- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

Clinical Notes

Telephone Encounter

West, Nicholas, PSS/PSR at 4/30/2024 1603

Jeanne's son Louis called needing to cancel 5/1 wound care due to their schedule. Louis states Jeanne's wound is healing nicely.

He wanted to reschedule to 5/8, however he has a dentist appointment that day and bringing Jeanne in would require dropping her off at the clinic at 7:30AM and not returning until possibly 12:00. Nina was unsure if we could accommodate that, and felt it better to check with you, as Nina was unaware of Jeanne's needs.

Louis will be in a conference between 9 to 1 on 05/01, but he said he will try to answer phone if you call.

Electronically signed by West, Nicholas, PSS/PSR at 4/30/2024 4:33 PM

Perez, Delmis Joel, RN at 5/1/2024 1431

Left VM alerting son that HH is unable to monitor pt next Wednesday, May 8, 2024, for the 730-1200 time frame while he has dental work done. Indicated an appointment would be scheduled for the pt's wound care on May 15, 2024.

Electronically signed by Perez, Delmis Joel, RN at 5/1/2024 2:36 PM

Perez, Delmis Joel, RN at 5/6/2024 1635

Left VM reminding pt's son that HH is not able to monitor the pt during the time he's receiving dental care.

Electronically signed by Perez, Delmis Joel, RN at 5/6/2024 4:37 PM

04/29/2024 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Messages (continued)

As I wrote you last week and again today, your urine culture grew mixed bacteria that of is due to contamination of the urine with mucus from the vaginal area.

Last month your urine did grow E coli which was treated with cephalexin which you have taken in the past for urine infections. As this most recent culture did not grow pure E coli, it appears that the antibiotic was effective.

That being said, as you have had several bladder infections, if you have symptoms of a new one such as feeling unwell, change in urine color or odor, etc, you should begin another course of cephalexin or, ideally, first come in for a repeat urinalysis. I have sent in a prescription for cephalexin so you have that on hand should it be needed.

William E Neighbor Jr, MD

Investigation 251208

UW Medicine Hall Health Center
Fax (206)221-0922

Subject: Request for protected health information (PHI) for Jeanne Hoffman, DOB 1/6/1925

Dear William Neighbor:

The Department of Social and Health Service's Division of Adult Protective Services (APS) investigates allegations of abandonment, abuse, financial exploitation, neglect, and self-neglect of vulnerable adults.

APS is investigating allegations involving Jeanne Hoffman, a vulnerable adult. As part of the investigation, APS is requesting access to protected health information (PHI) that you, a mandated reporter under chapter 74.34 RCW, possess.

As allowed under 45 C.F.R. Section 164.512, and as required under RCW 74.34.035(10), APS requests the following information:

- Do you have any concerns regarding Jeanne Hoffman's decision-making ability? If so, please explain. If not, please state so.

  no

- What was the date of Jeanne Hoffman's last office visit with you?

  1/31/2024

Documents (continued)

SilentFax @ DSHS ALTSA May 21, 24 10:50 From: Lyndsay Morrill To: 12062210922,,,3031290 Page 2 of 3

- Do you have concerns with the wound care that is being provided by the patients Son?

  No. Patient to see wound care nurse every Tues week by Olivia Wound Care Nurse CMorgan MD

- Please provide the best way to contact you for any follow-up questions.

  206-616-2495

The authority for this request, 45 C.F.R. Section 164.512, states in relevant part:

> A covered entity may use or disclose protected health information without the written authorization of the individual . . . in the situations covered by this section, subject to the applicable requirements of this section. . . .
>
> *(c) Standard: Disclosures about victims of abuse, neglect or domestic violence – (1) Permitted disclosures.* A covered entity may disclose protected health information about an individual whom the covered entity reasonably believes to be a victim of abuse, neglect, or domestic violence to a . . . social service or protective services agency . . . authorized by law to receive reports of such abuse, neglect, or domestic violence:
>
> *(i)* **To the extent the disclosure is required by law** and the disclosure complies with and is limited to the relevant requirements of such law;
>
> *(ii)* If the individual agrees to the disclosure; or
>
> *(iii)* **To the extent the disclosure is expressly authorized by statute or regulation** and:
>
> *(A)* The covered entity, in the exercise of professional judgment, believes the disclosure is necessary to prevent serious harm to the individual or other potential victims; or
>
> *(B)* If the individual is unable to agree because of incapacity, a law enforcement or other public official authorized to receive the report represents that the protected health information for which disclosure is sought is not intended to be used against the individual and that an immediate enforcement activity that depends upon the disclosure would be materially and adversely affected by waiting until the individual is able to agree to the disclosure.

Additionally, RCW 74.34.035 requires and expressly authorizes such disclosure. Again, in relevant part:

> (10) In conducting an investigation of abandonment, abuse, financial exploitation, self-neglect, or neglect, the Department or law enforcement, upon request, **must have access to all relevant records related to the vulnerable adult that are in the possession of mandated reporters and their employees,** unless otherwise prohibited by law....

The information we received from you remains confidential under RCW 74.34.095, will

Clinical Notes

Result Encounter Note

Neighbor Jr., William E, MD at 4/24/2024 1008

Jeanne:
Your urine culture last week grew mixed bacteria. If you are feeling well without fever and without urinary symptoms including cloudy urine, you would not need antibiotics. However, if you do have any urinary symptoms, perhaps you should receive a second course of the antibiotic cephalexin that was prescribed in later March. I have sent in a prescription so you have it on hand.

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 4/17/2024 0920

Pt in clinic with son, Louis, for continued wound care, keeping an appointment that was supposed to be canceled. Pt continues to be self-showering and will restart PT/OT in May 2024. Pt started antibiotics for her UTI and has 2 more days to go. She is in considerable less pain today though her left big toe is very painful to the touch. The toe looks normal and without S&S of infection and the displaced toenail appears ready to come off. Pt is able to get on the Procedure Room bed with moderate assist. Had already scheduled next wound care appt for 2 weeks.

1. The home dressings were gently removed.
2. The left lower leg was wrapped with a warm wet towel and chlorhexidine soap applied to the wounds.
3. The sites were wiped with NS moistened gauze.
4. Lidocaine 2% jelly was applied to the open wounds.
5. Each open area was gently debrided using a 4 mm curette.
6. All sites were gently wiped with NS moistened gauze
7. Carradres hydrogel dressings were cut to fit and applied to each wound
8. 4 inch stretch gauze was wrapped around the LLE and taped to itself with paper tape
9. Surgilast 5.5 was placed over the gauze wrap.
10. Placed a fresh sock over the foot and put her shoe on the foot.

Left Leg wounds:

1. Left Medial Ankle: shrinking posteriorly with a small anterior satellite; 2.4 cm x 1.0 cm x 0.1 cm, filling in from the base up
2. Left Medial Ankle Anterior Satellite: 0.7 cm x 0.4 cm x 0.2 cm.
3. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 6.2 cm x 1.9 cm x 0.2. The whole wound is filling in from its base.
4. Left Distal Lateral Shin and small medial satellite: 4.5 cm x 4.0 cm x 0.2 cm. Filling in from its base, the wound is shallower.

Immunization Documentation

99 year old - Is this patient eligible for VFC or Adult supply vaccine? **Adult (18 and under = VFC)**

04/17/2024 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Interpreter: No

Has patient ever fainted after receiving vaccine/blood draw? : No [If YES, pt should be lying down to receive vaccine]

Vaccine Screening Questions

1	Are you allergic to Latex?	NO
2	Have you had a serious reaction or an allergic reaction to a vaccine?	NO
3	Do you currently have a moderate or severe illness, including fever?	NO
4	Are you pregnant or planning to become pregnant?	NO (Note: If YES: HPV and Heplisav are contraindicated in pregnancy. Consult with provider prior to giving PPSV23/PCV15/PCV20, HepA, Hib, MenACWY or MenB)
5	Have you ever had a seizure or any neurological problem associated with a vaccine? *(DTaP/TDaP/DTP pertinent)*	NO
6	Is patient receiving any **LIVE** vaccinations today? *(Varicella-Chickenpox, MMR-Measles/Mumps/Rubella, Zoster-Shingles, Yellow Fever)*	No [determine need for TB screening if getting live virus vaccine] **NOTE:** • If **YES** to any of the questions above – Do **NOT** give vaccine. Consult with RN or provider in clinic. (#5 can be YES if all Live vaccine questions are answered NO) • If **NO** to all questions above - Patient may receive vaccine.
7	Do you need to receive the Flu vaccine today?	NO

Imms administered today: **Zoster (Shingrix)**

All patients are encouraged to wait 15 minutes before leaving after receiving any vaccine.

VIS given 4/17/2024 by Delmis J Perez, RN

Was Jeanne Leonie Hoffman alert, oriented, and without adverse reaction after the vaccine was given YES

Delmis J Perez, RN

04/17/2024 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

04/17/2024 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Documents (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

4/29/2024 3:37 PM by Hoffman, Jeanne Leonie

I ordered the vaccine should you confirm it will be covered here. It is best to get thru a pharmacy as it is most likely to be fully covered there.

You should double check with your insurance regarding coverage for clinic administered shingles vaccine. Under Medicare, the vaccine is not covered in doctors offices but is covered at pharmacies. The out-of-pocket expense for the vaccine if not covered by insurance is $3-$400 per dose.

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 4/10/2024 1000

Pt in clinic with son, Louis, for continued wound care. Per son's report, pt has been eating more protein, peanut butter and beans, and a new used stove has been installed. Pt continues to be self-showering and will restart PT/OT in May 2024. No complains of the bilateral shooting pain but the left leg was acutely painful today. Pt is able to get on the Procedure Room bed with moderate assist. Scheduled next wound care appt for 3 weeks.

1. The home dressings were gently removed.
2. The left lower leg was wrapped with a warm wet towel and chlorhexidine soap applied to the wounds.
3. The sites were wiped with NS moistened gauze.
4. Lidocaine 2% jelly was applied to the open wounds.
5. Each open area was gently debrided using a 4 mm curette.
6. All sites were gently wiped with NS moistened gauze
7. Carradres hydrogel dressings were cut to fit and applied to each wound
8. 4 inch stretch gauze was wrapped around the LLE and taped to itself with paper tape
9. Surgilast 5.5 was placed over the gauze wrap.
10. Did not replace the sock as it had been soiled overnight and place the shoe over the Surgilast and gauze on the foot.

Left Leg wounds:

1. Left Medial Ankle: shrinking posteriorly with a small anterior satellite; 2.0 cm x 1.4 cm x 0.1-0.2 cm, filling in from the base up
2. Left Medial Ankle Anterior Satellite: 0.9 cm x 0.6 cm x 0.1 cm.
3. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 6.2 cm x 1.9 cm x 0.2. The whole wound is filling in from its base.
4. Left Distal Lateral Shin and small distal satellite: 5.6 cm x 4.2 cm x 0.2 cm. Filling in from its base, the wound is shallower.

04/10/2024 - Clinical Support Visit in Husky Health Same Day Clinic (continued)

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

Hi Jeanne and Louis,
I've tried to call you on different numbers, but no response. I put Jeanne on the schedule with Delmis for wound care on Wednesday, April 10th, at 10 am.

04/08/2024 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Messages (continued)

Thank you,
Elena Mohova, CMA
Hall Health Primary Care Center

03/28/2024 - Office Visit in Eyes on James Optical Shop

Reason for Visit

Chief complaints: Eye Exam and Other
Visit diagnoses:

- Reduced vision (primary)
- Glaucoma suspect of both eyes
- Type 2 diabetes mellitus without complication, without long-term current use of insulin
- Pseudophakia, both eyes

HPI

Eye Exam

Additional comments: 99 YO with diabetes here for exam. Last hgba1c 6.3 02/14/2023. Pt notes her left eye vision ? Might be blurry x 2-3 months after questioning. She could not tell if the change was gradual or sudden. Denies of eye pain. Notes longstanding light sensitivity. Son notes their dwelling has no natural light and thinks staying in their dark room has made his mother's eye extra light sensitive.

Other

Additional comments: Hx of being prescribed Timolol BID by outside provider x 10 yrs ago, pt is unsure of the reason. This provider is located on Stoneway, family is not sure of the practice. Pt was seen at this practice x 1, might be 10 yrs ago. Pt was referred to Glaucoma in 2019 after seeing me, no Glaucoma appointment was noted on chart.

Fohx
Unremarakble

Medical history, allergy history, surgical history, social history, family ocular history was reviewed and confirmed from history section of EMR/patient's health record today.

Assessment and Plans:
See AVS for additional overview/instructions

1. Reduced vision
OS>OD, pt is not sure of onset.
In past unable to examine eyes due to pt's extreme light sensitivity.
Today very limited exam again due to light sensitivity, only obtained slivers of views with firmly holding lids.
Has reduced vision and color vision OS>OD, possible nerve pallor OD vs pseudophakic pallor
No apparent APD seen, but exam was difficult to start with due to light sensitivity
Unable to obtain confrontational field (pt was also extremely hard of hearing) together with light sensitivity
Suspecting hx of NAION OS due to pt's age, nerve pallor and reduced color vision, onset is unclear.
Already under medical care with Dr. Neighbor.
Dicussed findings with patient in writing, since on timolol (through no apparent cupping) would refer to Glaucoma for start, consider ?neurophthalmology referral.

2. Glaucoma suspect of both eyes
Pt has been on Timolol for 10+ yrs, started by outside provider.
Would not be able to obtain prior charts, as family cannot recall name of practice
Untreated Tmax unknown
Negative Fhx
Quick view of nerve with no apparent cupping, but views were brief
Does have ?nerve pallor OS vs psedudophakic
Referral to glaucoma placed in 2019, pt was not seen at Glaucoma
Would recommend baseline glaucoma referral to determine need of continuing Timolol
Okay to continue Timolol for now
- Referral to Eye Care; Future

03/28/2024 - Office Visit in Eyes on James Optical Shop (continued)

Clinical Notes (continued)

3. Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)
No signs of diabetic retinopathy. Patient educated regarding importance of continued blood sugar control. Letter to PCP regarding today's exam.

4. Pseudophakia, both eyes
Monitor

5. Refractive error
Did my best on retinoscopy, dispensed spectacle Rx

Exam was very challenging due to pt's light sensitivity and hearing difficulty, communicated finding and plans with patient in writing.

I spent a total of 60 minutes for the patient's care on the date of the service.

Thank you for coming in today.
During today's visit we reviewed only your ophthalmology (eye-related) medications.
Please follow up with your primary care provider for any questions regarding other medications.
If your eyes were dilated during today's visit, the average dilation will last 4 to 6 hours and may impact your overall vision during this period. Please use caution during this period.
If you need to schedule or change a follow up appointment, please call 206-744-2020.
Our phone lines are open 7:00am to 8:00pm Monday through Saturdays and 9:00am to 5:30pm on Sundays.

If you have any questions regarding contact lens, please call Eyes on James at 206.897.4774 ext 2

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

RE: Jeanne Leonie Hoffman
DOB: 1/6/1925

Dear William E Neighbor Jr., MD:

Ms. Jeanne Leonie Hoffman is seen today for an dilated fundus exam and She has **No diabetic retinopathy**. I educated patient regarding importance of continued blood sugar control and the need of yearly dilated fundus exam.

I am referring her to Glaucoma to consider the need of continuing Timolol.

Please feel free to contact me if I could be of further assistance.

Sincerely,

Electronically signed by

Unremarakble

Medical history, allergy history, surgical history, social history, family ocular history was reviewed and confirmed from history section of EMR/patient's health record today.

Assessment and Plans:
See AVS for additional overview/instructions

03/28/2024 - Office Visit in Eyes on James Optical Shop (continued)

Letters (continued)

1. Reduced vision
OS>OD, pt is not sure of onset.
In past unable to examine eyes due to pt's extreme light sensitivity.
Today very limited exam again due to light sensitivity, only obtained slivers of views with firmly holding lids.
Has reduced vision and color vision OS>OD, possible nerve pallor OD vs pseudophakic pallor
No apparent APD seen, but exam was difficult to start with due to light sensitivity
Unable to obtain confrontational field (pt was also extremely hard of hearing) together with light sensitivity
Suspecting hx of NAION OS due to pt's age, nerve pallor and reduced color vision, onset is unclear.
Already under medical care with Dr. Neighbor.
Dicussed findings with patient in writing, since on timolol (through no apparent cupping) would refer to Glaucoma for start, consider ?neurophthalmology referral.

2. Glaucoma suspect of both eyes
Pt has been on Timolol for 10+ yrs, started by outside provider.
Would not be able to obtain prior charts, as family cannot recall name of practice
Untreated Tmax unknown
Negative Fhx
Quick view of nerve with no apparent cupping, but views were brief
Does have ?nerve pallor OS vs psedudophakic
Referral to glaucoma placed in 2019, pt was not seen at Glaucoma
Would recommend baseline glaucoma referral to determine need of continuing Timolol
Okay to continue Timolol for now
- Referral to Eye Care; Future

3. Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)
No signs of diabetic retinopathy. Patient educated regarding importance of continued blood sugar control. Letter to PCP regarding today's exam.

4. Pseudophakia, both eyes
Monitor

5. Refractive error
Did my best on retinoscopy, dispensed spectacle Rx

Exam was very challenging due to pt's light sensitivity and hearing difficulty, communicated finding and plans with patient in writing.

I spent a total of 60 minutes for the patient's care on the date of the service.

03/28/2024 - Office Visit in Eyes on James Optical Shop (continued)

Letters (continued)

Thank you for coming in today.
During today's visit we reviewed only your ophthalmology (eye-related) medications.
Please follow up with your primary care provider for any questions regarding other medications.
If your eyes were dilated during today's visit, the average dilation will last 4 to 6 hours and may impact your overall vision during this period. Please use caution during this period.
If you need to schedule or change a follow up appointment, please call 206-744-2020.
Our phone lines are open 7:00am to 8:00pm Monday through Saturdays and 9:00am to 5:30pm on Sundays.

If you have any questions regarding contact lens, please call Eyes on James at 206.897.4774 ext 2

*** This list has 2 medication(s) that are the same as other medications prescribed for you. Read the directions carefully, and ask your doctor or other care provider to review them with you.**

03/28/2024 - Office Visit in Eyes on James Optical Shop (continued)

Documents (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

Documents (continued)

Acknowledgment/Agreement - Scan on 3/29/2024 10:28 AM: U3798 ; VISION SERVICES ACKNOWLEDGEMENT

Scan (below)

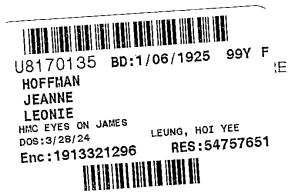
Vision Services Acknowledgement

Please check the box below to indicate the reason(s) for your visit today:

- ☐ Routine Eye Exam (generally not covered by medical insurance plans, unless vision benefits are specifically included)
- ☒ Routine Vision Service, for example contact lens fitting, new eyeglass prescription, refraction (typically not covered by medical insurance)
- ☐ Medical Eye Appointment (medical condition, disease of the eye or injury to the eye)
- ☐ Referral from Primary Care Physician (PCP) to see an Optometrist (does not guarantee coverage)

If you checked Medical Eye Appointment or Referral from PCP, please indicate your primary reason for the visit:

Frame Repair or new frames



Insurance coverage varies among individual insurers and policies, and vision coverage in particular can widely vary. UW Medicine is not contracted with most vision plans, and are unable to bill. Please call your insurance company before your visit to understand what they will cover, which providers and hospitals are in network, and what you will need to pay out of pocket.

Please be advised that any other issues or concerns that you would like to discuss with your provider today, such as new and/or existing medical conditions, laboratory or x-ray orders, or results or medication refills may result in additional charges.

UW Medicine makes every effort to accurately select billing codes based on the documentation of your visit, and to follow standard coding guidelines. If you believe there is a problem with the coding of your visit, please contact Patient Accounts and Support Services at 206.520.0400 or 1.855.520.0400.

By signing below, I understand the information provided regarding preventative care visits, and that additional charges may be applied for services rendered.

Hello Jeanne,

I have scheduled you for the following appointment in our Primary Care Clinic. Details are below:

Appointment Date: Wednesday April 17, 2024
Appointment Time: 10:20 am
Provider: Nurse North
Location: Hall Health Center

Parking is available in the Padelford Hall lots, N21 and N20, this is pay to park parking. Parking across the street in our 3 parking spots requires pre-authorization with HHC staff, and typically they are for patients having trouble walking . If you park across the street, you must inform check-in staff where you parked or you will be ticketed.

Thank you
Rico, PSS Hall Health

I left a voicemail for you this evening. My review of your record shows that on March 22 your urine grew E. coli. I sent in a prescription to the Rite Aid pharmacy for cephalexin for approximately 7-day course. A message from Louis subsequently indicated the medication was "started". Hopefully this happened. Please let me know.

The repeat urinalysis and culture should be done 1 to 2 weeks after completion of the antibiotic.

William E Neighbor Jr, MD

Jeanne:
I just reported the results of your urine culture and sensitivity which showed E. coli bacterial infection. The bacteria is resistant to Bactrim. It is sensitive to penicillins and nitrofurantoin however you have had reactions to those in the past. It is sensitive to cefazolin. Though there is some cross-reactivity of this antibiotic with penicillins given that your penicillin reaction was simply a skin rash which should be safe to prescribe the cefazolin. Additionally you have been treated with cefazolin and related medications in the last year and tolerated them well. The alternatives are ciprofloxacin and levofloxacin which can cause tendinitis in your age group.

The prescription has been sent to your pharmacy. The prescription is for Keflex 500 mg 4 times daily for 7 days.

When taking doxycycline, remember to take with full cup or glass of water and to remain upright for 30 minutes after taking to avoid dissolution or reflux of doxycycline into the esophagus where it can cause severe inflammation and pain that takes a couple of weeks to resolve.

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 3/20/2024 1020

Pt in clinic with son, Louis, for continued wound care. Per son's report, pt has had a carbohydrate filled diet recently as the new stove still has not been installed, pt is able to get on the Procedure Room bed with moderate assist, self-showering, and has continued with PT/OT but this ends tomorrow and they'd like to continue. Pt has been experiencing shooting pain from her feet which could be related to blood sugars. Son endorses it being high. Recommended to the pt less carbs and more protein. Scheduled next wound care appt for 3 weeks.

1. The gelled hydrogel sheets in wounds were gently removed.
2. The left lower leg was wrapped with a warm wet towel and chlorhexidine soap applied to the wounds.
3. The sites were wiped with NS moistened gauze.
4. Lidocaine 2% jelly was applied to the open wounds.
5. Each open area was gently debrided using a 4 mm curette.
6. All sites were gently wiped with NS moistened gauze
7. Carradres hydrogel dressings were cut to fit and applied to each wound
8. 4 inch stretch gauze was wrapped around the LLE and taped to itself with paper tape
9. Put on the pt's sock and shoe

-
-
- Left Leg wounds:

1. Left Medial Ankle: shrinking posteriorly with a small anterior satellite; 2.0 cm x 0.8 cm x 0.1-0.2 cm, filling in from the base up
2. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 6.8 cm x 2.0 cm x 0.2. Distal portion reactive to the curette today. The whole wound is filling in from its base.
3. Left Distal Lateral Shin: 4.5 cm x 3.4 cm x 0.2 cm. Filling in from its base, the wound is shallower.

Electronically signed by Perez, Delmis Joel, RN at 3/20/2024 10:30 AM

Brighton, Marcelle, RN at 3/20/2024 1020

See MAR section of the patient's medical record for name of medication administered, lot number, expiration date, etc.

Patient questions were answered.
Patient has no contraindications for this medication.

03/20/2024 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Patient verbally consented to receive this medication
I administered Acetaminophen, 650 mg po.
Patient tolerated medication without problem and reports improvement in symptoms.

Immunization Documentation

99 year old - Is this patient eligible for VFC or Adult supply vaccine? **Adult (18 and under = VFC)**

Interpreter: No

Has patient ever fainted after receiving vaccine/blood draw? : No [If YES, pt should be lying down to receive vaccine]

Vaccine Screening Questions

1	Are you allergic to Latex?	NO
2	Have you had a serious reaction or an allergic reaction to a vaccine?	NO
3	Do you currently have a moderate or severe illness, including fever?	NO
4	Are you pregnant or planning to become pregnant?	NO (Note: If YES: HPV and Heplisav are contraindicated in pregnancy. Consult with provider prior to giving PPSV23/PCV15/PCV20, HepA, Hib, MenACWY or MenB)
5	Have you ever had a seizure or any neurological problem associated with a vaccine? *(DTaP/TDaP/DTP pertinent)*	NO
6	Is patient receiving any **LIVE** vaccinations today? *(Varicella-Chickenpox, MMR-Measles/Mumps/Rubella, Zoster-Shingles, Yellow Fever)*	No [determine need for TB screening if getting live virus vaccine] **NOTE:** • If **YES** to any of the questions above **–** Do **NOT** give vaccine. Consult with RN or provider in clinic. (#5 can be YES if all Live vaccine questions are answered NO)

03/20/2024 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

		• If **NO** to all questions above - Patient may receive vaccine.
7	Do you need to receive the Flu vaccine today?	NO

Imms administered today: **COVID-19 mRNA Comirnaty (Pfizer)**

All patients are encouraged to wait 15 minutes before leaving after receiving any vaccine.

VIS given 3/20/2024 by Marcelle Brighton, RN

Was Jeanne Leonie Hoffman alert, oriented, and without adverse reaction after the vaccine was given YES

Result Notes

William E Neighbor Jr., MD
4/29/2024 2:28 PM PDT

Jeanne:
Your urine culture last week grew mixed bacteria. If you are feeling well without fever and without urinary symptoms including cloudy urine, you would not need antibiotics. However, if you do have any urinary symptoms, perhaps you should receive a second course of the antibiotic cephalexin that was prescribed in later March. I have sent in a prescription so you have it on hand.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

Neighbor Jr., William E, MD at 3/20/2024 0838

Jeanne;
The urine culture grew E. coli sensitive to many antibiotics. It is sensitive to penicillins and nitrofurantoin however you have had reactions to those medications in the past. It is resistant to Bactrim, sulfa medication. It is sensitive to cephalexin. There is some cross reaction between penicillin and cephalexin but given that the penicillin reaction was only a skin rash it should be safe to begin cephalexin. The alternatives include ciprofloxacin and levofloxacin which can cause tendinitis in your age group. I am sending in a prescription for cephalexin 500 mg 4 times daily for 7 days.

Last Read in MyChart
4/11/2024 3:44 PM by Hoffman, Jeanne Leonie

Thank you for the update. Is there anything I need to do. Sounds like the PT will restart automatically, but can write another PT referral if needed.

Jeanne's Continuing PT/Ending 3/21/24

From	To	Sent
Hoffman, Jeanne Leonie	William E Neighbor Jr., MD	4/9/2024 10:05 AM

Jean is continuing PT on her own, based on her training with PT home personnel.
However, Jean does well with instructors. Jean under Molina, has subscription to "Island Fitness" in past has done well, but equipment for wheelchair and mobility standing area are to wide space/fall issues.
Thus, have suspended Island Fitness-Silver programs.
Was advise that Home PT can restart in May.

03/14/2024 - Patient E-mail in Husky Health Same Day Clinic (continued)

Messages (continued)

4/11/2024 3:44 PM by Hoffman, Jeanne Leonie

In order to continue the physical therapy we will need the name, company, address and phone number for the current provider of physical therapy. I think the current physical therapy was arranged through home health care so we do not have the above information.

Thank you

William E Neighbor Jr, MD

Jeanne;
The copper level was normal. This test was done to look for causes for your elevated red blood cell size. As I wrote earlier, the pathologist also look at the cells and did not find any abnormality.

Active at the End of Visit

acetaminophen 500 MG Oral Tab

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions:
1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 6/12/2024
Action: Patient not taking

Calcium Carbonate 500 MG Oral Chew Tab

Discontinued by: Clark, Trika L, Pharmacy Technician
Discontinued on: 1/9/2025
Reason for discontinuation: Discontinued by patient
Instructions: Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 1/9/2025

Cholecalciferol 1000 units Oral Tab

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/20/2019
End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA
Entered on: 9/4/2019
End date: 3/8/2025
Informant: Patient Reported

ofloxacin 0.3 % ophthalmic solution

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Place 1-2 drops into left EYE 4 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/10/2022
Start date: 10/10/2022
End date: 6/12/2024
Action: Patient not taking
Quantity: 5 mL
Refill: 1 refill by 10/10/2023

triamcinolone 0.1 % cream

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Apply topically 2 times a day. Apply to both forearms.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/5/2023
Start date: 4/5/2023
End date: 6/12/2024
Action: Patient not taking
Quantity: 28.4 g
Refill: 1 refill by 4/4/2024

Wound Dressings (medihoney) topical gel

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Apply topically every other day. Apply to wound before applying dressing
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/26/2023
Start date: 4/26/2023
End date: 3/8/2025
Quantity: 44 mL
Refill: 4 refills by 4/25/2024

nystatin 100000 UNIT/ML mouth/throat suspension

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Swish and swallow 5 mL 4 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/31/2023
Start date: 10/31/2023
End date: 6/12/2024
Action: Patient not taking
Quantity: 60 mL
Refill: No refills remaining

pantoprazole 40 MG EC tablet

Discontinued by: Navalurkar, Reema, MD
Discontinued on: 8/20/2024
Reason for discontinuation: Med list cleanup
Instructions: Take 1 tablet (40 mg) by mouth 2 times a day before meals.
Authorized by: Nguyen, Liem Hieu, MD
Ordered on: 11/27/2023
Start date: 11/27/2023
End date: 8/20/2024
Quantity: 102 tablet
Refill: No refills remaining

atorvastatin 10 MG tablet

Discontinued by: Navalurkar, Reema, MD
Discontinued on: 9/24/2024
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (10 mg) by mouth daily.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 1/3/2024
Start date: 1/3/2024
End date: 9/24/2024
Quantity: 90 tablet

Start date: 1/18/2024
Quantity: 15 each

End date: 3/14/2025
Refill: No refills remaining

pentoxifylline ER 400 MG ER tablet

Discontinued by: Neighbor Jr., William E, MD
Instructions: take 1 tablet by mouth three times a day
Authorized by: Neighbor Jr., William E, MD
Start date: 2/15/2024
Quantity: 90 tablet

Discontinued on: 3/13/2024
Ordered on: 2/15/2024
End date: 3/13/2024
Refill: No refills remaining

Stopped in Visit

None

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 2/28/2024 0940

Pt in clinic with son, Louis, for continued wound care. Per son's report, pt continues to eat well, ambulation has improved and is able to get on the Procedure Room bed with moderate assist, self-showering, and exercises with the visiting therapist. Son reports the wounds have not been weeping much so the Qwick like dressing dry out and cause the pt pain. Changed to Carradres today.

1. The gelled hydrogel sheets in wounds were gently removed.
2. Chlorhexidine soap was applied to the wounds and the leg wrapped with a warm wet towel.
3. The sites were wiped with NS moistened gauze.
4. Lidocaine 2% jelly was applied to the open wounds.
5. Each open area was gently debrided using a 4 mm curette.
6. All sites were gently wiped with NS moistened gauze
7. Carradres hydrogel dressings were cut to fit and applied to each wound
8. 4 inch stretch gauze was wrapped around the LLE and taped to itself with paper tape
9. Surgilast 7.5 was placed over the gauze wrap
10. The sock the pt came with was pretty dirty and not reused

Left Leg wounds:

1. Left Medial Ankle: oval,a bit longer and wider than last visit; 2.9 cm x 2.1 cm x 0.1-0.2 cm, filling in from the base up
2. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 6.5 cm x 2.1 cm x 0.2. Distal portion reactive to the curette today. The whole wound is filling in from its base.
3. Left Distal Lateral Shin: 5.2 cm x 3.4 cm x 0.2 cm. Filling in from its base, the wound is much shallower.

Electronically signed by Perez, Delmis Joel, RN at 2/28/2024 11:05 AM

triamcinolone 0.1 % cream Commonly known as: Kenalog	Apply topically 2 times a day. Apply to both forearms.

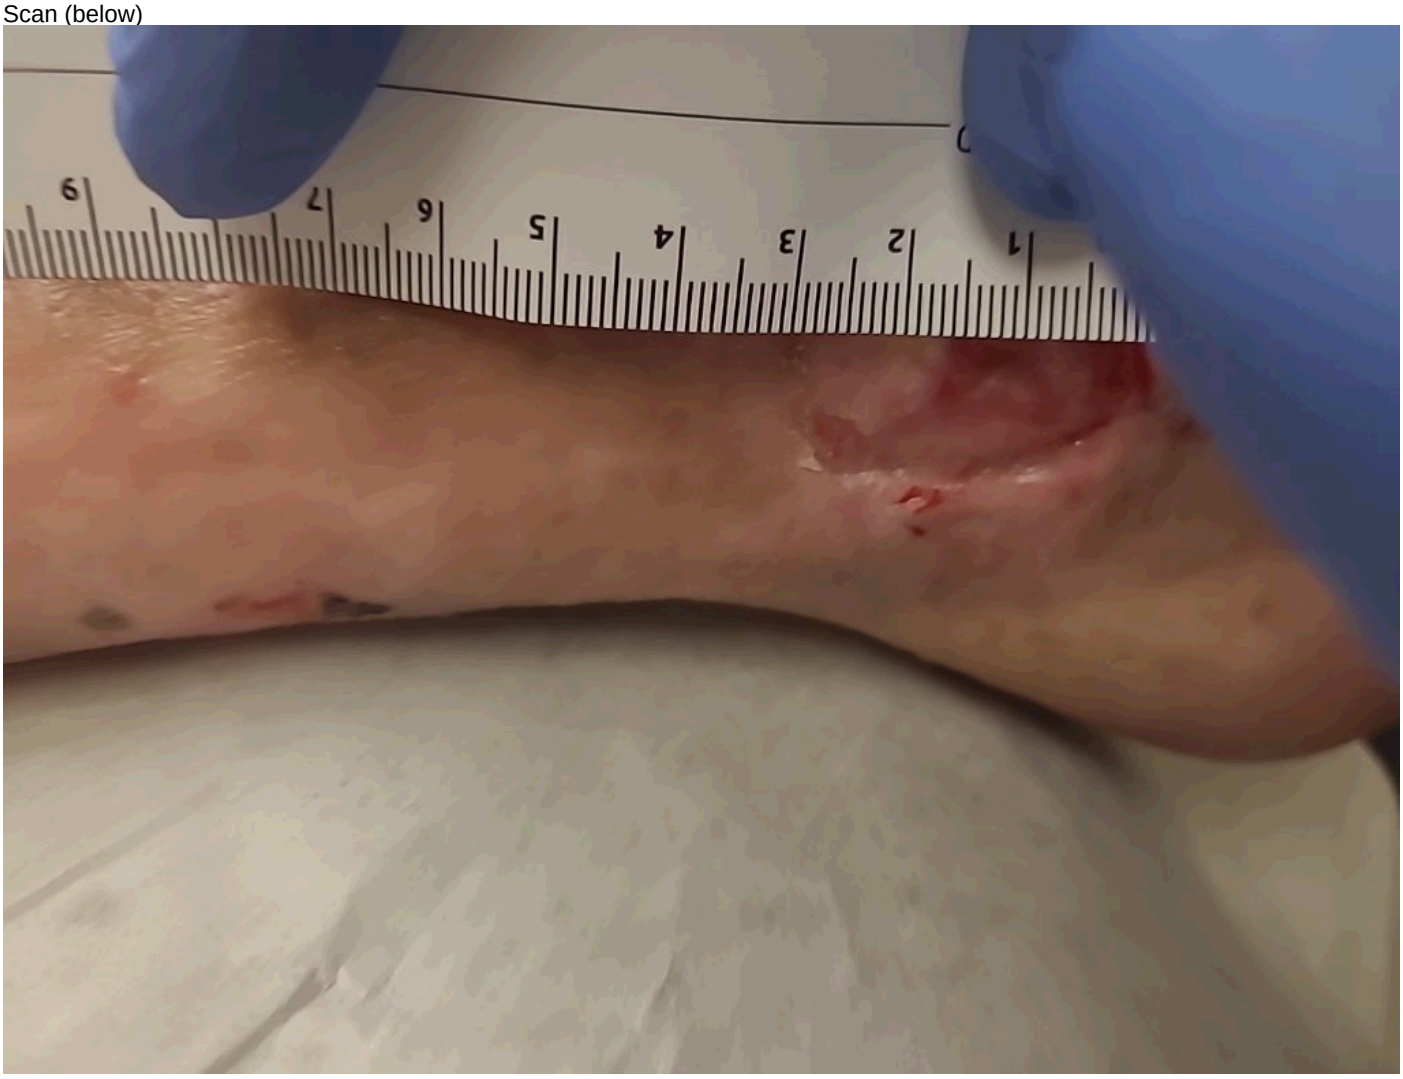
*** This list has 2 medication(s) that are the same as other medications prescribed for you. Read the directions carefully, and ask your doctor or other care provider to review them with you.**

02/28/2024 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.



If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

Documents (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

Active at the End of Visit

acetaminophen 500 MG Oral Tab

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions:
1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 6/12/2024
Action: Patient not taking

Calcium Carbonate 500 MG Oral Chew Tab

Discontinued by: Clark, Trika L, Pharmacy Technician
Discontinued on: 1/9/2025
Reason for discontinuation: Discontinued by patient
Instructions: Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 1/9/2025

Cholecalciferol 1000 units Oral Tab

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/20/2019
End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA
Entered on: 9/4/2019
End date: 3/8/2025
Informant: Patient Reported

ofloxacin 0.3 % ophthalmic solution

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Place 1-2 drops into left EYE 4 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/10/2022
Start date: 10/10/2022
End date: 6/12/2024
Action: Patient not taking
Quantity: 5 mL
Refill: 1 refill by 10/10/2023

Medication List (continued)

Wound Dressings (medihoney) topical gel

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Apply topically daily. Apply to ulcerations on legs. Apply dressing over the Medi Honey.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/9/2023
Start date: 2/9/2023
End date: 3/8/2025
Quantity: 88 mL
Refill: 6 refills by 2/9/2024

timolol maleate 0.5 % ophthalmic solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/10/2024
Instructions: instill 1 drop into both eyes twice a day
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/24/2023
Start date: 2/24/2023
End date: 4/10/2024
Quantity: 10 mL
Refill: 6 refills by 2/24/2024

triamcinolone 0.1 % cream

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Apply topically 2 times a day. Apply to both forearms.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/5/2023
Start date: 4/5/2023
End date: 6/12/2024
Action: Patient not taking
Quantity: 28.4 g
Refill: 1 refill by 4/4/2024

Wound Dressings (medihoney) topical gel

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Apply topically every other day. Apply to wound before applying dressing
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/26/2023
Start date: 4/26/2023
End date: 3/8/2025
Quantity: 44 mL
Refill: 4 refills by 4/25/2024

nystatin 100000 UNIT/ML mouth/throat suspension

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Swish and swallow 5 mL 4 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/31/2023
Start date: 10/31/2023
End date: 6/12/2024
Action: Patient not taking
Quantity: 60 mL
Refill: No refills remaining

pantoprazole 40 MG EC tablet

Discontinued by: Navalurkar, Reema, MD
Discontinued on: 8/20/2024
Reason for discontinuation: Med list cleanup
Instructions: Take 1 tablet (40 mg) by mouth 2 times a day before meals.
Authorized by: Nguyen, Liem Hieu, MD
Ordered on: 11/27/2023
Start date: 11/27/2023
End date: 8/20/2024
Quantity: 102 tablet
Refill: No refills remaining

atorvastatin 10 MG tablet

Discontinued by: Navalurkar, Reema, MD
Discontinued on: 9/24/2024
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (10 mg) by mouth daily.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 1/3/2024
Start date: 1/3/2024
End date: 9/24/2024
Quantity: 90 tablet
Refill: 3 refills by 1/2/2025

lidocaine 4 % patch

Discontinued by: Discharge Provider, Automatic
Discontinued on: 3/14/2025
Reason for discontinuation: System automatic cancellation for deceased patient
Instructions: Apply 1 patch onto the skin every 24 hours. Apply to painful area for up to 12 hours in a 24 hour period.
Authorized by: Nguyen, My-Linh Trinh, MD
Ordered on: 1/18/2024

02/16/2024 - Patient E-mail in Husky Health Same Day Clinic (continued)

Medication List (continued)

Start date: 1/18/2024
End date: 3/14/2025
Quantity: 15 each
Refill: No refills remaining

pentoxifylline ER 400 MG ER tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 3/13/2024
Instructions: take 1 tablet by mouth three times a day
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/15/2024
Start date: 2/15/2024
End date: 3/13/2024
Quantity: 90 tablet
Refill: No refills remaining

Stopped in Visit

None

Clinical Notes

Telephone Encounter

Neighbor Jr., William E, MD at 2/16/2024 1747

2/16/2024

MCV persistently elevated in the last year. Prior to that in the normal range. B12 is elevated, not low TSH normal in Nov 2023.

Lab Results

Component	Value	Date
TSH	2.715	11/22/2023
TSH	1.964	09/28/2017
TSH	2.113	02/24/2016
TSH	2.951	12/24/2013
TSH	1.538	10/21/2011
TSH	1.821	03/11/2008
TSH	1.228	02/27/2007

Not on meds such as anticonvulsants that would cause elevated MCV

Plan:
SMEAR eval
MCV
Copper level (given marginal nutrition in the past)

Separately, patient has had change in urine. Hx of UTIs. Could not obtain urine for adequate UA. Unfortunately patient's medication reactions include nitrofurantoin which caused confusion in 2016 and 2008, and penicillin and sulfa rashes. Recommendations for patient to increase fluids and return for urinalysis.

Jeanne;
The copper level was normal. This test was done to look for causes for your elevated red blood cell size. As I wrote earlier, the pathologist also look at the cells and did not find any abnormality.

Messages (continued)

Jean:
-- I just wrote that the lab was not able to run a urinalysis on the small amount of urine that you provided. I would ordinarily begin an antibiotic such as nitrofurantoin. However review of your records shows that you have reactions to nitrofurantoin which is caused confusion on 2 occasions in the past, as well as skin rashes to penicillin and sulfa antibiotics. Because of this it is essential we obtain a urine to clearly document that you do have a bladder infection. I would advise increasing your fluids in the meantime and coming in for repeat urine collection. I have ordered that. It can be did not done at your next visit or before.

--As I also wrote your red blood cells in the last year have been on the large size. We have checked a vitamin B12 which is not an issue. Your thyroid has been normal. I have ordered additional blood tests that should be done when you are next seen here.

Let me know if you have any questions.

William E Neighbor Jr, MD

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 2/14/2024 0940

Patient in for wound care today. She mentioned that her urine has changed in color. She did not describe any fever chills or night sweats. Plan is to obtain UA and urine culture.

Electronically signed by Neighbor Jr., William E, MD at 2/14/2024 10:55 AM

Perez, Delmis Joel, RN at 2/14/2024 0940

Pt in clinic with son, Louis, for continued wound care. Per son's report, pt continues to eat well, ambulation has improved and is able to get on the Procedure Room bed, self-showering, and exercises with the visiting therapist. Son reports the wounds have not been weeping much so the Qwick like dressing dry out and cause the pt pt. Changed to Carradres today. Provider stopped by to say hi and pt reported urinary issues. Provider ordered urine labs.

1. The silicone-edged dressing were gently removed.
2. The gelled hydrogel sheets in wounds were gently removed.
3. Chlorhexidine soap was applied to the wounds and the leg wrapped with a warm wet towel.
4. The sites were wiped with NS moistened gauze.
5. Lidocaine 2% jelly was applied to the open wounds.
6. Each open area was gently debrided using a 4 mm curette.
7. All sites were gently wiped with NS moistened gauze
8. Carradres hydrogel dressings were cut to fit and applied to each wound
9. 4 inch stretch gauze was wrapped around the LLE and taped to itself with paper tape
10. Surgilast 7.5 was placed over the gauze wrap
11. The sock the pt came with was pretty dirty and not reused

Left Leg wounds:

1. Left Medial Ankle: oval 2.7 cm x 1.4 cm x 0.1-0.2 cm, filling in from the base up
2. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 6.2 cm x 1.6 cm x 0.2. Distal portion reactive to the curette today. The whole wound is filling in from its base.
3. Left Distal Lateral Shin: 5.2 cm x 4.0 cm x 0.2 cm. Filling in from its base, the wound is much shallower.

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

Clinical Notes

Result Encounter Note

Neighbor Jr., William E, MD at 2/14/2024 1034

Jeanne:
-- Your blood sugar was in the normal range for having not fasted. Your hemoglobin A1c which is another measure of diabetes is stable and in the desired range.
--Your comprehensive metabolic panel showed normal liver and electrolytes. Your calculated kidney function was slightly less than 2 months ago.
--Your complete blood cell count shows elevated size of your red blood cells. This can indicate a vitamin B12 deficiency however rechecked that 2 months ago and your vitamin B12 level was actually higher than needed. However the size of your red blood cells has been substantially higher in the last year than previously. This will require additional test for further evaluation. There was no evidence of anemia
-- The lab could not run a urinalysis to look for infection on the basis of the small amount of urine you are able to provide. I will write you a separate message regarding this.

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 1/31/2024 1020

Pt in clinic with son, Louis, for continued wound care. Pt continues to eat well, ambulation has improved and is able to get on the Procedure Room bed, self-showering, and exercise with the visiting therapist though this ends soon. Pain related to shower slip and fall has improved though Right Knee pain continues. Saw provider today for post ER follow up.

1. The Surgilast mesh and son applied gauze wrap were gently removed.
2. The gelled hydrogel sheets in wounds were gently removed.
3. Chlorhexidine soap was applied to the wounds and the leg wrapped with a warm wet towel.
4. The sites were wiped with NS moistened gauze.
5. Lidocaine 2% jelly was applied to all open wounds.
6. Each open area was gently debrided using a 4 mm curette.
7. All sites were gently wiped with NS moistened gauze
8. QWICK dressings were trimmed to fit over each wound area
9. Cavalon No-Sting barrier film was applied to the intact skin surrounding each wound
10. QWICK dressings were cut to fit and applied to the 3 wounds: Left Medial Ankle applied with a 3x3 McKesson Silicon Edged dressing; Left Proximal Lateral Ankle and Superior Lateral Foot applied with a 6x6 McKesson Silicon Edged dressing;and the Left Distal Lateral Shin applied with a 4x4 McKesson Silicon Edged dressing.
11. Son advised to alternate between dressing and Surgilast #7 mesh every 3 days until next appt in 2 weeks. Son indicates he has enough supplies

Left Leg wounds:

1. Left Medial Ankle: oval 2.8 cm x 1.8 cm x 0.1-0.3 cm, filling in from the base up
2. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 6.5 cm x 1.8 cm x 0.2. Distal portion reactive to the curette today. The whole wound is filling in from its base.
3. Left Distal Lateral Shin: 5.5 cm x 4.2 cm x 0.2 cm. Filling in from its base, the wound is much shallower.

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 1/31/2024 0940

Jeanne Leonie Hoffman is a 99 year old female here to discuss the following:

Chief Complaint

Patient presents with

- ER FOLLOW UP
  ER f/u and wound care

Visit type (in person vs telemedicine vs phone): In person with her son Louis. They forgot her hearing aids so she is able to understand little of the conversation today.

History

Patient comes in for follow-up of care and follow-up from emergency room visit. She was seen in the emergency room January 18, 2024 for hip pain that was felt to be due to compression fractures and LS-spine as well as DJD. It was noted that she had history of both Tylenol and opiate overuse. Lidocaine patches were prescribed. It was noted that 2 to 3 weeks prior to the ER visit she slipped in the shower. She did catch herself with handrails but fell onto her lower back and buttock with her knees bent.

Today her son Louis reports that she is doing much better at home. She is walking with a walker. There have been no new falls. Home physical therapy and Occupational Therapy have been completed. She is eating. She has not had any fever chills or night sweats. She has not been complaining of significant pain.

Her son has been doing dressing changes.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008
Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007
  Lives in subsidized housing on Bainbridge
  Bremerton APS at 1-888-833-4925
  Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
  Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
  7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- Hypercholesterolemia [E78.00] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001. Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 . Advise Vit D 800 IU daily.

- Community acquired bacterial pneumonia [J15.9] 11/22/2023
- Primary open angle glaucoma (POAG) of both eyes [H40.1130] 10/10/2019
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC) [I70.232, I70.242] 09/24/2018
- Vitamin D deficiency [E55.9] 07/09/2018
- Primary osteoarthritis of both hips [M16.0] 02/01/2017

- Imbalance [R26.89] 11/02/2016
- History of recurrent deep vein thrombosis (DVT) [Z86.718] 06/02/2016
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication (HCC) [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

Medications

Outpatient Medications Marked as Taking for the 1/31/24 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• acetaminophen 500 MG Oral Tab	1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition		
• atorvastatin 10 MG tablet	Take 1 tablet (10 mg) by mouth daily.	90 tablet	3
• Calcium Carbonate 500 MG Oral Chew Tab	Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.		
• Cholecalciferol 1000 units Oral Tab	Take 2 tablets (2,000 units) by mouth daily.		
• lidocaine 4 % patch	Apply 1 patch onto the skin every 24 hours. Apply to painful area for up to 12 hours in a 24 hour period.	15 each	0
• MULTIPLE VITAMIN OR	Take by mouth.		
• nystatin 100000 UNIT/ML mouth/throat suspension	Swish and swallow 5 mL 4 times a day.	60 mL	0
• ofloxacin 0.3 % ophthalmic solution	Place 1-2 drops into left EYE 4 times a day.	5 mL	1
• pentoxifylline ER 400 MG ER tablet	take 1 tablet by mouth three times a day	90 tablet	0
• timolol maleate 0.5 % ophthalmic solution	instill 1 drop into both eyes twice a	10 mL	6

01/31/2024 - Office Visit in Husky Health Same Day Clinic (continued)

Clinical Notes (continued)

	day		
• triamcinolone 0.1 % cream	Apply topically 2 times a day. Apply to both forearms.	28.4 g	1
• Wound Dressings (medihoney) topical gel	Apply topically every other day. Apply to wound before applying dressing	44 mL	3
• Wound Dressings (medihoney) topical gel	Apply topically daily. Apply to ulcerations on legs. Apply dressing over the Medi Honey.	88 mL	6

Social history:

History

Sexual Activity

- Sexual activity: Not Currently

Social History

Tobacco Use

- Smoking status: Never
- Smokeless tobacco: Never

Substance Use Topics

- Alcohol use: No

Objective:

BP (!) 142/72 | Pulse 62

Estimated body mass index is 17.61 kg/m² as calculated from the following:
Height as of 11/22/23: 5' (1.524 m).
Weight as of 11/28/23: 40.9 kg (90 lb 2.7 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
(!) 142/72	62	---	---	---	10:34 AM	1/31/2024

Last blood pressure recorded in this encounter: **(!) 142/72**
General: No acute distress
The patient is alert and seems to be oriented. Communication is impaired because of absence of hearing aids today. She moves all 4 extremities.

For skin examination see documentation by nurse

Lab and other tests:
In the emergency room January 18, 2023, left femur x-rays unremarkable except for mild hip osteoarthritis and LS-spine film showed compression deformities at L1 and L3 that appear to be chronic, lumbar levoscoliosis.
X-rays of the right knee showed intact hardware but no acute injury. Left knee showed no evidence of fracture. Pelvis x-ray right hip showed prior ORIF of the femoral neck with partially visualized screw and plate fixation of the femoral shaft. Left hip showed no fracture.

Assessment and Plan:

01/31/2024 - Office Visit in Husky Health Same Day Clinic (continued)

Clinical Notes (continued)

1. Lower extremity ulceration, left, limited to breakdown of skin (HCC)
Chronic with waxing and waning course but currently overall improved with every 2-week care in our clinic and home care by her son. Dressing changes were reviewed

2. Adult failure to thrive syndrome
Currently resolved. She is eating well. She looks healthy. She is now 99.

William E Neighbor Jr, MD
Clinical Professor
Department of Family Medicine
University of Washington

How to contact us:
For urgent problems, contact the Hall Health Triage Nurse line at 206-221-2517 (Mon-Fri, 8a-5p)
For non urgent problems, contact us through My chart or by calling my medical assistant at 206-616-9358
For after hours and weekend care, Hall Health after hours: 206-520-7511.
Thank you for choosing the Hall Health Center. We welcome any feedback about the care you received today.

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

ED Provider Note

ED Provider Notes by Nguyen, My-Linh Trinh, MD at 1/18/2024 1752

Attestation signed by Van Der Vlugt, Theresa M, MD at 1/18/2024 9:49 PM

I saw and evaluated the patient. I have reviewed the resident's/fellow's findings and agree. Grand elder, hard of hearing, is brought to the ED for evaluation by her son to evaluate change in her gait, who promptly leaves and goes back to Bainbridge Island and initially refuses to come back and pick her up tonight. At first he tells us there are no more ferries (at 8:00pm), but there are clearly more ferries. He wants to pick her up at 8 AM tomorrow, but she is ready for discharge now, and after discussion with social work, he does agree to come back and pick her up. On exam today she does not appear to have any septic joints, fractures, or inflammatory arthritis, although she clearly has diffuse osteoarthritis and some chronic compression fractures on her L-spine x-ray. Pain treatment is limited in this patient as she has had both Tylenol and opiate overuse. We recommended they try lidocaine patches and follow-up with PCP, with whom in epic

review she seems well-connected.

No Critical Care

Theresa M.van der Vlugt MD, FACEP
Attending Physician, Emergency Medicine

CHIEF COMPLAINT

Chief Complaint

Patient presents with

- Hip Pain

HISTORY OF PRESENT ILLNESS AND REVIEW OF SYSTEMS

Jeanne is a 99 year old female with history of T2DM, hypertension, and chronic venous stasis ulcers who was brought to the ED by her son for evaluation of antalgic gait after a fall 2-3 weeks ago. HPI provided by both patient and her son. They state that she was taking a shower 2-3 weeks ago and slipped when she stepped onto a towel that her son had placed over a wet spot. She was able to grab onto handrails on either side, preventing any head strike or injury to her upper body however she landed on her lower back/buttock with her knees bent. They have been monitoring her symptoms with the assistance of her primary care provider and she continues to work with physical therapy. Her son states that her primary care provider, physical therapy, and wound care have all evaluated her and none have been able to determine the source of her intermittent pain. Occasionally, she will tense up but she is unable to consistently describe where her pain is. Here, she states that she has pain primarily in her left hip but also reports pain in her bilateral knees and then inconsistently in diffuse bilateral legs. Her son is primarily concerned because she enjoys walking with the assistance of her walker but more recently she has been walking "pegged legged" where she bears weight but does not bend at the knees. Otherwise, she has been eating well, no ill with cough or cold symptoms, no chest pain or shortness of breath, no abdominal pain, no nausea, vomiting, or diarrhea, and has had normal stool and urine.

PAST MEDICAL AND SURGICAL HISTORY

Past Medical History:

Diagnosis	Date
• Closed fracture of right distal femur (HCC)	7/15/2021
• Fall	9/3/2019
• Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)	5/26/2019
• Venous stasis ulcer (HCC)	5/26/2019
• Diabetic ulcer of lower extremity (HCC)	9/24/2018

01/18/2024 - ED in UW Montlake Emergency (continued)

T: **(!) 35.8 °C** (01/18/24 1418) **BP:** **(!) 126/58** (01/18/24 1900) **HR:** **67 (01/18/24 1900)** **RR:** 16 (01/18/24 1900) **SpO2:** 100 % (01/18/24 1900) Room air **T range:** Temp Min: 35.8 °C Max: 35.8 °C (no weight taken for this visit) (no height taken for this visit) There is no height or weight on file to calculate BMI.

Physical Exam

Constitutional:
General: She is not in acute distress.
Comments: **Elderly, frail appearing**

HENT:
Head: Normocephalic and atraumatic.
Right Ear: External ear normal.
Left Ear: External ear normal.
Nose: Nose normal.

Eyes:
General: No scleral icterus.
Extraocular Movements: Extraocular movements intact.

01/18/2024 - ED in UW Montlake Emergency (continued)

ED Provider Note (continued)

Neck:
Comments: **No midline/paraspinal tenderness over cervical and thoracic regions. Tenderness towards sacral region with L SI joint tenderness and diffuse tenderness over left buttock and hip**
Cardiovascular:
Rate and Rhythm: Normal rate and regular rhythm.
Heart sounds: No murmur heard.
Pulmonary:
Effort: Pulmonary effort is normal. No respiratory distress.
Breath sounds: No wheezing.
Abdominal:
General: There is no distension.
Palpations: Abdomen is soft.
Tenderness: There is no abdominal tenderness.
Musculoskeletal:
General: No deformity.
Cervical back: No tenderness.
Right lower leg: Edema present.
Left lower leg: Edema present.
Comments: **There is tenderness over left femur, bilateral knees, and bilateral ankles**
Skin:
General: Skin is warm.
Findings: No rash.
Comments: **There are ulcers over the right lower leg that is bandaged by wound care**
Neurological:
Mental Status: She is alert. Mental status is at baseline.
Psychiatric:
Mood and Affect: Mood normal.
Behavior: Behavior normal.

LABORATORY:

Labs Reviewed - No data to display

IMAGING:

ED Wet Read -

XR Femur 2 Vw Left

Final Result

No fracture detected. Mild left hip osteoarthritis.
Alignment is normal. No soft tissue abnormality.
Atherosclerosis.

XR L Spine 2-3 View

Final Result

Views extend from T10 to the sacrum.

01/18/2024 - ED in UW Montlake Emergency (continued)

ED Provider Note (continued)

Chronic appearing compression deformities at L1-L3. No definite acute fracture.

Lumbar levoscoliosis. Degenerative change is present.

Partially visualized right femur dynamic screw fixation.

XR Knee 4+ View Bilat

Final Result

RIGHT:
No fracture detected. Sideplate and screw fixation of the distal femur. Hardware is intact. Alignment is normal. No soft tissue abnormality or knee joint effusion identified. Atherosclerosis.

LEFT:
No fracture detected. Alignment is normal. No soft tissue abnormality or knee joint effusion identified. Atherosclerosis.

XR Pelvis 1 Or 2 W 1 Vw Hip Bilat

Final Result

PELVIS:
No fracture, dislocation, or pelvic ring disruption. Severe vascular calcifications.

RIGHT HIP:
Prior ORIF of the femoral neck and partially visualized screw and plate fixation of the femoral shaft. No fracture detected. Alignment is normal. No soft tissue abnormality.

LEFT HIP:
No fracture detected. Alignment is normal. No soft tissue abnormality.

Bones are overall diffusely demineralized, which slightly limits evaluation. Cross-sectional imaging could allow further evaluation, if there is ongoing clinical concern for subtle fracture.

Radiology Final Result -
No image results found.

ED Provider Note (continued)

EKG DOCUMENTATION

No EKG was performed

ED COURSE/MEDICAL DECISION MAKING

Jeanne is a 99 year old with history of T2DM, hypertension, and chronic venous stasis ulcers who was brought to the ED by her son for evaluation of antalgic gait after a fall 2-3 weeks ago. Vitals largely unremarkable other than T 35.8. Given recent trauma there is concern for fracture. XR of lumbar spine, pelvis, bilateral hip, left femur, and bilateral knees obtained and were negative. Lidocaine patch was given for pain management given report that she has previously inadvertently overdosed on Tylenol and she was highly sensitive to opioids, requiring multiple doses of narcan. Son was updated on results and plan for follow-up with primary care provider and physical therapy given no fractures. Son states that he left to catch the last ferry to Bainbridge Island and will pick up Jeanne in the morning. MSW involved to try to arrange for transportation. Son states that if he does not receive a call by 10PM, this is when he will shut off all of his phone lines.

ED Course as of 01/18/24 2130

Thu Jan 18, 2024

1616	XR without evidence of fracture [MN]
1727	Lidocaine patch applied for management of pain [MN]
1918	Chronic compression deformities of lumbar spine without evidence of fracture. No fracture of left femur or bilateral knees. [MN]
2005	Contacted son to update on results and plan to discharge. He states that they live on Bainbridge Island and he will pick her up tomorrow morning. [MN]
2007	We discussed with MSW transportation options. [MN]
2030	We called son again to inform him that Jeanne does not qualify for HopeLink. He states that he is unable to come pick her up because they take the bus, ferry, and train so he would not pick her up until 8am. [MN]
2034	Our MSW spoke with patient's son and informed him that he will need to come pick up his mother. Once he arrives at the ED, the ED will be able to call him a Lyft to get to the ferry in a timely manner. [MN]
2053	Dr. Soni taking over care of this patient. XRs negative for fracture, awaiting pickup by son. [MS]

Medications Given in the ED:

Medications

lidocaine (Lidoderm) 4 % per patch 1 patch (1 patch Transdermal Medication Applied 1/18/24 1705)

CLINICAL IMPRESSION AND DISPOSITION (Link)

Clinical Impressions:

[M25.552] Left hip pain
[W19.XXXA] Fall, initial encounter

Neighbor Jr., William E, MD
4060 NE Stevens Way
Box 354410
Seattle WA 98195-4410
206-685-1011

In 2 weeks

Patient was given scripts for the following medications.

New Prescriptions

LIDOCAINE 4 % PATCH	Apply 1 patch onto the skin every 24 hours. Apply to painful area for up to 12 hours in a 24 hour period.

Disposition: Discharge

Clinical Notes

Discharge Instructions

Nguyen, My-Linh Trinh, MD at 1/18/2024 2019

You were seen in the UWMC emergency department for evaluation of left hip pain and abnormal gait after a fall 2-3 weeks ago.

We imaged your lower back, pelvis, hips, left femur, and bilateral knees without any evidence of new fracture. Given your prior history of overdose on Tylenol as well as sensitivities of opioids,

Electronically signed by Nguyen, My-Linh Trinh, MD at 1/18/2024 8:33 PM

Ordering provider: Van Der Vlugt, Theresa M, MD 01/18/24 1420
Resulted by: Hartman, Jason Brett, MD
Performed: 01/18/24 1437 - 01/18/24 1450
Resulting lab: UW RADIOLOGY
Narrative:

Order status: Completed

Filed by: Interface, Radiology Results In 01/18/24 1503
Accession number: 41011115

RADIOGRAPHS OF THE BILATERAL HIPS

EXAMINATION:
AP view of the pelvis, 2 views of the bilateral hips.

CLINICAL INDICATION:
fall

COMPARISON:
None.

FINDINGS AND
Impression:

Imaging (continued)

PELVIS:
No fracture, dislocation, or pelvic ring disruption. Severe vascular calcifications.

RIGHT HIP:
Prior ORIF of the femoral neck and partially visualized screw and plate fixation of the femoral shaft. No fracture detected. Alignment is normal. No soft tissue abnormality.

LEFT HIP:
No fracture detected. Alignment is normal. No soft tissue abnormality.

Bones are overall diffusely demineralized, which slightly limits evaluation. Cross-sectional imaging could allow further evaluation, if there is ongoing clinical concern for subtle fracture.

AFTER VISIT SUMMARY

Jeanne L. Hoffman MRN: U8170135 — 1/18/2024 — UW Montlake Emergency 206-598-3300

Instructions

You were seen in the UWMC emergency department for evaluation of left hip pain and abnormal gait after a fall 2-3 weeks ago.

We imaged your lower back, pelvis, hips, left femur, and bilateral knees without any evidence of new fracture. Given your prior history of overdose on Tylenol as well as sensitivities of opioids,

Your medications have changed

START taking:
lidocaine (Lidoderm)

Review your updated medication list below.

Pick up these medications at RITE AID #05215 05215 301 HIGH SCHOOL ROAD NE BAINBRIDGE ISLAND WA 206-842-4065 206-780-2781 98110-1608

Your ED Test Results

Test results will appear in your MyChart account as soon as they are available. Your ED physician/provider should have reviewed available results with you during your ED visit. However, you may think of other questions after your visit; some results may be difficult to interpret or understand. **If you have concerns or questions about your results, please contact your primary care physician's office.** If you do not have a primary care physician you can call 206-520-7520 Monday through Friday between the hours of 8am-5pm.

You will also be able to review your medical record from the emergency department visit once it is finalized. If you have reviewed your medical record and believe there is an error you may complete a Request for Correction or Amendment of the Medical Record form and submit it via mail, fax, or e-mail to the locations listed below.

For:
Harborview Medical Center
UW Medical Center - Montlake
UW Medical Center - Northwest

Send Requests to:
Box 359738

Patient Information for Inclusion in the UW Medicine Patient Directory

Please Read this Statement Carefully

I understand that I have a choice as to whether or not to be included in the UW Medicine patient directory. My name and location will be included in the patient directory unless I would prefer not to receive phone calls or visitors. My decision is indicated by marking a box and signing this form.

☑ **YES, please include me in the Patient Directory.** The hospital has informed me that my name and location will be included in its hospital directory. This information will be made available to people who ask for me by name such as my relatives, friends and fellow employees.

- Harborview Medical Center
- University of Washington Medical Center – Northwest
- University of Washington Medical Center – Montlake / Fred Hutchinson Cancer Center
- Valley Medical Center

If I have provided my religious affiliation to UW Medicine in the past or if I provide my religious affiliation to UW Medicine now, I authorize its disclosure to clergy of my religious affiliation. Disclosure of my religious affiliation may result in a visit from a clergy member of my affiliation while I am being treated at UW Medicine.

If you have provided your religious affiliation to UW Medicine in the past and do not want a visit from a clergy member of your affiliation, please inform the registration staff.

☐ **NO, please do not include me in the Patient Directory.** I do not want my name or location included in the UW Medicine Patient Directory. **If this is my choice, I understand UW Medicine staff will not be able to confirm I am a patient or share my location with any family or friends. I also understand that by choosing not to be in the directory, UW Medicine will be unable to deliver items *(for example, flowers and gifts)* addressed to me.**

For Staff Use Only

☐ **ADMIN OPT-OUT:** Please provide reason for Administrative Opt-Out

☐ Crime Victim ☐ Employee ☐ Incarcerated Patient
☐ Involuntary Commitment ☐ Unable to Interview Patient ☐ Media Interest

Name of person requesting opt out *(if other than patient)*: _____

By signing below, it shows that you have read this document. If there is any part of this form that is unclear, be sure to ask questions about it.

SIGNATURE *(PATIENT OR PATIENT'S AUTHORIZED REPRESENTATIVE)*	PRINT NAME	DATE
Jeanne L Hoffman		1/18/24

IF SIGNED BY PERSON OTHER THAN THE PATIENT, CHECK RELATIONSHIP TO PATIENT:

☐ 1. Court-appointed Guardian ☐ 2. Durable Healthcare Power of Attorney ☐ 3. Spouse/registered domestic partner ☐ 4. Adult Child(ren)
☐ 5. Parent(s) ☐ 6. Adult Brother(s)/Sister(s) ☐ 7. Adult Grandchild(ren) ☐ 8. Adult Niece(s)/Nephew(s)
☐ 9. Adult Aunt(s)/Uncle(s) ☐ 10. Adult Friend with executed Declaration per RCW 7.70.065

FOR MINOR PATIENTS:

☐ 1. Guardian/legal custodian ☐ 2. Court-authorized person for child in out-of-home placement
☐ 3. Parent(s) ☐ 4. Holder of signed authorization from parent(s) ☐ 5. Adult representing self to be a relative responsible for the minor's health

STEPS TO APPEAL YOUR DISCHARGE

- **STEP 1**: You must contact the QIO no later than your planned discharge date and before you leave the hospital. If you do this, you will not have to pay for the services you receive during the appeal *(except for charges like copays and deductibles)*.
  - Here is the contact information for the QIO:
    KEPRO:
    Toll-free Phone: 1-888-305-6759
    Toll-free Fax: 1-833-868-4064

You can file a request for an appeal any day of the week.
Once you speak to someone or leave a message, your appeal has begun.

- Ask the hospital if you need help contacting the QIO.
- The name of this hospital is:

☐ HMC: Medicare Provider Number ☐ 50-0064 *(acute care)* ☐ 50-S064 *(psych)* ☐ 50-T064 *(rehab)*
☑ UWMC: Medicare Provider Number ☑ 50-0008 *(acute care)* ☐ 50-S008 *(psych)* ☐ 50-T008 *(rehab)*

- **STEP 2**: You will receive a detailed notice from the hospital or your Medicare Advantage or other Medicare managed care plan (if you belong to one) that explains the reasons they think you are ready to be discharged.
- **STEP 3**: The QIO will ask for your opinion. You or your representative need to be available to speak with the QIO, if requested. You or your representative may give the QIO a written statement, but you are not required to do so.
- **STEP 4**: The QIO will review your medical records and other important information about your case.
- **STEP 5**: The QIO will notify you of its decision within 1 day after it receives all necessary information.
  - If the QIO finds that you are not ready to be discharged, Medicare will continue to cover your hospital services.
  - If the QIO finds you are ready to be discharged, Medicare will continue to cover your services until noon of the day after the QIO notifies you of its decision.

IF YOU MISS THE DEADLINE TO REQUEST AN APPEAL, YOU MAY HAVE OTHER APPEAL RIGHTS:

- If you have Original Medicare: Call the QIO listed on Page 1.
- If you belong to a Medicare health plan, call your plan at: _____, _____
  (plan name) (plan phone number)

You have the right to get Medicare information in an accessible format, like large print, Braille, or audio. You also have the right to file a complaint if you feel you've been discriminated against. Visit Medicare.gov/about-us/accessibility-nondiscrimination-notice, or call 1-800-MEDICARE (1-800-633-4227) for more information. TTY users can call 1-877-486-2048.

Additional Information (Optional):

Print Physician Name:_____NPI: ☐ HMC 1053359729 ☑ UWMC 1326002049

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1019. The time required to complete this information collection is estimated to average 15 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21244-1850.

AN IMPORTANT MESSAGE FROM MEDICARE ABOUT YOUR RIGHTS

DEPARTMENT OF HEALTH & HUMAN SERVICES
Centers for Medicare & Medicaid Services
OMB Approval No. 0938-1019

YOUR RIGHTS AS A HOSPITAL INPATIENT:

- You can receive Medicare covered services. This includes medically necessary hospital services and services you may need after you are discharged, if ordered by your doctor. You have a right to know about these services, who will pay for them, and where you can get them.
- You can be involved in any decisions about your hospital stay.
- You can report any concerns you have about the quality of care you receive to your QIO at: KEPRO 1-888-305-6759. The QIO is the independent reviewer authorized by Medicare to review the decision to discharge you.
- You can work with the hospital to prepare for your safe discharge and arrange for services you may need after you leave the hospital. When you no longer need inpatient hospital care, your doctor or the hospital staff will inform you of your planned discharge date.
- You can speak with your doctor or other hospital staff if you have concerns about being discharged.

YOUR RIGHT TO APPEAL YOUR HOSPITAL DISCHARGE:

- You have the right to an immediate, independent medical review (appeal) of the decision to discharge you from the hospital. If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
- If you choose to appeal, the independent reviewer will ask for your opinion. The reviewer also will look at your medical records and/or other relevant information. You do not have to prepare anything in writing, but you have the right to do so if you wish.
- If you choose to appeal, you and the reviewer will each receive a copy of a detailed explanation about why your covered hospital stay should not continue. You will receive this detailed notice only after you request an appeal.
- If the QIO finds that you are not ready to be discharged from the hospital, Medicare will continue to cover your hospital services.
- If the QIO agrees services should no longer be covered after the discharge date, neither Medicare nor your Medicare health plan will pay for your hospital stay after noon of the day after the QIO notifies you of its decision. If you stop services no later than that time, you will avoid financial liability.
- If you do not appeal, you may have to pay for any services you receive after your discharge date.

Step by step instructions for calling the QIO and filing an appeal are on page 2.

To speak with someone at the hospital about this notice, call 206 598 ~~8001~~ 3111

Please sign below to indicate you received and understood this notice.

I have been notified of my rights as a hospital inpatient and that I may appeal my discharge by contacting my QIO.

None

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 1/17/2024 0940

Pt in clinic with son, Louis, for continued wound care. Pt continues to eat well, ambulation is a bit less due to how cold it's been, self-showering, and exercise with the visiting therapist though this ends soon. Pt and son endorse a slip coming out of the shower a couple of weeks ago with no obvious injuries. Since last PT appt 5 days ago or so, though, pt has had increased lower back/pelvis pain. She says she's a "tough old gal" and can work through it. Will schedule an appt with her provider for next week for further evaluation after which she'll have another wound management appt.

1. The silicone edged dressings were gently removed.
2. The gelled hydrogel sheets in wounds were gently removed.
3. Chlorhexidine soap was applied to the wounds and the leg wrapped with a warm wet towel.
4. The sites were wiped with NS moistened gauze.
5. Lidocaine 2% jelly was applied to all open wounds.
6. Each open area was gently debrided using a 4 mm curette.
7. All sites were gently wiped with NS moistened gauze
8. QWICK dressings were trimmed to fit over each wound area
9. A 6 inch gauze wrap was used around the LLL to hold the QWICK in place
10. Surgilast #7 mesh was placed over the gauze wrap to keep it in place

Left Leg wounds:

1. Left Medial Ankle: oval 2.3 cm x 1.5 cm x 0.1 cm, filling in from the base up
2. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 9.2 cm x 2.0 cm x 0.2. Distal portion reactive to the curette today. The whole wound is filling in from its base.
3. Left Distal Lateral Shin: 5.8 cm x 4.0 cm x 0.2 cm. Filling in from its base, the wound is much shallower.

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 1/3/2024 0940

Pt in clinic with son Louis, for continued wound care. Pt continues to have improved eating, ambulation, self-showering, and exercise especially with the visiting therapists. Appt scheduled for January 10, 2024, for further management.

1. The silicone edged dressings were gently removed.
2. The gelled hydrogel sheets in wounds were gently removed.
3. Chlorhexidine soap was applied to the wounds and the leg wrapped with a warm wet towel.
4. The sites were wiped with NS moistened gauze.
5. Lidocaine 2% jelly was applied to all open wounds.
6. Each open area was gently debrided using a 4 mm curette.
7. All sites were gently wiped with NS moistened gauze
8. Cavilon No Sting Skin Barrier was applied around the wounds
9. QWICK dressings were trimmed to fit over each wound area
10. They were covered with McKesson Hydrocellular bordered dressings with silicone adhesive.

Left Leg wounds:

1. Left Medial Ankle: oval 2.3 cm x 1.7 cm x 0.1 cm.
2. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 8.0 cm x 2.2 cm x 0.2-0.4.
3. Left Distal Lateral Shin: 5.6 cm x 3.8 cm x 0.2-0.3 cm.

Electronically signed by Perez, Delmis Joel, RN at 1/3/2024 10:50 AM

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

12/27/2023 - Clinical Support Visit in Husky Health Same Day Clinic (continued)

After Visit Summary (continued)

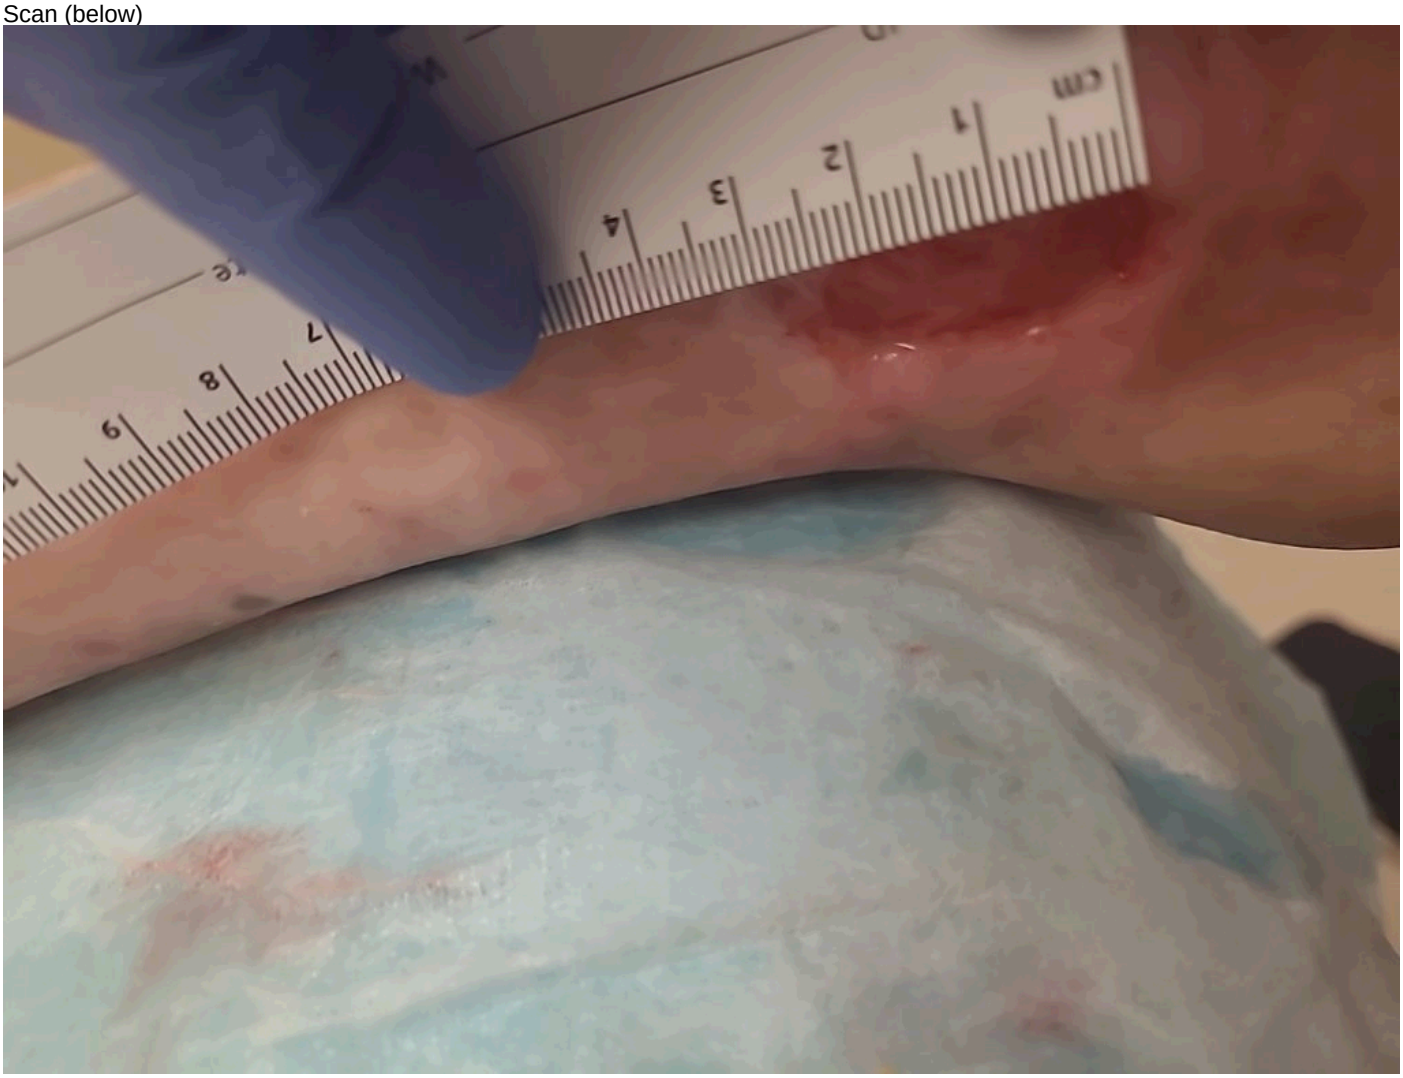
How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.



If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 12/13/2023 0940

Pt in clinic with son Louis, for continued wound care. Pt and son endorse improved eating, ambulation, and exercise especially with the visiting therapists. Seems there was confusion about the visiting nurse services with the son acknowledging their importance and having them come to help with bathing, etc. Appt scheduled for December 27, 2023, for further management.

1. The Mepilex with silicone edged dressings were gently removed.
2. The gelled Aquacel sheets in the two larger lateral wounds were gently removed.
3. Chlorhexidine soap was applied to the wounds and the leg wrapped with a warm wet towel.
4. The sites were wiped with NS moistened gauze
5. Lidocaine 2% jelly was applied to all open wounds
6. Each open area was gently debrided using a 4 mm curette
7. All sites were gently wiped with NS moistened gauze
8. Carradres Gel sheets were trimmed to fit over each wound area
9. Cavilon No Sting Skin Barrier was applied around the gel sheets
10. They were covered with McKesson Hydrocellular bordered dressings with silicone adhesive.

Left Leg wounds:

1. Left Medial Ankle: oval 2.6 cm x 2.0 cm x 0.1 cm.
2. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 8.2 cm x 2.3 cm x 0.2-0.4.
3. Left Distal Lateral Shin: 6.2 cm x 4.0 cm x 0.2-0.3 cm.

Electronically signed by Perez, Delmis Joel, RN at 12/13/2023 10:40 AM

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

Telephone Encounter

Mohova, Elena A, CMA at 12/12/2023 1105

Received a call from Louis on 12/11/23 around 4pm, stating the he still have not received any supplies for Jeanne (for wound care). Jeanne is scheduled for her wound check/wound care on Wednesday, 12/13/2023 with our nurse. Louis said that he has the supplies for 2 more times to change the dressing and then he will be out of supplies. He also mentioned that "Jeanne had her therapy session and is improving drastically".

Electronically signed by Mohova, Elena A, CMA at 12/12/2023 11:09 AM

Mohova, Elena A, CMA at 12/12/2023 1630

Received a call from the nurse from Home Health Care asking for verbal orders for continuing occupational therapy as follow: once per week for 2 weeks, then once per week every other week for 4 weeks. Later, received all the orders by fax; orders signed and faxed back. Signed orders scanned under the OV on 12/6/23

Yes.... Jean has in home therapy, OT and wound care.

"I will be running out of wound care supplies by the weekend."

Jean is responding to home therapy quite well, including supplementary exercise during the day.

A social worker scheduled for next week.

Louis.
I called your phone this morning. I wanted to make sure you have the wound care supplies you need--which I believe you do and that you are accepting help from the local wound care nurses and bath aides, etc, as this help is important to good care of Jeanne.

Telephone Encounter

Perez, Delmis Joel, RN at 12/7/2023 1506

Returned the pt's son's call about wound care supplies. He states they only have enough for one change prior to next week's appt. Retrieved the pt's wound care supplier information from the son and her chart. Faxed over the prescription filled out while she was admitted and sent it through the EPIC fax program. Will verify its receipt.

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 12/6/2023 1020

Pt in clinic with son Louis, for continued wound care. Pt had been hospitalized for about a week after the last visit and had a wound care consult while inpatient. This is her first visit back to Hall Health. Followed the directions outlined by the Wound Care Nurse as much as possible with the available supplies here. Wound care nurse will be notified of today's encounter. Appt schedule for next Wednesday for further management.

1. The Mepilex with silicone edged dressings were gently removed.
2. The gelled Aquacel sheets in the two larger lateral wounds were gently removed.
3. The dryer Aquacel in the medial ankle and mid shin wounds were moistened with NS and gently removed.
4. Chlorhexidine soap was applied to the wounds and the leg wrapped with a warm wet towel.
5. The sites were wiped with NS moistened gauze
6. Lidocaine 2% jelly was applied to all open wounds
7. Each open area was gently debrided using a 4 mm curette
8. All sites were gently wiped with NS moistened gauze
9. Carradres Gel sheets were trimmed to fit over each wound area
10. Cavilon No Sting Skin Barrier was applied around the gel sheets
11. They were covered with a mixture of Mepilex bordered dressings and Hydrocellular bordered dressings with silicone adhesive.

Left Leg wounds:
1. Left Medial Ankle: oval 2.6 cm x 1.5 cm x 0.1 cm.
2. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 8.6 cm x 2.2 cm x 0.2-0.4.
3. Left Distal Lateral Shin: 5.5 cm x 3.6 cm x 0.2-0.3 cm.
4. Multiple mid shin cutaneous the largest, of which, is 1.8 cm x 0.9 cm x 0.1 cm.

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

Wound care supplies

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting Delmis Joel Perez, RN)	12/12/2023 7:16 PM

Messages (continued)

Jean's wound is greatly improving, she is also responding to physical therapy and is consuming more food.

Have not received any any wound care supplies.
Will run out this weekend.
Had a visit visiting RN interview.
Build another hand railing/exercise bar, to practice sitting up, standing and navigation aid

See you in morning.
Happy Holiday

Hi Jeanne and Louis,

Great seeing you both today! After comparing today's pictures to those taken a few weeks ago, all of your wounds have shrunk a couple by more than a half inch! I reviewed the chart documents from your hospitalization and I couldn't determine where the order for the wound care supplies was sent. The order was for a month's worth of supplies so I'd like to get an order from us to your medical supplier as soon as possible. Please do let me know as soon as possible.

See you next week,
Delmis Perez, RN, BSN

Clinical Notes

Progress Notes

Mohova, Elena A, CMA at 12/6/2023 1000

Received a call from Louis on 12/5/23 with the following update on Jeanne's health:

- GI issues - improved, sxs clearing up, her stool improved and back to normal, with no black colored stool anymore, patient is able to walk to the bathroom herself
- pneumonia - sxs are improving, little to no cough, breathing improving
- appetite improved, patient is getting 1/2 cup a food per meal, her thrush almost gone

In general, Jeanne is doing well, improving with therapy that been started recently after hospital discharge, at 2 time per week now. Patient is complying with therapy, it helps to make her a little stronger

Electronically signed by Mohova, Elena A, CMA at 12/12/2023 6:01 PM

Neighbor Jr., William E, MD at 12/6/2023 1000

Jeanne Leonie Hoffman is a 98 year old female here to discuss the following:

Chief Complaint

Patient presents with

- ER FOLLOW UP
  Please see notes about update

Visit type (in person vs telemedicine vs phone): in person with son Louis present

History
Subsequent to last clinic visit at which time patient was referred to the emergency room she was hospitalized for community-acquired pneumonia and concerns about failure to thrive. During hospitalization:
--For community-acquired pneumonia she was treated with ceftriaxone 1 g daily for 5 to 7 days and azithromycin 500 mg for 3 days.
-- For hematochezia, episode of melena and constipation she was treated with PPI pantoprazole 40 mg twice daily and bowel regimen with stool softeners
-- Urine culture grew 100,000 colonies of mixed flora with gram-negative rods which were felt to be covered by ceftriaxone for CAP.
-- For difficulties swallowing and history of recent thrush she was continued on nystatin swish and swallow, one-to-one assistance for oral intake and meds crushed. Consider endoscopy in the future
-- For malnutrition arrangements following hospitalization with Franciscan healthcare remade
-- For mild macrocytic anemia she received 3 doses of IV iron
-- For left lower extremity ulcerations wound care consult was ordered
-- For hypertension, as the patient was normal tensive in the hospital losartan was held
-- Patient was continued on atorvastatin for hyperlipidemia and pentoxifylline for peripheral vascular disease.
-- For subacute progressive right knee pain it was felt to be likely secondary to osteoarthritis versus sciatica but markedly improved. She was treated with Tylenol as needed and lidocaine patches

Patient has been referred to Franciscan home health which will be starting physical therapy December through January initially twice weekly and then once weekly. Contact person is Matt at phone number 206-605-6817.

Updates today
-- Both Jean and her son report that she is eating much better. Appetite is improved
-- She no longer has sores in her mouth
-- Blood in stools which was present in the hospital stay is no longer present
-- She has not had fever chills night sweats, shortness of breath, abdominal pain or discomfort with urination
-- Her son reports that the chronic ulcerations in the left lower leg are improving. They do need additional dressing supplies
-- Her right knee pain for which she was seen on the day of her hospital admission has resolved
-- She is walking with assistance in her home apartment

Review of Systems:
No fever chills or night sweats

Problem List
Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

• Adult failure to thrive syndrome [R62.7]	10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

12/06/2023 - Office Visit in Husky Health Same Day Clinic (continued)

Clinical Notes (continued)

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- Hypercholesterolemia [E78.00] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations

Objective:

BP 120/67 | Pulse (!) 48 | Temp 36.8 °C (Temporal) | SpO2 99%
Estimated body mass index is 17.61 kg/m² as calculated from the following:
Height as of 11/22/23: 5' (1.524 m).
Weight as of 11/28/23: 40.9 kg (90 lb 2.7 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
120/67	(!) 48	---	---	---	9:59 AM	12/6/2023

Last blood pressure recorded in this encounter: 120/67
General: No acute distress
Jean has her hearing aids in place today. She is conversant and well oriented. It is a pleasure to see her looking so well.
Chest is clear
Right knee is not painful
Skin examination per nurse note

Lab and other tests: None

Assessment and Plan:

1. Adult failure to thrive syndrome
Resolving with marked improvement in nutrition.
She will continue to have visiting nurses at home

2. Thrush
Resolved

3. Hematochezia
Currently resolved

4. Lower extremity ulceration, left, limited to breakdown of skin (HCC)
Improved. Plan would be follow-up in 1 to 2 weeks. Nurse helping family arrange for wound care supplies

5. Right leg pain
Due to DJD of the right knee

6. History of UTI
Recent UTI treated in the hospital

12/06/2023 - Office Visit in Husky Health Same Day Clinic (continued)

Clinical Notes (continued)

7. Essential hypertension, benign

Blood pressure is well-controlled in the hospital without medication. Patient is to remain off of medications currently.

William E Neighbor Jr, MD

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

ED Provider Note

ED Provider Notes by Alver, Amalie, MD at 11/22/2023 1142

Attestation signed by Zvonar, Ivan, MD at 11/23/2023 12:19 PM

I saw and evaluated the patient. I have reviewed the resident's/fellow's findings and agree.

No Critical Care

Ivan Zvonar, MD

CHIEF COMPLAINT

Chief Complaint

Patient presents with

- Multiple Complaints

HISTORY OF PRESENT ILLNESS AND REVIEW OF SYSTEMS

Patient is a 98 year old female with a significant past medical history of chronic venous stasis ulcers of the left lower extremity, musculoskeletal weakness has come in today with a chief complaint of failure to thrive. History was taken by son who is Jeanne's

ED Provider Note (continued)

primary care giver. Patient was seen at wound clinic today and was sent over for concern stated above. She was in her normal state of health until approximately two months prior to presentation when she started to decline physically and mentally. Son states that she has become weaker and has been having less po intake. In response patient states that she is not hungry any longer and doesn't want to eat. In conjunction patient is normally able to ambulate although with a walker. Lately she does not have the strength to get around with her walker. This and the decrease in intake has prompted today's visit.

Review of systems were significant for cough, slowed mentation, weakness in the lower extremities, pain in the right knee and hip, cough, and black stools. They deny fever, shortness of breath, abdominal pain, or back pain. Of note patient suffers from chronic venous stasis ulcers of the left lower extremity that son says has been managed for the last five years.

PAST MEDICAL AND SURGICAL HISTORY

Past Medical History:

Diagnosis	Date
• Closed fracture of right distal femur (HCC)	7/15/2021
• Fall	9/3/2019
• Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)	5/26/2019

Physical Exam

Constitutional:
General: She is not in acute distress.
Appearance: She is not ill-appearing.

HENT:
Head: Normocephalic and atraumatic.
Right Ear: External ear normal.
Left Ear: External ear normal.
Nose: Nose normal. No congestion or rhinorrhea.

Eyes:
Extraocular Movements: Extraocular movements intact.
Conjunctiva/sclera: Conjunctivae normal.
Pupils: Pupils are equal, round, and reactive to light.

Neck:
Musculoskeletal: Normal range of motion.

Cardiovascular:
Heart sounds: Heart sounds are distant.

Pulmonary:
Effort: Pulmonary effort is normal.
Breath sounds: Normal breath sounds.

Abdominal:
General: There is no distension.
Palpations: Abdomen is soft.

Musculoskeletal:
General: No swelling or tenderness. Normal range of motion.
Cervical back: Normal range of motion.

Skin:
General: Skin is warm.
Capillary Refill: Capillary refill takes 2 to 3 seconds.
Findings: Erythema and lesion present.
Comments: **Ulcers of left lower extremity; see pictures below**

Neurological:
Mental Status: She is alert.
Comments: **Hearing impaired at baseline, at times would inappropriately answer questions and difficult to discern if mentally impaired or due to hearing deficiency**

IMAGING:

ED Wet Read -

CTA Abdomen and Pelvis Angio

Final Result

1. No evidence of active extravasation within the abdomen or pelvis.

2. Moderate to severe atherosclerotic calcification of the abdominal aorta and branch vessels, without focal stenosis, occlusion, or dissection.

This is a preliminary report dictated by Dr. Drew Anderson (PGY-3).

ATTENDING FINAL REPORT

I agree with the preliminary report. In the lower chest, probable additional foci of airspace disease, for example at the left base. Consider surveillance imaging ensure resolution. Coronary calcifications.

Extensive diverticulosis without convincing CT evidence of arterial extravasation or active inflammation. Consider colonoscopy if indicated.

I have personally reviewed the images and agree with

ED Provider Note (continued)

the report (or as edited).

XR Knee 4+ View Right

Final Result

Diffuse osseous demineralization. Vascular calcifications.

Pelvis: No acute fracture or pelvic ring disruption. Degenerative changes in the lumbosacral spine, sacroiliac joints, and pubic symphysis. Moderate bilateral hip osteoarthritis.

Right femur: Lateral plate and dynamic screw in the proximal femur transfixed an old intertrochanteric fracture. Lateral plate and screw fixation of the mid to distal femur transfix an old distal femoral diaphyseal fracture. The proximal screw of the lateral plate is slightly proud to the plate, similar to prior. Otherwise no hardware complication.

Right knee: No acute fracture or dislocation. Mild tricompartmental osteoarthritis most pronounced in the medial compartment. Suprapatellar enthesophyte at the quadriceps insertion. Trace joint effusion.

XR Femur 2 View Right

Final Result

Diffuse osseous demineralization. Vascular calcifications.

Pelvis: No acute fracture or pelvic ring disruption. Degenerative changes in the lumbosacral spine, sacroiliac joints, and pubic symphysis. Moderate bilateral hip osteoarthritis.

Right femur: Lateral plate and dynamic screw in the proximal femur transfixed an old intertrochanteric fracture. Lateral plate and screw fixation of the mid to distal femur transfix an old distal femoral diaphyseal fracture. The proximal screw of the lateral plate is slightly proud to the plate, similar to prior. Otherwise no hardware complication.

Right knee: No acute fracture or dislocation. Mild tricompartmental osteoarthritis most pronounced in the medial compartment. Suprapatellar enthesophyte at the quadriceps insertion. Trace joint effusion.

XR Chest 2 View

Final Result

Lungs: Focal opacities in the right midlung and right lower lobe, concerning for pneumonia.

ED Provider Note (continued)

Pleura: No definite effusion. No pneumothorax.

Heart and mediastinum: Unremarkable.

Bones: No acute or suspicious abnormality.

XR Pelvis 1-2 Vw

Final Result

Diffuse osseous demineralization. Vascular calcifications.

Pelvis: No acute fracture or pelvic ring disruption. Degenerative changes in the lumbosacral spine, sacroiliac joints, and pubic symphysis. Moderate bilateral hip osteoarthritis.

Right femur: Lateral plate and dynamic screw in the proximal femur transfixed an old intertrochanteric fracture. Lateral plate and screw fixation of the mid to distal femur transfix an old distal femoral diaphyseal fracture. The proximal screw of the lateral plate is slightly proud to the plate, similar to prior. Otherwise no hardware complication.

Right knee: No acute fracture or dislocation. Mild tricompartmental osteoarthritis most pronounced in the medial compartment. Suprapatellar enthesophyte at the quadriceps insertion. Trace joint effusion.

CT Head wo Contrast

Final Result

1. Age-related changes without acute intracranial abnormality.

Preliminary report by neuroradiology fellow; final report by the attending neuroradiologist will follow.

ATTENDING FINAL REPORT

FINDINGS/IMPRESSION (final):
I agree with the preliminary report with the following comment(s):
Subtle, asymmetric hypodensity is identified within the left caudate head and basal ganglia relative to the right, which appears to be relatively unchanged from examination of September 10, 2018, given differences in slice selection and technique. There is subtle asymmetric prominence of the left lateral ventricle relative to the right which may represent associated

ED Provider Note (continued)

ex vacuo dilatation. However, the possibility of an acute on chronic infarct within the deep left MCA distribution be difficult to entirely exclude. Clinical correlation is suggested.

+ct+

I have personally reviewed the images and agree with the report (or as edited).

Radiology Final Result -
No image results found.

EKG DOCUMENTATION

NSR, nl axis, nl intervals, low voltage precordial leads, no ST segment deviation

SUICIDE RISK EVALUATION

SEPSIS

ED COURSE/MEDICAL DECISION MAKING

Patient is a 98 year old female with venou stasis ulcer who has come in today with a chief complaint of FTT and altered mental status. Patient is well appearing but seems disoriented and is in need of repetition and yelling to understand others. Patient was evaluated tiwh CBC/CMP/UA/Viral Panel/CRP to initatiet work up and discern cause for weakness and possible altered mental status. No focal neurologic deficit c/f CVA. No history of seizure. Even though there was no fall reported, history provided by family member shows that she has been weaker than normal and attempts to ambulate on own despite lack of strength. With mental status change there is a possibility of head injury and CT head without contrast was obtained. Because of the complaint of right knee an hip pain radiographs of the right lower extremity were taken. X-ray of the chest were obtained due to complaints of cough. Finally due to reports of black stool CTA of Abdomen and pelvis were obtained. Of note patient HDS, no active bleeding. In regards

ED Provider Note (continued)

to patient LLE, no crepitus concerning for NSTI, good distal pulses, no swelling c/f DVT; recent XR reviewed no c/f osteomyelitis, does not appear to have overlying cellulitis at this time.

Radiographs of the right lower extremity did not show any acute fracture or subluxation in need of intervention. Chest X-ray was remarkable for a right middle and lower lobe pneumonia. The pneumonia was treated with CTX and Azithromycin. CT of the head was remarkable for age related changes however there was an area of concerned which suggested the possibility of an possibility of an acute on chronic infarct within the deep left MCA. Neurology was consulted to determine clinical significance of finding> Neurology recommendation stated that findings were also most likely related to age related changes and were not likely to contribute to the clinical presentation. Patient seems disoriented because hearing aid has no battery/ no on and needs to be replaced.

Labs were remarkable for a CRP of 151, a UA concerning for UTI and a leukocytosis with a neutrophilic predominance. Inpatient medicine was consulted for admission who accepted the patient to their service. At that point care was transferred to oncoming emergency resident.

ED Course as of 11/23/23 0722

Wed Nov 22, 2023

1052 While patient was checking into the waiting room, her PCP called. Has chronic leg ulcerations. Was seen in wound clinic today and doc is concerned about FTT, dehydration, and new R knee pain. [NC]

1643 Patient's care signed out to me, Boris Pavic ED R2 from: Evins

98y F with chronic venous status ulcer LLE with 2 d black stool here for AMS, pain in R hip, R knee, and diff walking. AMS most likely 2/2 unable to hear since hearing aid w/o battery but not great historian. CT head with age related changes with area of possible new infarction. Neuro consulted, not c/f infarct. WBC 12, CRP 151. CXR with PNA, given CTX and azithro. XR of knee and femur nl. Admit to medicine. [BP]

Laboratory testing alone cannot rule out infection, particularly in the presence of clinical risk factors such as symptoms or exposure history.** (Testing performed using the Cepheid Xpert (TM) Xpress SARS-CoV-2/Flu/RSV Test Kit. See https://testguide.labmed.uw.edu/FABRCV for details. This test is not yet approved or cleared by the United States FDA. When there are no FDA-approved or cleared tests available, and other criteria are met, FDA can make tests available under an emergency access mechanism called an Emergency Use Authorization (EUA). The EUA for this test is supported by the Secretary of Health and Human Service's (HHS's) declaration that circumstances exist to justify the emergency use of in vitro diagnostics for the detection and/or diagnosis of the virus that causes COVID-19. This EUA will remain in effect (meaning this test can be used) for the duration of the COVID-19 declaration justifying emergency of IVDs, unless it is terminated or revoked by FDA (after which the test may no longer be used).) H&P Notes

H&P by Botelho, Alyssa Adachi, MD at 11/22/2023 1547

Attestation with edits by Rosse, Christopher John, DO at 11/23/2023 11:27 AM

Date of Service: 11/22/23
I saw and evaluated the patient. I have reviewed the resident(s)'s/fellow(s)'s documentation and agree.

History and Physical

Jeanne Leonie Hoffman ("Jeane") - DOB: 1/6/1925 (98 year old female)
Preferred Pronouns: she/her/hers, patient's name
PCP: Neighbor Jr., William E, MD
Code Status: No Order

CHIEF CONCERN / IDENTIFICATION:
Jeane Leonie Hoffman is a 98 year old female with hx of chronic venous stasis ulcers in both legs and FTT who presents from wound clinic with c/f acute on chronic poor PO intake and malaise.

Subjective

SUBJECTIVE

HISTORY OF PRESENT ILLNESS:

History obtained by son and DPOA Louis: Cell - 206-280-1287, landline: 206-780-6885

Per son, pt is very independent at baseline - cooks for herself, toilets independently, goes to cafe with friends, walks with walker, and is cognitively intact. However over the past 2 months or so patient has had gradually worsening PO intake, weakness, and spent more time in bed. spe resulting in patient becoming more weak and fatigue and no longer able to do activities that she used to be able to do.

Pt was evaluated for these concerns at NWH ED 10/17/23 and at that time found to have milk leukocytosis to 11.8, given gentle IVF with improvement and discharged empirically on 7 days of Keflex for possible cellulitis of known LE wounds (though no c/f for this noted on their exam). Pt completed this.

Shortly after that, son noted that her family doctor noted thrush in her mouth and she received nystatin swish and swallow, which cleared it up.

In the last 2 weeks, Lewis notes that the patient seems to have taken a turn for the worse. She has eaten very little, and been complaining of difficulty swallowing, and thus has been eating mostly soups and smashed food. She is also had new difficulty toileting by herself. Once last week, we was noted that she had a black stool in the toilet. 2 days ago, he noted that she had some bloody stool when he changed her. She has not had a BM since that time. She also has worsening pain of her R knee over the last few weeks, but denies a fall.

Per Louis, pt has not had const sx, confusion or agitation, chest pain or pressure, cough or shortness of breath, abdominal pain, nausea or vomiting, pain or difficulty urinating, or wounds or skin changes elsewhere on her body besides known chronic wounds of her left lower extremity (see photos under media).

Regarding sick contacts son Lewis had a cough and possible URI about 2 weeks ago. He did not test for COVID.

Hx of hardware including R femoral plate, R hip replacement. No hx of artificial heart valve. No hx of dental infection.

ED Course

Vitals: T 35.9 118/63 68 100% RA

Pertinent labs:
CBC: Hgb 10.3 WBC 12.97 Plt 424
CMP: Na 141 K 4.1 HCO3 25 Cr 0.82 Glucose 120
Mg 2 Phos 4
LFTS wnl
CRP 151 elevated
Trop <0.03
COVID neg
EKG in sinus rhythm HR 79, no ectopy, normal intervals, normal axis, known RBBB since at least 2020 per review. No ST segment changes or T wave changes consistent with acute ischemia. No STEMI or STEMI equivalent. When compared to most recent prior EKG, PT, QRS, and T wave morphology is unchanged.

H&P Notes (continued)

Pertinent imaging/studies:
CT Head with sutle asymmetric prominence of L lateral ventricle c/f acute on chronic deep L MCA infarct vs ex vacuo dilation
CXR with focal opacities in R midlung and RLL, no effusion, no PTX
XR R knee, femur, pelvis: with diffuse degenerative disease
CTA AP with no evidence of active extravasation in abdomen or pelvis

Key treatments:
Neuro c/s: no c/f acute stroke
Initiated IVF 75 cc/hr for SBP 90s
Initiated CTX, azithromycin

HISTORY
Past Medical History:
Per son, no personal hx cancer, MI, stroke, diabetes

Past Surgical History:
R femoral fx s/p femoral plate

Social History:
Lives with son and caregiver Louis in house on Bainbridge Island, some concern for safety of dwelling per Louis and difficulty with landlord (they have had a history of housing insecurity)

Family History:
Deferred

OUTPATIENT MEDICATIONS:
Current Outpatient Medications

Medication	Instructions
• acetaminophen 500 MG Oral Tab	1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
• atorvastatin (LIPITOR)	10 mg, Oral, Daily
• Calcium Carbonate 500 MG Oral Chew Tab	2 tablets, Oral, 3 times daily PRN
• cholecalciferol (VITAMIN D-3)	2,000 units, Oral, Daily
• losartan 25 MG tablet	take 1/2 tablet by mouth once daily
• MULTIPLE VITAMIN OR	Oral
• nystatin 100000 UNIT/ML mouth/throat suspension	5 mL, Swish & Swallow, 4 times daily
• ofloxacin 0.3 % ophthalmic solution	1-2 drops, Left EYE, 4 times daily
• pentoxifylline ER 400 MG ER tablet	take 1 tablet by mouth three times a day
• timolol maleate 0.5 % ophthalmic solution	instill 1 drop into both eyes twice a day
• triamcinolone 0.1 % cream	Topical, 2 times daily, Apply to both forearms.
• Wound Dressings (medihoney) topical gel	Topical, Daily, Apply to ulcerations on legs. Apply dressing over the Medi Honey.
• Wound Dressings (medihoney) topical gel	Topical, Every other day, Apply to wound before applying dressing

ALLERGIES:
Adhesives, Aspirin, Nitrofurantoin, Nitrofurantoin, Penicillins, and Sulfa antibiotics
Objective

OBJECTIVE

11/22/2023 - ED to Hosp-Admission (Discharged) in 6NE MED FAMMED (continued)

H&P Notes (continued)

T: **(!) 35.9 °C** (11/22/23 1103) **BP:** 118/63 (11/22/23 1103) **HR:** 68 (11/22/23 1103) **RR:** 16 (11/22/23 1103) **SpO2:** 100 % (11/22/23 1103)
Vitals (Most recent in last 24 hrs)
T: **(!) 35.9 °C** (11/22/23 1103) **BP:** **(!) 125/99** (11/22/23 1530) **HR:** 99 (11/22/23 1530) **RR:** 20 (11/22/23 1530) **SpO2:** 100 % (11/22/23 1530) Room air **T range:** Temp Min: 35.9 °C Max: 36.9 °C Wt 90 lb (40.824 kg) Ht 5' 0" (1.524 m) Body mass index is 17.58 kg/m².

Physical Exam
VS: BP 110/61 (Patient Position: Lying) | Pulse 73 | Temp 36.5 °C (Temporal) | Resp 16 | Ht 5' (1.524 m) | Wt (!) 40.8 kg (90 lb) | SpO2 100% | BMI 17.58 kg/m²
General: Ill appearing, cachetic. Speaking coherent sentences, though very difficult to converse due to hearing difficulty.
HEENT: NCAT. PERRL, EOMI intact. Oropharynx clear without e/o thrush, dental infection (dentures in).
Neck: No supraclavicular, submandibular, or cervical lymphadenopathy.
Cardiovascular: RRR, nlS1S2, no MRG. No peripheral edema.
Respiratory: very soft breath sounds, no wheezes, ronchi, or crackles.
GI: Normoactive bowel sounds. Soft, nontender, non-distended in all 4 quadrants. Rectal exam with scant black, tarry stool c/f melena.
Neuro: Speaking coherently, fluent speech, moving all extremities spontaneously.
MSK: Tender to palpation over R knee diffusely, with no unilateral swelling, warmth, or other overlying skin changes. Also tender somewhat to palpation LLE along posterior shin, wounds with clean overlying bandages with no strikethrough.
Skin: No visible wounds or ulcerations beyond known LLE wounds.
GU: No suprapubic tenderness

IMAGING:
I have reviewed the latest radiology results
I personally reviewed the radiographic images and agree with the radiologist's report
CTA Abdomen and Pelvis Angio
Preliminary Result
1. No evidence of active extravasation within the abdomen or pelvis.

2. Moderate to severe atherosclerotic calcification of the abdominal aorta and branch vessels, without focal stenosis, occlusion, or dissection.

This is a preliminary report dictated by Dr. Drew Anderson (PGY-3).

Unless an Attending Final Impression appears below, the report has not yet been finalized and an attending radiologist has not reviewed these images.

XR Knee 4+ View Right
Final Result
Diffuse osseous demineralization. Vascular calcifications.

Pelvis: No acute fracture or pelvic ring disruption. Degenerative changes in the lumbosacral spine, sacroiliac joints, and pubic symphysis. Moderate bilateral hip osteoarthritis.

Right femur: Lateral plate and dynamic screw in the proximal femur transfixed an old intertrochanteric fracture. Lateral plate and screw fixation of the mid to distal femur transfix an old distal femoral diaphyseal fracture. The proximal screw of the lateral plate is slightly proud to the plate, similar to prior. Otherwise no hardware complication.

Right knee: No acute fracture or dislocation. Mild tricompartmental osteoarthritis most pronounced in the medial compartment. Suprapatellar enthesophyte at the quadriceps insertion. Trace joint effusion.

XR Femur 2 View Right

Final Result

Diffuse osseous demineralization. Vascular calcifications.

Pelvis: No acute fracture or pelvic ring disruption. Degenerative changes in the lumbosacral spine, sacroiliac joints, and pubic symphysis. Moderate bilateral hip osteoarthritis.

Right femur: Lateral plate and dynamic screw in the proximal femur transfixed an old intertrochanteric fracture. Lateral plate and screw fixation of the mid to distal femur transfix an old distal femoral diaphyseal fracture. The proximal screw of the lateral plate is slightly proud to the plate, similar to prior. Otherwise no hardware complication.

Right knee: No acute fracture or dislocation. Mild tricompartmental osteoarthritis most pronounced in the medial compartment. Suprapatellar enthesophyte at the quadriceps insertion. Trace joint effusion.

XR Chest 2 View

Final Result

Lungs: Focal opacities in the right midlung and right lower lobe, concerning for pneumonia.

Pleura: No definite effusion. No pneumothorax.

Heart and mediastinum: Unremarkable.

Bones: No acute or suspicious abnormality.

XR Pelvis 1-2 Vw

Final Result

Diffuse osseous demineralization. Vascular calcifications.

Pelvis: No acute fracture or pelvic ring disruption. Degenerative changes in the lumbosacral spine, sacroiliac joints, and pubic symphysis. Moderate bilateral hip osteoarthritis.

Right femur: Lateral plate and dynamic screw in the proximal femur transfixed an old intertrochanteric fracture. Lateral plate and screw fixation of the mid to distal femur transfix an old distal femoral diaphyseal fracture. The proximal screw of the lateral plate is slightly proud to the plate, similar to prior. Otherwise no hardware complication.

Right knee: No acute fracture or dislocation. Mild tricompartmental osteoarthritis most pronounced in the medial compartment. Suprapatellar enthesophyte at the quadriceps insertion. Trace joint effusion.

CT Head wo Contrast

Final Result

1. Age-related changes without acute intracranial abnormality.

Preliminary report by neuroradiology fellow; final report by the attending neuroradiologist will follow.

ATTENDING FINAL REPORT

FINDINGS/IMPRESSION (final):
I agree with the preliminary report with the following comment(s):
Subtle, asymmetric hypodensity is identified within the left caudate head and basal ganglia relative to the right, which appears to be relatively unchanged from examination of September 10, 2018, given differences in slice selection and technique. There is subtle asymmetric prominence of the left lateral ventricle relative to the right which may represent associated ex vacuo dilatation. However, the possibility of an acute on chronic infarct within the deep left MCA distribution be difficult to entirely exclude. Clinical correlation is suggested.

+ct+

I have personally reviewed the images and agree with the report (or as edited).

Assessment/Plan

ASSESSMENT/PLAN

Jeane Leonie Hoffman is a 98 year old female with hx of chronic venous stasis ulcers in both legs and FTT who presents from wound clinic with c/f acute on chronic poor PO intake and malaise, found to have leukocytosis to 12, R-sided focal lung consolidations c/f PNA, and subacute melena and hematochezia c/f occult GI bleed.

#Leukocytosis
Pt with leukocytosis to 12 with left shift, otherwise afebrile and HDS, c/f acute infection. Many potential sources including respiratory (with lung consolidations on imaging and known sick contact) vs UTI (given positive UA) vs SSTI given known venous stasis wounds. No hardware or artifical valves c/f abscess vs endocarditis picture. No hx of recent dental infection.

- trend CBC, diff
- blood cx x2 (unfortunately will be drawn subsequent to empiric abx started in ER)
- follow Ucx
- treat empirically for CAP With CTX, azithro (see #CAP)

#CAP vs Aspiration PNA
#Focal consolidations RML RLL
Pt with leukocytosis and known sick contact son with URI found to have focal opacities in RML and RLL c/f CAP. Hx not c/w HAP picture. Unclear aspiration risk given hx dysphagia, consider broadening pending clinical improvement.
CURB 65: 1-2 pts (age +/- confusion, moderate risk) .
- follow blood cx
- urine legionella, S pneumo antigen
- follow viral resp panel
- MRSA nares
- CTX 1g q24h x5-7 days + azithro 500mg PO q24h x 3d

#C/f UTI
Pt with UA with +Nitrites, LE, bacteria, and 50+ WBC c/f UTI, though pt asymptomatic on interview.
- follow Ucx
- follow evening bladder scan for e/o retention
- being tx empirically with CTX for CAP

H&P Notes (continued)

#Hematochezia
#Melena
Pt with witnessed episode of melena ~1 wk ago, and hematochezia 2 days ago. No hx of colon cancer, unclear hx of colonscopies per initial chart. Found to have e/o melena on rectal exam. Ddx c/f upper vs lower GIB, of which etiologies are many. HDS with stable mild anemia, reassuring against acute extravasation, though will give ppx PPI and CTM.

- s/p 80 pantoprazole IV, continue 40 BID
- type and screen
- 2 peripheral IVs
- if loses IV access, switch to oral pantoprazole
- consider further workup if within pt GOC

#Subacute progressive dysphagia
Pt with unclear duration of difficulty swallowing, solids more than liquids, for the past weeks to months. Most c/f ulcer vs stricture vs mass. Could consider dysmotility picture though typically also sx with liquids. Also found to have thrush in early November, could consider esophageal candidiasis though this would typically present more with pain than difficulty swallowing, and exam today with no e/o thrush in oropharynx.
- SLP consult
- if within GOC, consider further w/u including endoscopy

#C/f Malnutrition
#FTT
Pt with acute on chronic poor PO and FTT with decrease in ADLs from baseline, possibly iso infection vs malignancy per workup above.
- nutrition c/s
- continue gentle IVF LR 75 cc/hr

#Macrocytic anemia
Pt with Hgb 10.3 on admission (stable 10-12 over last 3 years) and MCV 100 c/f macrocytic anemia. Most c/f nutritional deficiency iso poor PO but should consider mixed picture iso c/f ACD, GIB.
- iron studies
- folate, B12
- type and

#Chronic venous stasis ulcers of LLE
Several chronic LLE ulcers on L superior foot, ankle, and anterior shin, followed by Wound Care last seen today. Per 11/22/23 wound care note these wounds are improved from prior. Appears she is receiving attentive care of these wounds at home and with Wound Care with low c/f worsening cellulitis vs abscess. Received XR tibia fibula per PCP 11/15 for c/f osteo given persistent ulceration with no e/o bony involvement.
- wound care consult

#Subacute progressive R knee pain
#Hx R femoral fx s/p femoral plate
#OA
Pt with subacute progressive R knee pain for last few months, per PCP note 11/15/23, with no e/o falls or recent injury. She has a distant hx of R femoral fracture with hardware, but per XR femur today no c/f acute fx, dislocation, or disruption of hardware. XR pelvis and , knee also with degenerative changes c/w OA, no acute fracture or dislocation, though trace R knee joint effusion noted. On exam, R knee is tender to palpation diffusely and with movement but without erythema, swelling, or rubor. Ddx includes MSK vs worsening OA vs septic joint (though exam not pointing to this).
- lidocaine patches, tylenol PRN
- consider ortho consult
- consult PT

#Hx recurrent DVT
Per chart review, not noted by patient. Son denies current AC, per brief chart review seems prior hx of warfarin not on currently. Given LE pain (around R knee, though intermittently pt also complains on posterior L shin), consider ultrasound for further work up.

11/22/2023 - ED to Hosp-Admission (Discharged) in 6NE MED FAMMED (continued)

H&P Notes (continued)

#Sensorineural hearing loss R ear
Sensorineural hearing loss in R ear, with dead battery in\ hearing aid, great difficulty hearing.
- consider pocket talker

#HTN
Hold home losartan as pt normotensive

#HLD
Continue home atorvastatin

Inpatient Checklist:
Fluids/Electrolytes/Nutrition: full diet, IVF
Prophylaxis: holding iso c/f GIB
Lines/Drains/Airways: 1 PIV, plan for 2nd IV access tonight
Disposition: floor
Code Status: Full Code , confirmed with her son Louis via interview on admission
Contacts: Primary Emergency Contact: Hoffman Alloin, Louis Charles (POA), Home Phone: 206-780-6885

Electronically signed by Rosse, Christopher John, DO at 11/23/2023 11:27 AM

Discharge Summary Note

Discharge Summary by Rosse, Christopher John, DO at 11/28/2023 1056

Discharge Summary

Jeanne Leonie Hoffman ("Jeane") - DOB: 1/6/1925 (98 year old female)

DIAGNOSTIC STUDIES RECOMMENDED:
None

INCIDENTAL FINDINGS THAT REQUIRE FOLLOW-UP:

None

THERAPEUTIC RECOMMENDATIONS:

Melena, concerns for UGIB: Started pantoprazole 40 mg PO BID x 8-12 weeks before transitioning to daily

ALLERGIES:
Adhesives, Aspirin, Nitrofurantoin, Nitrofurantoin, Penicillins, and Sulfa antibiotics

DISCHARGE MEDICATIONS:
Current Discharge Medication List

START taking these medications

	Details
bisacodyl 10 MG suppository	Unwrap and insert 1 suppository (10 mg) rectally daily as needed for constipation. *Qty:* 7 suppository, *Refills:* 0
pantoprazole 40 MG EC tablet	Take 1 tablet (40 mg) by mouth 2 times a day before meals. *Qty:* 102 tablet, *Refills:* 0
polyethylene glycol 3350 17 GM/SCOOP oral powder	Fill cap with powder to 17g line and dissolve in 4 to 8oz of water. Drink 1 time a day as needed for constipation. Hold for loose stool *Qty:* 238 g, *Refills:* 0
senna 8.6 MG tablet	Take 2 tablets (17.2 mg) by mouth daily as needed for constipation. *Qty:* 60 tablet, *Refills:* 0

Discharge Summary Note (continued)

CONTINUE these medications which have CHANGED

	Details
pentoxifylline ER 400 MG ER tablet	Take 1 tablet (400 mg) by mouth 3 times a day. Take with food. *Qty:* 90 tablet, *Refills:* 0

CONTINUE these medications which have NOT CHANGED

	Details
acetaminophen 500 MG Oral Tab	1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
atorvastatin 10 MG tablet *Associated Diagnoses:* Hypercholesterolemia	Take 1 tablet (10 mg) by mouth daily. *Qty:* 90 tablet, *Refills:* 3
Calcium Carbonate 500 MG Oral Chew Tab	Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.
Cholecalciferol 1000 units Oral Tab	Take 2 tablets (2,000 units) by mouth daily.
MULTIPLE VITAMIN OR	Take by mouth.
nystatin 100000 UNIT/ML mouth/throat suspension *Comments:* Please fill now *Associated Diagnoses:* Thrush	Swish and swallow 5 mL 4 times a day. *Qty:* 60 mL, *Refills:* 0
ofloxacin 0.3 % ophthalmic solution *Associated Diagnoses:* Acute bacterial conjunctivitis of left eye	Place 1-2 drops into left EYE 4 times a day. *Qty:* 5 mL, *Refills:* 1
timolol maleate 0.5 % ophthalmic solution *Associated Diagnoses:* Unspecified glaucoma(365.9)	instill 1 drop into both eyes twice a day *Qty:* 10 mL, *Refills:* 6
triamcinolone 0.1 % cream *Associated Diagnoses:* Dermatitis	Apply topically 2 times a day. Apply to both forearms. *Qty:* 28.4 g, *Refills:* 1
!! Wound Dressings (medihoney) topical gel *Associated Diagnoses:* Lower extremity ulceration, left, limited to breakdown of skin (HCC)	Apply topically every other day. Apply to wound before applying dressing *Qty:* 44 mL, *Refills:* 3
!! Wound Dressings (medihoney) topical gel *Associated Diagnoses:* Lower extremity ulceration, left, limited to breakdown of skin (HCC)	Apply topically daily. Apply to ulcerations on legs. Apply dressing over the Medi Honey. *Qty:* 88 mL, *Refills:* 6

!! - Potential duplicate medications found. Please discuss with provider.

STOP taking these medications

losartan 25 MG tablet	*Comments:* *Reason for Stopping:*

BRIEF ADMISSION HISTORY:
98 year old female with hx of chronic venous stasis ulcers in both legs and FTT who presents from wound clinic with c/f acute on chronic poor PO intake and malaise

PER H&P HPI 11/22:
"*History obtained by son and DPOA Louis: Cell - 206-280-1287, landline: 206-780-6885*

Per son, pt is very independent at baseline - cooks for herself, toilets independently, goes to cafe with friends, walks with walker, and is cognitively intact. However over the past 2 months or so patient has had gradually worsening PO intake, weakness, and spent more time in bed. spe resulting in patient becoming more weak and fatigue and no longer able to do activities that she used to be able to do.

Pt was evaluated for these concerns at NWH ED 10/17/23 and at that time found to have milk leukocytosis to 11.8, given gentle IVF with improvement and discharged empirically on 7 days of Keflex for possible cellulitis of known LE wounds (though no c/f for this noted on their exam). Pt completed this.

Shortly after that, son noted that her family doctor noted thrush in her mouth and she received nystatin swish and swallow, which cleared it up.

In the last 2 weeks, Lewis notes that the patient seems to have taken a turn for the worse. She has eaten very little, and been complaining of difficulty swallowing, and thus has been eating mostly soups and smashed food. She is also had new difficulty toileting by herself. Once last week, we was noted that she had a black stool in the toilet. 2 days ago, he noted that she had some bloody stool when he changed her. She has not had a BM since that time. She also has worsening pain of her R knee over the last few weeks, but denies a fall.

Per Louis, pt has not had const sx, confusion or agitation, chest pain or pressure, cough or shortness of breath, abdominal pain, nausea or vomiting, pain or difficulty urinating, or wounds or skin changes elsewhere on her body besides known chronic wounds of her left lower extremity (see photos under media).

Regarding sick contacts son Lewis had a cough and possible URI about 2 weeks ago. He did not test for COVID.

Hx of hardware including R femoral plate, R hip replacement. No hx of artificial heart valve. No hx of dental infection."

HOSPITAL COURSE:
Admitted to acute care medicine for CAP, possible UTI and c/f upper GI bleed. Sepsis ruled out. She received ceftriaxone (11/22-11/26) and azithromycin (11/22-11/24). UA suggest of UTI but she was inconsistent with endorsing urinary symptoms. Nonetheless, received CTX for the CAP which covered the possible UTI. She remained on room air without respiratory distress and weakness improved. TSH was normal. Hgb down tended from 10.3 on admission down to 8.1 but nadir was around 8.0-8.2. Remained hemodynamically stable. She was started on pantoprazole 40 mg BID on admission and remained on this throughout hospital course. GI was made aware of her but given her age, clinical stability, and Hgb with nadir 8.0-8.2 it was felt ok to manage pharmacologically. She did not require transfusions. Upon further questioning, son revealed she may be taking excessive amounts of NSAIDS. Both patient and son educated about bleeding risk of NSAIDS. PT/OT worked with her and felt that she required additional support on discharge. Patient and family not interested in SNF. Son felt that he could safely care for her at home, even though on discharge she was 1 person assist. Home health ordered and son felt comfortable with communicating with outpatient wound care team. Finally, given her age and initial thoughts of a possible EGD we discussed goals of care. She remains full code...

By individual problem below:

#CAP vs Aspiration PNA
Pt with leukocytosis and known sick contact son with URI found to have focal opacities in RML and RLL c/f CAP. Hx not c/w HAP picture. Unclear aspiration risk given hx dysphagia. She did not require supplemental oxygen

CURB 65: 1-2 pts (age +/- confusion, moderate risk) .
- urine legionella negative, S pneumo antigen negative
- viral resp panel negative
- Treated empirically for CAP:
    -CTX 1g q24h x5-7 days (11/22 - 11/26)
    - Azithromycin azithro 500mg PO q24h x 3d (11/22 - 11/24)

#Hematochezia
#Melena
#Constipation
Pt with witnessed episode of melena ~1 wk ago prior to admission. DRE in ED with dark stool c/f GIB. Hgb 10.3 on admission with drift down to 8.1, otherwise hemodynamically stable, with one small hard BM s/p enema c/w melena. Likely has slow occult bleed, CTM closely for acute progression.

- GI following, appreciate recs:
    - most likely due to chronic NSAID vs malignancy, either way no role for scope and continue 8 wk empiric PPI, no role for GI follow up
    - continue bowel regimen, discharge with good regimen
    - s/p 80 pantoprazole IV, continue 40 BID

#Possible UTI
Pt with leukocytosis to 12 on admission with left shift, now resolved. UA with +Nitrites, LE, bacteria, and 50+ WBC. Pt asx at this time but inconsistent historian. Bladder scan on admission with no e/o retention.
- Blood cx x2 11/23 NGTD
- Ucx: 100K mixed flora GNRs
- Treated empirically with CTX for CAP

#Subacute progressive dysphagia
#Recent hx of oral thrush
Pt with unclear duration of difficulty swallowing, solids more than liquids, for the past weeks to months. Most c/f ulcer vs stricture vs mass. Could consider dysmotility picture though typically also sx with liquids. Also found to have thrush in early November, could consider esophageal candidiasis though this would typically present more with pain than difficulty swallowing, and exam today with no e/o thrush in oropharynx.
- continue home nystatin swish and swallow
- SLP following, appreciate recs:
    - exam c/f mild dysphagia vs presbyphagia iso bad-fitting dentures, thrush
    - thin liquids, soft-bite sized solds with son assisting OR self-selec softer solids
    - 1:1 assist for all intake
    - meds crushed or whole in puree
- if within GOC, consider further w/u including endoscopy

#C/f Malnutrition
#FTT
Pt with acute on chronic poor PO and FTT with decrease in ADLs from baseline, possibly iso infection vs malignancy per workup above.

#Mild macrocytic anemia
Pt with Hgb 10.3 on admission (stable 10-12 over last 3 years) and MCV 100 c/f macrocytic anemia. Likely multifactorial IDA vs ACD.
- iron studies: iron low at 14, TIBC low at 185, transferrin low 132, tsat low at 8, ferritin mild-elev to 211
- retic count wnl 1.6
- folate and B12 wnl
- TSH wnl 2.715 11/22
- **IV iron x3 doses 11/24-11/26 for iron 14**

#Chronic venous stasis ulcers of LLE
Several chronic LLE ulcers on L superior foot, ankle, and anterior shin. Low c/f cellulitis a this time, XR tibia fibula per PCP 11/15 for c/f osteo given persistent ulceration with no e/o bony involvement.

Discharge Summary Note (continued)

- wound care consult

Chronic/stable
#Subacute progressive R knee pain **-** Presenting in acute pain on admission, now much improved. XR negative for acute process. Likely 2/2 OA vs sciatica. Exam not c/f septic joint. Lidocaine patches, tylenol PRN.
#Hx recurrent DVT: Per chart review, not noted by patient. Son denies current AC, per brief chart review seems prior hx of warfarin not on currently.
#Sensorineural hearing loss R ear: home hearing aids
#HTN: Hold home losartan as pt normotensive
#HLD: Continue home atorvastatin
#Peripheral vascular disease: Continue home pentoxifylline

T: 37.1 °C (11/28/23 0755) **BP:** **(!) 105/53** (11/28/23 0755) **HR:** 63 (11/28/23 0755) **RR:** 16 (11/28/23 0755) **SpO2:** 94 % (11/28/23 0755) Room air **T range:** Temp Min: 36.5 °C Max: 37.1 °C Admit weight: **(!) 40.8 kg (90 lb)** (11/22/23 1103) Last weight: **(!) 40.9 kg (90 lb 2.7 oz)** (11/28/23 0600)

Physical Exam:
Gen - no acute distress, elderly appearing woman sitting upright in bed
HEENT - No scleral icterus
Psych - calm, cooperative
Neuro - Alert and oriented. Sort spoken. Follows commands. Moves all 4 limbs spontaneously
CV: Regular rate and rhythm, no murmurs rubs or gallop
Resp: Clear to auscultate bilaterally. No wheezing rhonchi or rales. Non-labored breathing
Abd: Soft, non-tender, non-distended, BS x 4
Skin: chronic LE wounds wraps I/C/D

ATTENDING TIME STATEMENT:
I spent more than 30 minutes on hospital discharge day management.

UW Medicine physicians mentioned in this note can be reached by calling the UW Medicine Paging Operator at 206-520-3000. If any part of this transcript is missing or to request other transcripts for this patient call 206-744-9000. For online access to patient records enroll in EpicCare Link at okta.uwmedicine.org.

Attestation signed by Kalani, Rizwan, MD at 11/23/2023 6:05 PM

I saw and evaluated this patient and agree with the resident(s)'/fellow(s)'/APP(s)'s clinical note, unless noted otherwise below.
Date of service: 11/23/23

Consult Note

Jeanne Leonie Hoffman ("Jeane") - DOB: 1/6/1925 (98 year old female)
Preferred Pronouns: she/her/hers, patient's name
Admit Date: 11/22/2023
Code Status: No Order

Consults

CHIEF CONCERN / IDENTIFICATION:
Jeane Leonie Hoffman is a 98 year old right-handed female with hx of chronic venous stasis ulcers in both legs, FTT, who presents from home with concern for FTT. Neurology is consulted given CT findings reporting inability to rule out acute on chronic deep L-MCA infarct.

SUBJECTIVE

HISTORY OF PRESENT ILLNESS:
Patient has a long history of presenting to hospital with failure to thrive in the setting of old age, inability to care IADLs, and lower extremity pain from chronic venous stasis ulcers that limits her ability to ambulate.

She presents today via her son who is concerned that she is continuing to fail at home. By his description, she has lost interest in eating that he attributes to depression and recent changes in her apartment including her building manager and removing her stove and thus limiting her ability to cook for herself, which is an activity she previously enjoyed doing. She otherwise is relatively inactive given the pain in her lower extremities from her chronic venous stasis ulcers. He tries to let her be independent due to concerns that helping her with her daily activities would remove her dignity, and so he has seen that she has slowly but continuously declined in functional status over the last several months and was only recently discharged from Northwest for a recent admission for failure to thrive.

He denies any new cognitive changes in the patient and believes that a lot of her inability to communicate stems from her significant hearing loss and she today has a hearing aid in place that is out of battery. He does not believe that she has any new focal weakness or any other new focal neurologic deficits. He does not believe she has any new cognitive deficits and is at her cognitive baseline. He is mainly concerned that she is not safe at home and that she needs support that he is unable to provide and that his building is unable to provide for her. He is quite concerned that he and the patient are being targeted by their management and are having resources taken away from them in a malicious way.

As part of her workup in the emergency room, evaluation was completed to identify any reversible causes of decline and revealed a relatively normal CMP, very mild leukocytosis at 13, and elevated C-reactive protein, likely from her chronic wounds. CT head was completed to rule out any acute intracranial process and in the report, although the radiologist states that the lacunar appearing infarcts in her left caudate head and basal ganglia (which are quite subtle) what do appear unchanged from her last scan in 2018, they also reported that the possibility of an acute on chronic infarct within the deep left MCA distribution is "difficult to entirely exclude". This is the primary reason neurology was consulted.

HISTORY

Problem List

Diagnosis

- Sensorineural hearing loss, unspecified
- Hypercholesterolemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- History of recurrent deep vein thrombosis (DVT)
- Imbalance
- Primary osteoarthritis of both hips
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Primary open angle glaucoma (POAG) of both eyes

T range: Temp Min: 35.9 °C Max: 36.9 °C
Wt 90 lb (40.824 kg) Ht 5' 0" (1.524 m) Body mass index is 17.58 kg/m².

GENERAL: NAD, frail-appearing, lying in bed.
HEENT: NC/AT, PERRL, EOMI, sclera anicteric.
RESPIRATORY: Normal WOB on RA.
CV: WWP.

Neurological Exam: limited given inability to fully participate due to profound hearing loss
Mental status: Awake, alert, oriented to person, date of birth, and is able to identify her son at bedside; able to follow commands if you yell into her right ear, though takes repetition.
CN: PERRL, EOMI, face symmetric at rest and with activation, tongue protrudes midline.
Motor: Lifts upper extremities at least antigravity and able to manipulate hearing aid with fine motor movements of her hands. Lifts bilateral hips at least antigravity but leg movements are largely limited by severe pain, left worse than right.
Sensory: Intact and symmetric to light touch bilaterally.
Reflexes: 2+ and symmetric in biceps, brachioradialis, and triceps; deferred lower extremity DTRs due to significant pain; Babinski mute bilaterally.
Coordination: FTN intact bilaterally.
Gait: Deferred given leg pain.

XR Knee 4+ View Right
Final Result by Damle, Rohan N, MD (11/22 1431)
Diffuse osseous demineralization. Vascular calcifications.

Pelvis: No acute fracture or pelvic ring disruption. Degenerative changes in the lumbosacral spine, sacroiliac joints, and pubic symphysis. Moderate bilateral hip osteoarthritis.

Right femur: Lateral plate and dynamic screw in the proximal femur transfixed an old

intertrochanteric fracture. Lateral plate and screw fixation of the mid to distal femur transfix an old distal femoral diaphyseal fracture. The proximal screw of the lateral plate is slightly proud to the plate, similar to prior. Otherwise no hardware complication.

Right knee: No acute fracture or dislocation. Mild tricompartmental osteoarthritis most pronounced in the medial compartment. Suprapatellar enthesophyte at the quadriceps insertion. Trace joint effusion.

XR Femur 2 View Right

Final Result by Damle, Rohan N, MD (11/22 1431)

Diffuse osseous demineralization. Vascular calcifications.

Pelvis: No acute fracture or pelvic ring disruption. Degenerative changes in the lumbosacral spine, sacroiliac joints, and pubic symphysis. Moderate bilateral hip osteoarthritis.

Right femur: Lateral plate and dynamic screw in the proximal femur transfixed an old intertrochanteric fracture. Lateral plate and screw fixation of the mid to distal femur transfix an old distal femoral diaphyseal fracture. The proximal screw of the lateral plate is slightly proud to the plate, similar to prior. Otherwise no hardware complication.

Right knee: No acute fracture or dislocation. Mild tricompartmental osteoarthritis most pronounced in the medial compartment. Suprapatellar enthesophyte at the quadriceps insertion. Trace joint effusion.

XR Chest 2 View

Final Result by Damle, Rohan N, MD (11/22 1425)

Lungs: Focal opacities in the right midlung and right lower lobe, concerning for pneumonia.

Pleura: No definite effusion. No pneumothorax.

Heart and mediastinum: Unremarkable.

Bones: No acute or suspicious abnormality.

XR Pelvis 1-2 Vw

Final Result by Damle, Rohan N, MD (11/22 1431)

Diffuse osseous demineralization. Vascular calcifications.

Pelvis: No acute fracture or pelvic ring disruption. Degenerative changes in the lumbosacral spine, sacroiliac joints, and pubic symphysis. Moderate bilateral hip osteoarthritis.

Right femur: Lateral plate and dynamic screw in the proximal femur transfixed an old intertrochanteric fracture. Lateral plate and screw fixation of the mid to distal femur transfix an old distal femoral diaphyseal fracture. The proximal screw of the lateral plate is slightly proud to the plate, similar to prior. Otherwise no hardware complication.

Right knee: No acute fracture or dislocation. Mild tricompartmental osteoarthritis most pronounced in the medial compartment. Suprapatellar enthesophyte at the quadriceps insertion. Trace joint effusion.

CT Head wo Contrast

Final Result by Andre, Jalal Badi, MD (11/22 1439)

1. Age-related changes without acute intracranial abnormality.

Preliminary report by neuroradiology fellow; final report by the attending neuroradiologist will

follow.

ATTENDING FINAL REPORT

FINDINGS/IMPRESSION (final):
I agree with the preliminary report with the following comment(s):
Subtle, asymmetric hypodensity is identified within the left caudate head and basal ganglia relative to the right, which appears to be relatively unchanged from examination of September 10, 2018, given differences in slice selection and technique. There is subtle asymmetric prominence of the left lateral ventricle relative to the right which may represent associated ex vacuo dilatation. However, the possibility of an acute on chronic infarct within the deep left MCA distribution be difficult to entirely exclude. Clinical correlation is suggested.

+ct+

I have personally reviewed the images and agree with the report (or as edited).

ASSESSMENT/PLAN

Jeane Leonie Hoffman is a 98 year old right-handed female with hx of chronic venous stasis ulcers in both legs, FTT, who presents from home with concern for FTT. Neurology is consulted given CT findings reporting inability to rule out acute on chronic deep L-MCA infarct.

The patient's presentation and neurologic exam are not concerning for any acute neurologic process but more so are consistent with known failure to thrive history in the setting of possible depression, decreased inability to care for self at home due to limited resources in her home, and difficulty with ambulation given her significant pain from her chronic venous stasis ulcers in bilateral legs. She ultimately will need physical therapy, occupational therapy, pain control, and likely social work consultation to determine a more appropriate living arrangement. Based on her neurologic exam and CT findings, I am not concerned for an acute process such as stroke or anything else that needs emergent neurodiagnostics. She will be admitted to the medicine service for failure to thrive and likely placement and otherwise will not need any further neurology follow-up. **I strongly urged the primary team to obtain a pocket talker so that communication can be facilitated with the patient.**

This patient will be seen and discussed with the neurology attending physician, Dr. Rizwan Kalani.

Consult Orders
1. Inpatient Consult to Nutrition [280754195] ordered by Nguyen, Liem Hieu, MD at 11/22/23 1625

Inpatient Initial Nutrition Assessment

PI: Jeane Leonie Hoffman is a 98 year old female with hx of chronic venous stasis ulcers in both legs and FTT who presents from wound clinic with c/f acute on chronic poor PO intake and malaise, c/f PNA and occult GI bleed.

Reason for Consult: Nutrition Assessment and Poor PO intake

Recommendations/Interventions:
Oral Nutrition:
-Liberalize diet to Regular, BG in good control w/o insulin at this time
-Textures per SLP (Soft & bite size with thin liquids)
-1:1 assistance with meals
-Ensure HP scheduled TID
-Record PO intake of meals and supplements for monitoring
-Provided pureed & minced & moist menus upon request from son to allow self selection

Subjective
Nutrition History PTA:
Very HOH. Has diabetes. Recent hx of thrush with difficulty swallowing (solids more than liquids) for past couple months. Gradually worsen PO intake and weakness.
Mostly consuming soups and mashed foods. Lives with son. During RD visit, son reports significant wt loss since October d/t chewing difficulties with ill-fitting dentures as well as housing issues impacting the ability to cook food. No stove in apartment and hot plate being used to heat foods. Son reports Pt drinks Ensure at home about 2-4 times/day.

Nutrition-Focused Physical Assessment:
Conducted 11/24/23
Muscle Wasting Found: Yes
Muscle Wasting- Clavicle: Severe
Muscle Wasting- Interosseous: Severe
Subcutaneous Fat Loss Found: Yes
Subcutaneous Fat Loss- Orbital: Severe

Edema/Fluid: None

Current Nutrition Assessment:
FEN: No PO intake documentation. Awaiting SLP consult
GI: none. Last BM 11/23
Wounds Present: Pressure injury: stage 1-2

16% wt loss in 1 year - clinically significant: doesn't meet criteria but has considerable progressive wt loss and now severely underweight. Son reports wt loss was in the past month but RD unable to verify with records

Assessment/Plan

Estimated Nutrition Needs
Using 11/24 bed wt, 37.9 kg
Energy: 1516-1706 kcal (40-45 kcal/kg, wt gain)

Protein: 76 gm daily (2 gm/kg, repletion)
Fluid: 1 ml/kcal

Evaluation of Nutritional Status

Nutrition Diagnosis:
Severe malnutrition present on admission (in setting of acute illness/injury and social/environmental) related to chewing/swallowing difficulties and limited access to food prep at home as evidenced by severe signs of muscle and fat loss upon exam and reports of less than 75% est needs met with PO intake per reports.

Malnutrition Diagnosis:
Yes

Coordination of Care:
Chart reviewed.
Discussed status, point of care/goals with SLP, family, and patient.
Discussed current intake and tolerance with SLP, family, and patient.
Provided menu assistance.
Setup and/or adjusted nutrition supplement(s).

Goals of Interventions:
To support healing/repletion.
To support anabolism.

Language support:
No interpreter needed (documented language preference is English)

Monitoring and Evaluation:
Monitor oral intake and tolerance.
Monitor nutrition lab trends, weight trends.

Consult Note

Jeanne Leonie Hoffman ("Jeane") - DOB: 1/6/1925 (98 year old female)
Preferred Pronouns: she/her/hers, patient's name
Admit Date: 11/22/2023
Code Status: Full Code

Consults

CHIEF CONCERN / IDENTIFICATION:
Jeane Leonie Hoffman is a 98 year old female with history of venous stasis ulcers and FTT who presented to ER from wound clinic due to acute on chronic poor PO intake and was admitted for treatment of pneumonia/UTI. GI consulted due to melena and progressive anemia concerning for GIB.

Subjective

SUBJECTIVE

HISTORY OF PRESENT ILLNESS:
Pt was admitted on 11/23 for management of infection (ultimately pnuemonia/UTI, on CTX and s/p azithro).

Per her son Louis, at baseline she has been relatively independent in ADLs, ambulatory with walker, makes social visits to friends. She has begun to decline in the several weeks leading up to admission with difficulty with ADLs such that Louis has been helping with toileting. He noticed she was having some dark stools (and one red stool) and is not sure if she has had these previously. She overall has been constipated and she did not have a BM x 2 days prior to presentation. He reports recently he noticed she has been taking large amounts of ibuprofen - perhaps a handful a day. He was concerned she was taking more than recommended and he has slowly decreased what she is taking to 2 tabs BID. He is not sure if she has ever had GIB before.

On admission, given report of dark stool and hemoglobin below prior baseline, started pantoprazole 40 IV BID for possible upper GIB. During admission, hemoglobin slowly trended down (10.3 -> 8.6 -> 8.1 -> 8.0, macrocytic) and bowel movements remained black (but formed and infrequent - 2x on 11/23, 1x on 11/25). These are similar to her stools at home and on review of Louis' photo from yesterday these are BSS1, dark in color with perhaps small amount of red around the stool. Iron studies notable for ferritin 211, Iron 14, Tsat 8. Folate/B12 are elevated.

GI consulted to discuss indications for and risk/benefit discussion re: work up of GI bleed. Per their discussion with Louis, he and Jeane would consider work up if felt indicated/safe but were not pushing for aggressive evaluation. If a malignancy were found, she would not pursue treatment (but they would value intervention on an endoscopically treatable lesion such as an ulcer).

She had a sigmoidoscopy (to 30 cm) in 2001 and negative FOBTx3 in 2008 and 2010 (no FIT). She has not had prior upper endoscopy. Abdominal imaging this admission with diverticulosis, large hiatal hernia but otherwise no significant findings in the GI tract.

HISTORY

Problem List

Diagnosis

- Sensorineural hearing loss, unspecified
- Hypercholesterolemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- History of recurrent deep vein thrombosis (DVT)
- Imbalance
- Primary osteoarthritis of both hips
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Primary open angle glaucoma (POAG) of both eyes

- Community acquired bacterial pneumonia

IMAGING:
11/22 CTAP
FINDINGS:
Lower chest: Large hiatal hernia. Bibasilar atelectasis.
Liver: Unremarkable.

Gallbladder: Distended. No radiopaque stones.
Bile ducts: Unremarkable.
Spleen: Unremarkable.
Pancreas: Unremarkable.
Adrenal glands: Unremarkable.
Kidneys and Ureters: Bilateral renal cortical cysts and additional subcentimeter hypodense lesions which are too small to characterize.
Abdominal and Retroperitoneum Lymph Nodes: No enlarged lymph nodes.

Vasculature:
Aorta - no aneurysm, dissection, or coarctation. Moderate to severe atherosclerotic calcification.
Celiac artery - Patent, no stenosis or filling defect.
Superior mesenteric artery - Patent, no stenosis or filling defect.
Inferior mesenteric artery - Patent, no stenosis or filling defect.
Right renal artery - Patent, no stenosis or filling defect.
Left renal artery - Patent, no stenosis or filling defect. Patent accessory left renal artery without stenosis or filling defect.
Inferior vena cava - There is no IVC thrombosis. Prominent pelvic venous collaterals, probably from chronic occlusive disease.
Portal vein and mesenteric veins - There is no portal or mesenteric thormbosis.

Bowel: Unremarkable.
Reproductive organs: Hysterectomy.
Bladder: Unremarkable.
Peritoneum: Unremarkable.
Abdominal Wall: Unremarkable. Severe multilevel degenerative changes visualized spine. No acute or suspicious osseous lesion. Wedging and endplate deformities of multiple vertebral bodies, not appearing acute.
Bones: Right femoral neck fixation hardware. Pelvic and rib deformities, old.

IMPRESSION
1. No evidence of active extravasation within the abdomen or pelvis.

2. Moderate to severe atherosclerotic calcification of the abdominal aorta and branch vessels, without focal stenosis, occlusion, or dissection.

This is a preliminary report dictated by Dr. Drew Anderson (PGY-3).

ATTENDING FINAL REPORT

I agree with the preliminary report. In the lower chest, probable additional foci of airspace disease, for example at the left base. Consider surveillance imaging ensure resolution. Coronary calcifications.

Extensive diverticulosis without convincing CT evidence of arterial extravasation or active inflammation. Consider colonoscopy if indicated.

Assessment/Plan

ASSESSMENT/PLAN

Jeane Leonie Hoffman is a 98 year old female with history of venous stasis ulcers and FTT who presented to ER from wound clinic due to acute on chronic poor PO intake and was admitted for treatment of pneumonia/UTI. GI consulted due to melena and progressive anemia concerning for GIB.

While she may have some degree of recent or chronic blood loss (iron deficiency by labs, report of black bowel movements intermittently) I do not suspect significant volume blood loss. Some degree of hgb drop this admission was dilutional (10.3 -> 8.6 occurred at time when other cell lines dropped). Her hemoglobin has now stabilized in 8-8.5 range and constipation further argues against ongoing/significant blood loss (blood is a cathartic). She has been using NSAIDS recently and this could have resulted in ulcer disease however this can often be adequately treated with PPI (only a small portion of ulcers are treated endoscopically).

Clinical Notes (group 1 of 2) (continued)

Prior hematochezia may have been due to hemorrhoidal bleeding associated with straining (no definitive history, but in context of constipation this is most likely etiology). Intermittent dark stools may be due to smaller volume blood loss from an upper source (or even R colon in setting of constipation). In a younger patient with these symptoms, would advocate for EGD/colonoscopy however in context of her age and frailty, overall mild/stabilizing symptoms, and her preference not to pursue treatment were a malignancy to be found, I would not recommend additional evaluation. Can re-evaluate risk/benefit should her symptoms worsen.

RECOMMENDATIONS
- Do not recommend endoscopic evaluation
- Now s/p IV PPI BID x 3 days. Would transition to PO PPI BID x 8 weeks then stop for empiric treatment of ulcer disease or esophagitis (which could cause GIB). This would not address a variety of other causes of bleeding but is a low risk empiric treatment.
- Continue to monitor hemoglobin trend, stool color while inpatient
- Standing bowel regimen
- IV Iron during this admission
- Stop NSAID use
- If develops worsening bleeding (hemoglobin drop, hemodynamic instability), can revisit discussion of endoscopic evaluation with the patient and her son.

Thank you for this consult. We will sign off.

Consult Orders
1. Inpatient Consult to Wound Therapy [280754203] ordered by Nguyen, Liem Hieu, MD at 11/22/23 1625

Wound Care Consult

Patient was seen today at RN request to evaluate "L chronic venous insufficiency".

HPI: (Per Medicine MD note on 11/27/23)
"Jeane Leonie Hoffman is a 98 year old female with hx of chronic venous stasis ulcers in both legs and FTT who presents from wound clinic with c/f acute on chronic poor PO intake and malaise, found to have leukocytosis to 12, R-sided focal lung consolidations c/f PNA, and subacute melena and hematochezia c/f occult GI bleed."

PMH:
Past Medical History:

Diagnosis	Date
• Closed fracture of right distal femur (HCC)	7/15/2021

- Fall 9/3/2019
- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC) 5/26/2019
- Venous stasis ulcer (HCC) 5/26/2019
- Diabetic ulcer of lower extremity (HCC) 9/24/2018
- Severe protein-calorie malnutrition (HCC) 6/7/2018
- Urge urinary incontinence 6/7/2018
- Venous ulcer of left leg (HCC) 6/7/2018
- Normocytic anemia 6/7/2018
- Chronic venous hypertension with ulcer and inflammation, left (HCC) 5/17/2018
- Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC) 5/17/2018
- Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC) 5/17/2018
- Thrombocytopenia (HCC) 11/2/2016
- Leg weakness, bilateral 1/6/2015
- Weakness of trunk musculature 1/6/2015
- Vertebral fracture 12/13/2012
  Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed
- Thyroid nodule, uninodular 12/13/2012
  CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.
- Closed fracture of unspecified intracapsular section of neck of femur 5/1/2007
  Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.
- Unspecified vitamin B deficiency 5/1/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency
- Impaired fasting glucose 3/22/2007
- Carpal tunnel syndrome 11/20/2006
  Carpal tunnel release right wrist in 1989
- DIAPHRAGMATIC HERNIA 11/20/2006
  CT of abdomen in 2006
- Esophageal reflux 11/20/2006
- Other convulsions 11/20/2006
  Petit Mal since 1975 Carbamazepine level 7.6 on Feb 2007 Discontinued based on ER neuro consult in early 2013 No recurrence
- Allergic rhinitis, cause unspecified 11/20/2006
- DVT, recurrent, lower extremity, 11/20/2006

chronic
Recurrent DVT and phlebitis since 1982 Per Vascular Surgery note 5/9/2006: continue warfarin 3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Diabetes mellitus (HCC)
- PAD (peripheral artery disease) (HCC)
- Ulcer of left lower extremity, limited to breakdown of skin (HCC)
  Chronic, Multiple sites of lower leg and ankle, with MSSA

Secondary Dressing	Other (Comment)	11/28/23 1137

Per pt's son those wounds are chronic. "They were healed and reopened". Pt has been seeing at Hall Health Center for ongoing wound care and she has a wound care appointment on 12/6/23.

Multiple full thickness wounds, varies in shape, depth, and size, noted scattered over LLE. Total involved area measures approx 26 cm x 15 cm x 0.3 cm. Serpiginous wound edges are attached. Wound base is 100% red viable tissue. Scant dry serous drainage noted around the wound edges. Periwound skin is dry, intact, with pink scar tissues from healed wounds. Mild pain present with wound palpation. LLE is warm to touch. Hyperpigmentation from

hemosiderin staining noted at gaiter area with lipodermatosclerosis and venous dermatitis. DP and PT pulses heard on Doppler.

Recommendations:
1. Cleanse with normal saline and pat dry. This step can be done in the shower, washing LLE with gentle soap and rinse with clean running warm water, pat dry.
2. Apply Cavilon No Sting Skin Barrier to immediate periwound skin and allow to dry completely. This will protect periwound skin from any drainage.
3. Cut pieces of a dry Aquacel Sheet (MM# 105650) to size and cover deep wound bed. Apply several drops of NS onto dry Aquacel Sheet. It will turn clear once it is moist. This will wick exudate from the wound, provide a moist wound healing environment, and will aid in autolytic debridement.
4. Cover the wound with two 6"x6" and two 3"x3" Mepilex border dressing (MM# 114579/139547). This will provide a moist wound healing environment and absorb exudate from the wound.
5. Change every three days and PRN saturation, rolling, or soiling.
6. Optimize nutrition and hydration for healing.
7. Optimize glycemic control.
8. Off loading pressure and floating heels with pillows while in the bed.
9. Recommend to continue f/u with OP wound clinic for ongoing wound assessment and management after DC home.

Recommendations discussed with pt, son and bedside RN, Olivia.

Extra wound change supplies given. Wound supplies prescription and supplier company list in chart for MD signature and will give it to pt by primary RN to arrange future wound supplies ordering.

Staff RN to assess effectiveness of above recommendations and re consult Wound RN through Epic with questions or concerns.

Electronically signed by McManigal, LuQi, RN at 11/28/2023 12:13 PM

Discharge Instructions

Nguyen, Liem Hieu, MD at 11/27/2023 1250

Dear Jeanne Leonie Hoffman,

You were admitted for difficulty eating, weakness, and mild confusion. You were found to have evidence of a urinary tract infection, possible pneumonia, and evidence of upper gastrointestinal bleed. You were treated with IV antibiotics and proton pump inhibitor, which have helped you improved significantly. Your GI bleed is slow and now has been stabilized and improved. We talked to our GI colleagues and they did not think that you need to be scoped or follow up outpatient.

New Medications
- please continue taking protonix twice per day for the next 7 weeks or so

- please continue taking senna and miralax to prevent constipation as needed and HOLD if loose stool

Other Instructions
- Very important is to limit tylenol (acetaminophen) to maximum 3g total / day. Avoid NSAIDs (like alleve, ibuprofen, advil)
- Continue with wound care, post-procedure

Follow up appointments
- follow up with primary care

PLEASE RETURN TO THE HOSPITAL IF:
- fever, chest pain, shortness of breath, confusion, red blood in stools, worsening abdominal pain

It was a pleasure being part of your care team.

Electronically signed by Nguyen, Liem Hieu, MD at 11/27/2023 2:07 PM

Home Health Face To Face

Rosse, Christopher John, DO at 11/27/2023 0930

Date of Face to Face Encounter: 11/27/2023

This Face to Face Encounter was in whole, or in part, for the following medical condition(s) which is the primary reason for home health care:
Medical Condition(s): (J18.9) Pneumonia of right middle lobe due to infectious organism (primary encounter diagnosis)

I certify that, based on my findings, the following services are medically necessary for home health services: Physical Therapy

Ancillary Services (only allowed if Nursing, PT, or ST are ordered):
OT

My clinical findings that support the need for the above services are: Chronic venous stasis wounds of bilateral lower extremities, anemia, failure to thrive, community acquired pneumonia

I certify that this patient is homebound (.i.e. absences from require considerable and taxing effort and are for medical reasons or religious services and are infrequent or of short duration) because: Chronic venous stasis wounds of bilateral lower extremities, anemia, failure to thrive, community acquired pneumonia

The Center for Medicaid Services (CMS) requires the hospitalist/attending signing the Face to Face Encounter documentation to identify the community physician in the discharge plan for home health care (the provider assuming ongoing management of the Home Health Plan of Care).

Primary Care Physician: Neighbor Jr., William E, MD

Attending Name:
ROSSE, CHRISTOPHER JOHN
11/27/2023 at 9:30 AM

Patient Summary

98 F with hx of chronic venous stasis ulcers in both legs and FTT who presents from wound clinic with c/f acute on chronic poor PO intake and malaise.

A&Ox3-4. Very HOH, hearing aid to right ear. VSS on RA. Tele Dc'd this shift. Pt verbal and make needs known. Pt denies any symptoms. Pt stated, "I am fine." On droplet precaution for respiratory panel pending. Aspiration precaution. Awaiting for SLP consult. Using purewick. 2x Bms this shift, very dark green/black, MD to bedside. Skin thin and fragile. Buttocks stage 2 pressure ulcer upon admission. Barrier cream applied and Q2hr turns. Awaiting for wound consult. Tele Dc'd this AM. Worked with PT today.

Progress Notes

Botelho, Alyssa Adachi, MD at 11/23/2023 0532

Attestation signed by Rosse, Christopher John, DO at 11/24/2023 8:14 AM

Date of Service: 11/23/23
I saw and evaluated the patient. I have reviewed the resident(s)'s/fellow(s)'s documentation and agree.

Progress Note

Jeanne Leonie Hoffman ("Jeane") - DOB: 1/6/1925 (98 year old female)
Preferred Pronouns: she/her/hers, patient's name
Admit Date: 11/22/2023
Code Status: Full Code

CHIEF CONCERN / IDENTIFICATION:
Jeane Leonie Hoffman is a 98 year old female with hx of chronic venous stasis ulcers in both legs and FTT who presents from wound clinic with c/f acute on chronic poor PO intake and malaise, found to have leukocytosis to 12, R-sided focal lung consolidations c/f PNA, and subacute melena and hematochezia c/f occult GI bleed.

Subjective

SUBJECTIVE

INTERVAL HISTORY:
- Pt verbal, making needs known overnight, using perwick for urination, no BM/melena
- Per RN note aspiration precautions as pt coughs after sips of water
- some c/f bradycardia overnight, briefly put on telemetry (now d/c), repeat EKG with rare PVCs and low voltage, bedside ECHO done with no e/o cardiac effusion
- this AM sleeping comfortably; in afternoon pt with son, he says she is brighter and back to baseline, ate some food, had one small hard dark BM after enema. Pt speaking coherently with hearing aid in, says she has urge to BM, no other complaints.

SCHEDULED MEDICATIONS:
- atorvastatin, 10 mg, Daily
- azithromycin, 500 mg, Daily
- cefTRIAXone, 1 g, q24h
- cholecalciferol, 2,000 units, Daily
- lidocaine, 1 patch, q24h
- multivitamin with minerals, 1 tablet, Daily
- nystatin, 500,000 units, QID
- pantoprazole, 40 mg, BID
- pentoxifylline ER, 400 mg, Daily
- timolol maleate, 1 drop, BID
- triamcinolone, , BID

INFUSED MEDICATIONS:
- lactated ringers, 75 mL/hr, Continuous, Last Rate: 75 mL/hr (11/22/23 2111)

PRN MEDICATIONS:
- acetaminophen, 650 mg, q4h PRN
- bisacodyl, 10 mg, Daily PRN
- calcium carbonate, 1,000 mg, TID PRN
- ondansetron, 4 mg, q8h PRN
- ondansetron, 4 mg, q8h PRN
- senna, 17.2 mg, BID PRN

Assessment/Plan

ASSESSMENT/PLAN

Jeane Leonie Hoffman is a 98 year old female with hx of chronic venous stasis ulcers in both legs and FTT who presents from wound clinic with c/f acute on chronic poor PO intake and malaise, found to have leukocytosis to 12, R-sided focal lung consolidations c/f PNA, and subacute melena and hematochezia c/f occult GI bleed.

#UTI
Pt with leukocytosis to 12 on admission with left shift, now resolved. UA with +Nitrites, LE, bacteria, and 50+ WBC. Pt asx at this time. Bladder scan on admission with no e/o retention.
- follow blood cx x2 11/23/23 (drawn post abx)

- follow Ucx
- being tx empirically with CTX for CAP

#CAP vs Aspiration PNA
#Focal consolidations RML RLL
Pt with leukocytosis and known sick contact son with URI found to have focal opacities in RML and RLL c/f CAP. Hx not c/w HAP picture. Unclear aspiration risk given hx dysphagia, consider broadening pending clinical improvement.
CURB 65: 1-2 pts (age +/- confusion, moderate risk) .
- follow blood cx
- urine legionella negative, S pneumo antigen pending
- viral resp panel negative
- Tx empirically for CAP:
    -CTX 1g q24h x5-7 days (11/22 -)
    - Azithromycin azithro 500mg PO q24h x 3d (11/22 -)

#Hematochezia
#Melena
#Constipation
Pt with witnessed episode of melena ~1 wk ago, and hematochezia 2 days ago c/f GIB. Hgb 10.3 on admission, slowly drifting to 8.8 today otherwise hemodynamically stable, with one small hard BM s/p enema c/w melena. Likely has slow occult bleed, CTM closely for acute progression. GOC ongoing with pt and son about further workup.

- continue bowel regimen
- follow 00:00 CBC
- s/p 80 pantoprazole IV, continue 40 BID
- type and screen
- 2 peripheral IV in place
- if loses IV access, switch to oral pantoprazole
- consider further workup including EGD/colo if within pt GOC

#Subacute progressive dysphagia
#Recent hx of oral thrush
Pt with unclear duration of difficulty swallowing, solids more than liquids, for the past weeks to months. Most c/f ulcer vs stricture vs mass. Could consider dysmotility picture though typically also sx with liquids. Also found to have thrush in early November, could consider esophageal candidiasis though this would typically present more with pain than difficulty swallowing, and exam today with no e/o thrush in oropharynx.
- continue home nystatin swish and swallow
- SLP consult
- if within GOC, consider further w/u including endoscopy

#C/f Malnutrition
#FTT
Pt with acute on chronic poor PO and FTT with decrease in ADLs from baseline, possibly iso infection vs malignancy per workup above.
- nutrition c/s
- daily standing weights
- continue gentle IVF

#Macrocytic anemia
Pt with Hgb 10.3 on admission (stable 10-12 over last 3 years) and MCV 100 c/f macrocytic anemia. Likely multifactorial IDA vs ACD vs megaloblastic causes such as MDS (normal TSH, folate, B12, no c/f AUD).
- iron studies: iron low at 14, TIBC low at 185, transferrin low 132, tsat low at 8, ferritin mild-elev to 211
- retic count wnl 1.6
- folate and B12 wnl
- type and screen pending
- TSH wnl 2.715 11/22
- no iron repletion now, as pt actively infected

Clinical Notes (group 2 of 2) (continued)

#Chronic venous stasis ulcers of LLE
Several chronic LLE ulcers on L superior foot, ankle, and anterior shin. Low c/f cellulitis a this time, XR tibia fibula per PCP 11/15 for c/f osteo given persistent ulceration with no e/o bony involvement.
- wound care consult

#Subacute progressive R knee pain
#Hx R femoral fx s/p femoral plate
#OA
Pt with subacute progressive R knee pain for last few months most likely 2/2 OA given imaging here negative for fx. Today pt markedly less tender to palpation, complaining of tenderness only on lateral side of knee joint with some radiation to the hip more c/w a sciatic type picture. No asymmetry btwn knee joints, overlying rubor, erythema c/f septic joint.
- lidocaine patches, tylenol PRN
- consult PT

Chronic/stable
#Hx recurrent DVT: Per chart review, not noted by patient. Son denies current AC, per brief chart review seems prior hx of warfarin not on currently.
#Sensorineural hearing loss R ear: home hearing aids
#HTN: Hold home losartan as pt normotensive
#HLD: Continue home atorvastatin
#Peripheral vascular disease: Continue home pentoxifylline

Inpatient Checklist:
Fluids/Electrolytes/Nutrition: full diet, IVF
Prophylaxis: holding iso c/f GIB
Lines/Drains/Airways: 2 PIVs
Disposition: floor
Code Status: Full Code , confirmed with her son Louis via interview on admission

Patient Active Problem List

Diagnosis

- Sensorineural hearing loss, unspecified
- Hypercholesterolemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign

- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- History of recurrent deep vein thrombosis (DVT)
- Imbalance
- Primary osteoarthritis of both hips
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Primary open angle glaucoma (POAG) of both eyes
- Community acquired bacterial pneumonia

Past Medical History:

Diagnosis	Date
• Closed fracture of right distal femur (HCC)	7/15/2021
• Fall	9/3/2019
• Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)	5/26/2019
• Venous stasis ulcer (HCC)	5/26/2019
• Diabetic ulcer of lower extremity (HCC)	9/24/2018
• Severe protein-calorie malnutrition (HCC)	6/7/2018
• Urge urinary incontinence	6/7/2018
• Venous ulcer of left leg (HCC)	6/7/2018
• Normocytic anemia	6/7/2018
• Chronic venous hypertension with ulcer and inflammation, left (HCC)	5/17/2018
• Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)	5/17/2018
• Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)	5/17/2018
• Thrombocytopenia (HCC)	11/2/2016
• Leg weakness, bilateral	1/6/2015
• Weakness of trunk musculature	1/6/2015
• Vertebral fracture *Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed*	12/13/2012
• Thyroid nodule, uninodular *CT of spine at HMC sowed left thyroid nodule which*	12/13/2012

needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.

- Closed fracture of unspecified intracapsular section of neck of femur 5/1/2007
  Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.
- Unspecified vitamin B deficiency 5/1/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency
- Impaired fasting glucose 3/22/2007
- Carpal tunnel syndrome 11/20/2006
  Carpal tunnel release right wrist in 1989
- DIAPHRAGMATIC HERNIA 11/20/2006
  CT of abdomen in 2006
- Esophageal reflux 11/20/2006
- Other convulsions 11/20/2006
  Petit Mal since 1975 Carbamazepine level 7.6 on Feb 2007 Discontinued based on ER neuro consult in early 2013 No recurrence
- Allergic rhinitis, cause unspecified 11/20/2006
- DVT, recurrent, lower extremity, chronic 11/20/2006
  Recurrent DVT and phlebitis since 1982 Per Vascular Surgery note 5/9/2006: continue warfarin 3/9/2010 Lower extremity arterial vascular ultrasound studies normal
- Diabetes mellitus (HCC)
- PAD (peripheral artery disease) (HCC)
- Ulcer of left lower extremity, limited to breakdown of skin (HCC)
  Chronic, Multiple sites of lower leg and ankle, with MSSA

Therex:
Theract: bed mobility: max A to right side of bed with bed features and assist of 2 sitting at EOB SBA w/o back

support transfers: sit <> stand from elevated bed with max A of 2, patient pulling up on walker stabilized by therapist static standing: max A for 2 - not able to stand fully upright however stood for about 30 seconds
pt/family ed: fall risk reduction, fall prevention, activity progression as tolerated, skin protection,
Balance/Neuro Re-ed:
Gait Training:

ASSESSMENT/PLAN

Eval complete. Jeane is below her baseline level of mobility and per her son she was more active and able to can peaches earlier this month. She was minimally verbal during session (HOH with no working hearing aid today) with son anwering for her the majority of session. She did respond to physical cues about mobilizing and was able to initiate movement of bil LE's towards sitting at EOB. In context of session, she is able to sit unsupported at EOB and transfers to standing briefly with FWW with 80% assist from 2 people. Her L ankle ROM is restricted making it difficult to bear weight vertically through her L leg. Pt would benefit from ongoing therapies to address strength, ROM and mobility deficits. WIll continue to follow for progressive mobilization as tolerated. Recommend overhead lift for transfers OOB at this time.

Barriers to Discharge: increased level of care required

PT Discharge Equipment: PUW vs FWW

Goals:
Goal: Bed mobility, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/08/23
Goal: Transfer with AD, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/08/23
Goal: Amb with AD, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/08/23
Goal: tolerated OOB for meals 3x/day
Estimated Completion Date: 12/08/23

PT Plan of Care:
Treatment/Interventions: Therapeutic exercise, Therapeutic functional activities, Gait/Stairs training, Patient/family training, Equipment eval/education
PT Plan: Skilled PT
PT Dosage: 2-3x/week
Plan for Next Session: EOB, standing with walker, OOB to bedside chair with FWW as tolerated

Other Recommendations:

PT Daily Recommendations: EOB dangle with assist of 2, overhead lift for transfers, ambulate with therapies only at this time

Speech Language Pathology Eval

Patient Name: Jeane Leonie Hoffman
MRN: U8170135
Date of Service: 11/24/23

Treatment Duration: 37 Minutes

Subjective
Patient Report/Self-Assessment: RN cleared SLP for entry. Pt reported eating a whole bowl of cream of wheat prior to SLP arrival.
Patient Stated Goal: none stated
Prior Function: Son reported that pt eats primarily soft solids due to ill fitting dentures but that recently he began pureeing some solids due to low intake during recent thrush infection.
Type of Occupation: nanning for most of her life, ran family business
Leisure and Hobbies: travel

Objective
Patient Information
Temperature: Afebrile
Respiratory Status: Room air;Concerning chest x-ray (11/22 CXR "Lungs: Focal opacities in the right midlung and right lower lobe, concerning for pneumonia.: and CT abdomen "Lower chest: Large hiatal hernia. Bibasilar atelectasis.")
Behavior/Cognition: Distractible;Alert
Patient Positioning: Upright in bed

Consistencies Assessed: 0-Thin Liquids;4-Pureed;Soft solids

0-Thin Liquids - Presentation: Self Fed;Straw

4 Pureed - Presentation : Self Fed;Spoon

Soft Solids - Presentation: Self Fed

Oral Phase: Prolonged mastication;Delayed anterior to posterior transit

Signs/Symptoms of Penetration/Aspiration: Cough - immediate (on first sip of thin liquids and then not repeated.)

11/22/2023 - ED to Hosp-Admission (Discharged) in 6NE MED FAMMED (continued)

Clinical Notes (group 2 of 2) (continued)

11/22/2023 - ED to Hosp-Admission (Discharged) in 6NE MED FAMMED (continued)

Clinical Notes (group 2 of 2) (continued)

11/22/2023 - ED to Hosp-Admission (Discharged) in 6NE MED FAMMED (continued)

Clinical Notes (group 2 of 2) (continued)

Oral Mechanism Examination
Dentition: Adequate with dentures (However dentures ill fititng)
Oral mucosa: Within Functional Limits
Jaw Range of Motion: Within Functional Limits
Observations: Limited due to pt's HOH and difficulty following directions.

Assessment
Jeane seen for bedside swallow eval. She demonstrated mild oral deficits and 1 cough that was not repeated with

further trials of thin liquids (silent aspiration cannot be ruled out at bedside). Unclear if mild dysphagia vs presbyphagia related changes complicated by ill fitting dentures and recent thrush. Given her performance, recommend thin liquids and soft and bite sized solids (son assisting to self select softer solids as needed) and 1:1 assist for all intake. Meds crushed or whole in puree. SLP to continue to follow.

Dysphagia: Mild
Aspiration Risk: Low;Moderate

Impact on Function: Risk for not meeting oral nutrition;Risk for respiratory complications
Confounding Factors: age, ill fitting dentures
Prognosis: Fair

Evaluation/Treatment Tolerance: Patient tolerated treatment well

Plan
SLP Plan: Skilled SLP
Treatment/Interventions: Swallow treatment;Patient/family education
SLP Frequency: 1-3x/week

Discharge Recommendations
Follow up with SLP at next level of care;Assistance with
Assistance with Details: Eating;Drinking

Daily Recommendations
Swallow Recommendations
Diet Recommendations: 0-Thin liquids;6-Soft and bite-sized
Medication Administration Recommendations: Meds whole/halved in puree;Meds crushed in puree
Oral care: Frequency: 2-3x per day;Toothbrush and toothpaste
Aspiration Precautions: As upright as medically possible for all oral intake;1:1 supervision/assistance;Cut up/set up;Small bites;Small sips;Slow rate;One sip at a time
Esophageal Precautions: Sit upright while eating and remain upright for 30 minutes after

Goals
Short Term Goal: Tolerate least restrictive diet
Estimated Completion Date: 12/15/23
Goal Status: Updated

Patient/caregiver will participate in education regarding: Dysphagia
Estimated Completion Date: 12/15/23
Goal Status: Updated

Assessment/Plan

ASSESSMENT/PLAN

Jeane Leonie Hoffman is a 98 year old female with hx of chronic venous stasis ulcers in both legs and FTT who presents from wound clinic with c/f acute on chronic poor PO intake and malaise, found to have leukocytosis to 12, R-sided focal lung consolidations c/f PNA, and subacute melena and hematochezia c/f occult GI bleed.

Plan of the Day 11/24/23
- will consent for blood today
- Hgb stable 8.1 since last evening
- IV iron x3 doses starting today
- SLP evaluated, recs below

#UTI
Pt with leukocytosis to 12 on admission with left shift, now resolved. UA with +Nitrites, LE, bacteria, and 50+ WBC. Pt asx at this time. Bladder scan on admission with no e/o retention.
- Blood cx x2 11/23 NGTD
- follow Ucx: 100K mixed flora GNRs
- being tx empirically with CTX for CAP

#CAP vs Aspiration PNA
#Focal consolidations RML RLL
Pt with leukocytosis and known sick contact son with URI found to have focal opacities in RML and RLL c/f CAP. Hx not c/w HAP picture. Unclear aspiration risk given hx dysphagia, consider broadening pending clinical improvement.
CURB 65: 1-2 pts (age +/- confusion, moderate risk) .
- urine legionella negative, S pneumo antigen negative
- viral resp panel negative
- Tx empirically for CAP:
    -CTX 1g q24h x5-7 days (11/22 - 11/26)
    - Azithromycin azithro 500mg PO q24h x 3d (11/22 - 11/24)

#Hematochezia
#Melena
#Constipation
Pt with witnessed episode of melena ~1 wk ago, and hematochezia 2 days ago c/f GIB. Hgb 10.3 on admission with drift down to 8.1, otherwise hemodynamically stable, with one small hard BM s/p enema c/w melena. Likely has slow occult bleed, CTM closely for acute progression. GOC ongoing with pt and son about further workup.

- continue bowel regimen
- s/p 80 pantoprazole IV, continue 40 BID
- type and screen
- 2 peripheral IV in place
- if loses IV access, switch to oral pantoprazole
- consider further workup including EGD/colo if within pt GOC

#Subacute progressive dysphagia
#Recent hx of oral thrush
Pt with unclear duration of difficulty swallowing, solids more than liquids, for the past weeks to months. Most c/f ulcer vs stricture vs mass. Could consider dysmotility picture though typically also sx with liquids. Also found to have thrush in early November, could consider esophageal candidiasis though this would typically present more with pain than difficulty swallowing, and exam today with no e/o thrush in oropharynx.
- continue home nystatin swish and swallow
- SLP following, appreciate recs:
    - exam c/f mild dysphagia vs presbyphagia iso bad-fitting dentures, thrus
    - thin liquids, soft-bite sized solds with son assisting OR self-selec softer solids
    - 1:1 assist for all intake
    - meds crushed or whole in puree
- if within GOC, consider further w/u including endoscopy

#C/f Malnutrition
#FTT
Pt with acute on chronic poor PO and FTT with decrease in ADLs from baseline, possibly iso infection vs malignancy per workup above.
- nutrition c/s

Clinical Notes (group 2 of 2) (continued)

- continue gentle IVF

#Mild macrocytic anemia
Pt with Hgb 10.3 on admission (stable 10-12 over last 3 years) and MCV 100 c/f macrocytic anemia. Likely multifactorial IDA vs ACD.
- iron studies: iron low at 14, TIBC low at 185, transferrin low 132, tsat low at 8, ferritin mild-elev to 211
- retic count wnl 1.6
- folate and B12 wnl
- type and screen pending
- TSH wnl 2.715 11/22
- **IV iron x3 doses starting today for iron 14**

#Chronic venous stasis ulcers of LLE
Several chronic LLE ulcers on L superior foot, ankle, and anterior shin. Low c/f cellulitis a this time, XR tibia fibula per PCP 11/15 for c/f osteo given persistent ulceration with no e/o bony involvement.
- wound care consult

Chronic/stable
#Subacute progressive R knee pain **-** Presenting in acute pain on admission, now much improved. XR negative for acute process. Likely 2/2 OA vs sciatica. Exam not c/f septic joint. Lidocaine patches, tylenol PRN.
#Hx recurrent DVT: Per chart review, not noted by patient. Son denies current AC, per brief chart review seems prior hx of warfarin not on currently.
#Sensorineural hearing loss R ear: home hearing aids
#HTN: Hold home losartan as pt normotensive
#HLD: Continue home atorvastatin
#Peripheral vascular disease: Continue home pentoxifylline

Inpatient Checklist:
Fluids/Electrolytes/Nutrition: full diet, IVF
Prophylaxis: holding iso c/f GIB
Lines/Drains/Airways: 2 PIVs
Disposition: floor
Code Status: Full Code , confirmed with her son Louis via interview on admission

Occupational Therapy Evaluation and Treatment Note

Patient Name: Jeane Leonie Hoffman
MRN: U8170135
Today's Date: 11/25/2023
Total Treatment time: 29 Minutes

Home Living
Home Living
Type of Home: Apartment
Entry Stairs: 0
Indoor Stairs: 0
Lives With: Son
Lives with Comments: sleeps on couch with incontinent pads in place
Assistance Available at Home : 24 hour supervision
Bathroom Toilet: Standard
Mobility Equipment Owned: Four wheeled walker or rollator;Other (transport chair)
Home Living Comments: bainbridge island

Prior Function
Prior Function
BADLs: Independent (does not shower. sponge bath only)
IADLs: Requires assist
Functional Mobility: Independent
Type of Occupation: canning for most of her life, ran family business
Leisure and Hobbies: travel
Details of previous level of function: Per chart review, she has been needing heavy assistance recently (the last few months.)

ADL and Functional Transfer Status reflective of last 24 hours
Eating: Supervision / Stand by assistance
Eating Comments: eating in bed

Toileting: Other (Comment)
Toileting Comments: Per RN, she is a 2 person assist for toileting and getting on/off the commode

Bed Mobility
Supine>Sit: Moderate Assist (between 25-49% help needed)
Sit>Supine: Maximum Assist (between 50-74% help needed)

Transfers
Sit<>Stand: Moderate Assist (between 25-49% help needed);Assistive device used
Sit<>Stand Assistive Device Details: Front wheeled walker
Cuing Used: Tactile;Verbal
Sit <> Stand Comments: bed raised. Pt is very adamant about doing it herself
Bedside Commode Transfer: Maximum Assist (between 50-74% help needed);Assistive device used
Bedside Commode Assistive Device Details: Front wheeled walker
Bedside Commode Transfer Comments: Emergency landing after pt walked about 4 feet. Pt requesting to sit and OT pulled up the bedside commode.

Functional Mobility
Distance: 4 feet + 2 feet.
Assistance Needs: Maximum Assist (between 50-74% help needed);Assistive device used
Functional Mobility Assistive Device Details: Front wheeled walker
Functional Mobility Comments: Heavy assist to maintain balance. Flexed posture, hips are not fully extended. She can slowly advance her feet with a lot of effort.

See flowsheet for objective data reflective of today's session.

Assessment
Impact on Function and Participation: OT evaluation. Jeane currently needs heavy assist with ADLs and mobility. Per pt and chart review, she has had a recent decline the last several months. Unclear if she will return to baseline function, however will benefit from therapy to try to prep for discharge home.

Barriers to Discharge: heavy care needs
Evaluation/Treatment Tolerance: Patient limited by fatigue
OT Coverage for Next Shift: toileting, dressing, she does not take showers (sponge bath only). seated ADLs, transfers

Discharge Recommendations
OT Discharge Recommendations: Follow up with OT at next level of care (or home with 24/7 assist from son. Unclear if he can assist with toileting, dressing, and showers)
Assistance with : ADLs, Functional mobility and transfers, IADLs
Supervision with : Home safety

Equipment Recommended: Bedside commode

Goals
Goal: Upper body dressing, Lower body dressing, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/02/23
Goal Status: Progressing

Goal: Toileting, Toilet transfer, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/02/23
Goal Status: Progressing

Goal: Bathing, Tub/shower transfer, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/02/23

Date of Service: 11/26/23
I saw and evaluated the patient. I have reviewed the resident(s)'s/fellow(s)'s documentation and agree.

Progress Note

Jeanne Leonie Hoffman ("Jeane") - DOB: 1/6/1925 (98 year old female)
Preferred Pronouns: she/her/hers, patient's name
Admit Date: 11/22/2023
Code Status: Full Code

CHIEF CONCERN / IDENTIFICATION:
Jeane Leonie Hoffman is a 98 year old female with hx of chronic venous stasis ulcers in both legs and FTT who presents from wound clinic with c/f acute on chronic poor PO intake and malaise, found to have leukocytosis to 12, R-sided focal lung consolidations c/f PNA, and subacute melena and hematochezia c/f occult GI bleed.

Subjective

SUBJECTIVE

INTERVAL HISTORY:
Per Dr. Liem Nguyen's interview, pt feeling well this afternoon, no complaints, would like to go home tmrw. No BM today.

SCHEDULED MEDICATIONS:
- atorvastatin, 10 mg, Daily
- cefTRIAXone, 1 g, q24h

- cholecalciferol, 2,000 units, Daily
- lidocaine, 1 patch, q24h
- multivitamin with minerals, 1 tablet, Daily
- nystatin, 500,000 units, QID
- pantoprazole, 40 mg, BID
- pentoxifylline ER, 400 mg, Daily
- sodium ferric gluconate complex, 250 mg, Daily
- timolol maleate, 1 drop, BID
- triamcinolone, , BID

INFUSED MEDICATIONS:

PRN MEDICATIONS:
- acetaminophen, 650 mg, q4h PRN
- bisacodyl, 10 mg, Daily PRN
- calcium carbonate, 1,000 mg, TID PRN
- ondansetron, 4 mg, q8h PRN
- ondansetron, 4 mg, q8h PRN
- senna, 17.2 mg, BID PRN

Assessment/Plan

ASSESSMENT/PLAN

Jeane Leonie Hoffman is a 98 year old female with hx of chronic venous stasis ulcers in both legs and FTT who presents from wound clinic with c/f acute on chronic poor PO intake and malaise, found to have leukocytosis to 12, R-sided focal lung consolidations c/f PNA, and subacute melena and hematochezia c/f occult GI bleed.

Plan of the Day 11/26/23
- finishing last day of CTX for CAP/UTI
- day 3 of IV iron
- per GI, no role for scope

#UTI
Pt with leukocytosis to 12 on admission with left shift, now resolved. UA with +Nitrites, LE, bacteria, and 50+ WBC. Pt asx at this time. Bladder scan on admission with no e/o retention.
- Blood cx x2 11/23 NGTD
- Ucx: 100K mixed flora GNRs
- being tx empirically with CTX for CAP

#CAP vs Aspiration PNA
#Focal consolidations RML RLL
Pt with leukocytosis and known sick contact son with URI found to have focal opacities in RML and RLL c/f CAP. Hx not c/w HAP picture. Unclear aspiration risk given hx dysphagia, consider broadening pending clinical improvement.
CURB 65: 1-2 pts (age +/- confusion, moderate risk) .
- urine legionella negative, S pneumo antigen negative
- viral resp panel negative
- Tx empirically for CAP:
    -CTX 1g q24h x5-7 days (11/22 - 11/26)
    - Azithromycin azithro 500mg PO q24h x 3d (11/22 - 11/24)

#Hematochezia
#Melena
#Constipation
Pt with witnessed episode of melena ~1 wk ago, and hematochezia 2 days ago c/f GIB. Hgb 10.3 on admission with drift down to 8.1, otherwise hemodynamically stable, with one small hard BM s/p enema c/w melena. Likely has slow occult bleed, CTM closely for acute progression. GOC ongoing with pt and son about further workup.

- GI following, appreciate recs:
    - most likely due to chronic NSAID use per further hx today with patient vs malignancy, either way no role for scope and continue 8 wk empiric PPI, no role for GI follow up
    - continue bowel regimen, discharge with good regimen
    - s/p 80 pantoprazole IV, continue 40 BID
    - type and screen
    - 2 peripheral IV in place

#Subacute progressive dysphagia
#Recent hx of oral thrush
Pt with unclear duration of difficulty swallowing, solids more than liquids, for the past weeks to months. Most c/f ulcer vs stricture vs mass. Could consider dysmotility picture though typically also sx with liquids. Also found to have thrush in early November, could consider esophageal candidiasis though this would typically present more with pain than difficulty swallowing, and exam

today with no e/o thrush in oropharynx.
- continue home nystatin swish and swallow
- SLP following, appreciate recs:
    - exam c/f mild dysphagia vs presbyphagia iso bad-fitting dentures, thrush
    - thin liquids, soft-bite sized solds with son assisting OR self-selec softer solids
    - 1:1 assist for all intake
    - meds crushed or whole in puree
- if within GOC, consider further w/u including endoscopy

#C/f Malnutrition
#FTT
Pt with acute on chronic poor PO and FTT with decrease in ADLs from baseline, possibly iso infection vs malignancy per workup above.
- nutrition c/s

#Mild macrocytic anemia
Pt with Hgb 10.3 on admission (stable 10-12 over last 3 years) and MCV 100 c/f macrocytic anemia. Likely multifactorial IDA vs ACD.
- iron studies: iron low at 14, TIBC low at 185, transferrin low 132, tsat low at 8, ferritin mild-elev to 211
- retic count wnl 1.6
- folate and B12 wnl
- type and screen pending
- TSH wnl 2.715 11/22
- **IV iron x3 doses 11/24-11/26 for iron 14**

#Chronic venous stasis ulcers of LLE
Several chronic LLE ulcers on L superior foot, ankle, and anterior shin. Low c/f cellulitis a this time, XR tibia fibula per PCP 11/15 for c/f osteo given persistent ulceration with no e/o bony involvement.
- wound care consult

Chronic/stable
#Subacute progressive R knee pain **-** Presenting in acute pain on admission, now much improved. XR negative for acute process. Likely 2/2 OA vs sciatica. Exam not c/f septic joint. Lidocaine patches, tylenol PRN.
#Hx recurrent DVT: Per chart review, not noted by patient. Son denies current AC, per brief chart review seems prior hx of warfarin not on currently.
#Sensorineural hearing loss R ear: home hearing aids
#HTN: Hold home losartan as pt normotensive
#HLD: Continue home atorvastatin
#Peripheral vascular disease: Continue home pentoxifylline

Inpatient Checklist:
Fluids/Electrolytes/Nutrition: full diet, IVF
Prophylaxis: holding iso c/f GIB
Lines/Drains/Airways: 2 PIVs
Disposition: floor
Code Status: Full Code , confirmed with her son Louis via interview on admission
Contacts: Primary Emergency Contact: Hoffman Alloin, Louis Charles (POA), *Cell - 206-280-1287, landline: 206-780-6885*

Physical Therapy Treatment

Jeane Leonie Hoffman
U8170135

11/26/2023
Duration of session: 40 Minutes

Subjective
Patient Report/Self-Assessment: pleasant and agreeable to PT

Home Living
Home Living Comments: bainbridge island
Type of Home: Apartment, Other (very small, son describes it as the size of hospital room)
Entry Stairs: 0
Indoor Stairs: 0
Lives With: Son
Lives with Comments: sleeps on couch with incontinent pads in place
Assistance Available at Home : 24 hour supervision
Mobility Equipment Owned: Four wheeled walker or rollator, Other (transport chair)

Functional Level:
Bed Mobility
Supine to Sit: Contact guard assist (touching/steadying assistance);Head of Bed Elevated
Sit to Supine: Contact guard assist (touching/steadying assistance)
Scooting: Supervision / Stand by assistance
Transfers
Sit<>Stand: Moderate Assist (between 25-49% help needed);Minimum Assist (less than 25% help needed);Assistive device used
Sit<>Stand Assistive Device Details: Front wheeled walker
Stand <> Sit: Moderate Assist (between 25-49% help needed);Minimum Assist (less than 25% help needed);Assistive device used
Stand <>Sit Assistive Device Details: Front wheeled walker

Interventions:
Theract: CGA for bed mobility using hospital bed features to come to/from EOB sit<>stand x4 with min-mod A; unable to achieve full standing, even with cueing and requiring mod-max A to maintain balance with significant tendencey for retropulsion; seated rest breaks in between attempts attempted standing marching for pre-gait warm-up, pt unable to shift weight enough to raise feet increased time spent answering son's many appropriate questions

ASSESSMENT/PLAN

Jeane was able to complete bed mobility with light hands on assist, but still requires up to 50% assist to achieve standing with FWW and 50-75% assist to maintain standing balance. She was unable to unweight her feet enough to attempt ambulation during this session. PT will continue to follow and progress as able.

Barriers to Discharge: increased level of assist required for all mobility

PT Discharge Equipment: FWW

Goals:
Goal: Bed mobility, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/08/23
Goal Status: Progressing
Goal: Transfer with AD, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/08/23
Goal Status: Progressing
Goal: Amb with AD, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/08/23
Goal Status: Not Progressing
Goal: tolerated OOB for meals 3x/day
Estimated Completion Date: 12/08/23
Goal Status: Progressing

PT Plan of Care:
Treatment/Interventions: Therapeutic exercise, Therapeutic functional activities, Gait/Stairs training, Patient/family training, Equipment eval/education
PT Plan: Skilled PT
PT Dosage: 2-3x/week
Plan for Next Session: repeated STS, in-room ambulation as able

Other Recommendations:

PT Daily Recommendations: 1PA for EOB, overhead lift for transfers, ambulate with therapies only at this time

Jillian Stoewer, PT

Justification for Ambulatory Assistive Device

Diagnosis: R26.2 difficulty with ambulation, R29.6 high risk for falls, R26.81 impaired balance, and M62.81 generalized weakness

Length of Need: >6 Months

Assistive Device: This pt requires a FWW for safe ambulation and transfers within their home. Without this device they are at risk for falls and injury. They have demonstrated safe use of this device during this or previous PT sessions and no lesser restrictive device can sufficiently resolve their mobility issues.

Ht 5' 0" (1.524 m)

Occupational Therapy Note

Patient Name: Jeane Leonie Hoffman
MRN: U8170135
Today's Date: 11/27/2023
Total Treatment time: 55 Minutes

ADL and Functional Transfer Status reflective of last 24 hours

Toileting Comments: son reports assisting his mother to the commode earlier this morning.

Bathing Comments: discussed home set and bathing, son reports they have all necessary DME and a system in place at home

Bed Mobility

Supine>Sit: Supervision / Stand by assistance
Sit>Supine: Supervision / Stand by assistance

Transfers
Sit<>Stand: Minimum Assist (less than 25% help needed);Moderate Assist (between 25-49% help needed)
Sit<>Stand Assistive Device Details: Front wheeled walker
Cuing Used: Tactile;Verbal
Sit <> Stand Comments: HOB raised to simulate home set up
Bedside Commode Transfer: Maximum Assist (between 50-74% help needed);Assistive device used
Bedside Commode Assistive Device Details: Front wheeled walker
Bedside Commode Transfer Comments: OT instructed son in use of gait belt and how to don/doff, he demo's proper technique

edu re: role of OT goals, POC,

See flowsheet for objective data reflective of today's session.

Assessment
Impact on Function and Participation: Jeane still requires a lot of assist for all mobility and BADL. Her son, Louis, feels confident about caring for his mother at her current LOF. Caregiver training completed with Louis for gait belt use and transfers. He reports they have all necessary DME at home. Anticipate d/c home when medically ready with home health therapy and Louis as 24/7 caregiver.

Barriers to Discharge: None
Evaluation/Treatment Tolerance: Patient tolerated treatment well
OT Coverage for Next Shift: toileting, dressing, she does not take showers (sponge bath only). seated ADLs, transfers

Discharge Recommendations
OT Discharge Recommendations: Follow up with OT at next level of care, Home health OT
Assistance with : ADLs, Functional mobility and transfers, IADLs
Supervision with : Home safety

Equipment Recommended: Bedside commode

Goals
Goal: Upper body dressing, Lower body dressing, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/02/23
Goal Status: Progressing

Goal: Toileting, Toilet transfer, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/02/23
Goal Status: Progressing

Goal: Bathing, Tub/shower transfer, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/02/23
Goal Status: Progressing

Discharge Planning Assessment

Visit Information:
Patient is a 98 yrs female admitted on 11/22/2023 for Community acquired bacterial pneumonia.
Discharge Planning Assessment Type: Discharge Planning Assessment (Face-to-Face)
Is an interpreter used:: No
Is this a planned admission: No, Admission Source: Admitted through ED
Did pt/family decline dc planning evaluation/assistance? No

MSW participates in multidisciplinary rounds to discuss ongoing medical plan and discharge planning. Medicine team anticipated discharge plan - home with son and HH PT/OT today. MSW noted securing HH will be challenging given patient lives on Bainbridge Island ad Molina insurance. Chart review completed.

MSW met with patient and her son Louis MSW explained social worker's role and services. Patient and son were agreeable to assessment and meeting with MSW. MSW contact information provided.

Patient's son, Louis confirms plan for discharge home with him, but understood discharge was tomorrow.

MSW met with patient and son Louis to discuss the team's recommendation for Home Health Services (HHC), specifically PT/OT disciplines. Discussed agencies that are appropriate within their geographic location and insurance coverage. MSW offered list of appropriate HHC agencies with quality metrics for further consideration; Patient declined printed material reflecting ratings and quality measures for Home Health agencies which cover patient's geographical region. Patient is agreeable to receiving services with the home health agency contracted with their insurance with the soonest start of care date. MSW noted it might not be possible to secure HH due to their location and insurance. Son was understanding. He notes they sometimes go to a local gym that is about 30 minutes away that has free Silver Sneaker program. They offer therapy there as well per son.

Made HH referral in AIDA - only options CHI and CenterWell unclear if either accept insurance, awaiting response. MSW requested SWA assistance with monitoring. MSW requested Medicine MD also provide outpatient PT/OT scripts in case HH is not possible.

Patient's son declined any other social work or discharge needs. He notes he will transport at discharge.

Health Care Decision Making:
Does the patient have a Healthcare DPOA? No

Discharge Plan:
EDD:11/27/2023
Patient Discharge Goals were/are: Discussed wi/ patient;Discussed wi/ family
Patient expects to be discharged to: home with son
Post-discharge facility and service information was: Discussed with patient, offered freedom of choice;Discussed with LNOK, offered freedom of choice
Anticipated living situation post discharge: Home with family/support
Anticipated Assistance Needed at discharge: MSW will make HH referrals but might not be available for geographical area and insurance
Anticipated Resources/Services Needed at discharge: Home health
Post Discharge Caregiver Confirmation: Discussed with caregiver, agreed
Post Discharge Caregiver Contact Information: Son Louis

Discharge Transportation:
Does the patient need dc transportation arranged? No
Transportation Type: Private vehicle

Potential Barriers to Discharge: None at this time
Discharge Complexity Level:2-With supportive/new needs
Initial Discharge Planning Assessment Complete: Yes

MSW continues to follow for discharge planning, care coordination, and support.

Home Health Face to Face Note

Home Health Face To Face by Rosse, Christopher John, DO at 11/27/2023 9:30 AM

Version 1 of 1

Author: Rosse, Christopher John, DO | Service: Medicine | Author Type: Physician
Filed: 11/27/2023 9:31 AM | Date of Service: 11/27/2023 9:30 AM | Status: Signed
Editor: Rosse, Christopher John, DO (Physician)

Date of Face to Face Encounter: 11/27/2023

This Face to Face Encounter was in whole, or in part, for the following medical condition(s) which is the primary reason for home health care:
Medical Condition(s): (J18.9) Pneumonia of right middle lobe due to infectious organism (primary encounter diagnosis)

I certify that, based on my findings, the following services are medically necessary for home health services: Physical Therapy

Ancillary Services (only allowed if Nursing, PT, or ST are ordered):
OT

My clinical findings that support the need for the above services are: Chronic venous stasis wounds of bilateral lower extremities, anemia, failure to thrive, community acquired pneumonia

I certify that this patient is homebound (.i.e. absences from require considerable and taxing effort and are for medical reasons or religious services and are infrequent or of short duration) because: Chronic venous stasis wounds of bilateral lower extremities, anemia, failure to thrive, community acquired pneumonia

The Center for Medicaid Services (CMS) requires the hospitalist/attending signing the Face to Face Encounter documentation to identify the community physician in the discharge plan for home health care (the provider assuming ongoing management of the Home Health Plan of Care).

Discharge Instructions

Dear Jeanne Leonie Hoffman,

You were admitted for difficulty eating, weakness, and mild confusion. You were found to have evidence of a urinary tract infection, possible pneumonia, and evidence of upper gastrointestinal bleed. You were treated with IV antibiotics and proton pump inhibitor, which have helped you improved significantly. Your GI bleed is slow and now has been stabilized and improved. We talked to our GI colleagues and they did not think that you need to be scoped or follow up outpatient.

New Medications
- please continue taking protonix twice per day for the next 7 weeks or so
- please continue taking senna and miralax to prevent constipation as needed and HOLD if loose stool

Other Instructions
- Very important is to limit tylenol (acetaminophen) to maximum 3g total / day. Avoid NSAIDs (like alleve, ibuprofen, advil)
- Continue with wound care, post-procedure

Follow up appointments
- follow up with primary care

PLEASE RETURN TO THE HOSPITAL IF:
- fever, chest pain, shortness of breath, confusion, red blood in stools, worsening abdominal pain

It was a pleasure being part of your care team.

Scheduled Appointments

Dec 06, 2023 10:00 AM	4060 NE Stevens Way, Box 354410
(Arrive by 9:45 AM)	Seattle WA 98195-4410

Assessment/Plan

ASSESSMENT/PLAN

Jeane Leonie Hoffman is a 98 year old female with hx of chronic venous stasis ulcers in both legs and FTT who presents from wound clinic with c/f acute on chronic poor PO intake and malaise, found to have leukocytosis to 12, R-sided focal lung consolidations c/f PNA, and subacute melena and hematochezia c/f occult GI bleed.

Plan of the Day 11/27/23
- follow up with PT/OT
- work with Social work to establish Homehealth services
- prep discharge

#UTI
Pt with leukocytosis to 12 on admission with left shift, now resolved. UA with +Nitrites, LE, bacteria, and 50+ WBC. Pt asx at this time. Bladder scan on admission with no e/o retention.
- Blood cx x2 11/23 NGTD
- Ucx: 100K mixed flora GNRs
- being tx empirically with CTX for CAP

#CAP vs Aspiration PNA
#Focal consolidations RML RLL
Pt with leukocytosis and known sick contact son with URI found to have focal opacities in RML and RLL c/f CAP. Hx not c/w HAP picture. Unclear aspiration risk given hx dysphagia, consider broadening pending clinical improvement.
CURB 65: 1-2 pts (age +/- confusion, moderate risk) .
- urine legionella negative, S pneumo antigen negative
- viral resp panel negative
- Tx empirically for CAP:
    -CTX 1g q24h x5-7 days (11/22 - 11/26)
    - Azithromycin azithro 500mg PO q24h x 3d (11/22 - 11/24)

#Hematochezia
#Melena
#Constipation
Pt with witnessed episode of melena ~1 wk ago, and hematochezia 2 days ago c/f GIB. Hgb 10.3 on admission with drift down to 8.1, otherwise hemodynamically stable, with one small hard BM s/p enema c/w melena. Likely has slow occult bleed, CTM closely for acute progression. GOC ongoing with pt and son about further workup.

- GI following, appreciate recs:
    - most likely due to chronic NSAID use per further hx today with patient vs malignancy, either way no role for scope and continue 8 wk empiric PPI, no role for GI follow up
    - continue bowel regimen, discharge with good regimen
    - s/p 80 pantoprazole IV, continue 40 BID
    - type and screen
    - 2 peripheral IV in place
    - standing bowel reg

#Subacute progressive dysphagia
#Recent hx of oral thrush
Pt with unclear duration of difficulty swallowing, solids more than liquids, for the past weeks to months. Most c/f ulcer vs stricture vs mass. Could consider dysmotility picture though typically also sx with liquids. Also found to have thrush in early November, could consider esophageal candidiasis though this would typically present more with pain than difficulty swallowing, and exam today with no e/o thrush in oropharynx.
- continue home nystatin swish and swallow
- SLP following, appreciate recs:
    - exam c/f mild dysphagia vs presbyphagia iso bad-fitting dentures, thrush
    - thin liquids, soft-bite sized solds with son assisting OR self-selec softer solids
    - 1:1 assist for all intake
    - meds crushed or whole in puree
- if within GOC, consider further w/u including endoscopy

#C/f Malnutrition
#FTT
Pt with acute on chronic poor PO and FTT with decrease in ADLs from baseline, possibly iso infection vs malignancy per workup above.
- nutrition c/s

#Mild macrocytic anemia
Pt with Hgb 10.3 on admission (stable 10-12 over last 3 years) and MCV 100 c/f macrocytic anemia. Likely multifactorial IDA vs ACD.
- iron studies: iron low at 14, TIBC low at 185, transferrin low 132, tsat low at 8, ferritin mild-elev to 211
- retic count wnl 1.6
- folate and B12 wnl
- type and screen pending
- TSH wnl 2.715 11/22
- **IV iron x3 doses 11/24-11/26 for iron 14**

#Chronic venous stasis ulcers of LLE
Several chronic LLE ulcers on L superior foot, ankle, and anterior shin. Low c/f cellulitis a this time, XR tibia fibula per PCP 11/15 for c/f osteo given persistent ulceration with no e/o bony involvement.
- wound care consult

Chronic/stable
#Subacute progressive R knee pain **-** Presenting in acute pain on admission, now much improved. XR negative for acute process. Likely 2/2 OA vs sciatica. Exam not c/f septic joint. Lidocaine patches, tylenol PRN.
#Hx recurrent DVT: Per chart review, not noted by patient. Son denies current AC, per brief chart review seems prior hx of warfarin not on currently.
#Sensorineural hearing loss R ear: home hearing aids
#HTN: Hold home losartan as pt normotensive
#HLD: Continue home atorvastatin
#Peripheral vascular disease: Continue home pentoxifylline

Inpatient Checklist:
Fluids/Electrolytes/Nutrition: full diet, IVF
Prophylaxis: holding iso c/f GIB
Lines/Drains/Airways: 2 PIVs
Disposition: floor
Code Status: Full Code , confirmed with her son Louis via interview on admission

Components

Component	Value	Reference Range	Flag	Lab
COVID-19 Coronavirus Qual PCR Specimen Type	Nasal swab	—	—	UWMC
COVID-19 Coronavirus Qual PCR Result	None detected	NDET	—	UWMC
COVID-19 Coronavirus Qual PCR Interpretation	This is a negative result. Laboratory testing alone cannot rule out infection, particularly in the presence of clinical risk factors such as symptoms or exposure history.	—	—	UWMC

Comment:
Testing performed using the Cepheid Xpert (TM) Xpress SARS-CoV-2/Flu/RSV Test Kit. See https://testguide.labmed.uw.edu/FABRCV for details.
This test is not yet approved or cleared by the United States FDA. When there are no FDA-approved or cleared tests available, and other criteria are met, FDA can make tests available under an emergency access mechanism called an Emergency Use Authorization (EUA).
The EUA for this test is supported by the Secretary of Health and Human Service's (HHS's) declaration that circumstances exist to justify the emergency use of in vitro diagnostics for the detection and/or diagnosis of the virus that causes COVID-19.
This EUA will remain in effect (meaning this test can be used) for the duration of the COVID-19 declaration justifying emergency of IVDs, unless it is terminated or revoked by FDA (after which the test may no longer be used).

Comment:
Testing performed using the Hologic Panther Fusion (R) Analyte Specific Reagents for Coronavirus OC43, 229E, HKU1 and NL63 Real-time RT-PCR assay.

This assay does NOT detect SARS-CoV-2 (COVID-19). It is specifically designed for the detection of Coronavirus OC43, 229E, HKU1 and NL63. If you require COVID-19 testing, please refer to the On Line Test Guide (https://testguide.labmed.uw.edu/public/view/NCVQLT).

This test was developed and its performance characteristics determined by the University of Washington Department of Laboratory Medicine and Pathology. It has not been cleared or approved by the US Food and Drug Administration. This laboratory is certified under the Clinical Laboratory Improvement Amendments (CLIA) as qualified to perform high complexity clinical laboratory testing. This test is used for clinical purposes. It should not be regarded as investigational or for research.

11/22/2023 - ED to Hosp-Admission (Discharged) in 6NE MED FAMMED (continued)

Labs (group 1 of 2) (continued)

Resulting lab: UWMC MONTLAKE DEPT OF LAB MED
Acknowledged by: Perez, Delmis Joel, RN on 11/24/23 1653

Components

Component	Value	Reference Range	Flag	Lab
Legionella Ag, URN, Result	Negative	NRN	—	UWMC
Legionella Ag, URN, Comment	--	—	—	UWMC

Result:
Negative for L. pneumophila serogroup 1 antigen, suggesting no recent or current infection. Infection due to Legionella cannot be ruled out since other serogroups and species may cause disease,
antigen may not be present in urine in early infection, and the level of antigen present in the urine may be below the detection limit of the test.

Acknowledged by: Perez, Delmis Joel, RN on 11/24/23 1653

Components

Component	Value	Reference Range	Flag	Lab
COVID-19 Coronavirus Qual PCR Specimen Type	Nasal swab	—	—	UWMC
COVID-19 Coronavirus Qual PCR Result	None detected	NDET	—	CL
COVID-19 Coronavirus Qual PCR Interpretation	This is a negative result. Laboratory testing alone cannot rule out infection, particularly in the presence of clinical risk factors such as symptoms or exposure history.	—	—	CL

Comment:
Performed using the Cobas (R) SARS-CoV-2 real-time RT-PCR assay. Additional details available here: https://testguide.labmed.uw.edu/NCVQLT
This test is not yet approved or cleared by the United States FDA. When there are no FDA-approved or cleared tests available, and other criteria are met, FDA can make tests available under an emergency access mechanism called an Emergency Use Authorization (EUA).
The EUA for this test is supported by the Secretary of Health and Human Service's (HHS's) declaration that circumstances exist to justify the emergency use of in vitro diagnostics for the detection and/or diagnosis of the virus that causes COVID-19.
This EUA will remain in effect (meaning this test can be used) for the duration of the COVID-19 declaration justifying emergency of IVDs, unless it is terminated or revoked by FDA (after which the test may no longer be used).

result.
Laboratory testing alone cannot rule out infection, particularly in the presence of clinical risk factors such as symptoms or exposure history.

Comment:
Performed using the Cobas (R) SARS-CoV-2 real-time RT-PCR assay. Additional details available here: https://testguide.labmed.uw.edu/NCVQLT
This test is not yet approved or cleared by the United States FDA. When there are no FDA-approved or cleared tests available, and other criteria are met, FDA can make tests available under an emergency access mechanism called an Emergency Use Authorization (EUA).
The EUA for this test is supported by the Secretary of Health and Human Service's (HHS's) declaration that circumstances exist to justify the emergency use of in vitro diagnostics for the detection and/or diagnosis of the virus that causes COVID-19.
This EUA will remain in effect (meaning this test can be used) for the duration of the COVID-19 declaration justifying emergency of IVDs, unless it is terminated or revoked by FDA (after which the test may no longer be used).

CT Head wo Contrast

Resulted: 11/22/23 1439, Result status: Final result

Ordering provider: Clauther, Evins, MD 11/22/23 1231
Order status: Completed
Resulted by:
Andre, Jalal Badi, MD
Dearden, Andrew Mel, MD
Filed by: Interface, Radiology Results In 11/22/23 1442
Performed: 11/22/23 1349 - 11/22/23 1410
Accession number: 40352362
Resulting lab: UW RADIOLOGY
Narrative:
EXAMINATION:
CT HEAD W/O CONTRAST

CLINICAL INDICATION:
Altered mental status

TECHNIQUE:

Imaging (continued)

5 mm MDCT images from skull base to vertex without contrast. Patient age specific parameters were used for radiation exposure.

COMPARISON:
CT dated 7/24/2019

FINDINGS:
MASS EFFECT & VENTRICLES: No shift. Generalized cerebral volume loss with prominence of the ventricles. The sulci and cisterns are patent.
BRAIN: No acute territorial infarct, acute hemorrhage or mass lesion is seen. Deep and periventricular white matter hypodensities likely related to chronic small vessel ischemia. Bilateral basal ganglia calcifications.
VASCULAR: Advanced atherosclerotic changes in the cavernous carotid and vertebral vessels.
EXTRA-AXIAL: Extra-axial spaces are normal. Scattered dural calcifications.
EXTRA-CRANIAL: Skull and facial bones are normal. Sinuses and mastoids are clear. Scleral calcifications.

Impression:
1. Age-related changes without acute intracranial abnormality.

Preliminary report by neuroradiology fellow; final report by the attending neuroradiologist will follow.

ATTENDING FINAL REPORT

FINDINGS/IMPRESSION (final):
I agree with the preliminary report with the following comment(s):
Subtle, asymmetric hypodensity is identified within the left caudate head and basal ganglia relative to the right, which appears to be relatively unchanged from examination of September 10, 2018, given differences in slice selection and technique. There is subtle asymmetric prominence of the left lateral ventricle relative to the right which may represent associated ex vacuo dilatation. However, the possibility of an acute on chronic infarct within the deep left MCA distribution be difficult to entirely exclude. Clinical correlation is suggested.

+ct+

I have personally reviewed the images and agree with the report (or as edited).

Narrative:
RADIOGRAPHIC EXAMINATION:
XR FEMUR 2 VW RIGHT, XR PELVIS 1-2 VW, XR KNEE 4+ VW RIGHT

CLINICAL INDICATION:
pain

COMPARISON:
10/13/2021, 10/22/2014.

FINDINGS AND
Impression:
Diffuse osseous demineralization. Vascular calcifications.

Pelvis: No acute fracture or pelvic ring disruption. Degenerative changes in the lumbosacral spine, sacroiliac joints, and pubic symphysis. Moderate bilateral hip osteoarthritis.

Right femur: Lateral plate and dynamic screw in the proximal femur transfixed an old intertrochanteric fracture. Lateral plate and screw fixation of the mid to distal femur transfix an old distal femoral diaphyseal fracture. The proximal screw of the lateral plate is slightly proud to the plate, similar to prior. Otherwise no hardware complication.

Right knee: No acute fracture or dislocation. Mild tricompartmental osteoarthritis most pronounced in the medial compartment. Suprapatellar enthesophyte at the quadriceps insertion. Trace joint effusion.

XR Pelvis 1-2 Vw Resulted: 11/22/23 1431, Result status: Final result

Ordering provider: Clauther, Evins, MD 11/22/23 1231
Resulted by: Damle, Rohan N, MD
Performed: 11/22/23 1328 - 11/22/23 1412
Resulting lab: UW RADIOLOGY
Order status: Completed
Filed by: Interface, Radiology Results In 11/22/23 1434
Accession number: 40351901

Narrative:
RADIOGRAPHIC EXAMINATION:
XR FEMUR 2 VW RIGHT, XR PELVIS 1-2 VW, XR KNEE 4+ VW RIGHT

CLINICAL INDICATION:
pain

COMPARISON:
10/13/2021, 10/22/2014.

FINDINGS AND
Impression:
Diffuse osseous demineralization. Vascular calcifications.

11/22/2023 - ED to Hosp-Admission (Discharged) in 6NE MED FAMMED (continued)

Imaging (continued)

Pelvis: No acute fracture or pelvic ring disruption. Degenerative changes in the lumbosacral spine, sacroiliac joints, and pubic symphysis. Moderate bilateral hip osteoarthritis.

Right femur: Lateral plate and dynamic screw in the proximal femur transfixed an old intertrochanteric fracture. Lateral plate and screw fixation of the mid to distal femur transfix an old distal femoral diaphyseal fracture. The proximal screw of the lateral plate is slightly proud to the plate, similar to prior. Otherwise no hardware complication.

Right knee: No acute fracture or dislocation. Mild tricompartmental osteoarthritis most pronounced in the medial compartment. Suprapatellar enthesophyte at the quadriceps insertion. Trace joint effusion.

CTA Abdomen and Pelvis Angio Resulted: 11/23/23 0714, Result status: Final result

Ordering provider: Clauther, Evins, MD 11/22/23 1658
Order status: Completed
Resulted by:
Cai, Larry M, MD
Anderson, Drew Christopher, MD
Filed by: Interface, Radiology Results In 11/23/23 0717
Performed: 11/22/23 1747 - 11/22/23 1829
Accession number: 40356903
Resulting lab: UW RADIOLOGY
Narrative:
EXAMINATION:
CTA ABDOMEN AND PELVIS ANGIO

CLINICAL INDICATION:
Blood in stool.

TECHNIQUE:
CVA 09 CTA Abdomen and Pelvis - Gastrointestinal Ischemia and Hemorrhage.
CTA of abdomen and pelvis was performed in the non-contrast, arterial and venous phases from the domes of the diaphragm to the lesser trochanters. On an independent workstation, volume rendered and/or MIP reconstructions were generated to evaluate the abdominal and pelvic vasculature.

CONTRAST:
IOHEXOL 350 MG/ML IV SOLN,80 mL Intravenous,11/22/2023 1829

COMPARISON:
CT abdomen pelvis with contrast July 24, 2019.

FINDINGS:
Lower chest: Large hiatal hernia. Bibasilar atelectasis.
Liver: Unremarkable.
Gallbladder: Distended. No radiopaque stones.
Bile ducts: Unremarkable.
Spleen: Unremarkable.
Pancreas: Unremarkable.
Adrenal glands: Unremarkable.
Kidneys and Ureters: Bilateral renal cortical cysts and additional subcentimeter hypodense lesions which are too small to characterize.
Abdominal and Retroperitoneum Lymph Nodes: No enlarged lymph nodes.

Vasculature:
Aorta - no aneurysm, dissection, or coarctation. Moderate to severe atherosclerotic calcification.
Celiac artery - Patent, no stenosis or filling defect.
Superior mesenteric artery - Patent, no stenosis or filling defect.
Inferior mesenteric artery - Patent, no stenosis or filling defect.
Right renal artery - Patent, no stenosis or filling defect.
Left renal artery - Patent, no stenosis or filling defect. Patent accessory left renal artery without stenosis or filling defect.
Inferior vena cava - There is no IVC thrombosis. Prominent pelvic venous collaterals, probably from chronic occlusive disease.
Portal vein and mesenteric veins - There is no portal or mesenteric thormbosis.

Bowel: Unremarkable.
Reproductive organs: Hysterectomy.
Bladder: Unremarkable.

11/22/2023 - ED to Hosp-Admission (Discharged) in 6NE MED FAMMED (continued)

Imaging (continued)

Peritoneum: Unremarkable.
Abdominal Wall: Unremarkable. Severe multilevel degenerative changes visualized spine. No acute or suspicious osseous lesion. Wedging and endplate deformities of multiple vertebral bodies, not appearing acute.
Bones: Right femoral neck fixation hardware. Pelvic and rib deformities, old.

Impression:
1. No evidence of active extravasation within the abdomen or pelvis.

2. Moderate to severe atherosclerotic calcification of the abdominal aorta and branch vessels, without focal stenosis, occlusion, or dissection.

This is a preliminary report dictated by Dr. Drew Anderson (PGY-3).

ATTENDING FINAL REPORT

I agree with the preliminary report. In the lower chest, probable additional foci of airspace disease, for example at the left base. Consider surveillance imaging ensure resolution. Coronary calcifications.

Extensive diverticulosis without convincing CT evidence of arterial extravasation or active inflammation. Consider colonoscopy if indicated.

I have personally reviewed the images and agree with the report (or as edited).

Questionnaire

Question	Answer
Dressing Type:	Cavilon no sting skin prep, Aquacel sheet, Mepilex border

Order comments: 1. Cleanse with normal saline and pat dry. This step can be done in the shower, washing LLE with gentle soap and rinse with clean running warm water, pat dry. 2. Apply Cavilon No Sting Skin Barrier to immediate periwound skin and allow to dry completely. This will protect periwound skin from any drainage. 3. Cut pieces of a dry Aquacel Sheet (MM# 105650) to size and cover deep wound bed. Apply several drops of NS onto dry Aquacel Sheet. It will turn clear once it is moist. This will wick exudate from the wound, provide a moist wound healing environment, and will aid in autolytic debridement. 4. Cover the wound with two 6"x6" and two 3"x3" Mepilex border dressing (MM# 114579/139547). This will provide a moist wound healing environment and absorb exudate from the wound. 5. Change every three days and PRN saturation, rolling, or soiling. 6. Optimize nutrition and hydration for healing. 7. Optimize glycemic control. 8. Off loading pressure and floating heels with pillows while in the bed. 9. Recommend to continue f/u with OP wound clinic for ongoing wound assessment and management after DC home. Extra wound change supplies given. Wound supplies prescription and supplier company list in chart for MD signature and will give it to pt by primary RN to arrange future wound supplies ordering

Respiratory Care

Oxygen Therapy Nasal Cannula; Oxygen 2 L/min; Keep SpO2 >= 92% (Discontinued)

Electronically signed by: **Nguyen, Liem Hieu, MD on 11/22/23 1625** Status: **Discontinued**
Ordering user: Nguyen, Liem Hieu, MD 11/22/23 1625
Authorized by: Zvonar, Ivan, MD
Frequency: Routine Continuous 11/22/23 2046 - Until Specified
Quantity: 1
Ordering provider: Nguyen, Liem Hieu, MD
Ordering mode: Standard
Class: Hospital Performed
Instance released by: Logrono, April Kathlyn Kathlyn, RN (auto-released) 11/22/2023 8:45 PM
Discontinued by: Discharge Provider, Automatic 11/28/23 1716 [Patient Discharge]

Questionnaire

Question	Answer
Oxygen Delivery Route	Nasal Cannula
Initial Oxygen Amount	Oxygen 2 L/min
Titrate Oxygen	Keep SpO2 >= 92%

SLP

Inpatient Consult to Speech Language Pathology (Discontinued)

Electronically signed by: **Nguyen, Liem Hieu, MD on 11/22/23 1625** Status: **Discontinued**
Ordering user: Nguyen, Liem Hieu, MD 11/22/23 1625
Authorized by: Zvonar, Ivan, MD
Frequency: Routine Until therapy completed 11/22/23 2046 - 1 occurrence
Quantity: 1
Ordering provider: Nguyen, Liem Hieu, MD
Ordering mode: Standard
Class: Hospital Performed
Instance released by: Logrono, April Kathlyn Kathlyn, RN (auto-released) 11/22/2023 8:45 PM
Discontinued by: Discharge Provider, Automatic 11/28/23 1716 [Patient Discharge]

Questionnaire

Question	Answer
Hospital	UWMC NW INPATIENT
Reason for Consult	Swallow evaluation and treat

11/22/2023 - ED to Hosp-Admission (Discharged) in 6NE MED FAMMED (continued)

Other Orders (group 3 of 3) (continued)

Supplies

Ambulatory Assistive Device (Discontinued)

Electronically signed by: **Nguyen, Liem Hieu, MD on 11/27/23 1352** Status: **Discontinued**
Ordering user: Nguyen, Liem Hieu, MD 11/27/23 1352
Ordering provider: Nguyen, Liem Hieu, MD
Authorized by: Rosse, Christopher John, DO
Ordering mode: Standard
Frequency: Routine 11/27/23 -
Class: Normal
Quantity: 1
Released by: Nguyen, Liem Hieu, MD 11/27/23 1352
Discontinued by: Discharge Provider, Automatic 03/14/25 1742 [System automatic cancellation for deceased patient]
Diagnoses
Difficulty walking [R26.2]

Questionnaire

Question	Answer
Length of Need	Greater than 6 months
Type	Front-Wheeled Walker

Order comments: Justification for Ambulatory Assistive Device Diagnosis: R26.2 difficulty with ambulation, R29.6 high risk for falls, R26.81 impaired balance, and M62.81 generalized weakness Length of Need: >6 Months Assistive Device: This pt requires a FWW for safe ambulation and transfers within their home. Without this device they are at risk for falls and injury. They have demonstrated safe use of this device during this or previous PT sessions and no lesser restrictive device can sufficiently resolve their mobility issues. Ht 5' 0" (1.524 m) Wt 88 lb 2.9 oz (40 kg)

Score	10 [N2]	—
PT Therapeutic Activity Time Minute(s)	25 [N2]	—
PT Therapeutic Activity 1	bed mobility: max A to right side of bed with bed features and assist of 2 [N2]	—
PT Therapeutic Activity 2	sitting at EOB SBA w/o back support [N2]	—
PT Therapeutic Activity 3	transfers: sit <> stand from elevated bed with max A of 2, patient pulling up on walker stabilized by therapist [N2]	—
PT Therapeutic Activity 4	static standing: max A for 2 - not able to stand fully upright however stood for about 30 seconds [N2]	—
PT Therapeutic Activity 5	pt/family ed: fall risk reduction, fall prevention, activity progression as tolerated, skin protection, [N2]	—
PT Impairments	Decreased strength;Decreased range of motion;Decreased endurance;Impaired balance;Decreased mobility [N2]	—
PT Assessment	Eval complete. Jeane is below her baseline level of mobility and per her son she was more active and able to can peaches earlier this month. She was minimally verbal during session (HOH with no working hearing aid today) with son anwering for her the majority of session. She did respond to physical cues about mobilizing and was able to initiate movement of bil LE's towards sitting at EOB. In context of session, she is able to sit unsupported at EOB and transfers to	—

Occupational Therapy Note

Patient Name: Jeane Leonie Hoffman
MRN: U8170135
Today's Date: 11/27/2023
Total Treatment time: 55 Minutes

ADL and Functional Transfer Status reflective of last 24 hours

Toileting Comments: son reports assisting his mother to the commode earlier this morning.

Bathing Comments: discussed home set and bathing, son reports they have all necessary DME and a system in place at home

Bed Mobility
Supine>Sit: Supervision / Stand by assistance
Sit>Supine: Supervision / Stand by assistance

Transfers
Sit<>Stand: Minimum Assist (less than 25% help needed);Moderate Assist (between 25-49% help needed)
Sit<>Stand Assistive Device Details: Front wheeled walker
Cuing Used: Tactile;Verbal
Sit <> Stand Comments: HOB raised to simulate home set up
Bedside Commode Transfer: Maximum Assist (between 50-74% help needed);Assistive device used
Bedside Commode Assistive Device Details: Front wheeled walker
Bedside Commode Transfer Comments: OT instructed son in use of gait belt and how to don/doff, he demo's proper technique

edu re: role of OT goals, POC,

See flowsheet for objective data reflective of today's session.

Assessment
Impact on Function and Participation: Jeane still requires a lot of assist for all mobility and BADL. Her son, Louis, feels confident about caring for his mother at her current LOF. Caregiver training completed with Louis for gait belt use and transfers. He reports they have all necessary DME at home. Anticipate d/c home when medically ready with home health therapy and Louis as 24/7 caregiver.

Flowsheets (continued)

Barriers to Discharge: None
Evaluation/Treatment Tolerance: Patient tolerated treatment well
OT Coverage for Next Shift: toileting, dressing, she does not take showers (sponge bath only). seated ADLs, transfers

Discharge Recommendations
OT Discharge Recommendations: Follow up with OT at next level of care, Home health OT
Assistance with : ADLs, Functional mobility and transfers, IADLs
Supervision with : Home safety

Equipment Recommended: Bedside commode

Goals
Goal: Upper body dressing, Lower body dressing, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/02/23
Goal Status: Progressing

Goal: Toileting, Toilet transfer, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/02/23
Goal Status: Progressing

Goal: Bathing, Tub/shower transfer, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/02/23
Goal Status: Progressing

Natalie I Hamrick, OT

Patient Active Problem List

Diagnosis

- Sensorineural hearing loss, unspecified
- Hypercholesterolemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- History of recurrent deep vein thrombosis (DVT)
- Imbalance
- Primary osteoarthritis of both hips
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Primary open angle glaucoma (POAG) of both eyes
- Community acquired bacterial pneumonia

Past Medical History:

Diagnosis	Date
• Closed fracture of right distal femur (HCC)	7/15/2021
• Fall	9/3/2019
• Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)	5/26/2019
• Venous stasis ulcer (HCC)	5/26/2019
• Diabetic ulcer of lower extremity (HCC)	9/24/2018
• Severe protein-calorie malnutrition (HCC)	6/7/2018
• Urge urinary incontinence	6/7/2018
• Venous ulcer of left leg (HCC)	6/7/2018
• Normocytic anemia	6/7/2018
• Chronic venous hypertension with ulcer and inflammation, left (HCC)	5/17/2018
• Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)	5/17/2018
• Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)	5/17/2018
• Thrombocytopenia (HCC)	11/2/2016
• Leg weakness, bilateral	1/6/2015

11/22/2023 - ED to Hosp-Admission (Discharged) in 6NE MED FAMMED (continued)

Flowsheets (continued)

- Weakness of trunk musculature 1/6/2015
- Vertebral fracture 12/13/2012
  Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed
- Thyroid nodule, uninodular 12/13/2012
  CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.
- Closed fracture of unspecified intracapsular section of neck of femur 5/1/2007
  Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.
- Unspecified vitamin B deficiency 5/1/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency
- Impaired fasting glucose 3/22/2007
- Carpal tunnel syndrome 11/20/2006
  Carpal tunnel release right wrist in 1989
- DIAPHRAGMATIC HERNIA 11/20/2006
  CT of abdomen in 2006
- Esophageal reflux 11/20/2006
- Other convulsions 11/20/2006
  Petit Mal since 1975 Carbamazepine level 7.6 on Feb 2007 Discontinued based on ER neuro consult in early 2013 No recurrence
- Allergic rhinitis, cause unspecified 11/20/2006
- DVT, recurrent, lower extremity, chronic 11/20/2006
  Recurrent DVT and phlebitis since 1982 Per Vascular Surgery note 5/9/2006: continue warfarin 3/9/2010 Lower extremity arterial vascular ultrasound studies normal
- Diabetes mellitus (HCC)
- PAD (peripheral artery disease) (HCC)
- Ulcer of left lower extremity, limited to breakdown of skin (HCC)
  Chronic, Multiple sites of lower leg and ankle, with MSSA

Past Surgical History:

Procedure	Laterality	Date
• PR TOTAL ABDOMINAL HYSTERECT W/WO RMVL TUBE OVARY		

Subjective
Patient Report/Self-Assessment: Sitting up in bed, willing to work with PT. Had a fall in 2021 with injury to femur. "I am OK" when asked about rubbing her R knee. L leg elevated on pillow

Home Living
Home Living Comments: bainbridge island
Type of Home: Apartment;Other (very small, son describes it as the size of hospital room)
Entry Stairs: 0
Indoor Stairs: 0
Lives With: Son
Lives with Comments: sleeps on couch with incontinent pads in place
Assistance Available at Home : 24 hour supervision
Mobility Equipment Owned: Four wheeled walker or rollator;Other (transport chair)

Prior Level of Function : can walk 100 ft with walker at baseline when she is feeling well, since Oct has been spending most of day on couch, walking short distances with max A from son

Objective

RLE Assessment
RLE Assessment: Within Functional Limits
RLE AROM (degrees)
R Knee Flexion: 95
R Knee Extension: 10

RLE Strength

11/22/2023 - ED to Hosp-Admission (Discharged) in 6NE MED FAMMED (continued)

Flowsheets (continued)

R Hip Flexion: 3-/5

LLE Assessment
LLE Assessment: Exceptions to WFL
LLE AROM (degrees)
L Knee Flexion : 10
L Knee Extension : 0
L Ankle Dorsiflexion : -5
LLE PROM (degrees)
L Knee Flexion : 90
L Ankle Dorsiflexion Knee: 0

Sensation
Light Touch: intact to LT in bil LE's (hypersensitive)

Static Sitting Balance
Static Sitting Balance Comments: EOB
Static Sitting Balance Level of Assistance: Minimum Assist (less than 25% help needed)
Dynamic Sitting Balance
Dynamic Sitting Balance Comments: EOB
Dynamic Sitting Balance Level of Assistance: Minimum Assist (less than 25% help needed)
Static Standing Balance
Static Standing Balance Comments: PUW
Static Standing Balance Level of Assistance: Maximum Assist (between 50-74% help needed);Other (assist of 2)

Functional Level:
Bed Mobility
Supine to Sit: Moderate Assist (between 25-49% help needed)
Sit to Supine: Maximum Assist (between 50-74% help needed)
Scooting: Dependent (greater than 75% help needed)
Transfers
Sit<>Stand: Maximum Assist (between 50-74% help needed);Assistive device used
Sit<>Stand Assistive Device Details: Pick-up walker
Stand <> Sit: Moderate Assist (between 25-49% help needed);Assistive device used
Stand <>Sit Assistive Device Details: Pick-up walker
Ambulation
Distance: N/A
Stairs

Flowsheets (continued)

Number of steps: not needed for DC

Interventions:
Therex:
Theract: bed mobility: max A to right side of bed with bed features and assist of 2 sitting at EOB SBA w/o back support transfers: sit <> stand from elevated bed with max A of 2, patient pulling up on walker stabilized by therapist static standing: max A for 2 - not able to stand fully upright however stood for about 30 seconds
pt/family ed: fall risk reduction, fall prevention, activity progression as tolerated, skin protection,
Balance/Neuro Re-ed:
Gait Training:

ASSESSMENT/PLAN

Eval complete. Jeane is below her baseline level of mobility and per her son she was more active and able to can peaches earlier this month. She was minimally verbal during session (HOH with no working hearing aid today) with son anwering for her the majority of session. She did respond to physical cues about mobilizing and was able to initiate movement of bil LE's towards sitting at EOB. In context of session, she is able to sit unsupported at EOB and transfers to standing briefly with FWW with 80% assist from 2 people. Her L ankle ROM is restricted making it difficult to bear weight vertically through her L leg. Pt would benefit from ongoing therapies to address strength, ROM and mobility deficits. WIll continue to follow for progressive mobilization as tolerated. Recommend overhead lift for transfers OOB at this time.

Barriers to Discharge: increased level of care required

PT Discharge Equipment: PUW vs FWW

Goals:
Goal: Bed mobility, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/08/23
Goal: Transfer with AD, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/08/23
Goal: Amb with AD, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/08/23
Goal: tolerated OOB for meals 3x/day
Estimated Completion Date: 12/08/23

PT Plan of Care:
Treatment/Interventions: Therapeutic exercise, Therapeutic functional activities, Gait/Stairs training, Patient/family

Flowsheets (continued)

training, Equipment eval/education
PT Plan: Skilled PT
PT Dosage: 2-3x/week
Plan for Next Session: EOB, standing with walker, OOB to bedside chair with FWW as tolerated

Other Recommendations:

PT Daily Recommendations: EOB dangle with assist of 2, overhead lift for transfers, ambulate with therapies only at this time

Genevieve Hicks, PT

Note Text

Physical Therapy Treatment

Jeane Leonie Hoffman
U8170135

11/26/2023
Duration of session: 40 Minutes

Subjective
Patient Report/Self-Assessment: pleasant and agreeable to PT

Home Living
Home Living Comments: bainbridge island
Type of Home: Apartment, Other (very small, son describes it as the size of hospital room)
Entry Stairs: 0
Indoor Stairs: 0
Lives With: Son
Lives with Comments: sleeps on couch with incontinent pads in place
Assistance Available at Home : 24 hour supervision
Mobility Equipment Owned: Four wheeled walker or rollator, Other (transport chair)

Functional Level:
Bed Mobility
Supine to Sit: Contact guard assist (touching/steadying assistance);Head of Bed Elevated
Sit to Supine: Contact guard assist (touching/steadying assistance)

Scooting: Supervision / Stand by assistance
Transfers
Sit<>Stand: Moderate Assist (between 25-49% help needed);Minimum Assist (less than 25% help needed);Assistive device used
Sit<>Stand Assistive Device Details: Front wheeled walker
Stand <> Sit: Moderate Assist (between 25-49% help needed);Minimum Assist (less than 25% help needed);Assistive device used
Stand <>Sit Assistive Device Details: Front wheeled walker

Interventions:
Theract: CGA for bed mobility using hospital bed features to come to/from EOB sit<>stand x4 with min-mod A; unable to achieve full standing, even with cueing and requiring mod-max A to maintain balance with significant tendencey for retropulsion; seated rest breaks in between attempts attempted standing marching for pre-gait warm-up, pt unable to shift weight enough to raise feet increased time spent answering son's many appropriate questions

ASSESSMENT/PLAN

Jeane was able to complete bed mobility with light hands on assist, but still requires up to 50% assist to achieve standing with FWW and 50-75% assist to maintain standing balance. She was unable to unweight her feet enough to attempt ambulation during this session. PT will continue to follow and progress as able.

Barriers to Discharge: increased level of assist required for all mobility

PT Discharge Equipment: FWW

Goals:
Goal: Bed mobility, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/08/23
Goal Status: Progressing
Goal: Transfer with AD, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/08/23
Goal Status: Progressing
Goal: Amb with AD, Minimum Assist (less than 25% help needed)
Estimated Completion Date: 12/08/23
Goal Status: Not Progressing
Goal: tolerated OOB for meals 3x/day
Estimated Completion Date: 12/08/23
Goal Status: Progressing

PT Plan of Care:
Treatment/Interventions: Therapeutic exercise, Therapeutic functional activities, Gait/Stairs training, Patient/family training, Equipment eval/education
PT Plan: Skilled PT
PT Dosage: 2-3x/week
Plan for Next Session: repeated STS, in-room ambulation as able

Other Recommendations:

PT Daily Recommendations: 1PA for EOB, overhead lift for transfers, ambulate with therapies only at this time

Jillian Stoewer, PT

Justification for Ambulatory Assistive Device

Diagnosis: R26.2 difficulty with ambulation, R29.6 high risk for falls, R26.81 impaired balance, and M62.81 generalized weakness

Length of Need: >6 Months

Assistive Device: This pt requires a FWW for safe ambulation and transfers within their home. Without this device they are at risk for falls and injury. They have demonstrated safe use of this device during this or previous PT sessions and no lesser restrictive device can sufficiently resolve their mobility issues.

Ht 5' 0" (1.524 m)

Note Text

Speech Language Pathology Eval

Patient Name: Jeane Leonie Hoffman
MRN: U8170135
Date of Service: 11/24/23

Treatment Duration: 37 Minutes

11/22/2023 - ED to Hosp-Admission (Discharged) in 6NE MED FAMMED (continued)

Flowsheets (continued)

Subjective
Patient Report/Self-Assessment: RN cleared SLP for entry. Pt reported eating a whole bowl of cream of wheat prior to SLP arrival.
Patient Stated Goal: none stated
Prior Function: Son reported that pt eats primarily soft solids due to ill fitting dentures but that recently he began pureeing some solids due to low intake during recent thrush infection.
Type of Occupation: nanning for most of her life, ran family business
Leisure and Hobbies: travel

Objective
Patient Information
Temperature: Afebrile
Respiratory Status: Room air;Concerning chest x-ray (11/22 CXR "Lungs: Focal opacities in the right midlung and right lower lobe, concerning for pneumonia.: and CT abdomen "Lower chest: Large hiatal hernia. Bibasilar atelectasis.")
Behavior/Cognition: Distractible;Alert
Patient Positioning: Upright in bed

Consistencies Assessed: 0-Thin Liquids;4-Pureed;Soft solids

0-Thin Liquids - Presentation: Self Fed;Straw

4 Pureed - Presentation : Self Fed;Spoon
Soft Solids - Presentation: Self Fed

Oral Phase: Prolonged mastication;Delayed anterior to posterior transit

Signs/Symptoms of Penetration/Aspiration: Cough - immediate (on first sip of thin liquids and then not repeated.)

11/22/2023 - ED to Hosp-Admission (Discharged) in 6NE MED FAMMED (continued)

Flowsheets (continued)

11/22/2023 - ED to Hosp-Admission (Discharged) in 6NE MED FAMMED (continued)

Flowsheets (continued)

Oral Mechanism Examination
Dentition: Adequate with dentures (However dentures ill fititng)
Oral mucosa: Within Functional Limits
Jaw Range of Motion: Within Functional Limits
Observations: Limited due to pt's HOH and difficulty following directions.

Assessment
Jeane seen for bedside swallow eval. She demonstrated mild oral deficits and 1 cough that was not repeated with further trials of thin liquids (silent aspiration cannot be ruled out at bedside). Unclear if mild dysphagia vs presbyphagia related changes complicated by ill fitting dentures and recent thrush. Given her performance, recommend thin liquids and soft and bite sized solids (son assisting to self select softer solids as needed) and 1:1 assist for all intake. Meds crushed or whole in puree. SLP to continue to follow.

Dysphagia: Mild
Aspiration Risk: Low;Moderate

Impact on Function: Risk for not meeting oral nutrition;Risk for respiratory complications
Confounding Factors: age, ill fitting dentures
Prognosis: Fair

Evaluation/Treatment Tolerance: Patient tolerated treatment well

Plan
SLP Plan: Skilled SLP
Treatment/Interventions: Swallow treatment;Patient/family education

11/22/2023 - ED to Hosp-Admission (Discharged) in 6NE MED FAMMED (continued)

Flowsheets (continued)

SLP Frequency: 1-3x/week

Discharge Recommendations
Follow up with SLP at next level of care;Assistance with
Assistance with Details: Eating;Drinking

Daily Recommendations
Swallow Recommendations
Diet Recommendations: 0-Thin liquids;6-Soft and bite-sized
Medication Administration Recommendations: Meds whole/halved in puree;Meds crushed in puree
Oral care: Frequency: 2-3x per day;Toothbrush and toothpaste
Aspiration Precautions: As upright as medically possible for all oral intake;1:1 supervision/assistance;Cut up/set up;Small bites;Small sips;Slow rate;One sip at a time
Esophageal Precautions: Sit upright while eating and remain upright for 30 minutes after

Goals
Short Term Goal: Tolerate least restrictive diet
Estimated Completion Date: 12/15/23
Goal Status: Updated

Patient/caregiver will participate in education regarding: Dysphagia
Estimated Completion Date: 12/15/23
Goal Status: Updated

Patient	Acceptance, Explanation, Teach back- restates information independently, Refuses information, Communicates understanding nonverbally by GL at 11/26/2023 1000
	Acceptance, Explanation, Teach back- demonstrates task with help by LL at 11/25/2023 1804
Caregiver	Acceptance, Explanation, Teach back- restates information independently, Refuses information, Communicates understanding nonverbally by GL at 11/26/2023 1000

Topic: Misc Nursing (Resolved)

Point: Infection Control (Resolved)

Description:
Instruct learner(s) on how they can reduce the risk of infections. Educate learner(s) to avoid touching wounds, dressings or tubes. Ask care providers about their hand hygiene.
Instruct on the importance of washing hands and how to sanitize hands frequently with the hand sanitizer gel.

Patient Friendly Description: When you're sick or recovering, your body isn't as strong as it usually is. Therefore, avoiding infection is very important. Don't touch any wound, dressing on your body, or any of your tubes.
Everyone who comes into your room should wash their hands, and that means us as well! If you see somebody who forgets, it's okay to remind them.

If any of your visitors look sick, even if it's just a little cold, it's okay to ask them to come back later or to wear a mask when they come to visit you.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach back- restates information independently by JA at 11/24/2023 1901

Point: Skin Care/Pressure Ulcer Prevention (Resolved)

Description:
Instruct learner(s) on the need to keep skin clean and dry, the use of film barriers to prevent injury from urine and/or stool (if indicated), and the need to moisturize skin if dry or to prevent dryness.
For pressure ulcer prevention, instruct learner(s) on the need to change position at least every two hours and to request assistance as needed.

Patient Friendly Description: When you're in a hospital bed all day, it can be hard to keep your skin healthy, but it's very important. We'll work with you to keep your skin clean and dry, but if your skin gets too dry, let us know.
Also, if you lie in one position for too long, sores can form. Try to change your position at least every two hours, and ask us for help if you need it.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach back- restates information independently, Refuses information, Communicates understanding nonverbally by GL at 11/26/2023 1000
	Acceptance, Explanation, Teach back- restates information independently by JA at 11/24/2023 1901
Caregiver	Acceptance, Explanation, Teach back- restates information independently, Refuses information, Communicates understanding nonverbally by GL at 11/26/2023 1000

Point: Isolation Precautions (Resolved)

11/22/2023 - ED to Hosp-Admission (Discharged) in 6NE MED FAMMED (continued)

Patient Education (continued)

Description:
Educate learner(s) on type of isolation precautions and reason isolation is required. Instruct them on requirements for staff, patient, and visitors for the specific isolation type ordered. Instruct on the importance of hand hygiene by visitors when leaving the room. Provide verbal instruction and handout specific to isolation type.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach back- restates information independently, Refuses information, Communicates understanding nonverbally by GL at 11/26/2023 1000
	Acceptance, Explanation, Teach back- restates information independently by JA at 11/24/2023 1901
Caregiver	Acceptance, Explanation, Teach back- restates information independently, Refuses information, Communicates understanding nonverbally by GL at 11/26/2023 1000

Title: First-Dose Education ()

Points For This Title

Point: Na Ferric Gluc Cplx in Sucrose (Resolved)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach back- demonstrates task with help by LL at 11/25/2023 1804

Title: PT OT SLP Therapies ()

Topic: Occupational Therapy (Resolved)

Point: ADL Training (Resolved)

Description:
Instruct learner(s) on proper safety adaptation and remediation techniques during self care or transfers. Instruct in proper use of assistive devices.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach back- restates information independently, Refuses information, Communicates understanding nonverbally by GL at 11/26/2023 1000
Caregiver	Acceptance, Explanation, Teach back- restates information independently, Refuses information, Communicates understanding nonverbally by GL at 11/26/2023 1000

Point: Fall Prevention (Resolved)

Description:
Provide education of fall prevention. Explain why there is a higher risk of falls in the hospital and at home. Review ways to reduce the chance of falling.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach back- restates information independently, Refuses information, Communicates understanding nonverbally by GL at 11/26/2023 1000
Caregiver	Acceptance, Explanation, Teach back- restates information independently, Refuses information, Communicates understanding nonverbally by GL at 11/26/2023 1000

Topic: Speech Therapy (Resolved)

11/22/2023 - ED to Hosp-Admission (Discharged) in 6NE MED FAMMED (continued)

Patient Education (continued)

Point: Swallow Training (Resolved)

Description:
Instructed learner(s) on diet texture/liquid modification and the established safe swallow guidelines.

Patient Friendly Description: With a new diet and careful eating habits, you'll be able to swallow safely.

1. Follow your instructions about your new diet carefully.
2. Eat very small bites - smaller than you think you need to.
3. Eat slowly.
4. If one side of your mouth is weaker than the other, put the food on the strong side of your mouth.
5. Don't talk while you are eating
6. After you eat, sit upright for at least 30 minutes. If your doctor says it is okay, go for a short walk.
7. Don't use a straw unless your therapist says it's okay.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach back- restates information independently, Refuses information, Communicates understanding nonverbally by GL at 11/26/2023 1000
	Acceptance, Explanation, Teach back- demonstrates task with help by LL at 11/25/2023 1804
	Acceptance, Explanation, Teach back- restates information with assist, Needs further instruction by DG at 11/24/2023 1206
Family	Acceptance, Explanation, Teach back- restates information with assist, Needs further instruction by DG at 11/24/2023 1206
Caregiver	Acceptance, Explanation, Teach back- restates information independently, Refuses information, Communicates understanding nonverbally by GL at 11/26/2023 1000

Point: Speech/Language (Resolved)

Description:
Instruct learner(s) on functional aspects of communication (verbal/written expression, auditory/reading comprehension)

Patient Friendly Description: Understanding speech and language has many different parts. There's the way you say things about yourself, or the way you write things. There's also how well you understand when people speak to you or when you read.
You might find that some of these things are easier than others.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach back- restates information independently, Refuses information, Communicates understanding nonverbally by GL at 11/26/2023 1000

Jeane L. Hoffman MRN: U8170135
Community acquired bacterial pneumonia 11/22/2023 - 11/28/2023 6NE MED FAMMED

Seek Emergency Treatment

If needed, seek immediate medical attention at your local emergency department or urgent care. Should you develop worsening chest discomfort, worsening shortness of breath, or other issues that may be immediately life threatening, call 9-1-1.

Durable Medical Equipment

Ambulatory Assistive Device
Justification for Ambulatory Assistive Device

Diagnosis: R26.2 difficulty with ambulation, R29.6 high risk for falls, R26.81 impaired balance, and M62.81 generalized weakness

Length of Need: >6 Months

Assistive Device: This pt requires a FWW for safe ambulation and transfers within their home. Without this device they are at risk for falls and injury. They have demonstrated safe use of this device during this or previous PT sessions and no lesser restrictive device can sufficiently resolve their mobility issues.

Ht 5' 0" (1.524 m)
Wt 88 lb 2.9 oz (40 kg)

Discharge Instructions

Dear Jeanne Leonie Hoffman,

You were admitted for difficulty eating, weakness, and mild confusion. You were found to have evidence of a urinary tract infection, possible pneumonia, and evidence of upper gastrointestinal bleed. You were treated with IV antibiotics and proton pump inhibitor, which have helped you improved significantly. Your GI bleed is slow and now has been stabilized and improved. We talked to our GI colleagues and they did not think that you need to be scoped or follow up outpatient.

New Medications
- please continue taking protonix twice per day for the next 7 weeks or so
- please continue taking senna and miralax to prevent constipation as needed and HOLD if loose stool

Other Instructions

Your Next Steps

Do

☐ Pick up these medications from UWMC Outpatient Pharmacy
- bisacodyl
- pantoprazole
- pentoxifylline ER
- polyethylene glycol 3350
- senna

Read

Medication List

ⓘ It is important to know what medicines you are taking. Update your list if your medicines or dosages change. Keep a list of your medicines with you. A good place to put your list is in your wallet or purse. Give all your health care providers a list of all the medicines you take including any vitamins, supplements, or medicines you bought without a prescription. If a medication is not on this list, contact your provider to discuss whether it should be discontinued.

	Morning	Afternoon	Evening	Bedtime	As Needed
acetaminophen 500 MG tablet Commonly known as: Tylenol 1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition Last time this was given: 650 mg on November 28, 2023 6:17 AM					
atorvastatin 10 MG tablet Commonly known as: Lipitor Take 1 tablet (10 mg) by mouth daily. Last time this was given: 10 mg on November 28, 2023 8:18 AM					
START **bisacodyl** 10 MG suppository Commonly known as: Dulcolax Unwrap and insert 1 suppository (10 mg) rectally daily as needed for constipation. Last time this was given: 10 mg on November 23, 2023 2:20 PM					
calcium carbonate 500 MG chewable tablet Commonly known as: Tums Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/ heartburn.					
cholecalciferol 25 mcg (1,000 unit) tablet Commonly known as: Vitamin D-3 Take 2 tablets (2,000 units) by mouth daily. Last time this was given: 2,000 units on November 28, 2023 8:18 AM					
losartan 25 MG tablet Commonly known as: Cozaar take 1/2 tablet by mouth once daily					
* **medihoney** topical gel Apply topically daily. Apply to ulcerations on legs. Apply dressing over the Medi Honey.					
* **medihoney** topical gel Apply topically every other day. Apply to wound before applying dressing					

Medication List (continued)

	Morning	Afternoon	Evening	Bedtime	As Needed
MULTIPLE VITAMIN OR Take by mouth.					
nystatin 100000 UNIT/ML mouth/throat suspension Commonly known as: Mycostatin Swish and swallow 5 mL 4 times a day. Last time this was given: 5 mL on November 28, 2023 6:17 AM					
ofloxacin 0.3 % ophthalmic solution Commonly known as: Ocuflox Place 1-2 drops into left EYE 4 times a day.					
START **pantoprazole** 40 MG EC tablet Commonly known as: Protonix Take 1 tablet (40 mg) by mouth 2 times a day before meals. Last time this was given: Ask your nurse or doctor					
CHANGE **pentoxifylline ER** 400 MG ER tablet Commonly known as: TRENtal Take 1 tablet (400 mg) by mouth 3 times a day. Take with food. Last time this was given: 400 mg on November 28, 2023 6:17 AM What changed: **additional instructions**					
START **polyethylene glycol 3350** 17 GM/SCOOP oral powder Commonly known as: Miralax Fill cap with powder to 17g line and dissolve in 4 to 8oz of water. Drink 1 time a day as needed for constipation. Hold for loose stool Last time this was given: Ask your nurse or doctor					
START **senna** 8.6 MG tablet Commonly known as: Senokot Take 2 tablets (17.2 mg) by mouth daily as needed for constipation. Last time this was given: 17.2 mg on November 28, 2023 8:18 AM					
timolol maleate 0.5 % ophthalmic solution Commonly known as: Timoptic instill 1 drop into both eyes twice a day Last time this was given: 1 drop on November 28, 2023 8:24 AM					

Medication List (continued)

	Morning	Afternoon	Evening	Bedtime	As Needed
triamcinolone 0.1 % cream Commonly known as: Kenalog Apply topically 2 times a day. Apply to both forearms. Last time this was given: November 28, 2023 8:24 AM					

*** This list has 2 medication(s) that are the same as other medications prescribed for you. Read the directions carefully, and ask your doctor or other care provider to review them with you.**

  Your estimated payment per fill: Estimate unavailable

Address: 1959 NE Pacific St, SEATTLE WA 98195
Hours: Mon-Fri 8:00am - 9:00pm, Sat-Sun 8:00am - 8:00pm, Please allow 48 hours for refills.
Phone: 206-598-4363

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

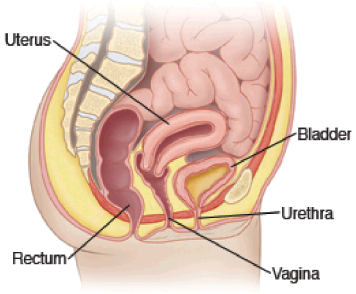
Suicide Prevention

11/22/2023 - ED to Hosp-Admission (Discharged) in 6NE MED FAMMED (continued)

After Visit Summary (continued)

If you or someone you know is thinking about harming themselves or attempting suicide, or if you feel unable to keep yourself safe, contact one of these resources:

· King County Crisis Connections 24-hour help line 1-866-427-4747 or go to www.crisisconnections.org



· National Suicide Prevention 24-hour help line #988 or go to suicidepreventionlifeline.org

For all medical or mental health emergencies, call 911, or go to the nearest emergency room for help.

Attached Information

Bladder Infection, Female (Adult) (English)

Bladder Infection, Female (Adult)

Urine normally doesn't have any germs (bacteria) in it. But bacteria can get into the urinary tract from the skin around the rectum. Or they can travel in the blood from other parts of the body. Once they are in your urinary tract, they can cause infection in these areas:

- The urethra (urethritis)
- The bladder (cystitis)
- The kidneys (pyelonephritis)

The most common place for an infection is in the bladder. This is called a bladder infection. This is one of the most common infections in women. Most bladder infections are easily treated. They are not serious unless the infection spreads to the kidney.

The terms bladder infection, UTI, and cystitis are often used to describe the same thing. But they are not always the same. Cystitis is an inflammation of the bladder. The most common cause of cystitis is an infection.

Symptoms

The infection causes inflammation in the urethra and bladder. This causes many of the symptoms. The most common symptoms of a bladder infection are:

- Pain or burning when urinating
- Having to urinate more often than normal
- Urgent need to urinate
- Only a small amount of urine comes out
- Blood in urine
- Belly (abdominal) discomfort. This is often in the lower belly above the pubic bone.
- Cloudy urine
- Strong- or bad-smelling urine
- Unable to urinate (urinary retention)
- Unable to hold urine in (urinary incontinence)
- Fever

- Loss of appetite
- Confusion (in older adults)

Causes

Bladder infections are not contagious. You can't get one from someone else, from a toilet seat, or from sharing a bath.

The most common cause of bladder infections is bacteria from the bowels. The bacteria get onto the skin around the opening of the urethra. From there, they can get into the urine. Then they travel up to the bladder, causing inflammation and infection. This often happens because of:

- Wiping incorrectly after urinating. Always wipe from front to back.
- Bowel incontinence
- Pregnancy
- Procedures such as having a catheter put in
- Older age
- Not emptying your bladder. This can give bacteria a chance to grow in your urine.
- Fluid loss (dehydration)
- Constipation
- Having sex
- Using a diaphragm for birth control

Treatment

Bladder infections are diagnosed by a urine test and urine culture. They are treated with antibiotics. They often clear up quickly without problems. Treatment helps prevent a more serious kidney infection.

Medicines

Medicines can help in the treatment of a bladder infection:

- Take antibiotics until they are used up, even if you feel better. It's important to finish them to make sure the infection has cleared.
- You can use acetaminophen or ibuprofen for pain, fever, or discomfort, unless another medicine was prescribed. If you have long-term (chronic) liver or kidney disease, talk with your healthcare provider before using these medicines. Also talk with your provider if you've ever had a stomach ulcer or GI (gastrointestinal) bleeding, or are taking blood-thinner medicines.
- If you are given phenazopydridine to reduce burning with urination, it will make your urine a bright orange color. This can stain clothing.

Care and prevention

These self-care steps can help prevent future infections:

- Drink plenty of fluids. This helps to prevent dehydration and flush out your bladder. Do this unless you must restrict fluids for other health reasons, or your healthcare provider told you not to.
- Clean yourself correctly after going to the bathroom. Wipe from front to back after using the toilet. This helps prevent the spread of bacteria.
- Urinate more often. Don't try to hold urine in for a long time.
- Wear loose-fitting clothes and cotton underwear. Don't wear tight-fitting pants.
- Improve your diet and prevent constipation. Eat more fresh fruits and vegetables, and fiber. Eat less junk foods and fatty foods.
- Don't have sex until your symptoms are gone.
- Don't have caffeine, alcohol, and spicy foods. These can irritate your bladder.
- Urinate right after you have sex to flush out your bladder.
- If you use birth control pills and have frequent bladder infections, discuss it with your healthcare provider.

Follow-up care

Call your healthcare provider if all symptoms are not gone after 3 days of treatment. This is especially important if you have repeat infections.

If a culture was done, you will be told if your treatment needs to be changed. If directed, you can call to find out the results.

If X-rays were done, you will be told if the results will affect your treatment.

Call 911

Call 911 if any of the following occur:

- Trouble breathing
- Hard to wake up or confusion
- Fainting (loss of consciousness)
- Fast heart rate

When to get medical advice

Call your healthcare provider right away if any of these occur:

- Fever of 100.4ºF (38.0ºC) or higher, or as directed by your healthcare provider
- Symptoms are not better after 3 days of treatment
- Back or belly pain that gets worse
- Repeated vomiting, or unable to keep medicine down
- Weakness or dizziness
- Vaginal discharge
- Pain, redness, or swelling in the outer vaginal area (labia)

UW Medicine IP Facility Directory Esign - Electronic signature on 11/22/2023 10:42 AM (effective from 11/22/2023) - E-signed

Patient Information for Inclusion in the UW Medicine Patient Directory
Please Read this Statement Carefully

I understand that I have a choice as to whether or not to be included in the UW Medicine patient directory. My name and location will be included in the patient directory unless I would prefer not to receive phone calls or visitors. My decision is indicated by marking a box and signing this form.

☑ **YES, please include me in the Patient Directory.** The hospital has informed me that my name and location will be included in its hospital directory. This information will be made available to people who ask for me by name such as my relatives, friends and fellow employees.

- Harborview Medical Center
- University of Washington Medical Center -Northwest
- University of Washington Medical Center - Montlake / Fred Hutch Cancer Center
- Valley Medical Center

If I have provided my religious affiliation to UW Medicine in the past or if I provide my religious affiliation to UW Medicine now, I authorize its disclosure to clergy of my religious affiliation. Disclosure of my religious affiliation may result in a visit from a clergy member of my affiliation while I am being treated at UW Medicine.

If you have provided your religious affiliation to UW Medicine in the past and do not want a visit from a clergy member of your affiliation, please inform the registration staff.

☐ **NO, please do not include me in the Patient Directory.** I do not want my name or location included in the UW Medicine Patient Directory. **If this is my choice, I understand UW Medicine staff will not be able to confirm I am a patient or share my location with any family or friends. I also understand that by choosing not to be in the directory, UW Medicine will be unable to deliver items *(for example flowers and gifts)* addressed to me.**

For Staff Use Only

☐ **ADMIN OPT-OUT:** Please provide reason for Administrative Opt-Out		
☐ Crime Victim	☐ Employee	☐ Incarcerated Patient
☐ Involuntary Commitment	☐ Unable to Interview Patient	☐ Media Interest
Name of person requesting opt out *(if other than patient)*:		

By signing below, it shows that you have read this document. If there is any part of this form that is unclear, be sure to ask questions about it.

IF SIGNED BY PERSON OTHER THAN THE PATIENT, CHECK RELATIONSHIP TO PATIENT:

☐ Guardian	☐ Durable Power of Attorney for	☐ Spouse/registered

Important Message From Medicare - Scan on 11/25/2023 8:24 PM (effective from 11/25/2023)

Scan (below)

AN IMPORTANT MESSAGE FROM MEDICARE ABOUT YOUR RIGHTS

DEPARTMENT OF HEALTH & HUMAN SERVICES
Centers for Medicare & Medicaid Services
OMB Approval No. 0938-1019

YOUR RIGHTS AS A HOSPITAL INPATIENT:

- You can receive Medicare covered services. This includes medically necessary hospital services and services you may need after you are discharged, if ordered by your doctor. You have a right to know about these services, who will pay for them, and where you can get them.
- You can be involved in any decisions about your hospital stay.
- You can report any concerns you have about the quality of care you receive to your QIO at: KEPRO 1-888-305-6759. The QIO is the independent reviewer authorized by Medicare to review the decision to discharge you.
- You can work with the hospital to prepare for your safe discharge and arrange for services you may need after you leave the hospital. When you no longer need inpatient hospital care, your doctor or the hospital staff will inform you of your planned discharge date.
- You can speak with your doctor or other hospital staff if you have concerns about being discharged.

YOUR RIGHT TO APPEAL YOUR HOSPITAL DISCHARGE:

- You have the right to an immediate, independent medical review (appeal) of the decision to discharge you from the hospital. If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
- If you choose to appeal, the independent reviewer will ask for your opinion. The reviewer also will look at your medical records and/or other relevant information. You do not have to prepare anything in writing, but you have the right to do so if you wish.
- If you choose to appeal, you and the reviewer will each receive a copy of a detailed explanation about why your covered hospital stay should not continue. You will receive this detailed notice only after you request an appeal.
- If the QIO finds that you are not ready to be discharged from the hospital, Medicare will continue to cover your hospital services.
- If the QIO agrees services should no longer be covered after the discharge date, neither Medicare nor your Medicare health plan will pay for your hospital stay after noon of the day after the QIO notifies you of its decision. If you stop services no later than that time, you will avoid financial liability.
- If you do not appeal, you may have to pay for any services you receive after your discharge date.

Step by step instructions for calling the QIO and filing an appeal are on page 2.

To speak with someone at the hospital about this notice, call 206 598 1311

Please sign below to indicate you received and understood this notice.

I have been notified of my rights as a hospital inpatient and that I may appeal my discharge by contacting my QIO.

Documents (continued)

STEPS TO APPEAL YOUR DISCHARGE

- **STEP 1**: You must contact the QIO no later than your planned discharge date and before you leave the hospital. If you do this, you will not have to pay for the services you receive during the appeal *(except for charges like copays and deductibles)*.
  - Here is the contact information for the QIO:
    KEPRO:
    Toll-free Phone: 1-888-305-6759
    Toll-free Fax: 1-833-868-4064

You can file a request for an appeal any day of the week.
Once you speak to someone or leave a message, your appeal has begun.

- Ask the hospital if you need help contacting the QIO.
- The name of this hospital is:

☐ HMC: Medicare Provider Number ☐ 50-0064 *(acute care)* ☐ 50-S064 *(psych)* ☐ 50-T064 *(rehab)*
☒ UWMC: Medicare Provider Number ☒ 50-0008 *(acute care)* ☐ 50-S008 *(psych)* ☐ 50-T008 *(rehab)*

- **STEP 2**: You will receive a detailed notice from the hospital or your Medicare Advantage or other Medicare managed care plan (if you belong to one) that explains the reasons they think you are ready to be discharged.
- **STEP 3**: The QIO will ask for your opinion. You or your representative need to be available to speak with the QIO, if requested. You or your representative may give the QIO a written statement, but you are not required to do so.
- **STEP 4**: The QIO will review your medical records and other important information about your case.
- **STEP 5**: The QIO will notify you of its decision within 1 day after it receives all necessary information.
  - If the QIO finds that you are not ready to be discharged, Medicare will continue to cover your hospital services.
  - If the QIO finds you are ready to be discharged, Medicare will continue to cover your services until noon of the day after the QIO notifies you of its decision.

IF YOU MISS THE DEADLINE TO REQUEST AN APPEAL, YOU MAY HAVE OTHER APPEAL RIGHTS:

- If you have Original Medicare: Call the QIO listed on Page 1. (800)-869-7175
- If you belong to a Medicare health plan, call your plan at: Molina Medicare Options Plus HMO DSNP (plan name) (plan phone number)

You have the right to get Medicare information in an accessible format, like large print, Braille, or audio. You also have the right to file a complaint if you feel you've been discriminated against. Visit Medicare.gov/about-us/accessibility-nondiscrimination-notice, or call 1-800-MEDICARE (1-800-633-4227) for more information. TTY users can call 1-877-486-2048.

Community acquired bacterial pneumonia 11/22/2023 - 11/28/2023 6NE MED FAMMED

Seek Emergency Treatment

If needed, seek immediate medical attention at your local emergency department or urgent care. Should you develop worsening chest discomfort, worsening shortness of breath, or other issues that may be immediately life threatening, call 9-1-1.

Durable Medical Equipment

Ambulatory Assistive Device
Justification for Ambulatory Assistive Device

Diagnosis: R26.2 difficulty with ambulation, R29.6 high risk for falls, R26.81 impaired balance, and M62.81 generalized weakness

Length of Need: >6 Months

Assistive Device: This pt requires a FWW for safe ambulation and transfers within their home. Without this device they are at risk for falls and injury. They have demonstrated safe use of this device during this or previous PT sessions and no lesser restrictive device can sufficiently resolve their mobility issues.

Ht 5' 0" (1.524 m)
Wt 88 lb 2.9 oz (40 kg)

Discharge Instructions

Dear Jeanne Leonie Hoffman,

You were admitted for difficulty eating, weakness, and mild confusion. You were found to have evidence of a urinary tract infection, possible pneumonia, and evidence of upper gastrointestinal bleed. You were treated with IV antibiotics and proton pump inhibitor, which have helped you improved significantly. Your GI bleed is slow and now has been stabilized and improved. We talked to our GI colleagues and they did not think that you need to be scoped or follow up outpatient.

New Medications
- please continue taking protonix twice per day for the next 7 weeks or so
- please continue taking senna and miralax to prevent constipation as needed and HOLD if loose stool

Other Instructions

Your Next Steps

Do

☐ Pick up these medications from UWMC Outpatient Pharmacy
- bisacodyl
- pantoprazole
- pentoxifylline ER
- polyethylene glycol 3350
- senna

Read

☐ Read these attachments
- Bladder Infection, Female (Adult) (English)

Medication List

ⓘ It is important to know what medicines you are taking. Update your list if your medicines or dosages change. Keep a list of your medicines with you. A good place to put your list is in your wallet or purse. Give all your health care providers a list of all the medicines you take including any vitamins, supplements, or medicines you bought without a prescription. If a medication is not on this list, contact your provider to discuss whether it should be discontinued.

	Morning	Afternoon	Evening	Bedtime	As Needed
acetaminophen 500 MG tablet Commonly known as: Tylenol 1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition Last time this was given: 650 mg on November 28, 2023 6:17 AM					
atorvastatin 10 MG tablet Commonly known as: Lipitor Take 1 tablet (10 mg) by mouth daily. Last time this was given: 10 mg on November 28, 2023 8:18 AM					
START **bisacodyl** 10 MG suppository Commonly known as: Dulcolax Unwrap and insert 1 suppository (10 mg) rectally daily as needed for constipation. Last time this was given: 10 mg on November 23, 2023 2:20 PM					
calcium carbonate 500 MG chewable tablet Commonly known as: Tums Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/ heartburn.					
cholecalciferol 25 mcg (1,000 unit) tablet Commonly known as: Vitamin D-3 Take 2 tablets (2,000 units) by mouth daily. Last time this was given: 2,000 units on November 28, 2023 8:18 AM

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Bladder Infection, Female (Adult) (English)

Bladder Infection, Female (Adult)

Urine normally doesn't have any germs (bacteria) in it. But bacteria can get into the urinary tract from the skin around the rectum. Or they can travel in the blood from other parts of the body. Once they are in your urinary tract, they can cause infection in these areas:

- The urethra (urethritis)
- The bladder (cystitis)
- The kidneys (pyelonephritis)

The most common place for an infection is in the bladder. This is called a bladder infection. This is one of the most common infections in women. Most bladder infections are easily treated. They are not serious unless the infection spreads to the kidney.

The terms bladder infection, UTI, and cystitis are often used to describe the same thing. But they are not always the same. Cystitis is an inflammation of the bladder. The most common cause of cystitis is an infection.

Symptoms

The infection causes inflammation in the urethra and bladder. This causes many of the symptoms. The most common symptoms of a bladder infection are:

- Pain or burning when urinating
- Having to urinate more often than normal
- Urgent need to urinate
- Only a small amount of urine comes out
- Blood in urine
- Belly (abdominal) discomfort. This is often in the lower belly above the pubic bone.
- Cloudy urine
- Strong- or bad-smelling urine
- Unable to urinate (urinary retention)
- Unable to hold urine in (urinary incontinence)
- Fever

- Loss of appetite
- Confusion (in older adults)

Causes

Bladder infections are not contagious. You can't get one from someone else, from a toilet seat, or from sharing a bath.

The most common cause of bladder infections is bacteria from the bowels. The bacteria get onto the skin around the opening of the urethra. From there, they can get into the urine. Then they travel up to the bladder, causing inflammation and infection. This often happens because of:

- Wiping incorrectly after urinating. Always wipe from front to back.
- Bowel incontinence
- Pregnancy
- Procedures such as having a catheter put in
- Older age
- Not emptying your bladder. This can give bacteria a chance to grow in your urine.
- Fluid loss (dehydration)
- Constipation
- Having sex
- Using a diaphragm for birth control

Treatment

Bladder infections are diagnosed by a urine test and urine culture. They are treated with antibiotics. They often clear up quickly without problems. Treatment helps prevent a more serious kidney infection.

Medicines

Medicines can help in the treatment of a bladder infection:

- Take antibiotics until they are used up, even if you feel better. It's important to finish them to make sure the infection has cleared.
- You can use acetaminophen or ibuprofen for pain, fever, or discomfort, unless another medicine was prescribed. If you have long-term (chronic) liver or kidney disease, talk with your healthcare provider before using these medicines. Also talk with your provider if you've ever had a stomach ulcer or GI (gastrointestinal) bleeding, or are taking blood-thinner medicines.
- If you are given phenazopydridine to reduce burning with urination, it will make your urine a bright orange color. This can stain clothing.

Care and prevention

These self-care steps can help prevent future infections:

- Drink plenty of fluids. This helps to prevent dehydration and flush out your bladder. Do this unless you must restrict fluids for other health reasons, or your healthcare provider told you not to.
- Clean yourself correctly after going to the bathroom. Wipe from front to back after using the toilet. This helps prevent the spread of bacteria.
- Urinate more often. Don't try to hold urine in for a long time.
- Wear loose-fitting clothes and cotton underwear. Don't wear tight-fitting pants.
- Improve your diet and prevent constipation. Eat more fresh fruits and vegetables, and fiber. Eat less junk foods and fatty foods.
- Don't have sex until your symptoms are gone.
- Don't have caffeine, alcohol, and spicy foods. These can irritate your bladder.
- Urinate right after you have sex to flush out your bladder.
- If you use birth control pills and have frequent bladder infections, discuss it with your healthcare provider.

Follow-up care

11/22/2023 - ED to Hosp-Admission (Discharged) in 6NE MED FAMMED (continued)

Documents (continued)

Call your healthcare provider if all symptoms are not gone after 3 days of treatment. This is especially important if you have repeat infections.

If a culture was done, you will be told if your treatment needs to be changed. If directed, you can call to find out the results.

If X-rays were done, you will be told if the results will affect your treatment.

Call 911

Call 911 if any of the following occur:

- Trouble breathing
- Hard to wake up or confusion
- Fainting (loss of consciousness)
- Fast heart rate

When to get medical advice

Call your healthcare provider right away if any of these occur:

- Fever of 100.4ºF (38.0ºC) or higher, or as directed by your healthcare provider
- Symptoms are not better after 3 days of treatment
- Back or belly pain that gets worse
- Repeated vomiting, or unable to keep medicine down
- Weakness or dizziness
- Vaginal discharge
- Pain, redness, or swelling in the outer vaginal area (labia)

pentoxifylline ER 400 MG ER tablet

Discontinued by: Nguyen, Liem Hieu, MD
Discontinued on: 11/28/2023
Instructions: take 1 tablet by mouth three times a day
Authorized by: Neighbor Jr., William E, MD
Ordered on: 11/20/2023
Start date: 11/20/2023
End date: 11/28/2023
Quantity: 90 tablet
Refill: 1 refill by 11/19/2024

Stopped in Visit

None

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 11/22/2023 1000

Jeanne Leonie Hoffman is a 98 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Failure To Thrive

- Leg Pain

Visit type (in person vs telemedicine vs phone): In person with her son Luis

History

Jeanne who is 98 years old comes in for follow-up on wound care for lower extremity chronic ulcerations. Her son reports that she has not been eating very well or drinking fluids. She is complaining of significant pain in the right upper lower leg which is the opposite side from the side that her ulcerations are on. Her son does not believe she has had fever chills or night sweats. However she has not been as responsive as usual.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

11/22/2023 - Office Visit in Husky Health Same Day Clinic (continued)

Clinical Notes (continued)

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- Hypercholesterolemia [E78.00] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001. Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 . Advise Vit D 800 IU daily.

- Primary open angle glaucoma (POAG) of both eyes [H40.1130] 10/10/2019
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC) [I70.232, I70.242] 09/24/2018
- Vitamin D deficiency [E55.9] 07/09/2018
- Primary osteoarthritis of both hips [M16.0] 02/01/2017
- Imbalance [R26.89] 11/02/2016
- History of recurrent deep vein thrombosis (DVT) [Z86.718] 06/02/2016
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication (HCC) [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

Medications
No outpatient medications have been marked as taking for the 11/22/23 encounter (Office Visit) with Neighbor Jr., William E, MD.

Social history:

- Alcohol use: No

Objective:
BP 110/62 | Pulse 68 | Temp 36.9 °C (Temporal) | SpO2 100%
Estimated body mass index is 16.51 kg/m² as calculated from the following:
Height as of 10/21/20: 5' 5" (1.651 m).
Weight as of 10/10/22: 45 kg (99 lb 3.3 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
110/62	68	---	---	---	10:17 AM	11/22/2023

Last blood pressure recorded in this encounter: 110/62
General: Patient is somewhat somnolent but arousable.
She has marked discomfort of the right knee with any motion. There is no swelling or increased warmth. There is no bruising.
Inspection of her mouth does not show recurrence of thrush

Lab and other tests: X-ray was not available at Hall health today

Assessment and Plan:
1. Right leg pain
Persistent right knee and lower leg pain with marked pain on motion. Patient has a history of DJD of the knee. There does not appear to be evidence of recent trauma. However patient does need imaging and further evaluation. We do not have imaging available onsite at Hall health today. In view of this and other issues below she would best be evaluated in the emergency room.

2. Failure to thrive in adult
Continued decreased food intake. She requires a complete assessment and likely IV hydration.
Of note our nurses have been working with her son to identify resources available on Bainbridge such as through visiting nurses organization.

3. Dehydration
Likely requires IV hydration

4. Thrush

11/22/2023 - Office Visit in Husky Health Same Day Clinic (continued)

Clinical Notes (continued)

Recent thrush due to antibiotic treatment now seems to be resolved following treatment with oral antifungal.

5. Lower extremity ulceration, left, limited to breakdown of skin (HCC)
Continues wound care here. We have referred them to Northwest wound care but due to transportation issues they have continued their wound care here

Transportation to ED. Ordered Taxi but son felt that the process of getting Jeanne in and out of tax even a van would be more difficult than he taking her in her wheelchair ED. They did transport themselves by wheelchair and public transportation from Bainbridge today as they usually do.

What's Next

You currently have no upcoming appointments scheduled.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Today's Visit

You saw William E Neighbor Jr on Wednesday November 22, 2023. The following issues were addressed:

- Right leg pain
- Failure to thrive in adult
- Dehydration
- Thrush
- Lower extremity ulceration, left, limited to breakdown of skin

Blood Pressure 110/62	Temperature (Temporal) 98.4 °F
Pulse 68	Oxygen Saturation 100%

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

What's Next

You currently have no upcoming appointments scheduled.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Today's Visit

You saw William E Neighbor Jr on Wednesday November 22, 2023. The following issues were addressed:

- Right leg pain
- Failure to thrive in adult
- Dehydration
- Thrush
- Lower extremity ulceration, left, limited to breakdown of skin

Blood Pressure 110/62	Temperature (Temporal) 98.4 °F
Pulse 68	Oxygen Saturation 100%

Medication List (continued)

None

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 11/22/2023 0940

Pt in clinic with son, Louis, for continued wound management. Pt in visible and excruciating Left Leg pain and appearing wan and weak. She also endorses R Hip and Lower Back pain. The left leg is visibly better than last week and the wounds gently debrided but they were not measured in the effort to get her to the ER to be further assessed for the other concerns. The right leg continues to be clear of significant wounds. The left leg had Chlorhexidine foam soap applied to all wounds then covered with warm moist washcloths.

Lidocaine 1% jelly was applied to all wounds prior to debriding. The larger and deeper three LLE wounds were very gently debrided with a 4 mm curette and gauze moistened with NS. Melgisorb Ag was placed on all wounds, covered with petrolatum gauze, Vaseline applied over most edges to help keep the dressing situated, then wrapped with 6 inch roll gauze, and covered with Surgilast #7.
Requested provider visit to discuss ER visit. Pt disposition to the UWMC ER for assessment of failure to thrive, R Leg/Hip/Low Back pain, being admitted for exhaustive review.

Electronically signed by Perez, Delmis Joel, RN at 11/22/2023 10:49 AM

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 11/15/2023 1140

Jeanne Leonie Hoffman is a 98 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Knee Pain

Visit type (in person vs telemedicine vs phone): In person with son Louis with patient permission

History

Jeanne was scheduled today for wound care with nurse.

No acute is that in the last 3 months that he has been complaining of intermittent right knee pain is worsened in the last 1 to 2 weeks for which she has used Tylenol without adequate relief. She has not had any fever chills or night sweats. There is been no recent falls or other injuries or overuse. Is painful to move the knee and with walking. She is status post right femur plate placed for femur fracture in the past.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.

6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- Hypercholesterolemia [E78.00] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001. Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 . Advise Vit D 800 IU daily.

- Primary open angle glaucoma (POAG) of both eyes [H40.1130] 10/10/2019
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC) [I70.232, I70.242] 09/24/2018
- Vitamin D deficiency [E55.9] 07/09/2018
- Primary osteoarthritis of both hips [M16.0] 02/01/2017
- Imbalance [R26.89] 11/02/2016
- History of recurrent deep vein thrombosis (DVT) [Z86.718] 06/02/2016
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication (HCC) [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

Objective:

BP 137/74 | Pulse (!) 57 | Temp 36.6 °C
Estimated body mass index is 16.51 kg/m² as calculated from the following:
Height as of 10/21/20: 5' 5" (1.651 m).
Weight as of 10/10/22: 45 kg (99 lb 3.3 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
137/74	(!) 57	---	---	---	11:58 AM	11/15/2023

Last blood pressure recorded in this encounter: 137/74
General: Complaining of right knee pain when she extends the knee.

Knee exam

Side: right.
Skin disruption: none. Scars: none. Bruising: no. Swelling: no
Extension: full but painful over lateral aspect of patella Flexion: symmetrical.
Effusion: none.
Patella: tender lateral border without swelling. Patella tracking: nl. Patellar apprehension: not done.
Anserine bursa: non tender
Medial joint line palpation: tender. Lateral joint line palpation: non tender. IT band: neg. Varus stress: neg. Valgus Stress: neg.
Lachman's: neg. McMurrays: not done. Apleys: not done.
Popliteal fossa: non tender to palpation.

Imaging: none

11/15/2023 - Office Visit in Husky Health Same Day Clinic (continued)

Clinical Notes (continued)

Assessment and Plan:

1. Right knee pain, unspecified chronicity

3-month history of right lateral knee pain in the area of the patella with recent exacerbation last 1 to 2 weeks without history of injury. Patient is status post plate and screw placement right femur for distant history of fracture. Pain is likely due to osteoarthritis of the knee.

2. Osteoarthritis of right knee, unspecified osteoarthritis type

She was given Tylenol in clinic which did help to some extent. She has not taken Tylenol previously today.
- acetaminophen (Tylenol) liquid 960 mg

Plan
-- Warm compresses for 30 minutes twice daily
-- She may benefit from having a neoprene sleeve which can be obtained at a local pharmacy. The sleep should have a hole in the middle for the kneecap (patella)
-- Regular use of Tylenol 500 mg 3-4 times daily. At her age maximum in the 3000 mg which would be 6 tablets in a day. Would avoid ibuprofen or Naprosyn given her age
-- Expect marked improvement over the next week otherwise recheck.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Today's Visit

You saw William E Neighbor Jr on Wednesday November 15, 2023. The following issues were addressed: Right knee pain, unspecified chronicity and Osteoarthritis of right knee, unspecified osteoarthritis type.

Blood Pressure 137/74
Temperature 97.8 °F
Pulse 57

Medications Given

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

Visit summary: Right knee pain

From	To	Sent and Delivered
William E Neighbor Jr., MD Last Read in MyChart	Hoffman, Jeanne Leonie	11/15/2023 1:06 PM

11/15/2023 - Office Visit in Husky Health Same Day Clinic (continued)

Messages (continued)

12/12/2023 7:16 PM by Hoffman, Jeanne Leonie

Jeanne: Below is a summary of your visit.

Assessment and Plan:

1. Right knee pain, unspecified chronicity

3-month history of right lateral knee pain in the area of the patella with recent exacerbation last 1 to 2 weeks without history of injury. Patient is status post plate and screw placement right femur for distant history of fracture. Pain is likely due to osteoarthritis of the knee.

2. Osteoarthritis of right knee, unspecified osteoarthritis type

She was given Tylenol in clinic which did help to some extent. She has not taken Tylenol previously today.
- acetaminophen (Tylenol) liquid 960 mg

Plan
-- Warm compresses for 30 minutes twice daily
-- She may benefit from having a neoprene sleeve which can be obtained at a local pharmacy. The sleep should have a hole in the middle for the kneecap (patella)
-- Regular use of Tylenol 500 mg 3-4 times daily. At her age maximum in the 3000 mg which would be 6 tablets in a day. Would avoid ibuprofen or Naprosyn given her age
-- Expect marked improvement over the next week otherwise recheck.

William E Neighbor Jr, MD
Clinical Professor
Department of Family Medicine
University of Washington

How to contact us:
For urgent problems, contact the Hall Health Triage Nurse line at 206-221-2517 (Mon-Fri, 8a-5p)
For non urgent problems, contact us through My chart or by calling my medical assistant at 206-616-9358
For after hours and weekend care, Hall Health after hours: 206-520-7511.
Thank you for choosing the Hall Health Center. We welcome any feedback about the care you received today.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Today's Visit

You saw William E Neighbor Jr on Wednesday November 15, 2023. The following issues were addressed: Right knee pain, unspecified chronicity and Osteoarthritis of right knee, unspecified osteoarthritis type.

Blood Pressure 137/74
Temperature 97.8 °F
Pulse 57

Medications Given

acetaminophen (Tylenol) Last given at 11:55 AM for Osteoarthritis of right knee, unspecified osteoarthritis type

Ordered on: 4/26/2023
Start date: 4/26/2023
End date: 3/8/2025
Quantity: 44 mL
Refill: 4 refills by 4/25/2024

losartan 25 MG tablet

Discontinued by: Rosse, Christopher John, DO
Discontinued on: 11/28/2023
Instructions: take 1/2 tablet by mouth once daily
Authorized by: Neighbor Jr., William E, MD
Ordered on: 8/24/2023
Start date: 8/24/2023
End date: 11/28/2023
Quantity: 45 tablet
Refill: 3 refills by 8/23/2024

pentoxifylline ER 400 MG ER tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 11/20/2023
Instructions: take 1 tablet by mouth three times a day
Authorized by: Kauffman, Mary Johanna Kelly, MD
Ordered on: 9/19/2023
Start date: 9/19/2023
End date: 11/20/2023
Quantity: 90 tablet
Refill: 1 refill by 9/18/2024

nystatin 100000 UNIT/ML mouth/throat suspension

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Swish and swallow 5 mL 4 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/31/2023
Start date: 10/31/2023
End date: 6/12/2024
Action: Patient not taking
Quantity: 60 mL
Refill: No refills remaining

Stopped in Visit

11/15/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Medication List (continued)

None

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 11/15/2023 1000

Pt in clinic with son, Louis, for continued wound management. Son reports it's more difficult getting the pt into the shower this week and the last couple of weeks have been rather hectic including having to reschedule last week's appt to this week.
It appears the left leg has been too moist and there are more sores that have appeared. The right leg continues to be clear of significant wounds. The left leg had Chlorhexidine foam soap applied to all wounds then covered with warm moist washcloths.

Left Leg wounds:
1. Left Medial Ankle: oval 3.1 cm x 1.8 cm x 0.2 cm with moist slough scattered throughout.
2. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 10.0 cm x 3.0 cm x 0.2-0.4 cm with moist slough scattered throughout.
3. Left Distal Lateral Shin: 6.2 cm x 4.2 cm x 0.3 cm with moist slough throughout.
4. Left Mid Shin: 2.8 cm x 1.8 cm x 0.1 cm irregular oval with moist slough throughout.
5. Multiple mid shin cutaneous the largest, of which, is 2.5 cm x 1.7 cm x 0.1 cm.

All LLE wounds were debrided with a 4 mm curette and gauze moistened with NS. Lidocaine 1% jelly was applied to all wounds prior to debriding. Melgisorb Ag was placed on all wounds, covered with petrolatum gauze, Vaseline applied over most edges to help keep the dressing situated, then wrapped with 6 inch roll gauze, and covered with Surgilast #7.

The son was advised to keep the dressing in place until Friday. Appt scheduled for further wound care in 1 week.

Pt's knee was exquisitely painful so a provider visit was scheduled for further evaluation.

Electronically signed by Perez, Delmis Joel, RN at 11/15/2023 2:55 PM

AFTER VISIT SUMMARY

Jeane L. Hoffman MRN: U8170135 11/15/2023 10:00 AM Hall Health Primary Care Center 206-685-1011

Today's Visit

You saw Delmis P on Wednesday November 15, 2023 for: Wound Check/Dressing Change and RNGREATERTHAN60.

What's Next

NOV 22 2023 Clinical Support
Wednesday November 22 9:40 AM (Arrive by 9:25 AM)

Hall Health Same Day
4060 NE Stevens Way, Box 354410
Seattle WA 98195-4410
206-685-1011

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

XR Ankle 3+ View Left Resulted: 11/15/23 1043, Result status: Final result

Ordering provider: Neighbor Jr., William E, MD 11/15/23 0941
Resulted by: Richardson, Michael Lewellyn, MD
Performed: 11/15/23 0942 - 11/15/23 1002
Resulting lab: UW RADIOLOGY
Order status: Completed
Filed by: Interface, Radiology Results In 11/15/23 1046
Accession number: 40259263

Narrative:
EXAMINATION:
XR ANKLE 3+ VW LEFT

CLINICAL INDICATION:
persistent lateral ankle ulceration rule out bone involvement.

COMPARISON: 4/25/17

FINDINGS:

Small vessel calcification raises the question of diabetes mellitus vs chronic renal disease.

Dystrophic calcifications again noted in the achilles tendon and plantar fascia.

Prominent osteoarthritis again noted in the talonavicular joint.

No specific radiographic evidence of osteomyelitis.

If the study does not require radiologist read please enter "No" in this field. This will allow the order to auto advance to final.		

XR Tibia Fibula 2 Vw Left Resulted: 11/15/23 1040, Result status: Final result

Ordering provider: Neighbor Jr., William E, MD 11/15/23 0941
Resulted by: Richardson, Michael Lewellyn, MD
Performed: 11/15/23 0942 - 11/15/23 1002
Resulting lab: UW RADIOLOGY
Order status: Completed
Filed by: Interface, Radiology Results In 11/15/23 1043
Accession number: 40259228

Narrative:
EXAMINATION:
XR TIBIA FIBULA 2 VW LEFT

CLINICAL INDICATION:
decubitus ulcers with elevated sed rate. Examine for signs of bone infection.

COMPARISON:
1/10/19

Impression:
FINDINGS AND IMPRESSION:

The bones are diffusely demineralized.

No acute fracture or dislocation. No periostitis, focal osteopenia, or osseous erosion to suggest osteomyelitis.

There is soft tissue irregularity/ulceration along the medial distal calf. No definite soft tissue gas. No radiopaque foreign body.

Small vessel calcification raises the question of diabetes mellitus vs chronic renal disease.

Dystrophic calcifications again noted in posterior and medial calf soft tissues, with interval progression.

Medication List (continued)

None

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 11/1/2023 1000

Pt in clinic with son, Louis, for continued wound management. She had a visit with her provider prior to wound care. Son endorses having been able to get the pt into the shower this week and is hoping this will happen more regularly to help pt keep clean better.
The legs were appropriately moisturized today. The right leg looks clear of significant wounds. The left leg had Chlorhexidine foam soap applied to all wounds then covered with warm moist washcloths.

The left leg larger wounds remain and are described below:
1. Left Medial Ankle: oval 2.8 cm x 1.5 cm x 0.2 cm with moist slough scattered throughout.
2. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 9.2 cm x 2.3 cm x 0.2-0.4 cm with moist slough scattered throughout.
3. Left Distal Lateral Shin: 6.4 cm x 14.0 cm x 0.1-0.3 cm with moist slough throughout.
4. Left Mid Shin: 3.2 cm x 2.3 cm x 0.1 cm irregular oval with moist slough throughout.
5. Multiple mid shin cutaneous the largest, of which, are 0.8 cm x 0.6 cm x 0.1 cm and 0.8 cm x 0.5 cm x 0.1 cm.

All LLE wounds were debrided with a 4 mm curette and gauze moistened with NS. Lidocaine 1% jelly was applied to wounds 1-4 prior to debriding. Melgisorb Ag was placed on all wounds, covered with petrolatum gauze, Vaseline applied over most areas to help keep the dressing moist, then wrapped with 4 inch roll gauze, and covered with Surgilast #7.

The son was advised to keep the dressing in place until Friday. Appt scheduled for further wound care in 1 week. Provider visit pending.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Instructions: Take 2 tablets (2,000 units) by mouth daily.
Entered by: Taylor, Zoe Judith Mildred, MD — Entered on: 8/20/2019
Start date: 8/20/2019 — End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA — Entered on: 9/4/2019
End date: 3/8/2025 — Informant: Patient Reported

ofloxacin 0.3 % ophthalmic solution

Discontinued by: Van Hoff, Linda A, ARNP — Discontinued on: 6/12/2024

11/01/2023 - Office Visit in Husky Health Same Day Clinic (continued)

Medication List (continued)

Reason for discontinuation: Med list cleanup
Instructions: Place 1-2 drops into left EYE 4 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/10/2022
Start date: 10/10/2022
End date: 6/12/2024
Action: Patient not taking
Quantity: 5 mL
Refill: 1 refill by 10/10/2023

atorvastatin 10 MG tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 1/3/2024
Instructions: Take 1 tablet (10 mg) by mouth daily.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/13/2022
Start date: 12/13/2022
End date: 1/3/2024
Quantity: 90 tablet
Refill: 3 refills by 12/13/2023

Wound Dressings (medihoney) topical gel

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Apply topically daily. Apply to ulcerations on legs. Apply dressing over the Medi Honey.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/9/2023
Start date: 2/9/2023
End date: 3/8/2025
Quantity: 88 mL
Refill: 6 refills by 2/9/2024

timolol maleate 0.5 % ophthalmic solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/10/2024
Instructions: instill 1 drop into both eyes twice a day
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/24/2023
Start date: 2/24/2023
End date: 4/10/2024
Quantity: 10 mL
Refill: 6 refills by 2/24/2024

triamcinolone 0.1 % cream

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Apply topically 2 times a day. Apply to both forearms.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/5/2023
Start date: 4/5/2023
End date: 6/12/2024
Action: Patient not taking
Quantity: 28.4 g
Refill: 1 refill by 4/4/2024

Wound Dressings (medihoney) topical gel

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Apply topically every other day. Apply to wound before applying dressing
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/26/2023
Start date: 4/26/2023
End date: 3/8/2025
Quantity: 44 mL
Refill: 4 refills by 4/25/2024

losartan 25 MG tablet

Discontinued by: Rosse, Christopher John, DO
Discontinued on: 11/28/2023
Instructions: take 1/2 tablet by mouth once daily
Authorized by: Neighbor Jr., William E, MD
Ordered on: 8/24/2023
Start date: 8/24/2023
End date: 11/28/2023
Quantity: 45 tablet
Refill: 3 refills by 8/23/2024

pentoxifylline ER 400 MG ER tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 11/20/2023
Instructions: take 1 tablet by mouth three times a day
Authorized by: Kauffman, Mary Johanna Kelly, MD
Ordered on: 9/19/2023
Start date: 9/19/2023
End date: 11/20/2023
Quantity: 90 tablet
Refill: 1 refill by 9/18/2024

nystatin 100000 UNIT/ML mouth/throat suspension

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024

Medication List (continued)

Reason for discontinuation: Med list cleanup
Instructions: Swish and swallow 5 mL 4 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/31/2023
Start date: 10/31/2023
End date: 6/12/2024
Action: Patient not taking
Quantity: 60 mL
Refill: No refills remaining

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 11/1/2023 0940

Jeanne Leonie Hoffman is a 98 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  Wound care and mouth thrush

Visit type (in person vs telemedicine vs phone): In person with son Louis. They did not bring the patient's hearing aids today

History

Thrush and appetite
Patient has completed 1 week of oral nystatin for thrush. There seems to be improvement. She is eating somewhat more. She does not seem to have as much discomfort in her throat.

Cellulitis left lower extremity
she has completed course of antibiotics for cellulitis of the left lower extremity
She has not had any worsening of pain and has had some improvement. There is been no further redness

Lower extremity ulcerations
Continues wound care. Seeing nurse today for wound care. Nurse and son are working on establishing care on Bainbridge Island where they live and possible home care

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

11/01/2023 - Office Visit in Husky Health Same Day Clinic (continued)

Clinical Notes (continued)

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- Hypercholesterolemia [E78.00] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001. Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 . Advise Vit D 800 IU daily.

- Primary open angle glaucoma (POAG) of both eyes [H40.1130] 10/10/2019
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC) [I70.232, I70.242] 09/24/2018
- Vitamin D deficiency [E55.9] 07/09/2018
- Primary osteoarthritis of both hips [M16.0] 02/01/2017
- Imbalance [R26.89] 11/02/2016
- History of recurrent deep vein thrombosis (DVT) [Z86.718] 06/02/2016
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication (HCC) [E11.9] 03/27/2007

Year onset: Dx March 2007
Metformin discontinued 2011 as A1c in target range without it.
Diet and weight controlled.

Medications

Outpatient Medications Marked as Taking for the 11/1/23 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• acetaminophen 500 MG Oral Tab	1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition		
• atorvastatin 10 MG tablet	Take 1 tablet (10 mg) by mouth daily.	90 tablet	3
• Calcium Carbonate 500 MG Oral Chew Tab	Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.		
• Cholecalciferol 1000 units Oral Tab	Take 2 tablets (2,000 units) by mouth daily.		
• losartan 25 MG tablet	take 1/2 tablet by mouth once daily	45 tablet	3
• MULTIPLE VITAMIN OR	Take by mouth.		
• nystatin 100000 UNIT/ML mouth/throat suspension	Swish and swallow 5 mL 4 times a day.	60 mL	0
• ofloxacin 0.3 % ophthalmic solution	Place 1-2 drops into left EYE 4 times a day.	5 mL	1
• pentoxifylline ER 400 MG ER tablet	take 1 tablet by mouth three times a day	90 tablet	1
• timolol maleate 0.5 % ophthalmic solution	instill 1 drop into both eyes twice a day	10 mL	6
• triamcinolone 0.1 % cream	Apply topically 2 times a day. Apply to both forearms.	28.4 g	1
• Wound Dressings (medihoney) topical gel	Apply topically every other day. Apply to wound before applying dressing	44 mL	3
• Wound Dressings (medihoney) topical gel	Apply topically daily. Apply to ulcerations on legs. Apply	88 mL	6

dressing over the
Medi Honey.

Objective:

BP 116/72 | Pulse (!) 59 | Temp 36.4 °C (Temporal)
Estimated body mass index is 16.51 kg/m² as calculated from the following:
Height as of 10/21/20: 5' 5" (1.651 m).
Weight as of 10/10/22: 45 kg (99 lb 3.3 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
116/72	(!) 59	---	---	---	9:48 AM	11/1/2023

Last blood pressure recorded in this encounter: 116/72
General: No acute distress. Difficult communicating with patient due to her not having her hearing aids today. Despite that she was interactive and alert. She did eat some yogurt and fig cookies provided in the office
Throat: Mild diffuse redness. No further erythematous patches or whitish exudate on buccal mucosa oropharynx or tongue
Right lower extremity no further evidence of cellulitis. Ulcerations are as described in the nurse note

Lab and other tests: Pending

Assessment and Plan:

1. Thrush
Thrush is markedly improved.

Plan
Extend course of oral nystatin to total of 7 to 14 days.
If recurs would move to oral fluconazole

2. Cellulitis of left lower extremity
Infection is resolved with antibiotic treatment

3. Lower extremity ulceration, left, limited to breakdown of skin (HCC)
Nurse providing wound care today
Her son Luis and Nurse Delmis are exploring options for home care on Bainbridge

4. Decreased appetite
Somewhat improved. We did give her yogurt and fig bar today which she ate.

11/01/2023 - Office Visit in Husky Health Same Day Clinic (continued)

Clinical Notes (continued)

Labs ordered at last visit are to be done today
Follow-up in 1-2 week

William E Neighbor Jr, MD
Clinical Professor
Department of Family Medicine
University of Washington

How to contact us:
For urgent problems, contact the Hall Health Triage Nurse line at 206-221-2517 (Mon-Fri, 8a-5p)
For non urgent problems, contact us through My chart or by calling my medical assistant at 206-616-9358
For after hours and weekend care, Hall Health after hours: 206-520-7511.
Thank you for choosing the Hall Health Center. We welcome any feedback about the care you received today.

Accession number: 40259228

Narrative:
EXAMINATION:
XR TIBIA FIBULA 2 VW LEFT

CLINICAL INDICATION:
decubitus ulcers with elevated sed rate. Examine for signs of bone infection.

COMPARISON:
1/10/19

Impression:
FINDINGS AND IMPRESSION:

The bones are diffusely demineralized.

No acute fracture or dislocation. No periostitis, focal osteopenia, or osseous erosion to suggest osteomyelitis.

There is soft tissue irregularity/ulceration along the medial distal calf. No definite soft tissue gas. No radiopaque foreign body.

Small vessel calcification raises the question of diabetes mellitus vs chronic renal disease.

Dystrophic calcifications again noted in posterior and medial calf soft tissues, with interval progression.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Today's Visit

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

AFTER VISIT SUMMARY

Jeane L. Hoffman MRN: U8170135 — 11/1/2023 9:40 AM — Hall Health Same Day 206-685-1011

Instructions from William E Neighbor Jr, MD

Imaging ordered today
XR Tibia Fibula 2 Vw Left
Please complete by or around 11/9/2023

What's Next

NOV 8 2023 — **Clinical Support**
Wednesday November 8 9:40 AM
(Arrive by 9:25 AM)

Hall Health Primary Care Center
4060 NE Stevens Way, Box 354410
Seattle WA 98195-4410
206-685-1011

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Today's Visit

You saw William E Neighbor Jr, MD on Wednesday November 1, 2023. The following issues were addressed: Thrush; Cellulitis of left lower extremity; Lower extremity ulceration, left, limited to breakdown of skin; and Decreased appetite.

Blood Pressure	Temperature (Temporal)	Pulse
116/72	97.6 °F	59

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

Active at the End of Visit

acetaminophen 500 MG Oral Tab

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions:
1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 6/12/2024
Action: Patient not taking

Calcium Carbonate 500 MG Oral Chew Tab

Discontinued by: Clark, Trika L, Pharmacy Technician
Discontinued on: 1/9/2025
Reason for discontinuation: Discontinued by patient
Instructions: Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 1/9/2025

Cholecalciferol 1000 units Oral Tab

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/20/2019
End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA
Entered on: 9/4/2019
End date: 3/8/2025
Informant: Patient Reported

ofloxacin 0.3 % ophthalmic solution

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Place 1-2 drops into left EYE 4 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/10/2022
Start date: 10/10/2022
End date: 6/12/2024
Action: Patient not taking
Quantity: 5 mL
Refill: 1 refill by 10/10/2023

11/01/2023 - Orders Only in Husky Health Same Day Clinic (continued)

Medication List (continued)

atorvastatin 10 MG tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 1/3/2024
Instructions: Take 1 tablet (10 mg) by mouth daily.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/13/2022
Start date: 12/13/2022
End date: 1/3/2024
Quantity: 90 tablet
Refill: 3 refills by 12/13/2023

Wound Dressings (medihoney) topical gel

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Apply topically daily. Apply to ulcerations on legs. Apply dressing over the Medi Honey.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/9/2023
Start date: 2/9/2023
End date: 3/8/2025
Quantity: 88 mL
Refill: 6 refills by 2/9/2024

timolol maleate 0.5 % ophthalmic solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/10/2024
Instructions: instill 1 drop into both eyes twice a day
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/24/2023
Start date: 2/24/2023
End date: 4/10/2024
Quantity: 10 mL
Refill: 6 refills by 2/24/2024

triamcinolone 0.1 % cream

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Apply topically 2 times a day. Apply to both forearms.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/5/2023
Start date: 4/5/2023
End date: 6/12/2024
Action: Patient not taking
Quantity: 28.4 g
Refill: 1 refill by 4/4/2024

Wound Dressings (medihoney) topical gel

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Apply topically every other day. Apply to wound before applying dressing
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/26/2023
Start date: 4/26/2023
End date: 3/8/2025
Quantity: 44 mL
Refill: 4 refills by 4/25/2024

losartan 25 MG tablet

Discontinued by: Rosse, Christopher John, DO
Discontinued on: 11/28/2023
Instructions: take 1/2 tablet by mouth once daily
Authorized by: Neighbor Jr., William E, MD
Ordered on: 8/24/2023
Start date: 8/24/2023
End date: 11/28/2023
Quantity: 45 tablet
Refill: 3 refills by 8/23/2024

pentoxifylline ER 400 MG ER tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 11/20/2023
Instructions: take 1 tablet by mouth three times a day
Authorized by: Kauffman, Mary Johanna Kelly, MD
Ordered on: 9/19/2023
Start date: 9/19/2023
End date: 11/20/2023
Quantity: 90 tablet
Refill: 1 refill by 9/18/2024

nystatin 100000 UNIT/ML mouth/throat suspension

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Swish and swallow 5 mL 4 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/31/2023
Start date: 10/31/2023
End date: 6/12/2024
Action: Patient not taking
Quantity: 60 mL
Refill: No refills remaining

Clinical Notes

Result Encounter Note

Neighbor Jr., William E, MD at 11/1/2023 1118

Jeanne:
Blood work shows mild elevation of hemoglobin A1c consistent with mild diabetes that has been well controlled in the past with diet alone. Glucose was slightly elevated at 113.
Kidney function was normal.
Cholesterol panel was essentially normal
Inflammation tests including sed rate and CRP were markedly elevated. This may be due to recent infection but also due to skin ulcerations. We should obtain an x-ray of the leg at the next visit.
Complete blood cell count showed normal white blood cell level. Continues to be mildly anemic. Iron level in October 2021 was normal and vitamin B12 level in October 2022 rather than being low was actually elevated.
We will follow-up on these tests when seen in the next week.

Indications

Cellulitis of left lower extremity [L03.116 (ICD-10-CM)]

Result Notes

William E Neighbor Jr., MD
11/2/2023 12:47 PM PDT

Jeanne:
Blood work shows mild elevation of hemoglobin A1c consistent with mild diabetes that has been well controlled in the past with diet alone. Glucose was slightly elevated at 113.
Kidney function was normal.
Cholesterol panel was essentially normal
Inflammation tests including sed rate and CRP were markedly elevated. This may be due to recent infection but also due to skin ulcerations. We should obtain an x-ray of the leg at the next visit.
Complete blood cell count showed normal white blood cell level. Continues to be mildly anemic. Iron level in October 2021 was normal and vitamin B12 level in October 2022 rather than being low was actually elevated.
We will follow-up on these tests when seen in the next week.

End date: 10/31/2023
Refill: 1 refill by 10/24/2024

Stopped in Visit

None

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 10/25/2023 1000

Pt in clinic with son, Louis, for continued wound management. She had a visit with her provider prior to wound care. The legs were very dry today as the son wished for the medical team to see the results of using Lidocaine lotion. Both legs were wrapped with a warm wet towel slathered with Chlorhexidine soap.

The right leg has a few scattered cutaneous wounds on the shin which were debrided lightly and had a light layer of Vaseline applied to them and nothing else.

The left leg larger wounds remain and are a bit bigger.
1. Left Medial Ankle: circular 3.3 cm x 2.0 cm x 0.2 cm with moist slough scattered throughout.
2. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 9 cm x 2.5 cm x 0.2-0.4 cm with moist slough scattered throughout.
3. Left Distal Lateral Shin: 6.0 cm x 3.3 cm x 0.1-0.3 cm with moist slough throughout.
4. Left Mid Shin: 3.0 cm x 2.5 cm x 0.2 cm irregular oval with moist slough throughout.
5. Multiple mid shin cutaneous the largest, of which, are 0.8 cm x 0.6 cm x 0.1 cm and 0.8 cm x 0.5 cm x 0.1 cm.

All LLE wounds were debrided with a 4 mm curette and gauze moistened with NS. Lidocaine 1% jelly was applied to all wounds prior to debriding. Vaseline was applied to the wounds above, covered with petrolatum gauze, covered with nonadherent dressings, then wrapped with 6 inch roll gauze, and covered with Surgilast #7.

The leg was a bit too dry today. Son advised to apply a light layer of Vaseline daily for 30-60 minutes then gently debride the wounds with moist gauze, which he states they have. Daily cleansing with Chlorhexidine soap will also continue.

Appt scheduled in 1 week in conjunction with provider visit for further wound assessment and management.

Son asked about the availability of the COVID vaccine which we do now have so this was administered to both.

Immunization Documentation

98 year old - Is this patient eligible for VFC or Adult supply vaccine? **Adult**

Interpreter: No

Has patient ever fainted after receiving vaccine/blood draw? : No [If YES, pt should be lying down to receive vaccine]

Vaccine Screening Questions

1	Are you allergic to Latex?	NO
2	Have you had a serious reaction	NO

10/25/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

	or an allergic reaction to a vaccine?	
3	Do you currently have a moderate or severe illness, including fever?	NO

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Apply topically daily. Apply to ulcerations on legs. Apply dressing over the Medi Honey.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/9/2023
Start date: 2/9/2023
End date: 3/8/2025
Quantity: 88 mL
Refill: 6 refills by 2/9/2024

timolol maleate 0.5 % ophthalmic solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/10/2024
Instructions: instill 1 drop into both eyes twice a day
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/24/2023
Start date: 2/24/2023
End date: 4/10/2024
Quantity: 10 mL
Refill: 6 refills by 2/24/2024

triamcinolone 0.1 % cream

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Apply topically 2 times a day. Apply to both forearms.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/5/2023
Start date: 4/5/2023
End date: 6/12/2024
Action: Patient not taking
Quantity: 28.4 g
Refill: 1 refill by 4/4/2024

Wound Dressings (medihoney) topical gel

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Apply topically every other day. Apply to wound before applying dressing
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/26/2023
Start date: 4/26/2023
End date: 3/8/2025
Quantity: 44 mL
Refill: 4 refills by 4/25/2024

losartan 25 MG tablet

Discontinued by: Rosse, Christopher John, DO
Discontinued on: 11/28/2023
Instructions: take 1/2 tablet by mouth once daily
Authorized by: Neighbor Jr., William E, MD
Ordered on: 8/24/2023
Start date: 8/24/2023
End date: 11/28/2023
Quantity: 45 tablet
Refill: 3 refills by 8/23/2024

pentoxifylline ER 400 MG ER tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 11/20/2023
Instructions: take 1 tablet by mouth three times a day
Authorized by: Kauffman, Mary Johanna Kelly, MD
Ordered on: 9/19/2023
Start date: 9/19/2023
End date: 11/20/2023
Quantity: 90 tablet
Refill: 1 refill by 9/18/2024

lactobacillus rhamnosus GG (Culturelle) capsule

Instructions: Take 1 capsule by mouth 2 times a day for 14 days.

10/25/2023 - Office Visit in Husky Health Same Day Clinic (continued)

Medication List (continued)

Authorized by: Stoner-Duncan, Benjamin, MD
Start date: 10/17/2023
Quantity: 28 capsule

Ordered on: 10/17/2023
End date: 10/31/2023
Refill: No refills remaining

nystatin 100000 UNIT/ML mouth/throat suspension

Discontinued by: Neighbor Jr., William E, MD
Reason for discontinuation: Reorder
Instructions: Swish and swallow 5 mL 4 times a day.
Authorized by: Neighbor Jr., William E, MD
Start date: 10/25/2023
Quantity: 60 mL

Discontinued on: 10/31/2023

Ordered on: 10/25/2023
End date: 10/31/2023
Refill: 1 refill by 10/24/2024

Stopped in Visit

None

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 10/25/2023 0940

Jeanne Leonie Hoffman is a 98 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Wound Care

Visit type (in person vs telemedicine vs phone): In person. With patient's permission her son Luis was present as usual for her visit

History

98-year-old female who was seen in the emergency room October 17, 1 week ago, for dehydration and possible infection due to cellulitis. She was treated with gentle IV hydration, doxycycline 100 mg orally and cephalexin 500 mg orally. She was continued on cephalexin 500 mg 4 times a day for 7 days and doxycycline twice daily for 7 days. She was also given probiotic capsules.

Review of her record shows that September 20, 2023 she was seen at Hall health for left lower extremity cellulitis again treated with cephalexin 500 mg 4 times daily for 7 days. She was to follow-up in 1 to 2 days and did so with nurse. Nurse visit on September 22 documents the size of the 4 main wounds as follows

1. Left Medial Ankle: circular 3.0 cm x 2.5 cm x 0.2 cm with moist slough scattered throughout.
2. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 10.5 cm x 2.3 cm x 0.2-0.4 cm with moist slough scattered throughout.
3. Left Proximal Shin: 3.5 cm x 2.5 cm x 0.1 cm with moist slough throughout.
4. Right Frontal Lateral Ankle: 0.5 cm x 0.5 cm x 0.2 cm with moist slough in its middle.

Issues today:
-- Recent visit to emergency room on October 17 for dehydration and loss of appetite as noted above
-- Decreased appetite and discomfort in throat when eating
-- Gradual weight loss over the last 2 months due to decreased appetite
-- Worsening of left lower leg ulcers.

Clinical Notes (continued)

Regarding food, She expresses that her son Luis does not prepare food that takes good to her. She states that her mother was of European background prepared very good tasting vegetables with butter. Luis was present for the visit today. He reports that he is given her cream of cauliflower soup which she will not eat though to me she expresses that she likes cauliflower. He is also taking her out for Chinese food for chow mein but she would not eat that.

Currently she is only a few bites of food per day by Luis's report. She is drinking fluids. She is urinating and having bowel movements

Review of Systems:
No fever chills or night sweats.
No nausea or vomiting.
No abdominal pain
No change in color of urine or pain with urination.

Problem List
Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008
Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- Hypercholesterolemia [E78.00] 11/20/2006

On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006

LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006

4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006

Td/Tdap (q 10 yr): See immmunizations
Pneumococcal (65 yoa and high risk x1): See imms
Blood pressure: Dx hypertension

Cholesterol: dx hyperlipidemia
Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
Pap smear (q2-3 yrs to age 65)--82 years old
Colorectal cancer screening: Sig to 30 cm in May 2001. Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
Tobacco: no
Alcohol: no
Drugs: no
Sexual practice/contraception: Not active
Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.
Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 . Advise Vit D 800 IU daily.

- Primary open angle glaucoma (POAG) of both eyes [H40.1130] 10/10/2019
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC) [I70.232, I70.242] 09/24/2018
- Vitamin D deficiency [E55.9] 07/09/2018
- Primary osteoarthritis of both hips [M16.0] 02/01/2017
- Imbalance [R26.89] 11/02/2016
- History of recurrent deep vein thrombosis (DVT) [Z86.718] 06/02/2016
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication (HCC) [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

Medications

Outpatient Medications Marked as Taking for the 10/25/23 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• acetaminophen 500 MG Oral Tab	1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition		
• atorvastatin 10 MG tablet	Take 1 tablet (10 mg) by mouth daily.	90 tablet	3
• Calcium Carbonate 500 MG Oral Chew Tab	Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn .		
• Cholecalciferol 1000 units Oral Tab	Take 2 tablets (2,000 units) by mouth daily.		

10/25/2023 - Office Visit in Husky Health Same Day Clinic (continued)

Clinical Notes (continued)

• lactobacillus rhamnosus GG (Culturelle) capsule	Take 1 capsule by mouth 2 times a day for 14 days.	28 capsule	0
• losartan 25 MG tablet	take 1/2 tablet by mouth once daily	45 tablet	3
• MULTIPLE VITAMIN OR	Take by mouth.		
• ofloxacin 0.3 % ophthalmic solution	Place 1-2 drops into left EYE 4 times a day.	5 mL	1
• pentoxifylline ER 400 MG ER tablet	take 1 tablet by mouth three times a day	90 tablet	1
• timolol maleate 0.5 % ophthalmic solution	instill 1 drop into both eyes twice a day	10 mL	6
• triamcinolone 0.1 % cream	Apply topically 2 times a day. Apply to both forearms.	28.4 g	1
• Wound Dressings (medihoney) topical gel	Apply topically every other day. Apply to wound before applying dressing	44 mL	3
• Wound Dressings (medihoney) topical gel	Apply topically daily. Apply to ulcerations on legs. Apply dressing over the Medi Honey.	88 mL	6

Social history:

History

Sexual Activity

- Sexual activity: Not Currently

Social History

Tobacco Use

- Smoking status: Never
- Smokeless tobacco: Never

Substance Use Topics

- Alcohol use: No

Objective:

BP 120/72 | Pulse 67 | Temp 36.6 °C (Temporal)
Estimated body mass index is 16.51 kg/m² as calculated from the following:
Height as of 10/21/20: 5' 5" (1.651 m).
Weight as of 10/10/22: 45 kg (99 lb 3.3 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
120/72	67	---	---	---	9:38 AM	10/25/2023

10/25/2023 - Office Visit in Husky Health Same Day Clinic (continued)

Clinical Notes (continued)

Last blood pressure recorded in this encounter: 120/72
General: No acute distress. Patient has 1 hearing aid in place and is able to converse.
Mental status: Jean is conversant and well oriented
Mouth examination shows erythematous white patches consistent with thrush and with being on antibiotics.
Skin examination as documented in nursing note. She now has multiple skin breakdowns in the left lower extremity without current evidence of infection

Lab and other tests:
Labs done on October 17 showed albumin 3.4, total protein 7.3 (normal) creatinine 1.09 and elevated BUN consistent with dehydration. Hematocrit was 33 and hemoglobin decreased as well compared to 1 year ago. MCV was elevated. Vitamin B12 level done 1 year ago was markedly elevated.

Assessment and Plan:
1. Cellulitis of left lower extremity
There is no evidence of persistent cellulitis that today. Patient will complete her antibiotic course.

Labs will be obtained at her visit next week

2. Lower extremity ulceration, left, limited to breakdown of skin (HCC)
Care provided by nurse. Follow-up visit in 1 week
As we have discussed in the past patient really requires visiting nurses help her wound care help in the Bainbridge area where they live. However they have limited transportation which has been a limiting factor in accessing services. That being said transportation could be arranged through Senior services. We will follow-up next week

3. Decreased appetite
In part due to thrush.
Briefly discussed importance of some source of protein such as with fish or poultry as well as green but also starchy vegetables that provide calories. She seems to like foods that have better.

Lewis will work on this. Another option in the future is a senior meal service.

4. Thrush
Secondary to antibiotic therapy.

Plan
- nystatin 100000 UNIT/ML mouth/throat suspension; Swish and swallow 5 mL 4 times a day. Dispense: 60 mL; Refill: 1

Next visit in 1 week

William E Neighbor Jr, MD
Clinical Professor
Department of Family Medicine
University of Washington

How to contact us:
For urgent problems, contact the Hall Health Triage Nurse line at 206-221-2517 (Mon-Fri, 8a-5p)
For non urgent problems, contact us through My chart or by calling my medical assistant at 206-616-9358
For after hours and weekend care, Hall Health after hours: 206-520-7511.
Thank you for choosing the Hall Health Center. We welcome any feedback about the care you received today.

Indications

Cellulitis of left lower extremity [L03.116 (ICD-10-CM)]

Result Notes

William E Neighbor Jr., MD
11/2/2023 12:47 PM PDT

Jeanne:
Blood work shows mild elevation of hemoglobin A1c consistent with mild diabetes that has been well controlled in the past with diet alone. Glucose was slightly elevated at 113.
Kidney function was normal.
Cholesterol panel was essentially normal
Inflammation tests including sed rate and CRP were markedly elevated. This may be due to recent infection but also due to skin ulcerations. We should obtain an x-ray of the leg at the next visit.
Complete blood cell count showed normal white blood cell level. Continues to be mildly anemic. Iron level in October 2021 was normal and vitamin B12 level in October 2022 rather than being low was actually elevated.
We will follow-up on these tests when seen in the next week.

Indications

Cellulitis of left lower extremity [L03.116 (ICD-10-CM)]

Result Notes

William E Neighbor Jr., MD
11/2/2023 12:47 PM PDT

Jeanne:
Blood work shows mild elevation of hemoglobin A1c consistent with mild diabetes that has been well controlled in the past with diet alone. Glucose was slightly elevated at 113.
Kidney function was normal.
Cholesterol panel was essentially normal
Inflammation tests including sed rate and CRP were markedly elevated. This may be due to recent infection but also due to skin

ulcerations. We should obtain an x-ray of the leg at the next visit.
Complete blood cell count showed normal white blood cell level. Continues to be mildly anemic. Iron level in October 2021 was normal and vitamin B12 level in October 2022 rather than being low was actually elevated.
We will follow-up on these tests when seen in the next week.

After Visit Summary (continued)

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Messages (continued)

Thrush....NYSTATIN Medication is improving Jean's infection slowly.
However, have been using teaspoon.
Need a refill.....
Current refill at RITE-AID, available only on November 6th..
Therefore, a new prescription maybe required, to continue treatment.

Jean is eating more.

See you on 11-1.

Louis

Last Read in MyChart
12/12/2023 7:18 PM by Hoffman, Jeanne Leonie

Jeanne: Below is a summary of your visit.

Assessment and Plan:
1. Cellulitis of left lower extremity
There is no evidence of persistent cellulitis that today. Patient will complete her antibiotic course.

Labs will be obtained at her visit next week

2. Lower extremity ulceration, left, limited to breakdown of skin (HCC)
Care provided by nurse. Follow-up visit in 1 week
As we have discussed in the past patient really requires visiting nurses help her wound care help in the Bainbridge area where they live. However they have limited transportation which has been a limiting factor in accessing services. That being said transportation could be arranged through Senior services. We will follow-up next week

3. Decreased appetite
In part due to thrush.
Briefly discussed importance of some source of protein such as with fish or poultry as well as green but also starchy vegetables that provide calories. She seems to like foods that have better.

Lewis will work on this. Another option in the future is a senior meal service.

4. Thrush
Secondary to antibiotic therapy.

Plan

Clinical Notes

Telephone Encounter

Perez, Delmis Joel, RN at 10/19/2023 1628

Called the pt's son in regards to pt's ER visit yesterday. Son indicates pt is much better today and continues to improve. Pt has been taking the antibiotics and probiotics but not eating as much as normal just yet. Has eaten bread, fruit, hot cereal, Ovaltine, milk, and yogurt today. Pt able to do canning today and talk to home investigators today evaluating their living situation. Son endorses the pt having issues eating solids. Recommended taking smaller bites and chewing longer. Pt has been having issues with her dentures, per the son.
Per the son, pt has been more alert, happier, and talkative today. She reviewed her medications and son will be more diligent in helping her take her daily meds.
Son endorses pt with negative self-talk and possibly being depressed.

CHIEF COMPLAINT

Chief Complaint

Patient presents with

- Loss of Appetite

HISTORY OF PRESENT ILLNESS AND REVIEW OF SYSTEMS

98-year-old woman with a history of venous stasis ulcers presents for evaluation of poor appetite. Patient brought in by her adult child/caregiver. Patient reportedly not eating or drinking well over the last several days. No reported fevers or chills. Patient has been undergoing wound care in wound care clinic, last dressing change yesterday.

PAST MEDICAL AND SURGICAL HISTORY

Past Medical History:

Diagnosis	Date
• Closed fracture of right distal femur (HCC)	7/15/2021
• Fall	9/3/2019
• Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)	5/26/2019
• Venous stasis ulcer (HCC)	5/26/2019
• Diabetic ulcer of lower extremity (HCC)	9/24/2018
• Severe protein-calorie malnutrition (HCC)	6/7/2018
• Urge urinary incontinence	6/7/2018
• Venous ulcer of left leg (HCC)	6/7/2018
• Normocytic anemia	6/7/2018
• Chronic venous hypertension with ulcer and inflammation, left (HCC)	5/17/2018
• Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)	5/17/2018
• Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)	5/17/2018
• Thrombocytopenia (HCC)	11/2/2016
• Leg weakness, bilateral	1/6/2015
• Weakness of trunk musculature	1/6/2015
• Vertebral fracture *Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed*	12/13/2012
• Thyroid nodule, uninodular *CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH.*	12/13/2012

10/17/2023 - ED in UW Northwest Emergency (continued)

ED Provider Note (continued)

TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.

- Closed fracture of unspecified intracapsular section of neck of femur 5/1/2007
  Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.
- Unspecified vitamin B deficiency 5/1/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency
- Impaired fasting glucose 3/22/2007
- Carpal tunnel syndrome 11/20/2006
  Carpal tunnel release right wrist in 1989

ED COURSE/MEDICAL DECISION MAKING

98-year-old woman with a history of chronic venous stasis ulcers presents for evaluation of decreased appetite. Patient presents afebrile, hemodynamically stable, no acute distress. Physical exam revealing of dry mucous membranes, bilateral lower leg dressings with minimal strikethrough present, patient with mentals but that is slightly

10/17/2023 - ED in UW Northwest Emergency (continued)

ED Provider Note (continued)

decreased from baseline per caregiver.

Differential diagnosis includes infection, dehydration, likely source of skin ulcers, less likely acute intracranial pathology, possible viral syndrome, among others

Labs reviewed and independently interpreted by myself show mild leukocytosis which is new 11.8, creatinine slightly increased from baseline at 1.09, no other acutely concerning findings.

Patient given gentle IV fluid resuscitation with 250 cc boluses and reevaluations in between. Patient given p.o. antibiotics. Patient significantly improved on reassessment. Mental status returned to baseline per caregiver. Patient tolerated p.o. liquids and solids without issue. Patient reported good appetite.

Patient discharged in the care of her caregiver in stable, comfortable condition. Given prescription for antibiotics, advised to follow-up promptly in wound care clinic for reevaluation. Strict return precautions given.

Medications Given in the ED:

Medications

lactated ringers IV Bolus 250 mL (0 mL Intravenous Stopped 10/17/23 1442)

Clinical Notes

Discharge Instructions

Stoner-Duncan, Benjamin, MD at 10/17/2023 1628

Take antibiotics as prescribed. Stay well-hydrated. Follow-up with primary care for reevaluation. Follow-up promptly with wound care clinic, you may need more frequent wound care than your current regimen. Return for worsening symptoms.

Your ED Test Results

Test results will appear in your MyChart account as soon as they are available. Your ED physician/provider should have reviewed available results with you during your ED visit. However, you may think of other questions after your visit; some results may be difficult to interpret or understand. **If you have concerns or questions about your results, please contact your primary care physician's office.** If you do not have a primary care physician you can call 206-520-7520 Monday through Friday between the hours of 8am-5pm.

You will also be able to review your medical record from the emergency department visit once it is finalized. If you have reviewed your medical record and believe there is an error you may complete a Request for Correction or Amendment of the Medical Record form and submit it via mail, fax, or e-mail to the locations listed below.

Attached Information — Cellulitis, Discharge Instructions for (English)

Discharge Instructions for Cellulitis

You have been diagnosed with cellulitis. This is an infection in the deepest layer of the skin and tissue beneath the skin. In some cases, the infection also affects the muscle. Cellulitis is caused by bacteria. The bacteria can enter the body through broken skin. This can happen with a cut, scratch, animal bite, or an insect bite that has been scratched. You may have been treated in the hospital with antibiotics and fluids. You will likely be given a prescription for antibiotics to take at home. This sheet will help you take care of yourself at home.

Home care

When you are home:

- Take the prescribed antibiotic medicine you are given as directed until it is gone. Take it even if you feel better. It treats the infection and stops it from returning. Not taking all the medicine can make future infections hard to treat.
- Keep the infected area clean.
- When possible, raise the infected area above the level of your heart. This helps keep swelling down.
- Talk with your healthcare provider if you are in pain. Ask what kind of over-the-counter medicine you can take for pain.
- Apply clean bandages as advised.
- Take your temperature once a day for a week.
- Wash your hands often to prevent spreading the infection.

In the future, wash your hands before and after you touch cuts, scratches, or bandages. This will help prevent infection.

When to call your healthcare provider

Call your healthcare provider right away if you have any of the following:

- Trouble or pain when moving the joints above or below the infected area
- Discharge or pus draining from the area
- Fever of 100.4°F (38°C) or higher, or as directed by your healthcare provider
- Pain that gets worse in or around the infected
- Redness that gets worse in or around the infected area, particularly if the area of redness expands to a wider area
- Shaking chills
- Swelling of the infected area
- Vomiting

Attached Information — Dehydration (Adult) (English)

Dehydration (Adult)

Dehydration occurs when your body loses too much fluid. This may be the result of prolonged vomiting or diarrhea, excessive sweating, or a high fever. It may also happen if you don't drink enough fluid when you're sick or out in the heat. Misuse of diuretics (water pills) can also be a cause.

Symptoms include thirst, decreased urine output, and darker colored urine. You may also feel dizzy, weak, fatigued, or very drowsy. The diet described below is usually enough to treat dehydration. In some cases, you may need medicine.

Home care

- Drink at least 12, 8-ounce glasses of fluid every day to resolve the dehydration. Fluid may include water; orange juice; lemonade; apple, grape, or cranberry juice; clear fruit drinks; electrolyte replacement and sports drinks; and teas and coffee without caffeine. Don't drink alcohol. If you have been diagnosed with a kidney disease, ask your doctor how much and what types of fluids you should drink to prevent dehydration. If you have kidney disease, fluid can build up in the body. This can be dangerous to your health.
- If you have a fever, muscle aches, or a headache as a result of a cold or flu, you may take acetaminophen or ibuprofen, unless another medicine was prescribed. If you have chronic liver or kidney disease, or have ever had a stomach ulcer or gastrointestinal bleeding, talk with your healthcare provider before using these medicines. Don't take aspirin if you are younger than 18 and have a fever. In children with fever, aspirin raises the chance for severe liver injury and death.

Follow-up care

Follow up with your healthcare provider, or as advised.

When to seek medical advice

Call your healthcare provider right away if any of these occur:

- Continued vomiting
- Frequent diarrhea (more than 5 times a day); blood (red or black color) or mucus in diarrhea
- Swollen abdomen or increasing abdominal pain
- Reduced urine output or extreme thirst
- Fever of 100.4°F (38°C) or higher

Call 911

Call 911 or get medical care right away if you have any of the following:

- Weakness, dizziness, or fainting
- Unusual drowsiness or confusion
- Blood in vomit or stool

10/17/2023 - ED in UW Northwest Emergency (continued)

After Visit Summary (continued)

Suicide Prevention
If you or someone you know is thinking about harming themselves or attempting suicide, or if you feel unable to keep yourself safe, contact one of these resources:

· King County Crisis Connections 24-hour help line 1-866-427-4747 or go to www.crisisconnections.org

· National Suicide Prevention 24-hour help line #988 or go to suicidepreventionlifeline.org

For all medical or mental health emergencies, call 911, or go to the nearest emergency room for help.

Antibiotics & You
Antibiotics treat or prevent infections. If your provider prescribed this medicine for you, take it exactly as instructed. If you do not take it as prescribed, your infection can get worse or start to resist treatment. Please call your provider if you have problems taking your medicines, or if you have side effects.

Patient Information for Inclusion in the UW Medicine Patient Directory

Please Read this Statement Carefully

I understand that I have a choice as to whether or not to be included in the UW Medicine patient directory. My name and location will be included in the patient directory unless I would prefer not to receive phone calls or visitors. My decision is indicated by marking a box and signing this form.

☒ **YES, please include me in the Patient Directory.** The hospital has informed me that my name and location will be included in its hospital directory. This information will be made available to people who ask for me by name such as my relatives, friends and fellow employees.

- Harborview Medical Center
- University of Washington Medical Center – Northwest
- University of Washington Medical Center – Montlake / Fred Hutchinson Cancer Center
- Valley Medical Center

If I have provided my religious affiliation to UW Medicine in the past or if I provide my religious affiliation to UW Medicine now, I authorize its disclosure to clergy of my religious affiliation. Disclosure of my religious affiliation may result in a visit from a clergy member of my affiliation while I am being treated at UW Medicine.

If you have provided your religious affiliation to UW Medicine in the past and do not want a visit from a clergy member of your affiliation, please inform the registration staff.

☐ **NO, please do not include me in the Patient Directory.** I do not want my name or location included in the UW Medicine Patient Directory. **If this is my choice, I understand UW Medicine staff will not be able to confirm I am a patient or share my location with any family or friends. I also understand that by choosing not to be in the directory, UW Medicine will be unable to deliver items *(for example, flowers and gifts)* addressed to me.**

For Staff Use Only
☐ **ADMIN OPT-OUT:** Please provide reason for Administrative Opt-Out
☐ Crime Victim ☐ Employee ☐ Incarcerated Patient
☐ Involuntary Commitment ☐ Unable to Interview Patient ☐ Media Interest

Your ED Test Results

Test results will appear in your MyChart account as soon as they are available. Your ED physician/provider should have reviewed available results with you during your ED visit. However, you may think of other questions after your visit; some results may be difficult to interpret or understand. **If you have concerns or questions about your results, please contact your primary care physician's office.** If you do not have a primary care physician you can call 206-520-7520 Monday through Friday between the hours of 8am-5pm.

You will also be able to review your medical record from the emergency department visit once it is finalized. If you have reviewed your medical record and believe there is an error you may complete a Request for Correction or Amendment of the Medical Record form and submit it via mail, fax, or e-mail to the locations listed below.

Attached Information — Cellulitis, Discharge Instructions for (English)

Discharge Instructions for Cellulitis

You have been diagnosed with cellulitis. This is an infection in the deepest layer of the skin and tissue beneath the skin. In some cases, the infection also affects the muscle. Cellulitis is caused by bacteria. The bacteria can enter the body through broken skin. This can happen with a cut, scratch, animal bite, or an insect bite that has been scratched. You may have been treated in the hospital with antibiotics and fluids. You will likely be given a prescription for antibiotics to take at home. This sheet will help you take care of yourself at home.

Home care

When you are home:

- Take the prescribed antibiotic medicine you are given as directed until it is gone. Take it even if you feel better. It treats the infection and stops it from returning. Not taking all the medicine can make future infections hard to treat.
- Keep the infected area clean.
- When possible, raise the infected area above the level of your heart. This helps keep swelling down.
- Talk with your healthcare provider if you are in pain. Ask what kind of over-the-counter medicine you can take for pain.
- Apply clean bandages as advised.
- Take your temperature once a day for a week.
- Wash your hands often to prevent spreading the infection.

In the future, wash your hands before and after you touch cuts, scratches, or bandages. This will help prevent infection.

When to call your healthcare provider

Call your healthcare provider right away if you have any of the following:

- Trouble or pain when moving the joints above or below the infected area
- Discharge or pus draining from the area
- Fever of 100.4°F (38°C) or higher, or as directed by your healthcare provider
- Pain that gets worse in or around the infected
- Redness that gets worse in or around the infected area, particularly if the area of redness expands to a wider area
- Shaking chills
- Swelling of the infected area
- Vomiting

Attached Information — Dehydration (Adult) (English)

Dehydration (Adult)

Dehydration occurs when your body loses too much fluid. This may be the result of prolonged vomiting or diarrhea, excessive sweating, or a high fever. It may also happen if you don't drink enough fluid when you're sick or out in the heat. Misuse of diuretics (water pills) can also be a cause.

Symptoms include thirst, decreased urine output, and darker colored urine. You may also feel dizzy, weak, fatigued, or very drowsy. The diet described below is usually enough to treat dehydration. In some cases, you may need medicine.

Home care

- Drink at least 12, 8-ounce glasses of fluid every day to resolve the dehydration. Fluid may include water; orange juice; lemonade; apple, grape, or cranberry juice; clear fruit drinks; electrolyte replacement and sports drinks; and teas and coffee without caffeine. Don't drink alcohol. If you have been diagnosed with a kidney disease, ask your doctor how much and what types of fluids you should drink to prevent dehydration. If you have kidney disease, fluid can build up in the body. This can be dangerous to your health.
- If you have a fever, muscle aches, or a headache as a result of a cold or flu, you may take acetaminophen or ibuprofen, unless another medicine was prescribed. If you have chronic liver or kidney disease, or have ever had a stomach ulcer or gastrointestinal bleeding, talk with your healthcare provider before using these medicines. Don't take aspirin if you are younger than 18 and have a fever. In children with fever, aspirin raises the chance for severe liver injury and death.

Follow-up care

Follow up with your healthcare provider, or as advised.

When to seek medical advice

Call your healthcare provider right away if any of these occur:

- Continued vomiting
- Frequent diarrhea (more than 5 times a day); blood (red or black color) or mucus in diarrhea
- Swollen abdomen or increasing abdominal pain
- Reduced urine output or extreme thirst
- Fever of 100.4°F (38°C) or higher

Call 911

Call 911 or get medical care right away if you have any of the following:

- Weakness, dizziness, or fainting
- Unusual drowsiness or confusion
- Blood in vomit or stool

Suicide Prevention
If you or someone you know is thinking about harming themselves or attempting suicide, or if you feel unable to keep yourself safe, contact one of these resources:

· King County Crisis Connections 24-hour help line 1-866-427-4747 or go to www.crisisconnections.org

· National Suicide Prevention 24-hour help line #988 or go to suicidepreventionlifeline.org

For all medical or mental health emergencies, call 911, or go to the nearest emergency room for help.

Antibiotics & You
Antibiotics treat or prevent infections. If your provider prescribed this medicine for you, take it exactly as instructed. If you do not take it as prescribed, your infection can get worse or start to resist treatment. Please call your provider if you have problems taking your medicines, or if you have side effects.

Clinical Notes

Progress Notes

10/16/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Perez, Delmis Joel, RN at 10/16/2023 0940

Pt in clinic with son, Louis, for continued wound management. She presents with both legs wrapped with roll gauze and a thin paper pad. Both legs were wrapped with a wet towel slathered with Chlorhexidine soap.
Starting with the right leg, the lateral ankle wound has shrunk, 0.3 cm x 0. cm and has a thick scab which was debrided with the 4 mm curette. There are a few scattered cutaneous wounds on the shin. Two of the mid-shin cutaneous wounds were approximately 0.4 cm x 0.4 cm x 0.1 cm and were debrided with the 4 mm curette.
The left leg continues to have multiple wounds three, of which, have been previously detailed, and repeated below.

1. Left Medial Ankle: circular 3.0 cm x 2.0 cm x 0.2 cm with moist slough scattered throughout.
2. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 11 cm x 4.0 cm x 0.2-0.4 cm with moist slough scattered throughout.
3. Left Distal Lateral Shin: 4.0 cm x 3.0 cm x 0.1-0.3 cm with moist slough throughout.
4. Left Mid Shin: 3.0 cm x 2.0 cm x 0.2 cm irregular oval with moist slough throughout.
5. Left Mid Medial Shin: Resolved
6. Two mid shin small cutaneous: 0.5 cm x 0.5 cm x 0.1 cm and 0.8 cm x 0.5 cm x 0.1 cm, with moist eschar.

All LLE wounds were debrided with a 4 mm curette and gauze moistened with NS. The leg was a bit too moist today. Son advised to apply less Vaseline. Lidocaine 1% jelly was applied to wounds 3 & 4 as debriding them caused the pt much discomfort. TheraHoney Alginate was applied to the wounds above, covered with petrolatum gauze, adhered with small dabs of Vaseline, then wrapped with 6 inch roll gauze, and covered with Surgilast #5.5.

The right leg wounds had TheraHoney Alginate applied to each, covered with Telfa, wrapped with 4 inch roll gauze, and kept in place with Surgilast #5.5.

Appt scheduled in 1.5 weeks in conjunction with provider visit for further wound assessment and management.

Electronically signed by Perez, Delmis Joel, RN at 10/16/2023 12:16 PM

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

10/16/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

After Visit Summary (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

Documents (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

Progress Notes

10/09/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Perez, Delmis Joel, RN at 10/9/2023 0940

Pt in clinic with son, Louis, for continued wound management. She presents with both legs wrapped with roll gauze and a thin paper pad. NS was used to loosen where the roll gauze and paper pad were stuck to wounds on the Left Leg. The Right leg had no such issue. Both legs were wrapped with a wet towel slathered with Chlorhexidine soap. Starting with the right leg, the lateral ankle wound has shrunk, 0.5 cm x 0.5 cm and has a thick scab on it which did not respond to debriding with the 4 mm curette. There are a few scattered cutaneous wounds on the shin. The leg was very dry so Vaseline was applied throughout the lower extremity. Two of the mid-shin cutaneous wounds were approximately 0.7 cm x 0.7 cm x 0.2 cm and were debrided with the 4 mm curette.
The left leg continues to have multiple wounds three, of which, have been previously detailed, and repeated below.

1. Left Medial Ankle: circular 2.5 cm x 2.5 cm x 0.2 cm with moist slough scattered throughout.
2. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 11 cm x 3.5 cm x 0.2-0.4 cm with moist slough scattered throughout.
3. Left Distal Lateral Shin: 3.5 cm x 2.5 cm x 0.1 cm with moist slough throughout.
4. Left Mid Shin: 2.0 cm x 1.5 cm x 0.1 cm irregular oval with moist slough throughout.
5. Left Mid Medial Shin: 1.5 cm x 1.5 cm x 0.1 cm scabbed wound.
6. Two mid shin small cutaneous: 0.8 cm x 0.8 cm x 0.1 cm and 1.0 cm x 0.7 cm x 0.1 cm, with moist eschar.

All LLE wounds were debrided, including wound 5, with a 4 mm curette and gauze moistened with NS. This leg was also very dry prior to the towel and CHG being applied. The Left Distal Lateral Shin was very painful so the debriding with the curette was very light. TheraHoney Alginate was applied to the wounds above, covered with petrolatum gauze, adhered with Vaseline, then wrapped with 6 inch roll gauze, and covered with Surgilast #5.5.

The right leg wounds had TheraHoney Alginate applied to each, covered with Telfa, and kept in place with Surgilast #5.5.

Appt scheduled in 1 week for further wound management.

Electronically signed by Perez, Delmis Joel, RN at 10/9/2023 12:38 PM

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Clinical Notes

Progress Notes

Noeldner, Jessica P, RN at 9/22/2023 1000

Pt in clinic for wound management of stasis ulcers at BLE. She is accompanied by her son, Louis. Pt continues to endorse spasm like pain of her left leg. Pt is coming in 2 days after starting antibiotics for LE cellulitis. No borders are seen as pt has soaked legs and these lines that were marked during last visit are now gone. RN asked provider to assess legs to confirm incremental improvement in cellulitis. Both son and Dr. Smith agree that there has been marked improvement in 2 days. 3 pictures taken and uploaded to MyChart Media today prior to debridement.

Upon removal of the dressings to both lower extremities, pt's LLE appears pinkish red from just distal to the tibial tuberosity to the proximal superior foot. There continue to be several The Right Frontal Ankle wound looks similar in size but with some new slough to base. Several cutaneous wounds pepper both LEs.

Her four main wounds are:
1. Left Medial Ankle: circular 3.0 cm x 2.5 cm x 0.2 cm with moist slough scattered throughout.
2. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 10.5 cm x 2.3 cm x 0.2-0.4 cm with moist slough scattered throughout.
3. Left Proximal Shin: 3.5 cm x 2.5 cm x 0.1 cm with moist slough throughout.
4. Right Frontal Lateral Ankle: 0.5 cm x 0.5 cm x 0.2 cm with moist slough in its middle.

The wounds were moistened with NS, CHG soap, and gauze and debrided using a 4 mm curette and moistened gauze taking about 45 minutes total. There was scant bleeding. The peri wound areas of each were cleansed gently with gauze and NS. TheraHoney alginate was placed inside each wound and covered with petrolatum gauze, Telfa, and Surgilast #4.

Pt to return in 2 weeks for further follow up as recommended by provider to regular primary care RN who does wound care Q2weeks. Only need provider visit if wound not progressing as expected. Discussed this with pt and son, who agree.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

After Visit Summary (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

Clinical Notes

Progress Notes

Smith, Tanya Tinette, MD at 9/20/2023 1040

Jeanne Leonie Hoffman a 98 year old female presents today for possible cellulitis.

Called by RN to evaluate patient. Patient has hx of bilateral stasis ulcers. In for wound care with nurse. Nurse noted increased redness around the wounds on the L leg that as not present at thir last dressing changes. Patinets son has also noticed this. He also reports that she has more than usual L leg tenderness and pain.
No fever or chills. No increased drainage from the wounds.

Chart reviewed, patient has a hx of HTN, Type 2 DM (last A1C 1 year ago 6.2).
I personally reviewed and confirmed the past medical history and social history in the record with the patient today.

Medication list reviewed.

Objective:
Patient without distress in wheelchair.
Please see more detailed note from RN for description of ulcerations.
On L leg there is erythema extending up and laterally from the wounds with warmth and tenderness. No fluctuance.
Erythema is marked today.
L foot is warm.

Assessment and Plan:

(L03.116) Cellulitis of left lower extremity (primary encounter diagnosis)
Plan: Cephelexin 500mg qid x 7 days (ordered in separate encounter). Follow up in 1 -2 days to recheck, sooner if worse.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

After Visit Summary (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 9/20/2023 0940

Pt in clinic for wound management of stasis ulcers at BLE. She is accompanied by her son, Louis. Pt continues to endorse spasm like pain of her left leg. Son indicates he'd starting using hand sanitizer on both LEs which has helped the RLE improve significantly.

Upon removal of the dressings to both lower extremities, pt's LLE appears a deep red from just distal to the tibial tuberosity to the proximal superior foot. There continue to be several The Right Frontal Ankle wound has decreased in size. Several cutaneous wounds pepper both LEs.

Her four main wounds are:
1. Left Medial Ankle: circular 3.0 cm x 2.5 cm x 0.2 cm with moist eschar throughout.
2. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 10.5 cm x 2.3 cm x 0.2-0.4 cm with moist eschar throughout.
3. Left Proximal Shin: 3.5 cm x 2.5 cm x 0.1 cm with moist eschar throughout.
4. Right Frontal Lateral Ankle: 0.5 cm x 0.5 cm x 0.2 cm with moist eschar in its middle.

The wounds were moistened with NS, CHG soap, and gauze and debrided using a 4 mm curette and moistened gauze taking about 55 minutes total. There was scant bleeding. The peri wound areas of each were cleansed gently with gauze and NS. TheraHoney alginate was placed inside each wound and covered with petrolatum gauze (not on RLE wound), Telfa, and Surgilast #4.

HH provider assessed the leg for the possible cellulitis agreeing with the report and ordering an antibiotic. Pt to return in 2 days for further follow up.

Electronically signed by Perez, Delmis Joel, RN at 9/20/2023 11:41 AM

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

09/20/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

After Visit Summary (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

Stopped in Visit

09/06/2023 - Clinical Support Visit in Husky Health Same Day Clinic (continued)

Medication List (continued)

None

Clinical Notes

Progress Notes

Brighton, Marcelle, RN at 9/6/2023 1000

Immunization Documentation

98 year old - Is this patient eligible for VFC or Adult supply vaccine? **Adult**

Interpreter: No

Has patient ever fainted after receiving vaccine/blood draw? : No [If YES, pt should be lying down to receive vaccine]

Vaccine Screening Questions

1	Are you allergic to Latex?	NO
2	Have you had a serious reaction or an allergic reaction to a vaccine?	NO
3	Do you currently have a moderate or severe illness, including fever?	NO
4	Are you pregnant or planning to become pregnant?	NO (Note: If YES: HPV and Heplisav are contraindicated in pregnancy. Consult with provider prior to giving PPSV23/PCV15/PCV20, HepA, Hib, MenACWY or MenB)
5	Have you ever had a seizure or any neurological problem associated with a vaccine? *(DTaP/TDaP/DTP pertinent)*	NO
6	Is patient receiving any **LIVE** vaccinations today? *(Varicella-Chickenpox, MMR-Measles/Mumps/Rubella, Zoster-Shingles, Flumist, Yellow Fever)* *NOTE: oral rotavirus is exempt*	No [determine need for TB screening if getting live virus vaccine] **NOTE:** • If **YES** to any of the questions above – Do **NOT** give vaccine. Consult with RN or provider in clinic. (#5 can be YES if all Live vaccine questions are answered NO) 1. • If **NO** to all questions above - Patient may receive vaccine. 2.

09/06/2023 - Clinical Support Visit in Husky Health Same Day Clinic (continued)

Clinical Notes (continued)

7	Do you need to receive the Flu vaccine today?	YES - Additional Flu Questions **Flu Vaccine Screening Questions:** Ever had Guillain-Barre syndrome associated with a vaccine? NO Less than 6 months old? NO If **YES** to any of the *Flu* questions above - NO Flu Vaccine to be given. Patient may consult provider as needed. If **NO** to all questions above - Patient may receive Flu Shot (IM) Is the patient requesting Flumist? NO If between 6 months and 8 years of age, was flu vaccine received last year? N/A If **NO** to above question: • Children who are receiving influenza vaccine for the first time - administer 2 doses of the current influenza vaccine (separated by at least 4 weeks). [provide egg-free vaccine to anyone with anaphylactic reaction to eggs]

Imms administered today: **Influenza (high dose)**

All patients are encouraged to wait 15 minutes before leaving after receiving any vaccine.

VIS given 9/6/2023 by Marcelle Brighton, RN

Was Jeanne Leonie Hoffman alert, oriented, and without adverse reaction after the vaccine was given Yes

Marcelle Brighton, RN

Electronically signed by Brighton, Marcelle, RN at 9/6/2023 1:29 PM

Noeldner, Jessica P, RN at 9/6/2023 1000

Pt in clinic for wound management of stasis ulcers at BLE. She is accompanied by her son and caregiver, Louis. Pt continues to endorse spasm like pain of her left leg. Briefly had cramping after wound care was complete when lowering leg to chair.

dressings to both lower extremities was removed and slough notably covering most all wound bed areas, intact skin shiny and dry with some scaly pealing skin. All areas were cleansed with washcloths moistened with warm tap water and chlorhexidine soap. Wounds wrapped in wet washcloths and allowed to soak and soften for 15 minutes.

09/06/2023 - Clinical Support Visit in Husky Health Same Day Clinic (continued)

Clinical Notes (continued)

Her four deeper wounds are:

3. Left Medial Ankle: circular 3.5 cm x 3.0 cm x 0.2 cm with moist slough throughout.
4. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, almost blending together, but measured separately: 10.5 cm x 2.5 cm 0.3 cm and 7.5 cm x 3 cm x 0.2-0.4 cm with moist slough scattered throughout, and edges thickened with calloused skin, respectively.
5. Left Proximal Shin w/ two distinct circular areas: 2.5 cm x 2 cm x 0.1 cm and 1 cm x 2 cm x 0.1 cm with moist slough throughout.
6. Right Frontal Lateral Ankle: 1 cm x 1 cm x 0.2 cm with moist slough in center.
7. Right shin: 1 cm x 1 cm x 0.1 cm with moist slough in center.

The wounds were moistened with NS, CHG soap, and gauze and debrided using a 4 mm curette and moistened gauze taking about 60 minutes total. There was scant bleeding. The peri wound areas of each were cleansed gently with gauze and NS. TheraHoney alginate was placed inside each wound and covered with petrolatum gauze, wrapped in tube gauze and mesh sleeve secured with coban at top and replaced pt's socks/shoes over. Pt to return in 2 weeks for further wound care.

Jessica Noeldner MN, RN

Electronically signed by Noeldner, Jessica P, RN at 9/6/2023 1:29 PM

Brighton, Marcelle, RN at 9/6/2023 1000

During visit pt mentions discomfort on lower back that started recently. She feels her back is "crooked". Hurts to sit and has to sleep on side. She mentions 2 "bumps". Son hasn't looked at area yet as she doesn't often agree to shower or bathe.

Checked area minimally while sitting in wheelchair. No evidence of skin breakdown but there were 1-2 prominent bony protrusions seen, one on lower R back and possible second lump on lower left back. Son will investigate tonight and will send pictures to determine need for separate appointment with provider.

Marcy Brighton, RN/BSN

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

After Visit Summary (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

08/23/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Perez, Delmis Joel, RN at 8/23/2023 0920

Pt in clinic for wound management of stasis ulcers at BLE. She is accompanied by her son, Louis. Pt continues to endorse spasm like pain of her left leg.

Upon removal of the dressings to both lower extremities, there's a new proximal left calf wound and the 2 left lateral ankle and superior foot wounds have coalesced into one long wound. These were cleansed with washcloths moistened with warm tap water and chlorhexidine soap. None were bandaged further.

Her four deeper wounds are:
1. Left Medial Ankle: circular 2.5 cm x 1.7 cm x 0.2 cm with moist eschar throughout.
2. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 12 cm x 3 cm x 0.2-0.4 cm with moist eschar throughout.
3. Left Proximal Shin: 3.5 cm x 3 cm x 0.1 cm with moist eschar throughout.
4. Right Frontal Lateral Ankle: 1.2 cm x 1.2 cm x 0.2 cm with moist eschar in its middle.

The wounds were moistened with NS, CHG soap, and gauze and debrided using a 4 mm curette and moistened gauze taking about 45 minutes total. There was scant bleeding. The peri wound areas of each were cleansed gently with gauze and NS. TheraHoney alginate was placed inside each wound and covered with petrolatum gauze (not on RLE wound), Telfa, and Surgilast #4. Pt to return in 2 weeks for further wound care.

Electronically signed by Perez, Delmis Joel, RN at 8/23/2023 10:49 AM

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

After Visit Summary (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

Clinical Notes (continued)

Perez, Delmis Joel, RN at 8/2/2023 0940

Pt in clinic for wound management of stasis ulcers now at BLEs. She is accompanied by her son, Louis. Pt continues to endorse spasm like pain of her left leg.

Upon removal of the dressings to both lower extremities, there continues to be various scrapes or pulled skin but fewer than last week which are not described below. These were cleansed with washcloths moistened with warm tap water and chlorhexidine soap. None were bandaged further.

Her four deeper wounds are:

1. Left Medial Ankle: circular 3.0 cm x 2.0 cm x 0.2 cm with moist eschar throughout.
2. Left Proximal Lateral Ankle: irregular oval in a 8-3 o'clock orientation above the ankle, 4.0 cm x 1.8 cm x 0.2-0.4 cm with moist eschar throughout.
3. Left Superior Lateral Foot: 6.8 cm x 2 cm x 0.2-0.4 cm, irregularly shaped, moist eschar throughout, with thick scarring at the distal inferior edge, moderate maceration throughout the perimeter, and an approximately 2 cm area of necrotic tissue at the wound's frontal aspect.
4. Right Frontal Lateral Ankle: 1.0 cm x 1.0 cm x 0.2 cm with moist eschar in its middle.

The wounds were moistened with NS and gauze and debrided using a 4 mm curette and moistened gauze taking about 45 minutes total. There was scant bleeding. The peri wound areas of each were cleansed gently with gauze and NS. TheraHoney alginate was placed inside each wound and covered with petrolatum guaze, petrolatum jelly, and Telfa (not used on the RLE wound. Kerlix was used to cover both lower extremities and 3 inch ace wraps to hold the dressings in place. Pt to return in 3 weeks for further wound care.

07/26/2023 - Health Maintenance Letter

Letters

Reminder by Uw Mychart, Patient User on 7/26/2023

Status: Sent
Letter body:

Dear Jeane Hoffman,

Thank you for choosing UW Medicine! Your Primary Care Provider, William E Neighbor, MD, would like for you to schedule your Annual Wellness Visit; a no-cost preventative care benefit offered by Medicare. Your healthcare team believes this opportunity extends your options for maintaining and maximizing good health.

What is the Annual Wellness Visit?

This visit consists of a health risk assessment - a provider consultation where you discuss your health needs and risks with the provider. You can also help create a personalized preventative care plan to keep you healthy. We will review your list of medications and compile a list of your current healthcare providers. Other services may be combined with this visit; however, there may be additional charges.

William E Neighbor, MD would like for you to have this visit done in-person or via Telemedicine if you prefer. You can schedule the first visit with your PCP and subsequently with a Care Manager on their team as agreed with the PCP.

To schedule your Annual Wellness Visit, please click here.

If you've already had your Annual Wellness Visit completed or if you are receiving routine medical care elsewhere, please contact the clinic at 206-685-1011 or click here to send us a message so that we can update our records.

We appreciate the trust you put in us to take care of your healthcare needs.

Sincerely,

Your Clinical Care Team
UW Medicine Primary Care

Medication List (continued)

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 7/19/2023 1000

Pt in clinic for wound management of stasis ulcers now at BLEs. She is accompanied by her son, Louis. Pt endorses picking off a long piece of skin from distal wound 3.

Upon removal of the dressings to both lower extremities, along with the wounds of the 6/20/2023 visit, there are various scrapes or pulled skin around all of the wounds. These were all cleansed with washcloths moistened with warm tap water and chlorhexidine soap. None were bandaged further. Her four wounds are:

1. Left Medial Ankle: circular 2.7 cm x 2.2 cm x 0.2 cm with moist eschar throughout.
2. Left Proximal Lateral Ankle: irregular oval in a 8-3 o'clock orientation above the ankle, 4.2 cm x 1.8 cm x 0.2-0.4 cm with moist eschar throughout.
3. Left Superior Lateral Foot: 6.8 cm x 2 cm x 0.2-0.4 cm, irregularly shaped, moist eschar throughout, with thick scarring at the distal inferior edge, moderate maceration throughout the perimeter, and an approximately 2 cm area of necrotic tissue at the wound's frontal aspect.
4. Right Frontal Lateral Ankle: 1.0 cm x 1.0 cm x 0.2 cm with moist eschar in its middle.

The skin over the Left Shin had multiple peripheral shallow wounds which were not addressed today. Directed the son not to let the skin become too moist.

The wounds were moistened with NS and gauze and debrided using a 4 mm curette and moistened gauze taking about 45 minutes total. There was scant bleeding. The peri wound areas of each were cleansed gently with gauze and NS. TheraHoney sheet was placed over each wound and covered with petrolatum, petrolatum gauze, and Telfa (not used on the RLE wound. Kerlix was used to cover both lower extremities and a surgical sleeve was placed over the LLE. Pt to return in 2 week for further wound care.

Electronically signed by Perez, Delmis Joel, RN at 7/19/2023 12:04 PM

07/19/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Documents (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

acetaminophen 500 MG Oral Tab

Discontinued by: Van Hoff, Linda A, ARNP — Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions:
1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
Entered by: Taylor, Zoe Judith Mildred, MD — Entered on: 8/20/2019
Start date: 8/5/2019 — End date: 6/12/2024
Action: Patient not taking

Calcium Carbonate 500 MG Oral Chew Tab

Discontinued by: Clark, Trika L, Pharmacy Technician — Discontinued on: 1/9/2025
Reason for discontinuation: Discontinued by patient
Instructions: Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.
Entered by: Taylor, Zoe Judith Mildred, MD — Entered on: 8/20/2019
Start date: 8/5/2019 — End date: 1/9/2025

Cholecalciferol 1000 units Oral Tab

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.
Entered by: Taylor, Zoe Judith Mildred, MD — Entered on: 8/20/2019
Start date: 8/20/2019 — End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA — Entered on: 9/4/2019
End date: 3/8/2025 — Informant: Patient Reported

ofloxacin 0.3 % ophthalmic solution

Discontinued by: Van Hoff, Linda A, ARNP — Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup

07/05/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Medication List (continued)

Instructions: Place 1-2 drops into left EYE 4 times a day.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 10/10/2022
Start date: 10/10/2022 — End date: 6/12/2024
Action: Patient not taking — Quantity: 5 mL
Refill: 1 refill by 10/10/2023

losartan 25 MG tablet

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 8/24/2023
Instructions: TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY
Authorized by: Neighbor Jr., William E, MD — Ordered on: 12/1/2022
Start date: 12/1/2022 — End date: 8/24/2023
Quantity: 45 tablet — Refill: 2 refills by 12/1/2023

atorvastatin 10 MG tablet

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 1/3/2024
Instructions: Take 1 tablet (10 mg) by mouth daily.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 12/13/2022
Start date: 12/13/2022 — End date: 1/3/2024
Quantity: 90 tablet — Refill: 3 refills by 12/13/2023

pentoxifylline ER 400 MG ER tablet

Discontinued by: Kauffman, Mary Johanna Kelly, MD — Discontinued on: 9/19/2023
Instructions: take 1 tablet by mouth three times a day
Authorized by: Neighbor Jr., William E, MD — Ordered on: 1/23/2023
Start date: 1/23/2023 — End date: 9/19/2023
Quantity: 90 tablet — Refill: 6 refills by 1/23/2024

Wound Dressings (medihoney) topical gel

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: Apply topically daily. Apply to ulcerations on legs. Apply dressing over the Medi Honey.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 2/9/2023
Start date: 2/9/2023 — End date: 3/8/2025
Quantity: 88 mL — Refill: 6 refills by 2/9/2024

timolol maleate 0.5 % ophthalmic solution

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 4/10/2024
Instructions: instill 1 drop into both eyes twice a day
Authorized by: Neighbor Jr., William E, MD — Ordered on: 2/24/2023
Start date: 2/24/2023 — End date: 4/10/2024
Quantity: 10 mL — Refill: 6 refills by 2/24/2024

triamcinolone 0.1 % cream

Discontinued by: Van Hoff, Linda A, ARNP — Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Apply topically 2 times a day. Apply to both forearms.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 4/5/2023
Start date: 4/5/2023 — End date: 6/12/2024
Action: Patient not taking — Quantity: 28.4 g
Refill: 1 refill by 4/4/2024

Wound Dressings (medihoney) topical gel

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: Apply topically every other day. Apply to wound before applying dressing
Authorized by: Neighbor Jr., William E, MD — Ordered on: 4/26/2023
Start date: 4/26/2023 — End date: 3/8/2025
Quantity: 44 mL — Refill: 4 refills by 4/25/2024

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 7/5/2023 0940

Pt in clinic for wound management of stasis ulcers now at BLEs. She is accompanied by her son, Louis. Both pt and son endorse and complain about various aspects of home wound care including daily dressing changes, cleansing the areas with washcloths, leaving the wounds open to the air for periods of time (30 minutes/day recommended), scratching at the wounds, pulling off skin tags, increasing protein intake, putting cotton socks on after the dressing has been removed which dry to the wounds, etc. These are common reports from each. Encouraged son not to push too hard and pt to verbalize more when she's reached her limit, as in, "Thank you for pushing me to do things. I'm at my limit for now."

Pt endorses the right leg nerve and muscle spasms being severe enough that she takes up to 5 Acetaminophen 500 mg tablets over a short period to control the pain. She reports taking one, then another, and so on up to 5, until the spasms stop. It was explained that it takes up to 40 minutes to feel relief from the first tablet and taking 5 Acetaminophen 500 mg tablets in, essentially, one dosing is unsafe. Will alert her PCP of this. These spasms have occurred occasionally during the dressing changes, including today, and usually resolve within 10-15 seconds.

Upon removal of the dressings to both lower extremities, along with the wounds of the 6/20/2023 visit, there are various scrapes or pulled skin around all of the wounds. These were all cleansed with washcloths moistened with warm tap water and chlorhexidine soap. None were bandaged further. Her four wounds are:

1. Left Medial Ankle: circular 3.0 cm x 2.5 cm x 0.2 cm with moist eschar throughout and a small area of necrotic maceration in the 5 o'clock area.
2. Left Proximal Lateral Ankle: irregular oval in a 8-3 o'clock orientation above the ankle, 4.5 cm x 2 cm x 0.2-0.4 cm with moist eschar throughout. Mildly macerated through 80% of perimeter.
3. Left Superior Lateral Foot: 7.0 cm x 2 cm x 0.2-0.4 cm, 1 cm narrowing at the 2.5-3 cm, irregularly shaped, moist eschar throughout, with thick scarring at the distal inferior edge, moderate maceration throughout the perimeter, and an approximately 2 cm area of necrotic tissue at the wound's frontal aspect.
4. Right Frontal Lateral Ankle: 1.0 cm x 0.8 cm x 0.2 cm with moist eschar in its middle.

The wounds were moistened with NS and gauze and debrided using a 4 mm curette and moistened gauze taking about 45 minutes total. There was scant bleeding. The peri wound areas of each were cleansed gently with gauze and NS. TheraHoney sheet was placed over each wound and covered with petrolatum gauze and petrolatum. Kerlix was used to cover the site and petrolatum applied over the wound areas. A surgical sleeve was placed over the entire dressing. Pt to return in 2 week for further wound care.

Neighbor Jr., William E, MD at 7/5/2023 0940

Patient was briefly seen during the nurse visit. Because of the persistence of the left lateral ankle ulceration we will obtain x-ray imaging to assure absence of bone involvement.

Diagnoses
Lower extremity ulceration, left, limited to breakdown of skin (HCC) [L97.921]

Questionnaire

Question	Answer
Reason for exam (include signs, symptoms, diagnosis, and medical history)?	persistent lateral ankle ulceration rule out bone involvement.
Does the patient require sedation or anesthesia?	None
Release Result to Patient	Immediate

Indications

Lower extremity ulceration, left, limited to breakdown of skin (HCC) [L97.921 (ICD-10-CM)]

XR Ankle 3+ View Left Resulted: 11/15/23 1043, Result status: Final result

Ordering provider: Neighbor Jr., William E, MD 11/15/23 0941 Order status: Completed
Resulted by: Richardson, Michael Lewellyn, MD Filed by: Interface, Radiology Results In 11/15/23 1046
Performed: 11/15/23 0942 - 11/15/23 1002 Accession number: 40259263
Resulting lab: UW RADIOLOGY
Narrative:
EXAMINATION:
XR ANKLE 3+ VW LEFT

CLINICAL INDICATION:
persistent lateral ankle ulceration rule out bone involvement.

COMPARISON: 4/25/17

FINDINGS:

Small vessel calcification raises the question of diabetes mellitus vs chronic renal disease.

Dystrophic calcifications again noted in the achilles tendon and plantar fascia.

Prominent osteoarthritis again noted in the talonavicular joint.

No specific radiographic evidence of osteomyelitis.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Clinical Notes

Progress Notes

Brighton, Marcelle, RN at 6/20/2023 1020

Pt in clinic for bimonthly wound management of stasis ulcers of her Left Lower Extremity (LLE) and Right lower extremity (RLE). Pt has 3 main LLE wounds and one new small superficial wound forming on back of LLE . She also reports new wound forming on R medial malleolus. Overall pt doing well though complains on ongoing R knee pain that bothers her more than her stasis ulcers.

1. Medial ankle: circular 3.5 cm x 2.5 cm x 0.1 cm with smooth edges and minimal amounts of slough noted along perimeter of wound bed.

2. Proximal lateral ankle: irregular oval in a 8-3 o'clock orientation above the ankle, 5 cm x 2.5 cm x 0.1 cm - 0.2 cm smoothed edge above the 3 o'clock zone. Scant slough along wound bed perimeter.

3. Superior lateral foot: 7.5 cm x 2 cm x 0.2 cm.

4. L inferior calf superficial wound, 2.0 cm.

No signs of infection present. Pt tolerated wound care well.

The wounds were moistened with NS and gauze and debrided using a 4 mm curette and moistened gauze taking about 45 minutes total. There was scant bleeding. The peri wound areas of each were cleansed gently with gauze and NS. TheraHoney sheet was placed over each wound and covered with petrolatum. Kerlix was used to cover the site and petrolatum applied over the wound areas. A surgical sleeve was placed over the entire dressing. Pt to return in 2 week for further wound care.

Marcy Brighton, RN/BSN

After Visit Summary (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

05/24/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Perez, Delmis Joel, RN at 5/24/2023 1020

Pt in clinic for biweekly wound management of stasis ulcers of her Left Lower Extremity (LLE), of which she now has the 3 main ones and a new one above the proximal lateral ankle.

1. Medial ankle: circular 2.8 cm x 2.5 cm x 0.2 cm with moist eschar throughout, the 4-6 o'clock area has smoothed out and no longer has a rim.
2. Proximal lateral ankle: irregular oval in a 8-3 o'clock orientation above the ankle, 5 cm x 2 cm x 0.2-0.4 cm with moist eschar throughout, smoothed edge above the 3 o'clock zone.
3. Superior lateral foot: 7.5 cm x 2 cm x 0.2-0.4 cm, 1 cm narrowing at the 2.5-3 cm, irregularly shaped, moist eschar throughout, with thick scarring at the distal inferior edge. The edges are smoothening in various superior areas toward the front of the wound.
4. Mid Lateral Calf 4 cm superior to the proximal lateral ankle wound, 1 cm x 0.8 cm x 0.3 cm, with moist eschar in the middle.

The wounds were moistened with NS and gauze and debrided using a 4 mm curette and moistened gauze taking about 45 minutes total. There was scant bleeding. The peri wound areas of each were cleansed gently with gauze and NS. TheraHoney sheet was placed over each wound and covered with petrolatum. Kerlix was used to cover the site and petrolatum applied over the wound areas. A surgical sleeve was placed over the entire dressing. Pt to return in 2 week for further wound care.

05/24/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

After Visit Summary (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

AFTER VISIT SUMMARY

Jeane L. Hoffman MRN: U8170135 5/24/2023 10:20 AM Hall Health Primary Care Center 206-685-1011

Today's Visit

You saw Delmis P, RN on Wednesday May 24, 2023 for: Wound Check/Dressing Change and RN45.

What's Next

JUN 20 2023

Return Patient Appointment with William E Neighbor, MD
Tuesday June 20 9:40 AM (Arrive by 9:25 AM)

Masks will continue to be required for all patients, visitors and staff in patient areas to protect the health and safety of our patients, who are often at a higher-risk for infection and more likely to experience adverse health effects due to COVID-19, RSV, influenza and other respiratory viruses.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.
