Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 5/24/2023 0940

Jeanne Leonie Hoffman is a 98 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  BP and wound check

Visit type (in person vs telemedicine vs phone): In person

History:

Jeanne is brought in by her son Louis today as usual. Louis reports that they have been changing dressings as directed and have sufficient dressing supplies. His impression is that there has been improvement in the ulcerations. Jean has her hearing aids in place today. She reports that last night she had quite a bit of discomfort in the leg which resolved today. She is not certain what caused this. This has not been a recurring pattern in the last couple of weeks. There is been no fever chills or night sweats.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- Hypercholesterolemia [E78.00] 11/20/2006

On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006

LS spine. Bilateral talonavicular arthritis since 1994.

05/24/2023 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

- Essential hypertension, benign [I10] 11/20/2006

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

After Visit Summary (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

Instructions: Take 1 tablet (10 mg) by mouth daily.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/13/2022
Start date: 12/13/2022
End date: 1/3/2024
Quantity: 90 tablet
Refill: 3 refills by 12/13/2023

pentoxifylline ER 400 MG ER tablet

Discontinued by: Kauffman, Mary Johanna Kelly, MD
Discontinued on: 9/19/2023
Instructions: take 1 tablet by mouth three times a day
Authorized by: Neighbor Jr., William E, MD
Ordered on: 1/23/2023
Start date: 1/23/2023
End date: 9/19/2023
Quantity: 90 tablet
Refill: 6 refills by 1/23/2024

Wound Dressings (medihoney) topical gel

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Apply topically daily. Apply to ulcerations on legs. Apply dressing over the Medi Honey.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/9/2023
Start date: 2/9/2023
End date: 3/8/2025
Quantity: 88 mL
Refill: 6 refills by 2/9/2024

timolol maleate 0.5 % ophthalmic solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/10/2024
Instructions: instill 1 drop into both eyes twice a day
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/24/2023
Start date: 2/24/2023
End date: 4/10/2024
Quantity: 10 mL
Refill: 6 refills by 2/24/2024

triamcinolone 0.1 % cream

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Apply topically 2 times a day. Apply to both forearms.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/5/2023
Start date: 4/5/2023
End date: 6/12/2024
Action: Patient not taking
Quantity: 28.4 g
Refill: 1 refill by 4/4/2024

Wound Dressings (medihoney) topical gel

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Apply topically every other day. Apply to wound before applying dressing
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/26/2023
Start date: 4/26/2023
End date: 3/8/2025
Quantity: 44 mL
Refill: 4 refills by 4/25/2024

Adult Follow-Up Audiological Evaluation

NAME: Jeanne Leonie Hoffman
DOB: 1/6/1925
MRN: U8170135

Primary Physician: Neighbor Jr., William E, MD
Date of Service: 5/15/2023
Name of Provider: Anne Elizabeth Harvey, AUD

HISTORY:
Jeanne Leonie Hoffman, a 98 year old female, was seen on 5/15/2023 for an updated audiological evaluation, and was accompanied to this appointment by her son. Today she reported that her hearing aids have begun malfunctioning, but that she unfortunately forgot to bring them to this visit for inspection. Additional history is as follows:

- **Previous hearing evaluation:** Yes; most recently on 06/05/2019 at the UW Speech and Hearing Clinic demonstrating a severe to profound possibly mixed (note masking dilemmas) hearing loss from 250-8000Hz in the left ear, and a profound possibly mixed (note masking dilemmas) hearing loss from 250-8000Hz in the right ear.
- **Communication impact:** Yes; unable to communicate without hearing aids
- **Ear infections/drainage:** No
- **Ear fullness/pressure:** No
- **Ear pain:** No
- **Ear surgery:** No
- **Dizziness or vertigo:** Yes; fainting spells with back injury
- **Tinnitus:** No
- **Noise exposure:** Unknown
- **Hearing aid/cochlear implant use:** Yes; fit with left Phonak Naida S IX SP hearing aid in August 2016, and a right Phonak Ambra BTE SP in June 2019 through the UW Speech and Hearing Clinic's HAAP program
- **Family history of hearing loss:** Unknown

Patient Active Problem List
Diagnosis
- Sensorineural hearing loss, unspecified
- Hypercholesterolemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)

- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- History of recurrent deep vein thrombosis (DVT)
- Imbalance
- Primary osteoarthritis of both hips
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Primary open angle glaucoma (POAG) of both eyes

RESULTS:

Otoscopic Evaluation:

Right Ear: Clear EAC, visualized TM
Left Ear: Non-occluding cerumen, visualized TM

Audiologic Evaluation: All thresholds tested down to -10 dBHL when applicable. Audiogram scanned under Media tab in Epic:

Right Ear: Severe to profound possibly mixed hearing loss from 125-8000Hz (note masking dilemmas)
Left Ear: Severe to profound possibly mixed hearing loss from 125-8000Hz (note masking dilemmas)

Results were obtained today using: insert earphones and TDH headphones

Speech Reception Threshold (SRT):

Right Ear: 95 dBHL
Left Ear: 85 dBHL

Word Recognition Score (WRS): 50-word lists used

Right Ear: 76% at 115 dBHL, indicating fair word recognition scores
Left Ear: 68% at 110 dBHL (limits of transducer on this side), indicating fair word recognition scores

Tympanometry:

Right ear: Type A tympanogram showing normal tympanic membrane mobility, normal middle ear pressure, and normal ear canal volume.

Left ear: Type C tympanogram showing normal tympanic membrane mobility, significant negative tympanometric peak pressure (-240 daPa), and normal ear canal volume.

IMPRESSIONS:

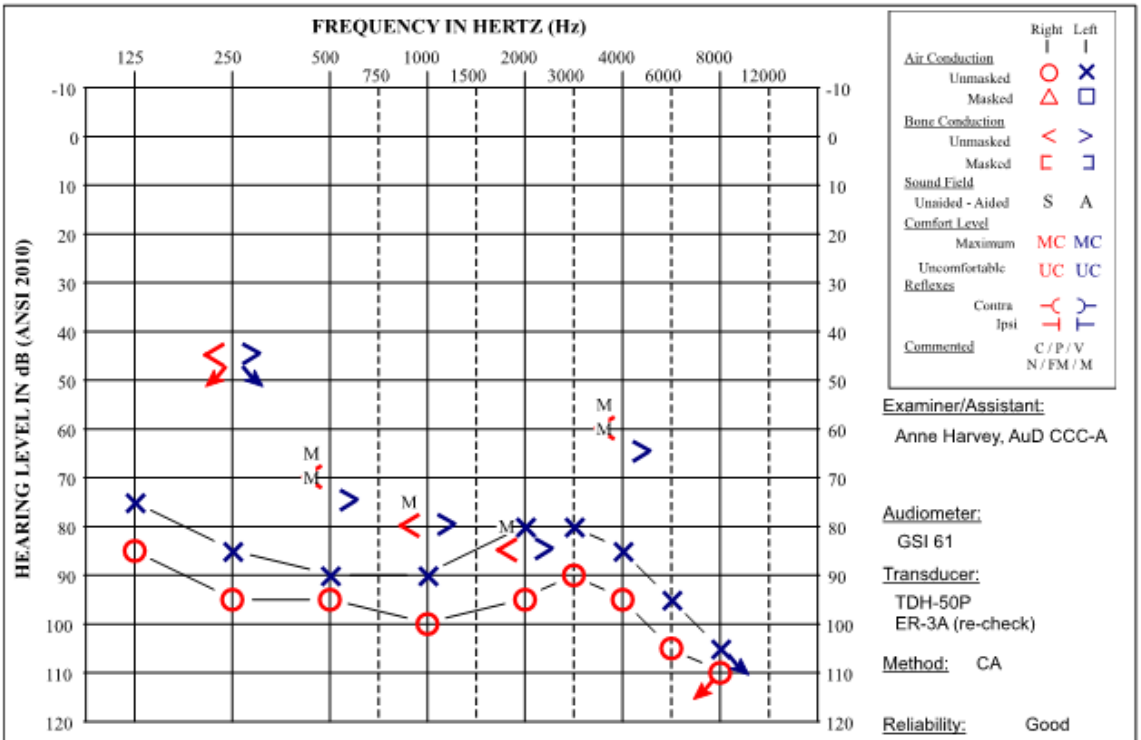
Jeanne Leonie Hoffman was seen on 5/15/2023 for an updated audiological evaluation. Results today showed a severe to profound possibly mixed hearing loss from 125-8000Hz (note masking dilemmas) bilaterally, right ear slightly worse than left across most frequencies. Speech thresholds were in agreement with pure tone thresholds, suggesting good reliability of results. In comparison with previous testing in June 2019, audiometric thresholds were stable (within 10dB) bilaterally with the exception of a 15dB decrease in hearing sensitivity at 8000Hz for the left ear. A significant improvement in word recognition scores was also observed bilaterally (44% to 68% for the left ear, and 52% to 76% for the right ear).

RECOMMENDATIONS:

1. Consider ENT consultation for negative tympanometric peak pressure in the left ear and possible mixed components to hearing loss bilaterally.

05/15/2023 - Office Visit in UW Medicine Montlake Audiology (continued)

Clinical Notes (continued)



2. Troubleshooting of current hearing aid function and/or consider consultation for updated hearing aid technology. Jeanne has a hearing aid benefit through HearUSA, and was provided with the contact information for two clinics in the Seattle area.
3. Continue with full-time, consistent use of amplification during waking hours.
4. Audiologic re-evaluation in approximately 1 year, or sooner in conjunction with otologic management/as medically indicated.
5. Continue under the care of patient's care team.

Today's results and treatment plan were discussed with the patient with regard to their specific complaints. The patient was given the opportunity to ask questions and was answered appropriately.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Medication List (continued)

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 5/10/2023 1000

Pt in clinic for wound management of stasis ulcers of her Left Lower Extremity (LLE), of which she now has 3 main ones, the mid-calf ulcer was closed.

1. Medial ankle: circular 3 cm x 2.5 cm x 0.2 cm with moist eschar throughout.
2. Proximal lateral ankle: oval 5.5 cm x 2.8 cm x 0.2-0.4 cm with moist eschar throughout.
3. Superior lateral foot: 7.5 cm x 2 cm x 0.2-0.4 cm, 1 cm narrowing at the 2.5-3 cm, irregularly shaped, moist eschar throughout, with thick scarring at the distal inferior edge.

The wounds were moistened with NS and gauze and debrided using a 4 mm curette and moistened gauze taking about 50 minutes total. There was scant bleeding. The peri wound areas of each were cleansed gently with gauze and NS. TheraHoney sheet was placed over each wound and covered with oiled gauze. Kerlix was used to cover the site and petrolatum applied over the wound areas. A surgical sleeve was placed over the entire dressing. Pt to return in 2 week for further wound care.
At the end of the visit, pt's son asked about getting the COVID Bivalent booster per the new guidelines. This was administered as below and the MAR with the pt's permission.

Immunization Documentation

98 year old - Is this patient eligible for VFC or Adult supply vaccine? **Adult**

Interpreter: No

Has patient ever fainted after receiving vaccine/blood draw? : No [If YES, pt should be lying down to receive vaccine]

Vaccine Screening Questions

1	Are you allergic to Latex?	NO
2	Have you had a serious reaction or an allergic reaction to a vaccine?	NO
3	Do you currently have a moderate or severe illness, including fever?	NO
4	Are you pregnant or planning to become pregnant?	NO (Note: If YES: HPV and Heplisav are contraindicated in pregnancy. Consult with provider prior to giving PPSV23/PCV15/PCV20, HepA, Hib, MenACWY or MenB)
5	Have you ever had a seizure or any neurological problem associated with a vaccine?	NO

05/10/2023 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

	(DTaP/TDaP/DTP pertinent)	
6	Is patient receiving any **LIVE** vaccinations today? *(Varicella-Chickenpox, MMR-Measles/Mumps/Rubella, Zoster-Shingles, Flumist, Yellow Fever)* *NOTE: oral rotavirus is exempt*	No [determine need for TB screening if getting live virus vaccine] **NOTE:** • If **YES** to any of the questions above – Do **NOT** give vaccine. Consult with RN or provider in clinic. (#5 can be YES if all Live vaccine questions are answered NO) • If **NO** to all questions above - Patient may receive vaccine.
7	Do you need to receive the Flu vaccine today?	NO

Imms administered today: **COVID-19 mRNA Bivalent (Booster - Pfizer)**

All patients are encouraged to wait 15 minutes before leaving after receiving any vaccine.

VIS given 5/10/2023 by Delmis J Perez, RN

Was Jeanne Leonie Hoffman alert, oriented, and without adverse reaction after the vaccine was given Yes

Delmis J Perez, RN

Electronically signed by Perez, Delmis Joel, RN at 5/24/2023 11:16 AM

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

After Visit Summary (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Clinical Notes (continued)

Progress Notes

Crites, Stacy E, RN at 4/26/2023 1020

Wound Care Visit

Jeanne Leonie Hoffmanwho is 98 year old who presents today for wound care.
History of wound: Chronic stasis ulcers of L lower extremity.
New wound area noted on R posterior ankle with this visit.
Pain is managable. "I feel everything, but it is not too painful." New wound on R posterior ankle is tender.
Home treatment: Son doing daily wound care and dressing changes. They have received all supplies from mail order. Jeanne is also washing wounds with soft, cotton cloth during showers.

Wound care of Left Lower Extremity (LLE), of which she has 4:
1. Lateral ankle (long oval shape with narrow area in middle)
   7.5cm x 2cm x 2-3mm with moist eschar

2. Lateral Mid-calf (oval shape) 5.5cm x 3cm x 2-3mm with moist eschar

3. medial ankle (round) 3cm x 3cm x 2-3mm with moist eschar

4. Upper lateral calf 1.5cm x 0.5cm x 1mm

New wound on R posterior ankle 1cm x 0.5cm and superficial

Skin surrounding the ulcers appears slightly white and thin. Legs and feet are cool to touch. There are no signs/sym of infection.

Wound Care:
Procedure done by Marcy Brighten, RN and assisted by Stacy Crites, RN
Dr. Neighbor also in room to see healing progress of wounds.
Jeanne's son was in the room during dressing change and he is very knowledgeable of Jeanne's care.

Old dressings removed and wounds soaked with NS and debrided using a 4mm curette and saline gauze taking about 40 minutes total.
There was minimal discomfort and scant bleeding with the debriding and overall Jeanne tolerated very well. Wounds patted dry.
Dressing done with Therahoney HD sheets cut to size, then a generous amount of petroleum jelly and covered with Telfa pads. Secured with Kerlix to completely cover all dressings.

Patient's Home Care Instructions:
- Wash hands before and after wound care with soap and water for at least 15 seconds
- Home care: change dressing QOD. Remove shoes and socks q 2 hrs
- Monitor and report increased redness, drainage, warmth, pain, or fevers (greater than 100.5F)
- Pt encouraged to stay as active as possible. If unable to walk, do foot flexion/ extension exercises to aide circulation.
- Follow up: in 1 week with Dr. Neighbor and for wound care visit.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

Stopped in Visit

Medication List (continued)

None

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 4/26/2023 1000

Jeanne Leonie Hoffman is a 98 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up

Visit type (in person vs telemedicine vs phone): In person

History

Jeanne is accompanied by her son Lois . She has her hearing aid today.

Lower extremity ulcerations
She is in for wound care. Louis reports that they finally were able to get wound care supplies through Medicare at home. He does not have Medihoney.

Essential hypertension
Lois confirms that his mother has been taking her blood pressure medications

Hypercholesterolemia
She has been taking her cholesterol medication

History of recurrent deep venous thrombosis
There is been no recurrence. She has been off of Coumadin and anticoagulation for a number of years because of risk of falls and bleeding. However she has been continued on pentoxyfylline ER TID, but appears to only be taking it once daily.

Review of Systems:

No fever chills or night sweats
No recurrence of diffuse redness in the lower extremities which had been treated couple of visits ago as cellulitis.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008
Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

• Adult failure to thrive syndrome [R62.7]	10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing

program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- Hypercholesterolemia [E78.00] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001. Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 . Advise Vit D 800 IU daily.

- Primary open angle glaucoma (POAG) of both eyes [H40.1130] 10/10/2019
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC) [I70.232, I70.242] 09/24/2018
- Vitamin D deficiency [E55.9] 07/09/2018
- Primary osteoarthritis of both hips [M16.0] 02/01/2017
- Imbalance [R26.89] 11/02/2016
- History of recurrent deep vein thrombosis (DVT) [Z86.718] 06/02/2016
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication (HCC) [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

LDL	104	03/22/2007

Assessment and Plan:

1. Lower extremity ulceration, left, limited to breakdown of skin

Continued ulceration with very slow healing left lower leg. New small ulceration right posterior lower leg.
Wound care as documented by nursing note

Plan
Prescription written for Medihoney which should help with debridement and healing. As outlined by the nurses Medihoney dressing can be left on for 2 days.
- Wound Dressings (medihoney) topical gel; Apply topically every other day. Apply to wound before applying dressing
Dispense: 44 mL; Refill: 3

Emphasized need for her to take Pentoxifylline as prescribed 3 times daily in order to improve blood flow

2. Essential hypertension, benign

Blood pressures are reasonably controlled on current dose of losartan 25 mg 1/2 tablet daily

3. Hypercholesterolemia

Cholesterol reasonably controlled on low-dose of atorvastatin. Few years ago this was discontinued and her LDL cholesterol rebounded to 179. This prove the need for her to at least take a low-dose.

4. History of recurrent deep vein thrombosis (DVT)

Reminded to take Pentoxyfilline 3 times daily

Next visit in 2 weeks

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

How to contact us:
For urgent problems, contact the Hall Health Triage Nurse line at 206-221-2517 (Mon-Fri, 8a-5p)
For non urgent problems, contact us through My chart or by calling my medical assistant at 206-616-9358
For after hours and weekend care, Hall Health after hours: 206-520-7511.
Thank you for choosing the Hall Health Center. We welcome any feedback about the care you received today.

After Visit Summary (continued)

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 4/12/2023 1020

Pt in clinic for wound management of stasis ulcers of her Left Lower Extremity (LLE), of which she has 4.
1. Mid-calf: 1 cm x 1 cm
2. Medial ankle: circular 3 cm x 3 cm x 0.2 cm with moist eschar throughout.
3. Proximal lateral ankle: oval 5.5 cm x 3 cm x 0.2-0.4 cm with moist eschar throughout.

04/12/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

4. Superior lateral foot: 8 cm x 2 cm x 0.2-0.4 cm, 1 cm narrowing at the 2.5-3 cm, irregularly shaped, moist eschar throughout, with thick scarring at the distal inferior edge.

The three larger wounds were moistened with NS and gauze and debrided using a 4 mm curette and moistened gauze taking about 40 minutes total. There was scan bleeding. The peri wound areas of each were cleansed gently with gauze and NS. TheraHoney sheet was placed over each wound and covered with oiled gauze. Kerlix was used to cover the site and petrolatum applied over the wound areas. A surgical sleeve was placed over the entire dressing. Pt to return in 2 week for further wound care.

Electronically signed by Perez, Delmis Joel, RN at 4/12/2023 11:56 AM

Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/20/2019
End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA
Entered on: 9/4/2019
End date: 3/8/2025
Informant: Patient Reported

ofloxacin 0.3 % ophthalmic solution

04/12/2023 - Office Visit in Husky Health Primary Care Clinic (continued)

Medication List (continued)

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Place 1-2 drops into left EYE 4 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/10/2022
Start date: 10/10/2022
End date: 6/12/2024
Action: Patient not taking
Quantity: 5 mL
Refill: 1 refill by 10/10/2023

losartan 25 MG tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 8/24/2023
Instructions: TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/1/2022
Start date: 12/1/2022
End date: 8/24/2023
Quantity: 45 tablet
Refill: 2 refills by 12/1/2023

atorvastatin 10 MG tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 1/3/2024
Instructions: Take 1 tablet (10 mg) by mouth daily.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/13/2022
Start date: 12/13/2022
End date: 1/3/2024
Quantity: 90 tablet
Refill: 3 refills by 12/13/2023

pentoxifylline ER 400 MG ER tablet

Discontinued by: Kauffman, Mary Johanna Kelly, MD
Discontinued on: 9/19/2023
Instructions: take 1 tablet by mouth three times a day
Authorized by: Neighbor Jr., William E, MD
Ordered on: 1/23/2023
Start date: 1/23/2023
End date: 9/19/2023
Quantity: 90 tablet
Refill: 6 refills by 1/23/2024

Wound Dressings (medihoney) topical gel

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Apply topically daily. Apply to ulcerations on legs. Apply dressing over the Medi Honey.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/9/2023
Start date: 2/9/2023
End date: 3/8/2025
Quantity: 88 mL
Refill: 6 refills by 2/9/2024

timolol maleate 0.5 % ophthalmic solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/10/2024
Instructions: instill 1 drop into both eyes twice a day
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/24/2023
Start date: 2/24/2023
End date: 4/10/2024
Quantity: 10 mL
Refill: 6 refills by 2/24/2024

triamcinolone 0.1 % cream

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Apply topically 2 times a day. Apply to both forearms.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/5/2023
Start date: 4/5/2023
End date: 6/12/2024
Action: Patient not taking
Quantity: 28.4 g
Refill: 1 refill by 4/4/2024

Stopped in Visit

None

Clinical Notes

Clinical Notes (continued)

Progress Notes

Neighbor Jr., William E, MD at 4/12/2023 1000

Jeanne Leonie Hoffman is a 98 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Wound Care

Visit type (in person vs telemedicine vs phone): In person
Patient is accompanied by her son Louis. She has her hearing aids with her today

History

Jeanne was last seen 1 week ago for the following:
-- Resolution of cellulitis of the left lower extremity after completion of cephalexin antibiotic.
-- Continue wound care for lower extremity ulcerations on the left.
-- Pruritic dermatitis of upper extremities in part due to dry skin for which she was treated with triamcinolone and instructions for care of dry skin.
-- Her blood pressure as her last visit was 145/65.

Updates today
--Her son Louis continues to do wound dressings at home but is running out of supplies. There is been no further redness to suggest cellulitis. He feels the wounds are continuing to slowly heal.
--The pruritic dermatitis of the upper extremities is markedly improved with use of trying insulin alone. They are using Vaseline at night which is also helpful.
--Her son believes that she is taking her losartan medication for blood pressure but is not completely certain. Jean believes she is taking the medication but is not certain. She has her hearing aids with her today

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

• Adult failure to thrive syndrome [R62.7]	10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

• Sensorineural hearing loss, unspecified [H90.5]	11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

• Hypercholesterolemia [E78.00]	11/20/2006

04/12/2023 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001. Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 . Advise Vit D 800 IU daily.

- Primary open angle glaucoma (POAG) of both eyes [H40.1130] 10/10/2019
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC) [I70.232, I70.242] 09/24/2018
- Vitamin D deficiency [E55.9] 07/09/2018
- Primary osteoarthritis of both hips [M16.0] 02/01/2017
- Imbalance [R26.89] 11/02/2016
- History of recurrent deep vein thrombosis (DVT) [Z86.718] 06/02/2016
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication (HCC) [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

Medications

Outpatient Medications Marked as Taking for the 4/12/23 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• acetaminophen 500 MG Oral Tab	1,000 mg = 2 tab, PO,		

	TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition		
• atorvastatin 10 MG tablet	Take 1 tablet (10 mg) by mouth daily.	90 tablet	3
• Calcium Carbonate 500 MG Oral Chew Tab	Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.		
• Cholecalciferol 1000 units Oral Tab	Take 2 tablets (2,000 units) by mouth daily.		
• losartan 25 MG tablet	TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY	45 tablet	2
• MULTIPLE VITAMIN OR	Take by mouth.		
• ofloxacin 0.3 % ophthalmic solution	Place 1-2 drops into left EYE 4 times a day.	5 mL	1

10/05/20	**(!) 152/72**

Skin:
-- Inspection of her arms shows much less redness and no signs of itching today no signs of secondary infection.
-- Inspection of her lower extremities shows persistent ulceration of the left medial ankle and lateral lower leg which are decreased in size. The small areas of scattered skin breakdown that occurred when she had recurrence of cellulitis or healing. There is no evidence of recurrent cellulitis.

Lab and other tests: None today but plan for next visit

Assessment and Plan:
1. Lower extremity ulceration, left, limited to breakdown of skin
Gradually healing lower extremity ulcerations. See nurse note.

Plan: Lab to be done at next visit
- CBC; Future to rule out anemia

-- Follow-up visit in 1 to 2 weeks
-- Continue wound dressings at home
-- We will communicate with wound care supply company to assure they have adequate information to support coverage of the wound care supplies

2. Dermatitis
Bilateral upper arms markedly improved with use of triamcinolone cream. Advise using Cetaphil or simply Vaseline after showering to keep skin hydrated. May use triamcinolone periodically but not regularly

3. Essential hypertension, benign
Blood pressures are elevated. Her son is not certain if she is taking her blood pressure medication.

Plan
Labs to be done at next visit
- Comprehensive Metabolic Panel; Future

04/12/2023 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Communicated with son Louis that he needs to confirm that she is taking her prescribed as well as her over-the-counter medications. If we can confirm that she is taking her blood pressure medication daily but continues to have elevated readings we would increase the dose.

4. Hypercholesterolemia
She is on atorvastatin at a small dose. Due for lab at next visit
- Lipid Panel (Future); Future

5. Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)
Prior diagnosis of type 2 diabetes with good control with diet and weight.

Plan: Due for follow-up labs
- Comprehensive Metabolic Panel; Future
- Hemoglobin A1C, HPLC; Future

Indications

Hypercholesterolemia [E78.00 (ICD-10-CM)]

Result Notes

William E Neighbor Jr., MD
11/2/2023 12:47 PM PDT

Jeanne:
Blood work shows mild elevation of hemoglobin A1c consistent with mild diabetes that has been well controlled in the past with diet alone. Glucose was slightly elevated at 113.

04/12/2023 - Office Visit in Husky Health Primary Care Clinic (continued)

Labs (continued)

Kidney function was normal.
Cholesterol panel was essentially normal
Inflammation tests including sed rate and CRP were markedly elevated. This may be due to recent infection but also due to skin ulcerations. We should obtain an x-ray of the leg at the next visit.
Complete blood cell count showed normal white blood cell level. Continues to be mildly anemic. Iron level in October 2021 was normal and vitamin B12 level in October 2022 rather than being low was actually elevated.
We will follow-up on these tests when seen in the next week.

04/12/2023 - Office Visit in Husky Health Primary Care Clinic (continued)

Labs (continued)

MS 357110
SEATTLE WA 98195-0001

Indications

Lower extremity ulceration, left, limited to breakdown of skin (HCC) [L97.921 (ICD-10-CM)]

Result Notes

William E Neighbor Jr., MD
2/16/2024 5:46 PM PST

Jeanne:
-- Your blood sugar was in the normal range for having not fasted. Your hemoglobin A1c which is another measure of diabetes is stable and in the desired range.
--Your comprehensive metabolic panel showed normal liver and electrolytes. Your calculated kidney function was slightly less than 2 months ago.
--Your complete blood cell count shows elevated size of your red blood cells. This can indicate a vitamin B12 deficiency however rechecked that 2 months ago and your vitamin B12 level was actually higher than needed. However the size of your red blood cells has been substantially higher in the last year than previously. This will require additional test for further evaluation. There was no evidence of anemia
-- The lab could not run a urinalysis to look for infection on the basis of the small amount of urine you are able to provide. I will write you a separate message regarding this.

After Visit Summary (continued)

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

After Visit Summary (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Messages (continued)

Not Read

Jeanne: Below is a summary of your visit.

Assessment and Plan:
1. Lower extremity ulceration, left, limited to breakdown of skin
Gradually healing lower extremity ulcerations. See nurse note.

Plan: Lab to be done at next visit
- CBC; Future to rule out anemia

-- Follow-up visit in 1 to 2 weeks
-- Continue wound dressings at home
-- We will communicate with wound care supply company to assure they have adequate information to support coverage of the wound care supplies

2. Dermatitis
Bilateral upper arms markedly improved with use of triamcinolone cream. Advise using Cetaphil or simply Vaseline after showering to keep skin hydrated. May use triamcinolone periodically but not regularly

3. Essential hypertension, benign
Blood pressures are elevated. Her son is not certain if she is taking her blood pressure medication.

Plan
Labs to be done at next visit
- Comprehensive Metabolic Panel; Future

Communicated with son Louis that he needs to confirm that she is taking her prescribed as well as her over-the-counter medications. If we can confirm that she is taking her blood pressure medication daily but continues to have elevated readings we would increase the dose.

4. Hypercholesterolemia
She is on atorvastatin at a small dose. Due for lab at next visit
- Lipid Panel (Future); Future

5. Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)
Prior diagnosis of type 2 diabetes with good control with diet and weight.

Plan: Due for follow-up labs
- Comprehensive Metabolic Panel; Future
- Hemoglobin A1C, HPLC; Future

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

How to contact us:
For urgent problems, contact the Hall Health Triage Nurse line at 206-221-2517 (Mon-Fri, 8a-5p)
For non urgent problems, contact us through My chart or by calling my medical assistant at 206-616-9358
For after hours and weekend care, Hall Health after hours: 206-520-7511.

RE: Jeanne Hoffman

We have been having difficulties obtaining the information that is needed in order to supply and bill insurance for the above patients dressings. Since the patient is Medicare primary, Medicare follows a specific set of guidelines in order to cover supplies. The wound RX and Notes will require specific documentation and must meet certain criteria. The attachments are the clinician checklist to help assist with providing the information needed to supply. Medicare does require patients to be seen on a monthly basis for reassessment of the wounds.

For Alginate dressings, superabsorbent dressings, ABD pads, Foams Medicare requires Moderate drainage, full thickness wounds that have been debrided. Chart notes must contain date of last debridement and type of debridement done, of each wound, drainage of each wound, dimensions of each wound, thickness of each wound and the treatment plan for each wound (how the dressings will be used)

This message is for the named person's use only. It may contain sensitive and private or protected health information. No confidentiality or privilege is waived or lost by any mistransmission. If you are **not** the intended recipient, please notify Sound Health Medical Supply immediately at the telephone number listed above. It is also requested that you immediately mail the transmission to the address above. You must not directly or indirectly use, disclose, distribute, print, or copy any part of this message if you are not the intended recipient.

Active at the End of Visit

acetaminophen 500 MG Oral Tab

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions:
1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 6/12/2024
Action: Patient not taking

Calcium Carbonate 500 MG Oral Chew Tab

Discontinued by: Clark, Trika L, Pharmacy Technician
Discontinued on: 1/9/2025
Reason for discontinuation: Discontinued by patient
Instructions: Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 1/9/2025

Cholecalciferol 1000 units Oral Tab

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/20/2019
End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA
Entered on: 9/4/2019
End date: 3/8/2025
Informant: Patient Reported

ofloxacin 0.3 % ophthalmic solution

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Place 1-2 drops into left EYE 4 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/10/2022
Start date: 10/10/2022
End date: 6/12/2024
Action: Patient not taking
Quantity: 5 mL
Refill: 1 refill by 10/10/2023

losartan 25 MG tablet

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 4/5/2023 1020

Pt in clinic for wound management of LLE stasis ulcers. Her son is also present and helps with removing the remnants of petrolatum impregnated gauze which was covering the LLE. Upon removal of the gauze, there are 3 large wounds with multiple small healing wounds throughout the distal 2/3s of the shin and the calf. The latter did not need to be addressed today. The son and pt endorse the petrolatum has helped reduce the amount of pain the pt experiences caused by drying of the gauze and its subsequent pulling on the wounds.
The lateral superior foot wound is about 8.5 cm x 3 cm at its widest x up to 0.7 cm deep at it's most proximal inferior edge, irregularly shaped, with thick scarring at the distal inferior edge, moist desquamation/maceration around the edges along with moist eschar throughout.
The lateral ankle wound is oval, about 6 cm x 3.5 cm x 0.3 cm, with moist eschar throughout.
The medial ankle wound is oval/circular, about 3 cm x 3 cm x 0.3 cm, with moist eschar throughout. The intact skin between the wounds is greasy, due to the petrolatum, but also experiencing maceration.
The nurse who did wound care last week stopped by and commented how all of the wounds looked better, including

04/05/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

the smaller wounds discussed in last week's note.

All wounds were debrided of dead skin and eschar to tolerance using a 4 mm curette taking about 40 minutes. There was scant bleeding. The lower extremity was cleansed gently with NS and gauze. TheraHoney gel was placed on gauze which were gently put over each wound. A moderate layer of Petrolatum was placed over this gauze to help reduce friction and drying of the dressing which can cause the pt much pain. Dressing covered with a surgical sleeve. Pt to return next week for further wound management.

Electronically signed by Perez, Delmis Joel, RN at 4/12/2023 11:57 AM

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

04/05/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

After Visit Summary (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

04/05/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Documents (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

Active at the End of Visit

acetaminophen 500 MG Oral Tab

Discontinued by: Van Hoff, Linda A, ARNP — Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions:
1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
Entered by: Taylor, Zoe Judith Mildred, MD — Entered on: 8/20/2019
Start date: 8/5/2019 — End date: 6/12/2024
Action: Patient not taking

Calcium Carbonate 500 MG Oral Chew Tab

Discontinued by: Clark, Trika L, Pharmacy Technician — Discontinued on: 1/9/2025
Reason for discontinuation: Discontinued by patient
Instructions: Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.
Entered by: Taylor, Zoe Judith Mildred, MD — Entered on: 8/20/2019
Start date: 8/5/2019 — End date: 1/9/2025

Cholecalciferol 1000 units Oral Tab

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.
Entered by: Taylor, Zoe Judith Mildred, MD — Entered on: 8/20/2019
Start date: 8/20/2019 — End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA — Entered on: 9/4/2019
End date: 3/8/2025 — Informant: Patient Reported

ofloxacin 0.3 % ophthalmic solution

Discontinued by: Van Hoff, Linda A, ARNP — Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup

04/05/2023 - Office Visit in Husky Health Primary Care Clinic (continued)

Medication List (continued)

Instructions: Place 1-2 drops into left EYE 4 times a day.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 10/10/2022
Start date: 10/10/2022 — End date: 6/12/2024
Action: Patient not taking — Quantity: 5 mL
Refill: 1 refill by 10/10/2023

losartan 25 MG tablet

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 8/24/2023
Instructions: TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY
Authorized by: Neighbor Jr., William E, MD — Ordered on: 12/1/2022
Start date: 12/1/2022 — End date: 8/24/2023
Quantity: 45 tablet — Refill: 2 refills by 12/1/2023

atorvastatin 10 MG tablet

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 1/3/2024
Instructions: Take 1 tablet (10 mg) by mouth daily.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 12/13/2022
Start date: 12/13/2022 — End date: 1/3/2024
Quantity: 90 tablet — Refill: 3 refills by 12/13/2023

pentoxifylline ER 400 MG ER tablet

Discontinued by: Kauffman, Mary Johanna Kelly, MD — Discontinued on: 9/19/2023
Instructions: take 1 tablet by mouth three times a day
Authorized by: Neighbor Jr., William E, MD — Ordered on: 1/23/2023
Start date: 1/23/2023 — End date: 9/19/2023
Quantity: 90 tablet — Refill: 6 refills by 1/23/2024

Wound Dressings (medihoney) topical gel

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: Apply topically daily. Apply to ulcerations on legs. Apply dressing over the Medi Honey.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 2/9/2023
Start date: 2/9/2023 — End date: 3/8/2025
Quantity: 88 mL — Refill: 6 refills by 2/9/2024

timolol maleate 0.5 % ophthalmic solution

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 4/10/2024
Instructions: instill 1 drop into both eyes twice a day
Authorized by: Neighbor Jr., William E, MD — Ordered on: 2/24/2023
Start date: 2/24/2023 — End date: 4/10/2024
Quantity: 10 mL — Refill: 6 refills by 2/24/2024

triamcinolone 0.1 % cream

Discontinued by: Van Hoff, Linda A, ARNP — Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Apply topically 2 times a day. Apply to both forearms.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 4/5/2023
Start date: 4/5/2023 — End date: 6/12/2024
Action: Patient not taking — Quantity: 28.4 g
Refill: 1 refill by 4/4/2024

None

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 4/5/2023 1000

Jeanne Leonie Hoffman is a 98 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  Wound care, R arm very inflamed and itchy for 2-3 days

Visit type (in person vs telemedicine vs phone): In person

History

Jeanne comes in with her son Louis as usual.

Left lower extremity cellulitis
They are completing the 10-day course of cephalexin. She has not had any fever chills or night sweats. There has been decreased discomfort in the lower extremity

Left lower extremity ulcerations
They come in for follow-up

Pruritus and redness of the forearms
In the last week she has developed marked itching and dry skin of both forearms. They have been using some topical Benadryl but has not been sufficiently helpful.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- Hypercholesterolemia [E78.00] 11/20/2006

On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006

LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001. Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 . Advise Vit D 800 IU daily.

- Primary open angle glaucoma (POAG) of both eyes [H40.1130] 10/10/2019
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC) [I70.232, I70.242] 09/24/2018
- Vitamin D deficiency [E55.9] 07/09/2018
- Primary osteoarthritis of both hips [M16.0] 02/01/2017
- Imbalance [R26.89] 11/02/2016
- History of recurrent deep vein thrombosis (DVT) [Z86.718] 06/02/2016
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication (HCC) [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

- Smokeless tobacco: Never

Substance Use Topics

- Alcohol use: No

Objective:

BP (!) 145/65 | Pulse (!) 59
Estimated body mass index is 16.51 kg/m² as calculated from the following:
Height as of 10/21/20: 5' 5" (1.651 m).
Weight as of 10/10/22: 45 kg (99 lb 3.3 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
(!) 145/65	(!) 59	---	---	---	9:50 AM	4/5/2023

Last blood pressure recorded in this encounter: **(!) 145/65**
General: No acute distress
She is wearing hearing aids today which aids in communication
Skin
-Both forearms show diffuse dry skin with redness and evidence of itching. There is no evidence of bacterial infection at this time
-Lower extremities. See nurse note. There is marked decreased erythema indicating resolution of the cellulitis.

Multiple small ulcerations on the anterior and posterior aspects of the tibial area surface are nearly resolved. There continues to be larger ulceration right medial ankle and left lower lower leg.

Lab and other tests: None

Assessment and Plan:
1. Cellulitis of left lower extremity
Resolving.

Plan
-- Complete course of prescribed cephalexin antibiotic
-- Follow-up in 1 week

2. Lower extremity ulceration, left, limited to breakdown of skin
Reduce number of very small ulcerations. Larger ulceration on the medial ankle and lower lateral lower leg are stable or perhaps gradually decreasing in size.

Plan
-- Nurse conducted debridement today and review bandaging.
-- Bandaging instructions reviewed with her son who was present for the visit today
-- Follow-up visit in 1 week

3. Dermatitis
She has dry inflamed skin on both upper extremities restricted to the forearms which is quite itchy. Not able to identify anything she may have come into contact with.

Plan
For acute inflammation use triamcinolone cream sparingly over the forearms twice daily for the next week then discontinue
- triamcinolone 0.1 % cream; Apply topically 2 times a day. Apply to both forearms. Dispense: 28.4 g; Refill: 1

Follow instructions below for dry skin

Treatment for dry skin and eczema

Avoid most soaps except perhaps neutrogena or other hypoallergenic soaps
Tepid rather than hot showers
Pat rather than rub skin dry
After showering apply lubriderm, hydroeucerin other hydrating cream to body. Prefer thicker cream from a tub rather than something that is thin enough to be squeezed from a tube.

Use steroid cream such as triamcinolone to decrease inflamation. Usually takes about 5-7 days before benefit is seen.

For skin lubricants
Common lotioins are : Cetaphil, Cerave, Curel, Neutrogena body emulsion, Pen-Kera, DML, Keri, Lubriderm and Moisturel. Lotions are easy to apply but may not sufficiently protect the skin from drying

Creams are usually more effective in treating dry skin. Common creams are Cerave, Eucerin, and Cetaphil. They usually come in a jar.

Ointments tend to be greasy. Two common brands are Vaseline and Aquaphor. Applying them after showering can

04/05/2023 - Office Visit in Husky Health Primary Care Clinic (continued)

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Jeanne: Below is a summary of your visit

I think it best that you be seen again in another week to assure that the itching on the forearm is improving without signs of infection and that the infection of the left lower leg has not recurred. Please schedule a 20-minute visit with me if you have not already and assure that there is a visit scheduled with the nurse.

Assessment and Plan:
1. Cellulitis of left lower extremity
Resolving.

Plan
-- Complete course of prescribed cephalexin antibiotic
-- Follow-up in 1 week

2. Lower extremity ulceration, left, limited to breakdown of skin
Reduce number of very small ulcerations. Larger ulceration on the medial ankle and lower lateral lower leg are stable or perhaps gradually decreasing in size.

Plan
-- Nurse conducted debridement today and review bandaging.
-- Bandaging instructions reviewed with her son who was present for the visit today
-- Follow-up visit in 1 week

3. Dermatitis
She has dry inflamed skin on both upper extremities restricted to the forearms which is quite itchy. Not able to identify anything she may have come into contact with.

Plan
For acute inflammation use triamcinolone cream sparingly over the forearms twice daily for the next week then discontinue
- triamcinolone 0.1 % cream; Apply topically 2 times a day. Apply to both forearms. Dispense: 28.4 g; Refill: 1

Follow instructions below for dry skin

Treatment for dry skin and eczema

Avoid most soaps except perhaps neutrogena or other hypoallergenic soaps
Tepid rather than hot showers
Pat rather than rub skin dry
After showering apply lubriderm, hydroeucerin other hydrating cream to body. Prefer thicker cream from a tub rather than something that is thin enough to be squeezed from a tube.

Use steroid cream such as triamcinolone to decrease inflamation. Usually takes about 5-7 days before benefit is seen.

For skin lubricants
Common lotioins are : Cetaphil, Cerave, Curel, Neutrogena body emulsion, Pen-Kera, DML, Keri, Lubriderm and Moisturel. Lotions are easy to apply but may not sufficiently protect the skin from drying

04/05/2023 - Office Visit in Husky Health Primary Care Clinic (continued)

Messages (continued)

Creams are usually more effective in treating dry skin. Common creams are Cerave, Eucerin, and Cetaphil. They usually come in a jar.

Ointments tend to be greasy. Two common brands are Vaseline and Aquaphor. Applying them after showering can reduce the amount that is needed.

Follow-up in 1 week

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

How to contact us:
For urgent problems, contact the Hall Health Triage Nurse line at 206-221-2517 (Mon-Fri, 8a-5p)
For non urgent problems, contact us through My chart or by calling my medical assistant at 206-616-9358
For after hours and weekend care, Hall Health after hours: 206-520-7511.
Thank you for choosing the Hall Health Center. We welcome any feedback about the care you received today.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

Clinical Notes

Progress Notes

Brighton, Marcelle, RN at 3/28/2023 1020

Wound Care Visit

S:
Jeanne Leonie Hoffman who is 98 years old woman who presents today for wound care/dressing change.
History of wound: Pt with status ulcers of L lower extremity. See history of wound in Dr. Neighbor's note.

03/28/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Pain: Pt c/o worsening pain/redness of lower L leg and multiple new forming sores over past 4 days on lower L leg. Back of L leg is tender to touch. Healing ulcers are stable and continuing to improve slowly. Also c/o itching rash on R underside of forearm. Pt believes this may be due to contact with antiseptic solution used for wound care of leg. Accompanied by son who states they have been using OTC wound care supplies as the supplies ordered to be delivered at her last visit here have not arrived. Has been using an OTC antiseptic similar to Bactine. Allows Jeanne to do her own cleaning of wounds and then helps with dressing. Pt has been taking Tylenol for pain and occasionally an Oxycontin is pain is severe, according to son.

O:
Location: 3 ulcers present on L lower leg. Evidence of continued healing of each of 3 ulcers. Minor slough apparent in L medial ankle ulcer, minor rolled wound edges. Lateral L ankle ulcer with mild wound edge rolling, slough. Upper L lateral ulcer with continued signs of healing, no slough apparent today. Multiple (approx 8-10) scattered new small ulcers covering superior aspect of L calf, none underneath. Calf is red and warm to touch. Redness extends to within 2-3 " of L knee. Dr. Neighbor in wound care room to assess new sores and rash.See his note for care recommendations. Will start Keflex and topical cream for rash.
Duration: several months, ongoing
Measurements: L lateral dorsal foot approx measurement 7.5 cm x 2.5 cm x 0.2 cm depth. L lateral tibia: 5.5 cm x 2 cm. L medial distal ankle: 3.0 cm x 3.0 cm.
Undermining/Tunneling: no tunneling noted.
Wound Bed: mild slough in wound beds, small areas of tissue granulation.
Wound Edges: rolled/thickened
Exudate: minor slough in wound beds, easily removed with curettage.
Circulation: skin is warm, dry

TDAP status: 9/20/2017
There were no vitals taken for this visit.

A:
Wound Healing Status: ongoing.
Presence of signs of infection or over-colonization? no
Etiology of Wound: mixed pressure and vascular
Extent of Tissue Injury: partial and full thickness wounds
Barriers/Risk Factors: underlying medical conditions, ill-fitting shoes, self care deficits

P:
Cleansed with NS, sharp debridement with curette.
Use of skin barrier - No
Primary dressing and topical: Covered existing and new wounds with medihoney and covered with vaseline gauze.
Secondary dressing: light covering with gauze and Kerlex
Secure with Surgical gauze sleeve.
Debridement Type: sharp
Pt tolerated the procedure well? Yes, pt with only mild discomfort during debridement of L lateral tibia wound.

Patient's Home Care Instructions:
- Wash hands before and after wound care with soap and water for at least 15 seconds
- Home care: change dressing QOD. Remove shoes and socks q 2 hrs
- Monitor and report increased redness, drainage, warmth, pain, or fevers (greater than 100.5F)
- Pt encouraged to stay as active as possible. If unable to walk, do foot flexion/ extension exercises to aide circulation.

03/28/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

- Follow up: in 1 week with Dr. Neighbor and for wound care visit.

Electronically signed by Brighton, Marcelle, RN at 3/28/2023 11:47 AM

03/28/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Documents (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 3/28/2023 1000

Jeanne Leonie Hoffman is a 98 year old female here to discuss the following:

Clinical Notes (continued)

Chief Complaint
Patient presents with
- Follow-Up
  Wound care, L leg

Visit type (in person vs telemedicine vs phone): In person

History
Jeanne comes in attended by her son Louis as usual. Her hearing aids are not working today.

Redness of left lower leg
In the last week she has developed increasing pain and redness in the left lower leg without fever chills or night sweats.

Her son is continue to apply bandages for chronic leg ulcerations as instructed by our nursing staff. They come in today for follow-up.

Regarding blood pressure, her son reports compliance with losartan.

Problem List
Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- Hypercholesterolemia [E78.00] 11/20/2006

On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006

LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006

4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001. Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 . Advise Vit D 800 IU daily.

- Primary open angle glaucoma (POAG) of both eyes [H40.1130] 10/10/2019
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC) [I70.232, I70.242] 09/24/2018
- Vitamin D deficiency [E55.9] 07/09/2018
- Primary osteoarthritis of both hips [M16.0] 02/01/2017
- Imbalance [R26.89] 11/02/2016
- History of recurrent deep vein thrombosis (DVT) [Z86.718] 06/02/2016
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication (HCC) [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

- Sexual activity: Not Currently

Social History

Tobacco Use

- Smoking status: Never
- Smokeless tobacco: Never

Substance Use Topics

- Alcohol use: No

Objective:

BP (!) 176/74 | Pulse 67
Estimated body mass index is 16.51 kg/m² as calculated from the following:
Height as of 10/21/20: 5' 5" (1.651 m).
Weight as of 10/10/22: 45 kg (99 lb 3.3 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
(!) 176/74	67	---	---	---	9:51 AM	3/28/2023

Last blood pressure recorded in this encounter: **(!) 176/74**
General: No acute distress
Difficult communication today because of hearing aids not working

Lower extremity, left
-- Diffuse erythema with increased warmth without vein distention in the feet. Good capillary refill
-- In addition to the persistent right medial malleolar and left lateral lower leg ulcerations which we have been caring for today she additionally has minute areas of breakdown in multiple areas on the anterior and posterior aspect of the lower leg. Total is about 20.

Lab and other tests: None

Assessment and Plan:

Clinical Notes (continued)

1. Cellulitis of left lower extremity
New episode of cellulitis of left lower extremity with the last episode being 2 to 3 years ago which responded to cephalexin. No evidence of DVT clinically.

Plan
- cephalexin (Keflex) 500 MG capsule; Take 1 capsule (500 mg) by mouth 4 times a day for 7 days. Dispense: 28 capsule; Refill: 0
- CBC with Diff; Future
-Follow-up in 1 week

2. Lower extremity ulceration, left, limited to breakdown of skin
New areas of skin breakdown related to the cellulitis on top of the more chronic area as described above. Wound care supply prescriptions were sent to the company that they use after last visit but have not yet been received.

Plan
--Wound was evaluated and redressed by nurses with the son present today for instruction
--Son will contact the wound care supply company
--Follow-up in 1 week

3. Essential hypertension, benign
Blood pressure somewhat elevated today in systolic pressure but not diastolic. She is in quite a bit of discomfort which may be raising her blood pressure. Goal is to have her systolic closer to 60. There is diastolic is in a safe range.

Plan
Continue low-dose of losartan and recheck in 1 week

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

03/28/2023 - Office Visit in Husky Health Primary Care Clinic (continued)

After Visit Summary (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

Seattle WA 98195-4410
206-685-1011

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Documents (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 3/7/2023 1000

Jeanne Leonie Hoffman is a 98 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  Wound care

Visit type (in person vs telemedicine vs phone): In person

History

Jeanne was last seen 2 weeks ago for slowly healing ulcers of the left lower leg. She returns today for dressing changes. They are running out of dressing supplies. After her last visit I had communicated with sound health medical and received forms which are being completed today to help them obtain dressing supplies.

Jeanen is accompanied by her son Louis today. Her hearing aid batteries are dead this morning so its difficult communicating with her.

The nurse saw the patient. Wounds are slow slowly healing. Dressings reapplied. Please see the nurse's note.

Forms completed by the nurse.

She did not take her blood pressure medications this morning.

Review of Systems:

No fever chills

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925

Objective:

BP (!) 188/97 | Pulse 81

Estimated body mass index is 16.51 kg/m² as calculated from the following:

03/07/2023 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Height as of 10/21/20: 5' 5" (1.651 m).
Weight as of 10/10/22: 45 kg (99 lb 3.3 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
(!) 188/97	81	---	---	---	10:03 AM	3/7/2023

Last blood pressure recorded in this encounter: **(!) 188/97**
General: No acute distress
The nurse saw the patient. Wounds are slow slowly healing. There is no evidence of acute infection dressings reapplied. Please see the nurse's note.

Lab and other tests: none

Assessment and Plan:
1. Lower extremity ulceration, left, limited to breakdown of skin
Slow healing of ulcerations without evidence of cellulitis or other infection at the current time.

Plan
-- Wounds redressed today
-- Dressing supplies ordered through sound medical health
– Next visit in 2 weeks.

2. Essential hypertension, benign
Blood pressure elevated probably secondary to not taking her medications.

Emphasized the importance of taking her medication.

Other
Also reemphasized the importance of being able to communicate with Jeanne at her visits which requires that she has her hearing aids and that the batteries are operative
Thank you

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

How to contact us:
For urgent problems, contact the Hall Health Triage Nurse line at 206-221-2517 (Mon-Fri, 8a-5p)
For non urgent problems, contact us through My chart or by calling my medical assistant at 206-616-9358
For after hours and weekend care, Hall Health after hours: 206-520-7511.
Thank you for choosing the Hall Health Center. We welcome any feedback about the care you received today.

Wound Care Visit

S:

03/07/2023 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Jeanne Leonie Hoffman who is 98 years old presents today for wound care/dressing change.
History of wound: Pt with status ulcers of L lower extremity. See history of wound in Dr. Neighbor's note.
Pain: Pt c/o pain, tenderness that extends from upper L calf down to achilles area. Tender to touch. Pt is concerned a new sore is forming, "feels hard"
Home treatment: Pt son does wound care and dressing changes at home.

O:
Location: 3 ulcers present on L lower leg. Evidence of continued healing of each of 3 ulcers. Minor slough apparent in L medial ankle ulcer, minor rolled wound edges. Lateral L ankle ulcer with mild wound edge rolling, slough. Upper L lateral ulcer with continued signs of healing, no slough apparent today. No clear evidence of forming sore in the area that pt indicates increasing pain. Skin is warm and dry.Skin is tight and shiny on back of calf. Tender to touch. Dr. Neighbor aware of reported pain.
Duration: several months, ongoing
Measurements: L lateral dorsal foot approx measurement 7.5 cm x 2 cm x 0.2 cm depth. L lateral tibia: 6.5 cm x 5 cm. L medial distal ankle: 3.5 cm x 3.5 cm. Measurements from wound care visit on 2/21/23 were approximations and today's measurements are accurate.
Undermining/Tunneling: no tunneling noted.
Wound Bed: mild slough in wound beds, small areas of tissue granulation.
Wound Edges: rolled/thickened
Exudate: minor slough in wound beds, easily removed with curettage.
Circulation: skin is warm, dry
Periwound condition: pt with dry, thickened skin around wound. No evidence of infection.
TDAP status: 9/20/2017
BP (!) 188/97 | Pulse 81

A:
Wound Healing Status: ongoing.
Presence of signs of infection or over-colonization? no
Etiology of Wound: mixed pressure and vascular
Extent of Tissue Injury: partial and full thickness wounds
Barriers/Risk Factors: underlying medical conditions, ill-fitting shoes, self care deficits

P:
Cleansed with NS, sharp debridement with curette.
Use of skin barrier - No
Primary dressing and topical: Covered wounds with silver alginate
Secondary dressing: light covering with gauze and Kerlex
Secure with Surgical gauze sleeve.
Debridement Type: sharp
Pt tolerated the procedure well? Yes, pt with only mild discomfort during debridement of L lateral tibia wound.

Patient's Home Care Instructions:
- Wash hands before and after wound care with soap and water for at least 15 seconds
- Home care: change dressing QOD. Remove shoes and socks q 2 hrs
- Monitor and report increased redness, drainage, warmth, pain, or fevers (greater than 100.5F)
- Pt encouraged to stay as active as possible. If unable to walk, do foot flexion/ extension exercises to aide circulation.
- Follow up: in 2 weeks with Dr. Neighbor

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

After Visit Summary (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.

If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

Jeanne and Louis:

Our nurses prepared a list of dressing supplies. I contacted Nate at Sound Health Medical Supplies, based in Tacoma, telephone 253-495-7240 and spoke with him today. They will be faxing forms that I need to complete which are quite extensive as required by Jeanne's insurance. They will then be able to ship you the supplies.

Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	2/28/2023 11:45 AM

Wound is improving rapidly.
Jean is experiencing less/no pain, nor complaints.
The surface epithelium of the skin ulceration is becoming flush.

However, Medhoney application seems to asst in rapid cell growth/minimize bacteria.

Although, the need for wound care supplies, is necessary to replenish. Wound Cleaning and reapplication of bandages, does aid in healing.
Long term bandages, cause bacteria growth and dry bandage adhering/sticking causing reopening of small"New" epidermis breakage.

Best to have adequate wound medical supplies.
More I have to restrict or limit wound care...longer healing.

Respectfully

Louis, KI7AGD

Wound Care Visit

S:
Jeanne Leonie Hoffmanwho is 98 year old presents today for wound care/dressing change.
History of wound: Pt with status ulcers of L lower extremity. See history of wound in Dr. Neighbor's note.
Pain: Pt states she is not feeling pain r/t ulcers.
Home treatment: Pt son does wound care and dressing changes at home.

O:
Location: 3 ulcers present on L lower leg. Lateral and medial ulcers with some rolled edges along wound bed, mild slough apparent in wound beds on each of 3 ulcers.
Duration: several months, ongoing
Measurements: L lateral dorsal foot approx measurement 8 cm x 4 cm x 0.3 cm depth. L lateral tibia: 4 cm x 3 cm. L medial distal ankle: 3.5 cm x 3.5 cm.
Undermining/Tunneling: no tunneling noted.
Wound Bed: slough in wound beds, small areas of tissue granulation.
Wound Edges: rolled/thickened
Exudate: minor slough in wound beds, easily removed with curettage.
Circulation: skin is warm, dry
Periwound condition: pt with dry, thickened skin around wound. No evidence of infection.
TDAP status: 9/20/2017
BP (!) 148/69 | Pulse 68

A:
Wound Healing Status: ongoing.
Presence of signs of infection or over-colonization? no
Etiology of Wound: mixed pressure and vascular
Extent of Tissue Injury: partial and full thickness wounds
Barriers/Risk Factors: underlying medical conditions, ill-fitting shoes, self care deficits

P:
Cleansed with NS, soaked wounds prior to sharp debridement with curette.
Use of skin barrier - No
Primary dressing and topical: Covered wounds with silver alginate
Secondary dressing: light covering with gauze and Kerlex
Secure with Surgical gauze sleeve.
Debridement Type: sharp
Pt tolerated the procedure well? Yes, pt with only mild discomfort during debridement of L lateral tibia wound.

Patient's Home Care Instructions:
- Wash hands before and after wound care with soap and water for at least 15 seconds
- Home care: change dressing QOD. Remove shoes and socks q 2 hrs
- Monitor and report increased redness, drainage, warmth, pain, or fevers (greater than 100.5F)
- Follow up: in 2 weeks with Dr. Neighbor

Jeanne Leonie Hoffman is a 98 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  Wound care, BP

Visit type (in person vs telemedicine vs phone): In person

History

Jeanne is brought in again by her son Louis for skin exam. She has not had any fever or chills. They have been using Medihoney dressings.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- Hypercholesterolemia [E78.00] 11/20/2006

On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006

LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006

4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001. Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 . Advise Vit D 800 IU daily.

- Primary open angle glaucoma (POAG) of both eyes [H40.1130] 10/10/2019
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC) [I70.232, I70.242] 09/24/2018
- Vitamin D deficiency [E55.9] 07/09/2018

- Sexual activity: Not Currently

Social History

Tobacco Use

- Smoking status: Never
- Smokeless tobacco: Never

Substance Use Topics

- Alcohol use: No

Objective:

BP (!) 148/69 | Pulse 68
Estimated body mass index is 16.51 kg/m² as calculated from the following:
Height as of 10/21/20: 5' 5" (1.651 m).
Weight as of 10/10/22: 45 kg (99 lb 3.3 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
(!) 148/69	68	---	---	---	9:48 AM	2/21/2023

Last blood pressure recorded in this encounter: **(!) 148/69**
General: NAD
Skin:
Left lateral ankle: Ulceration today appears smaller measuring 3.5 x 3 cm approximately with some buildup margins which need debriding.
The ulceration over the pretibial area also appears smaller.

Lab and other tests: none

Assessment and Plan:

1. Lower extremity ulceration, left, limited to breakdown of skin
Slow healing of ulcerations due to venous stasis and arterial disease and 98-year-old female. There is no evidence of infection at the current time.

02/21/2023 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Plan
--Debridement and wound care today by nurse
-- The son has had difficulties reaching local medical care supply company. Plan is that we will identify what wound care supplies are needed and then contact Nat at telephone 253-495-7240 or identify alternative medical supply company on Bainbridge Island
-- Next visit in 2 weeks.

Addendum:
3/1/2023
Wound care supplies recommended by nurse:

Melgisorb Ag (alginate)- 5 boxes (50 squares).
Curity Stretch bandage 4" x 75" - 15 rolls
Curad Non-adherent gauze, 2" x 3" - 1 box is 100 which will last 2-3 months
Surgilast (gauze sleeve) - 1 box of 25 yds, size 7.
Normal Saline, unit dose vials 50 x 15 ml- 1 box.
Paper tape or other to secure stretch bandage

Patient's son contacted. I also contacted the above individual Nate at Sound Heath Medical in Tacoma. They are faxing me forms for completion which are required by the patient's insurance.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

After Visit Summary (continued)

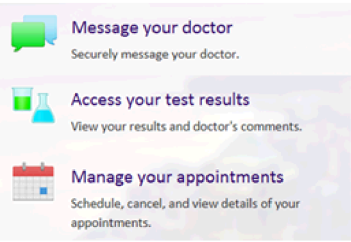
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.



If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

I have asked the nurses to provide a list of dressing supplies that you would need each month. I will then try to reach the medical supply company that you listed or find an alternative to which to send a prescription for the supplies.

Thank you again for the banana bread which I am continuing to enjoy. Elena and others have also enjoyed it. She says it was very delicious!

William E Neighbor, MD

Last Read in MyChart
2/28/2023 11:08 AM by Hoffman, Jeanne Leonie

Jeanne and Louis
The last time the Tylenol with codeine prescription was filled was in 2020. We have not filled it since then as she was seen in the emergency room for somnolence and disorientation which was felt to be due to sensitivity to narcotics. At her age recommendations are to avoid narcotics.

For pain control I would advise
--Acetaminophen (Tylenol) up to a total dose of 3000 mg/day in divided doses
--I would not advise nonsteroidal anti-inflammatory medication such as naproxen or ibuprofen because of risk of stomach irritation and bleeding
--I can prescribe a prescription for topical pain relievers if there is mostly localized area of pain such as in the knees. We can discuss this at your next visit in 2 weeks.

William E Neighbor, MD

Clinical Notes

Progress Notes

Clinical Notes (continued)

Neighbor Jr., William E, MD at 2/7/2023 1000

Jeanne Leonie Hoffman is a 98 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  Wound care / leg
- Wound Care
- RN30

Visit type (in person vs telemedicine vs phone): In person

History

The patient comes in for 2-week follow-up for wound care of ulcerations of the lower extremities without cellulitis, follow-up on blood pressure and follow-up on nutrition. At her last visit she had not yet obtained her dentures. She is in with her son Louis today as usual.

Updates today:
--Nurse provided wound care. See nurse visit note
--Patient now has her dentures which look good. She has 1 hearing aid in place today. She reports that she is eating better now that she has teeth with which she can chew.
--Left posterior rib pain. She reports that a few days ago she did fall against a wall in her apartment and since then has had some tenderness over the left posterior ribs. She has not had any difficulties breathing and no cough.

Review of Systems:

No fever chills or night sweats.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- Hypercholesterolemia [E78.00] 11/20/2006

On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006

- Sexual activity: Not Currently

Social History

Tobacco Use

- Smoking status: Never
- Smokeless tobacco: Never

Substance Use Topics

- Alcohol use: No

Objective:

BP (!) 141/62 | Pulse (!) 55

Clinical Notes (continued)

Estimated body mass index is 16.51 kg/m² as calculated from the following:
Height as of 10/21/20: 5' 5" (1.651 m).
Weight as of 10/10/22: 45 kg (99 lb 3.3 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
(!) 141/62	(!) 55	---	---	---	9:22 AM	2/7/2023

Last blood pressure recorded in this encounter: **(!) 141/62**
General: NAD
Chest wall: Tender over the left lower posterior ribs but without overlying swelling or ecchymoses or redness.
No shortness of breath.
No pain when she took a deep inspiration

Skin
See visit note by nurse

Lab and other tests: none

Assessment and Plan:
1. Lower extremity ulceration, left, limited to breakdown of skin
See visit note done by the nurse. There is slow healing.

Plan:
Next visit in 2 weeks
Medihoney prescribed. Prior prescription was sent January 23 to the pharmacy. A new prescription is sent.

2. Essential hypertension, benign
Blood pressure continues to be reasonably controlled with low-dose of losartan which was restarted in the last few months.

3. Decreased appetite
Her appetite is improved now that she has dentures.

Plan
Continue to monitor food intake and will check weight if possible at her next visit. She has difficulties standing without support which makes accurate weight difficult.

Pain control. The son asked about refill of pain control medication but he was not certain what it was. He will confirm. I suspected was for acetaminophen with codeine which was last filled in 2020. We had not filled it since that time because the patient was seen in the emergency room for somnolence which was thought to be due to to excessive use of narcotic pain reliever. My recommendation would be to control discomfort with regular use of acetaminophen up to 3000 mg daily. If there are localized areas of discomfort such as in the knees topical agents could be used.

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

How to contact us:
For urgent problems, contact the Hall Health Triage Nurse line at 206-221-2517 (Mon-Fri, 8a-5p)
For non urgent problems, contact us through My chart or by calling my medical assistant at 206-616-9358

Silue, Ruth Ann, RN at 2/7/2023 1000

TRIAGE WOUND CARE/DRESSING CHANGE

SUBJECTIVE:
Jeanne Leonie Hoffman is a 98 year old female presents for wound care of stasis ulcers on L lower leg. Son reports there has been more drainage, and wound is wet.

OBJECTIVE: clean and dry, some sough to wound base with some granulation; edges of the wound white/mascerated and blunt/slightly rounded. Size of 3 main wounds is slowly decreasing; there are no longer small wounds surrounding the 3 main wounds.

ASSESSMENT: wound care/ dressing change for healing wound.

PLAN: Wound was cleansed with normal saline.
Applied silver alginate to wounds.
Applied new dressing pad and wrapped with gauze to hold in place.
Applied tubular elastic Dressing
Advised patient to keep dressing in place and recheck in 3-5 days.

Reviewed care instructions:
Dress with Silver alginate and gauze pad and change dressing every 3-5 days as needed.
Discouraged use of bleach solution for cleaning the wound.
Keep wound clean and dry.
Care giver voiced understanding and agreement with plan.
Ruth A Silue, RN

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

After Visit Summary (continued)

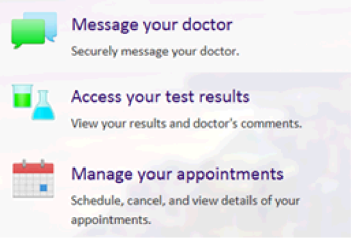
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.



If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

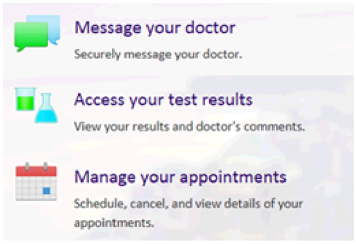
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.



If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

Delahunty, Kelly, RN at 1/24/2023 1000

TRIAGE WOUND CARE/DRESSING CHANGE

SUBJECTIVE:

Jeanne Leonie Hoffman is a 98 year old female presents for wound care of stasus ulcers on Left lower extremity. See by Dr. Neighbor prior to RN Wound Cre

Wound Hx:See Provider Note

OBJECTIVE: Slean and dry, 3 larger wound with a few small spots. Edges slightly rolled, some slough to the wound bed.

01/24/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

ASSESSMENT: wound care/ dressing change for healing wound.

PLAN: Wound was cleansed with normal saline.
Unable to use curette to debride the edges of wound due to patient's pain response.
Used cotton tip applicator to mildly debride edges of wound. Patient was crying, guarding, and wincing during wound care.

Applied new dressing with Therahoney sheet, vaseline gauze and occlusive dressing without adhesive. Wrapped with Kurlex and covered with elastic netting to keep in place.

Son will continue home care of wounds. Son stated they were soaking several times a week in a diluted "pool like solution" to kill the bacteria. Son felt the wounds were much better and expects them to be healed by February. Reports the wound on the back of leg is healed.

Attempted to provide education on wound care and dissuade Son from soaking the wound in a alcohol solution no matter how dilute as it can harm sensitive growing tissue. Son stated "this is the only things that helps."

Advised to leave current drsging on until Thursday or Friday and avoid getting wet to allow for the Therahoney to aid in healing.

Consulted with Dr. Neighbor on patient's response to wound care and advised on a plan for Provider instructed pain management before next wound debridement to allow for a more throughout debridement.

Dr. Neighbor consulted with patient's son.

Provided remaining supplies not used today in clinic.
RTC in 2 weeks to f/u with Dr Neighbor.
Patient voiced understanding and agreement with plan.

Plan: On next wound management - RN assess under the leg wound for debridement. On the dorsal area of foot there is a round 2 inch diameter area that is potentially another wound that needs full debridement. A more through evaluation is needed when patient is able to tolerate.

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 1/24/2023 0940

Jeanne Leonie Hoffman is a 98 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  Wound care

Visit type (in person vs telemedicine vs phone): In person

History

Last visit was January 10, 2023 for follow-up on lower extremity ulcers, hypertension, and decreased appetite in part due to need for dentures.

She is accompanied by her son Louis today. He reports that she was fitted for the dentures in the last couple of weeks. She is not obtained the dentures as yet. He is puréeing food for her.

It is unclear from speaking with him exactly what medications he is using on the ulcerations on his mother's lower legs.

Review of Systems:

There is been no fever chills or night sweats

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008
Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- Hypercholesterolemia [E78.00] 11/20/2006

On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006

LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006

4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations

Objective:

BP (!) 157/76 | Pulse 64

Estimated body mass index is 16.51 kg/m² as calculated from the following:
Height as of 10/21/20: 5' 5" (1.651 m).
Weight as of 10/10/22: 45 kg (99 lb 3.3 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
(!) 157/76	64	---	---	---	9:49 AM	1/24/2023

Last blood pressure recorded in this encounter: **(!) 157/76**

General: No acute distress

Skin ulcerations as described in nurses note
No evidence of superimposed infection.

Lab and other tests: None

01/24/2023 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Assessment and Plan:
1. Lower extremity ulceration, left, limited to breakdown of skin
Ulcerations redressed by nurse today.

Plan

Care at home
-- Her son Louis is to contact his regular pharmacy or the medical supplies pharmacy to obtain adequate dressing supplies. Some dressing supplies are given today
--He should not use any topical antibiotic or other chemicals on the wound including dilute chlorine washes.
-- Instead he should use Medihoney dressings. A prescription is sent in. The ulcerations should be washed gently with warm water once daily, dried, then Medihoney applied and a dressing on top of that with gentle wrapping gauze to hold the dressing in place. Avoid wrapping that is applied too tightly which impairs blood flow.

In preparation for visit in 2 weeks and for additional visits:
-- Reminder that she is to bring in her hearing aids
-- Also would advise premedication with Tylenol 500 to 650 mg 30 minutes before her visit. Would prefer to avoid premedication with narcotics because she has had sensitivity to these medications in the past with change in sensorium. Also would avoid ibuprofen or other nonsteroidal anti-inflammatory medications due to her age. At least this would be the plan for now.

Next visit in 10 to 14 days

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

How to contact us:
For urgent problems, contact the Hall Health Triage Nurse line at 206-221-2517 (Mon-Fri, 8a-5p)
For non urgent problems, contact us through My chart or by calling my medical assistant at 206-616-9358
For after hours and weekend care, Hall Health after hours: 206-520-7511.
Thank you for choosing the Hall Health Center. We welcome any feedback about the care you received today.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

After Visit Summary (continued)

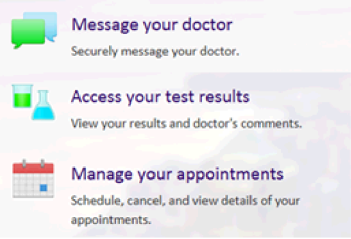
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.



If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Jeanne and Louise:
A prescription for Medihoney was sent to the Rite Aid on high school Road on approximately January 23. I reissued a new prescription today to the same pharmacy.

Let me know what else I need to do in terms of dressing supplies.

William E Neighbor, MD

Visit summary please read

Hoffman, Jeanne Leonie	William E Neighbor Jr., MD	2/8/2023 11:10 AM

In Person Contact made with "BI Rite Aid Pharmacy", concerning : MEDIHONEY.

Advised such prescription had to be " back ordered" once valid PCP Prescription is sent to BI Rite Aid/206-842+-4065

Reason for not filling Medihoney Prescription...NO PCP Prescription on pharmacy order data entry from PCP-HHC. Told unable to fill any order.

Including Medihoney is not stocked for over the counter, must be ordered on eBAY.

Will attempt to make a Wound Care order with: 253-495-7240

Jeanne and Louis: Below is a summary of your visit.

Assessment and Plan:

1. Lower extremity ulceration, left, limited to breakdown of skin

Ulcerations redressed by nurse today.

Plan

Care at home
-- Her son Louis is to contact his regular pharmacy or the medical supplies pharmacy to obtain adequate dressing supplies. Some dressing supplies are given today
--He should not use any topical antibiotic or other chemicals on the wound including dilute chlorine washes.
-- Instead he should use Medihoney dressings. A prescription is sent in. The ulcerations should be washed gently with warm water once daily, dried, then Medihoney applied and a dressing on top of that with gentle wrapping gauze to hold the dressing in place. Avoid wrapping that is applied too tightly which impairs blood flow.

In preparation for visit in 2 weeks and for additional visits:
-- Reminder that she is to bring in her hearing aids
-- Also would advise premedication with Tylenol 500 to 650 mg 30 minutes before her visit. Would prefer to avoid premedication with narcotics because she has had sensitivity to these medications in the past with change in sensorium. Also would avoid ibuprofen or other nonsteroidal anti-inflammatory medications due to her age. At least this would be the plan for now.

Clinical Notes

Progress Notes

Silue, Ruth Ann, RN at 1/10/2023 1020

TRIAGE WOUND CARE/DRESSING CHANGE

SUBJECTIVE:
Jeanne Leonie Hoffman is a 98 year old female presents for wound care of stasus ulcers on Left lower extremity. Wound hx:see provider note.

OBJECTIVE: clean and dry, 3 larger wound with a few small spots. Edges slightly rolled, some slough to the wound bed.

01/10/2023 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

ASSESSMENT: wound care/ dressing change for healing wound.

PLAN: Wound was cleansed with normal saline.
Used curette to debride the edges of wounds with good blood return.
Applied new dressing with Therahoney sheet, vaseline gauze and occlusive dressing without adhesive. Wrapped with Kurlex and covered with elastic netting to keep in place.

Son will continue home care of wounds - states they are having some trouble getting the supplies needed but will continue to try to reach supplier. Provided remaining supplies not used today in clinic.
RTC in 2 weeks to f/u with Dr Neighbor.
Patient voiced understanding and agreement with plan.
Ruth A Silue, RN

Electronically signed by Silue, Ruth Ann, RN at 1/10/2023 11:54 AM

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

After Visit Summary (continued)

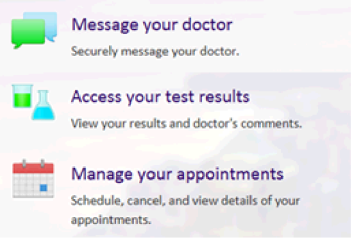
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.



If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 1/10/2023 1000

Jeanne Leonie Hoffman is a 98 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  Wound care

Visit type (in person vs telemedicine vs phone): In person

History
Jane was last seen December 28 for lower extremity ulceration wound care and essential hypertension. Additionally she has had decreased appetite. We had discussed issues including need for obtaining new dentures which was in progress.

She returns with her son Louis today who was present for the visit.

Issues:
--Continued wound care. Jean is here today for repeat wound care by her wound care nurse. Her son reports they have been changing the dressings daily. He feels there is some improvement and no worsening.
--Hypertension. Her son reports that she has been taking her blood pressure medication as prescribed.
--Appetite. Appetite continues to be somewhat decreased. They have not yet obtained the new dentures. This is now expected to occur next week.

Problem List
Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

• Adult failure to thrive syndrome [R62.7]	10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

• Sensorineural hearing loss, unspecified [H90.5]	11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

• Hypercholesterolemia [E78.00]	11/20/2006

On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

• Generalized osteoarthrosis, unspecified site [M15.9]	11/20/2006

LS spine. Bilateral talonavicular arthritis since 1994.

• Essential hypertension, benign [I10]	11/20/2006
• Unspecified glaucoma(365.9) [H40.9]	11/20/2006

4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
William E Neighbor JR, MD

Substance Use Topics

- Alcohol use: No

Objective:

BP (!) 147/73 | Pulse (!) 54
Estimated body mass index is 16.51 kg/m² as calculated from the following:
Height as of 10/21/20: 5' 5" (1.651 m).
Weight as of 10/10/22: 45 kg (99 lb 3.3 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
(!) 147/73	(!) 54	---	---	---	9:51 AM	1/10/2023

Last blood pressure recorded in this encounter: **(!) 147/73**
General: NAD
Jean is well oriented. She did wear her hearing aid today.
Left lower extremity: Toes are warm with good capillary refill. The full-thickness ulceration is as described by the nurse.
Right lower extremity: Skin is intact

Clinical Notes (continued)

Lab and other tests: none

Assessment and Plan:

1. Lower extremity ulceration, left, limited to breakdown of skin

Slowly healing recurrent left lower extremity ulceration due to venous and arterial compromise. Toes are warm today.

Wound was debrided and redressed by nurse. Reviewed home wound care

Next visit in 2 weeks.

2. Essential hypertension, benign

Blood pressures responded nicely to compliance with losartan 25 mg daily.

Plan
Recheck blood pressure at next visit

3. Decreased appetite

In part due to need for new dentures. Hopefully this will be finally resolved next week when they obtain the new dentures.

Follow-up at next visit which is in 2 weeks.

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

How to contact us:
For urgent problems, contact the Hall Health Triage Nurse line at 206-221-2517 (Mon-Fri, 8a-5p)
For non urgent problems, contact us through My chart or by calling my medical assistant at 206-616-9358
For after hours and weekend care, Hall Health after hours: 206-520-7511.
Thank you for choosing the Hall Health Center. We welcome any feedback about the care you received today.

After Visit Summary (continued)

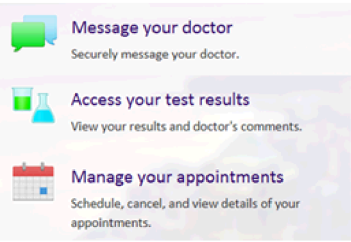
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.



If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Ordered on: 12/13/2022
Start date: 12/13/2022
End date: 1/3/2024
Quantity: 90 tablet
Refill: 3 refills by 12/13/2023

Stopped in Visit

None

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 12/28/2022 1020

S:
Jeanne Leonie Hoffman is 97 year old presents today for wound care.
History of wound: yes, chronic vascular ulcers
Pain: with gentle debridement and specifically to back of calf and lateral area above ankle, improved once wrapped.
Home treatment: Son reports soaking in water with 10:1 or 15:1 bleach 20 minutes QOD and washing with hibiclens, applying povidone iodine, letting dry and covering with vaseline and wrapping.
Other: Son endorses problems getting into contact with wound care supplier.

Location: LLE, multiple ulcerations present on all sides, largest two to left lateral, then one medial and one on back of calf, scattered smaller ulcerations noted in different stages of healing. Abrasion 3 cm behind 3rd digit concerning for new ulceration. Discussed changing footwear.

12/28/2022 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Duration: ongoing from several months to years, depending on what is said.
Measurements:
1. L lateral dorsal foot: 9 cm in length x 5.3 cm width x 0.4 cm depth;
2. Distal lateral tibia: 4 cm x 4 cm;
3. L mid tibia: 5 cm x 3 cm mostly fascia with visible tendons underneath;
4. L posterior mid calf: 2 cm x 2 cm.
5. L medial distal ankle: 3.5 cm x 3.5 cm.
Undermining/Tunneling: no tunneling noted
Wound Bed: slough to wound beds with small areas of granulation tissue
Wound Edges: thickened, red
Exudate: None
Circulation: warm, less sensation to medial LE, painful to back of calf and tender to lateral wounds with gentle debridement
Periwound condition: tight skin but not hot or swollen

A:
Wound Healing Status: ongoing; Distal lateral area of wound 1 which had healed over now has 3 less than 1cm x 1cm ulcers.
Presence of signs of infection or over-colonization? No
Etiology of Wound: mixed pressure and vascular
Extent of Tissue Injury: partial and full thickness wounds, stage 3 pressure to lateral ankle
Barriers/Risk Factors: underlying medical conditions, shoes/clothing, self-care deficits, family doing their own thing

P:
Applied Caradress Hydrogel to all LLE wounds for 10 minutes
Cleansed with NS and debrided with curette
Use of skin barrier - No
Primary dressing and topical: MediHoney Sheet and non adhesive dressing.
Secondary dressing: secured loosely with a sleeve wrap
Debridement Type: mechanical
Pt tolerated the procedure well? Yes

Patient's Home Care Instructions:
- Wash hands before and after wound care with soap and water for at least 15 seconds
- Home care: dressing change QD frequency beginning Friday, 12/30/22, and remove shoes/socks Q2hrs
- Monitor and report increased redness, drainage, warmth, pain, or fevers (greater than 100.5F)
- Follow up: January 10, 2023.

12/28/2022 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

After Visit Summary (continued)

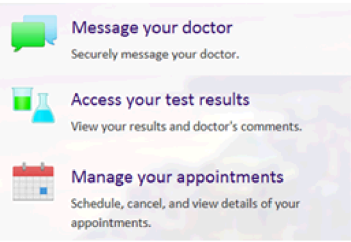
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.



If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

atorvastatin 10 MG tablet

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 1/3/2024
Instructions: Take 1 tablet (10 mg) by mouth daily.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 12/13/2022
Start date: 12/13/2022 — End date: 1/3/2024
Quantity: 90 tablet — Refill: 3 refills by 12/13/2023

Stopped in Visit

None

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 12/28/2022 0940

Jeanne Leonie Hoffman is a 97 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up

Visit type (in person vs telemedicine vs phone): In person

History
Jean is in for follow-up with her son.

Lower extremity ulcerations
She is in for scheduled wound care with a nurse. Her son reports they have been having difficulty getting dressed and dressing supplies.

Hypertension
They have started losartan 25 mg daily in the last week.

Review of Systems:
Jean is without her hearing aids today she forgot them at home.
She will be getting new dentures and the first part of January.

Problem List
Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- Hypercholesterolemia [E78.00] 11/20/2006

On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006

LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006

4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
William E Neighbor JR, MD

Clinical Notes (continued)

- Routine general medical examination at a health care facility [Z00.00] — 11/20/2006

10/21/19	115/60
10/11/19	124/44

General: No acute distress. Difficulties communicating as she does not have her hearing aids today
Repeat blood pressure continues to be elevated
Leg ulcerations as noted by nurse visit today

Lab and other tests: none

Assessment and Plan:
1. Lower extremity ulceration, left, limited to breakdown of skin
Very slowly improving. Debrided and redressed by nurse today
Plan follow-up in 1 to 2 weeks

2. Essential hypertension, benign
Systolic pressure is markedly elevated. Her diastolic pressure is fairly well controlled. The systolic pressure elevation may be due to poorly compressible vasculature due to atherosclerosis. However when she was on losartan 2 to 3 years ago she had good control of blood pressure with the medication. Because of this I expect that she will have some response to the medication once it is fully effective.

Plan continue losartan 25 mg daily and recheck in 2 weeks

3. Decreased appetite
Reviewed nutrition with her son. He is providing her with sources of protein and calories including Ensure. Main issue is getting to dentures. This will happen in early January.

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

How to contact us:
For urgent problems, contact the Hall Health Triage Nurse line at 206-221-2517 (Mon-Fri, 8a-5p)
For non urgent problems, contact us through My chart or by calling my medical assistant at 206-616-9358
For after hours and weekend care, Hall Health after hours: 206-520-7511.
Thank you for choosing the Hall Health Center. We welcome any feedback about the care you received today.

12/28/2022 - Office Visit in Husky Health Primary Care Clinic (continued)

After Visit Summary (continued)

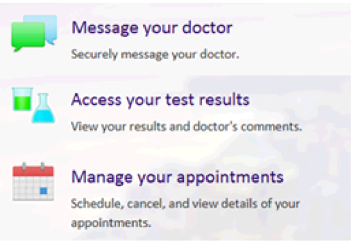
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.



If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

12/28/2022 - Office Visit in Husky Health Primary Care Clinic (continued)

Messages (continued)

2/28/2023 11:12 AM by Hoffman, Jeanne Leonie

Jeanne: Below is a summary of your visit.

Assessment and Plan:
1. Lower extremity ulceration, left, limited to breakdown of skin
Very slowly improving. Debrided and redressed by nurse today
Plan follow-up in 1 to 2 weeks

2. Essential hypertension, benign
Systolic pressure is markedly elevated. Her diastolic pressure is fairly well controlled. The systolic pressure elevation may be due to poorly compressible vasculature due to atherosclerosis. However when she was on losartan 2 to 3 years ago she had good control of blood pressure with the medication. Because of this I expect that she will have some response to the medication once it is fully effective.

Plan continue losartan 25 mg daily and recheck in 2 weeks

3. Decreased appetite
Reviewed nutrition with her son. He is providing her with sources of protein and calories including Ensure. Main issue is getting to dentures. This will happen in early January.

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

How to contact us:
For urgent problems, contact the Hall Health Triage Nurse line at 206-221-2517 (Mon-Fri, 8a-5p)
For non urgent problems, contact us through My chart or by calling my medical assistant at 206-616-9358
For after hours and weekend care, Hall Health after hours: 206-520-7511.
Thank you for choosing the Hall Health Center. We welcome any feedback about the care you received today.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

End date: 1/3/2024
Refill: 3 refills by 12/13/2023

Stopped in Visit

None

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 12/15/2022 1040

S:
Jeanne Leonie Hoffman is 97 year old presents today for wound care.
History of wound: yes, chronic vascular ulcers
Pain: with gentle debridement and specifically to back of calf and lateral area above ankle, improved once wrapped.
Home treatment: Son reports soaking in water with 10:1 or 15:1 bleach 20 minutes QOD and washing with hibiclens, applying povidone iodine, letting dry and covering with vaseline and wrapping.

12/15/2022 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Other: Discussed trying vaseline gauze and they would like to get this prescribed.

Location: LLE, multiple ulcerations present on all sides, largest two to left lateral, then one medial and one on back of calf, scattered smaller ulcerations noted in different stages of healing.
Duration: ongoing from several months ago
Measurements: Largest measuring 9 cm in length x 6 cm width x 0.4 cm depth
Undermining/Tunneling: no tunneling noted
Wound Bed: slough to wound beds with small areas of granulation tissue
Wound Edges: thickened, red
Exudate: None
Circulation: warm, less sensation to medial LE, painful to back of calf and tender to lateral wounds with gentle debridement
Periwound condition: tight skin but not hot or swollen

A:
Wound Healing Status: ongoing; Continued improvement, will measure next time.
Presence of signs of infection or over-colonization? No
Etiology of Wound: mixed pressure and vascular
Extent of Tissue Injury: partial and full thickness wounds, stage 3 pressure to ankle
Barriers/Risk Factors: underlying medical conditions, shoes/clothing, self-care deficits

P:
Wrapped a warm moist blanket around the LLE for 10 minutes
Cleansed with NS and debrided with curette
Use of skin barrier - No
Primary dressing and topical: MediHoney Sheet and non adhesive dressing.
Secondary dressing: secured loosely with a sleeve wrap
Debridement Type: mechanical
Pt tolerated the procedure well? Yes

Patient's Home Care Instructions:
- Wash hands before and after wound care with soap and water for at least 15 seconds
- Home care: dressing change QD frequency and remove shoes/socks Q2hrs
- Monitor and report increased redness, drainage, warmth, pain, or fevers (greater than 100.5F)
- Follow up: scheduled 12/15/2022

Electronically signed by Perez, Delmis Joel, RN at 12/15/2022 12:36 PM

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 12/15/2022 1020

Jeanne Leonie Hoffman is a 97 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  Wound care and BP f/u

Visit type (in person vs telemedicine vs phone): In person

History
Jeanne was last seen 2 weeks ago for lower extremity ulcerations. She has an appointment with nurse for wound care today. Other issues at that visit included:

-- Essential hypertension for which she was restarted on losartan 25 mg 1/2 tablet daily
-- Decreased appetite. This was in part related to need to be refitted for dentures which was being organized. She was encouraged to eat puréed foods as well as use supplemental Ensure
-- We also discussed obtaining help from visiting nurses and home physical therapy on Bainbridge.

Jean comes in with her son Louis today for follow-up. Her son reports daily dressing changes. He feels there is been some improvement in the wound. There is an appointment with our nurse today.

Louis only recently saw the message to add back losartan 1/2 tablet daily. He reports he does have a bottle of medication and will now do so.

Review of Systems:
No fever chills or sweats. Jean is interactive today. There was quite a bit of stress in getting to clinic due to issues with transit from Bainbridge Island

Problem List
Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- Hypercholesterolemia [E78.00] 11/20/2006

On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006

LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006

Clinical Notes (continued)

- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001. Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 . Advise Vit D 800 IU daily.

- Primary open angle glaucoma (POAG) of both eyes [H40.1130] 10/10/2019
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC) [I70.232, I70.242] 09/24/2018
- Vitamin D deficiency [E55.9] 07/09/2018
- Primary osteoarthritis of both hips [M16.0] 02/01/2017
- Imbalance [R26.89] 11/02/2016
- History of recurrent deep vein thrombosis (DVT) [Z86.718] 06/02/2016
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication (HCC) [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

After Visit Summary (continued)

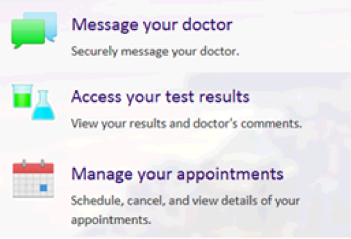
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?

The specialty care clinic will contact you once they have reviewed your referral to ensure you are scheduled appropriately. If you have not heard from them within 5 business days, please call the clinic or check your MyChart account to see the status of your referral.



If you received a paper referral to see a specialist outside of UW Medicine, you may contact them directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Atorvastatin refill

From	To	Sent and Delivered
William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	12/13/2022 11:29 AM

Last Read in MyChart
Not Read

I refilled your atorvastatin for 10 mg tablets of which you would take 1/day. This replaces the prescription for 20 mg tablets of which you are taking 1/2 tablet (10 mg) per day. With this prescription you will not need to split tablets which should make it easier.

Best regards
William E Neighbor, MD

11/30/2022 - Office Visit in Husky Health Primary Care Clinic

Reason for Visit

Chief complaint: Follow-Up
Visit diagnoses:

- Lower extremity ulceration, left, limited to breakdown of skin (primary)
- Essential hypertension, benign
- Decreased appetite
- Hypercholesterolemia
- Type 2 diabetes mellitus without complication, without long-term current use of insulin

Progress Notes

Neighbor Jr., William E, MD at 11/30/2022 0940

Is to hold but you do Jeanne Leonie Hoffman is a 97 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  Wound care

Visit type (in person vs telemedicine vs phone): In person. Her son Luis accompanies her.

History
Jean is seen today for follow-up wound care of ulcerations of the lower extremities and follow-up blood pressure. At her last visit in early November she had also been seen for dry skin.

Issues today:
--Wound care. Her son has been dressing the skin breakdown/ulcerations of the left lower leg. There have not been anynew lesions. She is in to see the nurse for wound care

--Elevated blood pressure. Her blood pressures have been persistently elevated in clinic. Review of her blood pressure shows that they have been elevated since about 2020. Prior to that she was on a low-dose of losartan 25 mg 1/2 tablet daily.

--Nutrition. She is getting new dentures. Her son purees soups for her and provides ensure

--living situation. Currently Jeanne and son in one bedroom apartment. With new manager they are trying to get a two bed room apt.

--ambulation. Due to weather and small apartment, she is not getting much ambulation indoors. She is in her wheelchair most of the time.

Review of Systems:
No fever chills or night sweats. No shortness of breath. No nausea or vomiting. She does have chronic pain in her hips and knees due to DJD.

Problem List
Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

11/30/2022 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001. Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 . Advise Vit D 800 IU daily.

- Primary open angle glaucoma (POAG) of both eyes [H40.1130] 10/10/2019
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC) [I70.232, I70.242] 09/24/2018
- Vitamin D deficiency [E55.9] 07/09/2018
- Primary osteoarthritis of both hips [M16.0] 02/01/2017
- Imbalance [R26.89] 11/02/2016
- History of recurrent deep vein thrombosis (DVT) [Z86.718] 06/02/2016
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication (HCC) [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

Assessment and Plan:

1. Lower extremity ulceration, left, limited to breakdown of skin

Wound care provided today by nurse. Dressing supplies and instructions provided.

Plan

Follow-up 40-minute nurse specific visit in 2 weeks. Sooner if needed.

2. Essential hypertension, benign

Review of her blood pressures shows that prior to 2020 her systolic pressure was running 1 35-1 45. More recently it has been running 1 65-1 75. She had been on a low-dose of losartan which was discontinued during one of her hospitalizations for a fall. Otherwise she has tolerated the medication well. Her labs are current. Her kidney function is stable.

Plan

Restart losartan 25 mg 1/2 tablet daily.
Recheck blood pressure in the follow-up visit

3. Decreased appetite

Encouraged her to consume the puréed soups and other good foods that her son is preparing for her. They are using supplemental Ensure.

4. Hypercholesterolemia

Cholesterols been well controlled on low-dose of statin. As noted in her problem list when we have discontinued the statin in the past the LDL is markedly elevated. Therefore we will continue the statin.

5. Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)

While she was on metformin in the past, more recently her blood sugars and A1c have been well controlled with diet alone as she gets older.

We did briefly discuss obtaining help from visiting nurses and home physical therapy on Bainbridge. According to her

Clinical Notes (continued)

son Louis there have been some issues with this in the past. We will discuss further at the follow-up visit.

The next visit with me would be in 2 weeks for 20 minutes.

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

How to contact us:
For urgent problems, contact the Hall Health Triage Nurse line at 206-221-2517 (Mon-Fri, 8a-5p)
For non urgent problems, contact us through My chart or by calling my medical assistant at 206-616-9358
For after hours and weekend care, Hall Health after hours: 206-520-7511.
Thank you for choosing the Hall Health Center. We welcome any feedback about the care you received today.

11/30/2022

Wound Care Visit

S:
Jeanne Leonie Hoffmanwho is 97 year old presents today for wound care.
History of wound: yes, chronic vascular ulcers
Pain: with gentle debridement and specifically to back of calf and lateral area above ankle, improved once wrapped.
Home treatment: Son reports soaking in water with 10:1 or 15:1 bleach 20 minutes QOD and washing with hibiclens, applying povidone iodine, letting dry and covering with vaseline and wrapping.
Other: Discussed trying vaseline gauze and they would like to get this prescribed.

Location: LLE, multiple ulcerations present on all sides, largest two to left lateral, then one medial and one on back of calf, scattered smaller ulcerations noted in different stages of healing.
Duration: ongoing from several months ago
Measurements: Largest measuring 9 cm in length x 6 cm width x 0.4 cm depth
Undermining/Tunneling: no tunneling noted
Wound Bed: slough to wound beds with small areas of granulation tissue
Wound Edges: thickened, red
Exudate: None
Circulation: warm, less sensation to medial LE, painful to back of calf and tender to lateral wounds with gentle debridement
Periwound condition: tight skin but not hot or swollen

A:
Wound Healing Status: ongoing; Much better than my first experience with this pt.
Presence of signs of infection or over-colonization? No
Etiology of Wound: mixed pressure and vascular
Extent of Tissue Injury: partial and full thickness wounds, stage 3 pressure to ankle
Barriers/Risk Factors: underlying medical conditions, shoes/clothing, self-care deficits

P:

11/30/2022 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Wrapped a warm moist blanket around the LLE for 10 minutes
Cleansed with NS and debrided with curette
Use of skin barrier - No
Primary dressing and topical: MediHoney Sheet and non adhesive dressing.
Secondary dressing: secured loosely with a sleeve wrap
Debridement Type: mechanical
Pt tolerated the procedure well? Yes

Patient's Home Care Instructions:

- Wash hands before and after wound care with soap and water for at least 15 seconds
- Home care: dressing change QD frequency and remove shoes/socks Q2hrs
- Monitor and report increased redness, drainage, warmth, pain, or fevers (greater than 100.5F)
- Follow up: scheduled 12/15/2022

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Today's Visit

You saw William E Neighbor, MD on Wednesday November 30, 2022. The following issues were addressed:

- Lower extremity ulceration, left, limited to breakdown of skin
- Essential hypertension, benign
- Decreased appetite
- Hypercholesterolemia
- Type 2 diabetes mellitus without complication, without long-term current use of insulin

Blood Pressure 168/74
Pulse 60

After Visit Summary (continued)

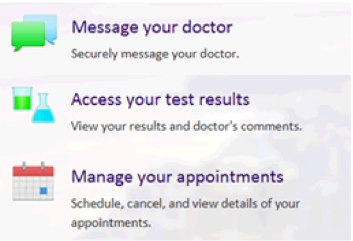
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

Jeanne and Louis: Below is a summary of your visit. I reviewed blood pressures and prior treatment for blood pressure in greater depth after your visit. Please see item to below. I have sent in a prescription to restart a low-dose of losartan 25 mg 1/2 tablet daily.

Assessment and Plan:
1. Lower extremity ulceration, left, limited to breakdown of skin
Wound care provided today by nurse. Dressing supplies and instructions provided.

Plan
Follow-up 40-minute nurse specific visit in 2 weeks. Sooner if needed.

2. Essential hypertension, benign
Review of her blood pressures shows that prior to 2020 her systolic pressure was running 1 35-1 45. More recently it has been running 1 65-1 75. She had been on a low-dose of losartan which was discontinued during one of her hospitalizations for a fall. Otherwise she has tolerated the medication well. Her labs are current. Her kidney function is stable.

Plan
Restart losartan 25 mg 1/2 tablet daily.
Recheck blood pressure in the follow-up visit

3. Decreased appetite
Encouraged her to consume the puréed soups and other good foods that her son is preparing for her. They are using supplemental Ensure.

4. Hypercholesterolemia
Cholesterols been well controlled on low-dose of statin. As noted in her problem list when we have discontinued the statin in the past the LDL is markedly elevated. Therefore we will continue the statin.

5. Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)
While she was on metformin in the past, more recently her blood sugars and A1c have been well controlled with diet alone as she gets older.

We did briefly discuss obtaining help from visiting nurses and home physical therapy on Bainbridge. According to her son Louis there have been some issues with this in the past. We will discuss further at the follow-up visit.

The next visit with me would be in 2 weeks for 20 minutes.

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

How to contact us:
For urgent problems, contact the Hall Health Triage Nurse line at 206-221-2517 (Mon-Fri, 8a-5p)
For non urgent problems, contact us through My chart or by calling my medical assistant at 206-616-9358
For after hours and weekend care, Hall Health after hours: 206-520-7511.
Thank you for choosing the Hall Health Center. We welcome any feedback about the care you received today.

cephalexin (Keflex) 500 MG capsule

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 3/28/2023
Reason for discontinuation: Reorder
Instructions: Take 1 capsule (500 mg) by mouth 4 times a day for 7 days.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 5/5/2021
Start date: 5/5/2021
End date: 3/28/2023
Quantity: 28 capsule
Refill: Partial refill of 24 capsules by 5/5/2022

atorvastatin 20 MG tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 12/13/2022
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/13/2021
Start date: 10/13/2021
End date: 12/13/2022
Quantity: 45 tablet
Refill: 3 refills by 10/13/2022

timolol maleate 0.5 % ophthalmic solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 2/24/2023
Instructions: instill one drop in each eye twice daily. block tear duct for 1-2 min after use
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/9/2021
Start date: 12/9/2021
End date: 2/24/2023
Quantity: 10 mL
Refill: 6 refills by 12/9/2022

pentoxifylline ER 400 MG ER tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 1/23/2023
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/27/2021
Start date: 12/27/2021
End date: 1/23/2023
Quantity: 90 tablet
Refill: 6 refills by 12/27/2022

ofloxacin 0.3 % ophthalmic solution

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Place 1-2 drops into left EYE 4 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/10/2022
Start date: 10/10/2022
End date: 6/12/2024
Action: Patient not taking
Quantity: 5 mL
Refill: 1 refill by 10/10/2023

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 11/3/2022 0900

Jeanne Leonie Hoffman is a 97 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  Wound care

Visit type (in person vs telemedicine vs phone): In person
Son Louis present with her today as usual.

History
Follow up leg ulcers
See last visit. In for review of wound care. At home have been using very dilute chlorox1 to 50 "swimming pool" strength of washing. Applying non adherent dressings. No fever or chills.

Dry skin
She has had dry skin of her face.

Conjunctivitis
No further complaints of redness or crusting. Completed antibiotic. No change in vision.

Follow up labs
In to review labs.

Vaccines
COVID and flu vaccines done at last visit.

Problem List
Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006

On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006

LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006

4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001. Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 . Advise Vit D 800 IU daily.

- Primary open angle glaucoma (POAG) of both eyes [H40.1130] 10/10/2019
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC) [I70.232, I70.242] 09/24/2018
- Vitamin D deficiency [E55.9] 07/09/2018
- Primary osteoarthritis of both hips [M16.0] 02/01/2017
- Imbalance [R26.89] 11/02/2016
- History of recurrent deep vein thrombosis (DVT) [Z86.718] 06/02/2016
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication (HCC) [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

Medications

Outpatient Medications Marked as Taking for the 11/3/22 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill

• timolol maleate 0.5 % ophthalmic solution	instill one drop in each eye twice daily. block tear duct for 1-2 min after use	10 mL	6

Social history:

History

Sexual Activity

- Sexual activity: Not Currently

Social History

Tobacco Use

- Smoking status: Never
- Smokeless tobacco: Never

Substance Use Topics

- Alcohol use: No

Objective:

BP (!) 173/100 | Pulse 60
Estimated body mass index is 16.51 kg/m² as calculated from the following:
Height as of 10/21/20: 5' 5" (1.651 m).
Weight as of 10/10/22: 45 kg (99 lb 3.3 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
(!) 173/100	60	---	---	---	8:50 AM	11/3/2022

Last blood pressure recorded in this encounter: **(!) 173/100**
General: NAD
Left lower leg shows to two large areas of skin breakdown Measuring 4 x 6 cm and 3x4 cm without adherent exudate or surround erythema.

Lab and other tests: Reviewed labs. Mild hyperglycemia which has been diet controll.ed MCV elevated but not too much above baseline. B12 level actually elevated. Hematocrit and Hemoglobin normal.

Assessment and Plan:

1. Lower extremity ulceration, left, limited to breakdown of skin
Wound care today thru nurse
Follow up two weeks

2. Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)
Overall diet controlled

3. Elevated MCV
B12 was normal.
Will recheck in a few months.
Son had incorrectly started treating her with iron. Discussed she is not anemic and does not need iron which will cause constipation

4. Acute bacterial conjunctivitis of left eye
Resolved

5. Essential hypertension, benign
Elevate in the office
At home no recent readings.

Plan:
--Home blood pressure readings to be done daily for one week. Send me the numbers

6. Dry skin
See below

Treatment for dry skin and eczema

Avoid most soaps except perhaps neutrogena or other hypoallergenic soaps
Tepid rather than hot showers
Pat rather than rub skin dry
After showering apply lubriderm, hydroeucerin other hydrating cream to body. Prefer thicker cream from a tub rather than something that is thin enough to be squeezed from a tube.

Use steroid cream such as triamcinolone to decrease inflamation. Usually takes about 5-7 days before benefit is seen.

For skin lubricants
Common lotioins are : Cetaphil, Cerave, Curel, Neutrogena body emulsion, Pen-Kera, DML, Keri, Lubriderm and Moisturel. Lotions are easy to apply but may not sufficiently protect the skin from drying

Creams are usually more effective in treating dry skin. Common creams are Cerave, Eucerin, and Cetaphil. They usually come in a jar.

Ointments tend to be greasy. Two common brands are Vaseline and Aquaphor. Applying them after showering can reduce the amount that is needed.

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

How to contact us:
For urgent problems, contact the Hall Health Triage Nurse line at 206-221-2517 (Mon-Fri, 8a-5p)
For non urgent problems, contact us through My chart or by calling my medical assistant at 206-616-9358
For after hours and weekend care, Hall Health after hours: 206-520-7511.

Noeldner, Jessica P, RN at 11/3/2022 0900

97 yo F here for wound care for ongoing LLE ulcerations following appt with Dr. Neighbor.

Wound Care Visit

S:
Jeanne Leonie Hoffmanwho is 97 year old presents today for wound care.
History of wound: yes, chronic vascular ulcers
Pain: with gentle debridement and specifically to back of calf and lateral area above ankle, improved once wrapped.
Home treatment: Son reports soaking 20 minutes QOD and washing with hibaclense, applying provoiodine, letting dry and covering with vaseline and wrapping.
Other: Discussed trying vaseline gauze and they would like to get this prescribed.

Location: LLE, multiple ulcerations present on all sides, largest two to left lateral, then one medial and one on back of calf, scattered smaller ulcerations noted in different stages of healing.
Duration: about 3 weeks, but has been ongoing issue from months ago
Measurements: Largest measuring 9 cm in length x 6 cm width x 0.4 cm depth
Undermining/Tunneling: no tunneling noted
Wound Bed: slough to wound beds with small areas of granulation tissue
Wound Edges: thickened, red
Exudate: No odor, scant serosang after cleaning and gentle mechanical debridement
Circulation: warm, less sensation to medial LE, painful to back of calf and tender to lateral wounds with gentle debridement
Periwound condition: tight skin but not hot or swollen

BP (!) 173/100 | Pulse 60

A:
Wound Healing Status: ongoing Son reports this is much improved from last visit but this RN has not seen wound to compare. MD also reports improvement.
Presence of signs of infection or over-colonization? No
Etiology of Wound: mixed pressure and vascular
Extent of Tissue Injury: partial and full thickness wounds, stage 3 pressure to ankle
Barriers/Risk Factors: underlying medical conditions, shoes/clothing

P:
Cleansed with NS and debrided with gauze
Use of skin barrier - Y
Primary dressing and topical: Medi honey, Vaseline gauze and non adhesive dressing.
Secondary dressing: secured loosely with a sleeve wrap
Debridement Type: mechanical
Pt tolerated the procedure well? Y

Patient's Home Care Instructions:

11/03/2022 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

- Wash hands before and after wound care with soap and water for at least 15 seconds
- Home care: dressing change QD frequency and remove shoes/socks Q2hrs
- Monitor and report increased redness, drainage, warmth, pain, or fevers (greater than 100.5F)
- Follow up: scheduled 11/30/22

Instructions from William E Neighbor, MD

Your personalized instructions can be found at the end of this document.

What's Next

You currently have no upcoming appointments scheduled.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Today's Visit

You saw William E Neighbor, MD on Thursday November 3, 2022. The following issues were addressed:

- Lower extremity ulceration, left, limited to breakdown of skin
- Type 2 diabetes mellitus without complication, without long-term current use of insulin
- Elevated MCV
- Acute bacterial conjunctivitis of left eye
- Essential hypertension, benign

After Visit Summary (continued)

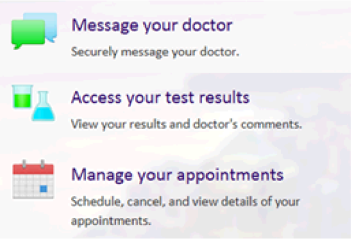
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

Set Up Your Account:

You currently have no upcoming appointments scheduled.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

Today's Visit

You saw William E Neighbor, MD on Thursday November 3, 2022. The following issues were addressed:

- Lower extremity ulceration, left, limited to breakdown of skin
- Type 2 diabetes mellitus without complication, without long-term current use of insulin
- Elevated MCV
- Acute bacterial conjunctivitis of left eye
- Essential hypertension, benign

Blood Pressure 173/100

Pulse 60

11/03/2022 - Office Visit in Husky Health Primary Care Clinic (continued)

Documents (continued)

Instructions from William E Neighbor, MD

Assessment and Plan:

1. Lower extremity ulceration, left, limited to breakdown of skin
Wound care today thru nurse
Follow up two weeks

2. Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)
Overall diet controlled

3. Elevated MCV
B12 was normal.
Will recheck in a few months.
Son had incorrectly started treating her with iron. Discussed she is not anemic and does not need iron which will cause constipation

4. Acute bacterial conjunctivitis of left eye
Resolved

5. Essential hypertension, benign
Elevate in the office
At home XXX

6. Dry skin

Treatment for dry skin and eczema

Avoid most soaps except perhaps neutrogena or other hypoallergenic soaps
Tepid rather than hot showers
Pat rather than rub skin dry
After showering apply lubriderm, hydroeucerin other hydrating cream to body. Prefer thicker cream from a tub rather than something that is thin enough to be squeezed from a tube.

Use steroid cream such as triamcinolone to decrease inflamation. Usually takes about 5-7 days before benefit is seen.

For skin lubricants
Common lotioins are : Cetaphil, Cerave, Curel, Neutrogena body emulsion, Pen-Kera, DML, Keri, Lubriderm and Moisturel. Lotions are easy to apply but may not sufficiently protect the skin from drying

Creams are usually more effective in treating dry skin. Common creams are Cerave, Eucerin, and Cetaphil. They usually come in a jar.

Ointments tend to be greasy. Two common brands are Vaseline and Aquaphor. Applying them after showering can reduce the amount that is needed.

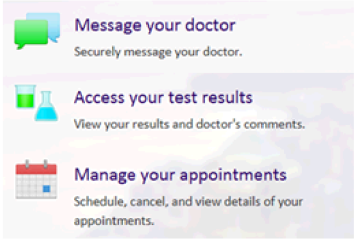
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

United Health Insurance

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	10/27/2022 2:06 PM

We are not satisfied, with MOLINA, therefore need to understand if United Health Insurance is perfected by you ,to cover all of medical needs.

It seem less restricting,
limited lab test restrictions.

However, you knowledge, would greatly assist.

Other Option: WELLCARE DUAL LIBERTY (HMO D-SNP)

10/10/2022 - Office Visit in Husky Health Primary Care Clinic

Reason for Visit

Chief complaint: Follow-Up
Visit diagnoses:

- Lower extremity ulceration, left, limited to breakdown of skin (primary)
- Type 2 diabetes mellitus without complication, without long-term current use of insulin
- Elevated MCV
- Vaccine counseling
- Acute bacterial conjunctivitis of left eye

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 10/10/2022 0940

Jeanne Leonie Hoffman is a 97 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up

Visit type (in person vs telemedicine vs phone): In person

History

Jeane is brought in by her son who cares for her. She brought in banana bread that she had made yesterday for the

staff.

Her son reports that he had not been looking at Jeanne's leg for a couple of weeks and now notices recurrence of ulcers on the left lower leg. The right leg is fine. She has mild pain of the left lower leg.

Jeane has not had fever or chills. There is been minimal surrounding redness in the lower leg.

She is due for vaccines and would like Flu and COVID19 boosters.

She reports in the last three days she has awoken with crusting of the left eye lids with some redness.

She is wearing hearing aids today and understand most of what we are speaking about.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008
Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006

On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006

LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006

4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006

Td/Tdap (q 10 yr): See immmunizations
Pneumococcal (65 yoa and high risk x1): See imms
Blood pressure: Dx hypertension

Cholesterol: dx hyperlipidemia
Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
Pap smear (q2-3 yrs to age 65)--82 years old
Colorectal cancer screening: Sig to 30 cm in May 2001. Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
Tobacco: no
Alcohol: no
Drugs: no
Sexual practice/contraception: Not active
Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.
Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 . Advise Vit D 800 IU daily.

- Primary open angle glaucoma (POAG) of both eyes [H40.1130] 10/10/2019
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC) [I70.232, I70.242] 09/24/2018
- Vitamin D deficiency [E55.9] 07/09/2018
- Primary osteoarthritis of both hips [M16.0] 02/01/2017
- Imbalance [R26.89] 11/02/2016
- History of recurrent deep vein thrombosis (DVT) [Z86.718] 06/02/2016
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication (HCC) [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

Objective:

BP (!) 177/76 | Pulse (!) 56 | Wt 45 kg (99 lb 3.3 oz) | BMI 16.51 kg/m²
Estimated body mass index is 16.51 kg/m² as calculated from the following:
Height as of 10/21/20: 5' 5" (1.651 m).
Weight as of this encounter: 45 kg (99 lb 3.3 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
(!) 177/76	(!) 56	---	---	---	9:04 AM	10/10/2022

Last blood pressure recorded in this encounter: **(!) 177/76**
General: NAD
Left lower leg shows five superficial ulcers with exudate with minimal marginal redness. These measure 2 cm to 3 x 5 cm
Eyes; Right eye clear. Left eye shows conjunctival injection without periorbital swelling. EOM full without pain.

Lab and other tests: pending

Assessment and Plan:

1. Lower extremity ulceration, left, limited to breakdown of skin
Lower lower leg several superficial ulcers above the ankle. Do not appear infected. These had been healed last

Clinical Notes (continued)

Spring

Plan:'
--Dressing today with vaseline gauze and non adherent dressing
--Dressing supplies. Medihoney can be obtained without a prescription.
--Her son Louis has done a good job in caring for these in the past. He had not realized she had these new ulcers. He will continue to follow. If needed, can have visit nurse in Bainbridge work with them.
--Follow up here in 2-3 weeks

2. Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)
Well controlled by diet alone in this 98 year old kind woman

3. Elevated MCV
At visit in Spring MCV was elevated. Plan had been to check B12 level which was not done

Plan:
Vitamin B12 level today
Repeat CBC

Vaccine counseling
Due for high dose flu vaccine
COVID 19 bivalent booster here or at pharmacy.

(H10.32) Acute bacterial conjunctivitis of left eye
Sulfa allergic so will not use Polytrim. Prescribed ofloxacin eye drops to be used four times daily for five days. If right eye also becomes involved then use in both eyes.

COVID-19 Vaccine Intake Documentation

Pre-Vaccination Screening Questions:

1. Are you feeling sick today? • If patient is COVID-19 positive or COVID-19 like symptoms, reschedule when no longer infectious (at least 10 days post positive test, resolution of fever without fever reducing medications, and improvement of symptoms). If patient is COVID negative, patient should be informed that vaccine can result in flu-like symptoms before proceeding. Patients no longer have to wait 90 days post COVID infection for the vaccine.	**NO**
2. Have you ever received a dose of COVID-19 vaccine?	**YES**
If yes, which vaccine product?	**Pfizer**
3. Have you ever had a severe allergic reaction	

10/10/2022 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

(e.g., anaphylaxis) to something? For example, a reaction for which you were treated with epinephrine or Epi Pen® or for which you had to go to the hospital? • If yes, please review questions below:	**NO**
• Was the severe allergic reaction after receiving a COVID-19 vaccine? • If yes to severe reaction (anaphylaxis) after COVID-19 vaccine, HARD STOP, DO NOT ADMINISTER	**NO**
• Was the severe allergic reaction after receiving another vaccine or another injectable medication? • If yes to severe reaction (anaphylaxis) after another vaccine/injectable (not COVID-19 vaccine), this is a precaution and can administer vaccine. Observe 30 minutes.	**NO**
4. Do you attest that you meet the CDC eligibility criteria for this vaccine shot?	**Yes**

Electronically signed by Tesfay, Lemlem H, CMA at 10/10/2022 12:43 PM

Perez, Delmis Joel, RN at 10/10/2022 0940

Left Lower Extremity wounds dressed with Vaseline gauze over the big wounds and a Telfa over a small superior foot uncovered area, wrapped with Kerlix, then wrapped with Coban.

Result Notes

William E Neighbor Jr., MD
10/11/2022 12:13 PM PDT

Jeanne:
Your vitamin B12 level and folate are completely normal and infact higher than they need to be. You could cut down on the amount of vitamin you are taking. Your blood count continues to show your red blood cells to be a bit larger in size than they have been in the past but not extremely so. We will monitor.

Patient Instructions

Assessment and Plan:

1. Lower extremity ulceration, left, limited to breakdown of skin

Lower lower leg several superficial ulcers above the ankle. Do not appear infected. These had been healed last Spring

Plan:'
--Dressing today with Medihoney and non adherent dressing
--Dressing supplies
--Her son Louis has done a good job in caring for these in the past. He had not realized she had these new ulcers. He will continue to follow. If needed, can have visit nurse in Bainbridge work with them.
--Follow up here in 2-3 weeks

2. Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)

Well controlled by diet alone in this 98 year old kind woman

3. Elevated MCV

At visit in Spring MCV was elevated. Plan had been to check B12 level which was not done

Plan:
Vitamin B12 level today
Repeat CBC

Vaccine counseling

Due for high dose flu vaccine
COVID 19 bivalent booster here or at pharmacy.

(H10.32) Acute bacterial conjunctivitis of left eye

Sulfa allergic so will not use Polytrim. Prescribed ofloxacin eye drops to be used four times daily for five days. If right eye also becomes involved then use in both eyes.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

After Visit Summary (continued)

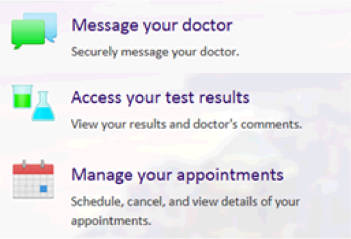
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

Set Up Your Account:
Go to mychart.uwmedicine.org and click Sign Up

Need access to a family member?

pentoxifylline ER 400 MG ER tablet Commonly known as: TRENtal	Take 1 tablet (400 mg) by mouth 3 times a day.
timolol maleate 0.5 % ophthalmic solution Commonly known as: Timoptic	instill one drop in each eye twice daily. block tear duct for 1-2 min after use

10/10/2022 - Office Visit in Husky Health Primary Care Clinic (continued)

Documents (continued)

Instructions from William E Neighbor, MD

Assessment and Plan:

1. Lower extremity ulceration, left, limited to breakdown of skin
Lower lower leg several superficial ulcers above the ankle. Do not appear infected. These had been healed last Spring

Plan:'
--Dressing today with Medihoney and non adherent dressing
--Dressing supplies
--Her son Louis has done a good job in caring for these in the past. He had not realized she had these new ulcers. He will continue to follow. If needed, can have visit nurse in Bainbridge work with them.
--Follow up here in 2-3 weeks

2. Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)
Well controlled by diet alone in this 98 year old kind woman

3. Elevated MCV
At visit in Spring MCV was elevated. Plan had been to check B12 level which was not done

Plan:
Vitamin B12 level today
Repeat CBC

Vaccine counseling
Due for high dose flu vaccine
COVID 19 bivalent booster here or at pharmacy.

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

How to contact us:
For urgent problems, contact the Hall Health Triage Nurse line at 206-221-2517 (Mon-Fri, 8a-5p)
For non urgent problems, contact us through My chart or by calling my medical assistant at 206-616-9358
For after hours and weekend care, Hall Health after hours: 206-520-7511.
Thank you for choosing the Hall Health Center. We welcome any feedback about the care you received today.

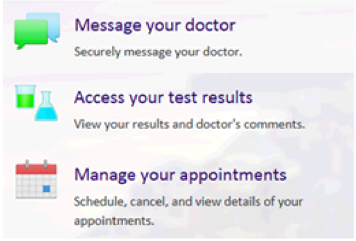
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

09/08/2022 - Patient Web Update in Husky Health Same Day Clinic (continued)

Messages (continued)

Good Afternoon Jeane,

Thank you for your My Chart appointment request. I have scheduled you for the following visit:

Appointment Date: Monday September 10, 2022
Appointment Time: 9:40 am
Provider: Dr. William Neighbor
Location: Hall Health Center

** If you are experiencing any covid like symptoms or had exposure to any confirmed positives or are in need to reschedule the appointment, we ask that you give us a call at 206-685-1011 to reschedule.

Please arrive 10-15 minutes prior to your appointment time for check-in. Please be prepared to be screened for Covid symptoms upon entry also be prepared to show your photo ID and insurance information. As a reminder, appointments that are cancelled late or no showed may result in a fee.

We are asking that all patients entering the building to have a mask on. We are also asking that any friends, family etc... wait outside (except for care givers or children) as we are limiting entry to our facility to patients only.

Parking is available in the Padelford Hall lots, N21 and N20. Parking anywhere else requires a pre-authorization with HHC staff and you must inform check-in staff where you parked or you will be ticketed.

Appointment Request From: Jeanne Leonie Hoffman

With Provider: William E Neighbor, MD [Hall Health Same Day]

Preferred Date Range: 10/5/2022 – 10/12/2022

Preferred Times: Any Time

Reason for visit: Wellness Visit

Comments:
Schedule for morning 9:30a.

07/21/2022 - Health Maintenance Letter

Letters

Reminder by Uw Mychart, Patient User on 7/21/2022

Status: Sent
Letter body:

Dear Jeane Hoffman,

Thank you for choosing UW Medicine! Your Primary Care Provider, William E Neighbor, MD, would like for you to schedule your Annual Wellness Visit; a no-cost preventative care benefit offered by Medicare Advantage. Your healthcare team believes this opportunity extends your options for maintaining and maximizing good health.

What is the Annual Wellness Visit?
This visit consists of a health risk assessment, provider consultation where you discuss your health needs and risks with the provider. You can also help create a personalized preventative care plan to keep you healthy. We will review your list of medications and compile a list of your current healthcare providers. Other services may be combined with this visit, however there may be additional charges.

William E Neighbor, MD would like for you to have this visit done in-person or via Telemedicine if you prefer. You can schedule this visit with your PCP or the Nurse Care Manager on their team.

To schedule your Annual Wellness Visit, please click here.

If you've already had your Annual Wellness Visit completed or if you are receiving routine medical care elsewhere, please contact the clinic at 206-685-1011 or click here to send us a message so that we can update our records.

We appreciate the trust you put in us to take care of your healthcare needs.

Sincerely,

Your Clinical Care Team
UW Medicine Primary Care

Clinical Notes

Progress Notes

Erhardt, Mark Allen, CMA at 4/27/2022 0900

COVID-19 Vaccine Intake Documentation

Pre-Vaccination Screening Questions:

1. Are you feeling sick today? • If patient is COVID-19 positive or COVID-19 like symptoms, reschedule when no longer infectious (at least 10 days post positive test, resolution of fever without fever reducing medications, and improvement of symptoms). If patient is COVID negative, patient should be informed that vaccine can result in flu-like symptoms before proceeding. Patients no longer	**NO**

04/27/2022 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

have to wait 90 days post COVID infection for the vaccine.	
2. Have you ever received a dose of COVID-19 vaccine?	**NO**
If yes, which vaccine product?	**Pfizer**
3. Have you ever had a severe allergic reaction (e.g., anaphylaxis) to something? For example, a reaction for which you were treated with epinephrine or Epi Pen® or for which you had to go to the hospital? • If yes, please review questions below:	**NO**
• Was the severe allergic reaction after receiving a COVID-19 vaccine? • If yes to severe reaction (anaphylaxis) after COVID-19 vaccine, HARD STOP, DO NOT ADMINISTER	**NO**
• Was the severe allergic reaction after receiving another vaccine or another injectable medication? • If yes to severe reaction (anaphylaxis) after another vaccine/injectable (not COVID-19 vaccine), this is a precaution and can administer vaccine. Observe 30 minutes.	**NO**
4. Do you attest that you meet the CDC eligibility criteria for this vaccine shot?	**Yes**

Jeanne Leonie Hoffman is a 97 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Wellness

Visit type (in person vs telemedicine vs phone): In person

History
Jeanne is in with her son Louis for the appointment.
The appointment was schedule for a physical, but specific problems were covered in the time allowed.

Lower extremity ulceration
Her son has been managing this well with dilute chlorox bleach washes for the legs which at one poiint had healed both legs. She has now some small areas of recurrence of ulceration.

Hypertension.
No recent home pressure readings. She is not on any blood pressure medications currently

Diabetes
She is due for labs. She has been managed with diet alone

Vitamin D deficiency
Her son has her taking 2000 IU daily

History of anemia
She is due for repeat labs.

Review of Systems:
There have been no fevers, chills sweats
Her appetite is good
No nausea or vomiting
No abdominal pain
Stools are normal
No change in urine color or odor.
She continues to have diffuse joint pain due to DJD

Problem List
Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006

04/27/2022 - Office Visit in Husky Health Primary Care Clinic (continued)

Objective:

BP (!) 175/77 | Pulse 65

Estimated body mass index is 18.74 kg/m² as calculated from the following:
Height as of 10/21/20: 5' 5" (1.651 m).
Weight as of 10/5/20: 51.1 kg (112 lb 9.6 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
(!) 187/72	68	---	---	---	8:19 AM	4/27/2022
(!) 175/77	65	---	---	---	8:43 AM	4/27/2022

Last blood pressure recorded in this encounter: **(!) 175/77**
General: NAD
Chest: Clear
Cor: RR without murmur
Abd: Soft and non tender without HSM
Extr: On the left lower leg that are two pretibial areas of skin break down but not to the undelrying tissues. Each measures about 2 cm. There is no surround erythema. Similar single area on the right lower leg.
Wound care nurse evaluated the wounds as well today.

Lab and other tests: pending

Assessment and Plan:

1. Lower extremity ulceration, left, limited to breakdown of skin
Wound nurse eval during clinic visit. Much improved over the last year but with recent recurrence of three areas of ulceration without infection.

Plan:
--Continue low concentration chlorine water (swimming pool concentration) bathes once to twice weekly which seemed to have worked well.
--Advise not using iodine as too harsh for tissues
--Advise Medihoney dressings
--Follow up in 4-6 weeks.

1. Vaccine counseling
COVID booster today
Tdap up to date
Has not had recombinant Shingles Vaccine which can be obtained thru local pharmacy, but she did have the older vaccine which is effective though less so.

2. Essential hypertension, benign
Elevated today. Advise recheck at home or senior center

Lab:
- COMP Panel, Future; Future

3. Type 2 diabetes mellitus without complication, without long-term current use of insulin
Due for lab
- Hemoglobin A1C, HPLC; Future

4. Vitamin D deficiency
Prior level was not in the normal range.

Lab
- Vitamin D 25-OH COMMON Deficiency Level; Future

5. History of anemia
Anemia of older age . Due for follow up

Lab
- CBC; Future

Hemoglobin	12.4	11.5 - 15.5 g/dL
Hematocrit	40	36.0 - 45.0 %
MCV	102 (H)	81 - 98 fL
MCH	31.6	27.3 - 33.6 pg
MCHC	31.2 (L)	32.2 - 36.5 g/dL
Platelet Count	292	150 - 400 10*3/uL
RDW-CV	13.4	11.6 - 14.4 %

3. Hemoglobin A1C, HPLC

Result	Value	Ref Range
Hemoglobin A1C	6.2 (H)	4.0 - 6.0 %

A1c and glucose reasonably controlled with diet alone
CBC shows anemia resolved, but MCV elevated.
CMP shows decreased eGFR and slight elevation of protein.
Plan is repeat labs with urine for microalbumin and Vit B12 level at follow up visit in one 4-6 weeks.
Also reccheck blood pressure at that visit.

Jeanne:

04/27/2022 - Office Visit in Husky Health Primary Care Clinic (continued)

Labs (continued)

Your blood count shows resolution of the anemia that had been there before. Your red blood cells are a bit larger than in the past which could indicate Vitamin B12 deficiency though there are other possible causes. I advise taking vitamin B12 500 mcg daily and repeat the blood work along with a vitamin B12 level in 2 months.
Your comprehensive panel showed your kidney function is decreased. We should repeat this test in 2 months along with some other test to evaluate possible causes.
Your blood sugar is reasonable and your A1c is also reasonable. This indicates good control by diet alone.
William E Neighbor, MD

What's Next

You currently have no upcoming appointments scheduled.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

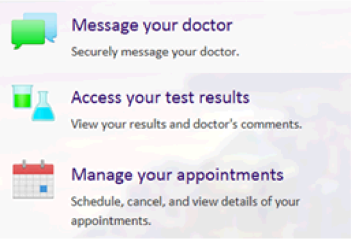
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

Set Up Your Account:
Go to mychart.uwmedicine.org and click Sign Up

Need access to a family member?
Go to mychart.uwmedicine.org and click Request Access to Another Person

How do I get billing and insurance info?

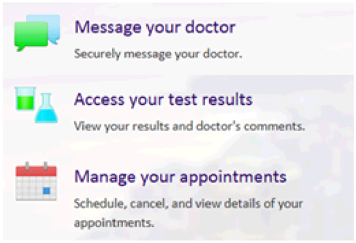
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

Set Up Your Account:
Go to mychart.uwmedicine.org and click Sign Up

Need access to a family member?
Go to mychart.uwmedicine.org and click
Request Access to Another Person

How do I get billing and insurance info?
Go to uwmedicine.org/billing

Molina Healthcare Inc

Individualized Care Plan Report

Reminders for Doctor Appointments:

A visit with your doctor is a chance for you to let him/her know:

1. How you feel.
2. Share your family's health history.
3. Your list of medications (current and past).
4. Discuss any health concerns you may have.

Things you can do ahead of time in order to have a successful visit:

1. Call ahead and get an appointment.
2. Let them know if you need an interpreter. We need at least three days' notice to get an interpreter for you.
3. Make a list of all your questions and needs.
4. Bring a list of your medications.
5. If you cannot keep your appointment, please call your doctor's office to re-schedule.

At your appointment:

1. Try to get to your doctor's office about 15 minutes early. You may need to fill out paperwork.
2. Tell your doctor your concerns and symptoms as best as you can.
3. If you did not understand something your doctor said, be sure to ask questions.
4. Please try to be patient if your doctor is running late. He/she may have a very sick patient that needs extra time.
5. Sometimes your doctor may have an emergency. They may have to go to the hospital to take care of another patient. This can happen with doctors that deliver babies. You may be given the option of seeing another doctor at the office.
6. Your doctor may refer you to a specialist or other health care provider. Be sure to ask if you will need to make the appointment. Sometimes your doctor's office will make it for you. Ask for the phone number of the other doctor's office before you leave.

Confidential Protected Health Information:
This document contains confidential protected Health Information that is protected under HIPAA and other applicable federal and state laws. This information is intended only for use by the Authorized User or entity to which it has been disclosed. Any unauthorized use or disclosure of this information should be reported to Molina Healthcare's privacy Hotline.

None

Clinical Notes

Result Encounter Note

Neighbor Jr., William E, MD at 4/27/2022 0945

Jeanne:
Your blood count shows resolution of the anemia that had been there before. Your red blood cells are a bit larger than in the past which could indicate Vitamin B12 deficiency though there are other possible causes. I advise taking vitamin B12 500 mcg daily and repeat the blood work along with a vitamin B12 level in 2 months.
Your comprehensive panel showed your kidney function is decreased. We should repeat this test in 2 months along with some other test to evaluate possible causes.
Your blood sugar is reasonable and your A1c is also reasonable. This indicates good control by diet alone.
William E Neighbor, MD

Indications

Medicare annual wellness visit, subsequent [Z00.00 (ICD-10-CM)]
Essential hypertension, benign [I10 (ICD-10-CM)]

Result Notes

William E Neighbor Jr., MD
4/28/2022 11:39 AM PDT

Jeanne:
Your blood count shows resolution of the anemia that had been there before. Your red blood cells are a bit larger than in the past which could indicate Vitamin B12 deficiency though there are other possible causes. I advise taking vitamin B12 500 mcg daily and repeat the blood work along with a vitamin B12 level in 2 months.
Your comprehensive panel showed your kidney function is decreased. We should repeat this test in 2 months along with some other test to evaluate possible causes.
Your blood sugar is reasonable and your A1c is also reasonable. This indicates good control by diet alone.

Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	2/2/2022 8:01 AM

Please be advised that Jean and Louis are enrolled in Medicare part C "Island Fitness".
Jean is taking the exercise therapy with acceptable interest and good performance.

Upper Chest Workout: flexible strength no issues.
Abdominal Workout: needs more muscle strengthening.
Hip and Leg Workout: improving.

OVERALL PHYSICAL HEALTH:
Walking and balance has improved greatly.
Wheelchair dependence being phased out.
Utilization of "Walker" implemented, stride improving.

02/02/2022 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Messages (continued)

MENTAL & EMOTIONAL HEALTH:
Better life outlook.
Meeting Other Seniors (80-90's) in Fitness Training.
Cheerful Facial Expressions.
Depression less noticeable.
More active & improved self care.
Urological improvements.

UW ORAL & FACIAL SURGERY:
February 3rd 9:am dental extraction.
Next Appointment: Denture.

Health Summation By Louis Charles Hoffmann Alloin

12/26/2021 - Refill in Husky Health Primary Care Clinic

Reason for Visit

Chief complaint: Refill Request
Visit diagnoses:

- (primary)
- History of recurrent deep vein thrombosis (DVT)

Clinical Notes

Result Encounter Note

Neighbor Jr., William E, MD at 10/13/2021 1105

Jeanne:
X R of the right femur showed healing fracture. The metal plate is in place. One top screw which is above the area of tenderness is slightly raised but should not be causing pain. I think you pain is due to the healing and having a metal plate that your body needs to get used to. The pain should improve as you are able to become more active.

XR Femur 2 View Right Resulted: 10/13/21 1144, Result status: Final result

Ordering provider: Neighbor Jr., William E, MD 10/13/21 1100
Order status: Completed
Resulted by: Rehwald, Christine Marie, MD
Filed by: Interface, Radiology Results In 10/13/21 1145
Performed: 10/13/21 1118 - 10/13/21 1139
Accession number: 30613461
Resulting lab: UW RADIOLOGY
Narrative:
EXAMINATION:
XR FEMUR 2 VW RIGHT

CLINICAL INDICATION:
status post right distal femur fracture June 2021 care for on Olympic peninsula

COMPARISON:
Radiographs of the pelvis and right hip dated July 30, 2019 and priors.

FINDINGS AND

10/13/2021 - Xray Femur 2 View Right in Husky Health Radiology (continued)

Imaging (continued)

Impression:
The bones are demineralized.

As before, a dynamic hip screw transfixes an old, healed intertrochanteric femur fracture. Patient is status post interval reduction and internal fixation of a distal femoral shaft fracture, transfixed with lateral locking plate. The top screw is mildly proud to the plate. Hardware is otherwise intact.

There is a healing distal femoral shaft fracture. There is moderate hip osteoarthritis.

Vascular calcifications are present.

Testing Performed By

Lab - Abbreviation	Name	Director	Address	Valid Date Range
20 - UW RAD	UW RADIOLOGY	Unknown	UW Medical Center Seattle WA	07/27/99 0100 - Present

Indications

Closed fracture of distal end of right femur with routine healing, unspecified fracture morphology, subsequent encounter [S72.401D (ICD-10-CM)]

Signed

Electronically signed by Rehwald, Christine Marie, MD on 10/13/21 at 1144 PDT

Result Notes

William E Neighbor Jr., MD
10/13/2021 5:22 PM PDT

Jeanne:
X R of the right femur showed healing fracture. The metal plate is in place. One top screw which is above the area of tenderness is slightly raised but should not be causing pain. I think you pain is due to the healing and having a metal plate that your body needs to get used to. The pain should improve as you are able to become more active.

10/13/2021 - Office Visit in Husky Health Primary Care Clinic

Reason for Visit

Chief complaints: Medication Management and Musculoskeletal Problem
Visit diagnoses:

- Right leg pain (primary)
- Closed fracture of distal end of right femur with routine healing, unspecified fracture morphology, subsequent encounter
- Anemia, unspecified type
- Hypercholesterolemia
- History of recurrent deep vein thrombosis (DVT)
- Vaccine counseling
- Venous stasis ulcer of ankle limited to breakdown of skin without varicose veins, unspecified laterality
- Sensorineural hearing loss, unspecified
- Type 2 diabetes mellitus without complication, without long-term current use of insulin

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 10/13/2021 1020

Jeanne Leonie Hoffman is a 96 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Medication Management
- Musculoskeletal Problem

Last visit to me June 2021
--closed fracture distal right femur. On ASA 81 mg. Referred for PT.

Right leg pain
Continues to have right leg pain for which she is mainly taking non aspirin pain reliever with acetaminophen. No sure if there is ibuprofen in what she is taking. No longer taking codeine. She has been working on ambulation with her son. She has not yet gotten into PT which according to her son was to happen after she was able to stand and walk. She denies fever, chills, sweats. There has not been any local redness.

(D64.9) Anemia, unspecified type
She is due for follow up on anemia which has been chronic but was a bit worse last Spring when in for femur fracture

(E78.00) Hypercholesterolemia
She continues on atorvastatin without side effect. In the last few years she was tried off of it given age, but had rebound hypercholesterolemia. She is taking lower dose that in the past, that is, atorvastatin 10 mg

(Z86.718) History of recurrent deep vein thrombosis (DVT)
She is no longer on Coumadin but taking Plental which she is tolerating.

(Z71.85) Vaccine counseling
Due for flu vaccine and would like COVID booster today

(I87.2, L97.301) Venous stasis ulcer of ankle limited to breakdown of skin without varicose veins, unspecified laterality (HCC)
Her son has been caring for her stasis ulcers. He has been using a topical antibacterial which includes betadine and low level of hypochorite.

(H90.5) Sensorineural hearing loss, unspecified
Hearing aides working well

(E11.9) Type 2 diabetes mellitus without complication, without long-term current use of insulin
Has been diet controlled

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008
T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continued for five years, then stopped	
• Adult failure to thrive syndrome [R62.7]	10/19/2007
Lives in subsidized housing on Bainbridge Bremerton APS at 1-888-833-4925	

Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Unspecified vitamin B deficiency [E53.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic [IMO0001] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active

Advanced directives: Yes/ 9/21/2016 POLST forms signed.
Scanned to record.
Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
Advise Vit D 800 IU daily.

- Closed fracture of right distal femur (HCC) [S72.401A] 07/15/2021
- Type 2 diabetes mellitus without complication, without long-term current use of insulin [E11.9] 10/10/2019

Objective:
BP (!) 167/72 | Pulse 58 | Temp 36.4 °C | SpO2 99%
Estimated body mass index is 18.74 kg/m² as calculated from the following:
Height as of 10/21/20: 5' 5" (1.651 m).
Weight as of 10/5/20: 51.1 kg (112 lb 9.6 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
(!) 167/72	58	---	---	---	10:15 AM	10/13/2021

Last blood pressure recorded in this encounter: **(!) 167/72**
General: NAD
Chest clear
Cor: RR without murmur
Abd: soft and non tender
Extr: Tenderness over distal femur where she has plate. Slight increased warm just above knee laterally as compared to contralteral side.
Skin: Right ankle ulcer completely healed. Left ankle laterally small scap but remarkably wel healed!

Assessment and Plan:

1. Right leg pain

Status post fracture last Spring of distal femur. Continues to have pain for which is taking over the counter acetaminophen/ibuprofen combination by her sons report.

Plan:

Check labs

- C-Reactive Protein; Future
- BMP w/Reflexive Ionized Ca; Future
- Xray of femur.

Ask that son confirm the contents of the over the counter pain medication being used. We should not use ibuprofen or other NSAIDs given use of pentoxifyline (Plental)

2. Closed fracture of distal end of right femur with routine healing, unspecified fracture morphology, subsequent encounter

Follow up XR today

- XR Femur 2 View Right; Future
- Begin PT in near future. Son will follow up

3. Anemia, unspecified type

Anemia likely of chronic disease and age last Spring. Due for follow up and to check iron.

- CBC with Diff
- Ferritin; Future

4. Hypercholesterolemia
Refilled medication. She was tried off of statins but developed rebound hypercholesterolemia. She has tolerated the medication well.
Plan:
- lipid panel
- atorvastatin 20 MG tablet; Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction Dispense: 45 tablet; Refill: 3

5. History of recurrent deep vein thrombosis (DVT)
No longer on aspirin or, before that, on warfarin. She continues on Trental. Refilled. It is liver metabolized so does not need dose adjustment.
- pentoxifylline ER 400 MG ER tablet; Take 1 tablet (400 mg) by mouth 3 times a day. Dispense: 90 tablet; Refill: 6

6. Vaccine counseling
Due for vaccines today
- influenza quadrivalent high-dose vaccine (Fluzone High-Dose) injection 0.7 mL
- COVID-19 mRNA vaccine (Pfizer) injection 0.3 mL

(I87.2, L97.301) Venous stasis ulcer of ankle limited to breakdown of skin without varicose veins, unspecified laterality (HC
Ulcerations of ankles nearly completely healed thanks to the good care by her son. Small scab on left lateral ankle.

(H90.5) Sensorineural hearing loss, unspecified
Hearing well today with hearing aids in place

(E11.9) Type 2 diabetes mellitus without complication, without long-term current use of insulin
Diet controlled.
Plan:
Labs today

Time spent in caring for patient today 45 minutes.

William E Neighbor, MD

COVID-19 Vaccine Intake Documentation

Pre-Vaccination Screening Questions:

10/13/2021 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

1. Are you feeling sick today? • If patient is COVID-19 positive or COVID-19 like symptoms, reschedule when no longer infectious (at least 10 days post positive test, resolution of fever without fever reducing medications, and improvement of symptoms). If patient is COVID negative, patient should be informed that vaccine can result in flu-like symptoms before proceeding. Patients no longer have to wait 90 days post COVID infection for the vaccine.	**NO**
2. Have you ever received a dose of COVID-19 vaccine?	**YES**
If yes, which vaccine product?	**Pfizer**
3. Have you ever had a severe allergic reaction (e.g., anaphylaxis) to something? For example, a reaction for which you were treated with epinephrine or Epi Pen® or for which you had to go to the hospital? • If yes, please review questions below:	**NO**
• Was the severe allergic reaction after receiving a COVID-19 vaccine? • If yes to severe reaction (anaphylaxis) after COVID-19 vaccine, HARD STOP, DO NOT ADMINISTER	**NO**
• Was the severe allergic reaction after receiving another vaccine or another injectable medication? • If yes to severe reaction (anaphylaxis) after another vaccine/injectable (not COVID-19 vaccine), this is a precaution and can administer vaccine. Observe 30 minutes.	**NO**
4. Do you attest that you meet the CDC eligibility criteria for this vaccine shot?	**Yes**

Electronically signed by Erhardt, Mark Allen, CMA at 10/13/2021 1:10 PM

Erhardt, Mark Allen, CMA at 10/13/2021 1020

Vaccine Screening Questions

Interpreter: No

1. Are you allergic to Latex? NO

2. Have you had a serious reaction or an allergic reaction to a vaccine? NO

3. Do you currently have a moderate or severe illness, including fever? NO

4. Have you ever had a seizure or any neurological problem associated with a vaccine? *(DTaP/TDaP/DTP pertinent)* NO

5. Is patient receiving any live vaccinations today? *(Varicella-Chickenpox, MMR-Measles/Mumps/Rubella, Zoster-Shingles, Flumist, Yellow Fever) NOTE: oral rotavirus is exempt* NO [determine need for TB screening if getting live virus vaccine]

If **YES** to any of the questions above – Do **NOT** give vaccine. Consult with RN or provider in clinic. (#5 can be YES if all Live vaccine questions are answered NO)

If **NO** to all questions above - Patient may receive vaccine.

7. Do you need to receive the Flu vaccine today? YES - Additional Flu Questions **Flu Vaccine Screening Questions:**

Ever had a serious allergic reaction to eggs? NO

Ever had Guillain-Barre syndrome associated with a vaccine? NO

Less than 6 months old? NO

If **YES** to any of the *Flu* questions above - NO Flu Vaccine to be given. Patient may consult provider as needed.

If **NO** to all questions above - Patient may receive Flu Shot (IM)

Is the patient requesting Flumist? NO

If between 6 months and 8 years of age, was flu vaccine received last year? N/A
If **NO** to above question:

- Children who are receiving influenza vaccine for the first time - administer 2 doses of the current influenza vaccine (separated by at least 4 weeks).

Imms administered today: Influenza (high dose)

All patients are encouraged to wait 15 minutes before leaving after receiving any vaccine.

VIS given 10/13/2021 by Mark A Erhardt, CMA

Was Jeanne Leonie Hoffman alert, oriented, and without adverse reaction after the vaccine was given Yes

Resulting lab: UW RADIOLOGY
Narrative:
EXAMINATION:

10/13/2021 - Office Visit in Husky Health Primary Care Clinic (continued)

Imaging (continued)

XR FEMUR 2 VW RIGHT

CLINICAL INDICATION:
status post right distal femur fracture June 2021 care for on Olympic peninsula

COMPARISON:
Radiographs of the pelvis and right hip dated July 30, 2019 and priors.

FINDINGS AND
Impression:
The bones are demineralized.

As before, a dynamic hip screw transfixes an old, healed intertrochanteric femur fracture. Patient is status post interval reduction and internal fixation of a distal femoral shaft fracture, transfixed with lateral locking plate. The top screw is mildly proud to the plate. Hardware is otherwise intact.

There is a healing distal femoral shaft fracture. There is moderate hip osteoarthritis.

Vascular calcifications are present.

Result Notes

William E Neighbor Jr., MD
10/13/2021 5:22 PM PDT

Jeanne:
X R of the right femur showed healing fracture. The metal plate is in place. One top screw which is above the area of tenderness is slightly raised but should not be causing pain. I think you pain is due to the healing and having a metal plate that your body needs to get used to. The pain should improve as you are able to become more active.

Patient Instructions

Assessment and Plan:

1. Right leg pain

Status post fracture last Spring of distal femur. Continues to have pain for which is taking over the counter

acetaminophen/ibuprofen combination by her sons report.
Plan:
Check labs
- C-Reactive Protein; Future
- BMP w/Reflexive Ionized Ca; Future
- Xray of femur.

2. Closed fracture of distal end of right femur with routine healing, unspecified fracture morphology, subsequent encounter
Follow up XR today
- XR Femur 2 View Right; Future
- Begin PT in near future. Son will follow up

3. Anemia, unspecified type
Anemia likely of chronic disease and age last Spring. Due for follow up and to check iron.
- CBC with Diff
- Ferritin; Future

4. Hypercholesterolemia
Refilled medication. She was tried off of statins but developed rebound hypercholesterolemia. She has tolerated the medication well.
Plan:
- lipid panel
- atorvastatin 20 MG tablet; Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction Dispense: 45 tablet; Refill: 3

5. History of recurrent deep vein thrombosis (DVT)
No longer on aspirin or, before that, on warfarin. She continues on Trental. Refilled
- pentoxifylline ER 400 MG ER tablet; Take 1 tablet (400 mg) by mouth 3 times a day. Dispense: 90 tablet; Refill: 6

6. Vaccine counseling
Due for vaccines today
- influenza quadrivalent high-dose vaccine (Fluzone High-Dose) injection 0.7 mL
- COVID-19 mRNA vaccine (Pfizer) injection 0.3 mL

(I87.2, L97.301) Venous stasis ulcer of ankle limited to breakdown of skin without varicose veins, unspecified laterality (HC
Ulcerations of ankles nearly completely healed thanks to the good care by her son. Small scab on left lateral ankle.

(H90.5) Sensorineural hearing loss, unspecified
Hearing well today with hearing aids in place

(E11.9) Type 2 diabetes mellitus without complication, without long-term current use of insulin
Diet controlled.
Plan:
Labs today

Today's Visit

You saw William E Neighbor, MD on Wednesday October 13, 2021. The following issues were addressed:

- Right leg pain
- Closed fracture of distal end of right femur with routine healing, unspecified fracture morphology, subsequent encounter
- Anemia, unspecified type
- Hypercholesterolemia
- History of recurrent deep vein thrombosis (DVT)
- Vaccine counseling
- Venous stasis ulcer of ankle limited to breakdown of skin without varicose veins, unspecified laterality
- Sensorineural hearing loss, unspecified
- Type 2 diabetes mellitus without complication, without long-term current use of insulin

Blood Pressure	Temperature	Pulse	Oxygen Saturation
167/72	97.6 °F	58	99%

Done Today

XR Femur 2 View Right for Closed fracture of distal end of right femur with routine healing, unspecified fracture morphology, subsequent encounter

CBC with Diff for Anemia, unspecified type

Immunizations Given

Influenza quadrivalent high-dose and COVID-19 Pfizer mRNA LNP-S (Comirnaty)

Medications Given

COVID-19 mRNA vaccine (Pfizer) Last given at 11:54 AM for Vaccine counseling

influenza quadrivalent high-dose vaccine (Fluzone High-Dose) Last given at 12:01 PM for Vaccine counseling

What's Next

You currently have no upcoming appointments scheduled.

Your Test Results

Most test results are displayed in MyChart as soon as they are available. While our practitioners check results often, you are likely to see new results before your practitioner has seen them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their practitioner's office contacts them. Your practitioner's office will contact you if the results require a change in your care. Unless you have urgent concerns, please wait a few days before contacting your practitioner's office about results.

After Visit Summary (continued)

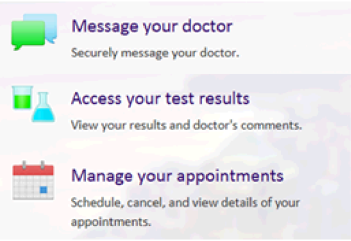
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

Messages (continued)

10/23/2021 3:19 PM by Hoffman, Jeanne Leonie

Jeanne: Below is a summary of your visit. Do confirm what is in the over the counter pain medication you are using as noted below.

Assessment and Plan:

1. Right leg pain

Status post fracture last Spring of distal femur. Continues to have pain for which is taking over the counter acetaminophen/ibuprofen combination by her sons report.

Plan:

Check labs

- C-Reactive Protein; Future
- BMP w/Reflexive Ionized Ca; Future
- Xray of femur.

Ask that son confirm the contents of the over the counter pain medication being used. We should not use ibuprofen or other NSAIDs given use of pentoxifyline (Plental)

2. Closed fracture of distal end of right femur with routine healing, unspecified fracture morphology, subsequent encounter

Follow up XR today

- XR Femur 2 View Right; Future
- Begin PT in near future. Son will follow up

3. Anemia, unspecified type

Anemia likely of chronic disease and age last Spring. Due for follow up and to check iron.

- CBC with Diff
- Ferritin; Future

4. Hypercholesterolemia

Refilled medication. She was tried off of statins but developed rebound hypercholesterolemia. She has tolerated the medication well.

Plan:

- lipid panel
- atorvastatin 20 MG tablet; Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction Dispense: 45 tablet; Refill: 3

5. History of recurrent deep vein thrombosis (DVT)

No longer on aspirin or, before that, on warfarin. She continues on Trental. Refilled. It is liver metabolized so does not need dose adjustment.

- pentoxifylline ER 400 MG ER tablet; Take 1 tablet (400 mg) by mouth 3 times a day. Dispense: 90 tablet; Refill: 6

6. Vaccine counseling

Due for vaccines today

- influenza quadrivalent high-dose vaccine (Fluzone High-Dose) injection 0.7 mL
- COVID-19 mRNA vaccine (Pfizer) injection 0.3 mL

(I87.2, L97.301) Venous stasis ulcer of ankle limited to breakdown of skin without varicose veins, unspecified laterality (HC

Ulcerations of ankles nearly completely healed thanks to the good care by her son. Small scab on left lateral ankle.

Clinical Notes

Result Encounter Note

Neighbor Jr., William E, MD at 10/13/2021 1150

Jeanne:
--Your diabetes blood tests show reasonable control
--Your cholesterol is well controlled
--Your iron level is normal
--The inflammation test was normal.

I wrote earlier about your X ray results which looked good was well.

Hello Jeane

Thank you for your My Chart appointment request. I have scheduled you for the following:

Appointment Date: 9/29/2021 (soonest available)
Appointment Time: 8:40 am
Provider: Dr. Neighbor
Location: Hall Health Center

Please arrive 10-15 minutes prior to your appointment time for check-in. Please be prepared to be screened for Covid symptoms upon entry also be prepared to show your photo ID and insurance information. As a reminder, appointments that are cancelled late or no showed may result in a fee.

We are asking that all patients entering the building to have a mask on. We are also asking that any friends, family etc... wait outside (except for care givers or children) as we are limiting entry to our facility to patients only

Glad to hear that, Jean. I sent the referral for home health PT last week. Keep us posted if you are having any problems with that.
Dr. Neighbor is out of the office until September, but several of us are providing back up for him.
All the best-
Anne Terry, NP covering for Bill Neighbor, MD

Hi Louis and Jeane!
I have contacted social work to reach out to you about some of your housing concerns and the nurse practitioner for Dr. Neighbor to help facilitate a more appropriate type of Physical Therapy for your current needs.

You should be hearing from Carrie Richards and the nurse practitioner for Dr. Neighbor soon!

Best,
Kristina Cosley

Richards V, Catherine, LICSW at 7/16/2021 1000

SOCIAL WORK FOLLOW-UP NOTE

7/16/2021
Brief description: SW outreach call re; pt/son housing concerns.

Patient description, presenting problem, patient / family goals: Pt is 96yo English-speaking female with hx HTN, DM2, HLD, glaucoma, hearing loss, DVTs, OA of hips and spine, osteoporosis, among other medical issues. Pt had a fall and sustained a right distal femur closed fracture in May 2021 requiring ORIF. Pt wad admitted to St. Michael Medical Center in Silverdale for this injury/surgery from 5/21-5/25/21. Pt lives on Bainbridge Island but receives primary care services at UW Hall Health Clinic. She is also receiving care in HMC Physical Therapy Clinic.

SW received referral from PT. See note by this SW from yesterday, 7/15, for details re; current situation. Pt reportedly not agreeable to SNF placement, but having extreme difficultly participating in outpatient PT.

Intervention / Outcome / Plan: -SW spoke with pt's son Louis at length (1 hour) about a variety of concerns related to housing, pt's care, financial issues, and concerns about discrimination in various forms, particularly from white supremacists on Bainbridge Island.

-SW called and spoke with Hall Health Primary Care Clinic staff member Nick. He reports that Hall Health does not have a clinic social worker. He confirms that pt's assigned PCP Dr. Neighbor will be out of office until Sept 2021 and there are multiple providers covering his caseload. SW coordinated with covering provider Anne Terry, ARNP re; PCP office managing Home Health referral.

Dear Jeanne-

Dr. Neighbor is currently out of the office. I received a call from Harborview PT and they are suggesting home physical therapy which may be easier for you. I checked and
Harrison Home Health based in Bremerton covers Kitsap County. I have placed a referral for you. Call 360-744-6699 to set up home appointments for physical therapy to help with your recovery.

Dr. Neighbor is back in the office in September.

Sincerely,

Anne C Terry, ARNP

Richards V, Catherine, LICSW at 7/15/2021 1611

SOCIAL WORK FOLLOW-UP NOTE

7/15/2021
Brief description: Coordination with PT and PCP re; pt need for SNF versus HH referral and son's reported concern re; housing situation.

Patient description, presenting problem, patient / family goals: Pt is 96yo English-speaking female with hx HTN, DM2, HLD, glaucoma, hearing loss, DVTs, OA of hips and spine, osteoporosis, among other medical issues. Pt had a fall and sustained a right distal femur closed fracture in May 2021 requiring ORIF. Pt wad admitted to St. Michael Medical Center in Silverdale for this injury/surgery from 5/21-5/25/21. Pt lives on Bainbridge Island but receives primary care services at UW Hall Health Clinic. She is also receiving care in HMC Physical Therapy Clinic.

Today this SW is contacted by HMC Physical Therapist Kristina Cosley, who reports that she has previously worked with pt and today was pt's first appt since her fall/femur fx. PT reports that it was recommended pt be d/c to SNF following injury/surgery, but pt declined and was instead d/c home with her son Louis as her caregiver (they live together). PT reports that during appt today pt was unable to transfer sit to stand without significant physical assist and unable to stand with 2-person physical assist due to weakness and pain. PT notified pt and son that pt's condition is appropriate for SNF-level care or Home Health services, rather than PT sessions in clinic. PT is notifying pt's PCP about her concerns as well. PT also reports that pt's son spoke about dissatisfaction with their housing on Bainbridge Island and feeling they are being treated unfairly.

Intervention / Outcome / Plan: -SW discussed in electronic communication with PT and PCP that based on description of pt's mobility challenges it sounds as though a SNF would be the most appropriate setting for pt at her current stage of recovery. SW inquired about what is known currently about how pt's basic mobility needs are being met at home (for toileting, bathing, etc.) Pt may currently require 2-person assist for these activities and SW is unsure if that is logistically possible at home.

-SW discussed in electronic communication with PT and PCP that SNF placement is best managed from inpatient rather than outpatient setting, for both insurance and logistical reasons. Per chart, pt has both Medicare A/B/D coverage and LCP-MNP Medicaid coverage. In order to have Medicare pay for SNF she would have to spend 3 nights in the hospital on inpatient status (rather than Observation status), as it does not appear she has been hospitalized for that duration in the past 30 days. This SW is less familiar with LCP-MNP Medicaid coverage, but it appears to be a version of Medicaid that covers less than some other versions. SW is not sure whether pt's Medicaid coverage would even cover a SNF stay (this would be something for her insurance/the SNF to clarify). WA State unfortunately has more limited options in terms of SNFs that will accept Medicaid coverage and it can sometimes be difficult to find an accepting facility that is geographically convenient/meets other desired criteria. For this reason, a brief hospitalization may be desirable to open up more options for her in terms of accepting facilities, since Medicare coverage is widely accepted. This is also the best option logistically, as this SW has limited capacity to assist with arranging SNF placement. This SW is not familiar with what support might be available via pt's primary care clinic to assist with this matter.

-SW discussed in electronic communication with PT and PCP that if pt/family are not agreeable to SNF placement, then a referral to Home Health services is needed. This referral would be managed by her PCP office and could include a referral to PT, plus a bath aide, and whatever else may be appropriate (OT? RN? Social Work?). This SW discussed that in the HMC clinics, Home Health referrals are managed by nursing, not social work. This SW is not sure how these referrals are handled at pt's PCP office.

-SW also discussed in electronic communication with PT and PCP that this SW would be surprised/concerned if the hospital where pt had her surgery (St. Michael Medical Center in Silverdale) recommended SNF placement and then d/c pt home without a referral to Home Health for the services noted above. If the OSH did in fact place a referral for Home Health, it is possible that it fell through for some reason and pt did not receive the services. It is also possible

07/15/2021 - Documentation in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

that pt did receive Home Health services but has used up the amount of HH services covered by her insurance. This is something that would need to be clarified by pt's PCP office.

-SW confirmed that SW is able to f/u with pt/son re; concerns about their housing situation. Per chart review it appears that they live in some type of subsidized housing.

SW will remain available for continued support/assistance as needed.

pentoxifylline ER 400 MG ER tablet

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 10/13/2021
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 9/16/2020
Start date: 9/16/2020 — End date: 10/13/2021
Quantity: 90 tablet — Refill: 6 refills by 9/16/2021

acetaminophen-codeine 300-15 MG tablet

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 10/13/2021
Instructions: One half to one tablet daily. Take additional acetaminophen during the day up to 2500 mg in divided dose.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 10/21/2020
Start date: 10/21/2020 — End date: 10/13/2021
Quantity: 30 tablet — Refill: No refills remaining

timolol maleate 0.5 % ophthalmic solution

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 12/9/2021
Reason for discontinuation: Reorder
Instructions: instill one drop in each eye twice daily. block tear duct for 1-2 min after use
Authorized by: Neighbor Jr., William E, MD — Ordered on: 10/21/2020
Start date: 10/21/2020 — End date: 12/9/2021
Quantity: 10 mL — Refill: 6 refills by 10/21/2021

acetaminophen-codeine 300-30 MG tablet

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 10/13/2021
Instructions:
See Instructions, PRN as needed for pain, 0 Refills, Take 0.5 - 1 tablet twice daily as needed for pain, 05/28/20 12:51:43, Tablet
Entered by: Toshmurodova, Parizoda, CMA — Entered on: 4/1/2021
Start date: 5/28/2020 — End date: 10/13/2021

cholecalciferol 25 MCG (1000 UT) tablet

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 10/13/2021
Instructions:
2,000 units = 2 tab, PO, Daily, 60 tab, 0 Refills, 05/28/20 12:50:01
Entered by: Toshmurodova, Parizoda, CMA — Entered on: 4/1/2021
Start date: 5/28/2020 — End date: 10/13/2021

cephalexin (Keflex) 500 MG capsule

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 3/28/2023
Reason for discontinuation: Reorder
Instructions: Take 1 capsule (500 mg) by mouth 4 times a day for 7 days.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 5/5/2021
Start date: 5/5/2021 — End date: 3/28/2023
Quantity: 28 capsule — Refill: Partial refill of 24 capsules by 5/5/2022

Progress Notes

Cosley, Kristina M, PT at 7/15/2021 0815

PHYSICAL THERAPY INITIAL PLAN OF CARE

PLAN OF CARE DUE: 9/13/21
Progress note due: 8/14/21

VISITS FROM SOC: 1

INTERPRETER STATUS (Not needed, Telephonic, In Person):not needed
Referring Provider: William E Neighbor Jr.
Attending Physician: same as above
Diagnosis: (W19.XXXD) Fall, subsequent encounter (primary encounter diagnosis)

(S72.491A) Other closed fracture of distal end of right femur, initial encounter (HCC)
Plan: Referral to Physical Therapy

PRECAUTIONS: Fall risk, weight bearing as tolerated per family, history of lower extremity ulcers - now fully healed

Mechanism of Injury: s/p right distal femur fracture open reduction internal fixation 5/23/21

Pertinent Medical/Surgical History that may affect progress in Physical Therapy:
Patient Active Problem List
Diagnosis

- Sensorineural hearing loss, unspecified
- DVT, recurrent, lower extremity, chronic
- Other and unspecified hyperlipidemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Unspecified vitamin B deficiency
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- Hip joint stiffness
- Leg weakness, bilateral
- Weakness of trunk musculature
- History of recurrent deep vein thrombosis (DVT)
- Thrombocytopenia (HCC)
- Imbalance
- Primary osteoarthritis of both hips
- Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)
- Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer and inflammation, left
- Venous ulcer of left leg (HCC)

07/15/2021 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

- Normocytic anemia
- Severe protein-calorie malnutrition (HCC)
- Urge urinary incontinence
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Diabetic ulcer of lower extremity (HCC)
- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer, bilateral
- Bilateral leg edema
- Acute blood loss anaemia
- Fall
- Type 2 diabetes mellitus without complication, without long-term current use of insulin
- Primary open angle glaucoma (POAG) of both eyes
- Closed fracture of right distal femur (HCC)

Past Medical History:

Diagnosis	Date
• Vertebral fracture *Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed*	12/13/2012
• Thyroid nodule, uninodular *CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.*	12/13/2012
• Closed fracture of unspecified intracapsular section of neck of femur *Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.*	5/1/2007
• Impaired fasting glucose	3/22/2007
• Carpal tunnel syndrome *Carpal tunnel release right wrist in 1989*	11/20/2006
• DIAPHRAGMATIC HERNIA *CT of abdomen in 2006*	11/20/2006
• Esophageal reflux	11/20/2006
• Other convulsions *Petit Mal since 1975 Carbamazepine level 7.6 on Feb 2007 Discontinued based on ER neuro consult in early 2013 No recurrence*	11/20/2006
• Allergic rhinitis, cause unspecified	11/20/2006
• Diabetes mellitus (HCC)	
• PAD (peripheral artery disease) (HCC)	
• Ulcer of left lower extremity, limited to breakdown of skin *Chronic, Multiple sites of lower leg and ankle, with MSSA*	

Past Surgical History:

Procedure	Laterality	Date
• TOTAL ABDOMINAL HYSTERECT W/WO RMVL TUBE OVARY		

Previous Therapy: no Physical Therapy after discharge from hospital; SNF was recommended but she went home with son and son encouraged her to do exercises

Prior Level of Function: Before onset of the current condition, the patient was able to walk with 4 wheeled walker

Home Environment: lives with son; no stairs to enter; no stairs inside home; needs lift assist to stand and go to the bathroom; side walks are not taken care of; "there are barriers between everyone"

SUBJECTIVE: Jeane is very hard of hearing and son does most of talking for patient

Patient's Statement: she is mostly sitting and lying down; she is not walking at all right now; she is bed bound; son feels this is also due to depression. I take her out on Sundays and let her decide where to go; I push her in the wheelchair (per son)

All 3 falls in last year caused by "rules of housing project"
When asked more about the falls:
Son tried to situate furniture for Jeane to hold onto which reduced walkways from 36 inches to 18 inches and he was instructed to move the furniture. He also built a banister to hold onto but it divides the room in half.

Jeane's son spent a lot of time discussing his dissatisfaction with his current housing situation; offered to connect him with our social worker

Last fall:
Inside home; 5:00 am; getting ready to come to HMC; standing and holding onto the handrail built by son but son did not have enough funds to fully pin/secure the bar that he built for her to hold onto; Jeane ended up pulling on it and she fell

Patient's Goals for PT: Improving strength to allow for transfers, walking

Current Equipment: wheelchair (son feels dangerous on Seattle city streets due to no hand brakes for going down hill)

OBJECTIVE MEASURES / IMPAIRMENTS / ACTIVITY LIMITATIONS:
Pain: it hurts; unable to rate pain on scale from 0-10

Fall Risk Screen: With fall and injury and age > 65, she is already High fall risk - unable to do TUG today

Edema: +right knee swelling

Palpation/Scar mobility: distal femur incisions are clean/dry/intact; former lower extremity wounds are all closed/healed with some scabbing present on left lower leg

Observation: patient seated in w/c; very hard of hearing; son assists with communication and history

Gait/Mobility: Unable at this time due to inability to perform sit to stand transfer

Functional Mobility:
Sit to/from stand: trial of sit to stand with assist by her son and myself and unable to stand due to weakness and crying out in pain
Transfers: Unable today; needs physical assist by son at home for all transfers

Posture: Forward head posture

ROM: Right lower extremity

	Active	Passive
Knee extension	(-15)	
Knee flexion	70	

Neuro Scan:
Motor Score: in seated able to perform hip flexion, knee flexion/extension and ankle DF/PF partial ROM for all

TREATMENT & EDUCATION
Primary Learner: Family
Topics Taught: role of physical therapy, education on diagnosis and prognosis, purpose of interventions, initial HEP instructions, physical therapy goals and transfer training - son tried using patient's hands to stand and encouraged transfer belt and assist at trunk which is stated he also does at home
Challenges Impacting this Teaching: for patient: hearing impairment, pain for son/family: verbalizing frustration/dissatisfaction with housing
Desire and Motivation to Learn: Reports ready to learn/make changes
Preferred Learning Style: demonstration, written and verbal
Post Education Response: States understanding

Evaluation Code: 97163 for 50 minutes.
Clinical Presentation for Selection of Evaluation Code: Unstable
Clinical Decision Making Complexity for Selection of Eval Code:High

Time in: 0824

Home Exercise Program
Seated knee flexion range of motion with assist by left lower extremity 10 reps twice daily
Continue ankle pumps, heel slides, glute squeezes

verbal instructions and demonstrations were provided for the above exercises
a handout was provided describing the exercises in written and picture format

ASSESSMENT: Jeanne Leonie Hoffman is a 96 year old female who has been referred to Physical Therapy for closed right distal femur fracture status post open reduction internal fixation on 5/23/21 after a fall on

07/15/2021 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

5/21/21. Upon discharge from the hospital, it was recommended that she go to a skilled nursing facility for rehab but was instead taken home with son and son has been trying to encourage Jeane to perform exercises at home. Unfortunately, she is in a lot of pain (crying out) at attempts at mobility. She has not ambulated since her injury/surgery. She requires significant physical assist for sit to stand transfers all of which her son is doing at home (Louis). Louis spends a great deal of time during our session verbalizing frustration and dissatisfaction with their living environment and concerns about how they are treated/viewed on Bainbridge Island. At this time, Jeane is in need of a different level of care for her Physical Therapy: Skilled nursing for Physical Therapy/OT or home health Physical Therapy / OT. This was explained to Jeane and Louis and Louis was very receptive. Once home health or skilled nursing Physical Therapy has been completed, she would be appropriate to return to outpatient Physical Therapy.

Factors/barriers that may delay or affect course of care include: all pertinent past medical history as listed above, Age, Chronicity or severity, Comorbidities, complications, impairment and Living environment, the following cultural factors: none, and high fall risk.

Rehabilitation potential is: Fair

Outcomes Score: 11/80 LEFS 7/15/2021

FALL RISK: high fall risk based on screening

PLAN: I will send in-basket message to referring provider to request referral to higher level of Physical Therapy care as well as in basket message to social work requesting any support for their housing dissatisfaction. NO further outpatient Physical Therapy recommended at this time; she would be appropriate to return after SNF or home health course of care.

Today's Visit

You saw Kristina M Cosley, PT on Thursday July 15, 2021. The following issues were addressed: Other closed fracture of distal end of right femur, initial encounter and Fall, subsequent encounter.

What's Next

You currently have no upcoming appointments scheduled.

Your Test Results

Test results will appear in your MyChart account as soon as they are available. This means that you may see your results before your health care provider has reviewed them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their provider's office contacts them. Your provider will contact you to discuss significant results. If you have not heard from your provider within three days, or if you have an immediate concern, please contact your provider's office.

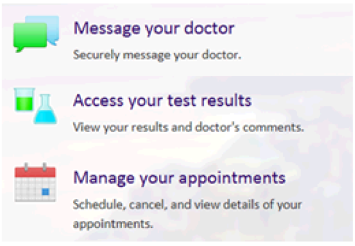
After Visit Summary (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

Scan (below)

HARBORVIEW OUTPATIENT PHYSICAL THERAPY QUESTIONNAIRE

HISTORY OF CURRENT CONDITION

1. For what injury/problem were you referred to PT?

2. Please mark areas of pain or abnormal sensation:

3. **When** did symptoms begin? (specific date) 6/25/21
   Have you had a similar problem in the past? ☐ Yes ☒ No

4. **How** did this problem start?
   Handrail Failure Fell to Land/Lack of Neglect

5. Onset: ☒ Sudden ☐ Gradual

6. Since onset, symptoms are:
   ☒ Better ☐ Worse ☐ Not changing

7. What makes symptoms **worse**?
   Lack of Exercise/Lack of Outlook
   What makes them **better**?
   Exercise/outlook improvements

8. Nature of pain/symptoms
   ☐ Sharp ☐ Throbbing ☐ Tingling
   ☐ Dull ☐ Constant ☐ Numbness
   ☐ Aching ☐ Periodic ☐ Other: Muscel Wasting

9. As the day progresses, symptoms:
   ☐ Increase ☐ Decrease ☒ Stay the same
   Symptoms are worst in the:
   ☒ Morning ☒ Afternoon ☒ Night

10. What previous care have you sought for this condition?
    ☒ PT ☐ Chiropractic ☐ Massage ☒ Other
    Was it helpful? ☒ Yes ☐ No

GOALS FOR TREATMENT

11. What activities are you limited from doing because of your current symptoms?
    • Walking Limited,
    •

12. Do you believe that PT will be able to help in achieving these goals? ☒ Yes ☐ No

13. Are you willing/able to participate in a home exercise program? ☒ Yes ☐ No

FALLS/OTHER

1. Have you fallen in the past 12 months? ☒ Yes ☐ No
   If yes, please describe:

2. Are you worried about falling? ☐ Yes ☒ No

3. Do you have problems with your balance or feel unsteady on your feet? ☒ Yes ☐ No

4. Are you allergic to: ☐ Latex ☐ Beeswax No
   If yes, list reaction: _____

WORK HISTORY

1. Occupation: _____
   ☐ Employed full-time ☒ Work at home
   ☐ Employed part-time ☐ Student
   ☐ Unemployed ☒ Retired
   ☐ Seeking employment ☒ Disability

2. Physical activities at work:
   ☒ Sitting ☐ Computer use
   ☒ Standing ☐ Heavy equipment operation
   ☐ Phone use ☐ Driving
   ☐ Repetitive lifting ☐ Other _____
   ☐ Heavy lifting

PARTICIPATION AGREEMENT
6NJB Physical and Hand Therapy Clinic

In order to provide the best service for you and all our clients, we ask that you read and agree to the following:

- Please call 24-hours in advance if you are unable to make your appointment at **206-744-1675.**
  - Leave a message if no one is available to take your call.
- Please call if you will be 15 or more minutes late as the appointment may need to be rescheduled.
- Repeated cancellations or no-shows are disruptive to the optimal delivery of care and may indicate a lack of commitment to your health and wellness. We may discontinue your care if you miss more than one appointment without contacting us or if you repeatedly cancel your appointments.
- Therapists are usually on time for scheduled appointments. If your therapist is running late, we will alert you and do everything possible to make sure you are seen in a timely manner.
- Please silence or set your phone to vibrate while you are waiting in the lobby or seeing your provider.

You and your therapist will regularly assess and review your goals for treatment, your progress, and need for continuing therapy. Your therapy program can be designed to work within the limits of your insurance coverage. The primary reasons therapy is discontinued include:

- Therapy goals have been met
- Continuing progress can be achieved outside of the therapy program
- Patient participation is not sufficient to make significant progress.

Please wear or bring comfortable clothing or shorts if you have a physical therapy appointment.

Thank you for partnering with us to provide the best possible care and service for all our clients.

I have read, understand and agree with the statements above.

PHYSICAL THERAPY INITIAL PLAN OF CARE

PLAN OF CARE DUE: 9/13/21
Progress note due: 8/14/21

VISITS FROM SOC: Visit count could not be calculated. Make sure you are using a visit which is associated with an episode.

INTERPRETER STATUS (Not needed, Telephonic, In Person):not needed
Referring Provider: William E Neighbor Jr.
Attending Physician: same as above
Diagnosis: (S72.491A) Other closed fracture of distal end of right femur, initial encounter (HCC)
Plan: Referral to Physical Therapy

PRECAUTIONS: Fall risk, weight bearing as tolerated per family, history of lower extremity ulcers - now fully healed

Mechanism of Injury: s/p right distal femur fracture open reduction internal fixation 5/23/21

Pertinent Medical/Surgical History that may affect progress in Physical Therapy:

Patient Active Problem List

Diagnosis

- Sensorineural hearing loss, unspecified
- DVT, recurrent, lower extremity, chronic
- Other and unspecified hyperlipidemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Unspecified vitamin B deficiency
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- Hip joint stiffness
- Leg weakness, bilateral
- Weakness of trunk musculature
- History of recurrent deep vein thrombosis (DVT)
- Thrombocytopenia (HCC)

Evaluation (continued)

- Imbalance
- Primary osteoarthritis of both hips
- Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)
- Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer and inflammation, left
- Venous ulcer of left leg (HCC)
- Normocytic anemia
- Severe protein-calorie malnutrition (HCC)
- Urge urinary incontinence
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Diabetic ulcer of lower extremity (HCC)
- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer, bilateral
- Bilateral leg edema
- Acute blood loss anaemia
- Fall
- Type 2 diabetes mellitus without complication, without long-term current use of insulin
- Primary open angle glaucoma (POAG) of both eyes

Past Medical History:

Diagnosis	Date
• Vertebral fracture *Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed*	12/13/2012
• Thyroid nodule, uninodular *CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.*	12/13/2012
• Closed fracture of unspecified intracapsular section of neck of femur *Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.*	5/1/2007
• Impaired fasting glucose	3/22/2007
• Carpal tunnel syndrome *Carpal tunnel release right wrist in 1989*	11/20/2006
• DIAPHRAGMATIC HERNIA *CT of abdomen in 2006*	11/20/2006
• Esophageal reflux	11/20/2006
• Other convulsions *Petit Mal since 1975 Carbamazepine level 7.6 on Feb 2007 Discontinued based on ER neuro consult in early 2013 No recurrence*	11/20/2006
• Allergic rhinitis, cause unspecified	11/20/2006
• Diabetes mellitus (HCC)	

07/15/2021 - HMC PT Right Femur Fracture (Therapy) (continued)

Plans of Care (continued)

Evaluation (continued)

- PAD (peripheral artery disease) (HCC)
- Ulcer of left lower extremity, limited to breakdown of skin
  Chronic, Multiple sites of lower leg and ankle, with MSSA

Past Surgical History:

Procedure	Laterality	Date
• TOTAL ABDOMINAL HYSTERECT W/WO RMVL TUBE OVARY		

Previous Therapy: no Physical Therapy after discharge from hospital; SNF was recommended but she went home with son and son encouraged her to do exercises

Prior Level of Function: Before onset of the current condition, the patient was able to walk with 4 wheeled walker

Home Environment: lives with son; no stairs to enter; no stairs inside home; needs lift assist to stand and go to the bathroom; side walks are not taken care of; "there are barriers between everyone"

SUBJECTIVE: Jeane is very hard of hearing and son does most of talking for patient

Patient's Statement: she is mostly sitting and lying down; she is not walking at all right now; she is bed bound; son feels this is also due to depression. I take her out on Sundays and let her decide where to go; I push her in the wheelchair (per son)

All 3 falls in last year caused by "rules of housing project"
When asked more about the falls:
Son tried to situate furniture for Jeane to hold onto which reduced walkways from 36 inches to 18 inches and he was instructed to move the furniture. He also built a banister to hold onto but it divides the room in half.

Jeane's son spent a lot of time discussing his dissatisfaction with his current housing situation; offered to connect him with our social worker

Last fall:
Inside home; 5:00 am; getting ready to come to HMC; standing and holding onto the handrail built by son but son did not have enough funds to fully pin/secure the bar that he built for her to hold onto; Jeane ended up pulling on it and she fell

Patient's Goals for PT: Improving strength to allow for transfers, walking

Current Equipment: wheelchair (son feels dangerous on Seattle city streets due to no hand brakes for going down hill)

OBJECTIVE MEASURES / IMPAIRMENTS / ACTIVITY LIMITATIONS:
Pain: it hurts; unable to rate pain on scale from 0-10

Fall Risk Screen:

Last Read in MyChart
7/20/2021 8:02 AM by Hoffman, Jeanne Leonie

I am not renewing losartan at this time. Jeanne has been on a very low dose for blood pressure control. However, because of the recent fall it was correctly discontinued by the outside provider. I don't believe she was taking it the last time I saw her at which time her blood pressure was excellent. I adivse that she remain off of it and that you monitor her pressures at home or we do so when she comes in for visits.

I will be out of the office July thru September returning in the Fall to do patient care only.

Accredited by the Intersocietal Accreditation Commission - Vascular Testing

EXAMINATION:
LOWER EXTREMITY VENOUS DUPLEX (RIGHT)
Venous Duplex examination performed using B-mode, color flow, and Doppler spectral waveform assessment.

INDICATION:
This is a 96-year-old woman who is postop from a right femur fracture. She has history of lower extremity DVT. She has right calf tenderness. Her right tibial veins were difficult to evaluate on a previous examination. She is not currently receiving prophylactic anticoagulation.

PREVIOUS EXAMINATIONS:
May 5, 2021
January 22, 2020

EQUIPMENT:
Philips Epiq 7

FINDINGS:
LOWER EXTREMITY VENOUS DUPLEX

RIGHT DEEP SYSTEM
Right External Iliac Vein: spontaneous and phasic flow, complete color filling,no intraluminal echoes in the distal segment
Common Femoral Vein: Complete compressions, spontaneous and phasic flow, complete color filling,no intraluminal echoes
Deep Femoral Vein: Complete compressions,

Main Femoral Vein Prox: Complete compressions, spontaneous and phasic flow, complete color filling,no intraluminal echoes
Main Femoral Vein Mid: Complete compressions,
Main Femoral Vein Dist: Complete compressions,

Popliteal Vein: Complete compressions, spontaneous and phasic flow, ,no intraluminal echoes

Posterior Tibial Vein: Complete compressions, complete color filling,no intraluminal echoes
Peroneal Vein:Complete compressions, complete color filling,no intraluminal echoes

Gastrocnemius Veins: Complete compressions,no intraluminal echoes
Soleal Veins: Complete compressions,no intraluminal echoes

RIGHT SUPERFICIAL VENOUS SYSTEM
Great Saphenous Vein: Complete compressions, spontaneous and phasic flow, ,no intraluminal echoes at the saphenofemoral junction.

Small Saphenous Vein: Complete compressions,no intraluminal echoes at the saphenopopliteal junction.

Watson B Smith BA RDMS RVT
Vascular Technologist

FINAL PHYSICIAN INTERPRETATION

06/02/2021 - Vascular US Venous Duplex for DVT or Venous Obstruction Lower Extremity Right in UWMC Vascular Diag Serv (continued)

Imaging (continued)

- No deep vein thrombosis in the right lower extremity including the gastrocnemius, tibial and soleal veins.
- No superficial vein thrombosis in the right lower extremity, where evaluated.

I have personally reviewed the images and agree with the report (or as edited).

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 6/2/2021 1000

Jeanne Leonie Hoffman is a 96 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Wound Care
- ER FOLLOW UP

The patient was admitted on May 21 and discharged on May 25 for right distal femur closed fracture treated with open reduction and internal fixation. Recommendation upon discharge was PT and OT at skilled nursing facility and treatment with Lovenox to reduce risk of DVT. However she was discharged to her son's care at his and Jeanne's insistence and because of high risk of falls and bleeding is treated on aspirin alone. Discharge medications also included Docusate, hydrocodone acetaminophen 5-325 mg #9 tablets and losartan 25 mg to be taken half tablet once daily plus continued on atorvastatin 10 mg daily, pentoxifylline and 400 mg 3 times daily with meals and timolol ophthalmic eyedrops as well as continuing on vitamin D 3.

Today Jean has her hearing aids. She is able to respond to questions. She reports no shortness of breath or signfiicant pain in the area of right leg ORIF. She has not begun PT. She and her son prefer this be at HMC where they have been seen before and where they are comfortable.

Review of Systems:

No fever, chills, sweats

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is

likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Unspecified vitamin B deficiency [E53.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic [IMO0001] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed.
  Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

06/02/2021 - Office Visit in Husky Health Same Day Clinic (continued)

Clinical Notes (continued)

- Type 2 diabetes mellitus without complication, without long-term current use of insulin [E11.9] 10/10/2019
- Primary open angle glaucoma (POAG) of both eyes [H40.1130] 10/10/2019
- Fall [W19.XXXA] 09/03/2019

- Sexual activity: Not Currently

Social History

Tobacco Use

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used

Substance Use Topics

- Alcohol use: No

Objective:

BP 121/64 | Pulse 69

Estimated body mass index is 18.74 kg/m² as calculated from the following:
Height as of 10/21/20: 5' 5" (1.651 m).
Weight as of 10/5/20: 51.1 kg (112 lb 9.6 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
121/64	69	---	---	---	9:50 AM	6/2/2021

Last blood pressure recorded in this encounter: 121/64
General: NAD
COR: HR regular
Lungs: Clear
Extr: Slight edema of right lower leg. Healing incisions with subcutaneous sutures and steri strips in places. No signs of infection. 9 days out from surgery.

Lab and other tests: Pending VUS.

Assessment and Plan:

1. Other closed fracture of distal end of right femur, initial encounter (HCC)

Although recommendation at hospital discharge was for Skilled Nursing and Lovenox,given risk of falls and bleed, patient was discharge on Aspirin 81 mg daily. PT was not organized. Patient and son prefer HMC-PT. Also given not on adequate DVT prophylaxis will obtain US today. She does have some mild edema which is likely due resting the extremity but need to rule out DVT. If DVT found, then would need more aggressive tx.
- Vascular US Venous Duplex for DVT or Venous Obstruction Lower Extremity Right; Future
- Referral to Physical Therapy; Future

Centralized Scheduling 206-520-5000

As wound is healing well with steri strips in place, bandage removed today does not need to be replaced. May bath as usual with limitations imposed the the fracture. Steri strips will fall off in another week or so.

2. Localized edema

See above

- Vascular US Venous Duplex for DVT or Venous Obstruction Lower Extremity Right; Future

EXAMINATION:
LOWER EXTREMITY VENOUS DUPLEX (RIGHT)
Venous Duplex examination performed using B-mode, color flow, and Doppler spectral waveform assessment.

INDICATION:
This is a 96-year-old woman who is postop from a right femur fracture. She has history of lower extremity DVT. She has right calf tenderness. Her right tibial veins were difficult to evaluate on a previous examination. She is not currently receiving prophylactic anticoagulation.

Imaging (continued)

PREVIOUS EXAMINATIONS:
May 5, 2021
January 22, 2020

EQUIPMENT:
Philips Epiq 7

FINDINGS:
LOWER EXTREMITY VENOUS DUPLEX

RIGHT DEEP SYSTEM
Right External Iliac Vein: spontaneous and phasic flow, complete color filling,no intraluminal echoes in the distal segment
Common Femoral Vein: Complete compressions, spontaneous and phasic flow, complete color filling,no intraluminal echoes
Deep Femoral Vein: Complete compressions,

Main Femoral Vein Prox: Complete compressions, spontaneous and phasic flow, complete color filling,no intraluminal echoes
Main Femoral Vein Mid: Complete compressions,
Main Femoral Vein Dist: Complete compressions,

Popliteal Vein: Complete compressions, spontaneous and phasic flow, ,no intraluminal echoes

Posterior Tibial Vein: Complete compressions, complete color filling,no intraluminal echoes
Peroneal Vein:Complete compressions, complete color filling,no intraluminal echoes

Gastrocnemius Veins: Complete compressions,no intraluminal echoes
Soleal Veins: Complete compressions,no intraluminal echoes

RIGHT SUPERFICIAL VENOUS SYSTEM
Great Saphenous Vein: Complete compressions, spontaneous and phasic flow, ,no intraluminal echoes at the saphenofemoral junction.

Small Saphenous Vein: Complete compressions,no intraluminal echoes at the saphenopopliteal junction.

Watson B Smith BA RDMS RVT
Vascular Technologist

FINAL PHYSICIAN INTERPRETATION

- No deep vein thrombosis in the right lower extremity including the gastrocnemius, tibial and soleal veins.
- No superficial vein thrombosis in the right lower extremity, where evaluated.

I have personally reviewed the images and agree with the report (or as edited).

Your Test Results

Test results will appear in your MyChart account as soon as they are available. This means that you may see your results before your health care provider has reviewed them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their provider's office contacts them. Your provider will contact you to discuss significant results. If you have not heard from your provider within three days, or if you have an immediate concern, please contact your provider's office.

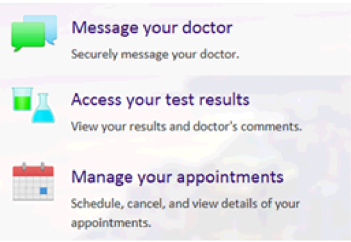
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

To Set Up Your Account:

Request an activation code at mychart.uwmedicine.org

Already have and activation code? Click on "set up your account".

How do I get billing and insurance info?

Your Test Results

Test results will appear in your MyChart account as soon as they are available. This means that you may see your results before your health care provider has reviewed them. Some results may be difficult to interpret or understand on your own. Sometimes results may show a serious disease. Many patients look up their results immediately while others may prefer to wait until their provider's office contacts them. Your provider will contact you to discuss significant results. If you have not heard from your provider within three days, or if you have an immediate concern, please contact your provider's office.

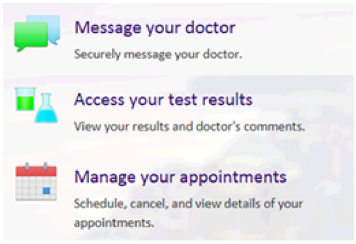
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

HOSPITAL DISCHARGE SUMMARY

PATIENT NAME:
Jeanne L Hoffman

ADMIT DATE:
5/21/2021

DISCHARGE DATE:
5/25/2021

DATE OF SERVICE:
5/25/2021

ADMISSION DIAGNOSES:
Other closed fracture of distal end of right femur, initial encounter (HCC) [S72.491A]
Closed fracture of right distal femur (HCC) [S72.401A]

Present on Admission:
None

DISCHARGE DIAGNOSES:

Principal Problem:
Closed fracture of right distal femur (HCC)

PROCEDURES PERFORMED:
ORIF right distal femoral fracture

HOSPITAL COURSE:

Per admission HPI by Dr. Sachdev 5/21/2021

Jeanne L Hoffman is a 96 y.o. female with past medical history of hypertension peripheral vascular disease, atrial fibrillation although not on any anticoagulation presented to the emergency room after sustaining a mechanical fall. Developed severe pain on her right side and was brought into the emergency room. She was found to have right distal femur fracture. Admission was requested with orthopedics consultation.
Patient is scheduled to go to the OR for internal fixation in a.m. tomorrow. On my evaluation she is resting comfortably no new complaints she gets occasional spasms in her lower extremities, has not been taking her anticoagulation for some reason. Patient is extremely hard of hearing and history is limited with unclear responses but overall she is doing well. We will contact her son to get a more detailed history.
History Obtained from chart review, records from Care Everywhere.

Acute hospital issues and chronic medical conditions listed below

06/02/2021 - Office Visit in Husky Health Same Day Clinic (continued)

Documents (continued)

Discharge Summary by Ahmed Yousif, MD at 5/25/2021 7:41 AM (continued)

 # Facture involving the right distal femur s/p ORIF 5/22
Analgesics controlled with tylenol with occasional need for narcotics with PT. Rx written for norco PRN.
PT/OT recommended SNF but pt and son wished to go home. I discussed with pt and son today and both were adamant about going home
High fall/bleeding risk and high DVT risk explained to son. Ideally should be in supervised setting at SNF on lovenox until abl eto ambulate
Given high fall/rbleeding risk will d/c on ASA only as DVT PPx. discussed with Dr Brown
Touchdown weigth bearing RLE in knee immobilizer
PT/OT at home, PACO signed and referral sent to HH agency

 # Hyperlipidemia
Continue statin

 # HTN
Continue losartan

 # LLE chronic wounds
Wound care consult and will continue wound care with HH services

Today on discharge day patient was seen and evaluated by me. Patient feels well overall and denies any headache vision changes chest pain shortness of breath abdominal pain nausea vomiting fever chills urinary complaints or changes in bowel habits. Reports her pain is mucb better today. All Vital signs are baseline within normal limit and labs at baseline

PERTINENT RESULTS:

XR Femur 2 or More Views Right [317184646] Resulted: 05/22/21 1611
Order Status: Completed Updated: 05/22/21 1612

Narrative:
Exam date: 5/22/2021, 3:44 PM
Referring Provider:

XR FEMUR 2 OR MORE VIEWS RIGHT

CLINICAL HISTORY: Status post ORIF of a distal femoral fracture.

COMPARISON: 5/22/2021 at 11:44 AM and 5/21/2021

TECHNIQUE: Two views of the right femur
Impression:
Findings/impression:

Interval ORIF of a distal femoral shaft fracture, with a large lateral plate-screw construct with the hardware intact and well aligned. Fracture fragments are also in anatomical alignment and position. Severe calcified plaque throughout the SFA. Soft tissues are unremarkable. Changes of previous ORIF of the proximal right femoral fracture again noted. Hardware is intact.
Reading Workstation ID: WASMCDDIM202
XR Femur 2 or More Views Right [317054826] Resulted: 05/22/21 1213

Hoffman, Jeanne L (MRN 1002127482) Page 3 of 7
Discharge Summary by Ahmed Yousif, MD at 5/25/2021 7:41 AM (continued)

Narrative:
This is a non-reportable study with no Radiologist dictation. Please refer to your PACS to review images, or Doc Flowsheets for documentation on studies without images.

XR Chest 1 View [317054803] Resulted: 05/21/21 1731
Order Status: Completed Updated: 05/21/21 1732

Narrative:
SINGLE PORTABLE UPRIGHT CHEST DATED 5/21/2021 AT 5:18 PM

COMPARISON: Previous portable chest radiograph 10/19/2018. No previous 2 view chest or lateral chest radiograph.
CLINICAL HISTORY: Low O2 sats, preop

FINDINGS:
There is no significant airspace disease or pleural fluid.
There are chronic appearing findings in the lungs bilateral. There is bilateral interstitial thickening, similar previous. There is chronic eventration of the right hemidiaphragm, similar previous.
There is a rounded retrocardiac opacity, suggesting hiatal hernia. This was also seen previous, appears mildly enlarged.

The heart shadow is mildly obscured, but does not appear significantly enlarged..
The mediastinum is midline.
Chronic appearing changes in the spine and shoulders.
The remainder is unchanged.
Impression:
1. No significant airspace disease or pleural fluid.
2. Chronic appearing findings across the chest as described above.
3. Findings suggest hiatal hernia, larger than seen previously.
4. Otherwise, no significant changes.
Reading Workstation ID: FMGHICSDRADX01

XR Femur 2 or More Views Right [210295531] Resulted: 05/21/21 1104

RE: Fracture

From	To	Sent
Hoffman, Jeanne Leonie	William E Neighbor Jr., MD	5/25/2021 11:19 AM

Mom is being release today for St. Micheal's.
I don't have a very good communications sharing of charts.
Thus left in the dark.
Ordered necessary medical devices for her immediate post surgery care.
Will be settling up appointment with HHC, UWMC, NWH or Harborview for followup x-ray and lab reports.

Again this injure root cause is HRB Policy restrictions and lack of reasonable accommodations.
This is the 3rd injury.
The need is to move out of HRB Controls, into suitable healthier accommodations

RE: Fracture

RE:Fall

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting Penelope A Watridge, RN)	5/21/2021 8:58 AM

doesn't seem to be any broken bone.
However, need that x-ray to determine extent.
BIFD Medic One wanted St Micheal's, in Silverdale....20min Dive...rather than Harborview 45min.
This complicate matters...in posting Charts to UW Charts. and access.
The fall could have been prevented.....nobody accept my professional expertise....ran out of funds to complete handrail. it just came apart.

Fall

From	To	Sent and Delivered
William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	5/24/2021 3:06 PM

Last Read in MyChart
6/8/2021 8:52 AM by Hoffman, Jeanne Leonie

Thank you for the update.

William E Neighbor, MD

Edema Recovery

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	5/21/2021 7:06 AM

Treatment was started early, elevated leg and warm water soaking for 1/2 hour , applied Eucerin Dermatological cream to soften epidermis and surface epithelium of the skin drying & flaking removal.
Edema and infection symptoms rapid cleared.
Visual aspects look great and pain levels reduced to normal, walking mobility improving.

Clinical Notes

Result Encounter Note

Neighbor Jr., William E, MD at 5/5/2021 1600

Jeanne and Louis:
Jeanne's ultrasound of the lower leg did not show any current clot. That is reassuring. The study was limited because of damage from previous vein issues and her current degree of tenderness.

Given this, it looks like the main issue is an infection similar to what she had in 2019 when she was also treated with Keflex (cephazolin). Keep her leg elevated and some warm but not hot compresses on it several times daily to increase blood flow and delivery of antibiotic. Expect that she should be much better without worsening by tomorrow. If not, it would be best for her to be seen in a local urgent care on Bainbridge. I am off on Fridays so would not be able to see her.

Good to see you both yesterday.

Accredited by the Intersocietal Accreditation Commission - Vascular Testing

EXAMINATION:
LOWER EXTREMITY VENOUS DUPLEX (RIGHT)
Venous duplex examination performed using B-mode, color flow, and Doppler spectral waveform assessment.

INDICATION:
This is a 96 year-old woman with a history of previous deep vein thrombosis. The patient presents with right calf pain and swelling.

PREVIOUS EXAMINATIONS:
01/22/2020 (no deep or superficial vein thrombosis in the right or left lower extremities)
Multiple previous exams

EQUIPMENT:
Philips Epiq 7

FINDINGS:

LOWER EXTREMITY VENOUS DUPLEX

RIGHT DEEP SYSTEM
Common Femoral Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Deep Femoral Vein: complete color filling, no intraluminal echoes

Main Femoral Vein Prox: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Main Femoral Vein Mid: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Main Femoral Vein Dist: Complete compressions, complete color filling, no intraluminal echoes

Popliteal Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes

Posterior Tibial Vein: Not visualized due to poor patient positioning and patient's inability to tolerate probe pressure
Peroneal Vein: Not visualized due to poor patient positioning and patient's inability to tolerate probe pressure

Gastrocnemius Veins: Complete compressions, no intraluminal echoes
Soleal Veins: Not visualized due to poor patient positioning and patient's inability to tolerate probe pressure

RIGHT SUPERFICIAL VENOUS SYSTEM
Great Saphenous Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes at the saphenofemoral junction.
Small Saphenous Vein: Not visualized due to poor patient positioning and patient's inability to tolerate probe pressure

LEFT DEEP SYSTEM

05/05/2021 - Vascular US Venous Duplex for DVT or Venous Obstruction Lower Extremity Right in UWMC Vascular Diag Serv (continued)

Imaging (continued)

Common Femoral Vein: spontaneous and phasic flow, complete color filling, no intraluminal echoes

Erin Makhanov, RVT
Vascular Technologist

FINAL PHYSICIAN INTERPRETATION

RIGHT LOWER EXTREMITY VENOUS
- No deep vein thrombosis in the right lower extremity, where evaluated.
- The right posterior tibial, peroneal, and soleal veins are not visualized due to poor patient positioning and patient inability to tolerate probe pressure.
- No superficial vein thrombosis in the right lower extremity, where evaluated.
- The right small saphenous vein is not visualized.

I have personally reviewed the images and agree with the report (or as edited).

Result Notes

William E Neighbor Jr., MD
5/6/2021 12:49 PM PDT

Jeanne and Louis:
Jeanne's ultrasound of the lower leg did not show any current clot. That is reassuring. The study was limited because of damage from previous vein issues and her current degree of tenderness.

Given this, it looks like the main issue is an infection similar to what she had in 2019 when she was also treated with Keflex (cephazolin). Keep her leg elevated and some warm but not hot compresses on it several times daily to increase blood flow and delivery of antibiotic. Expect that she should be much better without worsening by tomorrow. If not, it would be best for her to be seen in a local urgent care on Bainbridge. I am off on Fridays so would not be able to see her.

Good to see you both yesterday.

None

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 5/5/2021 1540

Jeanne Leonie Hoffman is a 96 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Wound Care

Right lower leg swelling, redness and pain
Patient with history of DVT and venous disease of lower legs who was taken off of anticoagulation three years ago due to lack of recurrence and risk of bleeding due to age, fall, and med compliance. She has chronic ulcers in lower legs to to arterial and venous insufficiency. She lives with son on Bainbridge Island in Community housing. Wound care has been at Northwest though no recent visits. Son has been changing the dressings.

He reports that 5 days ago she developed redness over the dorsum of the right foot and then pain in the lower leg and calf with swelling. Seen in local urgent care but no labs or studies were done. Comes in today for further eval. No general fever or chills. No shortness of breath.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

• Adult failure to thrive syndrome [R62.7]	10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

• Unspecified vitamin B deficiency [E53.9]	05/01/2007

Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic [IMO0001] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension

Objective:
BP (!) 165/76 | Pulse 79 | Temp 36.2 °C (Tympanic)
Estimated body mass index is 18.74 kg/m² as calculated from the following:
Height as of 10/21/20: 5' 5" (1.651 m).
Weight as of 10/5/20: 51.1 kg (112 lb 9.6 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
(!) 165/76	79	---	---	---	12:04 PM	5/5/2021

Last blood pressure recorded in this encounter: **(!) 165/76**
General: NAD
Left lower leg shows Grade 3 healing deep ulcers with healthy appearing tissue lateral lower leg and medail malleolus. These are similar to what she has had in the past.

Right lower leg. On the positive side, the ulcerations have completely healed. However she has redness over the lateral dorsum of the foot with tenderness. Some redness between toes. No discharge. She is tender over the pretibial area and calf. There is no venous engorgement.

Lab and other tests:

Hospital Encounter on 05/05/21
2. Vascular US Venous Duplex for DVT or Venous Obstruction Lower Extremity Right
Narrative

D. E. STRANDNESS, JR. VASCULAR LABORATORY
University of Washington Medical Center
1959 NE Pacific Street
Seattle, WA 98195
206-598-4449

Accredited by the Intersocietal Accreditation Commission - Vascular Testing

EXAMINATION:
LOWER EXTREMITY VENOUS DUPLEX (RIGHT)
Venous duplex examination performed using B-mode, color flow, and Doppler spectral waveform assessment.

INDICATION:
This is a 96 year old woman with a history of prior deep vein thrombosis. The patient presents with right calf pain and swelling.

PREVIOUS EXAMINATIONS:
01/22/2020
Multiple previous exams

EQUIPMENT:
Philips Epiq 7

FINDINGS:
LOWER EXTREMITY VENOUS DUPLEX

RIGHT DEEP SYSTEM
Common Femoral Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Deep Femoral Vein: complete color filling, no intraluminal echoes

Main Femoral Vein Prox: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Main Femoral Vein Mid: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Main Femoral Vein Dist: Complete compressions, complete color filling, no intraluminal echoes

Popliteal Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes

Posterior Tibial Vein: Not visualized due to poor patient positioning and patient's inability to tolerate probe pressure
Peroneal Vein: Not visualized due to poor patient positioning and patient's inability to tolerate probe pressure

Gastrocnemius Veins: Complete compressions, no intraluminal echoes
Soleal Veins: Not visualized due to poor patient positioning and patient's inability to tolerate probe pressure

RIGHT SUPERFICIAL VENOUS SYSTEM
Great Saphenous Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes at the saphenofemoral junction.

Small Saphenous Vein: Not visualized due to poor patient positioning and patient's inability to tolerate probe pressure

LEFT DEEP SYSTEM
Common Femoral Vein: spontaneous and phasic flow, complete color filling, no intraluminal echoes

Impression
PRELIMINARY TECHNOLOGIST IMPRESSION:

1. RIGHT LOWER EXTREMITY VENOUS
- No deep vein thrombosis in the right lower extremity, where visualized. The posterior tibial, peroneal, and soleal veins were not visualized due to poor patient positioning and patient's inability to tolerate probe pressure.
- No superficial vein thrombosis in the right lower extremity, where evaluated. The small saphenous vein was not visualized due to poor patient positioning and patient's inability to tolerate probe pressure.

Erin Makhanov, RVT
Vascular Technologist

FINAL PHYSICIAN INTERPRETATION

Pending

Orders Only on 05/05/21
3. D-Dimer, Quant

Result	Value	Ref Range
D_Dimer, Quant	1.43 (H)	0.00 - 0.59 ug[FEU]/mL

Assessment and Plan:

1. Right calf pain
New calf pain and lower leg swelling in patient with hx of arterial and venous disease of lower extremities who has not been on anticoagulation due to bleeding risk. D Dimer is elevated. Oxygen level normal and no shortness of breath. Rule out new DVT.
Plan:
Today
- Vascular US Venous Duplex for DVT or Venous Obstruction Lower Extremity Right; Future

2. Cellulitis of right lower extremity
Clear cellulitis of the right foot. She had infection of the same foot 2019 which responded to outpatient cephalexin.
Plan:
- cephalexin (Keflex) 500 MG capsule; Take 1 capsule (500 mg) by mouth 4 times a day for 7 days. Dispense: 28 capsule; Refill: 0
- elevation and warm compresses
--Expect improvement without worsening in two days. If not follow up in local urgent care.

Chronic arterial and venous insufficiency
Strongly encourage son to make appointment for follow up at Northwest Wound Care clinic.

Components

Component	Value	Reference Range	Flag	Lab
D_Dimer, Quant	1.43	0.00 - 0.59 ug{FEU}/mL	H	UWMC

Comment:
Quantitative D-Dimer levels less than 0.5 mcg/mL FEU can be used to exclude a diagnosis of pulmonary embolism or proximal DVT in the setting of low and moderate pretest probability. A negative result does not exclude the possibility of thrombosis, especially if pretest probability is high.

Accredited by the Intersocietal Accreditation Commission - Vascular Testing

EXAMINATION:
LOWER EXTREMITY VENOUS DUPLEX (RIGHT)
Venous duplex examination performed using B-mode, color flow, and Doppler spectral waveform assessment.

INDICATION:

05/05/2021 - Office Visit in Husky Health Primary Care Clinic (continued)

Imaging (continued)

This is a 96 year-old woman with a history of previous deep vein thrombosis. The patient presents with right calf pain and swelling.

PREVIOUS EXAMINATIONS:
01/22/2020 (no deep or superficial vein thrombosis in the right or left lower extremities)
Multiple previous exams

EQUIPMENT:
Philips Epiq 7

FINDINGS:

LOWER EXTREMITY VENOUS DUPLEX

RIGHT DEEP SYSTEM
Common Femoral Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Deep Femoral Vein: complete color filling, no intraluminal echoes

Main Femoral Vein Prox: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Main Femoral Vein Mid: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Main Femoral Vein Dist: Complete compressions, complete color filling, no intraluminal echoes

Popliteal Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes

Posterior Tibial Vein: Not visualized due to poor patient positioning and patient's inability to tolerate probe pressure
Peroneal Vein: Not visualized due to poor patient positioning and patient's inability to tolerate probe pressure

Gastrocnemius Veins: Complete compressions, no intraluminal echoes
Soleal Veins: Not visualized due to poor patient positioning and patient's inability to tolerate probe pressure

RIGHT SUPERFICIAL VENOUS SYSTEM
Great Saphenous Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes at the saphenofemoral junction.
Small Saphenous Vein: Not visualized due to poor patient positioning and patient's inability to tolerate probe pressure

LEFT DEEP SYSTEM
Common Femoral Vein: spontaneous and phasic flow, complete color filling, no intraluminal echoes

Erin Makhanov, RVT
Vascular Technologist

FINAL PHYSICIAN INTERPRETATION

RIGHT LOWER EXTREMITY VENOUS
- No deep vein thrombosis in the right lower extremity, where evaluated.
- The right posterior tibial, peroneal, and soleal veins are not visualized due to poor patient positioning and patient inability to tolerate probe pressure.
- No superficial vein thrombosis in the right lower extremity, where evaluated.
- The right small saphenous vein is not visualized.

I have personally reviewed the images and agree with the report (or as edited).

Result Notes

William E Neighbor Jr., MD
5/6/2021 12:49 PM PDT

Jeanne and Louis:
Jeanne's ultrasound of the lower leg did not show any current clot. That is reassuring. The study was limited because of damage from previous vein issues and her current degree of tenderness.

Given this, it looks like the main issue is an infection similar to what she had in 2019 when she was also treated with Keflex (cephazolin). Keep her leg elevated and some warm but not hot compresses on it several times daily to increase blood flow and delivery of antibiotic. Expect that she should be much better without worsening by tomorrow. If not, it would be best for her to be seen in a local urgent care on Bainbridge. I am off on Fridays so would not be able to see her.

Good to see you both yesterday.

After Visit Summary (continued)

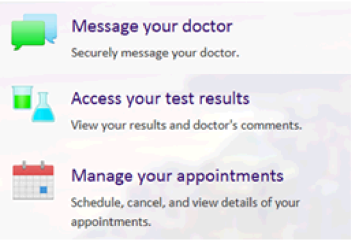
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

To Set Up Your Account:

Request an activation code at mychart.uwmedicine.org

William E Neighbor Jr., MD Last Read in MyChart	Hoffman, Jeanne Leonie	5/5/2021 6:10 PM

Messages (continued)

5/21/2021 7:06 AM by Hoffman, Jeanne Leonie

Jeanne: Below is a summary of your visit.

Assessment and Plan:
1. Right calf pain
New calf pain and lower leg swelling in patient with hx of arterial and venous disease of lower extremities who has not been on anticoagulation due to bleeding risk. D Dimer is elevated. Oxygen level normal and no shortness of breath. Rule out new DVT.
Plan:
Today
- Vascular US Venous Duplex for DVT or Venous Obstruction Lower Extremity Right; Future

2. Cellulitis of right lower extremity
Clear cellulitis of the right foot. She had infection of the same foot 2019 which responded to outpatient cephalexin.
Plan:
- cephalexin (Keflex) 500 MG capsule; Take 1 capsule (500 mg) by mouth 4 times a day for 7 days. Dispense: 28 capsule; Refill: 0
- elevation and warm compresses
--Expect improvement without worsening in two days. If not follow up in local urgent care.

Chronic arterial and venous insufficiency
Strongly encourage son to make appointment for follow up at Northwest Wound Care clinic.

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

05/05/2021 - Office Visit in Husky Health Primary Care Clinic (continued)

Documents (continued)

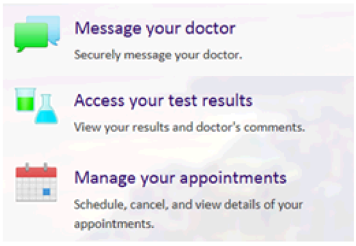
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for MyChart today. It's the best way to communicate with your care team!

To Set Up Your Account:

Components

Component	Value	Reference Range	Flag	Lab
D_Dimer, Quant	1.43	0.00 - 0.59 ug{FEU}/mL	H	UWMC

Comment:
Quantitative D-Dimer levels less than 0.5 mcg/mL FEU can be used to exclude a diagnosis of pulmonary embolism or proximal DVT in the setting of low and moderate pretest probability. A negative result does not exclude the possibility of thrombosis, especially if pretest probability is high.

Testing Performed By

RE: Appointment Request

From	To	Sent and Delivered
Jeanette R Abdon, PSS/PSR	Hoffman, Jeanne Leonie	4/30/2021 2:58 PM

Last Read in MyChart
4/30/2021 6:34 PM by Hoffman, Jeanne Leonie

Hello Jeane

Thank you for your ecare appointment request. I have scheduled you for the following:

Appointment Date: 5/5/2021
Appointment Time: 3:40 pm
Provider: Dr. Neighbor
Location: Hall Health Center

Please arrive 10-15 minutes prior to your appointment time for check-in. Please be prepared to show your photo ID and insurance information. As a reminder, appointments that are cancelled late or no showed may result in a fee.

We are asking that all patients entering the building to have a mask on. We are also requiring that any friends, family etc... wait outside (except for care givers or children) as we are limiting entry to our facility to patients only

Thank you
Hall Health Clinic

Healing Wounds

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	4/1/2021 11:38 AM

Please be advised that:
1). Right leg has healed.
2). Left leg is healing rapidly.

Expect total healing, by end of May or sooner.
General health and life outlook, has improved.
Living conditions, still an issue, causing extreme sadness and depression.
Do to isolation, loss of friendships and non existing social activities.
Housing is contribution to poor out look, do to Residents/Neighbors being mentally incompetent and one room is to small to support 2 adults with life ambitions being unattainable do to stigma of hopelessness.

Have a wonderful day.
See you soon for Physical check.

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA
Entered on: 9/4/2019
End date: 3/8/2025
Informant: Patient Reported

cephalexin (KEFLEX) 500 MG Oral Capsule

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 5/5/2021
Reason for discontinuation: Reorder
Instructions: Take 1 capsule (500 mg) by mouth 4 times a day for 7 days. For 7 days.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/23/2019
Start date: 10/23/2019
End date: 5/5/2021
Quantity: 28 capsule
Refill: No refills remaining

naloxone (Narcan) 4 MG/0.1ML nasal spray

02/11/2021 - Immunization in Harborview Medical Center - COVID 19 Vaccine Clinic (continued)

Medication List (continued)

Instructions: Use 1 spray in one nostril for suspected opioid overdose. Call 911. If unresponsive in 2 to 3 minutes, repeat with new naloxone nasal spray.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 6/19/2020
Start date: 6/19/2020
End date: 6/19/2021
Quantity: 2 each
Refill: No refills remaining

atorvastatin 20 MG tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/16/2020
Start date: 9/16/2020
End date: 10/13/2021
Quantity: 45 tablet
Refill: 3 refills by 9/16/2021

pentoxifylline ER 400 MG ER tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/16/2020
Start date: 9/16/2020
End date: 10/13/2021
Quantity: 90 tablet
Refill: 6 refills by 9/16/2021

acetaminophen-codeine 300-15 MG tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Instructions: One half to one tablet daily. Take additional acetaminophen during the day up to 2500 mg in divided dose.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/21/2020
Start date: 10/21/2020
End date: 10/13/2021
Quantity: 30 tablet
Refill: No refills remaining

timolol maleate 0.5 % ophthalmic solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 12/9/2021
Reason for discontinuation: Reorder
Instructions: instill one drop in each eye twice daily. block tear duct for 1-2 min after use
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/21/2020
Start date: 10/21/2020
End date: 12/9/2021
Quantity: 10 mL
Refill: 6 refills by 10/21/2021

covid vaccine

From	To	Sent and Delivered
William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	1/19/2021 2:41 PM

Last Read in MyChart
1/19/2021 3:29 PM by Hoffman, Jeanne Leonie

See instructions below for sign up for vaccine via E care
There may also be option through the Kitsap public health department.

Options for scheduling as per UWM communications are:

--My Chart (E care) Direct scheduling. Ignore, the section on “COVID vaccine information" at this time as it does not lead you to a scheduling option. Instead go to the menu option “schedule an appointment”. One of the appointment options will be “COVID vaccine.”

-- Open Scheduling via uwmedicine.org is being developed for those who do not have an E care account. The website will be: https://www.uwmedicine.org/coronavirus/vaccine

--Call or texting 844.520.8700. This goes to the UW Medicine Call Center. There is a call back option. This is working currently but inundated.

Another option for patients is to go to the state website. This will lead a patient thru questions to identify what “tier” they are in and may provide information on where and how to schedule an appointment.
FindYourPhaseWA.org
https://form.findyourphasewa.org/210118771253954

UWM plans on pushing out a message to its patients (including Hall Health) soon.

Additional informational resources for information on the vaccine include:

American Academy of Family Physicians COVID Vaccine FAQs
https://www.aafp.org/dam/AAFP/documents/patient_care/public_health/COVID19-Vaccine-FAQs.pdf

CDC: Your Health: Understanding the mRNA COVID vaccine
https://www.cdc.gov/coronavirus/2019-ncov/vaccines/different-vaccines/mrna.html

CDC: COVID vaccine:

11/25/2020 - Telemedicine in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Neighbor Jr., William E, MD at 11/25/2020 1020

Jeanne Leonie Hoffman is a 95 year old female here to discuss the following: No chief complaint on file.

Distant Site Telemedicine Encounter

I conducted this encounter from Hall Health via secure, live, face-to-face video conference with the patient. Jeanne was located at home with Son Louise. Prior to the interview, the risks and benefits of telemedicine were discussed with the patient and verbal consent was obtained.

The patient was last seen by me October 21.
--acute midline thoracic back pain for which spine films did not show an acute process.
--- Venous stasis and PVD ulcerations of the lower extremity for which she was to followup at the Northwest wound care center

She was seen at the Northwest wound care center on November 2. Was felt that overall they're is slow improvement. Wounds were treated. Plan was to continue to use silver alginate and autolytic debridement with light compression stockings for edema control.

Today:
--No further acute thoracic spine pain
--Avoiding overuse of codeine. Taking essentially one half of Tylenol with Codeine No 2 dosage daily. Has over a month of med remaining. Will contact me for refills
--Has adequate dressing supplies
--Drinking 2-4 cans of Ensure daily and Louise is trying to get her to eat more protein though appetitie continues to be low but not different than over the last year
--Follow up planned with Dentist
--They are working on changing apartments to one that is larger.

Review of Systems:
No fever, chiills, sweats reported
No abd pain
No change in stools or urination
Bathing normally

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

• Adult failure to thrive syndrome [R62.7]	10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.

Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Unspecified vitamin B deficiency [E53.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic [IMO0001] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.

11/25/2020 - Telemedicine in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
Advise Vit D 800 IU daily.

- Type 2 diabetes mellitus without complication, without long-term current use of insulin [E11.9] 10/10/2019
- Primary open angle glaucoma (POAG) of both eyes [H40.1130] 10/10/2019
- Fall [W19.XXXA] 09/03/2019
- Acute blood loss anaemia [D62] 08/11/2019
- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC) [L97.313] 05/26/2019
- Chronic venous hypertension with ulcer, bilateral [IMO0001] 05/26/2019
- Bilateral leg edema [R60.0] 05/26/2019
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC) [I70.232, I70.242] 09/24/2018
- Diabetic ulcer of lower extremity (HCC) [E11.622, L97.909] 09/24/2018
- Vitamin D deficiency [E55.9] 07/09/2018
- Venous ulcer of left leg (HCC) [I83.029, L97.929] 06/07/2018
- Normocytic anemia [D64.9] 06/07/2018
- Severe protein-calorie malnutrition (HCC) [E43] 06/07/2018
- Urge urinary incontinence [N39.41] 06/07/2018
- Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC) [L97.323] 05/17/2018
- Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC) [L97.223] 05/17/2018
- Chronic venous hypertension with ulcer and inflammation, left [I87.332, L97.929] 05/17/2018
- Primary osteoarthritis of both hips [M16.0] 02/01/2017
- Thrombocytopenia (HCC) [D69.6] 11/02/2016
- Imbalance [R26.89] 11/02/2016
- History of recurrent deep vein thrombosis (DVT) [Z86.718] 06/02/2016
- Hip joint stiffness [M25.659] 01/06/2015
- Leg weakness, bilateral [R29.898] 01/06/2015
- Weakness of trunk musculature [M62.81] 01/06/2015
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication (HCC) [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

No outpatient medications have been marked as taking for the 11/25/20 encounter

(Appointment) with Neighbor Jr., William E, MD.

Social history:

- Sexual activity: Not Currently

Social History

Tobacco Use

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used

Substance Use Topics

- Alcohol use: No

Objective:

There were no vitals taken for this visit.
Estimated body mass index is 18.74 kg/m² as calculated from the following:
Height as of 10/21/20: 5' 5" (1.651 m).
Weight as of 10/5/20: 51.1 kg (112 lb 9.6 oz).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter:
General: NAD
Telemed visit. Son Louise showed me ulcers of lower legs with camera. Difficult to determine if improved or not. Best done in person at NW Wound care.

Lab and other tests: none

Assessment and Plan:

1. Osteoarthritis, unspecified osteoarthritis type, unspecified site

Will continue to primarily use plain tylenol for pain control. May continue one half to one tablet daily of Tylenol with Codeine No 2 strength. Actually using less

Thoracic spine pain for which seen in mid October has resolved or returned to baseline.

2. Essential hypertension

No recent home readings. Louis will send me readings.

Other:
--Follow up with dental clinic
--Rescheduling NW Wound Care visit to later in December. Will judge safety of boarding bus and ferry. Consider home nurse visit.
--Continue dressing changes as instructed by NW Wound Care.
--Continue protein nutrition.

Duration of visit, review of records and documentation 25 minutes.

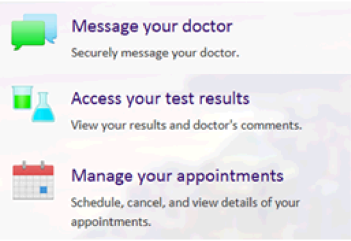
After Visit Summary (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use eCare (MyChart) to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for eCare (MyChart) today. It's the best way to communicate with your care team!

Quantity: 2 each
Refill: No refills remaining

atorvastatin 20 MG tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/16/2020
Start date: 9/16/2020
End date: 10/13/2021
Quantity: 45 tablet
Refill: 3 refills by 9/16/2021

pentoxifylline ER 400 MG ER tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/16/2020
Start date: 9/16/2020
End date: 10/13/2021
Quantity: 90 tablet
Refill: 6 refills by 9/16/2021

acetaminophen-codeine 300-15 MG tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Instructions: One half to one tablet daily. Take additional acetaminophen during the day up to 2500 mg in divided dose.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/21/2020
Start date: 10/21/2020
End date: 10/13/2021
Quantity: 30 tablet
Refill: No refills remaining

timolol maleate 0.5 % ophthalmic solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 12/9/2021
Reason for discontinuation: Reorder
Instructions: instill one drop in each eye twice daily. block tear duct for 1-2 min after use
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/21/2020
Start date: 10/21/2020
End date: 12/9/2021

Hello Jeane

I have scheduled you for the following:

Appointment Date: 11/25/2020
Appointment Time: 10:20 am
Provider: Dr. Neighbor

Please be prepared and login 15 minutes prior to your appointment time for check-in.

11/17/2020 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Messages (continued)

For your appointment you will be accessing it through eCare. You will see an alert and a button in eCare to "Begin Video Visit" which launches Zoom and connects the patient to the Epic meeting link

If clicking on "Begin Video Visit" does not work here is the link that you can copy and paste into your browser. It is long but it works.

https://applications.zoom.us/telehealth?org_id=ni0OxEC_ROadQrkxobmSaQ&data=Dn8Eif%2ByxHMPCYyYdWZYEaqPyZX33n1WvopcWZ4L91oR%2BOLhcEwpFx62Sf4CW993SoScRawICc0klJUg%2BL9ajIQ%2BbUGGwHGWC%2F9lt8Wssd8%3D

Your telemedicine visit will be billed to your insurance in the same manner as a regular in-person office visit. This means that your standard copay, coinsurance, and deductible will apply. Hall Health will charge no show/late cancellation fee if appointment is missed or appointment was not cancelled with 24 hours or more notice.

Please let us know if you have any questions or concerns.

Thank you,
Hall Health Clinic

11/02/2020 - Office Visit in UW Medicine Northwest Wound Care and Hyperbaric Center

Reason for Visit

Chief complaint: Follow Up Visit
Visit diagnoses:

- Non-pressure chronic ulcer of left ankle with necrosis of muscle (primary)
- Non-pressure chronic ulcer of left calf with necrosis of muscle
- Chronic venous hypertension with ulcer and inflammation, left
- Atherosclerosis of native artery of left lower extremity with ulceration of calf
- Non-pressure chronic ulcer of right calf with fat layer exposed

Active at the End of Visit

Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 10/13/2021
Instructions: Take 1 tablet by mouth 2 times a day.
Entered by: Ong, Thuan Duc, MD — Entered on: 6/7/2018
End date: 10/13/2021

acetaminophen 500 MG Oral Tab

Discontinued by: Van Hoff, Linda A, ARNP — Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions:
1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
Entered by: Taylor, Zoe Judith Mildred, MD — Entered on: 8/20/2019
Start date: 8/5/2019 — End date: 6/12/2024
Action: Patient not taking

Calcium Carbonate 500 MG Oral Chew Tab

Discontinued by: Clark, Trika L, Pharmacy Technician — Discontinued on: 1/9/2025
Reason for discontinuation: Discontinued by patient
Instructions: Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.
Entered by: Taylor, Zoe Judith Mildred, MD — Entered on: 8/20/2019
Start date: 8/5/2019 — End date: 1/9/2025

Cholecalciferol 1000 units Oral Tab

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA
Entered on: 9/4/2019
End date: 3/8/2025
Informant: Patient Reported

cephalexin (KEFLEX) 500 MG Oral Capsule

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 5/5/2021
Reason for discontinuation: Reorder
Instructions: Take 1 capsule (500 mg) by mouth 4 times a day for 7 days. For 7 days.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/23/2019
Start date: 10/23/2019
End date: 5/5/2021
Quantity: 28 capsule
Refill: No refills remaining

naloxone (Narcan) 4 MG/0.1ML nasal spray

Instructions: Use 1 spray in one nostril for suspected opioid overdose. Call 911. If unresponsive in 2 to 3 minutes, repeat with new naloxone nasal spray.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 6/19/2020

Progress Notes

Tamashiro, Kay, RN at 11/2/2020 0900

Denies changes with medications since last visit. No new allergies.

Electronically signed by Tamashiro, Kay, RN at 11/2/2020 12:50 PM

Null, Margaret K, RN at 11/2/2020 0900

Pt reportedly fell at home as she didn't have a hand rail to hold onto. The pt's son is fighting with the landlord about adding the necessary items to make the home safe for her.
Right calf and left calf: Clean with water, apply silver alginate cover with gauze and roll gauze secure with tape change every other day
Compressogrip socks on both legs every day.

Electronically signed by Null, Margaret K, RN at 11/2/2020 12:50 PM

Miller, Rebecca J, CMA at 11/2/2020 0900

Dressing applied per provider order.

Electronically signed by Miller, Rebecca J, CMA at 11/2/2020 9:39 AM

Norsworthy, Nilufer Bozdemir, MD at 11/2/2020 0900

PROGRESS NOTE
11/2/2020

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with multiple bilateral lower leg ulcers with mixed vascular disease is seen today for Follow Up Visit

INTERVAL HISTORY: she presented for follow up with her son Louis.she is not wearing her hearing aids today so the communication is not optimal especially with masks that everybody is wearing. She had a fall at home and has back and shoulder pains. She was seen at urgent care clinic and x-rays were negative of any fracture.
Ulcers have improved at both lower legs: they are smaller and especially the area at left ankle wound is covered with thick layer of stringy fibrinous slough in patches. she was changing dressings every 1-2 days, after taking shower with help of her son. There is no inflammation with ulcers. She reports no pain at rest. She denies any sob, chest pain or palpitations.
She is feeling good overall. She is now living in an apartment with her son Louis, regular access to showers, regular meals, taking supplemental protein.
She was admitted to hospital in June with AMS, with codeine overdose and CAP. The ulcers were dressed with honey/gauze by HHRN after discharge. Lately his son was covering the wounds with Vaseline gauze. She was picking on her wounds and skin frequently to keep them clean. Her last visit at our center was in November 2019. Since then she stayed home to be protected from COVID-19.

Brief History - This is a patient with DM2, CLI with extensive atherosclerotic disease and chronic leg edema with venous hypertension s/p GSV ablation in2018.

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:Negative for, fatigue, unexpected weight loss, unexpected weight gain, fever, . Does have, limb pain

Past medical history, social history, medications and family history were reviewed with the patient and changes were recorded.

Review of patient's allergies indicates:
Allergies

PROCEDURE
A preprocedure time out was performed confirming the patient's identity, procedure to be performed, and site. A verbal consent was obtained.
Wound/Ulcer: # 17 / Description: Wound bed and edges are covered with thick stringy slough,
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue
Tissue and/or Material Removed: fibrin/slough, non-viable, skin, subcutaneous and viable
Severity: fat layer exposed
Instruments Used: curette
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~50 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements:
: Improved: Length 19.5cm X Width 9.3cm X Depth: 0.4cm this is a cluster of ulcers, some areas are deep to fascia
Patient tolerated the procedure well.
The wound looked improved after the debridement

11/02/2020 - Office Visit in UW Medicine Northwest Wound Care and Hyperbaric Center (continued)

Clinical Notes (continued)

ASSESSMENT:
(L97.323) Non-pressure chronic ulcer of left ankle with necrosis of muscle (primary encounter diagnosis)
(L97.223) Non-pressure chronic ulcer of left calf with necrosis of muscle
(I87.332, L97.929) Chronic venous hypertension with ulcer and inflammation, left
(I70.242) Atherosclerosis of native artery of left lower extremity with ulceration of calf (HCC)
(L97.212) Non-pressure chronic ulcer of right calf with fat layer exposed (HCC)
This is a 95 yo patient with left limb ulcers with DM2, mixed vascular disease, edema and anemia and protein calori malnutrition.. She has challenging lifestyle by living as an urban nomad along with her son, mostly sharing suboptimal living conditions. To my knowledge she has been in a single room apartment for the last year or so. She feels she has sufficient nutrition, eating a meal with animal protein daily. She is avoiding salty food in diet. She is elevating legs while resting during the day. Comparing the last visit after a long period of distant management due to COVID-19 outbreak, wounds have improved despite the challenges for wound healing, advanced age, comorbidity and social issues.
I debrided the ulcers at left side ankle as this one had large bioburden. For wounds we will use silver alginate to continue autolytic debridement. Continue light compression tubes or socks for edema control.
Patient education took place regarding the treatment progress and further measures to address the condition. The patient was given an opportunity to ask questions.
It was a pleasure to see Ms. Hoffman at my clinic. Please do not hesitate to call me for any questions or concerns.
Treatment plan recommended at this time includes the following:
Jeanne was seen today for follow up visit.

Diagnoses and all orders for this visit:

Non-pressure chronic ulcer of left ankle with necrosis of muscle
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Non-pressure chronic ulcer of left calf with necrosis of muscle
- NURSING COMMUNICATION

Chronic venous hypertension with ulcer and inflammation, left
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Atherosclerosis of native artery of left lower extremity with ulceration of calf (HCC)
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Non-pressure chronic ulcer of right calf with fat layer exposed (HCC)
- NURSING COMMUNICATION

Patient Instructions
Right calf and left calf: Clean with water, apply silver alginate cover with gauze and roll gauze secure with tape

11/02/2020 - Office Visit in UW Medicine Northwest Wound Care and Hyperbaric Center (continued)

Clinical Notes (continued)

change every other day
Compressogrip socks on both legs every day.

Return in about 4 weeks (around 11/30/2020).

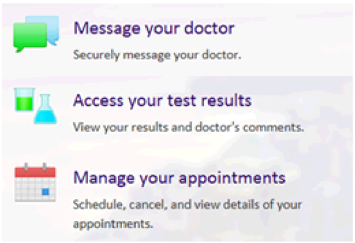
After Visit Summary (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use eCare (MyChart) to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for eCare (MyChart) today. It's the best way to communicate with your care team!

Clinical Notes (continued)

Progress Notes

Neighbor Jr., William E, MD at 10/21/2020 0940

Jeanne Leonie Hoffman is a 95 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Musculoskeletal Problem
  she fault yesterday morning and she needs xtray for check her bone

Two issues:

Fall
Yesterday tripped in apartment and fell against plaster wall. Slid down wall. Slow fall. No acute pain but now complains of worse back pain in lower T spine. No radiation of pain. No other pain.

Cough
In the last week intermittent cough often in the afternoon without fever, chills, sweats, runny nose, sore throat. No shortness of breath. Cough not productive.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Unspecified vitamin B deficiency [E53.9] 05/01/2007

Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic [IMO0001] 11/20/2006

Recurrent DVT and phlebitis since 1982
Per Vascular Surgery note 5/9/2006: continue warfarin
3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006

• Pseudophakia, both eyes [Z96.1]	11/08/2014
• Urine incontinence [R32]	08/27/2014

Uses pads

• Type 2 diabetes mellitus without complication (HCC) [E11.9]	03/27/2007

Year onset: Dx March 2007
Metformin discontinued 2011 as A1c in target range without it.
Diet and weight controlled.

Outpatient Medications Marked as Taking for the 10/21/20 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• acetaminophen 500 MG Oral Tab	1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition		
• acetaminophen-codeine 300-15 MG tablet	One half to one tablet daily. Take additional acetaminophen during the day up to 2500 mg in divided dose.	30 tablet	0
• atorvastatin 20 MG tablet	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	45 tablet	3
• Calcium Carbonate 500 MG Oral	Chew and swallow 2		

10/21/2020 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Chew Tab	tablets by mouth 3 times a day as needed for indigestion/heartburn.		
• Cholecalciferol 1000 units Oral Tab	Take 2 tablets (2,000 Units) by mouth daily.		
• Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab	Take 1 tablet by mouth 2 times a day.		
• MULTIPLE VITAMIN OR	Take by mouth.		
• naloxone (Narcan) 4 MG/0.1ML nasal spray	Use 1 spray in one nostril for suspected opioid overdose. Call 911. If unresponsive in 2 to 3 minutes, repeat with new naloxone nasal spray.	2 each	0
• pentoxifylline ER 400 MG ER tablet	Take 1 tablet (400 mg) by mouth 3 times a day.	90 tablet	6
• timolol maleate 0.5 % ophthalmic solution	instill one drop in each eye twice daily. block tear duct for 1-2 min after use	10 mL	0

Social history:

- Sexual activity: Not Currently

Social History

Tobacco Use

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used

Substance Use Topics

- Alcohol use: No

Objective:

BP (!) 156/67 | Pulse 65 | Ht 5' 5" (1.651 m) | BMI 18.74 kg/m²
Estimated body mass index is 18.74 kg/m² as calculated from the following:
Height as of this encounter: 5' 5" (1.651 m).
Weight as of 10/5/20: 51.1 kg (112 lb 9.6 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
(!) 156/67	65	---	---	---	9:13 AM	10/21/2020

Last blood pressure recorded in this encounter: **(!) 156/67**
General: Complains of worse lower T spine pain
Chest: Clear throughout
Nose: Without congestion
MSK; Tender over T10-11 in midlline without ecchymoses. No rib tenderness. Upper extremities non tender to palpation and without change in ROM.

Clinical Notes (continued)

Lab and other tests: T spine X ray today

Assessment and Plan:

1. Acute midline thoracic back pain

No clear fracture seen. Osteoporotic. Question of T11 spine fracture. Formal radiology reading pending
Plan:
--Warm compresses
--Continue current pain medications
--Expect resolution over next week
--Final reading pending

2. Venous ulcer of left leg (HCC)

Recent visit to NW Wound Care appreciated.
Plan:
--Follow up in one month
--Refilled medication
- acetaminophen-codeine 300-15 MG tablet; One half to one tablet daily. Take additional acetaminophen during the day up to 2500 mg in divided dose. Dispense: 30 tablet; Refill: 0

3. Other chronic pain

Refilled. She is using this for DJD pain particularly of spine and for leg pain related to above. Dose is reduced from earlier this year to one half to one tab daily.
- acetaminophen-codeine 300-15 MG tablet; One half to one tablet daily. Take additional acetaminophen during the day up to 2500 mg in divided dose. Dispense: 30 tablet; Refill: 0

4. GLAUCOMA NOS

Refilled.
- timolol maleate 0.5 % ophthalmic solution; instill one drop in each eye twice daily. block tear duct for 1-2 min after use Dispense: 10 mL; Refill: 6

Questionnaire

Question	Answer
Reason for exam (include signs, symptoms, diagnosis, and medical history)?	slow fall yesterday in house. Now tender over T10-T11 in midline

Indications

Acute midline thoracic back pain [M54.6 (ICD-10-CM)]

XR T SPINE 2 VW Resulted: 10/22/20 1308, Result status: Final result

Order status: Completed
Filed by: Uw Radiology Results Interface, User 10/22/20 1310
Accession number: 13667062
Lab Technician: AJAY CHHABRA HALL HEALTH TECH
Resulted by: Haynor, David Robert, MD
Performed: 10/21/20 0932 - 10/21/20 0932
Resulting lab: UW RADIOLOGY

Narrative:
EXAMINATION:
XR T SPINE 2 VIEWS

CLINICAL INDICATION:
slow fall yesterday in house. Now tender over T10-T11 in midline

COMPARISON:
CT chest July 24, 2019

FINDINGS:
S-shaped curvature of the thoracolumbar spine is again demonstrated. Generalized osteopenia is present. There are mild anterior compression fractures of T11, T12, L1, L2. Comparison with the chest CT suggests some progression at the T11 level, although this appears more chronic than acute. Overall, sensitivity is somewhat limited because of osteopenia and spinal curvature.

Pain Control and Opioid Safety Instructions

Today you were given a prescription for an opioid pain medicine. You have the right to refuse an opioid prescription for any reason. Simply tell your prescriber about this preference and it will be written in your medical record. You can change your mind about this at any time.

If you do fill your prescription remember that even strong pain medicines may not remove all pain. Please use non-drug methods such as heat, cold, or relaxation to help control your pain. Unless your doctor tells you otherwise, try taking acetaminophen (Tylenol) and ibuprofen (Advil, Motrin) to control your pain before you take opioid pain medicine. You do not need a prescription to buy acetaminophen and ibuprofen. Follow the dose instructions on the bottles.

Opioid medications may be prescribed by health care providers to treat moderate to severe pain, but can have side effects and serious health risks, such as tolerance, physical dependence, opioid use disorder, and overdose. Risks are greater when used with other medicines for sleep or anxiety, if you are over the age of 65, have a history of substance use, mental health condition, or are pregnant. Only take opioids if you have strong pain that does not lessen with other methods to control your pain. Never take more than the maximum dose as prescribed by your provider.

Safe use

- Do not operate a car or heavy machinery while using this medicine.
- Do not drink alcohol with this medicine.
- Side effects include drowsiness, nausea, constipation, and dry mouth.
- Opioids can be habit forming.
- Opioids can slow your breathing and heart rate. If they slow too much, it can cause death.

Naloxone for Opioid Overdose

Naloxone is a prescription medicine that temporarily reverses an opioid overdose. In the state of Washington, you can get naloxone from any pharmacy without a prescription. The cost may vary. For more information, visit **stopoverdose.org**

Safe storage

- Never share or sell your prescription opioids.
- Keep opioid medications locked or in a safe location.
- Keep out of reach of children and out of sight from others.
- Leave in the original bottle with the label attached.

Proper disposal

You are NOT required to use all of your opioid medication. To find your nearest take-back location for proper disposal of unused medications, please visit:

- takebackyourmeds.org,
- med-project.org, or
- doh.wa.gov/safemedreturn

If you cannot use a medication take-back program, flush the opioids down the toilet.

Your Medication List as of October 21, 2020 1:26 PM

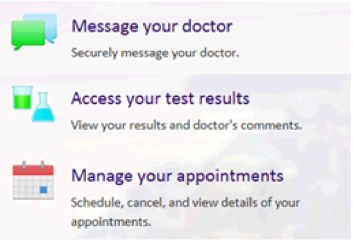
After Visit Summary (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use eCare (MyChart) to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for eCare (MyChart) today. It's the best way to communicate with your care team!

Acute midline thoracic back pain [M54.6]

Questionnaire

Question	Answer
Reason for exam (include signs, symptoms, diagnosis, and medical history)?	slow fall yesterday in house. Now tender over T10-T11 in midline

Order comments: From Epic: Diagnosis:Acute midline thoracic back pain, Allergies:ADHESIVES, ASPIRIN, NITROFURANTOIN, NITROFURANTOIN, PENICILLINS, SULFA ANTIBIOTICS,

XR T SPINE 2 VW Resulted: 10/22/20 1308, Result status: Final result

Order status: Completed Resulted by: Haynor, David Robert, MD
Filed by: Uw Radiology Results Interface, User 10/22/20 1310 Performed: 10/21/20 0932 - 10/21/20 0932
Accession number: 13667062 Resulting lab: UW RADIOLOGY
Lab Technician: AJAY CHHABRA HALL HEALTH TECH
Narrative:
EXAMINATION:
XR T SPINE 2 VIEWS

CLINICAL INDICATION:
slow fall yesterday in house. Now tender over T10-T11 in midline

COMPARISON:
CT chest July 24, 2019

FINDINGS:
S-shaped curvature of the thoracolumbar spine is again demonstrated. Generalized osteopenia is present. There are mild anterior compression fractures of T11, T12, L1, L2. Comparison with the chest CT suggests some progression at the T11 level, although this appears more chronic than acute. Overall, sensitivity is somewhat limited because of osteopenia and spinal curvature.

Neighbor Jr., William E, MD at 11/3/2020 1501

Dental form completed and returned.
Patient is not on anticoagulants
She has not had a biphosphonate since Fosamax in 2010, ten years ago.
I have asked Dr. Norsworthy for his opinion regarding timing of extraction related to her nutrition and healing of her leg ulcers.
Will update dental clinic when receive his response.

PROGRESS NOTE
10/5/2020

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with multiple bilateral lower leg ulcers with mixed vascular disease is seen today for Follow Up Visit

INTERVAL HISTORY: Ulcers are larger at both lower legs. There is no inflammation with ulcers. She reports some increased pain at the right lower leg that occasionally keeps her awake. She denies any sob, chest pain or palpitations.
She is feeling good overall. She is now living in an apartment with her son Louis, regular access to showers, regular meals, taking supplemental protein.
She was admitted to hospital in June with AMS, with codeine overdose and CAP. The ulcers were dressed with honey/gauze by HHRN after discharge. Lately his son was covering the wounds with Vaseline gauze. She was picking on her wounds and skin frequently to keep them clean. Her last visit at our center was in November 2019. Since then she stayed home to be protected from COVID-19.

Brief History - This is a patient with DM2, CLI with extensive atherosclerotic disease and chronic leg edema with venous hypertension s/p GSV ablation in2018.

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:Negative for, fatigue, unexpected weight loss, unexpected weight gain, fever, . Does have, limb pain

Past medical history, social history, medications and family history were reviewed with the patient and changes were recorded.

10/05/2020 - Office Visit in UW Medicine Northwest Wound Care and Hyperbaric Center (continued)

PROCEDURE
A preprocedure time out was performed confirming the patient's identity, procedure to be performed, and site. A verbal consent was obtained.
Wound/Ulcer: # 17 / Description: Wound bed and edges are covered with thick stringy slough,
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue
Tissue and/or Material Removed: fibrin/slough, non-viable, skin, subcutaneous and viable
Severity: fat layer exposed
Instruments Used: curette
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~150 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements:
: Improved: Length 22.5cm X Width 18.5cm X Depth: 0.4cm this is a cluster of ulcers, some areas are deep to fascia
Patient tolerated the procedure well.

The wound looked improved after the debridement

ASSESSMENT:
(L97.323) Non-pressure chronic ulcer of left ankle with necrosis of muscle (primary encounter diagnosis)
(L97.223) Non-pressure chronic ulcer of left calf with necrosis of muscle
(I87.332, L97.929) Chronic venous hypertension with ulcer and inflammation, left
(I70.242) Atherosclerosis of native artery of left lower extremity with ulceration of calf (HCC)
This is a 95 yo patient with left limb ulcers with DM2, mixed vascular disease, edema and anemia and protein calori malnutrition.. She has challenging lifestyle by living as an urban nomad along with her son, mostly sharing suboptimal living conditions. To my knowledge she has been in a single room apartment for the last year or so. She feels she has sufficient nutrition, eating a meal with animal protein daily. She is avoiding salty food in diet. She is elevating legs while resting during the day. Although larger in size, wounds are fairly stable considering the challenges for wound healing, advanced age, comorbidity and social issues.
I debrided the ulcers at left side as they had higler level of bioburden. For wounds we will use silver alginate to continue autolytic debridement. Continue light compression tubes or socks for edema control.
Patient education took place regarding the treatment progress and further measures to address the condition. The patient was given an opportunity to ask questions.
It was a pleasure to see Ms. Hoffman at my clinic. Please do not hesitate to call me for any questions or concerns.
Treatment plan recommended at this time includes the following:
Jeanne was seen today for new patient consult.

Diagnoses and all orders for this visit:

Non-pressure chronic ulcer of left ankle with necrosis of muscle
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Non-pressure chronic ulcer of left calf with necrosis of muscle
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Chronic venous hypertension with ulcer and inflammation, left
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Atherosclerosis of native artery of left lower extremity with ulceration of calf (HCC)
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Patient Instructions
Right calf and left calf: Clean with water, apply silver alginate cover with gauze and roll gauze secure with tape change every other day

10/05/2020 - Office Visit in UW Medicine Northwest Wound Care and Hyperbaric Center (continued)

Clinical Notes (continued)

Compressogrip socks on both legs every day.

Return in about 4 weeks (around 11/2/2020).

After Visit Summary (continued)

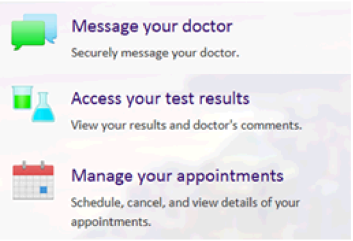
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use eCare (MyChart) to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for eCare (MyChart) today. It's the best way to communicate with your care team!

Visit Summary
PROGRESS NOTE
10/5/2020

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with multiple bilateral lower leg ulcers with mixed vascular disease is seen today for Follow Up Visit

INTERVAL HISTORY: Ulcers are larger at both lower legs. There is no inflammation with ulcers. She reports some increased pain at the right lower leg that occasionally keeps her awake. She denies any sob, chest pain or palpitations.
She is feeling good overall. She is now living in an apartment with her son Louis, regular access to showers, regular meals, taking supplemental protein.
She was admitted to hospital in June with AMS, with codeine overdose and CAP. The ulcers were dressed with honey/gauze by HHRN after discharge. Lately his son was covering the wounds with Vaseline gauze. She was picking on her wounds and skin frequently to keep them clean. Her last visit at our center was in November 2019. Since then she stayed home to be protected from COVID-19.

Brief History - This is a patient with DM2, CLI with extensive atherosclerotic disease and chronic leg edema with venous hypertension s/p GSV ablation in2018.

A 14-category ROS was reviewed with patient:

10/05/2020 - Office Visit in UW Medicine Northwest Wound Care and Hyperbaric Center (continued)

Wound/Ulcer: # 17 / Description: Wound bed and edges are covered with thick stringy slough,
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:

-Surgical/Excisional: : subcutaneous tissue
Tissue and/or Material Removed: fibrin/slough, non-viable, skin, subcutaneous and viable
Severity: fat layer exposed
Instruments Used: curette
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~150 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements:
: Improved: Length 22.5cm X Width 18.5cm X Depth: 0.4cm this is a cluster of ulcers, some areas are deep to fascia
Patient tolerated the procedure well.
The wound looked improved after the debridement

ASSESSMENT:
(L97.323) Non-pressure chronic ulcer of left ankle with necrosis of muscle (primary encounter diagnosis)
(L97.223) Non-pressure chronic ulcer of left calf with necrosis of muscle
(I87.332, L97.929) Chronic venous hypertension with ulcer and inflammation, left
(I70.242) Atherosclerosis of native artery of left lower extremity with ulceration of calf (HCC)
This is a 95 yo patient with left limb ulcers with DM2, mixed vascular disease, edema and anemia and protein calori malnutrition.. She has challenging lifestyle by living as an urban nomad along with her son, mostly sharing suboptimal living conditions. To my knowledge she has been in a single room apartment for the last year or so. She feels she has sufficient nutrition, eating a meal with animal protein daily. She is avoiding salty food in diet. She is elevating legs while resting during the day. Although larger in size, wounds are fairly stable considering the challenges for wound healing, advanced age, comorbidity and social issues. I debrided the ulcers at left side as they had higler level of bioburden. For wounds we will use silver alginate to continue autolytic debridement. Continue light compression tubes or socks for edema control.
Patient education took place regarding the treatment progress and further measures to address the condition. The patient was given an opportunity to ask questions.
It was a pleasure to see Ms. Hoffman at my clinic. Please do not hesitate to call me for any questions or concerns.
Treatment plan recommended at this time includes the following:
Jeanne was seen today for new patient consult.

Diagnoses and all orders for this visit:

Non-pressure chronic ulcer of left ankle with necrosis of muscle
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Non-pressure chronic ulcer of left calf with necrosis of muscle
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Chronic venous hypertension with ulcer and inflammation, left
- NURSING COMMUNICATION

10/05/2020 - Office Visit in UW Medicine Northwest Wound Care and Hyperbaric Center (continued)

Letters (continued)

- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Atherosclerosis of native artery of left lower extremity with ulceration of calf (HCC)

- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Patient Instructions

Right calf and left calf: Clean with water, apply silver alginate cover with gauze and roll gauze secure with tape change every other day
Compressogrip socks on both legs every day.

Return in about 4 weeks (around 11/2/2020).

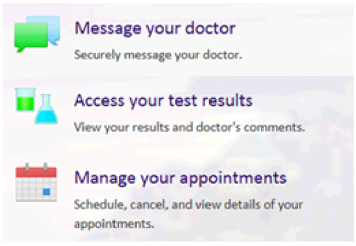
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use eCare (MyChart) to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for eCare (MyChart) today. It's the best way to communicate with your care team!

To Set Up Your Account:

Request an activation code at Ecare.uwmedicine.org

Already have and activation code? Click on "set up your account".

How do I get billing and insurance info?

Please go to: www.uwmedicine.org/billing

UW Medicine

I hereby authorize **Dr NILUFER NORSWORTHY, MD** associates or assistants of his/her choice on staff at Northwest Hospital Wound Care Center to provide services for comprehensive wound care management.

Dr NILUFER NORSWORTHY, MD has fully explained to me the nature and purpose of the Northwest Hospital Wound Care Center's approach to wound treatment and healing. I have also been informed of expected benefits and potential complications (from known and unknown causes), as well as, discomforts and risks that may arise. Alternatives to the proposed treatment(s) including no treatment were presented to me. I have been given an opportunity to ask questions, and all my questions have been answered fully and satisfactorily.

I agree to any debridement and any tissue removed may be examined and retained by Northwest Hospital Wound Care Center and its authorized affiliate for medical, scientific or educational purposes and such tissues or parts may be disposed of in accordance with accustomed practice.

I acknowledge that no guarantees or assurances have been made to me concerning the results intended from the wound care and/or other treatment.

I hereby consent that photographs, tape recordings, videotapes and/or movies may be taken of me and/or the named patient by Northwest Hospital Wound Care Center in connection with the medical and other services, which I/the patient am receiving at Northwest Hospital Wound Care Center. I further consent that a history of my/the patient's social and medical problems may be taken by Northwest Hospital Wound Care Center.

I understand that neither myself.the patient nor members of my.the patient's family will be identified by name in connection with any public use of this material.

I grant this consent as a voluntary contribution and I waive any and all rights I/the patient may have to royalties or other compensation in connection with any such use.

I confirm that I have read and fully understand the above and that all blank spaces have been completed prior to my signing. I have crossed out any paragraphs above, which do not pertain to me.

Patient/Relative or Guardian*: _____ (signature)

Informant: Patient Reported

cephalexin (KEFLEX) 500 MG Oral Capsule

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 5/5/2021
Reason for discontinuation: Reorder
Instructions: Take 1 capsule (500 mg) by mouth 4 times a day for 7 days. For 7 days.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/23/2019
Start date: 10/23/2019
End date: 5/5/2021
Quantity: 28 capsule
Refill: No refills remaining

naloxone (Narcan) 4 MG/0.1ML nasal spray

Instructions: Use 1 spray in one nostril for suspected opioid overdose. Call 911. If unresponsive in 2 to 3 minutes, repeat with new naloxone nasal spray.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 6/19/2020
Start date: 6/19/2020
End date: 6/19/2021
Quantity: 2 each
Refill: No refills remaining

timolol maleate 0.5 % ophthalmic solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/21/2020
Reason for discontinuation: Reorder
Instructions: instill one drop in each eye twice daily. block tear duct for 1-2 min after use
Authorized by: Kauffman, Mary Johanna Kelly, MD
Ordered on: 8/12/2020
Start date: 8/12/2020
End date: 10/21/2020
Quantity: 10 mL
Refill: No refills remaining

acetaminophen-codeine 300-15 MG tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/21/2020
Reason for discontinuation: Reorder
Instructions: One half to one tablet daily. Take additional acetaminophen during the day up to 2500 mg in divided dose.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/16/2020
Start date: 9/16/2020
End date: 10/21/2020
Quantity: 30 tablet
Refill: No refills remaining

atorvastatin 20 MG tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/16/2020
Start date: 9/16/2020
End date: 10/13/2021
Quantity: 45 tablet
Refill: 3 refills by 9/16/2021

pentoxifylline ER 400 MG ER tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/16/2020
Start date: 9/16/2020
End date: 10/13/2021
Quantity: 90 tablet
Refill: 6 refills by 9/16/2021

Clinical Notes (continued)

Progress Notes

Neighbor Jr., William E, MD at 9/16/2020 1040

Jeanne Leonie Hoffman is a 95 year old female here to discuss the following: No chief complaint on file.

Jeanne Is in with her son Louis today. Her last visit was June 17, 2020 Following emergency room visit at Harborview in brief stay for community-acquired pneumonia without evidence of COVID19, resolved cellulitis of chronic lower extremity decubitus ulcers, hypersomnolence related to overuse of Tylenol with codeine. At this visit in mid June she was changed to lower dose Tylenol with codeine, namely, Tylenol #2. A Narcan prescription was sent to her pharmacy. Plan was she was to followup with the northwest wound care center which has not happened.

By way of followup today:
--There've been no further episodes of somnolence and she has decreased her use of Tylenol with codeine Relying more on simply set a medicine.
--Her son continues to dress the wounds. She's not had any fever chills or increased redness.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

• Adult failure to thrive syndrome [R62.7]	10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

• Unspecified vitamin B deficiency [E53.9]	05/01/2007

Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

• Sensorineural hearing loss, unspecified [H90.5]	11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

• DVT, recurrent, lower extremity, chronic (HCC) [I82.509]	11/20/2006

Recurrent DVT and phlebitis since 1982
Per Vascular Surgery note 5/9/2006: continue warfarin
3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

- Type 2 diabetes mellitus without complication, without long-term current use of insulin [E11.9] 10/10/2019
- Primary open angle glaucoma (POAG) of both eyes [H40.1130] 10/10/2019
- Fall [W19.XXXA] 09/03/2019
- Acute blood loss anaemia [D62] 08/11/2019
- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC) [L97.313] 05/26/2019
- Chronic venous hypertension with ulcer, bilateral [I87.313, L97.919, L97.929] 05/26/2019
- Bilateral leg edema [R60.0] 05/26/2019
- Atherosclerosis of native artery of both lower 09/24/2018

extremities with bilateral ulceration of calves [I70.232, I70.242]	
• Diabetic ulcer of lower extremity (HCC) [E11.622, L97.909]	09/24/2018
• Vitamin D deficiency [E55.9]	07/09/2018
• Venous ulcer of left leg (HCC) [I83.029, L97.929]	06/07/2018
• Normocytic anemia [D64.9]	06/07/2018
• Severe protein-calorie malnutrition (HCC) [E43]	06/07/2018
• Urge urinary incontinence [N39.41]	06/07/2018
• Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC) [L97.323]	05/17/2018
• Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC) [L97.223]	05/17/2018
• Chronic venous hypertension with ulcer and inflammation, left [I87.332, L97.929]	05/17/2018
• Primary osteoarthritis of both hips [M16.0]	02/01/2017
• Thrombocytopenia (HCC) [D69.6]	11/02/2016
• Imbalance [R26.89]	11/02/2016
• History of recurrent deep vein thrombosis (DVT) [Z86.718]	06/02/2016
• Hip joint stiffness [M25.659]	01/06/2015
• Leg weakness, bilateral [R29.898]	01/06/2015
• Weakness of trunk musculature [M62.81]	01/06/2015
• Pseudophakia, both eyes [Z96.1]	11/08/2014
• Urine incontinence [R32]	08/27/2014
Uses pads	
• Type 2 diabetes mellitus without complication (HCC) [E11.9]	03/27/2007
Year onset: Dx March 2007 Metformin discontinued 2011 as A1c in target range without it. Diet and weight controlled.	

No outpatient medications have been marked as taking for the 9/16/20 encounter (Appointment) with Neighbor Jr., William E, MD.

Social history:

History

Sexual Activity

- Sexual activity: Not Currently

Social History

Tobacco Use

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used

Substance Use Topics

- Alcohol use: No

Objective:
There were no vitals taken for this visit.
Estimated body mass index is 18.89 kg/m² as calculated from the following:
Height as of 8/20/19: 5' 1" (1.549 m).
Weight as of 6/17/20: 45.4 kg (100 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter:
General: NAD
Difficulty with hearing as usual. There is no somnolence. She is alert and smiling.
Skin: Examination of the right lower leg today shows complete healing of malleolar ulcerations. The skin is somewhat dry. Examination of the left lower leg however shows quite extensive but superficial ulceration rather than the deep ulcerations she had had in the past. There is no redness or evidence of cellulitis currently.

Lab and other tests: none

Assessment and Plan:
1. Venous ulcer of left leg (HCC)
Extensive ulcerations but more superficial than in the past. No evidence of active infection.
Plan:
--Our nurse redress to wounds today on the left lower leg.
--Continue pain control with minimal use of Tylenol No2.
--Continue daily dressing changes
--Her son Louis called the Northwest Hospital wound care center during the visit and left a message. I emphasized the importance of followup at the wound care center.

2. Other chronic pain
She is doing well with lower dose of codeine and using it more sparingly now. She should rely primarily on regular Tylenol as discussed above. The pain medications are primarily for osteoarthritis.
- acetaminophen-codeine 300-15 MG tablet; One half to one tablet daily. Take additional acetaminophen during the day up to 2500 mg in divided dose. Dispense: 30 tablet; Refill: 0

3. Hypercholesterolemia
She is due for refill of low-dose statin. In the last 2 years when she was taken off the statin her subsequent lipid values raised considerably and reduced when she was placed on a statin again. There is some evidence that statins may help to reduce the risk of recurrent venous thrombosis which is an issue for her.
- atorvastatin 20 MG tablet; Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction Dispense: 45 tablet; Refill: 3

4. History of recurrent deep vein thrombosis (DVT)
Refilled the rheostatic agent.
- pentoxifylline ER 400 MG ER tablet; Take 1 tablet (400 mg) by mouth 3 times a day. Dispense: 90 tablet; Refill: 6

5. Vaccine counseling
High-dose flu vaccine today

Letter for housing for two bedroom apartment written. Her son is her main care giver. Jeanne needs her own room.

Vaccine Screening Questions

Interpreter: No

1. Are you allergic to Latex? NO

2. Have you had a serious reaction or an allergic reaction to a vaccine? NO

3. Currently have a moderate or severe illness, including fever? NO

4. Ever had a seizure or any neurological problem associated with a vaccine? *(DTaP/TDaP/DTP pertinent)* NO

5. Is patient receiving any live vaccinations today? *(Varicella-Chickenpox, MMR-Measles/Mumps/Rubella, Zoster-Shingles, Flumist, Yellow Fever) NOTE: oral rotavirus is exempt* NO

If **YES** to any of the questions above – Do **NOT** give vaccine. Consult with RN or provider in clinic. (#5 can be YES if all Live vaccine questions are answered NO)

If **NO** to all questions above - Patient may receive vaccine.

6. Do you need to receive the Flu vaccine today? YES - Additional Flu Questions **Flu Vaccine Screening Questions:**

Ever had a serious allergic reaction to eggs? NO

Ever had Guillain-Barre syndrome associated with a vaccine? NO

Less than 6 months old? NO

If **YES** to any of the *Flu* questions above - NO Flu Vaccine to be given. Patient may consult provider as needed.

If **NO** to all questions above - Patient may receive Flu Shot (IM)

Is the patient requesting Flumist? NO

If between 6 months and 8 years of age, was flu vaccine received last year? N/A
If **NO** to above question:

- Children who are receiving influenza vaccine for the first time - administer 2 doses of the current influenza vaccine (separated by at least 4 weeks).

Influenza (high dose)

All patients are encouraged to wait 15 minutes before leaving after receiving any vaccine.

VIS given 9/16/2020 by Carmen N Anderson-Kloth, CMA

Was Jeanne Leonie Hoffman alert, oriented, and without adverse reaction after the vaccine was given y/n: YES.

Electronically signed by Anderson-Kloth, Carmen N, CMA at 9/17/2020 5:42 PM

Collins V, Marta, RN at 9/16/2020 1040

WOUND CARE NURSING NOTE:

SUBJECTIVE:
Jeanne Leonie Hoffman is a 95 year old female presents for wound care of multiple wound on her L lower leg on.
Tetanus vaccination status reviewed: last tetanus booster within 10 years.

OBJECTIVE:
Location: Multiple decubitis ulcers on the L lower extremity.
Measurements: Unable to measure because they are scattered all along the lower leg, one connecting to another.
Undermining/Tunneling: NO
Wound Bed: yellow eschar covering most of the areas of breakdown on her legs, what tissue is not effected is dusky and skin is flaky.
Wound Edges: Some are rolled others gradually deepen, none or more than there are also patchy areas where previous skin grafting has been attempted. There is fibrous tissue in some areas, no healthy looking granulation tissue though a few of the wounds have healed and are a light pink color w/some whitish slough that can be wiped off.
Exudate: minimal exudate though pt reports coupious serous fluid and some bleeding. There is a foul odor but hard to tell what is the wound and what is body odor.
Circulation: unable to palpate pulses due to swelling in the lower ext. Foot is warm to touch.
Periwound condition: dry skin, tight from swelling, patchy dusky colored areas

ASSESSMENT : Wound appearance delayed healing due to age, poor circulation and living situation.
PLAN:
The wound is cleansed, debrided of foreign material as much as possible, and dressed.
The patient is alerted to watch for any signs of infection (redness, pus, pain, increased swelling or fever) and call if such occurs.
Advised patient to keep dressing in place and return for recheck at the NW wound care clinic asap.
If appropriate keep area of wound elevated.
If using an ace wrap remove it at night.
Keep wound clean and dry.
Eat a diet high in protein particularly red meat if possible.

<u>If pt is assuming care at home:</u>
Home wound care instructions are provided.
Change drsg in 6 days.
Wash area or shower before drsg change, pat dry with gauze pad or clean towel.
Apply vasoline, abx ointment or medihoney as advised by RN

<u>Reviewed plan if problems develop:</u>
Monitor for signs of infection (fever, pus at wound site +/- increasing redness)
Apply direct pressure if bleeding occurs.

09/16/2020 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

F/U on wound care at NWH don't remove drsgs for 607 days then soak lower ext to soften the eschar and remove whatever will come off easily. May bleed so don't be alarmed.
Patient's son voiced understanding and agreement with plan.

Pain Control and Opioid Safety Instructions

Today you were given a prescription for an opioid pain medicine. You have the right to refuse an opioid prescription for any reason. Simply tell your prescriber about this preference and it will be written in your medical record. You can change your mind about this at any time.

If you do fill your prescription remember that even strong pain medicines may not remove all pain. Please use non-drug methods such as heat, cold, or relaxation to help control your pain. Unless your doctor tells you otherwise, try taking acetaminophen (Tylenol) and ibuprofen (Advil, Motrin) to control your pain before you take opioid pain medicine. You do not need a prescription to buy acetaminophen and ibuprofen. Follow the dose instructions on the bottles.

Opioid medications may be prescribed by health care providers to treat moderate to severe pain, but can have side effects and serious health risks, such as tolerance, physical dependence, opioid use disorder, and overdose. Risks are greater when used with other medicines for sleep or anxiety, if you are over the age of 65, have a history of substance use, mental health condition, or are pregnant. Only take opioids if you have strong pain that does not lessen with other methods to control your pain. Never take more than the maximum dose as prescribed by your provider.

Safe use

- Do not operate a car or heavy machinery while using this medicine.
- Do not drink alcohol with this medicine.
- Side effects include drowsiness, nausea, constipation, and dry mouth.
- Opioids can be habit forming.
- Opioids can slow your breathing and heart rate. If they slow too much, it can cause death.

Naloxone for Opioid Overdose

Naloxone is a prescription medicine that temporarily reverses an opioid overdose. In the state of Washington, you can get naloxone from any pharmacy without a prescription. The cost may vary. For more information, visit **stopoverdose.org**

Safe storage

- Never share or sell your prescription opioids.
- Keep opioid medications locked or in a safe location.
- Keep out of reach of children and out of sight from others.
- Leave in the original bottle with the label attached.

Proper disposal

You are NOT required to use all of your opioid medication. To find your nearest take-back location for proper disposal of unused medications, please visit:

- takebackyourmeds.org,
- med-project.org, or
- doh.wa.gov/safemedreturn

If you cannot use a medication take-back program, flush the opioids down the toilet.

Your Medication List as of September 16, 2020 6:09 PM

ⓘ If you have any questions, ask your nurse or doctor.

acetaminophen 500 MG tablet	1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition

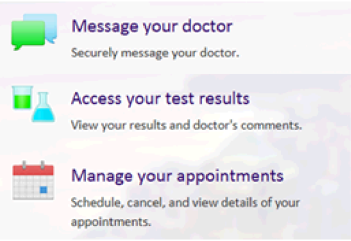
09/16/2020 - Office Visit in Husky Health Primary Care Clinic (continued)

After Visit Summary (continued)

Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use eCare (MyChart) to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for eCare (MyChart) today. It's the best way to communicate with your care team!

09/16/2020 - Office Visit in Husky Health Primary Care Clinic (continued)

Letters (continued)

Jeane L. Hoffman
321 High School Road NE
Ste D3 PMB 292
BAINBRIDGE ISLAND WA 98110

Attn: Resource Bainbridge

RE: Jeane Leonie Hoffman
DOB: 1/6/1925

To whom it may concern:

I am the primary care physician for the above individual who is 95 years of age and suffers from poor hearing, arthritis, and recurrent ulcerations of her lower legs. Her son Louis is her main care provider. Currently they live in a single bedroom apartment.

I recommend they be provided a two bedroom apartment. This would provide Jeanne her own room to facilitate better rest and privacy contributing to her overall well being while still affording her the continuing care provided by her son Louis.

Sincerely,

Electronically signed by
William E Neighbor, MD

Documents (continued)

Pain Control and Opioid Safety Instructions

Today you were given a prescription for an opioid pain medicine. You have the right to refuse an opioid prescription for any reason. Simply tell your prescriber about this preference and it will be written in your medical record. You can change your mind about this at any time.

If you do fill your prescription remember that even strong pain medicines may not remove all pain. Please use non-drug methods such as heat, cold, or relaxation to help control your pain. Unless your doctor tells you otherwise, try taking acetaminophen (Tylenol) and ibuprofen (Advil, Motrin) to control your pain before you take opioid pain medicine. You do not need a prescription to buy acetaminophen and ibuprofen. Follow the dose instructions on the bottles.

Opioid medications may be prescribed by health care providers to treat moderate to severe pain, but can have side effects and serious health risks, such as tolerance, physical dependence, opioid use disorder, and overdose. Risks are greater when used with other medicines for sleep or anxiety, if you are over the age of 65, have a history of substance use, mental health condition, or are pregnant. Only take opioids if you have strong pain that does not lessen with other methods to control your pain. Never take more than the maximum dose as prescribed by your provider.

Safe use

- Do not operate a car or heavy machinery while using this medicine.
- Do not drink alcohol with this medicine.
- Side effects include drowsiness, nausea, constipation, and dry mouth.
- Opioids can be habit forming.
- Opioids can slow your breathing and heart rate. If they slow too much, it can cause death.

Naloxone for Opioid Overdose

Naloxone is a prescription medicine that temporarily reverses an opioid overdose. In the state of Washington, you can get naloxone from any pharmacy without a prescription. The cost may vary. For more information, visit **stopoverdose.org**

Safe storage

- Never share or sell your prescription opioids.
- Keep opioid medications locked or in a safe location.
- Keep out of reach of children and out of sight from others.
- Leave in the original bottle with the label attached.

Proper disposal

You are NOT required to use all of your opioid medication. To find your nearest take-back location for proper disposal of unused medications, please visit:

- takebackyourmeds.org,
- med-project.org, or
- doh.wa.gov/safemedreturn

If you cannot use a medication take-back program, flush the opioids down the toilet.

ADVANCE BENEFICIARY NOTICE OF NONCOVERAGE (ABN)

NOTE: If Medicare doesn't pay for Office Visit and all related services below, you may have to pay. Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the Office Visit below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost
CPT Code(s):	Medicare does not pay for experimental or research use tests/services Medicare does not pay for this test or service as often as this (denied as too frequent) Medicare does not pay for this test or service for your conditions Other: may not be covered	$73.00 $460.00
CPT Description: Office Visit and all related services		

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the Office Visit and all related services listed above.

Note: If you choose Option 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

OPTIONS: **Check only one box. We cannot choose a box for you.**

☐ **OPTION 1.** I want the Office Visit and all related services above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I'm responsible for payment, but **I can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2.** I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3.** I don't want the _____ listed above. I understand with this choice I am **not** responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional Information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-MEDICARE** (1-800-633-4227/**TTY:** 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

Comment:
Performed using the Panther (H) SARS-CoV-2 Transcription Mediated Amplification (TMA) assay. Additional details available here: https://testguide.labmed.uw.edu/NCVQLT.
This test is not yet approved or cleared by the United States FDA. When there are no FDA-approved or cleared tests available, and other criteria are met, FDA can make tests available under an emergency access mechanism called an Emergency Use Authorization (EUA).
The EUA for this test is supported by the Secretary of Health and Human Service's (HHS's) declaration that circumstances exist to justify the emergency use of in vitro diagnostics for the detection and/or diagnosis of the virus that causes COVID-19.
This EUA will remain in effect (meaning this test can be used) for the duration of the COVID-19 declaration justifying emergency of IVDs, unless it is terminated or revoked by FDA (after which the test may no longer be used).

Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	6/24/2020 12:07 PM

Dear Dr. Neighbor...
I regret because of policy practices and discrimination Housing Kitsap and Housing Resource Bainbridge, have indifference toward my academic abilities and instruments/equipment.
Housing Resource Bainbridge has labeled my Camera/Photography Equipment as UNNECESSARY STUFF, being identifies as trash.
The current housing situation under Housing Resource Bainbridge does, not allow me to have functional operational camera equipment, As I could be subjected to eviction for having instrument...as STUFF.
I regret that I am unable to take medical photographs, until I can find reasonable accommodations, that will not restrict, limit, prevent or obstruct my abilities.
NOTE: I do have MICRO-DICOM Medical Imaging Capacity[

I don't believe that HMC has an outpatient wound care clinic. In general we have referred to NW.
William E Neighbor, MD

NWH TeleMed

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	6/18/2020 8:39 AM

Contact was made with NWH Wound Care Center Reception Desk.
Told that HWH does not have Telemed Capacity.
Only Out-Patient Visits are encouraged.

It might be best, to schedule wound care, at UW HarborView.

Medication List (continued)

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 6/17/2020 1300

Jeanne Leonie Hoffman is a 95 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Hospital Follow-up
  using aspercreme on leg wound

Distant Site Telemedicine Encounter

I conducted this encounter from Hall Health via secure, live, face-to-face video conference with the patient. Jeanne was located at Bainbridge home with Son Louis with accompanies her to visits with her clear permission. Prior to the interview, the risks and benefits of telemedicine were discussed with the patient and verbal consent was obtained.

(I83.029, L97.929) Venous ulcer of left leg (HCC) (primary encounter diagnosis)
No recent followup at the Northwest wound care clinic. This is in part due to the public health clinic of Coorna virus 19. She was recently admitted to Harborview Medical Center for overnight stay for somnolence related to excess codeine and bilateral pulmonary infiltrates consistent with viral pneumonia with negative COVID19 PCR. These were given wound care supplies on discharge for the chronic lower extremity ulcerations.. This included Medihoney infused gauze. She was also discharged on doxycycline to cover both community-acquired pneumonia and cellulitis of the left lower extremity which has since resolved.

(G89.29) Other chronic pain
She is been on Tylenol up to 2500 mg daily with addition of one dose of acetaminophen 500 mg combined with codeine 30 mg once daily for pain control. Additionally recently topical lidocaine was added for dressing changes. However she occasionally takes an extra half tablet and on 2 occasions in the last 6 months she has become somnolent with the small addition. Her son reports that this was one of the reasons that he called in a car and they were transported to Harborview. Her son reports she was given Narcan in the emergency room so I don't see record of that. She had an overnight stay.

(Z87.01) History of pneumonia
During the Harborview admission was in some only identified bilateral pulmonary infiltrates. Viral testing for influenza and COVID19 was negative. She was began on azithromycin in the hospital and discharged on doxycycline. She completed the full course of doxycycline. There's been no recurrence of fever chills or night sweats. There's been no shortness of breath no cough no sputum production or chest discomfort

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

06/17/2020 - Telemedicine in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

- Adult failure to thrive syndrome [R62.7] 10/19/2007
  Lives in subsidized housing on Bainbridge
  Bremerton APS at 1-888-833-4925
  Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
  Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
  7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Unspecified vitamin B deficiency [E53.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic (HCC) [I82.509] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.

Objective:

06/17/2020 - Telemedicine in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

BP 107/59 Comment: pt reported | Pulse 86 | Wt 45.4 kg (100 lb) Comment: pt reported | BMI 18.89 kg/m²
Estimated body mass index is 18.89 kg/m² as calculated from the following:
Height as of 8/20/19: 5' 1" (1.549 m).
Weight as of this encounter: 45.4 kg (100 lb).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
107/59	86	---	---	---	1:00 PM	6/17/2020
	Comment:	pt reported				

Last blood pressure recorded in this encounter: 107/59
General: NAD. Smiles. Earring issues as usual though has hearing aids in place. Son Louis helps her understand the questions in the visit.
By their report:
BP 107/59 HR 86. 99.4. 100lbs.
Weight maintaining

Video visualization
Left lower leg. Ulceration on right shin and medial malleollus are deeper than previouslly seen.
Right lower leg appears healed on malleolar area.

Lab and other tests: HMC COVID PCR negative

Assessment and Plan:

1. Venous ulcer of left leg (HCC)
Continued slow healing of bilateral lower extremity ulcers with improvement in some areas but deepening of ulceration on left lower leg shin and medial malleolus without cellulitis visualized today on video visit. At the HMC discharge plan in late May, she was prescribed doxycycline to cover both CAP and cellulitis. The cellulitis is resolved.
Louis is now applying medihoney dressing which he was given at HMC discharge after over night stay for pneumonia and somnolence noted below.
Plan:
--Louis is to schedule visit at NWH wound clinic with Dr. Norsworthy. Importance of visit in next couple of weeks emphasized.
--For wound care supplies, Louis will have the local store on Bainbridge send me an authorization to sign.

2. Other chronic pain
She has been on one tylenol with codeine No 3 daily. However, she occasionally takes an additional one half but seems to be more sensitive to this now with two episodes of somnolence in the last 6 months according to Louis. The most recent episode is what precipitated the HMC ER visit and overnight stay. She was given narcan which resolved the somnolence. Louis does not currently have narcan at home. Though she takes acetaminophen up to 2500 mg daily she does not have sufficient pain relieve with this alone. She does have some topical lidocaine for dressing changes.
Plan:
--Reduce codeine to that in Tylenol NO 2.
--Narcan prescription sent to their pharmacy. Louis understand how to use this.

3. History of pneumonia
Resolved symptoms without recurrence. There was bilateral infiltrates at HMC May 27 suggesting viral rather than aspiration pneumonia. She responded to Azithro in hospital and was discharged on doxycycline. Now completely resolved without fever, chills, sweats, or cough or shortness of breath.

I will send a message to Dr. Norsworthy so that we might arrange to telephone conversation about arranging for their follow up.

06/17/2020 - Telemedicine in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Summary sent to patient. Prescription sent in for lower dose codeine. Narcan prescription sent as well.
Follow up one month

Pain Control and Opioid Safety Instructions

Today you were given a prescription for an opioid pain medicine. You have the right to refuse an opioid prescription for any reason. Simply tell your prescriber about this preference and it will be written in your medical record. You can change your mind about this at any time.

If you do fill your prescription remember that even strong pain medicines may not remove all pain. Please use non-drug methods such as heat, cold, or relaxation to help control your pain. Unless your doctor tells you otherwise, try taking acetaminophen (Tylenol) and ibuprofen (Advil, Motrin) to control your pain before you take opioid pain medicine. You do not need a prescription to buy acetaminophen and ibuprofen. Follow the dose instructions on the bottles.

Opioid medications may be prescribed by health care providers to treat moderate to severe pain, but can have side effects and serious health risks, such as tolerance, physical dependence, opioid use disorder, and overdose. Risks are greater when used with other medicines for sleep or anxiety, if you are over the age of 65, have a history of substance use, mental health condition, or are pregnant. Only take opioids if you have strong pain that does not lessen with other methods to control your pain. Never take more than the maximum dose as prescribed by your provider.

Safe use

- Do not operate a car or heavy machinery while using this medicine.
- Do not drink alcohol with this medicine.
- Side effects include drowsiness, nausea, constipation, and dry mouth.
- Opioids can be habit forming.
- Opioids can slow your breathing and heart rate. If they slow too much, it can cause death.

Naloxone for Opioid Overdose

Naloxone is a prescription medicine that temporarily reverses an opioid overdose. In the state of Washington, you can get naloxone from any pharmacy without a prescription. The cost may vary. For more information, visit **stopoverdose.org**

Safe storage

- Never share or sell your prescription opioids.
- Keep opioid medications locked or in a safe location.
- Keep out of reach of children and out of sight from others.
- Leave in the original bottle with the label attached.

Proper disposal

You are NOT required to use all of your opioid medication. To find your nearest take-back location for proper disposal of unused medications, please visit:

- takebackyourmeds.org,
- med-project.org, or
- doh.wa.gov/safemedreturn

If you cannot use a medication take-back program, flush the opioids down the toilet.

Your Medication List

Accurate as of June 17, 2020 11:59 PM.
If you have any questions, ask your nurse or doctor.

TAKE these medications

acetaminophen 500 MG tablet	1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
START **acetaminophen-codeine** 300-15 MG tablet Started by: William E Neighbor, MD	One half to one tablet daily. Take additional acetaminophen during the day up to 2500 mg in divided dose. Replaces: **acetaminophen-codeine 300-30 MG tablet**
Acidophilus 0.5 MG tablet	Take 1 tablet by mouth 2 times a day.
atorvastatin 20 MG tablet	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
calcium carbonate 500 MG chewable tablet	Chew and swallow 2 tablets by mouth 3 times a day as needed for indigestion/heartburn.
cholecalciferol 25 MCG (1000 UT) tablet	Take 2 tablets (2,000 Units) by mouth daily.
MULTIPLE VITAMIN OR	Take by mouth.
START **Narcan** 4 MG/0.1ML nasal spray Generic drug: naloxone Started by: William E Neighbor, MD	Use 1 spray in one nostril for suspected opioid overdose. Call 911. If unresponsive in 2 to 3 minutes, repeat with new naloxone nasal spray.
pentoxifylline ER 400 MG ER tablet	Take 1 tablet (400 mg) by mouth 3 times a day.
timolol maleate 0.5 % ophthalmic solution	INSTILL ONE DROP INTO EACH EYE TWICE DAILY block tear duct 1-2 min after use

STOP taking these medications

STOP **acetaminophen-codeine** 300-30 MG tablet
Replaced by: **acetaminophen-codeine 300-15 MG tablet**

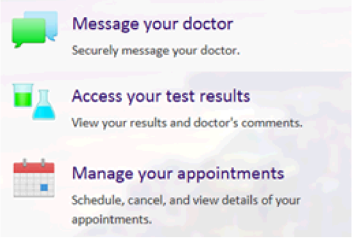
Thank you for your visit!

Have some questions? Check out our answers to these frequently asked questions.

I got a referral. What do I do?



A referral from your primary care provider gives you written authorization for specialty care or other health services. It will take the specialty practice you were referred to between **48 to 72 hours** to contact you. They will first review your referral to ensure your next visit is appropriately scheduled. However, if you received a paper referral to see a specialist of your choosing, you may contact a specialist directly to schedule your visit.

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use eCare (MyChart) to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

How do I talk to my care team and get test results?

Sign up for eCare (MyChart) today. It's the best way to communicate with your care team!

Messages (continued)

6/5/2024 6:11 AM by Hoffman, Jeanne Leonie

Jeanne: Below is a summary of your visit. Good to see you and your son Louis.

Assessment and Plan:

1. Venous ulcer of left leg (HCC)

Continued slow healing of bilateral lower extremity ulcers with improvement in some areas but deepening of ulceration on left lower leg shin and medial malleolus without cellulitis visualized today on video visit. At the HMC discharge plan in late May, she was prescribed doxycycline to cover both CAP and cellulitis. The cellulitis is resolved.

Louis is now applying medihoney dressing which he was given at HMC discharge after over night stay for pneumonia and somnolence noted below.

Plan:

--Louis is to schedule visit at NWH wound clinic with Dr. Norsworthy. Importance of visit in next couple of weeks emphasized.

--For wound care supplies, Louis will have the local store on Bainbridge send me an authorization to sign.

2. Other chronic pain

She has been on one tylenol with codeine No 3 daily. However, she occasionally takes an additional one half but seems to be more sensitive to this now with two episodes of somnolence in the last 6 months according to Louis. The most recent episode is what precipitated the HMC ER visit and overnight stay. She was given narcan which resolved the somnolence. Louis does not currently have narcan at home. Though she takes acetaminophen up to 2500 mg daily she does not have sufficient pain relieve with this alone. She does have some topical lidocaine for dressing changes.

Plan:

--Reduce codeine to that in Tylenol NO 2.

--Narcan prescription sent to their pharmacy. Louis understand how to use this.

3. History of pneumonia

Resolved symptoms without recurrence. There was bilateral infiltrates at HMC May 27 suggesting viral rather than aspiration pneumonia. She responded to Azithro in hospital and was discharged on doxycycline. Now completely resolved without fever, chills, sweats, or cough or shortness of breath.

I will send a message to Dr. Norsworthy so that we might arrange to telephone conversation about arranging for their follow up.

Summary sent to patient. Prescription sent in for lower dose codeine. Narcan prescription sent as well.

Hi Louis,

Jeanne has a telephone appointment with Dr Neighbor on 6/17 at 1 pm. Be by your phone at 12:50. I'll call first for general intake. Dr Neighbor will call 2nd for the actual visit.

06/10/2020 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Messages (continued)

We are doing telemedicine and phone visits to keep our patients safe during Covid-19. Let me know if you have questions.

Best,
Terri Pearson, CMA
206-685-1045

05/28/2020 - Telephone in Husky Health Primary Care Clinic

Reason for Visit

Chief complaint: ER FOLLOW UP
Visit diagnosis:

Discharge Medication List

Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD Discontinued on: 10/13/2021
Instructions: Take 1 tablet by mouth 2 times a day.
Entered by: Ong, Thuan Duc, MD Entered on: 6/7/2018
End date: 10/13/2021

acetaminophen 500 MG Oral Tab

Discontinued by: Van Hoff, Linda A, ARNP Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions:
1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
Entered by: Taylor, Zoe Judith Mildred, MD Entered on: 8/20/2019
Start date: 8/5/2019 End date: 6/12/2024
Action: Patient not taking

Calcium Carbonate 500 MG Oral Chew Tab

Discontinued by: Clark, Trika L, Pharmacy Technician Discontinued on: 1/9/2025
Reason for discontinuation: Discontinued by patient
Instructions: Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.
Entered by: Taylor, Zoe Judith Mildred, MD Entered on: 8/20/2019
Start date: 8/5/2019 End date: 1/9/2025

Cholecalciferol 1000 units Oral Tab

05/27/2020 - ED to Hosp-Admission (Discharged) in 4E MED GERI EYE (continued)

Medication List (continued)

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.
Entered by: Taylor, Zoe Judith Mildred, MD — Entered on: 8/20/2019
Start date: 8/20/2019 — End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA — Entered on: 9/4/2019
End date: 3/8/2025 — Informant: Patient Reported

atorvastatin 20 MG Oral Tablet

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 9/16/2020
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD — Ordered on: 9/4/2019
Start date: 9/4/2019 — End date: 9/16/2020
Quantity: 45 tablet — Refill: 3 refills by 9/3/2020

pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 9/16/2020
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 9/4/2019
Start date: 9/4/2019 — End date: 9/16/2020
Quantity: 90 tablet — Refill: 6 refills by 9/3/2020

acetaminophen-codeine 300-30 MG tablet

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 6/15/2020
Instructions: Take 1 tablet by mouth daily as needed (pain).
Authorized by: Neighbor Jr., William E, MD — Ordered on: 2/19/2020
Start date: 3/4/2020 — End date: 6/15/2020
Quantity: 30 tablet — Refill: No refills remaining

timolol maleate 0.5 % ophthalmic solution

Discontinued by: Kauffman, Mary Johanna Kelly, MD — Discontinued on: 8/12/2020
Instructions: INSTILL ONE DROP INTO EACH EYE TWICE DAILY block tear duct 1-2 min after use
Authorized by: Neighbor Jr., William E, MD — Ordered on: 4/3/2020
Start date: 4/3/2020 — End date: 8/12/2020
Quantity: 10 mL — Refill: No refills remaining

COVID-19 Coronavirus Qual PCR Interpretation	Testing performed using the Hologic SARS-CoV-2 Real-time RT-PCR assay. See https://testguide.labmed.uw.edu/NCVQLT for details.	—	—	UW VIROLOGY

Comment:
This test is not yet approved or cleared by the United States FDA. When there are no FDA-approved or cleared tests available, and other criteria are met, FDA can make tests available under an emergency access mechanism called an Emergency Use Authorization (EUA).
The EUA for this test is supported by the Secretary of Health and Human Service's (HHS's) declaration that circumstances exist to justify the emergency use of in vitro diagnostics for the detection and/or diagnosis of the virus that causes COVID-19.
This EUA will remain in effect (meaning this test can be used) for the duration of the COVID-19 declaration justifying emergency of IVDs, unless it is terminated or revoked by FDA (after which the test may no longer be used).

Comment:
These results are presumptive and have not been confirmed as positive by an alternate method.

Results are for medical management only, and should not be used for legal purposes nor for workplace or pre-employment testing.

Qualitative immunochemical testing for amphetamines, barbiturates, benzodiazepines, cocaine metabolites, methadone, opiates, phencyclidine (PCP), cannabinoids, and tricyclic antidepressants.
Positive results indicate immunoreactivity greater than or equal to these calibrators: d-methamphetamine 500 ng/mL, secobarbital 200 ng/mL, lormetazepam 200 ng/mL, benzoylecgonine 150 ng/mL, methadone 150 ng/mL, morphine 300 ng/mL, phencyclidine 25 ng/mL, nortetrahydrocannabinoic acid 50 ng/mL, nortriptyline 1000 ng/mL and acetaminophen 5 mcg/mL.

Quantitative testing for ethanol is by an enzymatic method. Results less than 10 mg/dL are reported as negative.

This test was developed and its performance characteristics determined by the
University of Washington Department of Laboratory Medicine. It has not been cleared or approved by the US Food and Drug Administration.
This laboratory is certified under the Clinical Laboratory Improvement Amendments (CLIA) as qualified to perform high complexity clinical laboratory testing. This test is used for clinical purposes. It should not be regarded as

Accession number: 13291495
Resulting lab: UW RADIOLOGY
Lab Technician: KAREN GRAY CT TECH
Narrative:
RADIOGRAPH OF THE CHEST, 1 VIEW

CLINICAL INDICATION:
fever

COMPARISONS:
8/1/2019

FINDINGS AND IMPRESSION:
There is new patchy opacification within the bilateral mid and lower lungs and increased prominence of the interstitium which may represent mild superimposed edema. Findings are concerning for multifocal pneumonia in setting of fever including atypical/viral pneumonia.

No effusion or pneumothorax.

Heart size is normal and unchanged.

No acute osseous abnormality. The right AC joint is not visualized. Mild left AC joint and shoulder osteoarthritis. Soft tissues are normal.

CTA NECK ANGIO

Resulted: 05/27/20 2308, Result status: Final result

Order status: Completed
Resulted by:
Support, Service
Jarvik, Jeffrey Gil, MD
Filed by: Uw Radiology Results Interface, User 05/27/20 2309
Performed: 05/27/20 1743 - 05/27/20 1743
Accession number: 13291467
Resulting lab: UW RADIOLOGY
Lab Technician: KIMBERLY A. NELSON
Narrative:
EXAMINATION:
CTA NECK ANGIO

CLINICAL INDICATION:
Stroke Code

TECHNIQUE:
CTA Head and Neck Stroke (N-48)
1. Non-contrast head: MDCT scanning was obtained through the head without contrast.
2. CTA Head/Neck: MDCT was obtained from the aortic arch to the vertex during bolus infusion of contrast. Slab 3D-MIP reformatted images of extracranial and intracranial vessels were obtained in multiple planes.
3. Post-contrast head: MDCT was obtained through the head after contrast injection.
Patient age specific scan parameters and iterative reconstruction techniques were used for radiation exposure.

CONTRAST:
Omnipaque 350 mg-ml 80 ml 05/27/2020 06:08 PM INTRAVENOUS

COMPARISON:
CT head without contrast 7/24/2019

FINDINGS:

Imaging (continued)

NON-CONTRAST HEAD CT:
MASS EFFECT & VENTRICLES: No midline shift shift. The lateral ventricles are symmetric. Incidentally noted is a septum cavum pellucidum. Prominence of the ventricular system and extra-axial spaces is commensurate with mild cerebral volume loss. Basal cisterns are patent. No downward herniation.
BRAIN: No acute infarct, hemorrhage or mass lesion is seen. Mild periventricular and deep subcortical white matter hypodensities likely representing small vessel ischemic changes. Bilateral basal ganglia mineralization. Similar left parietoccipital calcification.
VASCULAR: Moderate calcification of bilateral cavernous carotids and intracranial segments of the vertebral arteries.
EXTRA-AXIAL: No abnormal extra-axial fluid collections or masses.
EXTRA-CRANIAL: Skull and facial bones are normal. Sinuses and mastoids are clear. Bilateral lens replacement. Orbits are otherwise normal.

POST-CONTRAST HEAD CT:
ENHANCEMENT: Normal intracranial enhancement.

HEAD CTA:
ARTERIES: Normal intracranial arteries. No aneurysm, AVM, stenosis or occlusion.
VARIANTS: Circle of Willis is normally developed. No other vascular anatomic variants.
VEINS: Dural sinuses and deep venous structures are normal.

NECK CTA:
AORTIC ARCH: Common origin of the brachiocephalic and left common carotid arteries from the arch, a normal variant anatomy.
CAROTIDS: Common carotid vessels are normal. Mild calcified plaque at the carotid bulbs/origins of the bilateral ICAs without significant stenosis. Additional calcified plaque within the bilateral carotid canals, cavernous carotids and supraclinoid ICAs. Fusiform aneurysmal dilation of the right supraclinoid ICA to the circle of Willis measuring up to 0.6 cm. Internal carotid artery origins show no stenosis. Cervical ICA's are normal.
VERTEBRALS: Focal calcifications at the origins of the bilateral vertebral arteries without significant stenosis. There is flattening of the left vertebral artery within the V3 segment (12/132), although the more distal segments are well perfused. Right cervical segments are normal. Right vertebral artery is dominant.

ATTENDING RADIOLOGIST AND PAGER NUMBER
2953 JARVIK JEFFREY GIL MD
(206)680-1153
Impression:
IMPRESSION:
1. Head CT
- No acute infarct, hemorrhage or mass effect.
- Mild cerebral volume loss and sequela of chronic ischemic microvascular disease.
2. CTA head
- No high-grade stenosis or occlusion.
- Fusiform aneurysmal dilation of the right supraclinoid ICA measuring up to 0.6 cm.
3. CTA of the neck vessels
- No high-grade stenosis, dissection or occlusion.
- Mild calcified plaque in the bilateral carotid bulbs without significant ICA stenosis.

Internal carotid artery origin stenosis by NASCET criteria: No significant stenosis by NASCET criteria.

This is a preliminary report by Dr. Aaron Daub (PGY-5). A final report will be available by 10:00 AM on the following morning, or after 3 PM on weekends and holidays. Unless a final report appears below, an attending Radiologist has

05/27/2020 - Orders Only in UW Medicine Radiology (continued)

Imaging (continued)

not yet reviewed the images.

ATTENDING FINAL REPORT

I agree with the preliminary report with the following comment(s) (Cat 2):
There is a 5 mm smooth, non-spiculated nodular density in the right medial lung (series 12, images 1 through 3).

IMPRESSION:
See impression above.

PULMONARY NODULE MANAGEMENT RECOMMENDATIONS:

Pulmonary nodules are a common incidental finding on CT If there is prior imaging such as a chest radiograph or CT available at another facility, this should be compared to assess for stability.

Solitary non-calcified pulmonary nodule less than 6mm. In patients with a low risk of malignancy, no follow-up imaging is recommended for this nodule (less than1% risk of malignancy). In patients at higher risk, an optional low-dose CT of the chest in 12 months is recommended. Risk factors include current smoking, recently quit smoking, morphology (e.g. spiculated margins).

Start date: 8/5/2019
End date: 6/12/2024
Action: Patient not taking

Calcium Carbonate 500 MG Oral Chew Tab

Discontinued by: Clark, Trika L, Pharmacy Technician
Discontinued on: 1/9/2025
Reason for discontinuation: Discontinued by patient
Instructions: Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 1/9/2025

Cholecalciferol 1000 units Oral Tab

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/20/2019
End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA
Entered on: 9/4/2019
End date: 3/8/2025
Informant: Patient Reported

atorvastatin 20 MG Oral Tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/16/2020
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/4/2019
Start date: 9/4/2019
End date: 9/16/2020
Quantity: 45 tablet
Refill: 3 refills by 9/3/2020

- Follow-Up

Distant Site Telemedicine Encounter

I conducted this encounter from Hall Health via secure, live, face-to-face video conference with the patient. Jeanne was located at her apartment on Bainbridge with Son Louis present. Prior to the interview, the risks and benefits of telemedicine were discussed with the patient and verbal consent was obtained.
Both audio and video connections were used.

Problem: Non pressure venous stasis ulceration
Son Louis reports the left leg is markedly improved but right lower leg has persistent skin breakdown which he believes in somewhat improved. No fever, chills, or local redness. Dressing changes daily Does need additional dressing supplies. No recent visit to NW Wound Care clinic.

Problem: Right rib area pain
Jean reports 2 weeks of pain over the right posterior ribs. Does not recall a fall. No pain with deep inspiration. No cough.

Problem: Hypertension
As at least visit in February not on meds. No home readings but does have a cuff in storage.

Problem: Osteoarthritis
Taking plain tylenol twice daily and Tylenol with codeine once to twice daily. Seems to be working well.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Unspecified vitamin B deficiency [E53.9] 05/01/2007

Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12

deficiency

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic (HCC) [I82.509] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed.
  Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

- Type 2 diabetes mellitus without complication, without long-term current use of insulin [E11.9] 10/10/2019
- Primary open angle glaucoma (POAG) of both eyes [H40.1130] 10/10/2019

05/06/2020 - Telemedicine in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

- Fall [W19.XXXA] 09/03/2019
- Acute blood loss anaemia [D62] 08/11/2019
- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC) [L97.313] 05/26/2019
- Chronic venous hypertension with ulcer, bilateral [I87.313, L97.919, L97.929] 05/26/2019
- Bilateral leg edema [R60.0] 05/26/2019
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves [I70.232, I70.242] 09/24/2018
- Diabetic ulcer of lower extremity (HCC) [E11.622, L97.909] 09/24/2018
- Vitamin D deficiency [E55.9] 07/09/2018
- Venous ulcer of left leg (HCC) [I83.029, L97.929] 06/07/2018
- Normocytic anemia [D64.9] 06/07/2018
- Severe protein-calorie malnutrition (HCC) [E43] 06/07/2018
- Urge urinary incontinence [N39.41] 06/07/2018
- Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC) [L97.323] 05/17/2018
- Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC) [L97.223] 05/17/2018
- Chronic venous hypertension with ulcer and inflammation, left [I87.332, L97.929] 05/17/2018
- Primary osteoarthritis of both hips [M16.0] 02/01/2017
- Thrombocytopenia (HCC) [D69.6] 11/02/2016
- Imbalance [R26.89] 11/02/2016
- History of recurrent deep vein thrombosis (DVT) [Z86.718] 06/02/2016
- Hip joint stiffness [M25.659] 01/06/2015
- Leg weakness, bilateral [R29.898] 01/06/2015
- Weakness of trunk musculature [M62.81] 01/06/2015
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication (HCC) [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

Outpatient Medications Marked as Taking for the 5/6/20 encounter (Telemedicine) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• acetaminophen 500 MG Oral Tab	1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition		

05/06/2020 - Telemedicine in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

• acetaminophen-codeine 300-30 MG tablet	Take 1 tablet by mouth daily as needed (pain).	30 tablet	0
• atorvastatin 20 MG Oral Tablet	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	45 tablet	3
• Calcium Carbonate 500 MG Oral Chew Tab	Chew and swallow 2 tablets by mouth 3 times a day as needed for indigestion/heartburn.		
• Cholecalciferol 1000 units Oral Tab	Take 2 tablets (2,000 Units) by mouth daily.		
• Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab	Take 1 tablet by mouth 2 times a day.		
• MULTIPLE VITAMIN OR	Take by mouth.		
• pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	90 tablet	6
• timolol maleate 0.5 % ophthalmic solution	INSTILL ONE DROP INTO EACH EYE TWICE DAILY block tear duct 1-2 min after use	10 mL	0

Social history:

History

Sexual Activity

- Sexual activity: Not Currently

Social History

Tobacco Use

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used

Substance Use Topics

- Alcohol use: No

Objective:

There were no vitals taken for this visit.
Estimated body mass index is 21.16 kg/m² as calculated from the following:
Height as of 8/20/19: 5' 1" (1.549 m).
Weight as of 11/25/19: 50.8 kg (112 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter:
General: NAD. Very hard of hearing. Son present for telemedicine visit
Mood: Positive particularly when talking about drying fruit, canning, and making jams in her kitchen

05/06/2020 - Telemedicine in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Right lower leg: Skin appeared in tact on the video
Left lower leg: Persistent ulcerations on medial ankle that appear similar in size to prior visits though not measured today. There appeared to be some exudate on edges but pink mid portion. No cellulitis. There was also a similar ulceration of the mid pretibial area. No edema.
Back: Was able to see her back in the area of the left lower ribs. No skin changes. Louis, her son, did not feel a protuberance of the rib or mass.

Lab and other tests: none

Assessment and Plan:
1. Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
Appear improved on the right but persistent on the left without cellulitis. No recent visit to NW Wound Care due to COVID19 pandemic.
Plan:
--Refill dressing supplies through Nate at NW wound care clinic as planned by son Louis.
--Arrange for possible NW wound care telemedicine visit

2. Left rib pain.
2 week hx of left posterior rib pain. Unclear cause. Could be some mild trauma she does not recall.
Plan:
--Warm compresses over the area for 20 minutes twice daily and expect resolution. Otherwise would need in person evaluation which would best be done, in view of the COVID19 pandemic, at a local urgent care where they have been seen before.

3. Essential hypertension
No blood pressure reading today. Son Louis will find their bp cuff and check it.

4. Osteoarthritis of lumbar spine, unspecified spinal osteoarthritis complication status
On stable low dose of tylenol with codeine Uses 1 to two tablets in divided doses. Does not report need for refill. Based on refill history not overusing as was an issue a year ago when she and her son were homeless.

Other:
No recent falls
Currently seeing dentist on Bainbridge Island.

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

Dear Jeanne,

Thank you for scheduling a telemedicine visit with Dr. Neighbor

Your telemedicine visit has been scheduled for Wednesday, May 6, 2020 at 11:20 am

05/06/2020 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Messages (continued)

The Zoom link for your telemedicine visit is

https://applications.zoom.us/telehealth?org_id=ni0OxEC_ROadQrkxobmSaQ&data=Dn8Eif%2ByxHMPCYyYdWZYEaqPyZX33n1WvopcWZ4L91rG%2FOaQLge%2F0VL0ByE93rtlVWiHB39mKiXh5fsEGzknoIJCTnXSihPmF3TffFPrsoI%3D

Please be ready to attend your visit at the scheduled time and date.

Click this link below to view instructions for using ZOOM (if you are using a mobile device you will need to copy and paste this link into a browser).

http://www.uwmedicine.org/patient-resources/job-aidzoom-patient-instructions.pdf

Please review these instructions before your visit so you are prepared to access ZOOM on the day of your appointment.

Additionally, your telemedicine visit will be billed to your insurance in the same manner as a regular in-person office visit. This means that your standard copay, coinsurance, and deductible will apply.

Please let us know if you have any questions or concerns at 206-616-9358

Sincerely,

Hall Health Center

Hello Jeane,

Your appointment with Dr. Neighbor on Wednesday, 05/06 from 10:00-10:40 am has been scheduled.
You will access your appointment through eCare. You will see an alert and a button in eCare to "Begin Video Visit" which launches Zoom and connects the patient to the Epic meeting link

If clicking on "Begin Video Visit" does not work here is the link that you can copy and paste into your browser. It is long but it works.

Messages (continued)

Louis:
I sent the message below to you in the summary of Jeanne's visit today. (went to Jeanne's e care). Her plain tylenol should be limited to 5 tabs of 500 mg daily. That totals 2500 mg. The Tylenol with codeine contains a relatively low dose of 300 mg. If she takes one tablet daily a total 2800 mg. Maximum dose is 3000 mg in 24 hours. If needed we can slightly increase the dose of codeine, but very carefully.

"Restart Tylenol with Codeine. She can take a half tablet twice daily. 2 prescriptions were written one to cover the next 15 days and one to be filled after that in early March for 30 days. She may continue to supplement with plain Tylenol but should limit the dose to a total of 5 tablets of 500 mg daily. This would provide a total dose of plain Tylenol of 2500 mg which when combined with the 300 mg in the Tylenol with Codeine totals to 2800 mg which is close to the maximum for her age (3000 mg)"

William E Neighbor, MD

500mg Acetaminophen

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	2/19/2020 4:33 PM

Directions: Do not take more than directed
Warning: Do not take more than 6 Caplets over 24 hours,
Recommended: Take 2 caplets every 6 hours

More than 4,000mg in 24 hour, severe liver damage could occur.

I, Louis will discuss this with Jeanne, to ensure she complies.
She has stated to me that she has taken 8+ at time, but not daily, generally between 0-8, 8+ meaning severe pain.

Please advise or provide recommendations for combination of 500mg Acetaminophen and Acetaminophen 300mg-Codeine 30mg

02/19/2020 - Office Visit in Husky Health Primary Care Clinic

Reason for Visit

Chief complaint: Wound Check/Dressing Change
Visit diagnoses:

- Essential hypertension (primary)
- Osteoarthritis, unspecified osteoarthritis type, unspecified site
- Venous stasis ulcer of other part of lower leg limited to breakdown of skin, unspecified laterality, unspecified whether varicose veins present

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 2/19/2020 1020

Jeanne Leonie Hoffman is a 95 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Wound Check/Dressing Change
  leg fu

Jeanne Is brought in by her son Louis from Bainbridge Island. They were over 20 minutes late for a 40 minute visit. This has been a recurrent issue. The main reason for the visit today was coordination of care with the Northwest Hospital wound care clinic where they have not yet followed up. Jean also needed a refill on Tylenol with Codeine which she uses approximately once daily and has been a stable dose for control of osteoarthritic pain. She did state that she's taking Tylenol 500 mg. It appears that she is taking over 3000 mg daily. She has not had the Tylenol with Codeine recently.

Review of Systems:
No fever chills or night sweats reported. No nausea or vomiting or abdominal pain.

Problem List
Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Unspecified vitamin B deficiency [E53.9] 05/01/2007

Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic (HCC) [I82.509] 11/20/2006

Recurrent DVT and phlebitis since 1982
Per Vascular Surgery note 5/9/2006: continue warfarin
3/9/2010 Lower extremity arterial vascular ultrasound studies normal

02/19/2020 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

02/28/18	54.1 kg (119 lb 3.2 oz)
01/03/18	53.8 kg (118 lb 9.6 oz)
09/20/17	52.3 kg (115 lb 6.4 oz)

Lab and other tests: none

Assessment and Plan:

1. Essential hypertension

Elevated blood pressure. She is not currently on antihypertensive agents. She had been on losartan 25 mg one tablet daily I believe this was discontinued during hospitalization and the last one to 2 years after which her blood pressure seemed to be reasonably controlled. Then they have been during a time when her weight was less. In the distant past she was also on hydrochlorothiazide 25 mg daily. Her blood pressure at her visit in January was 165/83 and in October was 156/66. She is currently asymptomatic

Plan:

--followup in one month for repeat blood pressure and consideration of restarting losartan at a low dose. Goal blood pressure would be closer to 150 systolic.

2. Osteoarthritis, unspecified osteoarthritis type, unspecified site

Poor pain control without use of Tylenol with Codeine. She is overusing plain Tylenol which is a concern.

Plan:

-Restart Tylenol with Codeine. She can take a half tablet twice daily. 2 prescriptions were written one to cover the next 15 days and one to be filled after that in early March for 30 days. She may continue to supplement with plain Tylenol but should limit the dose to a total of 5 tablets of 500 mg daily. This would provide a total dose of plain Tylenol of 2500 mg which when combined with the 300 mg in the Tylenol with Codeine totals to 2800 mg which is close to the maximum for her age (3000 mg)

3. Venous stasis ulcer of other part of lower leg limited to breakdown of skin, unspecified laterality, unspecified whether varicose veins present (HCC)

We discussed the fact that they have not followed up with Dr. Norsworthy at the Northwest Hospital wound care facility. Our clinic is not adequately staffed with nurses to provide regular wound care. Louis contacted Northwest Hospital via E care after the visit and left a note indicating he is dedicated to moving ahead with getting the appointment.

I enjoy caring for Jeanne. I emphasized to Louis that they do need to be on time for their appointments.

William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	2/19/2020 6:29 PM

Last Read in MyChart
6/5/2024 6:08 AM by Hoffman, Jeanne Leonie

Jeanne: Below is a summary of your visit.

Assessment and Plan:
1. Essential hypertension
Elevated blood pressure. She is not currently on antihypertensive agents. She had been on losartan 25 mg one tablet daily I believe this was discontinued during hospitalization and the last one to 2 years after which her blood pressure seemed to be reasonably controlled. Then they have been during a time when her weight was less. In the distant past she was also on hydrochlorothiazide 25 mg daily. Her blood pressure at her visit in January was 165/83 and in October was 156/66. She is currently asymptomatic
Plan:
--followup in one month for repeat blood pressure and consideration of restarting losartan at a low dose. Goal blood pressure would be closer to 150 systolic.

02/19/2020 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Messages (continued)

2. Osteoarthritis, unspecified osteoarthritis type, unspecified site
Poor pain control without use of Tylenol with Codeine. She is overusing plain Tylenol which is a concern.
Plan:
-Restart Tylenol with Codeine. She can take a half tablet twice daily. 2 prescriptions were written one to cover the next 15 days and one to be filled after that in early March for 30 days. She may continue to supplement with plain Tylenol but should limit the dose to a total of 5 tablets of 500 mg daily. This would provide a total dose of plain Tylenol of 2500 mg which when combined with the 300 mg in the Tylenol with Codeine totals to 2800 mg which is close to the maximum for her age (3000 mg)

3. Venous stasis ulcer of other part of lower leg limited to breakdown of skin, unspecified laterality, unspecified whether varicose veins present (HCC)
We discussed the fact that they have not followed up with Dr. Norsworthy at the Northwest Hospital wound care facility. Our clinic is not adequately staffed with nurses to provide regular wound care. Louis contacted Northwest Hospital via E care after the visit and left a note indicating he is dedicated to moving ahead with getting the appointment.

I enjoy caring for Jeanne. I emphasized to Louis that they do need to be on time for their appointments.

Null, Margaret K, RN at 2/6/2020 0821

Hi Dr Neighbor, The Wound Care Center has not seen Jeanne since 11/25/2019. We have not been able to get a hold of her to schedule an appt. I am planning on discharging her but wanted your input before doing so. I want to make sure someone is keeping an eye on her wounds. Please let me know if you are ok with this. Thank you. Margi Null, RN

Action: Patient not taking

Calcium Carbonate 500 MG Oral Chew Tab

Discontinued by: Clark, Trika L, Pharmacy Technician — Discontinued on: 1/9/2025
Reason for discontinuation: Discontinued by patient
Instructions: Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.
Entered by: Taylor, Zoe Judith Mildred, MD — Entered on: 8/20/2019
Start date: 8/5/2019 — End date: 1/9/2025

Cholecalciferol 1000 units Oral Tab

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.
Entered by: Taylor, Zoe Judith Mildred, MD — Entered on: 8/20/2019
Start date: 8/20/2019 — End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA — Entered on: 9/4/2019
End date: 3/8/2025 — Informant: Patient Reported

atorvastatin 20 MG Oral Tablet

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 9/16/2020
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD — Ordered on: 9/4/2019
Start date: 9/4/2019 — End date: 9/16/2020
Quantity: 45 tablet — Refill: 3 refills by 9/3/2020

pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 9/16/2020
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 9/4/2019
Start date: 9/4/2019 — End date: 9/16/2020
Quantity: 90 tablet — Refill: 6 refills by 9/3/2020

cephalexin (KEFLEX) 500 MG Oral Capsule

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 5/5/2021
Reason for discontinuation: Reorder
Instructions: Take 1 capsule (500 mg) by mouth 4 times a day for 7 days. For 7 days.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 10/23/2019
Start date: 10/23/2019 — End date: 5/5/2021
Quantity: 28 capsule — Refill: No refills remaining

timolol maleate 0.5 % ophthalmic solution

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 4/3/2020
Instructions: instill one drop in each eye twice daily. block tear duct for 1-2 min after use
Authorized by: Neighbor Jr., William E, MD — Ordered on: 1/13/2020
Start date: 1/13/2020 — End date: 4/3/2020
Quantity: 10 mL — Refill: No refills remaining

acetaminophen-codeine 300-30 MG tablet

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 2/19/2020
Reason for discontinuation: Reorder
Instructions: Take 1 tablet by mouth daily as needed.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 1/21/2020
Start date: 1/21/2020 — End date: 2/19/2020
Quantity: 10 tablet — Refill: No refills remaining

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 1/22/2020 1000

Jeanne Leonie Hoffman is a 95 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Leg Pain

  spasms, sharp pain in both legs;

- Follow-Up
  f/u on wound care

Jeanne comes in with her son Louis today For followup but then somewhat delayed because of IT snowy weather which has now subsided. Today Jeanne reports that she's been having some tenderness behind each calf and in the lower portion of the left medial upper leg. It is unclear for how long this has been present.

Regarding her lower extremity wounds she comes in for dressing changes today. She has not been to the Northwest Hospital wound care clinic for several months. Her son has been doing the dressing changes and her new living situation. I do plan on making a followup visit to Northwest Hospital wound care

There is a history of recurrent DVT in the distant past for which she was on Coumadin for many years. However in the last 2 years this has been discontinued because of compliance issues and risk of falls.

Review of Systems:
She has not had any fever chills or night sweats.

Problem List
Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Unspecified vitamin B deficiency [E53.9] 05/01/2007

Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic (HCC) [I82.509] 11/20/2006

Recurrent DVT and phlebitis since 1982

Per Vascular Surgery note 5/9/2006: continue warfarin
3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit. Patient to be seen in eye clinic.

Objective:

BP (!) 165/83 | Pulse 70

Estimated body mass index is 21.16 kg/m² as calculated from the following:
Height as of 8/20/19: 5' 1" (1.549 m).
Weight as of 11/25/19: 50.8 kg (112 lb).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
(!) 165/83	70	---	---	---	9:40 AM	1/22/2020

Last blood pressure recorded in this encounter: **(!) 165/83**
General: NAD
Extremities: Right leg healing fairly well though with some continued breakdown postero-medially. Left leg shows more involvement. She does have tenderness in each calf without edema or venous engorgement. In the left upper leg distally and medially above the knee joint she has tow 1 cm areas of nodularity and tenderness. The mass are mobile and seem venous.

Wt Readings from Last 20 Encounters:

11/25/19	50.8 kg (112 lb)
09/23/19	48.1 kg (106 lb)
08/20/19	50.4 kg (111 lb 1.6 oz)
03/28/19	51.7 kg (114 lb)
02/28/19	50.3 kg (111 lb)
01/31/19	46.3 kg (102 lb)
10/08/18	50.8 kg (112 lb)
09/26/18	51.1 kg (112 lb 9.6 oz)
09/24/18	51.3 kg (113 lb)
08/14/18	53.2 kg (117 lb 4 oz)
07/25/18	52.1 kg (114 lb 12 oz)
07/06/18	50.2 kg (110 lb 12 oz)
06/22/18	50.5 kg (111 lb 6 oz)
06/19/18	49.9 kg (110 lb)
06/07/18	50 kg (110 lb 2 oz)
05/31/18	50.8 kg (112 lb)
05/17/18	49.6 kg (109 lb 6.4 oz)
02/28/18	54.1 kg (119 lb 3.2 oz)
01/03/18	53.8 kg (118 lb 9.6 oz)
09/20/17	52.3 kg (115 lb 6.4 oz)

Lab and other tests: none

Assessment and Plan:
1. Pain in both lower extremities
Bilateral calf pain and left inner upper leg tenders in patient with hx of recurrent DVT in distant past for which she is no longer on coumadin due to fall and bleeding risk. Need to exclude recurrence of clot. D dimer would be difficult to interpret in view of venous stasis ulcerations of lower legs.
- REFERRAL TO VASCULAR LAB

2. History of DVT (deep vein thrombosis)
- REFERRAL TO VASCULAR LAB

3. Venous ulcer of left leg (HCC)
Right leg healing fairly well though with some continued breakdown postero-medially. Left leg shows more involvement. Last visit to NWH Wound Care was in November. No recent visit due to transportation issue. Redressed today. Encourage wound clinic follow up. See me in one month.

Other:
She has been on a low dose of Tylenol with codeine for chronic osteoarthritic pain and pain from venous stasis ulcerations that has not been managed well with Tylenol alone. We have not used topical lidocaine or nonsteroidal anti-inflammatory medications recently due to not wanting her to apply these 2 the wounds themselves.

1. US LOWER EXTREMITY BILAT VENOUS DPLX

Narrative
D. E. STRANDNESS, JR. VASCULAR LABORATORY
University of Washington Medical Center
1959 NE Pacific Street
Seattle, WA 98195
206-598-4449

Accredited by the Intersocietal Accreditation Commission - Vascular Testing

EXAMINATION:
LOWER EXTREMITY VENOUS DUPLEX (BILATERAL)
Venous duplex examination performed using B-mode, color flow, and Doppler spectral waveform assessment.

INDICATION:
This is a 95 year-old woman with a history of DVT. The patient presents with a palpable lump in the medial left distal thigh-knee area.

PREVIOUS EXAMINATIONS:
11/2/2016 (Left external iliac vein is chronically occluded with collaterals noted)

EQUIPMENT:
GE Logic 9

FINDINGS:

LOWER EXTREMITY VENOUS DUPLEX

RIGHT DEEP SYSTEM
Common Femoral Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Deep Femoral Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes

Main Femoral Vein Prox: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Main Femoral Vein Mid: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Main Femoral Vein Dist: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes

Popliteal Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes

Posterior Tibial Vein: Not evaluated due to wound wraps.
Peroneal Vein: Not evaluated due to wound wraps.

Gastrocnemius Veins: Not evaluated due to wound wraps.
Soleal Veins: Not evaluated due to wound wraps.

RIGHT SUPERFICIAL VENOUS SYSTEM
Great Saphenous Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes at the saphenofemoral junction.

LEFT DEEP SYSTEM
Common Femoral Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Deep Femoral Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes

Main Femoral Vein Prox: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Main Femoral Vein Mid: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Main Femoral Vein Dist: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes

Popliteal Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes

Posterior Tibial Vein: Not evaluated due to wound wraps.
Peroneal Vein: Not evaluated due to wound wraps.

Gastrocnemius Veins: Not evaluated due to wound wraps.
Soleal Veins: Not evaluated due to wound wraps.

LEFT SUPERFICIAL VENOUS SYSTEM
Great Saphenous Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes at the saphenofemoral junction.

Shannon Wear,BS,RVT
Vascular Technologist

Karina Newhall
Vascular Fellow

FINAL PHYSICIAN INTERPRETATION

1. RIGHT LOWER EXTREMITY VENOUS
- No deep vein thrombosis in the right lower extremity, where evaluated.
- The deep veins in the right calf were not evaluated due to wounds and bandages.
- No superficial vein thrombosis in the right lower extremity, where evaluated.

2. LEFT LOWER EXTREMITY VENOUS
- No deep vein thrombosis in the left lower extremity, where evaluated.
- The deep veins in the left calf were not evaluated due to wounds and

01/22/2020 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

bandages.
- No superficial vein thrombosis in the left lower extremity, where evaluated.
- In the area of the palpable lump in the left medial knee area there is a non-vascularized, mixed echogenicity, solid-appearing structure located about 2 cm below the skin surface and measuring 1.9 x 1.2 cm.

TRIAGE WOUND CARE/DRESSING CHANGE

SUBJECTIVE:
Jeanne Leonie Hoffman is a 95 year old female presents for wound care of bilateral lower leg ulcers.
Wound hx: please see Dr. Neighbor's charting. Chronic ulceration.

OBJECTIVE: Draining. Many open areas have a covering of slough and hardened skin surrounding them.

ASSESSMENT: wound care/ dressing change for healing wound.

PLAN: Wound was cleansed by placing each foot, one at a time in basin of warm water. Lower legs were then drenched with the water. Areas of slough were soaked, attempted to remove as much of the hardened skin as well as slough, as tolerated.
Both legs patted dry with clean towels.
Honey dressings cut to size and placed on open wounds.
Gauze bandage held honey in place then elastic bandage covered lower legs.

As per verbal order from Dr. Neighbor, Acetaminophen 1000mg orally given as Jeane was in pain after the procedure.

Advised patient to keep dressing in place and return for recheck in 2 days.

Reviewed self care instructions: Monitor for signs of infection (fever, pus at wound site +/- increasing redness).

Patient voiced understanding and agreement with plan.
Penelope A Watridge, RN

Clinical Notes

Result Encounter Note

Neighbor Jr., William E, MD at 1/22/2020 1338

Jeanne and Louis:
The vascular ultrasound of Jeanne's legs did not show any evidence of clots. The area in the left lower thigh near the knee where there is tenderness, there is a small nodule. I would advise warm compresses on this area and expect healing over the next week. The area should be re examined if symptoms do not resolve.

EXAMINATION:
LOWER EXTREMITY VENOUS DUPLEX (BILATERAL)
Venous duplex examination performed using B-mode, color flow, and Doppler spectral waveform assessment.

INDICATION:
This is a 95 year-old woman with a history of DVT. The patient presents with a palpable lump in the medial left distal thigh-knee area.

PREVIOUS EXAMINATIONS:
11/2/2016 (Left external iliac vein is chronically occluded with collaterals noted)

EQUIPMENT:
GE Logic 9

FINDINGS:

LOWER EXTREMITY VENOUS DUPLEX

RIGHT DEEP SYSTEM
Common Femoral Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Deep Femoral Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes

Main Femoral Vein Prox: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Main Femoral Vein Mid: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Main Femoral Vein Dist: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes

Popliteal Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes

Posterior Tibial Vein: Not evaluated due to wound wraps.
Peroneal Vein: Not evaluated due to wound wraps.

Gastrocnemius Veins: Not evaluated due to wound wraps.
Soleal Veins: Not evaluated due to wound wraps.

RIGHT SUPERFICIAL VENOUS SYSTEM

01/22/2020 - Orders Only in UW Medicine Radiology (continued)

Imaging (continued)

Great Saphenous Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes at the saphenofemoral junction.

LEFT DEEP SYSTEM
Common Femoral Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Deep Femoral Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes

Main Femoral Vein Prox: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Main Femoral Vein Mid: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes
Main Femoral Vein Dist: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes

Popliteal Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes

Posterior Tibial Vein: Not evaluated due to wound wraps.
Peroneal Vein: Not evaluated due to wound wraps.

Gastrocnemius Veins: Not evaluated due to wound wraps.
Soleal Veins: Not evaluated due to wound wraps.

LEFT SUPERFICIAL VENOUS SYSTEM
Great Saphenous Vein: Complete compressions, spontaneous and phasic flow, complete color filling, no intraluminal echoes at the saphenofemoral junction.

Karina Newhall
Vascular Fellow

FINAL PHYSICIAN INTERPRETATION

1. RIGHT LOWER EXTREMITY VENOUS
- No deep vein thrombosis in the right lower extremity, where evaluated.
- The deep veins in the right calf were not evaluated due to wounds and bandages.
- No superficial vein thrombosis in the right lower extremity, where evaluated.

2. LEFT LOWER EXTREMITY VENOUS
- No deep vein thrombosis in the left lower extremity, where evaluated.
- The deep veins in the left calf were not evaluated due to wounds and bandages.
- No superficial vein thrombosis in the left lower extremity, where evaluated.
- In the area of the palpable lump in the left medial knee area there is a non-vascularized, mixed echogenicity, solid-appearing structure located about 2 cm below the skin surface and measuring 1.9 x 1.2 cm.

Telephone Encounter

Mohova, Elena, CMA at 1/21/2020 1719

Received a call from Louis, Jeane's son, asking for sending a Rx for codeine for Jeane to Safeway Pharmacy in Bainbridge Island. He also asked if there is any possibility for walk-in visit tomorrow, Wednesday, for wound triage and possibly wound care for Jeane. Louis left a phone number of the person that we can call back and left a message for him either they can come tomorrow to be seen in the clinic for walk-in or not. Contact ph # 314-853-2695, person's name is Dave, he can call Louis or a message can be left on this phone for Louis an Jeane. Please advise

Electronically signed by Mohova, Elena, CMA at 1/21/2020 5:24 PM

Neighbor Jr., William E, MD at 1/21/2020 1828

Message sent indicated I cannot see Jeanne tomorrow, but she should go to urgent care on Bainbridge if there are concerns. I did send in a limited prescription for tylenol with codeine which she has used once daily as needed for diffuse osteoarthritic pain not remedied with tylenol alone.
She has been on coumadin in the past which limited use of NSAIDs. However, given age, would limit NSAID use

Louis:
--I will not be able to see your mother Jeanne tomorrow. If she needs a wound check, I advise that she be seen in urgent care on Bainbridge. Please do call so I can see her next week.
--I printed a prescription for the tylenol with codeine for a limited prescription until the next appointment with me.

PROGRESS NOTE
11/25/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with multiple bilateral lower leg ulcers with mixed vascular disease is seen today for Follow Up Visit

INTERVAL HISTORY: Both side lower leg ulcers are smaller, there are skin islands at wound beds. There is no inflammation with ulcers. She reports some increased pain at the right lower leg that intermittently keeps her awake. She was diagnosed with cellulitis about a month ago by Dr. Neighbor MD at the right calf and given a 10 days course of antibiotic. After that the redness around the calf resolved but the disproportional swelling has been persistent according to the son and the patient. She has tenderness with tight palpation of the right calf (Homan's sign positive on exam). She denies any sob, chest pain or palpitations.
She is feeling good overall. She is now living in an apartment with her son Louis, regular access to showers, regular meals, taking supplemental protein. She gained about 10lbs over one month
This is a patient with DM2, CLI with extensive atherosclerotic disease and chronic leg edema with venous hypertension. She was in hospital after two falls, hemopneumothorax and also fractured ribs and ramus pubis bone in early July. After a long hospital stay she was discharged to SNF where she rest well, legs were elevated and with better nutritional support. She actually gained some weight. She was recently discharged home to her son's (Louis) care.

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:Denies, fatigue, unexpected weight loss, unexpected weight gain, fever . Does have intense itch at both lower limbs and intermittent limb pain at right calf as above. She walked with a walker.

11/25/2019 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

ASSESSMENT: This is a patient with advanced age, venous hypertension and limb ischemia with atherosclerotic disease and DM2 has been treated at our center for extensive bilateral lower limb ulcers. With improved living situations and nutritional support along with advanced wound care dressing infection control and intermittent debridement her ulcers have much improved. Today she has another problem with disproportionally larger right calf with positive Homan's sign suspicious for DVT. She has this swelling persistent for the last one month. I strongly recommended an urgent DVT screening. Louis -the son, has his birthday party scheduled this afternoon and absolutely did not want to delay his returning home and refused the test despite I explained the risks of having a DVT at lower limbs. For the note she is no longer on anticoagulant mediation except intermittent aspirin. She has appointment with Dr Neighbor MD next week. At this point as the swelling has been present for one month I will request Dr. Neighbor's re-evaluation and DVT screening if edema still present.
Strongly urged her and her son to seek medical attention if any sob, chest pain or palpitations.
(L97.323) Non-pressure chronic ulcer of left ankle with necrosis of muscle (primary encounter diagnosis)
(R60.0) Leg edema, right
(L97.223) Non-pressure chronic ulcer of left calf with necrosis of muscle
(I87.332, L97.929) Chronic venous hypertension with ulcer and inflammation, left
(I70.442) Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf

PLAN: continue current wound care regiment. See immediate medical attention if any sob, chest pain or palpitations.
Patient education took place regarding the treatment progress and further measures to address the condition. The patient was given an opportunity to ask questions.
It was a pleasure to see Ms. Hoffman at my clinic. Please do not hesitate to call me for any questions or concerns.
Treatment plan recommended at this time includes the following:
Jeanne was seen today for wound care.

Diagnoses and all orders for this visit:

Non-pressure chronic ulcer of left ankle with necrosis of muscle
- NURSING COMMUNICATION

Leg edema, right
- NURSING COMMUNICATION

Non-pressure chronic ulcer of left calf with necrosis of muscle
- NURSING COMMUNICATION

Chronic venous hypertension with ulcer and inflammation, left
- NURSING COMMUNICATION

Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf
- NURSING COMMUNICATION

11/25/2019 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

Clinical Notes (continued)

Patient Instructions
Left lateral ankle, left medial ankle, right medial ankle, right pretib,:left pretib: Clean with water, apply xeroform gauze onto the wounds, cover with gauze or ABD pad. Secure with kling and tape. Change every other day.

Return in about 6 weeks (around 1/6/2020).

Visit Summary
PROGRESS NOTE
11/25/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with multiple bilateral lower leg ulcers with mixed vascular disease is seen today for Follow Up Visit

INTERVAL HISTORY: Both side lower leg ulcers are smaller, there are skin islands at wound beds. There is no inflammation with ulcers. She reports some increased pain at the right lower leg that intermittently keeps her awake. She was diagnosed with cellulitis about a month ago by Dr. Neighbor MD at the right calf and given a 10 days course of antibiotic. After that the redness around the calf resolved but the disproportional swelling has been persistent according to the son and the patient. She has tenderness with tight palpation of the right calf (Homan's sign positive on exam). She denies any sob, chest pain or palpitations.
She is feeling good overall. She is now living in an apartment with her son Louis, regular access to showers, regular meals, taking supplemental protein. She gained about 10lbs over one month
This is a patient with DM2, CLI with extensive atherosclerotic disease and chronic leg edema with venous hypertension. She was in hospital after two falls, hemopneumothorax and also fractured ribs and ramus pubis bone in early July. After a long hospital stay she was discharged to SNF where she rest well, legs were elevated and with better nutritional support. She actually gained some weight. She was recently discharged home to her son's (Louis) care.

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:Denies, fatigue, unexpected weight loss, unexpected weight gain, fever . Does have intense itch at both lower limbs and intermittent limb pain at right calf as above. She walked with a walker.

Review of patient's allergies indicates:
Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other
• Nitrofurantoin	Other
Confusion, loss of appetitie, nausea, abdominal pain	
• Nitrofurantoin	Other
confusion	
• Penicillins	Rash
• Sulfa Antibiotics	Rash

Current Outpatient Medications:
• acetaminophen 500 MG Oral Tab, 1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition, Disp: , Rfl:
• ACETAMINOPHEN-CODEINE 300-30 MG tablet, TAKE ONE TABLET BY MOUTH DAILY AS NEEDED , Disp: 15 tablet, Rfl: 0
• atorvastatin 20 MG Oral Tablet, Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction, Disp: 45 tablet, Rfl: 3
• Calcium Carbonate 500 MG Oral Chew Tab, Chew and swallow 2 tablets by mouth 3 times a day as needed for indigestion/heartburn., Disp: , Rfl:
• Cholecalciferol 1000 units Oral Tab, Take 2 tablets (2,000 Units) by mouth daily., Disp: , Rfl:
• Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab, Take 1 tablet by mouth 2 times a day., Disp: , Rfl:
• MULTIPLE VITAMIN OR, Take by mouth., Disp: , Rfl:
• pentoxifylline ER 400 MG Oral Tab CR, Take 1 tablet (400 mg) by mouth 3 times a day., Disp: 90 tablet, Rfl: 6
• timolol 0.5 % Ophthalmic Solution, One drop in each eye twice daily. Block tear duct for 1-2 minutes after use., Disp: 10 mL, Rfl: 0

EXAM:
Vital Signs: BP (!) 148/76 | Pulse 62 | Temp 96.4 °F (35.8 °C) (Oral) | Resp 16 | Wt 112 lb (50.8 kg) | BMI 21.16 kg/m² Body mass index is 21.16 kg/m².

ASSESSMENT: This is a patient with advanced age, venous hypertension and limb ischemia with atherosclerotic disease and DM2 has been treated at our center for extensive bilateral lower limb ulcers. With improved living situations and nutritional support along with advanced wound care dressing infection control and intermittent debridement her ulcers have much improved. Today she has another problem with disproportionally larger right calf with positive Homan's sign suspicious for DVT. She has this swelling persistent for the last one month. I strongly recommended an urgent DVT screening. Louis -the son, has his birthday party scheduled this afternoon and absolutely did not want to delay his returning home and refused the test despite I explained the risks of having a DVT at lower limbs. For the note she is no longer on anticoagulant mediation except intermittent aspirin. She has appointment with Dr Neighbor MD next week. At this point as the swelling has been present for one month I will request Dr. Neighbor's re-evaluation and DVT screening if edema still present.
Strongly urged her and her son to seek medical attention if any sob, chest pain or palpitations.
(L97.323) Non-pressure chronic ulcer of left ankle with necrosis of muscle (primary encounter diagnosis)
(R60.0) Leg edema, right
(L97.223) Non-pressure chronic ulcer of left calf with necrosis of muscle
(I87.332, L97.929) Chronic venous hypertension with ulcer and inflammation, left
(I70.442) Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf

PLAN: continue current wound care regiment. See immediate medical attention if any sob, chest pain or palpitations.
Patient education took place regarding the treatment progress and further measures to address the condition. The patient was given an opportunity to ask questions.
It was a pleasure to see Ms. Hoffman at my clinic. Please do not hesitate to call me for any questions or concerns.
Treatment plan recommended at this time includes the following:
Jeanne was seen today for wound care.

Diagnoses and all orders for this visit:

Non-pressure chronic ulcer of left ankle with necrosis of muscle

Active at the End of Visit

Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Instructions: Take 1 tablet by mouth 2 times a day.
Entered by: Ong, Thuan Duc, MD
Entered on: 6/7/2018
End date: 10/13/2021

acetaminophen 500 MG Oral Tab

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions:
1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 6/12/2024
Action: Patient not taking

Calcium Carbonate 500 MG Oral Chew Tab

Discontinued by: Clark, Trika L, Pharmacy Technician
Discontinued on: 1/9/2025
Reason for discontinuation: Discontinued by patient
Instructions: Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 1/9/2025

Cholecalciferol 1000 units Oral Tab

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/20/2019
End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA
Entered on: 9/4/2019

atorvastatin 20 MG Oral Tablet

11/07/2019 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Medication List (continued)

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/16/2020
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/4/2019
Start date: 9/4/2019
End date: 9/16/2020
Quantity: 45 tablet
Refill: 3 refills by 9/3/2020

timolol 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 1/13/2020
Instructions: One drop in each eye twice daily. Block tear duct for 1-2 minutes after use.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/4/2019
Start date: 9/4/2019
End date: 1/13/2020
Quantity: 10 mL
Refill: No refills remaining

pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/16/2020
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/4/2019
Start date: 9/4/2019
End date: 9/16/2020
Quantity: 90 tablet
Refill: 6 refills by 9/3/2020

ACETAMINOPHEN-CODEINE 300-30 MG Oral Tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 11/12/2019
Reason for discontinuation: Reorder
Instructions: TAKE ONE TABLET BY MOUTH DAILY AS NEEDED ARTHRITIC PAIN AS NEEDED
Authorized by: Terry, Anne Catherine, ARNP
Ordered on: 9/26/2019
Start date: 9/26/2019
End date: 11/9/2019
Quantity: 30 tablet
Refill: No refills remaining

cephalexin (KEFLEX) 500 MG Oral Capsule

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 5/5/2021
Reason for discontinuation: Reorder
Instructions: Take 1 capsule (500 mg) by mouth 4 times a day for 7 days. For 7 days.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/23/2019
Start date: 10/23/2019
End date: 5/5/2021
Quantity: 28 capsule
Refill: No refills remaining

PHYSICAL THERAPY PLAN OF CARE REVIEW

Certification From*: 11/07/19 Certification To*: 01/06/20
Date of Symptom Onset*: 07/23/19
Start of Care Date*: 09/03/19

VISITS FROM SOC: 7

INTERPRETER STATUS (Not needed, Telephonic, In Person):not needed

Referring Provider: Phelan, E
Attending Physician: Phelan, E
Falls Doctor: Phelan, E
PCP: Neighbor Jr., William E, MD
Diagnosis: (R26.89) Imbalance (primary encounter diagnosis)

(R29.898) Leg weakness, bilateral

(W19.XXXD) Fall, subsequent encounter

PRECAUTIONS: Fall risk

Mechanism of Injury: falls
Was previously living at home with her son, with a h/o DVTs, HTN, venous insufficiency, chronic leg ulcers, osteoporosis who was hospitalized at Harborview Medical Center from 7/25/2019 until 8/5/2019 with pelvic fx, right RF and hemo-pneumothorax secondary to GLF. Was then at SNF at Kline Galland for PT/OT

Pertinent Medical/Surgical History/Current Medications that may affect progress in PT:

Patient Active Problem List

Diagnosis

- Sensorineural hearing loss, unspecified
- DVT, recurrent, lower extremity, chronic (HCC)
- Other and unspecified hyperlipidemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Unspecified vitamin B deficiency
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- Hip joint stiffness
- Leg weakness, bilateral
- Weakness of trunk musculature
- History of recurrent deep vein thrombosis (DVT)
- Thrombocytopenia (HCC)
- Imbalance
- Primary osteoarthritis of both hips
- Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)
- Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer and inflammation, left (HCC)
- Cellulitis of left leg
- Venous ulcer of left leg (HCC)
- Homeless
- Normocytic anemia
- Severe protein-calorie malnutrition (HCC)
- Urge urinary incontinence
- Vitamin D deficiency

11/07/2019 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Diabetic ulcer of lower extremity (HCC)
- Housing lack
- Suspected elder abuse
- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer, bilateral (HCC)
- Bilateral leg edema
- Closed displaced fracture of left pubis with routine healing
- Acute blood loss anaemia
- Closed fracture of multiple ribs of left side with routine healing
- Hemopneumothorax
- Fall

SUBJECTIVE:
Time In: 1009 late arrival

Patient's Statement: **I can do some standing without the walker - my legs hurt from my wounds. I have not done a lot of my exercises because I have been canning food that I do not want to waste; I start at 8:30 in the morning and go all day.**

OBJECTIVE MEASURES / IMPAIRMENTS / ACTIVITY LIMITATIONS:
Pain: 5-20/10 legs from wounds
Gait speed 10 meters in 17.43 seconds with 4 wheeled walker = 0.57 meters per second

TREATMENT & EDUCATION:

Intervention: 97530 Therapeutic activities for 26 minutes

Plan of care review per above, goals section, current level of function section. Progress and goal status reviewed with patient/family. Physical Therapy recommendations and needs for further Physical Therapy were also discussed with patient/family.

Home Exercise Program
From falls clinic:
Home Safety Checklist
CDC 4 points to prevent falls
How to get up from floor

From Physical Therapy:
Balance exercises at least 2 times per week: 5 reps each

Partial squats with 4 wheeled walker/chair
Weight shifts/opposite heel lifts with 4 wheeled walker/chair 10 second hold
Seated gastroc belt stretch 60 second holds x 2 twice daily
National Institute on Aging dvd
8 points limits of stability walker/chair
Stepping in all directions holding support

verbal instructions and demonstrations were provided for the above exercises
a handout was provided describing the exercises in written and picture format

ASSESSMENT (Progress and need for continued skilled intervention):
Patient returns to Physical Therapy for visit number: 7

Patient demonstrates the following response to treatment and functional improvements since initiating Physical Therapy evaluation and treatment: Jeane has not made significant changes toward her fall prevention Physical Therapy goals just yet. She continues to be limited by the pain in her bilateral legs reported to be due to her wounds. She does demonstrate excellent effort and motivation during Physical Therapy appointments but does state she has not been doing her home exercises at the recommended frequency. We plan to have her continue Physical Therapy to learn the full pre-tai chi balance/fall prevention exercise program and we can give her additional time to advance her functional status due to her leg pain.

Patient would benefit from progression to program to reach Physical Therapy goals.

Outcomes Score: CareConnections: Functional Index Score 41/50

PLAN:
Plan for next visit:
Review program
Progression:
turning steps
Self balance challenges

Therapy Treatment Plan (*Frequency/Duration/Other Follow up*): Patient will be seen for 2 visits per month until plan of care reviewed.

To improve impairments and reach functional goals the following interventions will be performed: Patient Education, Therapeutic Exercise (97110), Therapeutic Activities (97530), Neuromuscular Re-education (97112) and Gait Training (97116)

TREATMENT GOALS
Anticipated Discharge Date 3/2/20

LONG TERM GOALS (Functional Goals)	To be met by Discharge	Current Level of Function / Participation Restrictions 11/7/2019
Patient's risk of future falls and risk for falls will be reduced, as demonstrated by:		

11/07/2019 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

5 time sit to stand in 15 seconds for independence in sit to stand transitional movement without the use of arms for rising to stand		11/7/2019 Patient currently performs 0 chair sit to stands UE support
TUG of no more than 22 seconds with assistive device for adequate balance to perform sit to stand, walking and turning below fall risk cut off		11/7/2019 Patient currently completes the TUG in 50.06 seconds with 4 wheeled walker
Single leg stance time of 6.5 seconds to allow weight shift for safe stepping up on curb or stair climbing		11/7/2019 Patient currently performs single leg stance for 0 seconds
Gait Speed of 1 meters per second to to cross street safely		11/7/2019 Patient's current gait speed is 0.57 with 4 wheeled walker assistive device
Functional reach of 7.4 inches for adequate balance to get dressed independently		9/3/19 Patient's current functional reach test is 7 inches
Number of falls is reduced to 0 in 3 consecutive months to decrease risk of injury from falls.		11/7/2019 Patient currently reports last fall was 7/23/19 with fractures/injury
Patient reports 2-3 x week x 6 month participation in home based or community based balance training program with moderate challenge to demonstrate sustainability required to decrease fall risk		11/7/2019 Patient currently reports some participation in lower extremity strengthening and balance home exercise program.

Short Term Goals	To be met by	MET or UNMET / Date
Patient will demonstrate ability to properly weight shift to right/left lower extremity to progress toward single leg balance in future to reduce fall risk	10/3/19	10/10/2019 met
Patient will shift weight to 8 points limits of stability using ankle strategy to reduce loss of balance/falls during static standing activities	10/3/19	10/10/2019 met
Patient and son will verbalize understanding that current modified 4 wheeled walker is not safe for being pushed on	9/3/2019 met	9/3/19 met - as of 10/10/2019, they will be getting a wheelchair for safe transport

11/07/2019 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

or for walking as it has been adjusted by son		
Patient will be able to use momentum to assist with powering up for sit to stand to decrease need to use bilateral upper extremity support to stand	10/3/19	10/10/2019 met for proper mechanics with bilateral upper extremity support
Patient will be able to step in all directions and turn without loss of balance to reduce fall risk during dynamic stepping daily activities in home/community	11/9/19 Extended to 12/7/19	11/7/2019 in progress
Patient will be able to take appropriate recovery steps forward, lateral, backward to be able to catch self in case of loss of balance to avoid a fall	12/7/19	

Patient assisted in establishing goals and Patient agrees with plan.

Pain will be addressed at the next plan of care review, and intermittently during daily visits as deemed appropriate by the provider. The focus of daily visits will be on function.

Patient's learning needs, abilities, preferences and readiness per Initial POC were considered in this session. Learning verified by teach back.

Ordered on: 9/4/2019
Start date: 9/4/2019
End date: 9/16/2020
Quantity: 90 tablet
Refill: 6 refills by 9/3/2020

ACETAMINOPHEN-CODEINE 300-30 MG Oral Tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 11/12/2019
Reason for discontinuation: Reorder
Instructions: TAKE ONE TABLET BY MOUTH DAILY AS NEEDED ARTHRITIC PAIN AS NEEDED
Authorized by: Terry, Anne Catherine, ARNP
Ordered on: 9/26/2019
Start date: 9/26/2019
End date: 11/9/2019
Quantity: 30 tablet
Refill: No refills remaining

cephalexin (KEFLEX) 500 MG Oral Capsule

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 5/5/2021
Reason for discontinuation: Reorder
Instructions: Take 1 capsule (500 mg) by mouth 4 times a day for 7 days. For 7 days.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/23/2019
Start date: 10/23/2019
End date: 5/5/2021
Quantity: 28 capsule
Refill: No refills remaining

PHYSICAL THERAPY TREATMENT NOTE

Certification From*: 09/03/19
Certification To*: 11/02/19

Date of Symptom Onset*: 07/23/19

Start of Care Date*: 09/03/19

VISITS FROM SOC: 6
INTERPRETER STATUS (Not needed, Telephonic, In Person):not needed
Referring Provider: Phelan, E
Attending Physician: Phelan, E
Falls Doctor: Phelan, E
PCP: Neighbor Jr., William E, MD
Diagnosis: (R26.89) Imbalance (primary encounter diagnosis)

(R29.898) Leg weakness, bilateral

(W19.XXXD) Fall, subsequent encounter

PRECAUTIONS: Fall risk

Mechanism of Injury: falls
Was previously living at home with her son, with a h/o DVTs, HTN, venous insufficiency, chronic leg ulcers, osteoporosis who was hospitalized at Harborview Medical Center from 7/25/2019 until 8/5/2019 with pelvic fx, right RF and hemo-pneumothorax secondary to GLF. Was then at SNF at Kline Galland for PT/OT

Pertinent Medical/Surgical History/Current Medications that may affect progress in PT:

Patient Active Problem List

Diagnosis

- Sensorineural hearing loss, unspecified
- DVT, recurrent, lower extremity, chronic (HCC)
- Other and unspecified hyperlipidemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Unspecified vitamin B deficiency
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- Hip joint stiffness
- Leg weakness, bilateral
- Weakness of trunk musculature
- History of recurrent deep vein thrombosis (DVT)
- Thrombocytopenia (HCC)
- Imbalance
- Primary osteoarthritis of both hips
- Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)
- Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer and inflammation, left (HCC)
- Cellulitis of left leg
- Venous ulcer of left leg (HCC)
- Homeless
- Normocytic anemia

- Severe protein-calorie malnutrition (HCC)
- Urge urinary incontinence
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Diabetic ulcer of lower extremity (HCC)
- Housing lack
- Suspected elder abuse
- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer, bilateral (HCC)
- Bilateral leg edema
- Closed displaced fracture of left pubis with routine healing
- Acute blood loss anaemia
- Closed fracture of multiple ribs of left side with routine healing
- Hemopneumothorax
- Fall

SUBJECTIVE:
Patient's Statement: I was sitting on my 4 wheeled walker on the bus yesterday and it went around a corner really fast and I fell; I hit my head a little; denies nausea/vomiting; denies loss of conciousness states she was a little dizzy for short period afterward. Went to church and sat for 2 hours and it was really hard to stand afterward- too long sitting. I did walk from the car to the church. Did see doctor yesterday after fall on bus.

Time in: 0834

OBJECTIVE MEASURES/IMPAIRMENTS:
10/10/2019:
Gait speed 10 meter walk in 14.67 seconds with 4 wheeled walker
Bilateral shoulder flexion AROM = 140 without pain right shoulder

9/26/19:
Able to reach behind in seated to push with right upper extremity to stand
Able to perform AAROM flexion when instructed for right shoulder
Stood 20 minutes consecutive before sitting to rest, then got back up to do more therapy exercises
Min assist to CGA for sit to/from stand

TREATMENT/SKILLED INTERVENTION & EDUCATION:
Intervention 1: 97112 Neuromuscular re-education for 30 minutes

Review program: Verbal/tactile/demo cues provided; use of mirror for further feedback/training
Weight shifts/opposite heel lifts with 4 wheeled walker/chair 10 second hold; holding support (used // bars today)
Limits of stability 8 points walker/chair (used // bars today)
Mechanics for sit to/from stand

Progression: Verbal/tactile/demo cues provided; use of mirror for further feedback/training
Stepping in 6 directions and turning with 4 wheeled walker and in // bars

HOME EXERCISE PROGRAM (HEP):
From falls clinic:

Home Safety Checklist
CDC 4 points to prevent falls
How to get up from floor

From Physical Therapy:
Balance exercises at least 2 times per week: 5 reps each
Partial squats with 4 wheeled walker/chair
Weight shifts/opposite heel lifts with 4 wheeled walker/chair 10 second hold
Seated gastroc belt stretch 60 second holds x 2 twice daily
National Institute on Aging dvd
8 points limits of stability walker/chair
Stepping in all directions holding support

verbal instructions and demonstrations were provided for the above exercises
a handout was provided describing the exercises in written and picture format

Assessment / Patient Response to Therapy:
Current Status in Physical Therapy/response to intervention above: I continue to review with patient/family that they would benefit from a transport wheelchair as patient has now fallen twice during this course of Physical Therapy when using the 4 wheeled walker like a wheelchair which it is not intended for.

Patient will benefit from progression to program to reach Physical Therapy goals. Jeane did well with progression to dynamic balance stepping in all directions; may need 2 upper extremity support for backward stepping (can use 4 wheeled walker for this) otherwise she plans to use the bar she has at home for support.

Plan for next visit:
Review program
Progression:
turning steps
Self balance challenges

TREATMENT GOALS
Anticipated Discharge Date 3/2/20

LONG TERM GOALS (Functional Goals) **Patient's risk of future falls and risk for falls will be reduced, as demonstrated by:**	**To be met by Discharge**	**Current Level of Function / Participation Restrictions 9/3/2019**
5 time sit to stand in 15 seconds for independence in sit to stand transitional movement without the use of arms for rising to stand		Patient currently performs 0 chair sit to stands UE support
TUG of no more than 22 seconds with assistive device for adequate balance to perform sit to stand, walking and turning below fall risk cut off		Patient currently completes the TUG in 39.27 seconds with 4 wheeled walker
Single leg stance time of 6.5 seconds to allow weight shift for safe stepping up on curb or stair climbing		Patient currently performs single leg stance for 0 seconds

10/24/2019 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

Gait Speed of 1 meters per second to to cross street safely		Patient's current gait speed is 0.63 with 4 wheeled walker assistive device
Functional reach of 7.4 inches for adequate balance to get dressed independently		Patient's current functional reach test is 7 inches
Number of falls is reduced to 0 in 3 consecutive months to decrease risk of injury from falls.		Patient currently reports last fall was 7/23/19 with fractures/injury
Patient reports 2-3 x week x 6 month participation in home based or community based balance training program with moderate challenge to demonstrate sustainability required to decrease fall risk		Patient currently reports some participation in lower extremity strengthening home exercise program.

Short Term Goals	To be met by	MET or UNMET / Date
Patient will demonstrate ability to properly weight shift to right/left lower extremity to progress toward single leg balance in future to reduce fall risk	10/3/19	10/10/2019 met
Patient will shift weight to 8 points limits of stability using ankle strategy to reduce loss of balance/falls during static standing activities	10/3/19	10/10/2019 met
Patient and son will verbalize understanding that current modified 4 wheeled walker is not safe for being pushed on or for walking as it has been adjusted by son	9/3/2019 met	9/3/19 met - as of 10/10/2019, they will be getting a wheelchair for safe transport
Patient will be able to use momentum to assist with powering up for sit to stand to decrease need to use bilateral upper extremity support to stand	10/3/19	10/10/2019 met for proper mechanics with bilateral upper extremity support
Patient will be able to step in all directions and turn without loss of balance to reduce fall risk during dynamic stepping daily activities in home/community	11/9/19	
Patient will be able to take appropriate recovery steps	12/9/19	

10/24/2019 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

forward, lateral, backward to be able to catch self in case of loss of balance to avoid a fall		

PLAN:
Continue per treatment plan of care.
Pain will be addressed at the next plan of care review, and intermittently during daily visits as deemed appropriate by the provider. The focus of daily visits will be on function

Patient's learning needs, abilities, preferences and readiness per Initial POC were considered in this session.
Learning verified by teach back.

Today's Visit

You saw Kristina M Cosley, PT on Thursday October 24, 2019. The following issues were addressed: Imbalance; Leg weakness, bilateral; and Fall, subsequent encounter.

What's Next

NOV 7 2019 — Return with Kristina M Cosley, PT
Thursday November 7 9:45 AM
Harborview Medical Center Outpatient Physical Therapy Clinic
908 Jefferson ST
Seattle WA 98104
206-744-1675

NOV 18 2019 — Return Patient Appointment with Nilufer B Norsworthy, MD
Monday November 18 10:00 AM
Northwest Hospital Wound Care & Hyperbaric Center
1560 N 115TH STREET, STE 201
SEATTLE WA 98133-8414
206-668-1244

DEC 3 2019 — Return Patient Appointment with Elizabeth A Phelan, MD
Tuesday December 3 10:40 AM (Arrive by 10:25 AM)
Harborview Falls Clinic
325 9TH Ave
Box 359945
Seattle WA 98104

After Visit Summary (continued)

Your Medication List as of October 24, 2019 9:11 AM

ⓘ If you have any questions, ask your nurse or doctor.

acetaminophen 500 MG Tablet	1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
acetaminophen-codeine 300-30 MG Tablet	TAKE ONE TABLET BY MOUTH DAILY AS NEEDED ARTHRITIC PAIN AS NEEDED
Acidophilus 0.5 MG Tablet	Take 1 tablet by mouth 2 times a day.
atorvastatin 20 MG Tablet	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Calcium Carbonate 500 MG Tablet Chewable	Chew and swallow 2 tablets by mouth 3 times a day as needed for indigestion/heartburn.
cephalexin 500 MG Capsule Commonly known as: KEFLEX	Take 1 capsule (500 mg) by mouth 4 times a day for 7 days. For 7 days.
Cholecalciferol 1000 units Tablet	Take 2 tablets (2,000 Units) by mouth daily.
MULTIPLE VITAMIN OR	Take by mouth.
pentoxifylline ER 400 MG Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.
timolol 0.5 % Solution	One drop in each eye twice daily. Block tear duct for 1-2 minutes after use.

Active at the End of Visit

Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 10/13/2021
Instructions: Take 1 tablet by mouth 2 times a day.
Entered by: Ong, Thuan Duc, MD — Entered on: 6/7/2018
End date: 10/13/2021

acetaminophen 500 MG Oral Tab

Discontinued by: Van Hoff, Linda A, ARNP — Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions:
1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
Entered by: Taylor, Zoe Judith Mildred, MD — Entered on: 8/20/2019
Start date: 8/5/2019 — End date: 6/12/2024
Action: Patient not taking

Calcium Carbonate 500 MG Oral Chew Tab

Discontinued by: Clark, Trika L, Pharmacy Technician — Discontinued on: 1/9/2025
Reason for discontinuation: Discontinued by patient
Instructions: Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.
Entered by: Taylor, Zoe Judith Mildred, MD — Entered on: 8/20/2019
Start date: 8/5/2019 — End date: 1/9/2025

Cholecalciferol 1000 units Oral Tab

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.
Entered by: Taylor, Zoe Judith Mildred, MD — Entered on: 8/20/2019
Start date: 8/20/2019 — End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA — Entered on: 9/4/2019
