
• POTASSIUM	3.9	3.7-5.2 (mEq/L)
• CHLORIDE	108	98-108 (mEq/L)
• CARBON DIOXIDE	31	22-32 (mEq/L)
• ION GAP	3 (*)	5-15
• GLUCOSE	118	62-125 (mg/dL)
• UREA NITROGEN	18	8-21 (mg/dL)
• CREATININE	0.8	0.3-1.2 (mg/dL)
• CALCIUM	9.5	8.9-10.2 (mg/dL)
• GFR, Calc, European American	>60	>59- (mL/min)
• GFR, Calc, African American	>60	>59- (mL/min)
• GFR, Information		-
Value:	Calculated GFR in mL/min/1.73 m2 by MDRD equation. Fairly accurate in outpatients in chronic kidney disease. May underestimate in others. Inaccurate with changing renal function. See http://depts.washington.edu/labweb/test/bclim/cGFR.html	

Your blood sugars look well controlled. You should continue the metformin at your current dose of one tablet twice daily.

04/29/2008 - Orders Only in UWMC FAMILY MED CENTER (continued)

Letters (continued)

We reviewed your subtherapeutic INR and made recommendations for changing your coumadin dose at your visit this morning.

Sincerely,

William E Neighbor, MD

04/29/2008 - Office Visit in UWMC Family Medicine

Reason for Visit

Chief complaint: Follow-Up
Visit diagnoses:

- Long term (current) use of anticoagulants (primary)
- Phlebitis and thrombophlebitis of other deep vessels of lower extremities

Active at the End of Visit

RANITIDINE HCL 150 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 10/21/2008
Reason for discontinuation: Reorder
Instructions: Take 1 tablet by mouth 2 times per day
Authorized by: Neighbor Jr., William E, MD — Ordered on: 12/4/2006
Start date: 12/1/2006 — End date: 10/21/2008
Quantity: 60 — Refill: 12

DITROPAN XL 5 MG OR TB24

Discontinued by: Ellsworth, Allan J, PharmD — Discontinued on: 6/5/2009
Instructions: One by mouth daily
Authorized by: Neighbor Jr., William E, MD — Ordered on: 10/16/2007
Start date: 10/16/2007 — End date: 6/5/2009
Quantity: 30 — Refill: 3

PREMARIN 0.625 MG/GM VA CREA

Discontinued by: Ellsworth, Allan J, PharmD — Discontinued on: 6/5/2009
Instructions: apply to vaginal area daily for one week then just on Monday, Wednesday, and Friday
Authorized by: Neighbor Jr., William E, MD — Ordered on: 10/16/2007
Start date: 10/16/2007 — End date: 6/5/2009
Quantity: 42.5gm — Refill: 3

MACRODANTIN 100 MG OR CAPS

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 7/21/2008
Instructions: 1 CAPSULE EVERY 6 HOURS WITH FOOD
Authorized by: Neighbor Jr., William E, MD — Ordered on: 10/18/2007
Start date: 10/18/2007 — End date: 7/21/2008
Quantity: 40 — Refill: 0

LIPITOR 40 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 3/23/2009
Reason for discontinuation: Reorder

04/29/2008 - Office Visit in UWMC Family Medicine (continued)

Medication List (continued)

Instructions: 1 po QD
Authorized by: Neighbor Jr., William E, MD — Ordered on: 12/20/2007
Start date: 12/20/2007 — End date: 3/23/2009
Quantity: 90 — Refill: 3

PENTOXIL 400 MG OR TBCR

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 6/23/2008
Reason for discontinuation: Reorder
Instructions: 1 po TID
Authorized by: Neighbor Jr., William E, MD — Ordered on: 12/20/2007
Start date: 12/20/2007 — End date: 6/23/2008
Quantity: 90 — Refill: 5

TEGRETOL 200 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 6/23/2008
Reason for discontinuation: Reorder
Instructions: take one tablet po three times daily
Authorized by: Neighbor Jr., William E, MD — Ordered on: 12/21/2007
Start date: 12/20/2007 — End date: 6/23/2008
Quantity: 90 — Refill: 5

TIMOLOL MALEATE 0.5 % (DAILY) OP SOLN

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 1/13/2009
Reason for discontinuation: Reorder
Instructions: instill one drop into each eye twice daily
Authorized by: Neighbor Jr., William E, MD — Ordered on: 1/4/2008
Start date: 1/2/2008 — End date: 1/13/2009
Quantity: 5ml — Refill: prn

HYDROCHLOROTHIAZIDE 25 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 12/11/2008
Reason for discontinuation: Reorder
Instructions: Take 1/2 tablet by mouth every day
Authorized by: Neighbor Jr., William E, MD — Ordered on: 1/4/2008
Start date: 1/2/2008 — End date: 12/11/2008
Quantity: 15 — Refill: 11

METFORMIN HCL 500 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 6/4/2008
Reason for discontinuation: Reorder
Instructions: one half tab twice daily for one week then one tab twice daily for diabetes
Authorized by: Neighbor Jr., William E, MD — Ordered on: 2/5/2008
Start date: 2/5/2008 — End date: 6/4/2008
Quantity: 60 — Refill: 3

FOSAMAX 70 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 2/27/2009
Reason for discontinuation: Reorder
Instructions: Take on talbet once a week on Sunday. Remain upright for 30-60 minutes after taking
Authorized by: Neighbor Jr., William E, MD — Ordered on: 3/11/2008
Start date: 3/11/2008 — End date: 2/27/2009
Quantity: 4 — Refill: 12

COUMADIN 10 MG OR TABS

Discontinued by: Nolan, Karen C — Discontinued on: 8/5/2008
Instructions: Take 10 mg every day
Authorized by: Neighbor Jr., William E, MD — Ordered on: 4/29/2008
Start date: 4/29/2008 — End date: 8/5/2008
Quantity: 30 — Refill: 3

Clinical Notes

Progress Notes

Arnett, Kevin H at 4/29/2008 1053

FOB BASIC SERVICES
Patient checked in: YES
Vitals: YES
Medications reviewed: YES

FU visit and/or single test scheduled: NO
Room Use in Excess of 25 Minutes: no
Room Use Additional 25 Minutes : no
Chaperoning (other than procedures): no

Total number of YES responses: 3
Completed by: Kevin H Arnett

Electronically signed by Arnett, Kevin H at 4/29/2008 10:53 AM

Neighbor, William E at 4/29/2008 1132

Problem: Anticoagulation visit

Reason for anticoagulation: Recurrent phlebitis and DVT
INR goal: 2-3

Coumadin 10 mg one daily except one half on Saturday.

Missed doses in the past week: no

Recent changes in other medications including non-prescription medicines, vitamins (particularly, Vit. K), herbals: no

Tobacco use: no
Change in alcohol or toabcco use since last visit: no
Change in diet since last visit (vegetables, oils, herbal and green tea): She reports that as she gets some food from food bank, she eats what is available. Consequently, she sometimes has green leafy vegetables and sometimes nuts and other times not.
Symptoms of stroke: no
Symptoms of blood clot: no
Bleeding or unusual bruising: no

04/29/2008 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

Refill of Coumadin (wafarin) needed: no

INR today: 1.4

Assessment and Plan:
Anticoagulation inadequate. Prior values have been in low 2.0 range.

Recommended change in Warfarin dose: yes
Warfarin tablet size: 10 mg
Number of tablets on each day of the week:
Sunday: 1
Monday: 1
Tuesday: 1
Wednesday: 1
Thursday: 1
Friday: 1
Saturday: 1

Additionally take 15 mg tonight only in order to boost your coumadin level up.

Next blood test and anti-coagulation visit: 10 days
The blood test should be done prior to the visit. The visit should be scheduled.

• Occult Bld 3 Collect time, STL	Information not provided	-
• Occult Bld 3 Result, STL	Negative	NEG-

LIPID PANEL

Component	Value	Range
• CHOLESTEROL (TOTAL)	198	<200- (mg/dL)
• TRIGLYCERIDE	234 (*)	<150- (mg/dL)
• CHOLESTEROL (HDL)	62	>40- (mg/dL)
• CHOLESTEROL (LDL)	89	<130- (mg/dL)
• CHOLESTEROL/HDL RATIO	3.2	-
• Patient Fasting Status (Y/NO)	Yes	-

VITAMIN D (25 HYDROXY)

Component	Value	Range
• Vitamin D2 (25_Hydroxy)	<1.0	- (ng/mL)

03/27/2008 - Orders Only in UWMC FAMILY MED CENTER (continued)

Letters (continued)

- Vitamin D3 (25_Hydroxy) 20.5 - (ng/mL)
- Vit D (25_Hydroxy) Total, Calc 20.5 15.1-50.0 (ng/mL)
- Vit D (25_Hydroxy) Total, Calc -
  Value: Elevated: >50.0 ng/mL. Deficient: 8.0 -15.0 ng/mL.
  Severe deficiency: < 8.0 ng/mL
- Vit D (25_Hydroxy) Total, Calc -
- Vit D (25_Hydroxy) Total, Calc -
  Value: This test was developed and its performance characteristics determined by UW Medicine, Department of Laboratory Medicine. It has not been cleared or approved by the U.S. Food and Drug Administration.

Your INR is in the therapeutic range.

Your lipids are in the target range.

Your Vitamin D level while in the normal range should be greater than 30 for the D2 component. I advise taking Vitamin D 800 IU daily along with your calcium.

Sincerely,

William E Neighbor, MD

Neighbor, William E at 3/27/2008 1137

Jeanne Leonie Hoffman is a 83 year old female here to discuss the following:

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
Compliant with coumadin 10 mg daily except one half tab on Saturday. No bleeding. She has not yet gotten a refill on her elastic stockings, but will do so.

733.00 OSTEOPOROSIS NOS
At last visit started Fosamax weekly which she is taking and remaining upright for at least 30 minutes after taking.

250.00 DIABETES UNCOMPL ADULT-TYPE II
Tolerating metformin twice daily.

REVIEW OF SYSTEMS:
Constitutional: Denies weight gain.
Respiratory: Denies cough, shortness of breath.
Cardiovascular: Denies chest pain, palpitations, syncope, orthopnea, paroxysmal noctural dyspnea, lower extremity edema.

OBJECTIVE:
BP 116/67 | Pulse 73 | Wt 132 lbs (59.875 kg)
General: healthy, alert, no distress
Weight: without significant change.
Chest: Clear without rales or wheezes.
COR: HR regular. No murmur, gallop or rub. No JVD.
Extr: No edema. Chronic venous stasis changes in lower legs.

Labs reviewed.

ASSESSMENT AND PLAN:

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
INR 2.2 today. She should continue current anticoagulation which is coumadin 10 mg daily except one half tab on Saturday and recheck in one month.

733.00 OSTEOPOROSIS NOS
She is taking fosamax once weekly and tolerating. Reminded to stay upright for at least 30 minutes after taking.

250.00 DIABETES UNCOMPL ADULT-TYPE II
She is compliant with metformin 500 mg twice daily. Last A1c 6.3-6.4. Recheck with blood sugar and kidney tests in 3 months.

03/27/2008 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

Next visit one month for anticoagulation.

Patient Instructions

ASSESSMENT AND PLAN:

03/27/2008 - Office Visit in UWMC Family Medicine (continued)

Patient Instructions (continued)

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
INR 2.2 today. She should continue current anticoagulation which is coumadin 10 mg daily except one half tab on Saturday and recheck in one month.

733.00 OSTEOPOROSIS NOS
She is taking fosamax once weekly and tolerating. Reminded to stay upright for at least 30 minutes after taking.

250.00 DIABETES UNCOMPL ADULT-TYPE II
She is compliant with metformin 500 mg twice daily. Last A1c 6.3-6.4. Recheck with blood sugar and kidney tests in 3 months.

Next visit one month for anticoagulation.

Results by Neighbor, William E on 3/12/2008

Status: Sent
Letter body:

CONFIDENTIAL PATIENT INFORMATION- for addressee only.

3/12/2008

Jeanne Leonie Hoffman
245 HIGH SCHOOL RD NW
UNIT 2
Bainbridge Island, WA 98110

Dear Ms. Hoffman,

This letter is to inform you about the laboratory tests that were done at or since your last clinic visit.

Orders Only on 03/11/2008

PROTHROMBIN TIME (RAPID INR)

Component	Value	Range
• Prothrombin Time (Rapid INR)	1.6 (*)	0.8-1.3

THYROID STIMULATING HORMONE

Component	Value	Range
• THYROID STIMULATING HORMONE	1.821	0.400-5.00 (uIU/mL)

CBC (HEMOGRAM)

Component	Value	Range
• WBC	7.27	4.3-10.0 (THOU/uL)
• RBC	4.16	3.80-5.00 (mil/uL)
• HEMOGLOBIN	13.5	11.5-15.5 (g/dL)
• HEMATOCRIT	40	36-45 (%)
• MCV	96	81-98 (fL)
• MCH	32.3	27.3-33.6 (pg)
• MCHC	33.8	32.3-35.7 (g/dL)
• PLATELET COUNT	275	150-400 (THOU/uL)

HEMOGLOBIN A1C, HPLC

Component	Value	Range
• Hemoglobin A1C, HPLC	6.4 (*)	4.0-6.0 (%)

Your INR is below the therapeutic range as we discussed at your visit yesterday. I advise a change in your coumadin dose at that visit.

In evaluation of your complaint of tiredness, we tests your thyroid and for anemia. These tests were normal.

In terms of your diabetes, your blood sugar test, the A1c, shows good control by diet and metformin. I will see you in one month.

Sincerely,

03/11/2008 - Orders Only in UWMC FAMILY MED CENTER (continued)

Letters (continued)

William E Neighbor, MD

03/11/2008 - Office Visit in UWMC Family Medicine

Jeanne Leonie Hoffman is a 83 year old female here to discuss the following:

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
Compliant with meds. IN for INR review.

733.00 OSTEOPOROSIS NOS
Her spine x ray showed osteoprosis with compression fractures. She reports she has some pressure over her back but no real pain. This is not too bothersome to her.

250.00 DIABETES UNCOMPL ADULT-TYPE II
She reports compliance with diet.

272.4 HYPERLIPIDEMIA NEC/NOS
Reports complaince with diet.

401.1 BENIGN HYPERTENSION
No recent blood pressures at home.

Patient Active Problem List

Diagnoses	Date Noted

03/11/2008 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

- OSTEOPOROSIS NOS [733.00] 03/04/2008
  Priority: High
  T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Patient written. Vit D level ordered.
- AFTERCARE LONG TERM ANTICOAG USE [V58.61] 01/08/2008
  Priority: High
  Reason for anticoagulation: Recurrent dvts
  Duration of anticoagulation: life
  INR goal: 2.-3
- ADULT FAILURE TO THRIVE [783.7] 10/19/2007
  Priority: High
  Lives in subsidized housing on Bainbridge
  Bremerton APS at 1-888-833-4925
  Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
  Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
- TREMOR NEC [333.1] 08/17/2007
  Priority: High
  Noted by Melanie Parker. Consider Parkinson's disease med trial.
- FX FEMUR INTRCAPS NOS-CLOSE [820.00] 05/01/2007
  Priority: High
  Pinned April 2007.

REVIEW OF SYSTEMS:
Constitutional: Denies weight gain.
Respiratory: Denies cough, shortness of breath.

03/11/2008 - Office Visit in UWMC Family Medicine (continued)

Clinical Notes (continued)

Cardiovascular: Denies chest pain, palpitations, syncope, orthopnea, paroxysmal noctural dyspnea, lower extremity edema. Wears compression stockings.

OBJECTIVE:
BP 114/64 | Pulse 70 | Wt 129 lbs 11.2 oz (58.832 kg)
General: healthy, alert, no distress
Weight: without significant change.
Chest: Clear without rales or wheezes.
COR: HR regular. No murmur, gallop or rub.
Extr: No edema.

ASSESSMENT AND PLAN:

733.00 OSTEOPOROSIS NOS
Osteoporosis with compression fractures causing mild discomfort. She is taking Calcium 1500 mg dialy and vitamin D 400-800 mg daily. She agreed today to add Fosamax 70 mg once weekly on Sundays. She understand she is to remain upright after taking.

V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR today 1.4. She reports complaince with regimen at last visit which was coumadin 10 mg once daily except one half on two days of the week. We will now change that to 10 mg daily except one hafl on just one day of the week that being Saturday.

250.00 DIABETES UNCOMPL ADULT-TYPE II
A1 c pending

272.4 HYPERLIPIDEMIA NEC/NOS
Lipid panel pending

401.1 BENIGN HYPERTENSION
Blood pressure well controlled.

I ordered hemoccults for her at last visit but she did not get cards or does not remember getting them. Nurse will reissue cards today. I had also orderd compresion sockings as she needs new prescription and I printed that prescription out for her again today.

Next visit in 7-10 days.

Status: Sent
Letter body:

CONFIDENTIAL PATIENT INFORMATION- for addressee only.

3/4/2008

Jeanne Leonie Hoffman
245 HIGH SCHOOL RD NW
UNIT 2
Bainbridge Island, WA 98110

Dear Ms. Hoffman,

The result of your Thoracic spine xray test for evaluation of back pain showed decreased bone calcium and wedging of thoracic vertebra consistent with decreased bone calcium. I recommend we check your vitamin D level. Your next office visit should be as discussed at your last visit.

So, when you have your next INR test, I have ordered a Vitamin D level to be done at that time. Be sure to remind them to do it as well. We may need to use a higher dose of vitamin D than we have been doing or consider addition of Fosamax though I think you have declined that in the past.

Instructions for prevention of further bone density loss:

Osteoporosis prevention. The average diet without milk product contains about 500 mg of calcium. The goal is at least 1500 mg of calcium. Each serving of a milk product contains about 300 mg. That is contained in glass of milk, a cup of yoghurt or ice cream, kefir, enough cheese to cover a piece of bread. Taking three servings of a milk product gives you about 1000 mg of added calcium. That in addition to he 500 mg in the regular diet totals to the needed 1500 mg. If one does not take adequate milk products the difference can be made up by taking calcium tablets.

In addition, one needs adequate Vitamin D. That can be obtained by exposure of the face, neck , and arms to sunlight for 15 minutes daily. In the winter months in the northern climes, we often do not get adequate exposure. Therefore, supplementing with Vitamin D 400-800 IU daily is helpful.

Sincerely,

William E Neighbor, MD

Jeanne Leonie Hoffman is a 83 year old female here to discuss the following:

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
In for INR review. Reports compliance with warfarin and no change in diet.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
She lost prescription for compression stockings issues by vascular clniic and needs this rewritten.

250.00 DIABETES UNCOMPL ADULT-TYPE II
She started Metformin 2 weeks ago and is tolerating it well. She has not yet scheduled appointment with nutritionist and admits to eating lots of sweats though she is trying to improve.

300.5 NEURASTHENIA
She reports she feels tired all the time but thinks this has been going on for at least a year and probably longer. Believes it is her age.

724.5 BACKACHE NOS
She has had 6 months of right mid back pain which she has not mentioned before. No hx of injury of fall. No radiation to leg.

REVIEW OF SYSTEMS:
Constitutional: Denies weight gain.
Respiratory: Denies cough, shortness of breath.
Cardiovascular: Denies chest pain, palpitations, syncope, orthopnea, paroxysmal noctural dyspnea, lower extremity edema.

OBJECTIVE:
BP 118/68 | Pulse 74 | Wt 137 lbs (62.143 kg)
General: healthy, alert, no distress
Weight: without significant change.
Chest: Clear without rales or wheezes.
COR: HR regular. No murmur, gallop or rub. No JVD.
Extr: No edema.
Back: Tender of right paraspinal muscles on ribs at T10-11 area. No deformity or assymetry.

INR: 1.2

ASSESSMENT AND PLAN:

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)

02/25/2008 - Office Visit in UWMC FAMILY MED CENTER (continued)

Clinical Notes (continued)

INR 1.2 today subtherapeutic. She has not missed any doses. May be related to starting metformin for diabetes. New schedule will be Coumadin 10 mg tablets

SUNDAY	1 tablets
MONDAY	1 tablets
TUESDAY	One half tablets
WEDNESDAY	1 tablets
THURSDAY	1 tablets
FRIDAY	1 tablets
SATURDAY	One half tablets

Your next blood test for Protime INR should be in 1 weeks.

451.19 DEEP VENOUS PHLEBITIS-LEG
She lost the prescription given by vascular clinic for BK compression stockings 40 mmHg. New prescription issued.

250.00 DIABETES UNCOMPL ADULT-TYPE II
She has not yet seen nutritionist or eye clinic. Eye referral submited. She should see nutritionist. She has been taking metformin and tolerating it well twice daily. Due for hemoglobin A1c test in one month. She is due for urine for albumin.

300.5 NEURASTHENIA
Fatigue which she believes is related to age and is persent for 6-12 months. Her TSH was normal a year ago. Will repeat TSH and CBC and then follow up. Her health maintenance is up to date except that she is due for stool for hidden blood testing. Hemoccult kit given.

724.5 BACKACHE NOS
6 month hx of right sided mid back pain located for lower ribs on right back. Will obtain X ray of T spine and posterior ribs. Also given located near kidney area, check UA. See me to review resutls in 1-2 weeks when due for next INR blood test.

In sum:
Urine test today.
Stool test kit for hidden blood given today.
Schedule nutrition appouintment at our front desk.
Call eye clinic for appointment if you have not heard from them within a week.
Increase the dose of coumadin as noted above.
Repeat test for blood thinning in one week and see me or someone in the clinic.
Tests for diabetes due in 1 month.

Patient Instructions

ASSESSMENT AND PLAN:

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
INR 1.2 today subtherapeutic. She has not missed any doses. May be related to starting metformin for diabetes. New schedule will be Coumadin 10 mg tablets

SUNDAY	1 tablets
MONDAY	1 tablets
TUESDAY	One half tablets
WEDNESDAY	1 tablets
THURSDAY	1 tablets
FRIDAY	1 tablets
SATURDAY	One half tablets

Your next blood test for Protime INR should be in 1 weeks.

451.19 DEEP VENOUS PHLEBITIS-LEG
She lost the prescription given by vascular clinic for BK compression stockings 40 mmHg. New prescription issued.

250.00 DIABETES UNCOMPL ADULT-TYPE II
She has not yet seen nutritionist or eye clinic. Eye referral submited. She should see nutritionist. She has been taking metformin and tolerating it well twice daily. Due for hemoglobin A1c test in one month. She is due for urine for albumin.

300.5 NEURASTHENIA
Fatigue which she believes is related to age and is persent for 6-12 months. Her TSH was normal a year ago. Will repeat TSH and CBC and then follow up. Her health maintenance is up to date except that she is due for stool for hidden blood testing. Hemoccult kit given.

724.5 BACKACHE NOS
6 month hx of right sided mid back pain located for lower ribs on right back. Will obtain X ray of T spine and posterior ribs. Also given located near kidney area, check UA. See me to review resutls in 1-2 weeks when due for next INR blood test.

In sum:
Urine test today.
Stool test kit for hidden blood given today.
Schedule nutrition appouintment at our front desk.
Call eye clinic for appointment if you have not heard from them within a week.
Increase the dose of coumadin as noted above.
Repeat test for blood thinning in one week and see me or someone in the clinic.
Tests for diabetes due in 1 month.

Alcohol: no
Drugs: no
Sexual practice/contraception: Not active
Advanced directives: yes
Advised osteoporosis prevention in 2005

Meds reviewed.

REVIEW OF SYSTEMS:
Constitutional: Denies weight gain.
Respiratory: Denies cough, shortness of breath.
Cardiovascular: Denies chest pain, palpitations, syncope, orthopnea, paroxysmal noctural dyspnea, lower extremity edema. Wears compression stockings for recurrent thrombophlebitis.

OBJECTIVE:
BP 127/64 | Pulse 63 | Wt 136 lbs (61.689 kg)
General: healthy, alert, no distress
Right leg examined with compression stocking removed shows remarkably normal skin and little in the way of congestion and no inflammation.

Labs reviewed.

ASSESSMENT AND PLAN:

250.00 DIABETES UNCOMPL ADULT-TYPE II (primary encounter diagnosis)
Dx in March of 2007. She need to see nutritionist because of excess intake of sweets and carbohydrates. Referral completed. Due for A1c in one month. Due for eye exam which she will arrange. Will begin metformin 250 mg twice daily then after one week increase to full tablet twice daily. See me in one month. Side effects include stomach upset. Her creatinine is below 1.0.

V58.61 AFTERCARE LONG TERM ANTICOAG USE
INR 2.2. Drift has been downward. Recheck in 2 weeks for test.

703.0 INGROWING NAIL
Referred to FMC nurse for toe nail care.

Scott, Terry B at 12/11/2007 1139

S: 82 year old female in with her son with CC of right sided rib pain. This occurred following a fall at home yesterday evening while doing laundry. She lost her balance while handling some laundry and fell into a pile of canned goods. She complains of moderately severe pain in her right side, no bruising. Her son, Lewis denied any LOC and was witness to the event. She denies fever, chills or cough. Pain is localized to right floating ribs. She has not taken any medications for the discomfort. She has a hx of hip replacement surgery on her right. She is not complaining of any pain or discomfort from the hip.
Review of patient's allergies indicates:

Allergies

Allergen	Reactions
• Penicillins	Rash
• Sulfa Drugs	Rash

O: Female in NAD. BP 122/72 | Pulse 90
Lungs: Normal respiratory excursions. Clear to auscultation and percussion.
Musculoskeletal chest wall: tenderness along the ribs of the right side. No obvious bruising or step offs noted. CXR was done which was negative for fracture.
Hip: No pain or tenderness with palpation of the hip joint.

A/P: Chest wall contusion; Vicodin 5mg, 1-2 tabs q4-6 hours as needed for pain. Deep inspiration to be one to avoid problems. Followup with PCP in 2 weeks, sooner if necessary.

Telephone Encounter

Neighbor, William E at 10/18/2007 1519

E coli UTI in patient allergic to penicillins and sulfa (rash with either). Prescribed Macrodantin which does not interact with her other medications. Please call her and call in prescription. I did write her a letter as I recognize sometimes she is impossible to reach.

Thanks.

Jeanne Leonie Hoffman
245 HIGH SCHOOL RD NW
UNIT 2
Bainbridge Island, WA 98110

Dear Jeanne Leonie Hoffman,

Your urinalysis shows a urinary tract infection which needs to be treated with antibiotics. Because you are allergic to penicillins and sulfa medications, I have prescribed Macrodantin one pill four times daily for ten days given the chronic nature of your symptoms. I have asked our nurses to call you today with those results and to call the medication to your pharmacy, but I am writing you as well in case we are unable to reach you as has happened in the past. I do want to see you for follow up in 3-4 weeks.

Sincerely,

William E Neighbor, MD

Progress Notes

Eisenman, Janice P at 10/18/2007 1803

I met today with Ms Jeanne Hoffman and her son, Lewis, who accompanied her today. We met for 60 minutes of counseling time devoted ostensibly to her current housing situation which they wish to change.

Ms H., an 82 yr old Caucasian female, divorced, mother of 2 adult sons, currently living alone in subsidized housing on Bainbridge where she was born and has longstanding connections. She is very hard of hearing, was wearing dark glasses today, and had difficulty following the conversation most of the time. Her son, Lewis, recounts a tale of persecution and harrassment in her building. He speaks of his many good deeds assisting Ms H, who indeed appears marginally capable of living alone. He is not her official caregiver, and cannot qualify as such owing to a prior history of incarceration. Lewis did acknowledge that he is receiving SS disability, stating that he doesn't know why he's receiving it. He is homeless, currently living in a tent somewhere in Seattle. Other tenants in Ms Hoffman's building have objected to Lewis's residing there illegally and have thus apparently aroused the Hoffmans' impression of being "stalked" when they peer into her windows in an attempt to determine if he is indeed staying there despite repeated warnings. Police are called when he's sighted there, and the hostilities escalate accordingly.

Ms Hoffman does confide in a staff person at the HelpLine House in her community, Nancy, at 206-842-7621, with whom I obtained Ms H's consent to speak today. Nancy's concern over Ms H's vulnerability prompted her to make an APS report today.

10/18/2007 - Office Visit in UWMC FAMILY MED CENTER (continued)

Clinical Notes (continued)

Nancy describes her concern over Ms H's reports of loss of consciousness, sometimes resulting in falls.

Ms H describes herself as "very independent" but appears currently to be willingly and of necessity, highly dependent on her son, Lewis. This, despite some of his illconceived plans to resolve her housing situation by moving her to his tent in Seattle, or purchasing a railroad car, installing her in it and travelling around the country. Ms H's other son, Douglas Hoffman, listed as her LNOK, is less involved, and according to Lewis, visits briefly, once a week, offering nonessential support such as a garment, but nothing concrete such as help with the many chores around the house, deemed unsafe by her son, Lewis, despite repeated complaints to the housing authority. With the change of season and inclement weather approaching, it is possible that Lewis is motivated to resolve Ms H's living arrangements to include himself. He speaks of having contacted the mayor's office and making numerous other calls in an effort to achieve this.

Plan/Action: I provided a pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait. I also provided my contact information. A neuropsychiatric evaluation would be beneficial to determine Ms Hoffman's baseline functioning, although her deafness may make this difficult. I contacted Bremerton APS at 1-888-833-4925 and left a message expressing concern for Ms Hoffman's situation based on our meeting today.

SW remains available as needed.

Clinical Notes (continued)

Electronically signed by Taniguchi, Debra J at 10/16/2007 1:40 PM

Neighbor, William E at 10/16/2007 1437

Jeanne Leonie Hoffman is a 82 year old female here to discuss the following:

788.41 URINARY FREQUENCY (primary encounter diagnosis)
788.39 OTHER URINARY INCONTINENCE
One year hx of urinary frequency, occassional dysuria, and increasing need for using incontinence pads. She denies leakage of urine when coughing or laughing. Denies urgency. She is not a great historian and it is difficult to determine exactly how long this symptom has been present. No change in color of urine.

V61.0 FAMILY DISRUPTION
In with son Lewis, who describes a complexed social situation that involves his report that his mother is being stalked which they have reported to the police. He also describes that he is gay and discrimination in the local community against him. He is considering moving his mother to Seattle from Bainbridge.

OBJECTIVE:
BP 126/64 | Pulse 86 | Temp 98.4 °F (36.9 °C) | Wt 138 lbs (62.596 kg)
General: healthy, alert, no distress

ASSESSMENT AND PLAN:

788.41 URINARY FREQUENCY (primary encounter diagnosis)
788.39 OTHER URINARY INCONTINENCE
One year history urinary frequency and occassional burning. Inctoninence seems to be day and night. For diagnosis, will obtain UA and urine culture. For incontinence, will treat with Ditropan SR 5 mg once daily which can be increased to twice daily if needed. Side effects including dizziness discussed. Additionally, add premarin vaginal cream applied once daily for a week and then just on Monday, Wednesday, and Friday. I advise that she perform Kegel exercises which she was instructed in in the office to strengthen the outlet. I don't think she could comply at this time with bladder retraining exercises and don't believe they would be that effective. She should see me again in 6 weeks.

V61.0 FAMILY/SOCIAL DISRUPTION
In with son Lewis today. There are multiple issues in the neighborhood where she lives on Bainbridge that may make it necessary for her to move. I am referring her to our social worker. I have asked the son Lewis to write down all of the issues that he described today to make the visit more efficient.

Flowsheets (continued)

Patient Instructions

ASSESSMENT AND PLAN:

788.41 URINARY FREQUENCY (primary encounter diagnosis)
788.39 OTHER URINARY INCONTINENCE
One year history urinary frequency and occassional burning. Inctoninence seems to be day and night. For diagnosis, will obtain UA and urine culture. For incontinence, will treat with Ditropan SR 5 mg once daily which can be increased to twice daily if needed. Side effects including dizziness discussed. Additionally, add premarin vaginal cream applied once daily for a week and then just on Monday, Wednesday, and Friday. I advise that she perform Kegel exercises which she was instructed in in the office to strengthen the outlet. I don't think she could comply at this time with bladder retraining exercises and don't believe they would be that effective. She should see me again in 6 weeks.

V61.0 FAMILY/SOCIAL DISRUPTION
In with son Lewis today. There are multiple issues in the neighborhood where she lives on Bainbridge that may make it necessary for her to move. I am referring her to our social worker.

William E Neighbor, MD

10/10/2007 - Office Visit in UWMC FAMILY MED CENTER

Reason for Visit

Chief complaint: Follow-Up
Visit diagnoses:

- Long term (current) use of anticoagulants (primary)
- Closed fracture of unspecified intracapsular section of neck of femur
- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled
- Phlebitis and thrombophlebitis of other deep vessels of lower extremities
- Other and unspecified hyperlipidemia
- Essential hypertension, benign
- Special screening for malignant neoplasms, colon
- Needs flu shot

10/10/2007 - Office Visit in UWMC FAMILY MED CENTER (continued)

Clinical Notes (continued)

- DIAPHRAGMATIC HERNIA [553.3] 11/20/2006
  Priority: High
  CT of abdomen in 2006
- GLAUCOMA NOS [365.9] 11/20/2006
  Priority: High
- ROUTINE MEDICAL EXAM [V70.0] 11/20/2006
  Priority: High
  Td/Tdap (q 10 yr): 2006
  Pneumococcal (65 yoa and high risk x1):
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg Jan 2006. March 2007 normal
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001. Previoiusly had refused studies. Heme cards given in 2005.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: yes
  Advised osteoporosis prevention in 2005

Current outpatient prescriptions

Medication	Sig
• WARFARIN SODIUM 10 MG OR TABS	10 mg Sun, Weds, Thurs,Friday; 5 mg remainder of days of the week.
• PENTOXIL 400 MG OR TBCR	1 po TID
• TEGRETOL 200 MG OR TABS	take one tablet po three times daily
• LIPITOR 40 MG OR TABS	1 po QD
• TIMOLOL MALEATE 0.5 % (DAILY) OP SOLN	instill one drop into each eye twice daily
• HYDROCHLOROTHIAZIDE 25 MG OR TABS	Take 1/2 tablet by mouth every day
• RANITIDINE HCL 150 MG OR TABS	Take 1 tablet by mouth 2 times per day

REVIEW OF SYSTEMS:
Constitutional: Denies weight gain.
Respiratory: Denies cough, shortness of breath.
Cardiovascular: Denies chest pain, palpitations, syncope, orthopnea, paroxysmal noctural dyspnea, lower extremity edema.

OBJECTIVE:
BP 124/67 | Pulse 74 | Wt 138 lbs (62.596 kg)
General: healthy, alert, no distress
Weight decreased by intension
Weight: without significant change.
Chest: Clear without rales or wheezes.
COR: HR regular. No murmur, gallop or rub. No JVD.
Extr: No edema.

10/10/2007 - Office Visit in UWMC FAMILY MED CENTER (continued)

Clinical Notes (continued)

Labs reviewed.

ASSESSMENT AND PLAN:

V58.61 AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
INR today 2.6. Continue same dose of Coumadin and recheck in one month.

820.00 FX FEMUR INTRCAPS NOS-CLOSE
Has appointment in Ortho in early December. Continue to use walker and cane, that later she uses in her home.

250.00 DIABETES UNCOMPL ADULT-TYPE II
A1c in August 6.3 much improved. Continue diet and recheck in 3 months.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
No recurrence. Anticoagulation therapeutic. Needs new compression stockings. She will bring me the order details.

272.4 HYPERLIPIDEMIA NEC/NOS
LDL in March was 104 reflected good control with diet.

401.1 BENIGN HYPERTENSION
BP normal today.

Health maintenance. Due for hemocculs.

Next visit in one month for anticoagulation.

Telephone Encounter

Reddoch, Coreen at 9/6/2007 1317

Staff Message copied by REDDOCH, COREEN on Thu Sep 6, 2007 1:17 PM

Message from: BABAUTA, JOEY
Created: Thu Sep 6, 2007 11:14 AM
Regarding: Pt falls and coumadin
Contact: 206-842-0127

Julie, pharmacist at Safeway in Bainbridge Island, called and would like to discuss some concerns re: patient. Pt has fallen multiple times, is on coumadin, and seems to be poorly supervised, although pt has 2 adult children who purportedly taking care of her.

Electronically signed by Reddoch, Coreen at 9/6/2007 1:17 PM

Reddoch, Coreen at 9/6/2007 1327

Spoke to Jeanne's pharmacist Julie who has concerns about Jeanne's fall risk and her anticoagulation.
Julie and her co-pharmacist have seen Jeanne appear unsteady on her feet and heard Jeanne's accounts of recent falls. Julie says she shops at the pharmacy/grocery store alone wearing ankle weights which she explains are to increase her strength but appear to make her more unsteady.
Explained our lengthy hx with Jeanne and my memory of past social work involvement.
Will consult with Dr. Neighbor .

Electronically signed by Reddoch, Coreen at 9/6/2007 1:27 PM

Neighbor, William E at 9/6/2007 1347

09/06/2007 - Telephone in UWMC FAMILY MED CENTER (continued)

Clinical Notes (continued)

I have written Jean in the last month reminding her to follow up as she is past due. Please give her a call and ask her to schedule an appointment and raise these concerns about falls. Interesting story about her wearing ankle weights. Her last INR was 1.9 at end of August. I had asked her to follow up for visit.

William E Neighbor, MD

Electronically signed by Neighbor, William E at 9/6/2007 1:47 PM

Reddoch, Coreen at 9/6/2007 1616

Spoke to Doug, Jeanne's son asking him to help Jeanne schedule an appt with Dr. Neighbor.
Was unable to connect by phone with Jeanne. Doug was transferred to the PSS staff for scheduling

Electronically signed by Reddoch, Coreen at 9/6/2007 4:16 PM

08/27/2007 - Orders Only in UWMC FAMILY MED CENTER

Reason for Visit

Visit diagnoses:

- (primary)
- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled
- Phlebitis and thrombophlebitis of other deep vessels of lower extremities

Results by Neighbor, William E on 8/29/2007

Status: Sent
Letter body:

CONFIDENTIAL PATIENT INFORMATION- for addressee only.

Jeanne Leonie Hoffman
245 HIGH SCHOOL RD NW
UNIT 2
Bainbridge Island, WA 98110

8/29/2007

Dear Ms. Hoffman,

This letter is to inform you about the laboratory tests that were done at or since your last clinic visit.

Orders Only on 08/27/2007

HEMOGLOBIN A1C, HPLC

Component	Value	Range
• Hemoglobin A1C, HPLC	6.3 (*)	4.0-6.0 (%)

BASIC METABOLIC PANEL

Component	Value	Range
• SODIUM	144	136-145 (mEq/L)
• POTASSIUM	4.1	3.7-5.2 (mEq/L)
• CHLORIDE	110 (*)	98-108 (mEq/L)
• CARBON DIOXIDE	28	22-32 (mEq/L)
• ION GAP	6	5-15
• GLUCOSE	134 (*)	62-125 (mg/dL)
• UREA NITROGEN	13	8-21 (mg/dL)
• CREATININE	0.8	0.3-1.2 (mg/dL)
• CALCIUM	9.3	8.9-10.2 (mg/dL)
• GFR, Calculated, Non_Black	>60	>59- (mL/min)
• GFR, Calculated, Black	>60	>59- (mL/min)
• GFR, Information		-

PROTHROMBIN TIME (RAPID INR)

Component	Value	Range
• Prothrombin Time (Rapid INR)	1.9 (*)	0.8-1.3

Regarding your diabetes, your fastnig blood sugar is 134. Target is 120 or less. Your A1c is 6.3 which is in the target range.

Regarding your anticoagulation, your INR is below the therapeutic range of 2-3. Please schedule a visit with one of our providers to adjust your doseage of medication.

08/27/2007 - Orders Only in UWMC FAMILY MED CENTER (continued)

Telephone Encounter

Luchembe, Kasonde B at 7/11/2007 1111

Ms hoffaman has Oral Surgery scheduled on 7/26,She would like a report of her recent INR faxed to Dental Clinic/Oral Surgery at Phone: 206 543-5860 Fax:206 616-7586.Any questions please all her son Doug at 206 842 8360.

Electronically signed by Luchembe, Kasonde B at 7/11/2007 11:15 AM

Nolan, Karen C at 7/11/2007 1343

Happy to fax this to dental office, but they should have Mindscape access.also forwarding message to Dr Neighbor for advise on if she needs to stop med prior to dental work.

Electronically signed by Nolan, Karen C at 7/11/2007 1:43 PM

Neighbor, William E at 7/16/2007 1352

Her last INR on July 11 was 2.0.

For management of her anticoagulation related to the dental procedure, the following are reasonable:
1. Stop wafarin 5 days before the procedure and restart immediately after the procedure.
2. Dental extraction: Aminocaproic acid (EPA) oral solution 250mg/ml applied by dentist directly to area of dental extraction. No interruption of anticoagulation required.

Please communicate this to the dental clinic.

07/11/2007 - Telephone in UWMC FAMILY MED CENTER (continued)

Clinical Notes (continued)

Electronically signed by Neighbor, William E at 7/16/2007 1:52 PM

Nolan, Karen C at 7/16/2007 1630

Nurse at dental surgery doesn't know if they have access to EPA solution, but will talk to coag clinic. Left message with son Doug to d/c Coumadin 5 days prior and restart after procedure. Also she needs to get an INR drawn the morning of her appt and take results with her to dental office. Asked that Doug call me back to confirm that he received this message.

Electronically signed by Nolan, Karen C at 7/16/2007 4:30 PM

Nolan, Karen C at 7/18/2007 1006

Patient's son called today and confirmed that he received below message

Bainbridge Island, WA 98110

6/12/2007

Dear Ms. Hoffman,

This letter is to inform you about the laboratory tests that were done at or since your last clinic visit.

Orders Only on 06/08/2007

CBC (HEMOGRAM)

Component	Value	Range
• WBC	5.21	4.3-10.0 (THOU/uL)
• RBC	4.19	3.80-5.00 (mil/uL)
• HEMOGLOBIN	12.7	11.5-15.5 (g/dL)
• HEMATOCRIT	38	36-45 (%)
• MCV	90	81-98 (fL)
• MCH	30.4	27.3-33.6 (pg)
• MCHC	33.8	32.3-35.7 (g/dL)
• PLATELET COUNT	249	150-400 (THOU/uL)

HEMOGLOBIN A1C, HPLC

Component	Value	Range
• Hemoglobin A1C, HPLC	6.1 (*)	4.0-6.0 (%)

PROTHROMBIN TIME (RAPID INR)

Component	Value	Range
• Prothrombin Time (Rapid INR)	2.5 (*)	0.8-1.3

06/08/2007 - Orders Only in UWMC FAMILY MED CENTER (continued)

Letters (continued)

Your complete blood cell count is normal. Your hemoglobin A1 c which reflects long term blood sugar control is borderline, suggesting that you could do well to loose a little weight and watch your starch intake. Overall, your blood sugars appear well controlled on the basis of this test. This should be repeated in 6 months.

Your protime (INR) is in the therapeutic range. Continue your current dose of coumadin. Recheck in one month.

Sincerely,

William E Neighbor, MD

Jeanne Leonie Hoffman is a 82 year old female here to discuss the following:

820.00 FX FEMUR INTRCAPS NOS-CLOSE
Appears to be doing well. She is on Vitamin D and Calcium to aid in healing. Her son was not able to come in today as hoped.

401.1 BENIGN HYPERTENSION
Controlled.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
INR today 2.5. . Goal is 2.0-3.0.

Seizure disorder.
She has not had follow up from neurology as yet as ordered at her last visit.

Diabetes.
No records of blood sugars.

OBJECTIVE:
BP 116/62 | Pulse 79 | Wt 143 lbs (64.864 kg)
General: healthy, alert, no distress

Lab INR 2.5.

ASSESSMENT AND PLAN:

820.00 FX FEMUR INTRCAPS NOS-CLOSE
Doing well. Continue PT. She had questions about use of a cane instead of a walker. PT should make the recommendations for her. As she was anemic following her hip fracture and looks a bit pale today,advise CBC which is ordered but which she does not want done today.

250.00 DIABETES UNCOMPL ADULT-TYPE II
Due for A1c which is ordered.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
INR 2.5 today which is in therapeutic range. Recheck in one month.

401.1 BENIGN HYPERTENSION
BP 116/62 today. Well controlled.

Next visit in one month.

Jeanne Leonie Hoffman is a 82 year old female here to discuss the following:

Problem: Righ hip fracture follow up
S/P pin and plate in right hip. Now at rehab center Messenger House on Bainbridge with expected discharge to home in mid May. She now has a walker. She is receivin PT. ONce discharged she is determined to be on her own. Her son lives in Seattle and visits frequently.

Problem: Anticoagulation
INR appears to have been drawn today at Messenger House

Problem: Seizure disorder
She feels that her fall could have been related to a seizure. She has not been seen in neurology for some time. Her tegretol level was therapeutic in February.

Problem: Diabetes
Year onset: Dx March 2007

Last A1c: March 2007 7.1

05/01/2007 - Office Visit in UWMC FAMILY MED CENTER (continued)

Clinical Notes (continued)

Last Cr: Normal in hospital
Last Urine Alb/Cr ratio:
Last eye exam: She believes this was within last year
Last Lipid Panel: LDL 109 in March 22, 2007
Blood pressure: normal

OBJECTIVE:
BP 130/58 | Pulse 68 | Wt 146 lbs (66.225 kg)
General: healthy, alert, no distress
Chest clear
COR without murmur gallop or rub
Extr: Wound no examined today. She has elastic stockings in place on lower legs and has small amount of edema.

ASSESSMENT AND PLAN:

820.00 FX FEMUR INTRCAPS NOS-CLOSE
Appears to be doing well. She is on Vitamin D and Calcium to aid in healing. I would like to see her in 4-6 weeks with her son.

401.1 BENIGN HYPERTENSION
Controlled.

451.19 DEEP VENOUS PHLEBITIS-LEG NEC
INR pending today through rehab center. Goal is 2.0-3.0.

Seizure disorder. She is concerned that her fall could have been related to a seizure. I think it prudent to have her rexamined in neurology. She had a therapeutic tegretol level in about February. Referral to neurology completed.

Diabetes. Review at her follow up visit.

SUBJECTIVE:
Jeanne Leonie Hoffman is a 82 year old female here to discuss the following:

Problem: Anticoagulation visit

Reason for anticoagulation: Recurrent DVT
INR goal: 2-3

Current Coumadin (warfarin) tablet size: 10 mg
Number of tablets on each day of the week:
Sunday: one
Monday: One half

03/22/2007 - Office Visit in UWMC FAMILY MED CENTER (continued)

Clinical Notes (continued)

Tuesday: One half
Wednesday: one
Thursday: one
Friday: one
Saturday: One half

Missed doses in the past week: no

Recent changes in other medications including non-prescription medicines, vitamins (particularly, Vit. K), herbals: no

Tobacco use: no
Change in alcohol or toabcco use since last visit: no
Change in diet since last visit (vegetables, oils, herbal and green team): no
Symptoms of stroke: no
Symptoms of blood clot: no
Bleeding or unusual bruising: no

Refill of Coumadin (wafarin) needed: no

Problem: Impaired fasting glucose
Fasting blood sugars have been periodicallly elevated. She needs repeat and A1c to rule out diabetes.

Problem; Low Vitamin B12 level.
Vitamin B 12 level was low. Methylmalonic acid and homocysteine not yet done.

Problem: Hyperlipidemia
Due for lipid panel. Compliant with diet. No side effects from medications.

Problem: Cardiac murmur
Has not yet had echo done that was ordered at prior visit.

Problem: Falls
Has not yet seen PT. Lives on Bainbridge. I believe that some arrangement were being made for assessment at home.

INR 2.3 today

OBJECTIVE:
BP 139/72 | Pulse 77 | Wt 150 lbs (68.040 kg)
General: healthy, alert, no distress

ASSESSMENT AND PLAN:

Problem: Anticoagulation
INR therapeutic.
Recommended change in Warfarin dose: None.
Next blood test and anti-coagulation visit: 2 weeks given recent fluctuation in INR
The blood test should be done prior to the visit. The visit should be scheduled.
Copy of plan to FMC Anti-coag service MA coordinator: done

Problem: Impaired fasting glucose
Fasting blood sugar and A1c ordered.

Problem: Low Vitamin B12 level.
Methylmalonic acid and homocysteine ordered. She is not taking Vitamin B12.

Problem: Hyperlipidemia
Lipid panel ordered.

Problem: Cardiac murmur
Echo pending.

Problem: Falls
Will speak with Dr. Parker who has seen her recently and check on status of home PT assessment. She refuses help at home. Willing to have home PT assessment.

Patient Instructions

ASSESSMENT AND PLAN:

Problem: Anticoagulation
INR therapeutic. Recheck in 2 weeks.

Problem: Impaired fasting glucose
Fasting blood sugar and A1c ordered.

Problem; Low Vitamin B12 level.
Methylmalonic acid and homocysteine ordered. She is not taking Vitamin B12.

Problem: Hyperlipidemia
Lipid panel ordered.

Problem: Cardiac murmur
Echo pending.

Problem: Falls
Will speak with Dr. Parker who has seen her recently and check on status of home PT assessment. She refuses help at home. Willing to have home PT assessment.

Your blood sugar tests now indicate that you have diabetes. Your prior blood sugar tests had shown borderline diabetes as you know. This has progressed to true diabetes. I would like to see you in the next month to discuss management. At that time we will arrange for a visit to the nruse and to our nutritionist. We should be able to control your blood sugars with diet and oral medications.

That additional tests we did to evaluate a borderline Vitamin B12 level were normal suggesting taht you do not have a vitamin B12 deficiency.

Your cholesterol panel shows good control. Your liver tests were normal.

Please call to schedule a visit to discuss diabetes and blood sugar control.

Sincerely,

William E Neighbor, MD

Bainbridge Island, WA 98110

3/6/2007

Dear Ms. Hoffman:

02/27/2007 - Orders Only in UWMC FAMILY MED CENTER (continued)

Letters (continued)

This letter is to inform you about the laboratory tests that were done at or since your last clinic visit.

We tested your thyroid function, liver function and electrolytes which were all normal. Also, the test for syphillis was negative (this was tested because of memory difficulties).

We also tested your Vitamin B12 level, which is low. We should discuss further evaluation and treatment for this at your next visit.

If you have any questions, please plan to discuss them at your next clinic visit, or call and leave a message with my medical assistant, Karen Nolan.

Sincerely,

Melanie Parker, MD

```
>> KAREN M CHADWICK     Tue Feb 27, 2007  3:03 PM
Blood pressure taken a 2nd time:  141/81  Pulse:73
```

Progress Notes

at 2/27/2007 1355

82yF here for pre-op eval for dental procedure to removed abscessed teeth. Pt is unsure if procedure req anesthesia. Currently c/o falling again. Was seen by me for recurrent falls last visit, but had not followed through with blood tests or PT. Pt describes falls as occurring "because she can't stop moving her feet." No LOC or presyncope. No injuries.

02/27/2007 - Office Visit in UWMC FAMILY MED CENTER (continued)

Clinical Notes (continued)

ROS: Denies CP, SOB. Exercise tolerance 6 miles. See HPI and PMH, otherwise negative x 13 systems.

PMH: szr d/o, DVT, HTN, venous stasis ulcers, talonavicular arthritis, hyperlipidemia, glaucoma

Current outpatient prescriptions : TIMOLOL MALEATE 0.5 % (DAILY) OP SOLN, instill one drop into each eye twice daily, Disp: 5ml, Rfl: 3; WARFARIN SODIUM 10 MG OR TABS, 10 mg Sun, Weds, Thurs,Fri, 5 mg rest, Disp: , Rfl: ; PENTOXIL 400 MG OR TBCR, 1 po TID, Disp: , Rfl: ; HYDROCHLOROTHIAZIDE 25 MG OR TABS, Take 1/2 tablet by mouth every day, Disp: 15, Rfl: 11; TEGRETOL 200 MG OR TABS, take one tablet po three times daily, Disp: 90, Rfl: prn0
LIPITOR 40 MG OR TABS, 1 po QD, Disp: 30, Rfl: 11; RANITIDINE HCL 150 MG OR TABS, Take 1 tablet by mouth 2 times per day, Disp: 60, Rfl: 12

Review of patient's allergies indicates:
 -- Penicillins -- Rash
 -- Sulfa Drugs -- Rash

BP 148/76 | Pulse 72 | Ht 5' 7" (1.702 m) | Wt 150 lbs (68.040 kg)
GEN: aaox3. Nad. Disorganized speech.
CHEST: cta b/l. No w/r/r
CV: rrr. 2/6 SEM LSB.
ABD: nd. Nt.
NEURO: CN 2-12 intact. 5/5 strenght BUE, BLE. Sensation grossly intact. Gait assisted with cane, slow and broad-based.
EXTR: chronic venous stasis hyperpigmentation BLE.
MMSE done last visit, see note 1/07.

EKG: NSR. Widened S in leads I and V6 suggestive or RBBB. No ischemic changes, no LBBB, no LVH.

A/P: 82yF here for pre-op eval for tooth extraction, requires further w/u before surgery.
1. Heart murmur - previously not documented, possible MR? - do ECHO, f/u and consider abx as needed for procedure
2. Cardiac risk - pending ECHO results, however so far low risk.
3. Recurrent DVT, on coumadin - should not need to stop for tooth extraction, although pt says this is why she needs pre-op eval. Will stop for 3 days prior to procedure, restart day after procedure.
4. Recurrent falls - additional hx of not being able to stop her feet indicates possible early or variant of parkinson's disease. NEXT VISIT, DISCUSS REFERRAL TO NEUROLOGY. Also, f/u blood tests ordered last visit. And told pt she needs to reschedule with PT.

Per Vascular Surgery note 5/9/2006: "if she needs to discontinue her Coumadin for short periods of time, such as for dental procedures, then she should not require any bridge therapy. These recommendations are based simply on experience with similar patients, and not on clinical trials."

Attending: John Mark Beard, MD
I saw and evaluated the patient with this resident.
I repeated the essential components of the history and exam.
I discussed the case with the resident, and have reviewed the resident's note. I agree with the findings and plan as documented in the resident's note.
Key findings based upon my evaluation and discussion: 82 y/o with htn, high chol, DVT on warfarin and abscessed teeth that need to be removed. Denies health concerns. Walks 6 mi daily with no SOB, DOE or CP. EKG with RBBB. Exam with 2-3/6 heart murmur. Recent falls with negative workup. Plan off warfarin for 2-3 days before oral surgery and no bridging therapy needed. BP elevated today but normal before. REcheck in a few weeks.
J. Mark Beard, MD

Clinical Notes

Progress Notes

at 1/29/2007 1445

82yF here for f/u ER visit, where she was seen for RLE redness and swelling that she had had a week previously but had already resolved. She was found to have an INR 1.5.

Also, Nancy from helpline called here a few days ago with concerns about Ms. Hoffman having increased falls and confusion, with decreased ability to perform daily tasks that she used to do fine, such as banking. Overall she has seen a decline int he past 6 months. Ms. Hoffman presently denies increase in falls, says she has difficulty with balance "all her life", has been using a cane for "about a year". Also admits to some occaisional confusion or memory deficits, says it is part of "getting older". She persistenly emphasizes that she is "very independent" and does well at home on her own.

PMH: szr d/o, DVT, HTN, venous stasis ulcers, talonavicular arthritis, hyperlipidemia, glaucoma

Current outpatient prescriptions : WARFARIN SODIUM 10 MG OR TABS, 10 mg Sun, Weds, Thurs,Fri, 5 mg rest, Disp: , Rfl: ; PENTOXIL 400 MG OR TBCR, 1 po TID, Disp: , Rfl: ; HYDROCHLOROTHIAZIDE 25 MG OR TABS, Take 1/2 tablet by mouth every day, Disp: 15, Rfl: 11; TEGRETOL 200 MG OR TABS, take one tablet po three times daily, Disp: 90, Rfl: prn0; LIPITOR 40 MG OR TABS, 1 po QD, Disp: 30, Rfl: 11
RANITIDINE HCL 150 MG OR TABS, Take 1 tablet by mouth 2 times per day, Disp: 60, Rfl: 12

ROS: denies SOB, CP. +urinary incontinence x "all my life". Denies numbness or tingling.

SOCHx: lives alone. Public housing apartment. Son stays with her occaisionally.

BP 116/80 | Pulse 76 | Resp 14
GEN: aaox3. Nad.
Mental status: MMSE score 27. Seems forgetful and confused at times, responds appropriately initially but goes off on a tangent with unrelated stories. Difficulty with word finding.
CV: rrr. 3/4 systolic murmur R 2nd ICS
NECK: no carotid bruits.
NEURO: 5/5 strength BUE. Uses arm strength to get out of chair. Snesation to light touch intact b/l feet. Gait unsteady. DTR 1+ patellar b/l.
EXTR: no swelling or erythema. +focal tenderness R posterior calf, said to be caused by zipper from compression stocking.

A/P: 82yF with h/o chronic DVT and increased risk for thromboembolism, on coumadin therapy despite negative duplex (see Vascular note May 2006), currently therapeutic, having by report 6-month h/o cognitive decline with icnrease falls.

1. Falls - Has h/o cerebellar infarcts, poor balance. Hx unclear. Will have PT assess for safety and possible need for additional ambulation assistance. No signs of dehydration.

2. Cognitive decline - MMSE within normal limits, although borders on low. Continue to follow. No concern for head imaging at this time. Will have SW arrange for home assessment for safety, need for assistance with ADL's.
-R/o underlying causes: get TSH, Vit B12, RPR, CMP.

3. Also, ordered Tegretol level, as this hasn't been done in past 6 months.

4. Flu vaccine requested, given.

01/29/2007 - Office Visit in UWMC FAMILY MED CENTER (continued)

Clinical Notes (continued)

F/u in 4 weeks, or sooner as needed.

Attending: Judith A Pauwels, MD
I saw and evaluated the patient with this resident.
I repeated the essential components of the history and exam.
I discussed the case with the resident, and have reviewed the resident's note. I agree with the findings and plan as documented in the resident's note.
Key findings based upon my evaluation and discussion: F/u ER visit for RLE swelling. Last INR 1.5, today 2.0; Chronic anticoag for recurrent DVT. Neighbors noting 6-month history of cognitive decline, can't do ADL's, more balance problems.
A: PT eval of gait.
Social work assessment for home services.

FOB BASIC SERVICES
Patient checked in: YES
Vitals: YES

>> COREEN REDDOCH Fri Jan 26, 2007 3:45 PM
Nancy calls to prepare Dr. Neighbor for Jean's next appt on 1/29/07. Says :"I have some real concerns; I've Known Jean for 10 Years and In the last 6 mo or so I've seen a decline". "She's falling frequently and counts on bystanders to help her". Cloudy thinking; unable to complete tasks such as banking that she's "done a hundred times".
Nancy understands that her Son is not living with her..
Nancy expect Jean would be unwilling to accept assistance;but needs it. Nancy would ask us to try to influlence Jean's willingness to accept formal assist.

Telephone Encounter

at 1/15/2007 2359

>> ZUBIN VASAVADA Mon Jan 15, 2007 11:17 PM
Jeanne calls worried about a "clot" in her Leg.
She has PMH of recurrent phlebitis and DVT for many years, on coumadin but most recently subtherapeutic INR. She says she has a swelling from her ankle to her knee. No real pain or cramps. Denies cords. She denies traumatic injury but previous notes discuss unsteady gait and frequent falls. No f/c/cough/SOB.

May be superficial clot, phlebitis or hematoma, but told to go to ER (911 or have friend/family transport her) to r/o DVT.

Progress Notes

at 12/22/2006 1355

1. 81 yo who's here for anticoagulation. She has been taking Coumadin for 30 years for DVT. INR in OCT was 2.8. However, INR today is 1.4. Patient mixed up her medication by taking only 5 instead of 10 on Wednesday. She did not miss any dose.
ROS: no calf pain, no CP, no SOB.
Diet: patient is drinking one cup of tea in the afternoon. No recent increase. No increase in green leafy diet.
2. Back pain: patient states that she has been taking Acetaminophen 500mg PO 3 tabs in the morning, 3 tabs at lunch and 2 tabs at night. Pain is well controlled. However, she can not tolerated her pain when she cuts down the amount of Tylenol.

PAST MEDICAL HISTORY:

1. Seizure disorder.

2. Recurrent phlebitis and DVT's.

3. Hypercholesteremia.

4. History of venous stasis ulcers.

5. Talonavicular arthritis.

6. Hypertension.

7. Glaucoma.

MEDICATIONS:

1. Lipitor 40 mg daily.

2. Trental 40 mg tid.

3. Hydrochlorothiazide 25 mg 1/2 tablet daily.

4. Tegretol 200 mg tid.

5. Warfarin 10 mg one tablet three days of the week and 1/2 tablet on four days of the week.
M 5, Tu 5, Wed 10, Thu 5, Fri 10, Sat 5, Sun 10

6. RANITIDINE HCL 150 MG OR TABS, Take 1 tablet by mouth 2 times per day, Disp: 60, Rfl: 12

Social: living by herself in Brainbridge island since her son is gone

PE:
BP 132/67 | Pulse 82 | Wt 153 lbs (69.400 kg)
CV: rrr, no m
Lung: CTA bilaterally
Abdomen: soft, nt, nd, abs
Extremity: no edema
Skin: no echymosis.

12/22/2006 - Office Visit in UWMC FAMILY MED CENTER (continued)

Clinical Notes (continued)

Gait: unsteady without a cane

Assessment:
1. Anticoagulation
2. Unsteady gait
3. Pain control

Plan:
1. Resume the current regimen of Coumadin and recheck INR in two weeks
2. Fall evaluation and home safety should be addressed in future clinic.
3. Patient has been taking a large dosage of Tylenol.
- Substitute 1 Tylenol 3 for 1 Extra strength tylenol at night to give her a total of 3800mg per day.
- Check LFT with INR next week.

Khanh Hai Tran, MD

Attending: David Losh, MD
I discussed this patient's history and physical findings with the resident, as well as the plan for this patient. I have reviewed and confirm the findings and plan as documented in the resident's note .
Key findings based upon this discussion: Plan is to go back to dose pt was supposed to be taking 5mg M,T,Thur,Sat & 10mg Wed, Fri,Sun. & recheck INR 2 wks.

HOFFMAN, JEANNE LEONIE U8170135
Family Medicine - Outpt Record Authenticated
Service date: 12-jun-2006
Dictated by Neighbor Jr, MD, William E on 13-jun-2006

Family Medicine - Outpt Record

PROBLEM:
Activities of daily living.

SUBJECTIVE:
Patient is in with her son Louis Alloin. He has been visiting her from California for an extended stay as he is doing some work in the Seattle area in transportation and has been staying in the patient's apartment in order to assist her with cleaning, food arrangements, clothing and general reorganization of her apartment. He has also identified some problems with mold and structural problems in the apartment, and has contacted the appropriate people to make improvements. They are in today apparently because the patient lives in public housing. They need a strong letter supporting his role under ADA. He would live there as an occupant for the two to three months he will be in Seattle.

OBJECTIVE:
Observation of interactions between Mrs. Hoffman and her son shows positive interactions. She clearly appreciates the help that he has given her.

ASSESSMENT:
Activities of daily living.

PLAN:
I will write a letter more firmly supporting Louis living with the patient while he is in Seattle.

PROBLEM:

ANTICOAGULATION.

SUBJECTIVE:

In for INR check. No bleeding, no clots.

PROBLEM:

LEFT LOWER QUADRANT ABDOMINAL PAIN.

SUBJECTIVE:

Two-week history of left lower quadrant abdominal discomfort, particularly worsened by walking. She denies any fever or chills, night sweats. Denies change in urination or bowel movements. She has not had recent colorectal cancer screening.

PAST MEDICAL HISTORY:

1. Seizure disorder.

2. Recurrent phlebitis and DVT's.

3. Hypercholesteremia.

4. History of venous stasis ulcers.

5. Talonavicular arthritis.

6. Hypertension.

7. Glaucoma.

MEDICATIONS:

1. Lipitor 40 mg daily.

2. Trental 40 mg tid.

3. Hydrochlorothiazide 25 mg 1/2 tablet daily.

4. Tegretol 200 mg tid.

5. Warfarin 10 mg one tablet three days of the week and 1/2 tablet on four days of the week.

11/16/2006 - Abstract in UWMC FAMILY MED CENTER (continued)

Clinical Notes (continued)

REVIEW OF SYSTEMS:

The arthritic pain in her hands, for which she was seen about a month ago, resolved.

OBJECTIVE:

Weight 154, blood pressure 158/79, however, previous blood pressures usually about 115 to 130 systolic. Pulse 72 and regular. No acute distress. Bowel sounds normally active. Abdomen is symmetrical. There is tenderness in the left mid quadrant. On contraction of her abdominal muscles, the tenderness persists and there seems to be a fullness in the area of the tenderness suggesting a hernia.

LABORATORY DATA:

INR 2.2 today. She previously had sed rate and anti-CCP both of which were normal. Ankle brachial index earlier this year was normal as well.

ASSESSMENT/PLAN:

1. Anticoagulation with adequate INR. Continue current dose, recheck in one month.

2. Left mid quadrant abdominal discomfort. Probably secondary to abdominal wall hernia. Will obtain CT scan to confirm this. Also check CBC to rule out chance of diverticulitis though she has had no fever, chills or change in bowel movements. She is also due to colorectal cancer screening.

3. Colorectal cancer screening. Hemoccult kit given. Her last sigmoidoscopy was in 2001 and was only to 30 cm. She would be due for coloscopy or sigmoidoscopy depending on the results of her Hemoccult testing.

4. Health maintenance. Also due for tetanus diphtheria.

5. Elevated blood pressure. Check pressures at home, return in one month for recheck blood pressures.

Addended by: SCHNEEWEISS, RONALD on: 9/28/2006 3:37:14 PM

1. L posterolateral Hip Pain

HPI:
81 yo with PMH significant for sz disorder, DVT on anticoagulation, HTN who presents with L hip pain x 2 months. Pt inconsistent historian, originally denied trauma, but then later states that she fell on L side approximately 3 months ago. She denies previous surgeries. Pain associated with activity and made worse with walking. Denies back pain. Pain present posteriorly. Taking aspirin for pain.

Exam BP 151/75, P68
Gen: NAD
Ext: No rashes, erythema or ecchymosis to inspection. ROM is limited to internal rotation of hip bilaterally. Full passive flexion and extension. Strength 5/5 in hip flexion, abduction, adduction. + pain to palpation over gluteal and lateral hip.

A: L hip pain DDx: priformis syndrome vs. occult fx vs trochanteric busitis or OA
P:
1. Hip Xray
2. change to tyenol for management of pain
3. F/u in 1 wk with PCP, Dr. Neighbor
4. Consideration of Trochanteric injection and Physical therapy

5. INR 1.7, to continue current dose of coumadin. f/u with PCP in 1 week.

Ryan Hudson, M.D.

I discussed this patient's history and physical findings with the resident, as well as the plan for this patient. I have reviewed and confirm the findings and plan as documented in the resident's note .
Key findings based upon this discussion: need to consider piriformis syndrome or leg length / back problem as underlying etiology for the buttock pain.

Filed by: Interface, Uw Incoming Pathology Results - Ap Case Conversions 12/16/20 1950

Collected by: 08/03/05 0000

Resulting lab: UNIVERSITY OF WASHINGTON MEDICAL CENTER PATHOLOGY

CLIA number: 50D0661462

Components

Component	Value	Reference Range	Flag	Lab
Not Reported	--	—	—	UWMC Pathology

Result:

FINAL DIAGNOSIS:
A) Skin, right chest, biopsy: Solar elastosis with slightly increased dermal histiocytes, see comment.

COMMENT:
These changes are subtle and non-specific. Step sections were performed to rule out granulomatous/xanthomatous/myxomatous disorders. If lesions persist, rebiopsy may be contributory.

MT/las

Procedures used to establish the diagnosis:
Routine

Component	Value	Reference Range	Flag	Lab
Case Report	--	—	—	UWMC Pathology

Result:

CLINICAL DATA:
Chronic recurrent papules.

GROSS DESCRIPTION:
A) Received in formalin designated "right chest" is a 0.4 x 0.3 x 0.2 cm, irregular, tan-brown, soft tissue, which is entirely submitted in cassette A1.

HV/las

MICROSCOPIC DESCRIPTION:
A) The epidermis contains mild basal layer atypia, extending to the lateral margins. The overlying corneal layer is orthokeratotic. There is solar elastosis. The dermis contains histiocytes with abundant pale blue-gray cytoplasm, suggestive of mucin. Step sections were performed.

FINAL DIAGNOSIS:
A) Skin, right chest, biopsy: Solar elastosis with slightly increased dermal histiocytes, see comment.

COMMENT: These changes are subtle and non-specific. Step sections were performed to rule out granulomatous/xanthomatous/myxomatous disorders. If lesions persist, rebiopsy may be contributory.

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA
Entered on: 9/4/2019
End date: 3/8/2025
Informant: Patient Reported

cephalexin (KEFLEX) 500 MG Oral Capsule

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 5/5/2021
Reason for discontinuation: Reorder
Instructions: Take 1 capsule (500 mg) by mouth 4 times a day for 7 days. For 7 days.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/23/2019
Start date: 10/23/2019
End date: 5/5/2021
Quantity: 28 capsule
Refill: No refills remaining

01/04/1996 - Orders Only in HMC Pathology Lab (continued)

Medication List (continued)

naloxone (Narcan) 4 MG/0.1ML nasal spray

Instructions: Use 1 spray in one nostril for suspected opioid overdose. Call 911. If unresponsive in 2 to 3 minutes, repeat with new naloxone nasal spray.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 6/19/2020
Start date: 6/19/2020 — End date: 6/19/2021
Quantity: 2 each — Refill: No refills remaining

atorvastatin 20 MG tablet

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 10/13/2021
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD — Ordered on: 9/16/2020
Start date: 9/16/2020 — End date: 10/13/2021
Quantity: 45 tablet — Refill: 3 refills by 9/16/2021

pentoxifylline ER 400 MG ER tablet

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 10/13/2021
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 9/16/2020
Start date: 9/16/2020 — End date: 10/13/2021
Quantity: 90 tablet — Refill: 6 refills by 9/16/2021

acetaminophen-codeine 300-15 MG tablet

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 10/13/2021
Instructions: One half to one tablet daily. Take additional acetaminophen during the day up to 2500 mg in divided dose.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 10/21/2020
Start date: 10/21/2020 — End date: 10/13/2021
Quantity: 30 tablet — Refill: No refills remaining

timolol maleate 0.5 % ophthalmic solution

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 12/9/2021
Reason for discontinuation: Reorder
Instructions: instill one drop in each eye twice daily. block tear duct for 1-2 min after use
Authorized by: Neighbor Jr., William E, MD — Ordered on: 10/21/2020
Start date: 10/21/2020 — End date: 12/9/2021
Quantity: 10 mL — Refill: 6 refills by 10/21/2021

SURGICAL PATHOLOGY REPORT

Report copies to:
D EUGENE STRANDNESS,JR, MD STRANDNESS, D EUGENE,JR

RF-25

CLINICAL DATA:
Debridement, right ankle ulcer with STSG to right ankle.

PRE-OP DX:
Same.

GROSS DESCRIPTION:
A) Received in formalin labelled "chronic right ankle ulcer" are three, irregular-shaped, flat, yellow-red tissue fragments 1.2 cm up to 2.2 cm in diameter. The specimen is serially sectioned and representative portions are submitted in cassette A.

FINAL DIAGNOSIS:
A) Skin, right ankle ulcer: Skin with chronic active inflammation, intra-epidermal hemorrhage, and attached fibrinopurulent exudate; no evidence of malignancy.
