Occupational Therapy Note

Patient Name: Jeanne Leonie Hoffman
MRN: U8170135
Total Treatment time: 40 Minutes

Home Living:
Type of Home: Homeless
Lives With: Son
Lives with Comments: Jeanne's son, Louis, is the primary caregiver for Jeanne
Assistance Available at Home : 24 hour assistance
Mobility Equipment Owned: Front wheeled walker, Other (transport chair)
Home Living Comments: Jeanne and her son were evicted from their apartment in Oct 2024 and was living in a hotel until Dec 2024. They now live in a tent on Bainbridge Island

Prior Level of Function:
BADLs: Requires assist
IADLs: Requires assist
Functional Mobility: Requires assist
Leisure and Hobbies: travel
Details of previous level of function: per PT note (son not present during eval & pt unable to report) - patient was limited mobility within tent. she was using FWW or SPC for short distances and then transport/wheelchair for community distances. she would occ need assistance wtih getting on/off the cot and for ADLs. Although Louis is a good historian, it can be difficult at times to get a understandable timeline of her fxnal mobility.

Upper Extremities:
RUE Assessment: Within Functional Limits
RUE Assessment Comments: generalized weakness/deconditioning ~4-/5

LUE Assessment: Within Functional Limits
LUE Assessment Comments: generalized weakness/deconditioning ~4-/5

01/09/2025 - ED to Hosp-Admission (Discharged) in UWMC MONTLAKE TOWER 7SA (continued)

Flowsheets (group 13 of 16) (continued)

Hand Function:

Coordination: Movements are Fluid and Coordinated: No
Coordination and Movement Description: had some difficulty coordinating items in her hands

Sensation:

Proprioception:

Vision: Vision Comments: wears glasses

Perception:

Cognition: Overall Cognitive Status: Impaired
Cognition Comments: hard to assess due to profound hearing loss, able to comprehend information best from reading from whiteboard but does not always answer questions directly; at times responds with unrelated information

Subjective: "I just turned 100!"

Current Level of Function

Grooming/Oral Hygiene: Position- sitting;Maximum Assist (between 50-74% help needed),

Dependent (greater than 75% help needed);Position-sitting
required assist to clean and rinse dentures; once handed dentures, she was able to put them back in herself with just a little bit of help to orient them in the correct direction/position prior to putting them in. while sitting at EOB, used mouthwash to rinse; had difficulty maintaining balance while also holding mouthwash and bringing to mouth - needed assist to hold basin under mouth

Upper Body Dressing: Maximum Assist (between 50-74% help needed)

Footwear Dressing: Dependent (greater than 75% help needed)
donning sock on R foot

Toileting: Dependent (greater than 75% help needed)
total assist for clean up of minor incontinence at bed level

Therapeutic Interventions

Functional Transfers

Bed Mobility: Supine>Sit: Maximum Assist (between 50-74% help needed);Cues needed
Sit>Supine: Dependent (greater than 75% help needed);Cues needed
Scooting: Dependent (greater than 75% help needed)

,

Balance:

Sitting:

Static: Minimum Assist (less than 25% help needed)
dangling at EOB; able to maintain midline with light hands on assist once scooted

Dynamic: to further edge of bed. limited tolerance of R knee flexion due to pain and limited AROM of R knee at baseline; tolerated sitting at EOB better with RLE propped up on chair; kyphotic posture, relies on arms to maintain balance
Dependent (greater than 75% help needed)
unable to correct posture when beginning to lean backwards or laterally out of COG; requires total assist to return to midline and recover stability

,

ADL/IADL Comments: edu on OT role & POC; pt requires extra time to communicate as she is profoundly hard of hearing and does best understanding when information is written on whiteboard for her to read; she answered questions mostly with head nods yes/no and short few word sentences

Assessment

Assessment: Jeanne presents well below baseline with significant weakness, frailty, and deconditioning s/p recent L AKA & subsequent PPM placement. She required heavy physical assist to move from laying to sitting up at edge of bed and ultimately was only able to tolerate sitting up for about 6-7 minutes. After AKA, she relied heavily on her arms for stability when sitting up and is therefore currently not able to maintain new PPM precautions. She needed a lot of assistance to maintain her sitting balance at edge of bed today. She was also limited by pain with majority of movements and was unable to tolerate sitting with her right knee bent due to chronic joint stiffness from previous surgical repair in 2021. She ultimately requires near total assist for majority of cares at this time.

Session Tolerance: Patient limited by fatigue, Patient limited by pain

Plan

Plan: Skilled OT
Treatment Interventions: Self-care/Home management, Caregiver education/training, Therapeutic exercise, Therapeutic activities
Frequency: 2-3x/week
Coverage for Next Shift: progress EOB dangle & core/postural control activities, seated grooming/sitting tolerance

Discharge Recommendations

Recommendations: Will need follow up OT at next level of care
Barriers to Discharge: heavy care needs
Assistance with: ADLs, Functional mobility and transfers, Home safety, IADLs
Supervision with:

Equipment TBD pending dispo plan

PT Therapeutic Activity Time Minute(s)	—	—	—	55 [N6]	—
PT Therapeutic Activity 1	—	—	—	Bed mobility - supine>Sit ModA for LEs, heavy cues for hand placement. pt declined log roll technique, preferring to sit up into long sitting. sit>supine dependent 2/2 LOC/syncopal episode at EOB [N6]	—
PT Therapeutic Activity 2	—	—	—	Sitting tolerance - Jeanne sat at EOB for 15-20 minutes w/close SBA to MinA to maintain upright posture. Intermittent retropulsion w/Min to ModA to correct; pt reaching with UEs to maintain balance. Frequent monitoring of vitals - HR brady but stable, BP WNL - until pt demostrated syncopal episode/LOC and was returned to supine quickly with RN assessment. Jeanne quickly responded, RN monitoring vitals. [N6]	—
PT Therapeutic Activity 3	—	—	—	Provided pt and son some amputation education re: process of fitting for prosthesis, phantom sensations, possibly fxnal mobility. Aimed to provide them with realistic expectations for post-AKA rehab. They will benefit from further education and handouts re: amputation care [N6]	—
PT Therapeutic Activity 4	—	—	—	Additonal time needed for lengthy discussion with Jeanne and Louis regarding her PLOF and past experiences with PT. Louis is a good	—

				advocate for his mother's medical care and has had a lot of experience with working with her on exercises at home [N6]	
PT Impairments	—	—	—	Decreased strength;Decreased range of motion;Decreased endurance;Impaired balance;Decreased mobility;Impaired hearing;Impaired sensation;Difficulty ambulating;Orthopedic restrictions;Pain [N6]	—
PT Assessment	—	—	—	Jeanne presents with decreased activity tolerance, generalized weakness, impaired sitting balance, h/o falls, bradycardia at rest, and significantly HOH. At her baseline, she is able to amb short distances with walker or cane and uses a w/c (transport chair) for community distances. Her son is her primary caregiver and provides a fluctuating amount of assistance. They are also currently homeless, living in a tent on Bainbridge Island. Today, Jeanne required 50-100% assist for bed mobility and was able to sit at EOB for 15-20 minutes with intermittent assistance. She did have a syncopal/LOC episode while at EOB and was returned to supine w/RN assistance. Her HR continued to be low but stable throughout the session. Provided some education regarding AKA and treating amputation	—

Flowsheets (group 14 of 16) (continued)

				including mobility progression and phantom sensations. They will benefit from on-going education. Jeanne's son, Louis, has made it clear that he does not want his mother to discharge to a SNF for sub-acute therapies, although this would the PT recommendation for dispo after today's session. Since Jeanne and Louis are currently homeless, this makes receiving HHPT extremely challenging. [N6]

	to do PT but extra time was needed for communication and for her son's questions and concerns. She tolerated in bed LE exercises and stretches with written handouts given to her son and ques via a white dry erase communication board to the patient. Her son deferred transfer training for now due to concerns about her R UE IV and not wanting it to dislodge. Will continue to follow and progress as able.	demonstrated fair tolerance of therapeutic exercise today, including hip extensor stretching, sitting balance activites and 2 trials of standing on R LE. Limited due to fatigue (activity only stimulated minimal interaction, son states that often she is more alert). Also limited due to weakness, decreased ROM, pain. Anticipate prolonged rehabilitation course. [N4]	for a bed level exercise that she was able to complete with help from her son. Pt able to dangle EOB with mod-max A and then attempt a partial stand with total 2 person assistance. Pt declined second stand and urgently laid backwards on bed, dependent to return to supine and reposition. Education provided to pts son on goal of SNF, post op amputee expectations (if she is a prosthesis candidate she will not obtain one for months to years), and that SNF is for temporary rehab to prepare her and Louis for home. Pt is making progress compared to eval, but cognition and communication with pt are barriers to progress in addition to comborbidities, nutrition, etc	TIS adjustment and to continue with mobility interventions. She requires Max cues and redirection to not use L UE throughout session, pt's son provides physical assist also breaking PPM precautions -re-educated and redirected during session. She is unable to sustain EOB sitting w/o L UE on bed rail during session and demonstrates posterior LOBs to supine multiple times. After use of OHL to chair, pt fitted to TIS, son educated on use of chair, features, and tilt back schedule. Will continue to follow. Recommend d/c setting that is w/c accessible, assist for all mobility, and ongoing therapies. [N5]	demonstrate impaired cognition but is able to follow simple commands. Provided education on several exercises she can perform on her own with her son. She needs heavy assistance for rolling in the bed, lift utilized to get her to her personal transport chair, which at this time is not supportive enough with new amputation and her hospital aquired weakness -ordered rental tilt in space wheelchair for pt.

Note Text

Occupational Therapy Note

Patient Name: Jeanne Leonie Hoffman
MRN: U8170135
Total Treatment time: 11 Minutes

Subjective: Not responding to therapist eyes closed. "We just got her back into bed from sitting at the Edge of the bed." -Son

Current Level of Function

Therapeutic Interventions

ADL/IADL Comments: Dependent positioning in bed, patient listing to the L. Patient requires dependent assistance to get centered in the bed and boosted up.

Assessment

Assessment: Jeanne was hard to arouse this afternoon, per son they had just been sitting at the EOB. She required dependent assistance to be boosted up in bed and recentered. Patient did not wake to movements. OT notified nursing that the patient is currently A&O x0

Session Tolerance: Patient limited by fatigue, Patient limited by pain

Plan

Plan: Skilled OT
Treatment Interventions: Self-care/Home management, Caregiver education/training, Therapeutic exercise, Therapeutic activities
Frequency: 2-3x/week
Coverage for Next Shift: progress EOB dangle & core/postural control activities, seated grooming/sitting tolerance

Discharge Recommendations

Recommendations: Will need follow up OT at next level of care
Barriers to Discharge: heavy care needs
Assistance with: ADLs, Functional mobility and transfers, Home safety, IADLs
Supervision with:

Equipment Recommended: TBD pending dispo plan

Goals

1. Goal: Self feeding, Grooming, Set up or clean up assistance
   Estimated Completion Date: 01/29/25
   Goal Status: Progressing

2. Goal: Bed mobility, Minimum Assist (less than 25% help needed)
   Estimated Completion Date: 01/29/25
   Goal Status: Progressing

3. Goal: Toileting, Toilet transfer, Moderate Assist (between 25-49% help needed)
   Estimated Completion Date: 01/29/25
   Goal Status: Progressing

4. Goal: Jeanne will dangle at EOB x15 mins with SBA to complete grooming & hygiene tasks.

Estimated Completion Date: 01/29/25
Goal Status: Progressing

5.

Tiffany M Schramm, OT

Note Text

Occupational Therapy Note

Patient Name: Jeanne Leonie Hoffman
MRN: U8170135
Total Treatment time: 40 Minutes

Home Living:
Type of Home: Homeless
Lives With: Son
Lives with Comments: Jeanne's son, Louis, is the primary caregiver for Jeanne
Assistance Available at Home : 24 hour assistance
Mobility Equipment Owned: Front wheeled walker, Other (transport chair)
Home Living Comments: Jeanne and her son were evicted from their apartment in Oct 2024 and was living in a hotel until Dec 2024. They now live in a tent on Bainbridge Island

Prior Level of Function:
BADLs: Requires assist
IADLs: Requires assist
Functional Mobility: Requires assist
Leisure and Hobbies: travel
Details of previous level of function: per PT note (son not present during eval & pt unable to report) - patient was limited mobility within tent. she was using FWW or SPC for short distances and then transport/wheelchair for community distances. she would occ need assistance wtih getting on/off the cot and for ADLs. Although Louis is a good historian, it can be difficult at times to get a understandable timeline of her fxnal mobility.

Upper Extremities:
RUE Assessment: Within Functional Limits
RUE Assessment Comments: generalized weakness/deconditioning ~4-/5

LUE Assessment: Within Functional Limits
LUE Assessment Comments: generalized weakness/deconditioning ~4-/5

Hand Function:

Coordination:
Movements are Fluid and Coordinated: No
Coordination and Movement Description: had some difficulty coordinating items in her hands

Sensation:

01/09/2025 - ED to Hosp-Admission (Discharged) in UWMC MONTLAKE TOWER 7SA (continued)

Flowsheets (group 14 of 16) (continued)

Proprioception:
Vision: Vision Comments: wears glasses
Perception:
Cognition: Overall Cognitive Status: Impaired
Cognition Comments: hard to assess due to profound hearing loss, able to comprehend information best from reading from whiteboard but does not always answer questions directly; at times responds with unrelated information

Subjective: "I just turned 100!"

Current Level of Function

Grooming/Oral Hygiene: Position- sitting;Maximum Assist (between 50-74% help needed),

Dependent (greater than 75% help needed);Position-sitting
required assist to clean and rinse dentures; once handed dentures, she was able to put them back in herself with just a little bit of help to orient them in the correct direction/position prior to putting them in. while sitting at EOB, used mouthwash to rinse; had difficulty maintaining balance while also holding mouthwash and bringing to mouth - needed assist to hold basin under mouth

Upper Body Dressing: Maximum Assist (between 50-74% help needed)

Footwear Dressing: Dependent (greater than 75% help needed)
donning sock on R foot

Toileting: Dependent (greater than 75% help needed)
total assist for clean up of minor incontinence at bed level

Therapeutic Interventions

Functional Transfers

Bed Mobility: Supine>Sit: Maximum Assist (between 50-74% help needed);Cues needed
Sit>Supine: Dependent (greater than 75% help needed);Cues needed
Scooting: Dependent (greater than 75% help needed)

,
Balance:
Sitting:
Static: Minimum Assist (less than 25% help needed)
dangling at EOB; able to maintain midline with light hands on assist once scooted
Dynamic: to further edge of bed. limited tolerance of R knee flexion due to pain and limited AROM of

01/09/2025 - ED to Hosp-Admission (Discharged) in UWMC MONTLAKE TOWER 7SA (continued)

Flowsheets (group 14 of 16) (continued)

R knee at baseline; tolerated sitting at EOB better with RLE propped up on chair; kyphotic posture, relies on arms to maintain balance
Dependent (greater than 75% help needed)
unable to correct posture when beginning to lean backwards or laterally out of COG; requires total assist to return to midline and recover stability

,

ADL/IADL Comments: edu on OT role & POC; pt requires extra time to communicate as she is profoundly hard of hearing and does best understanding when information is written on whiteboard for her to read; she answered questions mostly with head nods yes/no and short few word sentences

Assessment

Assessment: Jeanne presents well below baseline with significant weakness, frailty, and deconditioning s/p recent L AKA & subsequent PPM placement. She required heavy physical assist to move from laying to sitting up at edge of bed and ultimately was only able to tolerate sitting up for about 6-7 minutes. After AKA, she relied heavily on her arms for stability when sitting up and is therefore currently not able to maintain new PPM precautions. She needed a lot of assistance to maintain her sitting balance at edge of bed today. She was also limited by pain with majority of movements and was unable to tolerate sitting with her right knee bent due to chronic joint stiffness from previous surgical repair in 2021. She ultimately requires near total assist for majority of cares at this time.

Session Tolerance: Patient limited by fatigue, Patient limited by pain

Plan

Plan: Skilled OT
Treatment Interventions: Self-care/Home management, Caregiver education/training, Therapeutic exercise, Therapeutic activities
Frequency: 2-3x/week
Coverage for Next Shift: progress EOB dangle & core/postural control activities, seated grooming/sitting tolerance

Discharge Recommendations

Recommendations: Will need follow up OT at next level of care
Barriers to Discharge: heavy care needs
Assistance with: ADLs, Functional mobility and transfers, Home safety, IADLs
Supervision with:

Equipment Recommended: TBD pending dispo plan

Physical Therapy Evaluation

Jeanne Leonie Hoffman
U8170135

3/5/2025
Duration of session: 40 Minutes

Patient Active Problem List

Diagnosis

- Sensorineural hearing loss, unspecified
- Hypercholesterolemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- History of recurrent deep vein thrombosis (DVT)

- Imbalance
- Primary osteoarthritis of both hips
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Primary open angle glaucoma (POAG) of both eyes
- Closed fracture of distal end of femur, unspecified fracture morphology, sequela
- Community acquired bacterial pneumonia
- Reduced vision
- Housing instability
- Advanced care planning/counseling discussion
- Acute lower limb ischemia
- Bradycardia
- Abdominal pain

Past Medical History:

Diagnosis	Date
• Closed fracture of right distal femur (HCC)	7/15/2021
• Fall	9/3/2019
• Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)	5/26/2019
• Venous stasis ulcer (HCC)	5/26/2019
• Diabetic ulcer of lower extremity (HCC)	9/24/2018
• Severe protein-calorie malnutrition (HCC)	6/7/2018
• Urge urinary incontinence	6/7/2018
• Venous ulcer of left leg (HCC)	6/7/2018
• Normocytic anemia	6/7/2018
• Chronic venous hypertension with ulcer and inflammation, left (HCC)	5/17/2018
• Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)	5/17/2018
• Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)	5/17/2018
• Thrombocytopenia (HCC)	11/2/2016
• Leg weakness, bilateral	1/6/2015
• Weakness of trunk musculature	1/6/2015
• Vertebral fracture *Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed*	12/13/2012
• Thyroid nodule, uninodular *CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent*	12/13/2012

was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.

- Closed fracture of unspecified intracapsular section of neck of femur 5/1/2007
  Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.
- Unspecified vitamin B deficiency 5/1/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency
- Impaired fasting glucose 3/22/2007
- Carpal tunnel syndrome 11/20/2006
  Carpal tunnel release right wrist in 1989
- DIAPHRAGMATIC HERNIA 11/20/2006
  CT of abdomen in 2006
- Esophageal reflux 11/20/2006
- Other convulsions 11/20/2006
  Petit Mal since 1975 Carbamazepine level 7.6 on Feb 2007 Discontinued based on ER neuro consult in early 2013 No recurrence
- Allergic rhinitis, cause unspecified 11/20/2006
- DVT, recurrent, lower extremity, chronic 11/20/2006
  Recurrent DVT and phlebitis since 1982 Per Vascular Surgery note 5/9/2006: continue warfarin 3/9/2010 Lower extremity arterial vascular ultrasound studies normal
- Diabetes mellitus (HCC)
- PAD (peripheral artery disease) (HCC)
- Ulcer of left lower extremity, limited to breakdown of skin (HCC)
  Chronic, Multiple sites of lower leg and ankle, with MSSA

Past Surgical History:

Procedure	Laterality	Date
• PR TOTAL ABDOMINAL HYSTERECT W/WO RMVL TUBE OVARY		

01/09/2025 - ED to Hosp-Admission (Discharged) in UWMC MONTLAKE TOWER 7SA (continued)

Flowsheets (group 14 of 16) (continued)

Subjective
Patient Report/Self-Assessment: n bed resting, asking if she will be in a coffin, if they will dig a hole, letting me know she pee'd
Patient Stated Goal(s): None stated

Objective
RUE Assessment
RUE Assessment: Exceptions to WFL
RUE Assessment Comments: able to bring hand to mouth, good grip during hand shake, limited hand opening

LUE Assessment
LUE Assessment: Exceptions to WFL
LUE Assessment Comments: able to bring hand to mouth

RLE Assessment
RLE Assessment: Exceptions to WFL
RLE Assessment Comments: antigravity strength

LLE Assessment
LLE Assessment: Exceptions to WFL
LLE Assessment Comments: limited assessment

Sensation
Light Touch: unable to assess

Coordination
Movements are Fluid and Coordinated : No

Static Sitting Balance
Static Sitting Balance Level of Assistance: Dependent (greater than 75% help needed)
Dynamic Sitting Balance
Dynamic Sitting Balance Level of Assistance: Dependent (greater than 75% help needed)

Activity Tolerance
Endurance: Tolerates less than 10 min of activity, no significant change in vital signs

Functional Level:
Bed Mobility
Rolling Left: Dependent (greater than 75% help needed)
Rolling Right: Dependent (greater than 75% help needed)
Supine to Sit: Dependent (greater than 75% help needed)
Sit to Supine: Dependent (greater than 75% help needed)
Transfers
Bed<>Chair/WC: Dependent (greater than 75% help needed)
Bed<>Chair/WC Assistive Device Details: Mechanical lift
Chair/WC<>Bed: Dependent (greater than 75% help needed)
Bed<>Chair/WC Assistive Device Details: Mechanical lift

Interventions:
Therex: provided pt's son with AKA exercise packet - reports he has been attempting these ex's when pt allows - son reports not being able to get into prone to perform hip ext ex's = addressed by having pt be in sidelying as they were taught in previous sessions to perform hip ext ex's
Theract: supine > sit with dependent assist, elevated HOB, assist for initiation sitting EOB x 3 mins - dependent assist, without support > posterior LOB. sits in flexed, kyphotic posture, sacral sitting sit > supine with dependent assist, scooting up in bed with two person dependent assist

ASSESSMENT/PLAN

Jeanne presents to PT at a dependent level for all functional mobility. When sitting EOB she requires continuous dependent assist to prevent posterior LOB. She demonstated she was able to hold my hands and maintain upright postion briefly unitl UEs fatigued and then began to lose balance. She is not able to turn or scoot up in bed without dependent assist. She attempts to communicate but is difficult to understand. Most comments today centered on how her body will be cared for after she dies. She was too fatigued to participate in active LE ex's today so we deferred until next session. Son is well versed in her LE ex's and will assist when pt is agreeable as well. Pt's son focused on a future in where pt will be able to work on standing and walking with crutches.

Barriers to Discharge: pt dependent for all mobility

Discharge Equipment: TBD, unclear discharge disposition

Goals:
Goal: Home exercise program, Moderate Assist (between 25-49% help needed)
Estimated Completion Date: 03/14/25
Goal Status: Progressing
Goal: Bed mobility, Moderate Assist (between 25-49% help needed)
Estimated Completion Date: 03/14/25
Goal Status: Not Progressing

Acute Care PT Plan of Care:
Treatment/Interventions: Patient/family training, Therapeutic functional activities, Therapeutic exercise
PT Plan: Skilled PT
PT Dosage: 1-2x/week
Plan for Next Session: LE ther ex, sitting EOB

Other Recommendations:
Recommendation for PT After Hospital Discharge: Will need follow up PT at next level of care
PT Daily Recommendations: 2PA - OOB to chair via sling 3x/day

Physical Therapy Treatment

Jeanne Leonie Hoffman
U8170135

2/6/2025
Duration of session: 54 Minutes

Subjective
Patient Report/Self-Assessment: Pt opening eyes to loud voice, otherwise generally maintaining eyes closed

Home Living
Home Living Comments: Jeanne and her son were evicted from their apartment in Oct 2024 and was living in a hotel until Dec 2024. They now live in a tent on Bainbridge Island
Type of Home: Homeless
Lives With: Son
Lives with Comments: Lives in tent with flooring and heating

Assistance Available at Home : 24 hour assistance
Mobility Equipment Owned: Front wheeled walker, Other (Transport chair)

Functional Level:
Bed Mobility
Supine to Sit: Maximum Assist (between 50-74% help needed)
Transfers
Sit<>Stand: Dependent (greater than 75% help needed)

Interventions:
Therex: sling transfer from TIS chair back to bed positioned in supine, flat, L hip gently stretched into neutral then slight extension, light pressure, myofacial release type of stm. Trial of bridging with R UE in hooklying. Manual cues for hip exetnsion during bridge, pt not able to carryout the activity pt assisted to sitting, provided with gentle lumbar thoracic stretch in sitting. Pt able to breifly maintain upright sitting, easier with pressure thru R knee to. Gentle stretch for hip, knee flexion prior to trial of stand. two trials of sit to stand with R shoe on, blocking R foot. 2 person dependent transfer into standing for 10 seconds X 2. Assisted to supine for rest after standing. Additional time spent for therapeutic rest, caregiver questions.
Theract:
Balance/Neuro Re-ed:
Gait Training:

ASSESSMENT/PLAN

Jeanne Hoffman demonstrated fair tolerance of therapeutic exercise today, including hip extensor stretching, sitting balance activites and 2 trials of standing on R LE. Limited due to fatigue (activity only stimulated minimal interaction, son states that often she is more alert). Also limited due to weakness, decreased ROM, pain. Anticipate prolonged rehabilitation course.

Barriers to Discharge: Currently dependent for all cares, pt family does not have proper training/equipment to manage her care at home at this time

Discharge Equipment: TBD, unclear discharge disposition

Goals:
Goal: Bed mobility, Contact guard assist (touching/steadying assistance)
Estimated Completion Date: 01/31/25
Goal Status: Progressing

Goal: Transfer with AD, Contact guard assist (touching/steadying assistance)
Estimated Completion Date: 01/31/25
Goal Status: Not Progressing
Goal: Sit unsupported for (30 min)
Estimated Completion Date: 01/31/25
Goal Status: Progressing
Goal: Pt will be able to tolerate sitting in her w/c for > 30 minutes
Estimated Completion Date: 01/24/25
Goal Status: Progressing

PT Plan of Care:
Treatment/Interventions: Therapeutic exercise, Therapeutic functional activities
PT Plan: Skilled PT
PT Dosage: 2-3x/week
Plan for Next Session: postural control, caregiver training, therex PROM, Stump shrinker when ready.

Other Recommendations:
Recommendation for further PT: Will need follow up PT at next level of care
PT Daily Recommendations: Sling to chair 3 X day. Allow oppotunities for L hip to stretch into extension in supine to limit contracture risk.

Matthew P Gaines, PT

Physical Therapy Treatment

Jeanne Leonie Hoffman
U8170135

1/23/2025
Duration of session: 31 Minutes

Subjective
Patient Report/Self-Assessment: Continually attempts to mobilize to EOB
Patient Stated Goal(s): none stated, per son to received prothesis

Home Living
Home Living Comments: Jeanne and her son were evicted from their apartment in Oct 2024 and was living in a hotel until Dec 2024. They now live in a tent on Bainbridge Island

Type of Home: Homeless
Lives With: Son
Lives with Comments: Jeanne's son, Louis, is the primary caregiver for Jeanne
Assistance Available at Home : 24 hour assistance
Mobility Equipment Owned: Front wheeled walker, Other (Transport chair)

Functional Level:
Bed Mobility
Rolling Left: Maximum Assist (between 50-74% help needed)
Rolling Right: Maximum Assist (between 50-74% help needed)
Supine to Sit: Minimum Assist (less than 25% help needed);Moderate Assist (between 25-49% help needed);Head of Bed Elevated;Railings used;Cues needed
Sit to Supine: Supervision / Stand by assistance (posterior LOB to bed after writer redirects pt not to use L UEon rail)
Transfers
Bed<>Chair/WC: Dependent (greater than 75% help needed);Assistive device used
Bed<>Chair/WC Assistive Device Details: Mechanical lift

Wheelchair Activities
Wheelchair Activities: Yes
WC Type: Manual tilt-n-space
WC Size: 16"
WC Cushion: roho
WC Pressure Relief: dependent - son educated on Q15 tilt backs for 1-2 min
Level of Assistance for Pressure Relief: Dependent (greater than 75% help needed)
Wheelchair Comments: pt's son dependently moves pt on unit after session

Interventions:
Therex:
Theract: rolling L and R max A 2/2 poor command follow, donning of sling supine <> sit x5 sttempts in session spontaneously, manual removal of L arm from bed rail 2/2 precautions > posterior LOB d/t poor upright trunk positioning/control education on progression of mobility, therapeutic rest breaks 2/2 dizziness education to son about timeline of prosthetic, d/c recommendations
Balance/Neuro Re-ed:
Gait Training:

PT Wheelchair Management Activity Time Minute(s): 16
PT Wheelchair Management Activity 1: TIS adjustment of head rest, arm rests; Roho apporpriately inflated, leg rest requires no adjustment at this point in time
PT Wheelchair Management Activity 2: educated pt's son on tilt back ad scheduling of tilt back - educated that w/c adjustments are by staff only

ASSESSMENT/PLAN

Pt seen this PM for TIS adjustment and to continue with mobility interventions. She requires Max cues and redirection to not use L UE throughout session, pt's son provides physical assist also breaking PPM precautions -re-educated and redirected during session. She is unable to sustain EOB sitting w/o L UE on bed rail during session and demonstrates posterior LOBs to supine multiple times. After use of OHL to chair, pt fitted to TIS, son educated on use of chair, features, and tilt back schedule. Will continue to follow. Recommend d/c setting that is w/c accessible, assist for all mobility, and ongoing therapies.

Increased time required for educating pt's son- demonstrates min readiness to learn at this point in time. Able to follow cues from therapist intermittently to adhere to pt safety/precautions, educated on: expectations with adjustment of TIS, how to provide physical assist to pt, use of nursing staff for dangling EOB and for use of OHL. Pt endorses knowing all information acute PT has provided thus far.

Barriers to Discharge: Currently dependent for all cares, pt family does not have proper training/equipment to manage her care at home at this time

Discharge Equipment: TBD, unclear discharge disposition

Goals:
Goal: Bed mobility, Contact guard assist (touching/steadying assistance)

Physical Therapy Evaluation

Jeanne Leonie Hoffman
U8170135

1/10/2025
Duration of session: 71 Minutes

Patient Active Problem List

Diagnosis

- Sensorineural hearing loss, unspecified
- Hypercholesterolemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- History of recurrent deep vein thrombosis (DVT)
- Imbalance
- Primary osteoarthritis of both hips
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Primary open angle glaucoma (POAG) of both eyes
- Closed fracture of distal end of femur, unspecified fracture morphology, sequela
- Community acquired bacterial pneumonia
- Reduced vision
- Housing instability
- Advanced care planning/counseling discussion
- Acute lower limb ischemia
- Bradycardia

  Chronic, Multiple sites of lower leg and ankle, with MSSA

Past Surgical History:

Procedure	Laterality	Date
• PR TOTAL ABDOMINAL HYSTERECT W/WO RMVL TUBE OVARY		

Subjective
Patient Report/Self-Assessment: Pt supine in bed, agreeable to work with PT. Pt's son, Louis, provided majority of her recent medical and social history since Jeanne's significantly HOH. Communicates the best with writing large letters on white board and speaking very loudly and clearly.
Patient Stated Goal(s): "When can I start walking again?"

Home Living
Home Living Comments: Jeanne and her son were evicted from their apartment in Oct 2024 and was living in a hotel until Dec 2024. They now live in a tent on Bainbridge Island
Type of Home: Homeless
Lives With: Son
Lives with Comments: Jeanne's son, Louis, is the primary caregiver for Jeanne
Assistance Available at Home : 24 hour assistance
Mobility Equipment Owned: Front wheeled walker;Other (Transport chair)

Prior Level of Function : limited mobility within tent. she was using FWW or SPC for short distances and then transport/wheelchair for community distances. she would occ need assistance wtih getting on/off the cot and for ADLs. Although Louis is a good historian, it can be difficult at times to get a understandable timeline of her fxnal mobility.

Objective
RUE Assessment
RUE Assessment: Within Functional Limits

LUE Assessment
LUE Assessment: Within Functional Limits

RLE Assessment
RLE Assessment: Within Functional Limits
RLE Assessment Comments: her R knee can have limited AROM 2/2 pain and stiffness from a femoral fx repair in 2021

LLE Assessment
LLE Assessment: Exceptions to WFL
LLE Assessment Comments: AKA. limited assessment of L hip AROM 2/2 pain/soreness

Sensation
Light Touch: WFL

Static Sitting Balance
Static Sitting Balance Comments: sitting at EOB w/o back support, no foot support. intermittent retropulsion
Static Sitting Balance Level of Assistance: Minimum Assist (less than 25% help needed)
Dynamic Sitting Balance

Dynamic Sitting Balance Comments: scooting forward, pulling on mattress or bed rail w/BUE
Dynamic Sitting Balance Level of Assistance: Contact guard assist (touching/steadying assistance)
Static Standing Balance
Static Standing Balance Comments: deferred standing at this time

Activity Tolerance
Endurance: Tolerates 30 min of activity with multiple rests
Endurance Comments: bradycardia throughout session; stable BP

Functional Level:
Bed Mobility
Rolling Left: Maximum Assist (between 50-74% help needed)
Rolling Right: Maximum Assist (between 50-74% help needed)
Supine to Sit: Moderate Assist (between 25-49% help needed);Head of Bed Elevated;Cues needed
Sit to Supine: Dependent (greater than 75% help needed)
Scooting: Dependent (greater than 75% help needed)

Interventions:

Theract: Bed mobility - supine>Sit ModA for LEs, heavy cues for hand placement. pt declined log roll technique, preferring to sit up into long sitting. sit>supine dependent 2/2 LOC/syncopal episode at EOB Sitting tolerance - Jeanne sat at EOB for 15-20 minutes w/close SBA to MinA to maintain upright posture. Intermittent retropulsion w/Min to ModA to correct; pt reaching with UEs to maintain balance. Frequent monitoring of vitals - HR brady but stable, BP WNL - until pt demostrated syncopal episode/LOC and was returned to supine quickly with RN assessment. Jeanne quickly responded, RN monitoring vitals. Provided pt and son some amputation education re: process of fitting for prosthesis, phantom sensations, possibly fxnal mobility. Aimed to provide them with realistic expectations for post-AKA rehab. They will benefit from further education and handouts re: amputation care Additonal time needed for lengthy discussion with Jeanne and Louis regarding her PLOF and past experiences with PT. Louis is a good advocate for his mother's medical care and has had a lot of experience with working with her on exercises at home

ASSESSMENT/PLAN

Jeanne presents with decreased activity tolerance, generalized weakness, impaired sitting balance, h/o falls, bradycardia at rest, and significantly HOH. At her baseline, she is able to amb short distances with walker or cane and uses a w/c (transport chair) for community distances. Her son is her primary caregiver and provides a fluctuating amount of assistance. They are also currently homeless, living in a tent on Bainbridge Island. Today, Jeanne required 50-100% assist for bed mobility and was able to sit at EOB for 15-20 minutes with intermittent assistance. She did have a syncopal/LOC episode while at EOB and was returned to supine w/RN assistance. Her HR continued to be low but stable throughout the session. Provided some education regarding AKA and treating amputation including mobility progression and phantom sensations. They will benefit from on-going education. Jeanne's son, Louis, has made it clear that he does not want his mother to discharge to a SNF for sub-acute therapies, although this would the

PT recommendation for dispo after today's session. Since Jeanne and Louis are currently homeless, this makes receiving HHPT extremely challenging.

Barriers to Discharge: unable to safely ambulate or transfer OOB 2/2 bradycardia

Discharge Equipment: TBD; pt has FWW and transport chair

Goals:
Goal: Bed mobility, Contact guard assist (touching/steadying assistance)
Estimated Completion Date: 01/24/25
Goal Status: Progressing
Goal: Transfer with AD, Contact guard assist (touching/steadying assistance)
Estimated Completion Date: 01/24/25
Goal Status: Progressing
Goal: Amb with AD, Contact guard assist (touching/steadying assistance) (> 15 feet)
Estimated Completion Date: 01/24/25
Goal Status: Progressing
Goal: Pt will be able to tolerate sitting in her w/c for > 30 minutes
Estimated Completion Date: 01/24/25
Goal Status: Not Progressing

PT Plan of Care:
Treatment/Interventions: Therapeutic exercise, Therapeutic functional activities
PT Plan: Skilled PT
PT Dosage: 2-3x/week
Plan for Next Session: dangle at EOB; transfer training w/FWW (have pt wear shoe on R foot); pivot transfer to chair; ongoing amputation education

Other Recommendations:
Recommendation for further PT: Will need follow up PT at next level of care
PT Daily Recommendations: 1-2 person assist for dangle at EOB or ceiling lift transfer to chair

Brooke M Munton-Spray, PT

Note Text

Son requested to speak with RT, had lengthy conversation expressing his concerns about his mothers condition. Requested RT to assess for NG tube and IV placement. RT stated this is not within my scope of practice and he should discuss this with the team during rounds. Patient's son stated he would like to take his mother to a different facility where they could place NG tube. Advised that HHFM is a barrier to transport and we can work towards transitioning to a different O2 device.

Chest Assessment	Symmetrical
Bilateral Breath Sounds	Diminished;Crackles

RT at bedside for rapid response and place pt on HF mask for desaturation and observed WOB. Breath sounds crackles/diminished with wheezing on right side. Duoneb and hypertonic saline given. NTS ordered PRN. RT will continue to follow and assist.

Patient/Caregiver Training	ST communicated Patient agitation (moaning) and refusal of oral care and P-O trial to RN and Medical Team.	SLP ordered mouth moisturizer from materials management. Also, requested trial of humidified air via face tent to MD.	—	—	—
Assessment	Pt seen for swallow tx with no family present at bedside. Family currently not wanting to pursue alternative means of nutrition/hydration with focus on Patient taking small amounts of P-O. During today's swallow follow up, Pt moaning and at times crying out in bed and refusing ST attempts to initiate oral care even with encouragement of ST by writing on white board and offering Patient soft oral swab. Patient observed to cough intermittently on saliva. RN reports Patient coughing on P-O trials this morning. Intermittent coarse coughing noted during ST visit this am, c/f aspiration. Given pt/family GOC, recommend continue oral care and offering small amounts minced and moist diet and thin liquids when	Pt seen for swallow tx with Louis present. Louis is concerned regarding Jeanne's dry mouth r/t mouth breathing. SLP ordered mouth moisturizer and recommended trial of face tent for humidification. SLP also trialed ice cream bar with Jeanne. (Intended to trial a popsicle, but unwrapping revealed a chocolate dipped vanilla bar). Jeanne was very motivated and engaged, and actually held and self-fed the bar. Intermittent coarse coughing noted, c/f aspiration. Given pt/family GOC, recommend continue minced and moist diet and thin liquids. Please provide careful 1:1 feeding vs supervision, adhere to strict aspiration precautions and d/c PO w/ inadequate alertness/mentation.	Pt seen for swallow tx w/ supportive son present. Given pt's age and waxing/waning mentation, anticipate some degree of ongoing aspiration risk w/ any PO intake. This was discussed w/ pt's son, who states that he does not want an NGT placed and that he is accepting of aspiration risk. Given pt/family GOC, recommend a minced and moist diet (son's request) and thin liquids. Please provide careful 1:1 feeding vs supervision, adhere to strict aspiration precautions and d/c PO w/ inadequate alertness/mentation. [N1]	Jeanne presents with diminished swallowing function today with new oral inattention, overt s/sx aspiration with limited PO trials, and generalized weakness. Her new difficulty is concurrent with recent changes in mentation consistent with hyperactive delirium. Overall, she presents with very high risk for aspiration and given her worsening CXR, advanced age, and high risk for complications should aspiration occur, agree with RN and primary team recommendation to continue NPO as Jeanne's goals evolve. Should Jeanne's mental status rapidly improve to be consistent with previous assessment (e.g., following instructions, able to	she had no overt s/sx of aspiration across numerous trials. Given prior assessment,pt cue her to take small, single sips, which she was able to do without issue. she appears ok to continue current diet given supervision/assist and adherence to aspiration precautions. [N2]

	no overt s/s aspiration with puree or graham cracker, no significant oral residuals [N3]
Patient/Caregiver Training	SLP education provided regarding patients current swallow function [N3]
Assessment	Jeanne was seen for initial swallow evaluation with intermittent cough response with large sips of thin liquids. This is likely consistent with presbyphagia, or chronic dysphagia which is common in patients of advanced age. She has had no respiratory issues and current assessment is consistent with SLP eval 11/2023. Her baseline diet is soft solids due to ill-fitting dentures. Recommend soft and bite size textures and thin liquids via small single sips. meds whole in puree. SLP will continue to follow. [N3]

Nursing Annotation	—	Right before I administered the Dilaudid dose he was imitating the sounds of her moaning/wailing and calling her a "cry baby"	0430 pt showing signs of pain/discomfort. Son not agreeable to Dilaudid or Ativan. Son insistent that he wants her awake to talk to him. Pt's son repeatedly yelling in the patient's face asking her if she knows who he is. Pt's son told the charge nurse that he isn't just her son, he is also her doctor. Provider notified.	—	—

Note Text

Speech Language Pathology Progress

Patient Name: Jeanne Leonie Hoffman
MRN: U8170135
Date of Service: 01/27/25
Treatment Duration: 21 Minutes (swallow tx)

Subjective

Patient Report/Self-Assessment: RN cleared SLP for entry. Pt is alert on arrival, appears restless. Supportive son at bedside.

Patient Stated Goal: Per son, to resume PO intake and avoid NGT placement

Prior Function
Prior Function: Patient was seen by SLP november 2023: "She demonstrated mild oral deficits and 1 cough that was not repeated with further trials of thin liquids (silent aspiration cannot be ruled out at bedside). Unclear if mild dysphagia vs presbyphagia related changes complicated by ill fitting dentures and recent thrush. Given her performance, recommend thin liquids and soft and bite sized solids (son assisting to self select softer solids as needed" She reports she mainly eats puree and soft solids at baseline. Son endorses coughing with thin liquids when laying in bed, but not when in chair/at table
IADLs: Requires assist

Objective
Patient Information
Temperature: Afebrile
Respiratory Status: Room air
Behavior/Cognition: Alert;Impulsive;Distractible;No command following
Patient Positioning: Upright in bed

Consistencies Assessed: 1-Slightly Thick (Ensure)

0-Thin Liquids - Presentation: Spoon

Consistencies Assessed Comment: pt declined a majority of PO trials by shaking her head
Oral Phase: Other;Spillage Right (difficulty achieving intra-oral pressure for straw use)
Pharyngeal Phase: Other (laryngeal elevation present)
Signs/Symptoms of Penetration/Aspiration: None (note that silent aspiration cannot be excluded at bedside)

Flowsheets (group 15 of 16) (continued)

Oral Mechanism Examination
Dentition: Adequate with dentures
Oral mucosa: Dry

ASSESSMENT/PLAN

Pt seen for swallow tx w/ supportive son present. Given pt's age and waxing/waning mentation, anticipate some degree of ongoing aspiration risk w/ any PO intake. This was discussed w/ pt's son, who states that he does not want an NGT placed and that he is accepting of aspiration risk. Given pt/family GOC, recommend a minced and moist diet (son's request) and thin liquids. Please provide careful 1:1 feeding vs supervision, adhere to strict aspiration precautions and d/c PO w/ inadequate alertness/mentation.

Dysphagia: Other (?presbyphagia + superimposed acute dysphagia i/s/o delirium)
Aspiration Risk: Moderate;High (likely iso waxing/waning mentation)

Impact on Function: Risk for respiratory complications;Risk for not meeting oral nutrition
Confounding Factors: Delirium
Prognosis: Fair

Evaluation/Treatment Tolerance: Patient tolerated treatment well

Plan
SLP Plan: Skilled SLP
Treatment/Interventions: Swallow treatment;Patient/family education

SLP Frequency: 1-3x/week

Discharge Recommendations
No follow up SLP indicated

Daily Recommendations
Swallow Recommendations
Diet Recommendations: 5-Minced and moist;0-Thin liquids (per pt/family GOC)
Medication Administration Recommendations: Meds whole/halved in puree;Meds crushed in puree
Oral care: Frequency: 5-6x per day;Oral swab and suction;Suction toothbrush/toothette
Aspiration Precautions: As upright as medically possible for all oral intake;1:1 supervision/assistance;Fully alert for all PO intake;Small bites;Small sips;Slow rate;One sip at a time;1:1 feeding;Upright for 30 minutes after eating

Goals
Short Term Goal: Tolerate least restrictive diet
Estimated Completion Date: 02/22/25
Goal Status: Progressing

Patient/caregiver will participate in education regarding: Dysphagia
Estimated Completion Date: 02/22/25
Goal Status: Progressing

Speech Language Pathology Progress

Patient Name: Jeanne Leonie Hoffman
MRN: U8170135
Date of Service: 01/16/25
Treatment Duration: 20 Minutes (swallow tx)

Subjective

Patient Report/Self-Assessment: Provider requested swallow re-assessment 2/2 c/f aspiration. On arrival, pt is alert, responsive to simple questions/directions via written communication 2/2 hearing loss.
Patient Stated Goal: None stated

Prior Function

Prior Function: Patient was seen by SLP novemebr 2023: "She demonstrated mild oral deficits and 1 cough that was not repeated with further trials of thin liquids (silent aspiration cannot be ruled out at bedside). Unclear if mild dysphagia vs presbyphagia related changes complicated by ill fitting dentures and recent thrush. Given her performance, recommend thin liquids and soft and bite sized solids (son assisting to self select softer solids as needed" She reports she mainly eats puree and soft solids at baseline. Son endorses coughing with thin liquids when laying in bed, but not when in chair/at table
IADLs: Requires assist
Leisure and Hobbies: travel

Objective

Patient Information
Temperature: Afebrile
Respiratory Status: Room air
Behavior/Cognition: Alert;Participates well (utilized white board to write questions/directions/information- pt responded verbally or w/ head shake yes/no)
Patient Positioning: Upright in bed

Consistencies Assessed: 0-Thin Liquids;4-Pureed;Soft solids;Hard solids

0-Thin Liquids - Presentation: Straw

4 Pureed - Presentation : Spoon;Self Fed
Soft Solids - Presentation: Spoon
Hard Solid - Presentation: Self Fed

01/09/2025 - ED to Hosp-Admission (Discharged) in UWMC MONTLAKE TOWER 7SA (continued)

Flowsheets (group 15 of 16) (continued)

Oral Phase: Prolonged mastication (w/ hard solids suspected; oral residue w/ hard solids- cleared w/ liquid rinse)
Pharyngeal Phase: Other (laryngeal elevation present)
Signs/Symptoms of Penetration/Aspiration: None (note that silent aspiration cannot be excluded at bedside)

01/09/2025 - ED to Hosp-Admission (Discharged) in UWMC MONTLAKE TOWER 7SA (continued)

Flowsheets (group 15 of 16) (continued)

Flowsheets (group 15 of 16) (continued)

01/09/2025 - ED to Hosp-Admission (Discharged) in UWMC MONTLAKE TOWER 7SA (continued)

Flowsheets (group 15 of 16) (continued)

Oral Mechanism Examination
Dentition: Adequate with dentures
Oral mucosa: Dry
Observations: Consistent w/ prior CNE

ASSESSMENT/PLAN

Pt seen for swallow tx w/ no overt s/sx of aspiration across numerous trials though mastication of hard solids continues to appear prolonged w/ incomplete oral clearance. Given prior assessment, pt cue her to take small, single sips, which she was able to do without issue. Given stable respiratory status, Jeanne appears ok to continue current

diet given supervision/assist 2/2 delirium and adherence to aspiration precautions. SLP to continue to follow.

Dysphagia: Other (?presbyphagia)
Aspiration Risk: Low;Moderate (pending mentation)

Impact on Function: Risk for respiratory complications;Risk for not meeting oral nutrition
Confounding Factors: delirium
Prognosis: Good

Evaluation/Treatment Tolerance: Patient tolerated treatment well

Plan
SLP Plan: Skilled SLP
Treatment/Interventions: Swallow treatment;Patient/family education
SLP Frequency: 1-3x/week

Discharge Recommendations
No follow up SLP indicated

Daily Recommendations
Swallow Recommendations
Diet Recommendations: 6-Soft and bite-sized;0-Thin liquids
Medication Administration Recommendations: Meds whole/halved in puree;Meds crushed in puree
Oral care: Frequency: 2-3x per day;Toothbrush and toothpaste
Aspiration Precautions: As upright as medically possible for all oral intake;1:1 supervision/assistance;Fully alert for all PO intake;Small bites;Small sips;Slow rate;One sip at a time

Goals
Short Term Goal: Tolerate least restrictive diet
Estimated Completion Date: 01/24/25
Goal Status: Progressing

Patient/caregiver will participate in education regarding: Dysphagia
Estimated Completion Date: 01/24/25
Goal Status: Progressing

Speech Language Pathology Eval

Patient Name: Jeanne Leonie Hoffman
MRN: U8170135
Date of Service: 01/10/25
Treatment Duration: 20 Minutes (sw eval)

Subjective

Patient Report/Self-Assessment: pt. awake and alert, sitting upright in bed
Patient Stated Goal: to eat/drink

Prior Function

Prior Function: Patient was seen by SLP novemebr 2023: "She demonstrated mild oral deficits and 1 cough that was not repeated with further trials of thin liquids (silent aspiration cannot be ruled out at bedside). Unclear if mild dysphagia vs presbyphagia related changes complicated by ill fitting dentures and recent thrush. Given her performance, recommend thin liquids and soft and bite sized solids (son assisting to self select softer solids as needed" She reports she mainly eats puree and soft solids at baseline. Son endorses coughing with thin liquids when laying in bed, but not when in chair/at table

Objective

Patient Information
Respiratory Status: Room air
Behavior/Cognition: Alert;Participates well
Patient Positioning: Upright in bed

Consistencies Assessed: 0-Thin Liquids;4-Pureed;Soft solids

0-Thin Liquids - Presentation: Straw;Self Fed (with assist)

4 Pureed - Presentation : Spoon;Self Fed
Soft Solids - Presentation: Self Fed

Consistencies Assessed Comment: Patient with intermittent coughing on thin liquids, specifically with larger sips of water. When cued to take slow/small sips, she was able to take water without coughing. no overt s/s aspiration with puree or graham cracker, no significant oral residuals

01/09/2025 - ED to Hosp-Admission (Discharged) in UWMC MONTLAKE TOWER 7SA (continued)

Vocal Quality: Within Functional Limits

ASSESSMENT/PLAN

Jeanne was seen for initial swallow evaluation with intermittent cough response with large sips of thin liquids. This is likely consistent with presbyphagia, or chronic dysphagia which is common in patients of advanced age. She has had no respiratory issues and current assessment is consistent with SLP eval 11/2023. Her baseline diet is soft solids due to ill-fitting dentures. Recommend soft and bite size textures and thin liquids via small single sips. meds whole in puree. SLP will continue to follow.

Aspiration Risk: Moderate

Impact on Function: Risk for respiratory complications;Risk for not meeting oral nutrition
Confounding Factors: presbyphagia
Prognosis: Good

Evaluation/Treatment Tolerance: Patient tolerated treatment well

Plan
SLP Plan: Skilled SLP

Note Text

Patient Summary
100 year old female with a PMH notable for HTN, T2DM, HLD, prior DVT, PAD who initially presented to the hospital on 1/9/25 with acute limb ischemia, now s/p L AKA. Course complicated by post-operative bradycardia and new

intermittent Mobitz II heart block requiring temporary TVP, now s/p PPM 1/13. Ready for transfer to acute care as of 1/14.

Came into room after hearing pt.coughing from hallway. Pt. Son stated he gave pt. water. Pt was slumped down low in bed and appeared restless trying to get out of bed. Coughing but not clearing secretions. Readjusted pt. and raised HOB. Provider notified, CXR done at bedside. O2 dropped down into 80s temporarily, pt. Appeared more distressed and mouthing "help me." attempted to suction and apply supplemental O2. Pt. Resisted suctioning and oxygen. Rapid response called. Labs drawn by Stat RN. 500 bolus given per order. pt. NPO pending speech eval. Pt. Respiratory distress resolved, resting comfortable on RA.

Care Plan

Active

Problem: Friction/Shear

Dates: Start: 03/08/25
Disciplines: Interdisciplinary

Goal: Maintain skin integrity or prevent further skin breakdown related to friction/shear

Dates: Start: 03/08/25
Disciplines: Interdisciplinary

Problem: Impaired Nutrition

Dates: Start: 03/08/25
Disciplines: Interdisciplinary

Goal: Maintain skin integrity or prevent further skin breakdown related to impaired nutrition

Dates: Start: 03/08/25
Disciplines: Interdisciplinary

Problem: Impaired Sensory/Perception/Mobility/Activity

Dates: Start: 03/08/25
Disciplines: Interdisciplinary

Goal: Maintain skin integrity or prevent further skin breakdown related to impaired sensory/perception/mobility/activity

Dates: Start: 03/08/25
Disciplines: Interdisciplinary

Problem: Moisture/Incontinence

Dates: Start: 03/08/25
Disciplines: Interdisciplinary

Goal: Maintain skin integrity or prevent further skin breakdown related to moisture/incontinence

Dates: Start: 03/08/25
Disciplines: Interdisciplinary

Resolved

Problem: Activity Intolerance

Dates: Start: 01/10/25 Resolved: 03/08/25
Disciplines: Nurse, Interdisciplinary

Goal: Remains free of arrhythmia events (Resolved)

Dates: Start: 01/10/25 Expected End: 03/06/25 Resolved: 03/08/25

01/09/2025 - ED to Hosp-Admission (Discharged) in UWMC MONTLAKE TOWER 7SA (continued)

Care Plan (continued)

Description: INTERVENTIONS:
1. Monitor patient hemodynamics
2. Monitor cardiac rhythm
3. Monitor daily weight
4. Monitor for bleeding
5. Monitor for infection at surgical site
6. Monitor for CV signs/symptoms
7. Monitor output/response to diuretic medications
8. Monitor I&O
9. Assess need for IV access daily and remove as soon as possible
10. Identify IV meds that can transition to PO
11. Replace electrolytes
12. Strict I&O
13. Educate pt/family re: CV illness & treatment

Disciplines: Interdisciplinary

Goal: Does not become short of breath with activity (Resolved)

Dates: Start: 01/10/25 Expected End: 03/06/25 Resolved: 03/08/25

Description:
INTERVENTIONS:
1. Monitor patient hemodynamics
2. Monitor cardiac rhythm
3. Monitor daily weight
4. Monitor for bleeding
5. Monitor for infection at surgical site
6. Monitor for CV signs/symptoms
7. Monitor output/response to diuretic medications
8. Monitor I&O
9. Assess need for IV access daily and remove as soon as possible
10. Identify IV meds that can transition to PO
11. Replace electrolytes
12. Strict I&O
13. Educate pt/family re: CV illness & treatment

Disciplines: Interdisciplinary

Care Plan (continued)

01/10/25 0634	Sande, Nathan R, RN	Progressing

Goal Note filed on 01/27/25 1406 by Wylie, Ariana, Nursing Student

Patient tachypneic with exertion/activity, returns to baseline without intervention

Goal Note filed on 01/26/25 1654 by Wylie, Ariana, Nursing Student

Improved with fluids,

Problem: Aspiration Risk

Dates: Start: 01/30/25 Resolved: 03/08/25
Disciplines: Interdisciplinary

Goal: No S/S of Aspiration (Resolved)

Dates: Start: 01/30/25 Expected End: 03/06/25 Resolved: 03/08/25
Description: INTERVENTIONS
1. Monitor: Oral intake
2. Assess for aspiration
3. Assess cough
4. Assess enteral tube placement
5. Communicate: dietitian
6. Consider consult with SLS
7. Enteral tube feeding management
8. Assist with feeding
9. Maintain HOB elevation
10. Provide oral care
11. Protocol: Tube feeding

Disciplines: Interdisciplinary

Goal: Free of side effects from meds for adequate cardiac output (Resolved)

Dates: Start: 01/10/25 Expected End: 03/06/25 Resolved: 03/08/25

Description:
INTERVENTIONS:
1. Monitor patient hemodynamics
2. Monitor cardiac rhythm
3. Monitor daily weight
4. Monitor for bleeding
5. Monitor for infection at surgical site
6. Monitor for CV signs/symptoms
7. Monitor output/response to diuretic medications
8. Monitor I&O
9. Assess need for IV access daily and remove as soon as possible
10. Identify IV meds that can transition to PO
11. Replace electrolytes
12. Strict I&O
13. Educate pt/family re: CV illness & treatment

Disciplines: Interdisciplinary

Problem: Deficient/excessive Fluid Volume

Dates: Start: 01/10/25 Resolved: 03/08/25
Disciplines: Nurse, Interdisciplinary

Goal: Exhibits warm, dry skin, eupnea w/absence pulmonary crackles (Resolved)

Dates: Start: 01/10/25 Expected End: 03/06/25 Resolved: 03/08/25
Description: INTERVENTIONS:
1. Monitor patient hemodynamics
2. Monitor cardiac rhythm
3. Monitor daily weight
4. Monitor for bleeding
5. Monitor for infection at surgical site
6. Monitor for CV signs/symptoms
7. Monitor output/response to diuretic medications
8. Monitor I&O
9. Assess need for IV access daily and remove as soon as possible
10. Identify IV meds that can transition to PO
11. Replace electrolytes
12. Strict I&O
13. Educate pt/family re: CV illness & treatment

Disciplines: Interdisciplinary

01/09/2025 - ED to Hosp-Admission (Discharged) in UWMC MONTLAKE TOWER 7SA (continued)

Care Plan (continued)

Goal Note filed on 01/27/25 1406 by Wylie, Ariana, Nursing Student

Extremities cool, dry. No crackles. Increased WOB with activity

Goal: Remains free of arrhythmia events (Resolved)

Dates: Start: 01/10/25 Expected End: 03/06/25 Resolved: 03/08/25

Description: INTERVENTIONS:
1. Monitor patient hemodynamics
2. Monitor cardiac rhythm
3. Monitor daily weight
4. Monitor for bleeding
5. Monitor for infection at surgical site
6. Monitor for CV signs/symptoms
7. Monitor output/response to diuretic medications
8. Monitor I&O
9. Assess need for IV access daily and remove as soon as possible

Goal Note filed on 01/27/25 1406 by Wylie, Ariana, Nursing Student

Received 1L D5 1/2 NS today

Goal Note filed on 01/26/25 1654 by Wylie, Ariana, Nursing Student

1 L NS given today

Goal: At Goal Weight - Euvolemic (Resolved)

Dates: Start: 01/10/25 Expected End: 03/06/25 Resolved: 03/08/25

Description: INTERVENTIONS:
1. Monitor patient hemodynamics
2. Monitor cardiac rhythm
3. Monitor daily weight
4. Monitor for bleeding
5. Monitor for infection at surgical site
6. Monitor for CV signs/symptoms
7. Monitor output/response to diuretic medications
8. Monitor I&O
9. Assess need for IV access daily and remove as soon as possible
10. Identify IV meds that can transition to PO
11. Replace electrolytes
12. Strict I&O
13. Educate pt/family re: CV illness & treatment

Disciplines: Interdisciplinary

Problem: Ineffective Tissue Perfusion

Dates: Start: 01/10/25 Resolved: 03/08/25
Disciplines: Nurse, Interdisciplinary

Goal: Demonstrates adequate cardiac output (Resolved)

Dates: Start: 01/10/25 Expected End: 03/06/25 Resolved: 03/08/25

01/09/2025 - ED to Hosp-Admission (Discharged) in UWMC MONTLAKE TOWER 7SA (continued)

Care Plan (continued)

Description: INTERVENTIONS:
1. Monitor patient hemodynamics
2. Monitor cardiac rhythm
3. Monitor daily weight
4. Monitor for bleeding
5. Monitor for infection at surgical site
6. Monitor for CV signs/symptoms
7. Monitor output/response to diuretic medications
8. Monitor I&O
9. Assess need for IV access daily and remove as soon as possible
10. Identify IV meds that can transition to PO
11. Replace electrolytes
12. Strict I&O
13. Educate pt/family re: CV illness & treatment

Disciplines: Interdisciplinary

Goal: Pt explains actions, precautions to take for cardiac disease (Resolved)

Dates: Start: 01/10/25 Expected End: 03/06/25 Resolved: 03/08/25

Description:
INTERVENTIONS:
1. Monitor patient hemodynamics
2. Monitor cardiac rhythm
3. Monitor daily weight
4. Monitor for bleeding
5. Monitor for infection at surgical site
6. Monitor for CV signs/symptoms
7. Monitor output/response to diuretic medications
8. Monitor I&O
9. Assess need for IV access daily and remove as soon as possible
10. Identify IV meds that can transition to PO
11. Replace electrolytes
12. Strict I&O
13. Educate pt/family re: CV illness & treatment

Disciplines: Interdisciplinary

Problem: Risk for Decreased Cardiac Tissue Perfusion

Dates: Start: 01/10/25 Resolved: 03/08/25
Disciplines: Nurse, Interdisciplinary

Goal: Pt explains actions, precautions to take for cardiac disease (Resolved)

Dates: Start: 01/10/25 Expected End: 03/06/25 Resolved: 03/08/25
Description: INTERVENTIONS:
1. Monitor patient hemodynamics
2. Monitor cardiac rhythm
3. Monitor daily weight
4. Monitor for bleeding
5. Monitor for infection at surgical site
6. Monitor for CV signs/symptoms
7. Monitor output/response to diuretic medications
8. Monitor I&O
9. Assess need for IV access daily and remove as soon as possible
10. Identify IV meds that can transition to PO
11. Replace electrolytes
12. Strict I&O
13. Educate pt/family re: CV illness & treatment

Disciplines: Interdisciplinary

Goal Note filed on 01/27/25 1406 by Wylie, Ariana, Nursing Student

RLE cool

Problem: Safety - Medical Restraint

Dates: Start: 01/12/25 Resolved: 01/25/25
Disciplines: Nurse, Interdisciplinary, RT, Social Work

Goal: Remains free of injury from restraints (Restraint for Interference with Medical Device) (Resolved)

Dates: Start: 01/12/25 Expected End: 01/30/25 Resolved: 01/25/25
Description: INTERVENTIONS:
1. Determine that other, less restrictive measures have been tried or would not be effective before applying the restraint
2. Evaluate the patient's condition at the time of restraint application
3. Inform patient/family regarding the reason for restraint
4. Q2H: Monitor safety, psychosocial status, comfort, nutrition and hydration
Disciplines: Nurse, Interdisciplinary, RT, Social Work

Outcomes

Goal: Free from restraint(s) (Restraint for Interference with Medical Device) (Resolved)

Dates: Start: 01/12/25 Expected End: 01/30/25 Resolved: 01/25/25
Description: INTERVENTIONS:
1. ONCE/SHIFT or MINIMUM Q12H: Assess and document the continuing need for restraints
2. Q24H: Continued use of restraint requires LIP to perform face to face examination and written order
3. Identify and implement measures to help patient regain control
Disciplines: Nurse, Interdisciplinary, RT, Social Work

Topic: Misc Nursing (In Progress)

Point: Skin Care/Pressure Ulcer Prevention (In Progress)

Description:
Instruct learner(s) on the need to keep skin clean and dry, the use of film barriers to prevent injury from urine and/or stool (if indicated), and the need to moisturize skin if dry or to prevent dryness.
For pressure ulcer prevention, instruct learner(s) on the need to change position at least every two hours and to request assistance as needed.

Patient Friendly Description: When you're in a hospital bed all day, it can be hard to keep your skin healthy, but it's very important. We'll work with you to keep your skin clean and dry, but if your skin gets too dry, let us know.
Also, if you lie in one position for too long, sores can form. Try to change your position at least every two hours, and ask us for help if you need it.

Title: First-Dose Education ()

Points For This Title

Point: Insulin Lispro (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Acceptance, Explanation, Teach back- restates information independently by JM at 1/17/2025 1715
	Nonacceptance, Explanation, Needs further instruction by TW at 1/11/2025 0927

Point: Insulin Regular Human (In Progress)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Nonacceptance, Explanation, Needs further instruction by TW at 1/11/2025 0927

Point: guanFACINE HCl (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Acceptance, Explanation, Teach back- restates information independently by NS at 2/9/2025 1526

01/09/2025 - ED to Hosp-Admission (Discharged) in UWMC MONTLAKE TOWER 7SA (continued)

Patient Education (continued)

Point: Magnesium Hydroxide (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Acceptance, Explanation, Teach back- restates information independently by MJ at 3/1/2025 1910

Point: Bisacodyl (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Acceptance, Explanation, Needs further instruction, Communicates understanding nonverbally by AW at 1/26/2025 1813
	Nonacceptance, Explanation, Needs further instruction by TW at 1/11/2025 0927

Point: Sennosides (In Progress)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Nonacceptance, Explanation, Needs further instruction by TW at 1/11/2025 0927

Point: Polyethylene Glycol 3350 (In Progress)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Nonacceptance, Explanation, Needs further instruction by TW at 1/11/2025 0927

Point: Calcium Carbonate Antacid (In Progress)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Nonacceptance, Explanation, Needs further instruction by TW at 1/11/2025 0927

Point: Atropine Sulfate (In Progress)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

01/09/2025 - ED to Hosp-Admission (Discharged) in UWMC MONTLAKE TOWER 7SA (continued)

Patient Education (continued)

Learning Progress Summary

Patient	Nonacceptance, Explanation, Needs further instruction by NS1 at 1/10/2025 0633
Family	Nonacceptance, Explanation, Needs further instruction by TW at 1/11/2025 0927
	Nonacceptance, Explanation, Needs further instruction by NS1 at 1/10/2025 0633

Point: LORazepam (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Acceptance, Explanation, Communicates understanding nonverbally by AD at 2/28/2025 1158

Point: QUEtiapine Fumarate (In Progress)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Nonacceptance, Explanation, Needs further instruction by TW at 1/11/2025 0927

Point: Aspirin (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Acceptance, Explanation, Teach back- restates information independently by JM at 1/17/2025 1715

Point: Acetaminophen (In Progress)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Refuses, Explanation, Unable to understand by JS at 2/16/2025 0501
	Acceptance, Explanation, Needs further instruction by LH at 1/25/2025 1412
Family	Acceptance, Explanation, Needs further instruction, Communicates understanding nonverbally by AW at 1/26/2025 1813
	Acceptance, Explanation, Needs further instruction by LH at 1/25/2025 1412
	Acceptance, Explanation, Teach back- restates information independently by JM at 1/17/2025 1715
	Nonacceptance, Explanation, Needs further instruction by TW at 1/11/2025 0927

Point: HYDROmorphone HCl (In Progress)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

01/09/2025 - ED to Hosp-Admission (Discharged) in UWMC MONTLAKE TOWER 7SA (continued)

Learning Progress Summary

Patient	Acceptance, Explanation, Needs further instruction, Unable to understand by JG at 2/22/2025 0142
	Acceptance, Explanation, Needs further instruction by JP at 2/18/2025 2227
	Acceptance, Explanation, Needs further instruction by AJ at 1/22/2025 0956
Family	Acceptance, Explanation, Needs further instruction, Unable to understand by JG at 2/22/2025 0142
	Acceptance, Explanation, Needs further instruction by AJ at 1/22/2025 0956
	Nonacceptance, Explanation, Needs further instruction by TW at 1/11/2025 0927

Point: oxyCODONE HCl (In Progress)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Nonacceptance, Explanation, Needs further instruction by TW at 1/11/2025 0927

Point: Nalbuphine HCl (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Acceptance, Explanation, Teach back- restates information independently by JM at 1/17/2025 1715

Point: ROPivacaine HCl (In Progress)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Nonacceptance, Explanation, Needs further instruction by TW at 1/11/2025 0927

Point: Thiamine HCl (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Acceptance, Explanation, Teach back- restates information independently by JM at 1/17/2025 1715

Point: Thiamine Mononitrate (In Progress)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

01/09/2025 - ED to Hosp-Admission (Discharged) in UWMC MONTLAKE TOWER 7SA (continued)

Learning Progress Summary

Patient	Nonacceptance, Explanation, Needs further instruction by KL at 1/30/2025 1658
Family	Nonacceptance, Explanation, Needs further instruction by TW at 1/11/2025 0927

Point: Ascorbic Acid (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Acceptance, Explanation, Teach back- restates information independently by JM at 1/17/2025 1715

Point: Prenatal Vit-Fe Fumarate-FA (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Acceptance, Explanation, Teach back- restates information independently by JM at 1/17/2025 1715

Point: Magnesium Sulfate (In Progress)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Nonacceptance, Explanation, Needs further instruction by TW at 1/11/2025 0927

Point: Potassium & Sodium Phosphates (In Progress)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Nonacceptance, Explanation, Needs further instruction by TW at 1/11/2025 0927

Point: K Phos Mono-Sod Phos Di & Mono (In Progress)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Nonacceptance, Explanation, Needs further instruction by TW at 1/11/2025 0927

Point: Potassium Chloride (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

01/09/2025 - ED to Hosp-Admission (Discharged) in UWMC MONTLAKE TOWER 7SA (continued)

	Nonacceptance, Explanation, Needs further instruction by NS1 at 1/10/2025 0633

Point: EMPTY BAG (In Progress)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Nonacceptance, Explanation, Needs further instruction by TW at 1/11/2025 0927

Point: PERIPHERAL NERVE CATHETER CLINICIAN BOLUS (In Progress)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Family	Nonacceptance, Explanation, Needs further instruction by TW at 1/11/2025 0927

Title: PT OT SLP Therapies ()

Topic: Speech Therapy (In Progress)

Point: Swallow Training (In Progress)

01/09/2025 - ED to Hosp-Admission (Discharged) in UWMC MONTLAKE TOWER 7SA (continued)

Patient Education (continued)

Description:
Instructed learner(s) on diet texture/liquid modification and the established safe swallow guidelines.

Patient Friendly Description: With a new diet and careful eating habits, you'll be able to swallow safely.

1. Follow your instructions about your new diet carefully.

2. Eat very small bites - smaller than you think you need to.

3. Eat slowly.

4. If one side of your mouth is weaker than the other, put the food on the strong side of your mouth.

5. Don't talk while you are eating

6. After you eat, sit upright for at least 30 minutes. If your doctor says it is okay, go for a short walk.

7. Don't use a straw unless your therapist says it's okay.

Learning Progress Summary

Patient	Nonacceptance, Explanation, Refuses information by SD at 2/15/2025 1105
	Acceptance, Explanation, Teach back- demonstrates task independently, Needs further instruction, Unable to understand by MH at 2/3/2025 2217
	Acceptance, Explanation, Needs further instruction, Teach back- restates information with assist by JL at 2/1/2025 0116
	Acceptance, Explanation, Teach back- restates information with assist, Needs further instruction by NB at 1/16/2025 1110
Family	Acceptance, Explanation, Teach back- restates information independently, Teach back- restates information with assist by LG1 at 3/3/2025 1009
	Nonacceptance, Explanation, Refuses information by SD at 2/15/2025 1105

Caregiver	Nonacceptance, Explanation, Refuses information by SD at 2/15/2025 1105

Point: Cognition (In Progress)

Description:
Instruct learner(s) on cognitive aspects of communication (e.g. attention, memory, problem-solving, and executive function).

Patient Friendly Description: Our brains have a big effect on how we can communicate with others. The brain is responsible for taking thoughts and turning them into meaningful speech, words, and gestures.
For example, you might find it hard to say words correctly, even though you know the words. Some words might come out more loudly than others, or you might have trouble putting all the sounds together the way you know they should go.

Sometimes, a stroke can affect the part of your brain that is responsible for language and speech.

Patient Education (continued)

Learning Progress Summary

Patient	Nonacceptance, Explanation, Refuses information by SD at 2/15/2025 1105
	Acceptance, Explanation, Teach back- demonstrates task independently, Needs further instruction, Unable to understand by MH at 2/3/2025 2217
	Acceptance, Explanation, Needs further instruction, Teach back- restates information with assist by JL at 2/1/2025 0116
	Acceptance, Explanation, Needs further instruction, Refuses information by ML at 1/19/2025 0124
Family	Acceptance, Explanation, Teach back- restates information independently, Teach back-restates information with assist by LG1 at 3/3/2025 1009
	Nonacceptance, Explanation, Refuses information by SD at 2/15/2025 1105
	Acceptance, Explanation, Teach back- demonstrates task independently, Needs further instruction, Unable to understand by MH at 2/3/2025 2217
	Acceptance, Explanation, Needs further instruction, Teach back- restates information with assist by JL at 2/1/2025 0116
Caregiver	Nonacceptance, Explanation, Refuses information by SD at 2/15/2025 1105

Point: Speech/Language (In Progress)

Description:
Instruct learner(s) on functional aspects of communication (verbal/written expression, auditory/reading comprehension)

Patient Friendly Description: Understanding speech and language has many different parts. There's the way you say things about yourself, or the way you write things. There's also how well you understand when people speak to you or when you read.
You might find that some of these things are easier than others.

Learning Progress Summary

Patient	Acceptance, Explanation, Needs further instruction, Teach back- restates information with assist by JL at 2/1/2025 0116
Family	Acceptance, Explanation, Teach back- restates information independently, Teach back-restates information with assist by LG1 at 3/3/2025 1009
	Acceptance, Explanation, Needs further instruction, Teach back- restates information with assist by JL at 2/1/2025 0116

Point: Communication (In Progress)

Description:
Instruct learner(s) on augmentative and alternative communication (AAC) strategies and/or AAC equipment (e.g., communication boards, speech generating devices).

Patient Friendly Description: There are many tools you can use to communciate. You might use gestures, pictures, word lists or an electronic device. A speech language pathologist can help you establish a system that works for you.

Learning Progress Summary

Patient	Acceptance, Explanation, Needs further instruction, Teach back- restates information with assist by JL at 2/1/2025 0116
Family	Acceptance, Explanation, Teach back- restates information independently, Teach back-restates information with assist by LG1 at 3/3/2025 1009
	Acceptance, Explanation, Needs further instruction, Teach back- restates information with assist by JL at 2/1/2025 0116
	Acceptance, Explanation, Needs further instruction, Communicates understanding nonverbally by AW at 1/26/2025 1813

Point: Respiratory Impairment and Communication/Swallow (In Progress)

Description:
Instruct learner(s) on impact of respiratory impairment on speech/swallow

01/09/2025 - ED to Hosp-Admission (Discharged) in UWMC MONTLAKE TOWER 7SA (continued)

Patient Education (continued)

Patient Friendly Description: Your breathing impacts both your ability to communicate and to eat and drink safely. Your speech language pathologist may provide you with exercises and/or recommendations.

Learning Progress Summary

Patient	Acceptance, Explanation, Needs further instruction, Teach back- restates information with assist by JL at 2/1/2025 0116
Family	Acceptance, Explanation, Teach back- restates information independently, Teach back- restates information with assist by LG1 at 3/3/2025 1009
	Acceptance, Explanation, Needs further instruction, Teach back- restates information with assist by JL at 2/1/2025 0116

Point: Caregiver Training (In Progress)

Description:
Train caregiver(s) in how to assist the patient in activities for a safe discharge.

Patient Friendly Description: A speech language pathologist will work with you and your caregivers to establish discharge recommendations to promote safety at your next level of care.

UW Medicine IP Facility Directory Esign - Electronic signature on 1/9/2025 10:16 AM (effective from 1/9/2025) - E-signed

Patient Information for Inclusion in the UW Medicine Patient Directory
Please Read this Statement Carefully

I understand that I have a choice as to whether or not to be included in the UW Medicine patient directory. My name and location will be included in the patient directory unless I would prefer not to receive phone calls or visitors. My decision is indicated by marking a box and signing this form.

☑ **YES, please include me in the Patient Directory.** The hospital has informed me that my name and location will be included in its hospital directory. This information will be made available to people who ask for me by name such as my relatives, friends and fellow employees.

- Harborview Medical Center
- University of Washington Medical Center -Northwest
- University of Washington Medical Center - Montlake / Fred Hutch Cancer Center
- Valley Medical Center

If I have provided my religious affiliation to UW Medicine in the past or if I provide my religious affiliation to UW Medicine now, I authorize its disclosure to clergy of my religious affiliation. Disclosure of my religious affiliation may result in a visit from a clergy member of my affiliation while I am being treated at UW Medicine.

If you have provided your religious affiliation to UW Medicine in the past and do not want a visit from a clergy member of your affiliation, please inform the registration staff.

☐ **NO, please do not include me in the Patient Directory.** I do not want my name or location included in the UW Medicine Patient Directory. **If this is my choice, I understand UW Medicine staff will not be able to confirm I am a patient or share my location with any family or friends. I also understand that by choosing not to be in the directory, UW Medicine will be unable to deliver items *(for example flowers and gifts)* addressed to me.**

For Staff Use Only

☐ **ADMIN OPT-OUT:** Please provide reason for Administrative Opt-Out		
☐ Crime Victim	☐ Employee	☐ Incarcerated Patient
☐ Involuntary Commitment	☐ Unable to Interview Patient	☐ Media Interest

Important Message From Medicare - Electronic signature on 1/9/2025 10:16 AM (effective from 1/9/2025) - E-signed

Hoffman,Jeanne Leonie
U8170135
Physician:

DEPARTMENT OF HEALTH AND HUMAN SERVICES
CENTERS FOR MEDICARE & MEDICAID SERVICES
OMB Approval No. 0938-1019

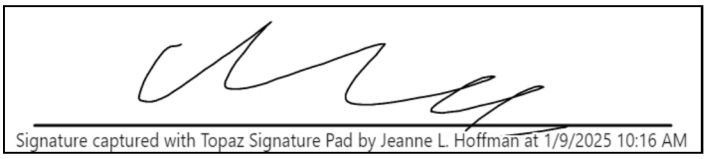
AN IMPORTANT MESSAGE FROM MEDICARE ABOUT YOUR RIGHTS

YOUR RIGHTS AS A HOSPITAL INPATIENT:

- You can receive Medicare covered services. This includes medically necessary hospital services and services you may need after you are discharged, if ordered by your doctor. You have a right to know about these services, who will pay for them, and where you can get them.
- You can be involved in any decisions about your hospital stay.
- You can report any concerns you have about the quality of care you receive to your QIO at: Acentra Health 1-888-305-6759. The QIO is the independent reviewer authorized by Medicare to review the decision to discharge you.
- You can work with the hospital to prepare for your safe discharge and arrange for services you may need after you leave the hospital. When you no longer need inpatient hospital care, your doctor or the hospital staff will inform you of your planned discharge date.
- You can speak with your doctor or other hospital staff if you have concerns about being discharged.

YOUR RIGHT TO APPEAL YOUR HOSPITAL DISCHARGE:

- You have the right to an immediate, independent medical review (appeal) of the decision to discharge you from the hospital. If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
- If you choose to appeal, the independent reviewer will ask for your opinion. The reviewer also will look at your medical records and/or other relevant information. You do not have to prepare anything in writing, but you have the right to do so if you wish.
- If you choose to appeal, you and the reviewer will each receive a copy of a detailed explanation about why your covered hospital stay should not continue. You will receive this detailed notice only after you request an appeal.
- If the QIO finds that you are not ready to be discharged from the hospital, Medicare will continue to cover your hospital services.
- If the QIO agrees services should no longer be covered after the discharge date, neither Medicare nor your Medicare health plan will pay for your hospital stay after noon of the day after the QIO notifies you of its decision.
- If you stop services no later than that time, you will avoid financial liability.
- If you do not appeal, you may have to pay for any services you receive after your discharge date.



Step by step instructions for calling the QIO and filing an appeal are on page 2.

To speak with someone at the hospital about this notice, call 206-598-1311

Please sign and date here to show you received and understood this notice.

I have been notified of my rights as a hospital inpatient and that I may appeal my discharge by contacting my QIO.

Signature of Patient or Representative

Form CMS 10065-IM (exp. 12/31/25)

UH2445 REV JUL 24

STEPS TO APPEAL YOUR DISCHARGE

- **STEP 1:** You must contact the QIO no later than your planned discharge date and before you leave the hospital. If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
  - Here is the contact information for the QIO:

Acentra Health
Toll-free Phone:1-888-305-6759
Toll-free Fax*:* 1-888-868-4064

- You can file a request for an appeal any day of the week. Once you speak to someone or leave a message, your appeal has begun.
- Ask the hospital if you need help contacting the QIO.
- The name of this hospital is:

☐ HMC:Medicare Provider Number: ☐ 50-0064(acute care)
☐ 50-S064(psych) ☐ 50-T064(rehab)

☐ UW Medical Center:Medicare Provider Number: ☐ 50-0008(acute care)
☐ 50-S008(psych) ☐ 50-T008(rehab)

- **STEP 2:** You will receive a detailed notice from the hospital or your Medicare Advantage or other Medicare managed care plan (if you belong to one) that explains the reasons they think you are ready to be discharged.

- **STEP 3:** The QIO will ask for your opinion. You or your representative need to be available to speak with the QIO, if requested. You or your representative may give the QIO a written statement, but you are not required to do so.

- **STEP 4:** The QIO will review your medical records and other important information about your case.

- **STEP 5:** The QIO will notify you of its decision within 1 day after it receives all necessary information.
  - If the QIO finds that you are not ready to be discharged, Medicare will continue to cover your hospital services.
  - If the QIO finds you are ready to be discharged, Medicare will continue to cover your services until noon of the day after the QIO notifies you of its decision.

IF YOU MISS THE DEADLINE TO REQUEST AN APPEAL, YOU MAY HAVE OTHER APPEAL RIGHTS:

- If you have Original Medicare: Call the QIO listed on Page 1.
- If you belong to a Medicare health plan, call your plan

Plan	Plan Phone Number

You have the right to get Medicare information in an accessible format, like large print, Braille, or audio. You
also have the right to file a complaint if you feel you've been discriminated against. Visit Medicare.gov/about-us/accessibility-nondiscrimination-notice, or call 1-800-MEDICARE (1-800-633-4227) for
more information. TTY users can call 1-877-486-2048.

☐ **Interpreter** *(Print Name)* _____ ID # _____

I understand that nerve damage may occur from how anesthesia equipment is placed or how my body must be positioned during a procedure.

I understand that I am free to refuse consent to any proposed procedure.

BLOOD: I have been told whether I am having a procedure where blood or blood components *(products)* may need to be used *(also known as transfused)*. **If I am having this kind of procedure**, I have been told about side effects, risks and other choices about transfusion, including **not** getting a transfusion.

I give permission to receive blood and/or blood components if the health care team decides it is needed during or after the procedure and throughout the current hospitalization. I understand possible reasons for needing a transfusion include bleeding, symptomatic or severe anemia, and abnormal coagulation. I understand that the use of blood and blood components involves risks. The risks may include reactions, including allergic reactions, fever, hives, lung injury, and in rare cases, infectious diseases such as sepsis, hepatitis and HIV/AIDS. I know that the blood bank screens donors and matches blood for transfusions to help lower risks.

OR *(Please initial)*
_____ **I refuse** ***(or partially refuse)*** **permission for blood and blood components.** *(You will be asked to sign Form U2063 for refusal/partial refusal or Form U1148 for a separate blood consent).*

Giving Consent
By signing below, I confirm that I have read the sections above and that I have had 1) each item explained to me; 2) a chance to ask questions; and 3) all of my questions answered.

SPECIAL CONSENT FOR PROCEDURAL TREATMENT AND BLOOD TRANSFUSION
(DIAGNOSTIC & SURGICAL PROCEDURES, BLOOD TRANSFUSION & OTHER INVASIVE PROCEDURES)

The law in Washington gives you the right and the responsibility to make decisions about your health care. Health care professionals can give you information and advice. You or your legal representative must be part of the decision-making. This consent form:
- Proves that you had a part in making decisions about your health care.
- Shows that you gave permission for the treatment recommended by your health care professionals.

The words "I", "my", etc., in this form mean the patient, no matter whether the patient or the patient's representative is signing the form.
The term "health care professional" may mean the attending physician, but in addition may mean a different doctor (including a resident), nurse practitioner, or physician's assistant, who orders, performs all or part of, or is involved in explaining the procedure.

I give permission to my health care professional(s) who are listed on the back of this form as the performing provider(s), to do the procedure(s) listed on the back of this form, with anesthesia and/or sedation if that is needed. Anesthesia or sedation medicine will be given by the health care professional, anesthesiologist, or other trained health care staff who work under appropriate supervision.

I understand that the attending physician may need to perform other urgent procedures due to an emergency that may occur while I am sedated or otherwise not able to give consent. The attending physician or designee will talk with my legally authorized representative if possible.

I understand that the attending physician may choose assistants, including other health care professionals and residents *(physicians who have finished medical school, but are getting more training)*, to be part of the team performing my procedure. The assistants may suture; harvest grafts; dissect, remove or alter tissue; implant devices; or do other tasks that the attending physician has deemed appropriate. If known, the attending physician has discussed with me whether there will be assistants and whom s/he expects the assistants to be. I understand that during the procedure, the attending physician may need to choose different assistants or have them do different tasks. I understand that for some kinds of medical equipment used during procedures, a representative from the equipment manufacturer may be there, doing things like providing consultation or running checks on the equipment.

I understand the attending physician may participate in care involving overlapping procedures or oversee other urgent medical responsibilities and may not be present in the room at all times. During this time, the skilled team of assistants may perform portions of my procedure which the attending physician has determined they are proficient to perform. If an overlap is anticipated or planned, I will be notified prior to surgery. The attending physician will be present for the key and critical portions of the procedure, and either he/she or a designated attending physician will be available to the procedure team at all times.

The hospital or health care professional will dispose of any removed tissues or parts.

I understand what procedure(s) will be done. I have been told about the risks and benefits. I have been told about other treatment choices and about their risks and benefits, including not having the procedure. I have been told about what results to expect, which includes information about the chances for the expected results. I know that results cannot be guaranteed. I have been told about potential problems that may occur during recuperation.

I understand that there are risks for all kinds of surgery and for "invasive procedures" *(procedures where a blood vessel, body cavity, or other internal tissue is entered with a needle, tube, or similar device)*. These risks, which can be serious, include device failure, bleeding, infection, and damage to nearby tissues, vessels, nerves, or organs. They may even result in paralysis, cardiac arrest, brain damage, and/or death.

I have received this added detailed information and/or patient information materials about the procedure(s):

_____

Print added information or title of information materials

I understand whether I will receive either anesthesia or sedation medicine, or both. I have been told about my choices for anesthesia and sedation and about their risks and benefits. I have been told about side effects of the medicine(s) and problems they may cause with recovery.

I understand that anesthesia and sedation medicines used for procedures involve risks. These risks can be serious. They may include damage to vital organs such as the brain, heart, lungs, liver, and kidneys. They may even result in paralysis, cardiac arrest, brain damage, and/or death.

I understand that the anesthesia equipment may damage my teeth or cause other dental damage.

SPECIAL CONSENT FOR PROCEDURAL TREATMENT AND BLOOD TRANSFUSION
(DIAGNOSTIC & SURGICAL PROCEDURES, BLOOD TRANSFUSION & OTHER INVASIVE PROCEDURES)

The law in Washington gives you the right and the responsibility to make decisions about your health care. Health care professionals can give you information and advice. You or your legal representative must be part of the decision-making. This consent form:
• Proves that you had a part in making decisions about your health care.
• Shows that you gave permission for the treatment recommended by your health care professionals.
The words "I", "my", etc., in this form mean the patient, no matter whether the patient or the patient's representative is signing the form. The term "health care professional" may mean the attending physician, but in addition may mean a different doctor (including a resident), nurse practitioner, or physician's assistant, who orders, performs all or part of, or is involved in explaining the procedure.

I give permission to my health care professional(s) who are listed on the back of this form as the performing provider(s), to do the procedure(s) listed on the back of this form, with anesthesia and/or sedation if that is needed. Anesthesia or sedation medicine will be given by the health care professional, anesthesiologist, or other trained health care staff who work under appropriate supervision.

I understand that the attending physician may need to perform other urgent procedures due to an emergency that may occur while I am sedated or otherwise not able to give consent. The attending physician or designee will talk with my legally authorized representative if possible.

I understand that the attending physician may choose assistants, including other health care professionals and residents *(physicians who have finished medical school, but are getting more training)*, to be part of the team performing my procedure. The assistants may suture; harvest grafts; dissect, remove or alter tissue; implant devices; or do other tasks that the attending physician has deemed appropriate. If known, the attending physician has discussed with me whether there will be assistants and whom s/he expects the assistants to be. I understand that during the procedure, the attending physician may need to choose different assistants or have them do different tasks. I understand that for some kinds of medical equipment used during procedures, a representative from the equipment manufacturer may be there, doing things like providing consultation or running checks on the equipment.

I understand the attending physician may participate in care involving overlapping procedures or oversee other urgent medical responsibilities and may not be present in the room at all times. During this time, the skilled team of assistants may perform portions of my procedure which the attending physician has determined they are proficient to perform. If an overlap is anticipated or planned, I will be notified prior to surgery. The attending physician will be present for the key and critical portions of the procedure, and either he/she or a designated attending physician will be available to the procedure team at all times.

The hospital or health care professional will dispose of any removed tissues or parts.

I understand what procedure(s) will be done. I have been told about the risks and benefits. I have been told about other treatment choices and about their risks and benefits, including not having the procedure. I have been told about what results to expect, which includes information about the chances for the expected results. I know that results cannot be guaranteed. I have been told about potential problems that may occur during recuperation.

I understand that there are risks for all kinds of surgery and for "invasive procedures" *(procedures where a blood vessel, body cavity, or other internal tissue is entered with a needle, tube, or similar device)*. These risks, which can be serious, include device failure, bleeding, infection, and damage to nearby tissues, vessels, nerves, or organs. They may even result in paralysis, cardiac arrest, brain damage, and/or death.

I have received this added detailed information and/or patient information materials about the procedure(s):

_____

_____
Print added information or title of information materials

I understand whether I will receive either anesthesia or sedation medicine, or both. I have been told about my choices for anesthesia and sedation and about their risks and benefits. I have been told about side effects of the medicine(s) and problems they may cause with recovery.

I understand that anesthesia and sedation medicines used for procedures involve risks. These risks can be serious. They may include damage to vital organs such as the brain, heart, lungs, liver, and kidneys. They may even result in paralysis, cardiac arrest, brain damage, and/or death.

01/09/2025 - ED to Hosp-Admission (Discharged) in UWMC MONTLAKE TOWER 7SA (continued)

Documents (group 1 of 6) (continued)

☐ **Interpreter** *(Print Name)* _____ ID # _____

I **understand** that nerve damage may occur from how anesthesia equipment is placed or how my body must be positioned during a procedure.

I **understand** that I am free to refuse consent to any proposed procedure.

BLOOD: **I have been told** whether I am having a procedure where blood or blood components *(products)* may need to be used *(also known as transfused)*. **If I am having this kind of procedure**, I have been told about side effects, risks and other choices about transfusion, including **not** getting a transfusion.

I give **permission to receive blood** and/or blood components if the health care team decides it is needed during or after the procedure and throughout the current hospitalization. I understand possible reasons for needing a transfusion include bleeding, symptomatic or severe anemia, and abnormal coagulation. I understand that the use of blood and blood components involves risks. The risks may include reactions, including allergic reactions, fever, hives, lung injury, and in rare cases, infectious diseases such as sepsis, hepatitis and HIV/AIDS. I know that the blood bank screens donors and matches blood for transfusions to help lower risks.

OR *(Please initial)*
____ **I refuse** ***(or partially refuse)*** **permission for blood and blood components.** *(You will be asked to sign Form U2063 for refusal/partial refusal or Form U1148 for a separate blood consent).*

Giving Consent
By signing below, I confirm that I have read the sections above and that I have had 1) each item explained to me; 2) a chance to ask questions; and 3) all of my questions answered.

FULL NAME OF PROCEDURE(S)	left lower extremity above knee amputation
Health Care Professional(s) Performing Procedure	Dr. Smith, Dr. Zetterval, Dr. Sweet

SIGNATURE *(PATIENT OR PATIENT'S AUTHORIZED REPRESENTATIVE)*	PRINT NAME	DATE	TIME
X Jeanne E Hoffman MA 1101r	Jeanne Hoffman	1/9/25	1:20pm

IF SIGNED BY PERSON OTHER THAN THE PATIENT, CHECK RELATIONSHIP TO PATIENT:

☐ 1. Court-appointed Guardian
☐ 2. Durable Healthcare Power of Attorney
☐ 3. Spouse/registered domestic partner
☐ 4. Adult Child(ren)
☐ 5. Parent(s)
☐ 6. Adult Brother(s)/Sister(s)
☐ 7. Adult Grandchild(ren)
☐ 8. Adult Niece(s)/Nephew(s)
☐ 9. Adult Aunt(s)/Uncle(s)
☐ 10. Adult Friend with executed Declaration per RCW 7.70.065

FOR MINOR PATIENTS:

☐ 1. Guardian/legal custodian
☐ 2. Court-authorized person for child in out-of-home placement
☐ 3. Parent(s)
☐ 4. Holder of signed authorization from parent(s)
☐ 5. Adult representing self to be a relative responsible for the minor's health

WITNESS SIGNATURE *(WITNESS OPTIONAL UNLESS TELEPHONE CONSENT)*	PRINT NAME	☐ TELEPHONE MONITORED CONSENT *(No patient signature)*

Note This consent is valid for 90 days. If there has been a change in the patient's condition or procedure performed, please use a new consent.

HEALTH CARE PROFESSIONAL'S STATEMENT: I explained the treatment/procedure(s) stated on this form, including the possible risks, complications, alternative treatments *(including non-treatment)* and anticipated results to the patient and/or his/her representative before the patient and/or his/her representative consented. If only the patient has signed this form, in my clinical opinion, the patient is capable of making his/her own health care decisions. If in my clinical opinion, the *(adult)* patient has questionable ability to make his/her own health care decisions, I discussed the above with the patient and with the patient's legally authorized representative.

Consent-Treatment Procedural UWM - Scan on 1/12/2025 12:00 PM: U0173 ; SPECIAL CONSENT FOR PROCEDURAL TREATMENT AND BLOOD TRANSFUSION

Scan (below)

SPECIAL CONSENT FOR PROCEDURAL TREATMENT AND BLOOD TRANSFUSION
(DIAGNOSTIC & SURGICAL PROCEDURES, BLOOD TRANSFUSION & OTHER INVASIVE PROCEDURES)

The law in Washington gives you the right and the responsibility to make decisions about your health care. Health care professionals can give you information and advice. You or your legal representative must be part of the decision-making. This consent form:
• Proves that you had a part in making decisions about your health care.
• Shows that you gave permission for the treatment recommended by your health care professionals.
The words "I", "my", etc., in this form mean the patient, no matter whether the patient or the patient's representative is signing the form. The term "health care professional" may mean the attending physician, but in addition may mean a different doctor (including a resident), nurse practitioner, or physician's assistant, who orders, performs all or part of, or is involved in explaining the procedure.

I give permission to my health care professional(s) who are listed on the back of this form as the performing provider(s), to do the procedure(s) listed on the back of this form, with anesthesia and/or sedation if that is needed. Anesthesia or sedation medicine will be given by the health care professional, anesthesiologist, or other trained health care staff who work under appropriate supervision.

I understand that the attending physician may need to perform other urgent procedures due to an emergency that may occur while I am sedated or otherwise not able to give consent. The attending physician or designee will talk with my legally authorized representative if possible.

I understand that the attending physician may choose assistants, including other health care professionals and residents *(physicians who have finished medical school, but are getting more training)*, to be part of the team performing my procedure. The assistants may suture; harvest grafts; dissect, remove or alter tissue; implant devices; or do other tasks that the attending physician has deemed appropriate. If known, the attending physician has discussed with me whether there will be assistants and whom s/he expects the assistants to be. I understand that during the procedure, the attending physician may need to choose different assistants or have them do different tasks. I understand that for some kinds of medical equipment used during procedures, a representative from the equipment manufacturer may be there, doing things like providing consultation or running checks on the equipment.

I understand the attending physician may participate in care involving overlapping procedures or oversee other urgent medical responsibilities and may not be present in the room at all times. During this time, the skilled team of assistants may perform portions of my procedure which the attending physician has determined they are proficient to perform. If an overlap is anticipated or planned, I will be notified prior to surgery. The attending physician will be present for the key and critical portions of the procedure, and either he/she or a designated attending physician will be available to the procedure team at all times.

The hospital or health care professional will dispose of any removed tissues or parts.

I understand what procedure(s) will be done. I have been told about the risks and benefits. I have been told about other treatment choices and about their risks and benefits, including not having the procedure. I have been told about what results to expect, which includes information about the chances for the expected results. I know that results cannot be guaranteed. I have been told about potential problems that may occur during recuperation.

I understand that there are risks for all kinds of surgery and for "invasive procedures" *(procedures where a blood vessel, body cavity, or other internal tissue is entered with a needle, tube, or similar device)*. These risks, which can be serious, include device failure, bleeding, infection, and damage to nearby tissues, vessels, nerves, or organs. They may even result in paralysis, cardiac arrest, brain damage, and/or death.

I have received this added detailed information and/or patient information materials about the procedure(s):

_____

_____
Print added information or title of information materials

I understand whether I will receive either anesthesia or sedation medicine, or both. I have been told about my choices for anesthesia and sedation and about their risks and benefits. I have been told about side effects of the medicine(s) and problems they may cause with recovery.

I understand that anesthesia and sedation medicines used for procedures involve risks. These risks can be serious. They may include damage to vital organs such as the brain, heart, lungs, liver, and kidneys. They may even result in paralysis, cardiac arrest, brain damage, and/or death.

I understand that the anesthesia equipment may damage my teeth or cause other dental damage.

SPECIAL CONSENT FOR PROCEDURAL TREATMENT AND BLOOD TRANSFUSION
(DIAGNOSTIC & SURGICAL PROCEDURES, BLOOD TRANSFUSION & OTHER INVASIVE PROCEDURES)

The law in Washington gives you the right and the responsibility to make decisions about your health care. Health care professionals can give you information and advice. You or your legal representative must be part of the decision-making. This consent form:
• Proves that you had a part in making decisions about your health care.
• Shows that you gave permission for the treatment recommended by your health care professionals.
The words "I", "my", etc., in this form mean the patient, no matter whether the patient or the patient's representative is signing the form. The term "health care professional" may mean the attending physician, but in addition may mean a different doctor (including a resident), nurse practitioner, or physician's assistant, who orders, performs all or part of, or is involved in explaining the procedure.

I give permission to my health care professional(s) who are listed on the back of this form as the performing provider(s), to do the procedure(s) listed on the back of this form, with anesthesia and/or sedation if that is needed. Anesthesia or sedation medicine will be given by the health care professional, anesthesiologist, or other trained health care staff who work under appropriate supervision.

I understand that the attending physician may need to perform other urgent procedures due to an emergency that may occur while I am sedated or otherwise not able to give consent. The attending physician or designee will talk with my legally authorized representative if possible.

I understand that the attending physician may choose assistants, including other health care professionals and residents *(physicians who have finished medical school, but are getting more training)*, to be part of the team performing my procedure. The assistants may suture; harvest grafts; dissect, remove or alter tissue; implant devices; or do other tasks that the attending physician has deemed appropriate. If known, the attending physician has discussed with me whether there will be assistants and whom s/he expects the assistants to be. I understand that during the procedure, the attending physician may need to choose different assistants or have them do different tasks. I understand that for some kinds of medical equipment used during procedures, a representative from the equipment manufacturer may be there, doing things like providing consultation or running checks on the equipment.

I understand the attending physician may participate in care involving overlapping procedures or oversee other urgent medical responsibilities and may not be present in the room at all times. During this time, the skilled team of assistants may perform portions of my procedure which the attending physician has determined they are proficient to perform. If an overlap is anticipated or planned, I will be notified prior to surgery. The attending physician will be present for the key and critical portions of the procedure, and either he/she or a designated attending physician will be available to the procedure team at all times.

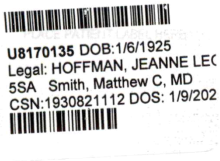
The hospital or health care professional will dispose of any removed tissues or parts.

I understand what procedure(s) will be done. I have been told about the risks and benefits. I have been told about other treatment choices and about their risks and benefits, including not having the procedure. I have been told about what results to expect, which includes information about the chances for the expected results. I know that results cannot be guaranteed. I have been told about potential problems that may occur during recuperation.

I understand that there are risks for all kinds of surgery and for "invasive procedures" *(procedures where a blood vessel, body cavity, or other internal tissue is entered with a needle, tube, or similar device)*. These risks, which can be serious, include device failure, bleeding, infection, and damage to nearby tissues, vessels, nerves, or organs. They may even result in paralysis, cardiac arrest, brain damage, and/or death.

I have received this added detailed information and/or patient information materials about the procedure(s):

_____



_____
Print added information or title of information materials

I understand whether I will receive either anesthesia or sedation medicine, or both. I have been told about my choices for anesthesia and sedation and about their risks and benefits. I have been told about side effects of the medicine(s) and problems they may cause with recovery.

I understand that anesthesia and sedation medicines used for procedures involve risks. These risks can be serious. They may include damage to vital organs such as the brain, heart, lungs, liver, and kidneys. They may even result in paralysis, cardiac arrest, brain damage, and/or death.

I understand that the anesthesia equipment may damage my teeth or cause other dental damage.

V.2404 | CONTENT LAST APPROVED NOV 23

☐ **Interpreter** *(Print Name)* _____ ID # _____

I understand that nerve damage may occur from how anesthesia equipment is placed or how my body must be positioned during a procedure.

I understand that I am free to refuse consent to any proposed procedure.

BLOOD: I have been told whether I am having a procedure where blood or blood components *(products)* may need to be used *(also known as transfused)*. **If I am having this kind of procedure**, I have been told about side effects, risks and other choices about transfusion, including **not** getting a transfusion.

I give permission to receive blood and/or blood components if the health care team decides it is needed during or after the procedure and throughout the current hospitalization. I understand possible reasons for needing a transfusion include bleeding, symptomatic or severe anemia, and abnormal coagulation. I understand that the use of blood and blood components involves risks. The risks may include reactions, including allergic reactions, fever, hives, lung injury, and in rare cases, infectious diseases such as sepsis, hepatitis and HIV/AIDS. I know that the blood bank screens donors and matches blood for transfusions to help lower risks.

OR *(Please initial)*
_____ **I refuse *(or partially refuse)* permission for blood and blood components.** *(You will be asked to sign Form U2063 for refusal/partial refusal or Form U1148 for a separate blood consent)*.

Giving Consent

By signing below, I confirm that I have read the sections above and that I have had 1) each item explained to me; 2) a chance to ask questions; and 3) all of my questions answered.

FULL NAME OF PROCEDURE(S)	Transvenous Pacemaker implant

SPECIAL CONSENT FOR PROCEDURAL TREATMENT AND BLOOD TRANSFUSION
(DIAGNOSTIC & SURGICAL PROCEDURES, BLOOD TRANSFUSION & OTHER INVASIVE PROCEDURES)

The law in Washington gives you the right and the responsibility to make decisions about your health care. Health care professionals can give you information and advice. You or your legal representative must be part of the decision-making. This consent form:
- Proves that you had a part in making decisions about your health care.
- Shows that you gave permission for the treatment recommended by your health care professionals.

The words "I", "my", etc., in this form mean the patient, no matter whether the patient or the patient's representative is signing the form. The term "health care professional" may mean the attending physician, but in addition may mean a different doctor (including a resident), nurse practitioner, or physician's assistant, who orders, performs all or part of, or is involved in explaining the procedure.

I give permission to my health care professional(s) who are listed on the back of this form as the performing provider(s), to do the procedure(s) listed on the back of this form, with anesthesia and/or sedation if that is needed. Anesthesia or sedation medicine will be given by the health care professional, anesthesiologist, or other trained health care staff who work under appropriate supervision.

I understand that the attending physician may need to perform other urgent procedures due to an emergency that may occur while I am sedated or otherwise not able to give consent. The attending physician or designee will talk with my legally authorized representative if possible.

I understand that the attending physician may choose assistants, including other health care professionals and residents *(physicians who have finished medical school, but are getting more training)*, to be part of the team performing my procedure. The assistants may suture; harvest grafts; dissect, remove or alter tissue; implant devices; or do other tasks that the attending physician has deemed appropriate. If known, the attending physician has discussed with me whether there will be assistants and whom s/he expects the assistants to be. I understand that during the procedure, the attending physician may need to choose different assistants or have them do different tasks. I understand that for some kinds of medical equipment used during procedures, a representative from the equipment manufacturer may be there, doing things like providing consultation or running checks on the equipment.

I understand the attending physician may participate in care involving overlapping procedures or oversee other urgent medical responsibilities and may not be present in the room at all times. During this time, the skilled team of assistants may perform portions of my procedure which the attending physician has determined they are proficient to perform. If an overlap is anticipated or planned, I will be notified prior to surgery. The attending physician will be present for the key and critical portions of the procedure, and either he/she or a designated attending physician will be available to the procedure team at all times.

The hospital or health care professional will dispose of any removed tissues or parts.

I understand what procedure(s) will be done. I have been told about the risks and benefits. I have been told about other treatment choices and about their risks and benefits, including not having the procedure. I have been told about what results to expect, which includes information about the chances for the expected results. I know that results cannot be guaranteed. I have been told about potential problems that may occur during recuperation.

I understand that there are risks for all kinds of surgery and for "invasive procedures" *(procedures where a blood vessel, body cavity, or other internal tissue is entered with a needle, tube, or similar device)*. These risks, which can be serious, include device failure, bleeding, infection, and damage to nearby tissues, vessels, nerves, or organs. They may even result in paralysis, cardiac arrest, brain damage, and/or death.

I have received this added detailed information and/or patient information materials about the procedure(s):

_____

Consent-Treatment Procedural UWM - Scan on 1/17/2025 9:38 AM: U0173 ; SPECIAL CONSENT FOR PROCEDURAL TREATMENT AND BLOOD TRANSFUSION

Scan (below)

☐ **Interpreter** *(Print Name)* _____ ID # _____

I understand that nerve damage may occur from how anesthesia equipment is placed or how my body must be positioned during a procedure.

I understand that I am free to refuse consent to any proposed procedure.

BLOOD: **I have been told** whether I am having a procedure where blood or blood components *(products)* may need to be used *(also known as transfused)*. **If I am having this kind of procedure**, I have been told about side effects, risks and other choices about transfusion, including **not** getting a transfusion.

I give permission to receive blood and/or blood components if the health care team decides it is needed during or after the procedure and throughout the current hospitalization. I understand possible reasons for needing a transfusion include bleeding, symptomatic or severe anemia, and abnormal coagulation. I understand that the use of blood and blood components involves risks. The risks may include reactions, including allergic reactions, fever, hives, lung injury, and in rare cases, infectious diseases such as sepsis, hepatitis and HIV/AIDS. I know that the blood bank screens donors and matches blood for transfusions to help lower risks.

OR *(Please initial)*
_____ **I refuse *(or partially refuse)* permission for blood and blood components.** *(You will be asked to sign Form U2063 for refusal/partial refusal or Form U1148 for a separate blood consent).*

Giving Consent
By signing below, I confirm that I have read the sections above and that I have had 1) each item explained to me; 2) a chance to ask questions; and 3) all of my questions answered.

FULL NAME OF PROCEDURE(S)	Temporary Venous pacemaker placement			
Health Care Professional(s) Performing Procedure	Dr. Ayyoub & team			
SIGNATURE *(PATIENT OR PATIENT'S AUTHORIZED REPRESENTATIVE)*	PRINT NAME	DATE	TIME	
[signature]	Louie Alloia	1-10-25	12:59 PM	

IF SIGNED BY PERSON OTHER THAN THE PATIENT, CHECK RELATIONSHIP TO PATIENT:

- ☐ 1. Court-appointed Guardian
- ☒ 2. Durable Healthcare Power of Attorney
- ☐ 3. Spouse/registered domestic partner
- ☒ 4. Adult Child(ren)
- ☐ 5. Parent(s)
- ☐ 6. Adult Brother(s)/Sister(s)
- ☐ 7. Adult Grandchild(ren)
- ☐ 8. Adult Niece(s)/Nephew(s)
- ☐ 9. Adult Aunt(s)/Uncle(s)
- ☐ 10. Adult Friend with executed Declaration per RCW 7.70.065

FOR MINOR PATIENTS:

- ☐ 1. Guardian/legal custodian
- ☐ 2. Court-authorized person for child in out-of-home placement
- ☐ 3. Parent(s)
- ☐ 4. Holder of signed authorization from parent(s)
- ☐ 5. Adult representing self to be a relative responsible for the minor's health

WITNESS SIGNATURE *(WITNESS OPTIONAL UNLESS TELEPHONE CONSENT)*	PRINT NAME	☐ TELEPHONE MONITORED CONSENT *(No patient signature)*

Note *This consent is valid for 90 days. If there has been a change in the patient's condition or procedure performed, please use a new consent.*

HEALTH CARE PROFESSIONAL'S STATEMENT: I explained the treatment/procedure(s) stated on this form, including the possible risks, complications, alternative treatments *(including non-treatment)* and anticipated results to the patient and/or his/her representative before the patient and/or his/her representative consented. If only the patient has signed this form, in my clinical opinion, the patient is capable of making his/her own health care decisions. If in my clinical opinion, the *(adult)* patient has questionable ability to make his/her own health care decisions, I discussed the above with the patient and with the patient's legally authorized representative.

V.2311 | CONTENT LAST APPROVED NOV 23

SPECIAL CONSENT FOR PROCEDURAL TREATMENT AND BLOOD TRANSFUSION

(DIAGNOSTIC & SURGICAL PROCEDURES, BLOOD TRANSFUSION & OTHER INVASIVE PROCEDURES)

The law in Washington gives you the right and the responsibility to make decisions about your health care. Health care professionals can give you information and advice. You or your legal representative must be part of the decision-making. This consent form:

- Proves that you had a part in making decisions about your health care.
- Shows that you gave permission for the treatment recommended by your health care professionals.

The words "I", "my", etc., in this form mean the patient, no matter whether the patient or the patient's representative is signing the form. The term "health care professional" may mean the attending physician, but in addition may mean a different doctor (including a resident), nurse practitioner, or physician's assistant, who orders, performs all or part of, or is involved in explaining the procedure.

I give permission to my health care professional(s) who are listed on the back of this form as the performing provider(s), to do the procedure(s) listed on the back of this form, with anesthesia and/or sedation if that is needed. Anesthesia or sedation medicine will be given by the health care professional, anesthesiologist, or other trained health care staff who work under appropriate supervision.

I understand that the attending physician may need to perform other urgent procedures due to an emergency that may occur while I am sedated or otherwise not able to give consent. The attending physician or designee will talk with my legally authorized representative if possible.

I understand that the attending physician may choose assistants, including other health care professionals and residents *(physicians who have finished medical school, but are getting more training)*, to be part of the team performing my procedure. The assistants may suture; harvest grafts; dissect, remove or alter tissue; implant devices; or do other tasks that the attending physician has deemed appropriate. If known, the attending physician has discussed with me whether there will be assistants and whom s/he expects the assistants to be. I understand that during the procedure, the attending physician may need to choose different assistants or have them do different tasks. I understand that for some kinds of medical equipment used during procedures, a representative from the equipment manufacturer may be there, doing things like providing consultation or running checks on the equipment.

I understand the attending physician may participate in care involving overlapping procedures or oversee other urgent medical responsibilities and may not be present in the room at all times. During this time, the skilled team of assistants may perform portions of my procedure which the attending physician has determined they are proficient to perform. If an overlap is anticipated or planned, I will be notified prior to surgery. The attending physician will be present for the key and critical portions of the procedure, and either he/she or a designated attending physician will be available to the procedure team at all times.

The hospital or health care professional will dispose of any removed tissues or parts.

I understand what procedure(s) will be done. I have been told about the risks and benefits. I have been told about other treatment choices and about their risks and benefits, including not having the procedure. I have been told about what results to expect, which includes information about the chances for the expected results. I know that results cannot be guaranteed. I have been told about potential problems that may occur during recuperation.

I understand that there are risks for all kinds of surgery and for "invasive procedures" *(procedures where a blood vessel, body cavity, or other internal tissue is entered with a needle, tube, or similar device)*. These risks, which can be serious, include device failure, bleeding, infection, and damage to nearby tissues, vessels, nerves, or organs. They may even result in paralysis, cardiac arrest, brain damage, and/or death.

I have received this added detailed information and/or patient information materials about the procedure(s):

_____

_____

Print added information or title of information materials

I understand whether I will receive either anesthesia or sedation medicine, or both. I have been told about my choices for anesthesia and sedation and about their risks and benefits. I have been told about side effects of the medicine(s) and problems they may cause with recovery.

I understand that anesthesia and sedation medicines used for procedures involve risks. These risks can be serious. They may include damage to vital organs such as the brain, heart, lungs, liver, and kidneys. They may even result in paralysis, cardiac arrest, brain damage, and/or death.

I understand that the anesthesia equipment may damage my teeth or cause other dental damage.

Consent-Treatment Procedural UWM - Scan on 2/12/2025 10:10 PM: U0173 ; SPECIAL CONSENT FOR PROCEDURAL TREATMENT AND BLOOD TRANSFUSION

Scan (below)

☐ **Interpreter** *(Print Name)* _____ ID # _____

I understand that nerve damage may occur from how anesthesia equipment is placed or how my body must be positioned during a procedure.

I understand that I am free to refuse consent to any proposed procedure.

BLOOD: I have been told whether I am having a procedure where blood or blood components *(products)* may need to be used *(also known as transfused)*. **If I am having this kind of procedure**, I have been told about side effects, risks and other choices about transfusion, including **not** getting a transfusion.

I give permission to receive blood and/or blood components if the health care team decides it is needed. I understand that use of blood and blood components involves risks. The risks may include reactions, including allergic reactions, fever, hives, lung injury, and in rare cases, infectious diseases such as hepatitis and HIV/AIDS. I know that the blood bank screens donors and matches blood for transfusions to help lower risks.

N/A

OR *(Please initial)*

_____ **I refuse** ***(or partially refuse)*** **permission for blood and blood components.** *(You will be asked to sign another form, Form UH2063).*

Giving Consent

By signing below, I confirm that I have read the sections above and that I have had 1) each item explained to me; 2) a chance to ask questions; and 3) all of my questions answered.

FULL NAME OF PROCEDURE(S)	Peripherally Inserted Central Catheter
Health Care Professional(s) Performing Procedure	PICC RN

SIGNATURE *(PATIENT OR PATIENT'S AUTHORIZED REPRESENTATIVE)*	PRINT NAME	DATE	TIME
x [signature]	Louis Allom	2/12/25	1353

IF SIGNED BY PERSON OTHER THAN THE PATIENT, CHECK RELATIONSHIP TO PATIENT:

- ☐ 1. Court-appointed Guardian
- ☐ 2. Durable Healthcare Power of Attorney
- ☐ 3. Spouse/registered domestic partner
- ☑ 4. Adult Child(ren)
- ☐ 5. Parent(s)
- ☐ 6. Adult Brother(s)/Sister(s)
- ☐ 7. Adult Grandchild(ren)
- ☐ 8. Adult Niece(s)/Nephew(s)
- ☐ 9. Adult Aunt(s)/Uncle(s)
- ☐ 10. Adult Friend with executed Declaration per RCW 7.70.065

FOR MINOR PATIENTS:

- ☐ 1. Guardian/legal custodian
- ☐ 2. Court-authorized person for child in out-of-home placement
- ☐ 3. Parent(s)
- ☐ 4. Holder of signed authorization from parent(s)
- ☐ 5. Adult representing self to be a relative responsible for the minor's health

WITNESS SIGNATURE *(WITNESS OPTIONAL UNLESS TELEPHONE CONSENT)*	PRINT NAME	☐ TELEPHONE MONITORED CONSENT *(No patient signature)*

Note *This consent is valid for 90 days. If there has been a change in the patient's condition or procedure performed, please use a new consent.*

HEALTH CARE PROFESSIONAL'S STATEMENT: I explained the treatment/procedure(s) stated on this form, including the possible risks, complications, alternative treatments *(including non-treatment)* and anticipated results to the patient and/or his/her representative before the patient and/or his/her representative consented. If only the patient has signed this form, in my clinical opinion, the patient is capable of making his/her own health care decisions. If in my clinical opinion, the *(adult)* patient has questionable ability to make his/her own health care decisions, I discussed the above with the patient and with the patient's legally authorized representative.

SPECIAL CONSENT FOR PROCEDURAL TREATMENT

(DIAGNOSTIC & SURGICAL PROCEDURES & OTHER INVASIVE PROCEDURES)

The law in Washington gives you the right and the responsibility to make decisions about your health care. Health care professionals can give you information and advice. You or your legal representative must be part of the decision-making. This consent form:

- Proves that you had a part in making decisions about your health care.
- Shows that you gave permission for the treatment recommended by your health care professionals.

The words "I", "my", etc., in this form mean the patient, no matter whether the patient or the patient's representative is signing the form. The term "health care professional" may mean the attending physician, but in addition may mean a different doctor (including a resident), nurse practitioner, or physician's assistant, who orders, performs all or part of, or is involved in explaining the procedure.

I give permission to my health care professional(s) who are listed on the back of this form as the performing provider(s), to do the procedure(s) listed on the back of this form, with anesthesia and/or sedation if that is needed. Anesthesia or sedation medicine will be given by the health care professional, anesthesiologist, or other trained health care staff who work under appropriate supervision.

I understand that the attending physician may need to perform other urgent procedures due to an emergency that may occur while I am sedated or otherwise not able to give consent. The attending physician or designee will talk with my legally authorized representative if possible.

I understand that the attending physician may choose assistants, including other health care professionals and residents *(physicians who have finished medical school, but are getting more training)*, to be part of the team performing my procedure. The assistants may suture; harvest grafts; dissect, remove or alter tissue; implant devices; or do other tasks that the attending physician has deemed appropriate. If known, the attending physician has discussed with me whether there will be assistants and whom s/he expects the assistants to be. I understand that during the procedure, the attending physician may need to choose different assistants or have them do different tasks. I understand that for some kinds of medical equipment used during procedures, a representative from the equipment manufacturer may be there, doing things like providing consultation or running checks on the equipment.

I understand the attending physician may participate in care involving overlapping procedures or oversee other urgent medical responsibilities and may not be present in the room at all times. During this time, the skilled team of assistants may perform portions of my procedure which the attending physician has determined they are proficient to perform. If an overlap is anticipated or planned, I will be notified prior to surgery. The attending physician will be present for the key and critical portions of the procedure, and either he/she or a designated attending physician will be available to the procedure team at all times.

he hospital or health care professional will dispose of any removed tissues or parts.

I understand what procedure(s) will be done. I have been told about the risks and benefits. I have been told about other treatment choices and about their risks and benefits, including not having the procedure. I have been told about what results to expect, which includes information about the chances for the expected results. I know that results cannot be guaranteed. I have been told about potential problems that may occur during recuperation.

I understand that there are risks for all kinds of surgery and for "invasive procedures" *(procedures where a blood vessel, body cavity, or other internal tissue is entered with a needle, tube, or similar device)*. These risks, which can be serious, include bleeding, infection, and damage to nearby tissues, vessels, nerves, or organs. They may even result in paralysis, cardiac arrest, brain damage, and/or death.

I have received this added detailed information and/or patient information materials about the procedure(s):

Peripherally Inserted Central Catheter (PICC)

Patient Education Handout

Print added information or title of information materials

I understand whether I will receive either anesthesia or sedation medicine, or both. I have been told about my choices for anesthesia and sedation and about their risks and benefits. I have been told about side effects of the medicine(s) and problems they may cause with recovery.

I understand that anesthesia and sedation medicines used for procedures involve risks. These risks can be serious. They may include damage to vital organs such as the brain, heart, lungs, liver, and kidneys. They may even result in paralysis, cardiac arrest, brain damage, and/or death.

I understand that the anesthesia equipment may damage my teeth or cause other dental damage.

SOCIAL WORK FOLLOW-UP NOTE

12/10/2024
Brief description: Housing follow up

Patient description, presenting problem, patient / family goals: Patient is a English speaking 99 year old female, receiving medical care with the HMC Senior Care Clinic.

SW following up with pts son, Louis regarding housing search.

Louis shares they are continuing to stay in the hotel, they obtained more money (SW unable to identify how they were able to get more money for lodging). Louis reports they can stay there for another week - 2 weeks.

Louis expresses frustration with housing system, long term care systems and Bainbridge Island. Louis talks about previous land lord at Housing Resources Bainbridge, he refers the them as "evil" and a "bully". He shares they were kicked out of their housing because the landlord refused to make reasonable accommodations for pt. Louis describes installing grab bars around their previous apartment and installed a washing machine, without authorization from landlord.

Louis describes taking pride in being his mothers caregiver, he states its a family value. He does not want his mother to move into a nursing home, Aka "Death homes", he believes they will not take good care of pt.

Louis shares his goal of finding housing on bainbridge island, reports there is a critical lack of housing that accepts housing vouchers. He is hopeful they can find someone who will rent to them. Louis shares plans of moving with pt into a ADA tent if they are unable to find permanent housing. He describes locating a space for their tent and will make

12/10/2024 - Telephone in Harborview Senior Care Clinic (continued)

Clinical Notes (continued)

sure his mother can get in and out in her wheelchair. He talks about finding a propane heating solution so she does not get cold.

He is planning to meet with social worker at Helpline House 12/12/24 for assistance.

Intervention / Outcome / Plan:

1. SW spoke with Louis, attempted to provide education about navigating subsidized housing. Louis is very frustrated by the housing situation and is unable to problem solve during our call.
2. SW identified pts APS case has been assigned to investigator (Caroline; 360-814-9682). SW called Caroline and left a VM encouraging return call.

SW will remain available for continued support/assistance as needed.

SOCIAL WORK FOLLOW-UP NOTE

12/6/2024
Brief description: Housing support, pt outreach

Patient description, presenting problem, patient / family goals: Patient is a English speaking 99 year old female, receiving medical care with the HMC Senior Care Clinic.

SW referred by the medical team for support with housing concerns.

Per pts son and caregiver, Louis; pt and Louis were evicted/kicked out of their housing. He shares their previous landlord was trying to kick them out, did not want to provide ADA accommodations to their unit. Louis believes that Bainbridge Island has a lot of white supremacists, reports they are trying to control the island.

Louis reports having a subsidized housing voucher; TW is unclear if the housing voucher is for pt or Louis and what agency provides voucher.

Louis states they were previously connected with Housing Resource Village. He also states applying for other housing on Bainbridge Island, has been accepted by 2 different apartments. Louis is worried previous landlord will prevent them from moving in and from getting a 2 bedroom unit. He states that everyone of the island is afraid of their previous landlord.

Louis shares being a radio operator, states he needs a antenna at any future apartments.

12/06/2024 - Telephone in Harborview Senior Care Clinic (continued)

Clinical Notes (continued)

Louis shares connecting with Human Rights groups for advocacy and has an appointment at Helpline house 12/12/24.

Pt currently staying in hotel, Quality Inn on Bainbridge island, they have paid for hotel through 12/9/24.

Pt has Molina Medicare and Medicare Savings Plan (QMB) insurance coverage.

Intervention / Outcome / Plan:

1. SW spoke with pts son/DPOA Louis. SW provided assessment, support and discussed resources. Louis asking if HMC can provide funding for more nights in their hotel. TW shares HMC is not able to provide financial resources for hotel. Louis and SW discussed connecting with local resources for assistance, including shelters. SW encouraged Louis to keep his appointment with Helpline House as they have housing navigators and social workers, Louis verbalized ability to access local resources.
2. SW completed APS referral; Confirmation # 653P6EZK0BN5S.

SW will remain available for continued support/assistance as needed.

Telephone Encounter

Malhi, Karamjit K, RN at 12/5/2024 0854

RN received call from pt's friend Jim Daniel saying pt and son are going to be on streets soon, they were evicted from rental house a month ago, then they went on a train trip and now they are staying in a motel. They will be in the motel till 12/9/2024, they have no place to go afterwards. Son is being resistant for pt to go to assisted living facility and his plan is to live in a tent with his mom who is almost 100 years old.
Jim said he is concerned that it's so cold outside, pt is old and don't know what is going on and son is being resistive, they need help.

Note forwarded to PCP and SW Shannon.

Please provide analysis assessment of Dec 3 Appointment.

During appointment, focus was on would care.

Inadvertently forgot to order/need to schedule appointment for 'Blood Draw'/lab report.
Very important to maintain lab analysis on medication/etc.

Attempting to contact Shannon McDonald, UW Social Worker, on Dec 9th, Jean and I will be forced to sleep outdoors, with no blankets, possible Tarp to cover, we are being subjected to hatred indifference, this will place both of to suffer from hypothermia exposure....

attempting to reschedule appointments with UW Otolaryngology/hearing aid specialist, Alexander K

Instructions: Apply 1 patch onto the skin every 24 hours. Apply to painful area for up to 12 hours in a 24 hour period.
Authorized by: Nguyen, My-Linh Trinh, MD — Ordered on: 1/18/2024
Start date: 1/18/2024 — End date: 3/14/2025
Quantity: 15 each — Refill: No refills remaining

timolol maleate 0.5 % ophthalmic solution

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: instill 1 drop into both eyes twice a day
Authorized by: Neighbor Jr., William E, MD — Ordered on: 4/10/2024
Start date: 4/10/2024 — End date: 3/8/2025
Quantity: 10 mL — Refill: 6 refills by 4/10/2025

pentoxifylline ER 400 MG ER tablet

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day. Take with food.
Authorized by: Navalurkar, Reema, MD — Ordered on: 8/21/2024
Start date: 8/21/2024 — End date: 3/8/2025
Quantity: 90 tablet — Refill: 3 refills by 8/21/2025

atorvastatin 10 MG tablet

Discontinued by: Navalurkar, Reema, MD — Discontinued on: 12/11/2024
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (10 mg) by mouth daily.
Authorized by: Navalurkar, Reema, MD — Ordered on: 9/24/2024
Start date: 9/24/2024 — End date: 12/10/2024
Quantity: 90 tablet — Refill: 3 refills by 9/24/2025

Stopped in Visit

Clinical Notes

Progress Notes

Navalurkar, Reema, MD at 12/3/2024 1120

Attestation signed by Wang, Mengru, MD at 12/6/2024 9:56 AM

I saw and evaluated the patient and agree with Dr.Navalurkar's note.

Another option to explore is whether home based / visiting wound care companies such as Athena, Nexus, Mobile wound service Bainbridge Island. Can offer Bainbridge Ferry priority boarding pass if Jeanne does not already have one next visit.

SENIOR CARE SUBSEQUENT CARE VISIT NOTE

12/03/2024 - Office Visit in Harborview Senior Care Clinic (continued)

Clinical Notes (continued)

ID/CC: Jeanne Hoffman is a 99-year-old community-dwelling woman with chronic LLE wounds, SNHL, and chronic back pain due to lumbar compression fractures and DJD being seen for follow-up:
She and her son checked in ~30 minutes late; they just completed a >10,000 mile train journey, got back to Seattle area this morning.

Baseline:
Lives in a 1br apartment with her son Louis on Bainbridge Island.
Accompanied today by her son/primary caregiver Louis. Transportation via ferry, then bus.
Interpreter: none

History of Present Illness:
- When asked how she's doing, Jeanne said, "I'm not a spring chicken anymore! I'm almost 100!" I asked Jeanne if she is worried about anything and she says no, she has been feeling well. She smiled, added, "You have to have a sense of humor. If you don't have a sense of humor, you don't have anything."
- Son had left voicemail in Aug; per RN note (8/30/2024), "Son endorsed needing a picture of one of the pt's x-rays showing the right femur with the plate and screws. He indicated needing the picture by Tuesday. He wanted the picture forwarded via email which I told him was not legal. Alerted the son that a picture in the pt's Media File could suffice." Today, Louis says he's not satisfied with the way the screws were placed and wants to know if this can be fixed with another surgery. Jeanine proudly shows me her surgical scar, which appears healthy.
- No falls since last visit. Has been comfortably ambulating short distances (mostly indoors) with her cane.
- Since they no longer receive wound care at Husky Health (since establishing care here last summer), I inquired about their experiences with their new wound care clinic. I had referred them to Swedish on 829/24 and RN note 9/10/2024 states, "Pt called, spoke to PSS and canceled appt. Pt is established elsewhere for wound care management." However, Louis states that he has been doing wound care on his own. He no longer uses iodine, sticks to soap/water and medihoney with gauze/bandages. Reprots he occasionally uses hand sanitizer to "check" if Jeanne can feel the sting, feels reassured "her nerves are working".
- Jeanne says she's been dealing with these wounds for nearly 35 years and they're much better now than they've been. She winces while removing gauze but otherwise says she's not been having pain. Louis agrees that her wounds have been filling in slowly, have been less erythematous and they've not noticed warmth, purulence, or fever/chills.
- Louis says, "I need better communication from this clinic." When asked how we can better address their needs in this regard, he mentions white supremacists on Bainbridge who make them feel uncomfortable in their neighborhood. He also again mentions feeling pressure from his landlord to leave, such as the recent removal of ADA accommodations from their unit. SW Shannon had reached out by phone on 9/6, left VM and MyChart message. Louis was not unaware of these outreach attempts.
- Wound noted on LUE at last visit has completely healed.

Geriatric ROS:
ADLs: dresses herself, toilets on her own. showers with some assistance from son.
IADLS: son helps with mealprep, finances, transportation; he helps with refilling prescriptions and she takes them on her own each day.
Cognition: she feels quite good, amazed and excited for "the big 1-0-0"; did not address in further detail today.
Mood: okay, though changes in her life recently have been stressful (esp housing difficulties <-- see HPI)
Mobility: walks around the house often without her cane, using a wheelchair outside the home.
Vision: wears glasses; last saw optometry 3/2024
Hearing: very limited by SNHL; she forgot her hearing aids today so we're using a borrowed pocket talker. (last evaluated by audiology 5/2023).
Continence: has some urine leakage, prev referred to pelvic PT; did not have time to address today.
Goals of Care: did not have time to address today
Frailty index/CFS-9: 6 (living with moderate frailty)

Problem List
Patient Active Problem List
Diagnosis
- Sensorineural hearing loss, unspecified
- Hypercholesterolemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility

Clinical Notes (continued)

- Type 2 diabetes mellitus without complication (HCC)
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- History of recurrent deep vein thrombosis (DVT)
- Imbalance
- Primary osteoarthritis of both hips
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Primary open angle glaucoma (POAG) of both eyes
- Community acquired bacterial pneumonia
- Reduced vision
- Housing instability

Outpatient Medication List:

Current Outpatient Medications

Medication	Sig	Dispense	Refill
• atorvastatin 10 MG tablet	Take 1 tablet (10 mg) by mouth daily.	90 tablet	3
• Calcium Carbonate 500 MG Oral Chew Tab	Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.		
• Cholecalciferol 1000 units Oral Tab	Take 2 tablets (2,000 units) by mouth daily.		
• lidocaine 4 % patch	Apply 1 patch onto the skin every 24 hours. Apply to painful area for up to 12 hours in a 24 hour period.	15 each	0
• MULTIPLE VITAMIN OR	Take by mouth.		
• pentoxifylline ER 400 MG ER tablet	Take 1 tablet (400 mg) by mouth 3 times a day. Take with food.	90 tablet	3
• timolol maleate 0.5 % ophthalmic solution	instill 1 drop into both eyes twice a day	10 mL	6
• Wound Dressings (medihoney) topical gel	Apply topically every other day. Apply to wound before applying dressing	44 mL	3
• Wound Dressings (medihoney) topical gel	Apply topically daily. Apply to ulcerations on legs. Apply dressing over the Medi Honey.	88 mL	6

No current facility-administered medications for this visit.

Allergies:

Review of patient's allergies indicates:

Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other and Skin: Rash
• Nitrofurantoin	Other
confusion	

- Penicillins — Skin: Rash
  3/22/2024 Patient tolerate cephalosporins which she has had in the last year for cellulitis and pneumonia. William E Neighbor Jr, MD

- Sulfa Antibiotics — Skin: Rash

Social History:
Lives: a 1br apartment with her son Louis on Bainbridge Island
Marital Status: widowed in 1972
Children: two sons
Sexual History: not active
Social isolation/Loneliness: to discuss at next visit
Substance Use: none
Firearms: none
Nutrition: to be discussed at next visit, no weight loss per EMR.
Education/Occupation: worked in business, now retired.
Health Literacy: quite good
DPOA/main contact: Louis (son), ph# 206-280-1287

Physical Exam:
BP (!) 151/78 | Pulse (!) 55 | Temp 36.9 °C (Temporal) | Wt 48.5 kg (107 lb) | SpO2 99% | BMI 20.90 kg/m²
Wt Readings from Last 3 Encounters:

12/03/24	48.5 kg (107 lb)
11/28/23	**(!) 40.9 kg (90 lb 2.7 oz)**
10/10/22	45 kg (99 lb 3.3 oz)

General: frail, not ill-appearing; sitting comfortably in wheelchair, NAD.
HEENT: normal conjunctivae. moist mucous membranes.
CV: regular rate and rhythm. 2+ radial pulses.
Resp: normal effort on RA, lungs clear to auscultation.
Abd: soft, nondistended, and nontender to palpation
Ext: no peripheral edema. LLE with some chronic venous stasis skin changes and several chronic wounds, much improved from last time; no warmth or purulence.
Psych: appropriate mood and affect.

Assessment and Plan:
Jeanne Hoffman is a 99-year-old community-dwelling woman with chronic LLE wounds, SNHL, and chronic back pain due to lumbar compression fractures and DJD being seen for follow-up:
She and her son checked in ~30 minutes late; they just completed a >10,000 mile train journey, got back to Seattle area this morning.

(I83.023, L97.329) Venous stasis ulcer of left ankle
Reportedly present for 35 years, much improved from last visit - edges are slowly filling in. No edema or signs of infection. Bandages replaced in clinic today.
- advised to avoid hand sanitizer; provided coaching (and more supplies) during wound care in clinic today on using soap and water, wrapping with medihoney + gauze/bandages
- again provided contact info to schedule with Swedish wound care

(Z71.89) Advanced care planning/counseling discussion
Even with pocket talker, Jeanne is unable to hear much and therefore not able to participate in much conversation; she gestured for me to talk to Louis. I asked Louis what ACP discussions they've had with Dr. Neighbor (prev PCP); Louis states they did a POLST and want to be "fully resuscitated." I stated that my goal for today was only to get a sense of what they've discussed and if Jeanne has mentioned any goals to him that I should know.
Louis says, "if her heart stops, it would be on me, right? I'd do chest compressions until the ambulance, and then she'd be in the hospital."
I said I wonder how she feels about this, since what I know thus far about her is that it's very important to be home (has prev declined SNF, has been anxious about possible eviction, and has said that she wants to die on Bainbridge Island where she has lived for a very long time) and avoid being stuck in a healthcare facility. I worry that if she did survive a cardiac arrest, it would be

unlikely she'd return home. Louis said, "If it came to that, I'd pull the plug. But it's on me, I'd do chest compressions."
As Jeanne was unable to meaningfully participate in this discussion, I left it there and plan to try to talk to Jeanne on her own with a white board (and hopefully hearing aids) about her values and goals.

(Z59.819) Housing instability
Son reports that their housing manager has removed grab bars and other ADA equipment and threatening eviction. Had been referred to SW at last visit, left VM. I confirmed ph# today and will ask SW to try again.

(S72.409S) Closed fracture of distal end of femur, sequela
Fall in 2022 resulted in femur fracture now s/p ORIF. Jeanne seems to be faring well, ambulating at home with cane. Does not report substantial pain at distal thigh/knee. Son today says he does not like how the screws look on XRs and requests a revision surgery. I reviewed the imaging and added that what's most important now is how well Jeanne feels/functions.

/// not addressed in detail today
#Osteoporosis with spine compression fx
#Hx of falls
Cannot find DEXA results on EMR; s/p alendronate (2008-2012).
No falls since last visit.
- fall risk assessment at next visit
- continue vit D and calcium supplementation

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

10/14/2024 - Health Maintenance Letter

Letters

Reminder by Uw Mychart, Patient User on 10/14/2024

Status: Sent
Letter body:

Dear Jeanne Hoffman,

The flu vaccine is now available through your UW Medicine providers.

You can schedule your flu shot with MyChart, request a flu shot during your next appointment or visit a local pharmacy. If you have already received your flu shot, please go to the Preventive Care page in MyChart and mark your flu shot as complete.

Getting a flu shot is the best way to reduce your risk of getting seasonal flu and dealing with its potentially serious complications. It's also the best way to slow down the spread of flu in your community.

You can safely get your annual flu shot at the same time as your updated COVID-19 vaccine. Inform the scheduler or include a comment in your online booking if you plan on getting both shots.

You can stay safe this flu season by doing the following:

- Get your annual flu shot
- Cover your cough
- Wear a mask and stay home if you're sick
- Wash your hands frequently with soap and water or use an alcohol-based hand sanitizer

To get your flu shot, book online with MyChart or call 206.520.2250. You can also visit a local pharmacy that offers the flu shot.

If you have questions about the 2024-2025 flu season, please visit our website or ask your UW Medicine care team.

Thank you,

Your UW Medicine and Fred Hutchinson Cancer Center Care Teams

09/27/2024 - Telephone in UW Medicine Montlake Audiology

Clinical Notes

Telephone Encounter

Pena, Yesenia at 9/27/2024 1625

RETURN CALL: Voicemail - Detailed Message

SUBJECT: General Message

MESSAGE: Pts son calling requesting a prior authorization for pts hearing aid. One of patients hearing aids does not work and Molina only cover if there is a prior authorization in place. Please reach out to patients son with any further questions or concerns.

Oct18-Nov28th pt will be out of town

Electronically signed by Pena, Yesenia at 9/27/2024 4:29 PM

Katson, Alexander Akisada Nicholas, PSS/PSR at 12/6/2024 1347

Patient's son left voicemail to direct line at UWMC checking on prior authorization that was submitted by HMC in July regarding new hearing aids for this patient.

Electronically signed by Katson, Alexander Akisada Nicholas, PSS/PSR at 12/6/2024 1:48 PM

Foster, William, PSS/PSR at 1/21/2025 0955

09/27/2024 - Telephone in UW Medicine Montlake Audiology (continued)

Clinical Notes (continued)

The patient's son stopped by the clinic and stated that the patient is admitted at UWMC Montlake. He wanted to know if our clinic would be able to dispense hearing aids for the patient, possibly while the patient is still admitted. He was informed a message would be sent to the care team

Hearing Aid Repair

From	To	Sent and Delivered
Kevin Daniel Hanis, MA	Hoffman, Jeanne Leonie	1/21/2025 10:49 AM

Last Read in MyChart
1/21/2025 2:04 PM by Hoffman, Jeanne Leonie

Hi Jeanne and Louis,

I heard that you were looking to have some hearing aids dispensed while here at UWMC, unfortunately this is not something that we can do. In order to dispense hearing aids, we first need to have a hearing aid evaluation to decide on what devices to order and these appointments are currently booked out until May. Do you currently have hearing aids that aren't working?

If you have any other questions please feel free to message us again or give us a phone call.

Thank you,

Kevin

Audiology Assistant

Hi Jeanne and Louis,

I tried to return your call but was unable to leave a voicemail. I wanted to reach out about the issues you are having with Jeanne's hearing aids.

I see from the message you left us that one of Jeanne's hearing aids are not working. We could potentially look at this at our walk-in device clinic every Wednesday morning from 9am-12pm (Jeanne herself does not need to

09/27/2024 - Telephone in UW Medicine Montlake Audiology (continued)

Messages (continued)

be here for this if having a family member drop the hearing aid off would be easier). If it does need to be sent to the manufacturer for repair, we can initiate the prior authorization process with her insurance at that point on our side.

If you'd prefer to have Jeanne schedule an appointment with her audiologist, that would also be a way we could begin that process.

Let me know what your preference would be! Feel free to contact me directly by phone at 206-598-7523 or respond to this MyChart message.

Thanks,

Alex K

Hi Jeanne and Louis,
Unfortunately we have to cancel the primary care clinic tomorrow and are not able to provide Jeanne with wound care here tomorrow.

Was there a wound clinic where Jeanne's new provider referred her to where she can get care this week? Please call us back or reply here and we can make a plan.

Thank you,

Katie, RN

Hi Louis,

I am the social worker from the senior care clinic at Harborview. I am following up to see if you needed help with your housing issues.

The doctor let me know that you may be getting evicted. Id be happy to talk with you to see if I can help in any way.

I can be reached on MyChart message, or at my office, 206-744-8036.

Shannon

Telephone Encounter

McDonald, Shannon L, MSW at 9/6/2024 1504

SOCIAL WORK FOLLOW-UP NOTE

9/6/2024
Brief description: Housing advocacy

Patient description, presenting problem, patient / family goals: Patient is a English speaking 99 year old female, receiving medical care with the HMC Senior Care Clinic.

SW referred by the medical team for support with housing advocacy. Pt having difficulties with their housing; their apartment manager has removed ADA accommodations and are threatening eviction. Louis has hired a lawyer and is feeling very stressed about their home environment.

Pt lives in Bainbridge Island and has Molina Medicare and Medicare Savings Plan (QMB Medicaid) insurance coverage.

Intervention / Outcome / Plan:
1. SW called pts son, Louis and reached his VM. SW left a message of introduction and encouraged return call for assistance with housing advocacy.
2. SW sent outreach message via mychart. SW contact information provided.

SW will remain available for continued support/assistance as needed.

Shannon McDonald, MSW

Clinical Notes

Telephone Encounter

Perez, Delmis Joel, RN at 8/30/2024 1510

Called the pt's son in reply to the voicemail left on his former provider MA's line. Son endorsed needing a picture of one of the pt's x-rays showing the right femur with the plate and screws. He indicated needing the picture by Tuesday. He wanted the picture forwarded via email which I told him was not legal. Alerted the son that a picture in the pt's Media File could suffice and will be attempted.

08/30/2024 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

Hi Louis,

In your mother's MyChart page, these are the steps to find the image added to her documents.

1. Click on "Your Menu"
2. Scroll to "Document Center" and click
3. Click on "My Documents"

The photo entered just now should be the first option. Let me know if you need further assistance.

Take care,
Delmis Perez, RN, BSN

Hello Jeanne and Louis,

I have scheduled you for the following appointment in our Primary Care Clinic. Details are below:

Appointment Date: Wednesday September 11, 2024
Appointment Time: 9:00 am
Provider: Nurse
Location: Husky Health Center

Please arrive 10-15 minutes prior to your appointment time for check-in. Please be prepared to be screened for Covid symptoms upon entry also be prepared to show your photo ID and insurance information. As a reminder, appointments that are cancelled late or no showed may result in a fee.

We are encouraging that all patients entering the building to have a mask on due to an increase volume of upper respiratory symptoms.

Parking is available in the Padelford Hall lots, N21 and N20, this is pay to park parking. Parking across the street in our 3 parking spots requires pre-authorization with HHC staff, and typically they are for patients having trouble walking . If you park across the street, you must inform check-in staff where you parked or you will be ticketed.

08/22/2024 - Patient Web Update in Husky Health Primary Care Clinic (continued)

Clinical Notes

Progress Notes

Navalurkar, Reema, MD at 8/20/2024 1010

SENIOR CARE CLINIC INITIAL VISIT NOTE

Clinical Notes (continued)

ID/CC: Jeanne Hoffman is a 99-year-old community-dwelling woman with chronic LLE venous stasis wounds, SNHL, and chronic back pain due to DJD with lumbar compression fractures presenting to clinic today with her son (Louis primary caregiver) to establish care.

This visit was abbreviated as their ferry was 30 minutes late getting into Seattle. It was lovely to meet Jeanne today; she would like to consolidate care at HMC/UW (previous PCP at Husky Health is retiring).

Baseline:
Lives in a 1br apartment with her son Louis on Bainbridge Island.
Accompanied today by her son/primary caregiver Louis. Transportation via ferry, then bus.
Interpreter: none

Chart review:
- admitted 11/22-11/28-2024 for CAP, which was treated with CTX/azithromycin. HDS and did not require supplemental oxygen. Hb downtrended from ~10 to ~8 (iron 14, TIBC 185, transferrin 132, tsat 8, ferritin 211) during hospitalization, attributed to NSAID use due to a reported melenic BM prior to admission. Given IV Fe x3 while inpatient and subsequently completed 8-week course of PPI; also advised to stop NSAIDs. PT/OT recommended discharge to SNF; family declined, preferred to discharge with HH PT/OT.
- slipped and fell in shower in Jan 2024, presented to ED on 1/18/24 (~2-3 weeks later) with hip pain that was attributed to DJD, chronic compression fractures of L1-L3; per chart, "She did catch herself with handrails but fell onto her lower back."
- has chronic venous stasis ulcers on LLE, followed by wound care (Husky Health Primary Care Clinic); noted to have increasing warmth/erythema in 6/2024, treated for cellulitis with ciprofloxacin 500mg BID x10d. In between wound care clinic visits, son has been doing wound care at home (uses medihoney, gauze).

Concerns today:
- no falls in the past year other than the one noted above.
- Louis denies concerns re: swallowing, says she is able to eat well.
- she reports she's been mindful about increasing greens in her diet, on recommendation of her optometrist.
- "Our manager is harassing us and trying to evict her. They took away her handrails and now she has to use a wheelchair all the time." Louis is talking to a lawyer about this. He is frustrated about lack of ADA accommodations. This has been really distressing for her, affecting her mood - "no one cares about me."
- Last Thursday 8/15, she scraped her L elbow on a door frame while in her wheelchair, resulting in an abrasion to the lateral/dorsal part of her elbow. Her son took her home, has been using iodine and other OTC antiseptics daily and bandaging it. Surrounding skin is erythematous, very tender, and indurated.

Geriatric ROS:
ADLs: dresses herself, toilets on her own. showers with some assistance from son.
IADLS: son helps with mealprep, finances, transportation; he helps with refilling prescriptions and she takes them on her own each day.
Cognition: she feels quite good, amazed and excited for "the big 1-0-0"; did not address in further detail today.
Mood: okay, though changes in her life recently have been stressful (PCP retired, housing difficulties <-- see HPI)
Mobility: walks around the house often without her cane, using a wheelchair outside the home.
Vision: wears glasses; last seen by optometry 3/2024
Hearing: decreased, has hearing aids (forgot them today)
Continence: has some urine leakage, working with home PT for pelvic strength.
Goals of Care: did not have time to address today
Frailty index/CFS-9: 6 (living with moderate frailty)

Problem List/Past Medical/ Surgical History:

Patient Active Problem List

Diagnosis

- Sensorineural hearing loss, unspecified
- Hypercholesterolemia

- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- History of recurrent deep vein thrombosis (DVT)
- Imbalance
- Primary osteoarthritis of both hips
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Primary open angle glaucoma (POAG) of both eyes
- Community acquired bacterial pneumonia
- Reduced vision

Outpatient Medication List:

Current Outpatient Medications

Medication	Sig	Dispense	Refill
• atorvastatin 10 MG tablet	Take 1 tablet (10 mg) by mouth daily.	90 tablet	3
• Calcium Carbonate 500 MG Oral Chew Tab	Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn .		
• Cholecalciferol 1000 units Oral Tab	Take 2 tablets (2,000 units) by mouth daily.		
• lidocaine 4 % patch	Apply 1 patch onto the skin every 24 hours. Apply to painful area for up to 12 hours in a 24 hour period.	15 each	0
• MULTIPLE VITAMIN OR	Take by mouth.		
• timolol maleate 0.5 % ophthalmic solution	instill 1 drop into both eyes twice a day	10 mL	6
• Wound Dressings (medihoney) topical gel	Apply topically every other day. Apply to wound before applying dressing	44 mL	3
• Wound Dressings (medihoney) topical gel	Apply topically daily. Apply to ulcerations on legs. Apply dressing over the Medi Honey.	88 mL	6

No current facility-administered medications for this visit.

Over the Counter/Other Supplements:
Fish oil
Multivitamin
Vit D
Vit B12

Pharmacy: Rite Aid on High School Rd, Bainbridge Island

Allergies: Review of patient's allergies indicates:

Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other and Skin: Rash
• Nitrofurantoin *confusion*	Other
• Penicillins *3/22/2024 Patient tolerate cephalosporins which she has had in the last year for cellulitis and pneumonia. William E Neighbor Jr, MD*	Skin: Rash
• Sulfa Antibiotics	Skin: Rash

Family History: deferred today

Social History:
Lives: a 1br apartment with her son Louis on Bainbridge Island
Marital Status: widowed in 1972
Children: two sons
Sexual History: not active
Social isolation/Loneliness: to discuss at next visit
Substance Use: none
Firearms: none
Nutrition: none
Education/Occupation: worked in business, now retired.
Health Literacy: quite good
DPOA/main contact: Louis (son)

Physical Exam:
BP (!) 155/90 | Pulse 64 | Temp 36.4 °C | SpO2 98%

Wt Readings from Last 3 Encounters:

11/28/23	**(!) 40.9 kg (90 lb 2.7 oz)**
10/10/22	45 kg (99 lb 3.3 oz)
10/05/20	51.1 kg (112 lb 9.6 oz)

General: well-nourished elderly woman sitting in her wheelchair; NAD.
CV: regular rate and rhythm. 2+ radial pulses, 2+ pedal pulses.
Resp: normal effort on RA.
Abd: soft, nondistended, and nontender to palpation
Ext: approx 4-5cm laceration on LUE with surrounding erythema, warmth, and tenderness; no discharge. Chronic appearing wounds (3) along lateral malleoli of LLE.

Assessment and Plan:

Clinical Notes (continued)

(S41.102A) Open wound of left upper extremity, initial encounter (primary encounter diagnosis)
Scraped elbow on doorframe while her wheelchair was being pushed through, sustained laceration with signs of surrounding cellulitis (warmth, induration, erythema, tenderness); no purulent discharge. Afebrile, HDS.
- Appreciate nursing wound care
- advised son to repeat wound care demonstrated today at home (eg, stop daily iodine, can use soap/water)
- cephalexin 500mg QID x7d

(I83.023, L97.329) Venous stasis ulcer of left ankle (HCC)
Has chronic wounds on LLE, along lateral malleoli; no signs of acute infection. Advised they continue to have regular wound care at current clinic as it is closer to them while we look into alternative options.
- appreciate nursing wound care
- continue pentoxifylline

(Z59.819) Housing instability
Son reports that their housing manager has removed grab bars and other ADA equipment and threatening eviction.
- Referral to Social Work

/// not addressed in detail today
(M47.816) Osteoarthritis of lumbar spine, unspecified spinal osteoarthritis complication status
Cannot find DEXA results on EMR; s/p alendronate (2008-2012).
- fall risk assessment at next visit
- continue vit D and calcium supplementation

Reema Navalurkar, MD
Geriatric Medicine Fellow

Patient seen and discussed with attending, Dr. Bennett.

Electronically signed by Navalurkar, Reema, MD at 8/21/2024 11:04 PM

Bennett, Katherine Ann, MD at 8/20/2024 1010

Attending Note
Patient was seen, examined, and evaluated with Reema Navalurkar, MD. I discussed this patient's history and physical findings as well as the plan for this patient. I have reviewed and confirm the findings and plan as documented in this note. Discussed wound care plan of care with RN in clinic after reviewing prior wound care documentation. Patient and son under significant stress from a variety of sources, including housing and have ongoing legal stressors related to that. Will connect with our SW to help with resources regarding housing and as an added layer of support. Recommended ongoing wound care with current wound care clinic as the ones we usually refer to are not at HMC and would be harder for them to get to. Her son described the wound care plan in detail and all wounds looked clean and dry and well cared for. There is some surrounding cellulitis on the LUE wound, so prescribing a course of antibiotics. Will continue remainder of comprehensive geriatric assessment in follow up given the late arrival (due to external factors related to unusual traffic/congestion on the way here). She has goals of living well past 100 and is eager to continue traveling and enjoying her life.

Electronically signed by Bennett, Katherine Ann, MD at 8/22/2024 12:57 PM

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 8/7/2024 0940

Jeanne Hoffman is a 99 yr old female in clinic with son, Louis, for continued wound care of Left Lower Extremity (LLE)

08/07/2024 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

venous stasis ulcers. Last visit was on July 31, 2024. Son explains there is a possible 2 bedroom apartment open for them to move into. Offered supportive statements. Next appointment 8/14/2024. Helped pt transfer with moderate assist from her wheelchair to the exam table.

Today's care:
1. Dressing removed from LLE.
2. Left lower leg was wrapped with a warm wet towel and chlorhexidine soap applied to the wounds on the left leg.
3. The LLE sites were wiped with NS moistened gauze.
4. Lidocaine 2% gel was applied to the LLE wounds.
5. Each open area was gently debrided using a 4 mm curette.
6. All sites were gently wiped with NS moistened gauze.
7. Each site was cleansed with Chlorhexidine swabs.
8. Carradres hydrogel dressings were cut to fit and applied to each wound
9. 4 inch stretch gauze was wrapped around the LLE and taped to itself with paper tape.
10. Surgilast 5.5 was placed over the gauze.
11. Replaced the sock and shoe the pt had on which she arrived.

Left Leg wounds. Measurements:
1. Medial Ankle: 2.6 cm x 2.7 cm x 0.2 cm
2. Medial Ankle Anterior Satellite: 0.4 cm x 0.4 cm x 0.2 cm
3. Proximal Lateral Ankle and Superior Lateral Foot: 7.2 cm x 2.3 cm x 0.2 cm
4. Distal Lateral Shin: 5.7 cm x 4.2 cm x 0.2 cm.

Transferred pt from exam table back to wheelchair. Pt able to bear own wt and transfer with minimal assist. Pt's son aware of appt next week.

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 7/31/2024 0940

Jeanne Hoffman is a 99 yr old female in clinic with son, Louis, for continued wound care of Left Lower Extremity (LLE)

07/31/2024 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

venous stasis ulcers. Last visit was on July 24, 2024. Son explains lawyers visited their home yesterday and the court case is still pending. Offered supportive statements. Next appointment 8/7/2024. Helped pt transfer with moderate assist from her wheelchair to the exam table.

Today's care:
1. Dressing removed from LLE.
2. Left lower leg was wrapped with a warm wet towel and chlorhexidine soap applied to the wounds on the left leg.
3. The LLE sites were wiped with NS moistened gauze.
4. Lidocaine 2% gel was applied to the LLE wounds.
5. Each open area was gently debrided using a 4 mm curette.
6. All sites were gently wiped with NS moistened gauze
7. Carradres hydrogel dressings were cut to fit and applied to each wound
8. 4 inch stretch gauze was wrapped around the LLE and taped to itself with paper tape.
9. Surgilast 5.5 was placed over the gauze.
10. Replaced both socks and slippers the pt had on which she arrived.

Left Leg wounds. Measurements:
1. Medial Ankle: 2.7 cm x 2.0 cm x 0.2 cm
2. Medial Ankle Anterior Satellite: 0.4 cm x 0.5 cm x 0.2 cm
3. Proximal Lateral Ankle and Superior Lateral Foot: 6.5 cm x 2.3 cm x 0.2 cm
4. Distal Lateral Shin: 5.8 cm x 4.3 cm x 0.2 cm. Peripheral skin accidentally scrubbed off when cleaning recently not included in measurement.

Transferred pt from exam table back to wheelchair. Pt able to bear own wt and transfer with minimal assist. Pt's son aware of appt next week.

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

07/29/2024 - Health Maintenance Letter

Letters

Reminder by Uw Mychart, Patient User on 7/29/2024

Status: Sent
Letter body:

Dear Jeanne Hoffman,

Thank you for choosing UW Medicine! Your Primary Care Provider, William E Neighbor Jr, MD, would like for you to schedule your Annual Wellness Visit; a no-cost preventative care benefit offered by Medicare. Your healthcare team believes this opportunity extends your options for maintaining and maximizing good health.

What is the Annual Wellness Visit?

This visit consists of a health risk assessment - a provider consultation where you discuss your health needs and risks with the provider. You can also help create a personalized preventative care plan to keep you healthy. We will review your list of medications and compile a list of your current healthcare providers. Other services may be combined with this visit; however, there may be additional charges.

William E Neighbor Jr, MD would like for you to have this visit done in-person or via Telemedicine if you prefer. You can schedule the first visit with your PCP and subsequently with a Care Manager on their team as agreed with the PCP.

To schedule your Annual Wellness Visit, please click here.

If you've already had your Annual Wellness Visit completed or if you are receiving routine medical care elsewhere, please contact the clinic at 206-685-1011 or click here to send us a message so that we can update our records.

We appreciate the trust you put in us to take care of your healthcare needs.

Sincerely,

Your Clinical Care Team
UW Medicine Primary Care

Hi Jeanne and Louis,

In order to provide Jeanne with the best care after Dr. Neighbor's retirement, we've submitted a referral to the Senior Care Clinic at Harborview. I'm told they've already tried to contact you. This clinic has more services than we do here at Husky Health, including nutrition and social work, and are better suited in meeting Jeanne's needs. Please try to schedule as soon as possible with them to establish care with a new provider.

Progress Notes

Noeldner, Jessica P, RN at 7/24/2024 0920

Jeanne Hoffman is a 99 yr old female in clinic with son, Louis, for continued wound care of Left Lower Extremity (LLE) venous stasis ulcers. Last visit was on July 17, 2024. Son continues to explain the court process by which they may

07/24/2024 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

be evicted and living in a tent within the next couple of weeks. Offered supportive statements. Next appointment 7/31/2024.

Today's care:
1. Dressing removed from LLE.
2. Left lower leg was wrapped with a warm wet towel and chlorhexidine soap applied to the wounds on the left leg.
3. The LLE sites were wiped with NS moistened gauze.
4. Lidocaine 2% gel was applied to the LLE wounds.
5. Each open area was gently debrided using a 4 mm curette.
6. All sites were gently wiped with NS moistened gauze
7. Melgisorb Ag was shaped to fit each wound
8. Carradres hydrogel dressings were cut to fit and applied to each wound
9. Vaseline was applied over all wounds
10. 4 inch stretch gauze was wrapped around the LLE and taped to itself with paper tape.
11. Surgilast 5.5 was placed over the gauze.
12. New socks were placed over both feet
13. Replaced both slippers the pt had on which she arrived.

Left Leg wounds. Measurements not taken but photo taken before debridement and uploaded to pt's chart.

Transferred pt from exam table back to wheelchair. Pt able to bear own wt and transfer with minimal assist. Pt's son aware of appt next week. Pt smiling and waved goodbye.

Jessica P Noeldner, RN

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 7/17/2024 1000

Jeanne Hoffman is a 99 yr old female in clinic with son, Louis, for continued wound care of Left Lower Extremity (LLE)

07/17/2024 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

venous stasis ulcers. Last visit was on July 10, 2024. The right forearm skin contusion has completely healed. Son continues to explain the court process by which they may be evicted and living in a tent within the next couple of weeks. Offered supportive statements. Next appointment 7/17/2024.

Today's care:
1. Dressing removed from LLE.
2. Left lower leg was wrapped with a warm wet towel and chlorhexidine soap applied to the wounds on the left leg.
3. The LLE sites were wiped with NS moistened gauze.
4. Lidocaine 2% gel was applied to the LLE wounds.
5. Each open area was gently debrided using a 4 mm curette.
6. All sites were gently wiped with NS moistened gauze
7. Melgisorb Ag was shaped to fit each wound
8. Carradres hydrogel dressings were cut to fit and applied to each wound
9. Vaseline was applied over all wounds
10. 4 inch stretch gauze was wrapped around the LLE and taped to itself with paper tape.
11. Surgilast 5.5 was placed over the gauze.
12. New socks were placed over both feet
13. Replaced both slippers the pt had on which she arrived.

Left Leg wounds. Measurements taken:
1. Medial Ankle: 2.8 cm x 2.3 cm x 0.2 cm
2. Medial Ankle Anterior Satellite: 0.6 cm x 0.6 cm x 0.2 cm
3. Proximal Lateral Ankle and Superior Lateral Foot: 7.3 cm x 2.4 cm x 0.2 cm
4. Distal Lateral Shin: 6.2 cm x 4.2 cm x 0.2 cm. Peripheral skin accidentally scrubbed off when cleaning recently not included in measurement.

07/10/2024 - Office Visit in Husky Health Same Day Clinic (continued)

Clinical Notes (continued)

Chief Complaint

Patient presents with

- Cough

Subjective

Subjective:

Jeanne Hoffman is a 99 year old female who presents on 7/10/2024.

Jeanne was brought into clinic today for her regular wound management. That was completed by Delmis. The legs were in much better shape than the last time I saw them. The erythema was gone from the lower extremities. The wounds were still consistent and debrided. But the rest of the lower leg tissue was with much improved and there actually was not even much edema.

But Jenny son is concerned regarding cough he says it seems to be that she is having a cough sometimes in the evening time and in the morning more so when she is laying down or relaxing and watching TV. She has been afebrile otherwise her behavior is within normal limits for what is typical for her. He denies her having any increased lethargy or malaise . He reports she definitely has consistently had some mild depression but that is unchanged and stable.

She has had no other symptoms no nausea vomiting or diarrhea no runny nose.

Objective

Objective:

Vitals: BP 137/73 | Pulse (!) 59 | Temp 36.8 °C (Temporal) | SpO2 99%

Physical Exam

99-year-old in NAD. Sitting in the wheelchair. Accompanied by her son. Bilateral TMs within normal's with good light fix and landmarks left tympanic membrane has some fluid bubbles behind it oropharynx without erythema or exudate no. No adenopathy of head neck region heart regular rhythm S1-S2 with distant heart sounds. But I could not appreciate any murmur. Lungs were clear to auscultation with easy unlabored respirations. No rhonchi wheezing or rales noted full aeration was noted with good breath. Patient did not use any accessory muscles. actually and during the time that I was with her she did not cough at all even with her deep inhalation

Assessment/Plan

Assessment and Plan:

Jeanne was seen today for cough.

Cough, unspecified type

I reassured the son that I do not find evidence of a pneumonia or concern for pneumonia. Either subjectively or objectively. I would not recommend any further evaluation.

As far as the etiology of the cough I do not know if it is related to some postnasal drainage. It does not seem like she is in any kind of failure. He is get a monitor longer and return to clinic if he notices any worsening or increased concerns

Progress Notes

Perez, Delmis Joel, RN at 7/10/2024 0940

07/10/2024 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Jeanne Hoffman is a 99 yr old female in clinic with son, Louis, for continued wound care of Left Lower Extremity (LLE) venous stasis ulcers. Last visit was on July 3, 2024. The right forearm skin contusion is healing nicely. Next appointment 7/17/2024.

Today's care:
1. Pt arrived without dressings.
2. The both lower legs were wrapped with a warm wet towel and chlorhexidine soap applied to the wounds on the left leg.
3. The LLE sites were wiped with NS moistened gauze.
4. Lidocaine 2% jelly was applied to the open wounds.
5. Each open area was gently debrided using a 4 mm curette.
6. All sites were gently wiped with NS moistened gauze
7. Melgisorb Ag was shaped to fit each wound
8. Carradres hydrogel dressings were cut to fit and applied to each wound including a new medial mid-shin scabbed wound
9. Vaseline was applied over all wounds
10. 4 inch stretch gauze was wrapped around the LLE and taped to itself with paper tape.
11. Surgilast 5.5 was placed over the gauze.
12. Right LE had Petrolatum Jelly applied to the pink skin
13. RLE wrapped with 4 inch stretch gauze and taped to itself with paper tape
14. The socks were put back on
15. Replaced both slippers the pt had on which she arrived.

Left Leg wounds. Measurements not taken:
1. Medial Ankle: 2.8 cm x 2.0 cm x 0.2 cm
2. Medial Ankle Anterior Satellite: 0.6 cm x 0.6 cm x 0.2 cm
3. Proximal Lateral Ankle and Superior Lateral Foot: 7.4 cm x 2.5 cm x 0.2 cm
4. Distal Lateral Shin: 6.5 cm x 4.2 cm x 0.2 cm

Right Lower Leg:
1. The pink area and itchiness have both decreased

Immunization Documentation

99 year old - Is this patient eligible for VFC or Adult supply vaccine? **Adult (18 and under = VFC)**

Interpreter: No

Has patient ever fainted after receiving vaccine/blood draw? : No [If YES, pt should be lying down to receive vaccine]

Vaccine Screening Questions

1	Are you allergic to Latex?	NO
2	Have you had a serious reaction or an allergic reaction to a vaccine?	NO
3	Do you currently have a moderate or severe illness,	NO

07/10/2024 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

	including fever?	
4	Are you pregnant or planning to become pregnant?	NO (Note: If YES: HPV and Heplisav are contraindicated in pregnancy. Consult with provider prior to giving PPSV23/PCV15/PCV20, HepA, Hib, MenACWY or MenB)
5	Have you ever had a seizure or any neurological problem associated with a vaccine? *(DTaP/TDaP/DTP pertinent)*	NO
6	Is patient receiving any **LIVE** vaccinations today? *(Varicella-Chickenpox, MMR-Measles/Mumps/Rubella, Zoster-Shingles, Yellow Fever)*	No [determine need for TB screening if getting live virus vaccine] **NOTE:** • If **YES** to any of the questions above – Do **NOT** give vaccine. Consult with RN or provider in clinic. (#5 can be YES if all Live vaccine questions are answered NO) • If **NO** to all questions above - Patient may receive vaccine.
7	Do you need to receive the Flu vaccine today?	NO

Imms administered today: **Zoster (Shingrix)**

All patients are encouraged to wait 15 minutes before leaving after receiving any vaccine.

VIS given 7/10/2024 by Delmis J Perez, RN

Was the patient alert, oriented, and without adverse reaction after the vaccine was given YES

Delmis J Perez, RN

Electronically signed by Perez, Delmis Joel, RN at 7/17/2024 11:42 AM

Medication Administrations

zoster recombinant vaccine (Shingrix) injection 0.5 mL [305110105]

Ordering Provider: Neighbor Jr., William E, MD
Ordered On: 04/12/24 1255

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 7/3/2024 0940

Jeanne Hoffman is a 99 yr old female in clinic with son, Louis, for

07/03/2024 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

continued wound care of Left Lower Extremity (LLE) venous stasis ulcers. Last visit was on June 26, 2024. She has a new right forearm skin contusion from getting it caught in the train doors today. Next appointment 7/10/2024.

Today's care:

1. The home dressings were gently removed.
2. The both lower legs were wrapped with a warm wet towel and chlorhexidine soap applied to the wounds on the left leg.
3. The LLE sites were wiped with NS moistened gauze.
4. Lidocaine 2% jelly was applied to the open wounds.
5. Each open area was gently debrided using a 4 mm curette.
6. All sites were gently wiped with NS moistened gauze
7. Melgisorb Ag was shaped to fit each wound
8. Carradres hydrogel dressings were cut to fit and applied to each wound including a new medial mid-shin scabbed wound
9. Vaseline was applied over all wounds
10. 4 inch stretch gauze was wrapped around the LLE and taped to itself with paper tape.
11. Surgilast 5.5 was placed over the gauze.
12. Right LE had Petrolatum Jelly applied to the pink skin
13. RLE wrapped with 4 inch stretch gauze and taped to itself with paper tape
14. The socks were put back on
15. Replaced both slippers the pt had on which she arrived.

Left Leg wounds. Measurements not taken:

1. Medial Ankle: 2.6 cm x 1.8 cm x 0.2 cm
2. Medial Ankle Anterior Satellite: 0.4 cm x 0.6 cm x 0.2 cm
3. Proximal Lateral Ankle and Superior Lateral Foot: 6.8 cm x 2.2 cm x 0.2 cm
4. Distal Lateral Shin: 6.2 cm x 4.2 cm x 0.2 cm
5. Medical mid-shin: scabbed abrasion

Right Lower Leg:

1. The skin is now just pink and itchy

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 6/26/2024 1100

Jeanne Hoffman is a 99 yr old female in clinic with son, Louis, for continued wound care of Left Lower Extremity (LLE) venous stasis ulcers. Last visit was on June 12, 2024.
Son explains the proceedings of the eviction lawsuit as having another hearing in mid-July. About 20 minutes was spent discussing cooperation with the resources available on Bainbridge Island to aid in their desire to continue living

06/26/2024 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

there.
Today's wound care is described below. They had to miss the Thursday, June 20, 2024. Next appt scheduled for July 3, 2024, at 9:40 AM.

Today's care:
1. The home dressings were gently removed.
2. The both lower legs were wrapped with a warm wet towel and chlorhexidine soap applied to the wounds on the left leg.
3. The LLE sites were wiped with NS moistened gauze.
4. Each open area was gently debrided using a 4 mm curette.
5. All sites were gently wiped with NS moistened gauze
6. Melgisorb Ag was shaped to fit each wound
7. Carradres hydrogel dressings were cut to fit and applied to each wound
8. 4 inch stretch gauze was wrapped around the LLE and taped to itself with paper tape.
9. Surgilast 5.5 was placed over the gauze.
10. The socks were put back on
11. Right LE had Petrolatum Jelly applied to the dry skin and the scaly skin gently debrided with moist gauze
12. RLE wrapped with 4 inch stretch gauze and taped to itself with paper tape
13. Replace both slippers the pt had on which she arrived.

Left Leg wounds. Measurements not taken:
1. Left Medial Ankle: 2.6 cm x 1.5 cm x 0.2 cm
2. Left Medial Ankle Anterior Satellite: 0.8 cm x 0.8 cm x 0.2 cm
3. Left Proximal Lateral Ankle and Superior Lateral Foot: 7.7 cm x 2.5 cm x 0.2 cm
4. Left Distal Lateral Shin: 6.2 cm x 4.0 cm x 0.2 cm

Right Lower Leg:
1. The weeping petechiae have resolved with dry scaly skin left.

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Same Day Clinical Staff Pool (supporting Christina A Riesen, RN)	6/26/2024 5:09 AM

The would has improved greatly, redness disappeared after improving home cleaning, a rash developed, expected, as disappeared.

Our home environment has not changed we are being forced to homelessness, because we asked for reasonable accommodation and medical necessity devices.

Please note: unable to make appointment on 26th.
A Hearing Aid appointment was scheduled for 26th....this appointment at Harborview must be kept.

Hi Jeanne,

This is Nina, one of the nurses at Hall Health. We saw that you were not able to make it to your appointment today. I know you all are typically scheduled to come in on Wednesdays but we were closed yesterday.

How is the wound doing. Last week, it was pink and hot up to below the patella (knee cap area). Has that improved at all?

06/20/2024 - Telephone in Husky Health Same Day Clinic (continued)

Messages (continued)

Are you having issues with thrush still? Or has the medication been helpful.

Nina, RN

Clinical Notes

Progress Notes

Van Hoff, Linda A, ARNP at 6/12/2024 1000

Chief Complaint

Patient presents with

- Wound Care

Subjective

Subjective:

Jeanne Hoffman is a 99 year old female who presents on 6/12/2024.

Jeanne was brought in by her son Louis for wound management. Her left lower extremity which has chronic ulcerations was cultured to find 1+ staph and 1+ Pseudomonas.

She remains afebrile and with her usual capacities at this time. Louis cares for the wounds at home regularly with chlorhexidine and dressings. They are here for debridement and redressing.

No additional or new complaints.

Objective

Objective:

Vitals: BP (!) 174/80

Physical Exam

99-year-old in NAD. Left ulceration wounds as documented by nursing noted with yellow exudate and bedded with them. Following debridement they are clean beefy red and appropriate. Warmth and redness are noted to right below the knee. This is increased in area compared to previous evaluation.

Right leg has developed petechial rash.

Assessment/Plan

Assessment and Plan:

Jeanne was seen today for wound care.

Cellulitis of left lower extremity

- ciprofloxacin 500 MG tablet; Take 1 tablet (500 mg) by mouth 2 times a day for 10 days. Dispense: 20 tablet; Refill: 0

Pseudomonas infection

- ciprofloxacin 500 MG tablet; Take 1 tablet (500 mg) by mouth 2 times a day for 10 days. Dispense: 20 tablet; Refill: 0

Due to the increased tissue erythema and warmth noted on the left lower extremity. And with the positive Pseudomonas covering with a different antibiotic. Patient has no allergies to ChloraPrep flora quinolones. Her GFR and creatinine will support regular dosing without dose adjustment.

She is to take 1 dose p.o. twice daily. Lewis is warned if she ends up having strange behavior or if he notes fever he is to bring her to the ER. Concern would be that this could move into an osteomyelitis or septic situation. I have concern regarding that right leg that

Additional ulcerations may develop. At this point in time it looks like a vasculitis of the lower extremity.

06/12/2024 - Office Visit in Husky Health Same Day Clinic (continued)

Clinical Notes (continued)

Advise return to clinic next week on Thursday due to holiday and work schedules for them. For follow-up for a recheck and also an appointment expansive time available for debridement. Continue home care measures as directed by nursing

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

Instructions: Take 1 tablet (500 mg) by mouth 2 times a day for 10 days.
Authorized by: Van Hoff, Linda A, ARNP | Ordered on: 6/12/2024
Start date: 6/12/2024 | End date: 6/22/2024
Quantity: 20 tablet | Refill: No refills remaining

Stopped in Visit

cephalexin 500 MG capsule

Discontinued by: Van Hoff, Linda A, ARNP | Discontinued on: 6/12/2024
Reason for discontinuation: Dose adjustment

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 6/12/2024 0940

Jeanne Hoffman is a 99 yr old female in clinic with son, Louis, for continued wound care of Left Lower Extremity (LLE) venous stasis ulcers. Last visit was on June 5, 2024.

06/12/2024 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Pt and son continue to describe difficulty managing wound care at their residence due to limitations of space for storing the appropriate equipment for home treatments, ensuring clean spaces for dressing changes, and delayed repairs leaving open ceilings and unresolved moisture abatement increasing the risk of airborne pathogens. Also described are safety concerns in the shower where appropriate fall prevention interventions cannot be implemented and the pt has experienced at least one fall needing an ER visit. Their living situation is such that one of them reportedly sleeps on the couch.
Pictures of their residence show lifelong accumulated belongings which need more space than a one bedroom apartment can provide. These belongings are important for the quality of life for the patient and her son. Per the son, lack of space also impacts the quality of food for the both of them.

Today's wound care is described below. A provider appt was scheduled for evaluation of the wounds after one week of antibiotic therapy. Pt next scheduled on Thursday, June 20, 2024, for woundcare visit and provider evaluation

Today's care:
1. The home dressings were gently removed.
2. The left lower leg was wrapped with a warm wet towel and chlorhexidine soap applied to the wounds.
3. The sites were wiped with NS moistened gauze.
4. Lidocaine 2% jelly was applied to the open wounds.
5. Each open area was gently debrided using a 4 mm curette.
6. All sites were gently wiped with NS moistened gauze
7. Melgisorb Ag was shaped to fit each wound
8. Carradres hydrogel dressings were cut to fit and applied to each wound
9. 4 inch stretch gauze was wrapped around the LLE and taped to itself with paper tape
10. The sock was put back on. Son had dressed pt with up to thigh pressure stockings
11. Right LE with petroleum gauze placed over the area
12. RLE wrapped with 4 inch stretch gauze and taped to itself with paper tape

Left Leg wounds. Measurements not taken:
1. Left Medial Ankle
2. Left Medial Ankle Anterior Satellite
3. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long
4. Wound between 3 & 5
5. Left Distal Lateral Shin and small medial satellite

Right Lower Leg with pictures taken:
1. Multiple small weeping petechia like wounds in a patch at distal tibia

Electronically signed by Perez, Delmis Joel, RN at 6/13/2024 12:23 PM

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

Hi Louis,

Please see the changes made on yesterday's visit note and let me know what you think. I met with one of our medical directors today who stated better evaluations considered when making housing decisions are made by Social Workers, Physical or Occupational Therapists, and home nursing services. Have you ever used the

Jeanne Hoffman is a 99 yr old female in clinic with son, Louis, for continued wound care of Left Lower Extremity (LLE) venous stasis ulcers. Last visit was on June 5, 2024.
Pt and son continue to describe difficulty managing wound care at their residence due to limitations of space for storing the appropriate equipment for home treatments, ensuring clean spaces for dressing changes, and delayed repairs leaving open ceilings and unresolved moisture abatement increasing the risk of airborne pathogens. Also described are safety concerns in the shower where appropriate fall prevention interventions cannot be implemented and the pt has experienced at least one fall needing an ER visit. Their living situation is such that one of them reportedly sleeps on the couch.
Pictures of their residence show lifelong accumulated belongings which need more space than a one bedroom apartment can provide. These belongings are important for the quality of life for the patient and her son. Per the son, lack of space also impacts the quality of food for the both of them.

Hi Louis (and Jeanne),

06/10/2024 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Messages (continued)

Thanks for this message. I want to iterate that I'm not a wound care specialist but am a nurse with much wound care experience during my 19 year career. Dr. Neighbor does not return to clinic until later this summer so I'll have other providers review the letter request for what deems most appropriate. In this file, Jennifer Melsher is an ARNP and not an MD. It's most appropriate to list her as Jennifer Melsher, ARNP.

See you Wednesday,
Delmis

Delmis, RN, would care specialist.

Please review PDF....with particular attention on OSHA 1910.1030(a).

Jean's Medical treatment is very important, to prevent Bacterium/Pathogens, home health care and Medical Team is vital.

HRB eviction, is violating OSHA Medical Standards.

Any Letter in support, or acknowledgement of medical necessity, from others involved in Jean care and my duty to perform home care would care treatment.

Document (below)

SUPERIOR COURT OF THE STATE OF WASHINGTON

COUNTY OF PIERCE

Housing Resources Bainbridge (HRB), a Washington non-profit organization,

No. 24-2-01082-18

Plaintiff

DECLARATION OF LOUIS ALLOIN

vs.

Louis Alloin, Jean Alloin, any other residents of the premises,

Defendants

I, Louis Alloin, am a defendant in the above matter, over the age of 18 years, competent to testify, and have personal knowledge regarding the following:

A. PLEASE TAKE NOTICE: Housing Resource Bainbridge has knowingly, with wanton desire, has unlawfully engaged retaliation and revenge, in this proceeding, as specified under HUD Protected Class Harassment & Retaliation Policy, also prohibits retaliation (coercion, intimidation, threats, or interference) against any person who has exercised fair housing rights or helped another person to exercise them, or participated in any fair housing investigation. Section 818 of the Fair Housing Act makes it unlawful to retaliate against anyone because a person has filed a discrimination complaint or has assisted someone with filing a discrimination complaint.

B. Housing Resource Bainbridge retaliation:

1). Failing to renew a lease because a person has filed a fair housing complaint

2). Firing an employee who has assisted a tenant with a reasonable accommodation request

3). Requiring that a medical provider be willing to testify in court about the nature of their client's disability.

4). Enforcing different terms and conditions for a tenant after they

06/10/2024 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Documents (continued)

have filed a fair housing complaint.
Ignoring maintenance requests from a tenant who previously filed a fair housing complaint

5). Reasonable Accommodations and Modifications for People with Disabilities Denial
6). Harassment & Retaliation
7). Domestic Violence & Fair Housing

1. On or around 2015-2016, my mother, Jean Alloin (Married Hoffman), and I, Louis Alloin, made inquiry for purpose applying for 2 bedroom housing with Housing Resources Bainbridge (HRB), we were instantly rejected and denied application to be placed on afforable housing waiting list. During 2018 Cross Sound Church (CSC) (Representatives: Pastor Dave O'Connell, Jim Danials & Ben Sias, BIPB) , which we are members, became involved in helping us secure 2 bedroom with Housing Resources Bainbridge (HRB), University of Washington Medical Center, Hall Health Primary Care Center, under William (Bill) Edward Neighbor, Jr. MD, Clinical Professor, Department of Family Medicine, on April 19, 2018, issued a to Bainbridge Municipal Court (Domestic Violence), during a restraint order procedure, against a white supremacist, Douglas Hoffman and his followers, who did physically and verbal threaten and violent behavior harassment, with expressed hate speech (Anti LGBTQ), for participation in New York Stone Wall Movement, advocating Washington State Decriminalization of Sodomy Laws on Bainbridge Island. Thereby Cross Sound Church members, CSC Pastor Dave O'Connell, Jim Daniels & Ben Sias BIPD Officer, began Domestic Violence Protection) negotiating for a 2 bedroom housing with Housing Resources Bainbridge (HRB) (Jean and I were not permitted in meeting) On/about June 10, 2019, a meeting was scheduled at Housing Resources Bainbridge (HRB) Office Building, with a large Cross Sound Church Cong rational Members, were present, to show solidarity. Phodra Elliott and Marta (last name unknown) The application form indicates the disabilities that Jean (and Louis) are Senior Citizen, receiving Social Security, EBT, Medical Insurance Benefits. Louis 74 year old, is member of LGBTQ Community since the 1968-1969 New York Stone Wall Movement, who was subject homophobic hate discrimination, charged for being a homosexual, raped multiple time, sexual abused, beaten multiple time, property stolen, subject to death threats, hate speech and many other acts of hate discrimination, intolerance, prejudice and bias, that never stops, just continuous indifference. On October 30, 1997 at 7pm, while walking to a Gay Night Club in Seattle, Capital Hill Community, I was surrounded by 7 (seven) White Supremacist, thereby boot kicked to near death, having lost left arm mobility (parallelized), both

06/10/2024 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Documents (continued)

hip joints were extremely damaged, along with broken ribs and lost of property (Attacker were never apprehended) (Sought Medical Treatment at San Francisco General/primary care facilities/treatment rehabilitation was establish. On/About December 10, 2010, was my last self walking mobility was restricted to a walker, was placed on oxycontin pain medication until 2017. October 2014, at University of Washington, Bone and Joint Center and Northwest Hospital, Both Hip Joint Replacement Surgery was performed. Thereby, Under University Of Washington Sport/Physical Therapy, (Musculoskeletal pain affects bones, joints, ligaments, tendons or muscles. My Hip injury caused sudden, severe pain. interferes with usual life activities). Rehabilitation is slow and painful, Sport/Physical Therapy was performed at UW Medical Center – Roosevelt and Hall Heath (Recovery after hip replacement surgery involves a slow process of rehabilitation. Swelling remains a serious issue for most patients, each person will recover at a different rate,)

UW Exercise Training Center and Bainbridge Island Aquatic Center (hip rotation, flex). Physical Therapy included bike, walking/stair climbing and jogging is still painful requiring advanced physical therapy. Housing Resource Bainbridge has refused to accept my disability, thereby placing obstacles to prevent rehabilitation by refusing reasonable accommodation (Exercise Bench refused to allows use in 204w)(Witness Dave O'Connell) and denying 2 bedroom medical necessity reasonable accommodations, subjecting me hateful rejections for being disabled by depriving home therapy, educational training opportunities, career passion and other enjoyment of a fair housing home.

We have lived at the subject premises since June 19, 2019 under constant discombobulation to keep us oppressively confined and repressively deprived.

Jean Alloin (Decease Husband Robert F. Hoffman, USN 1-9-1972) is currently 99.7 years old and her diagnosed medical condition and/or disabilities include: On/about 1974, was a passenger in automobile accident, received serve injuries to left ankle, requiring skin graft and on going physical therapy. Thereby, gnarled veins, most commonly appearing in the legs and feet., as jean wounds treatment can help, but this condition are hard to cured, chronic varicose veins can last for years or be lifelong treatment to prevent serious infection, causing aching pain, mobility discomfort, circulatory problem. Treatment involves compression stockings, exercise, infection preventive treatment (washing/disinfecting procedures to close or remove the veins. Jean suffers from venous leg ulcers (VLU) (open sores on legs and ankle) occur when the veins in legs does not push blood back up to heart as well as they should. Blood backs up in the veins, building up pressure. Increased pressure and excess fluid in the affected area cause an open sore to form. Jean's

06/10/2024 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Documents (continued)

treatments include: Clean the wound regularly, apply a wound dressing, to the ulcer areas, wear compression stockings to prevent blood from pooling in the legs and to speed healing, antibacterial ointment or another topical medicine to prevent or treat infectious area. Jean's VLU shows prolonged healing time with advanced age, nutritional deficiencies, colder temperature, deep venous thrombosis, and larger wound area, contribute to Jean's suffering under Housing Resource Bainbridge denying medical necessity and reasonable accommodation, being denied by Jessica Campbell and Phedra Elliott refusal to accept Jean's medical anguishing suffering do to hate discrimination, towards home medical supplies, medical devices and mobility aid, exercise equipment, handrails with living area mobility, dietary to meet nutritional needs are being denied and subject of eviction.. Being forced to reside in a housing that in unfit of disabilities home treatment and indifference toward mobility aids and devices, affect our well being, safety and enjoyment

Do to Jessica Campbell and Phedra indifference refusing Reasonable Accommodation, demanding without allowing us opportunity to show cause for medical necessity (formal meeting denied), ordered removal of BioMedical Disinfecting Washer (BioMedical Washer was obtained at forefront of 2019-2020 Pandemic, as HRB closed/restricted access to laundry room, " talks denied exceptional access for medical necessity/reasonable accommodation, to clean disinfect bio soiled fabrics/medical fabrics.

HRB Jessica Campbell and Phedra Elliott denying Medical Necessity and Reasonable Accommodation Requests for Devices/Equipment

Jean contracted Urinary Tract Infection/UTI is an infection of the urinary tract, specifically the urethra. are caused by bacteria from infected biomedical fabric/soiled clothing**.** Jean also contracted E.coli,

NOTE 1: From William E Neighbor Jr, sent March 21, 3:35 AM

Jeanne:
Your urinalysis suggests an infection. I have submitted the urine for culture and antibiotic sensitivity testing. I will write you when I receive those results. As you do not have any acute symptoms we will wait for those tests.
William E Neighbor Jr, MD

NOTE 2:From William E Neighbor Jr, sent April 30, 1:58 AM

Jeanne:
Your urine culture last week grew mixed bacteria. If you are feeling well without fever and without urinary symptoms including cloudy urine, you would not need antibiotics. However, if you do have any urinary symptoms, perhaps you should receive a second course of the antibiotic cephalexin that was prescribed in later March. I have sent in a prescription so you have it on hand.

CAUSE HRB DENYING MEDICAL NECESSITY AND REASONABLEACCOMMODATION

(see attached Exhibit found in Court submitted “Show Cause Affidavit on/before May 30, 2024 to Kiitsap County Superior Court and PDF emails sent to attorney's, documented images showing details of Jean with wheeled walker and wheelchair at HRB 204w Housing Complex)(such Medical Necessity Mobility Devices are parked on Patio/near 204w entry since June 19, 2019 for immediate access for transit in community.

1. I am (Louis Alloin) 74 years old and my disabilities (Noted above) include: Discrimination hostility for being supportive of LGBTQ Community, Injuries from violent bodily injuries, HRB discrimination toward medical necessity devices for joint bone recovery.

2. When HRB approved our forced coerced application on or about _June 19, 2019 and assigned us to a stated “one bedroom “ (unforeseen, expecting a 2 bedroom) for my mother and I to share, (discovering it was actually very tiny one room, resembling a studio) (I Louis Alloin stated a strong verbal declaration of opposition at that time of being shown a one room/nor 2 bedroom) (CSC Witnesses: Dave O'Connell, Jim Danials, Ben Sias and other CSC Members in attendance) (HRB Employee Marta (Last Name Unknown) was advised clearly of inadequate , unfit for disabilities, damaged: bath & shower, stove and refrigerator (requested a full private inspection to determine 204w defects, damage report was as denied). During 204w showing, and my declared refusal to accept, I Louis Alloin, was confronted with intimations coercion, treats of homeless deprivation and pleading (Hours of discussions to discombobulation/confuse) to accept 204w, against our better judgment and will. Advised to take 204w as a temporary non permanent housing, while our name was placed on waiting list for 2 bedroom (which never occurred, nor were we placed on waiting list)

06/10/2024 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Documents (continued)

Please Note: Prior to, HRB Housing Negotiations, a Safeway produce employee , provided information advising us of a HRB 2 bedroom Availability , located on High School Road, just past BHS. We advise HRB and CSC Team, we were rejected because we had no children under 18 years.

3. On or around June 19, 2024 to current date, I Louis Alloin constantly requested a reasonable accommodation hearing/meeting with HRB(Including CSC Dave O'Connell) and during Inspection/in person discussion showing cause/demonstrating the 204w need for medical necessity for both Jean and I Louis Alloin (caregiver/medical home treatment intern)(Witness: Dave O'Connell) to have a biomedical washing machine in our unit (Specifically/not limited too during Pandemic years)(Please note: HRB does not have a specific form , nor offers a reasonable accommodation, nor a medical necessity form, all communications are done/performed by in person communication contacts, phone contacts (Howeer Phone and email are never responded too. Contact is done byway of CSC Dave O'Connell, in which e,ails are forward and in person contact with HRB) HRB never includes me in any discussion and during inspections, only responds is NO.
4. I had brought in the washing machine on line (see attached Exhibit as removed fron 204w (witness:/photo: Dave O'Connel)
5. https://www.amazon.com/SUPER-DEAL-Portable-Apartments-Delicates/dp/B07B94ZR74/ref=asc_df_B07B94ZR74/?tag=hyprod-20&linkCode=df0&hvadid=693770001770&hvpos=&hvnetw=g&hvrand=9589369179041631246&hvpone=&hvptwo=&hvqmt=&hvdev=c&hvdvcmdl=&hvlocint=&hvlocphy=9033314&hvtargid=pla-570087727585&psc=1&mcid=9436c91869ce37fda7f745eb02836998&gad_source=1,
6. because, as my mother's caretaker, (Member of Medical Team/home intern), I had to wash the bloodied bandages from her ulcerated legs daily and inconstant/unary tract infected medical fabrics/clothing they constituted a biohazard and need to be handled and cleaned immediately, to preent spreading infectious bacterium (has been discussed with Dave Kargan, who had dialog with HRB (Representatives?) had offered to pay for laundry services (Too Experience for just very small wash loads (pair sock's and a medical wound care towel)
7. On or around 2013 inspection (Witness Dave O'Connell), Jessica Campbell, HRB management required me to remove the washing machine or face a 10 day eviction notice because we were being denied medical necessity and reasonable accommodations. HRB would not have any discussions, nor tolerate any meeting with me (Louis), nor UW Medical Intervention on wound care home treatment necessity (Discussions with UW HHC RN Delmis.
8. Without the biomedial washing machine, I am left to hand-wash my mother's bloodied bandages/treatment medical aids/inconstant infectious clothing/pads, unavoidably handling

06/10/2024 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Documents (continued)

those biohazards. While washing those bandages in (a biobucket or the sink or the shower/ area) is no medically recommended, being under duress and having to perform medical home treatment, the lost of biomedical washer meant improvising, to perform mu official medical home care necessity treatment, with consultation with UW HHC Medical Team, as needed, under pressure to perform professionally, they are treatment occasion, were patient jerks/muscle spasm causing splashed some water but never any deliberate or wanton dumping of water in a building structure, denying any deliberate “flooding” to occurred whatsoever at any time, as a professional due caution and safety procedures and OSA are followed (however accidents occur that are uncontrollable) HRB never offered rental insurance for Biomedical washer nor any offered discussion to assist in reasonable accommodations. National Occupational H Act/OSHA Healthcare workers (HCWs) are occupationally exposed to a variety of infectious diseases during the performance of their duties. The delivery of healthcare services requires a broad range of workers, such as physicians, nurses, technicians, clinical laboratory workers, first responders, building maintenance, security and administrative personnel, social workers, food service, housekeeping, caregivers and mortuary personnel, including hospitals, nursing care facilities, outpatient clinics (e.g., medical and dental offices, and occupational health clinics), ambulatory care centers, and emergency response settings. . The primary routes of infectious disease transmission (Jen and Louis Urinary Bladder infection, eColi contact, bacterium infections experience from HRB denied diomedical washer) in U.S. healthcare settings are contact, droplet, and airborne. Contact transmission can be sub-divided into direct and indirect contact. Work Place and Home Medical Treatment Accidents and Injuries are due in large part to “overexertion” “denied proper equipment “related to repeated manual patient handling activities, often involving heavy manual lifting associated with transferring, and repositioning patients and working in extremely awkward postures, as tiny one room. The General Duty Clause of the OSH Act (the law that created OSHA) requires employers (HRB) to provide workers with a safe workplace that does not have any known hazards that cause or are likely to cause death or serious injury. OSHA’s recordkeeping regulation at section 1904.7(b)(5)(ii)(D) defines first aid in part as “Using wound coverings such as bandages, Band-Aids™, gauze pads, etc.; or using butterfly bandages or Steri-Strips™ (other wound closing devices such as sutures, stitches, etc. are considered medical treatment).” OSHA's Bloodborne Pathogens Standard (29 CFR 1910.1030) as amended pursuant to the 2000 Needlestick Safety and Prevention Act, is a regulation that prescribes safeguards to protect workers against health hazards related to bloodborne pathogens.

06/10/2024 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Documents (continued)

1910.1030(a)

Scope and Application. This section applies to all occupational exposure to blood or other potentially infectious materials as defined by paragraph (b) of this section. *Contaminated* means the presence or the reasonably anticipated presence of blood or other potentially infectious materials on an item or surface. *Contaminated Laundry* means laundry which has been soiled with blood or other potentially infectious materials or may contain sharps.

Decontamination means the use of physical or chemical means to remove, inactivate, or destroy bloodborne pathogens on a surface or item to the point where they are no longer capable of transmitting infectious particles and the surface or item is rendered safe for handling, use, or disposal. *Exposure Incident* means a specific eye, mouth, other mucous membrane, non-intact skin, or parenteral contact with blood or other potentially infectious materials that results from the performance of an employee's duties. *Handwashing facilities* means a facility providing an adequate supply of running potable water, soap, and single-use towels or air-drying machines.

Other Potentially Infectious Materials means:
(1) The following human body fluids: semen, vaginal secretions, cerebrospinal fluid, synovial fluid, pleural fluid, pericardial fluid, peritoneal fluid, amniotic fluid, saliva in dental procedures, any body fluid that is visibly contaminated with blood, and all body fluids in situations where it is difficult or impossible to differentiate between body fluids;*Sterilize* means the use of a physical or chemical procedure to destroy all microbial life including highly resistant bacterial endospores.

Universal Precautions is an approach to infection control. According to the concept of Universal Precautions, all human blood and certain human body fluids are treated as if known to be infectious for HIV, HBV, and other bloodborne pathogens.

Work Practice Controls means controls that reduce the likelihood of exposure by altering the manner in which a task is performed (e.g., prohibiting recapping of needles by a two-handed technique).

HRB is denying OSHA Reasonable Accommodation for home treatment, medical safety.

.

9. In addition, on or around _____ management told me I had to get rid of the following items from our unit (and give their stated reason for each item):
10. _____
_____
11. _____
_____
12. _____

14. _____
_____

15. On or around _____, I provided a letter from the doctor at UWMC dated September 16, 2020, and a doctor's letter from 2018 that together indicated my mother needed my caregiving support and that we needed a two-bedroom unit. (See attached Exhibit ___, doctors' letters.). The response I received was _____
_____
_____.

16. Our Lease Agreement Rules and Regulations (see attached Exhibit _____) indicates on page 1 that HRB would make reasonable accommodations for residents with disabilities. That has not been our experience at all.

17. On or around _____, I informed management of our need for a working stove, they never provided one and never fixed the existing one. Instead, their response was
_____
____. I had to secure a used stove for the unit through the generosity of a local construction company's donated stove and labor
_____
_____. (LOUIS: forward to me any email for such repair requests – the lease says such requests were to be emailed to "Jeannette@housingresourcesbi.org")

18. (repeat #12 for any other repairs/requests that have gone unfixed – BUT NOTE that none of the complaints about the place or its people can be a defense in this unlawful detainer/eviction lawsuit about the claim of flooding damage/waste.)_____
_____
_____
_____
_____
_____

LOUIS: What is your response if the Court says you have too much stuff packed into that small space for the landlord to come to inspect for the source of the water damage? HRB is not required to move you to a 2BR unit if they don't have one (or even if they do have one, they could just say you're right, 2 people should not be living in that space and terminate your residency if you've never gone month-to-month but had successive leases for 6-12 months without a break).

Active at the End of Visit

acetaminophen 500 MG Oral Tab

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions:
1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 6/12/2024
Action: Patient not taking

Calcium Carbonate 500 MG Oral Chew Tab

Discontinued by: Clark, Trika L, Pharmacy Technician
Discontinued on: 1/9/2025
Reason for discontinuation: Discontinued by patient
Instructions: Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 1/9/2025

Cholecalciferol 1000 units Oral Tab

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/20/2019
End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA
Entered on: 9/4/2019
End date: 3/8/2025
Informant: Patient Reported

ofloxacin 0.3 % ophthalmic solution

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Place 1-2 drops into left EYE 4 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/10/2022
Start date: 10/10/2022
End date: 6/12/2024
Action: Patient not taking
Quantity: 5 mL
Refill: 1 refill by 10/10/2023

Wound Dressings (medihoney) topical gel

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Apply topically daily. Apply to ulcerations on legs. Apply dressing over the Medi Honey.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/9/2023
Start date: 2/9/2023
End date: 3/8/2025
Quantity: 88 mL
Refill: 6 refills by 2/9/2024

triamcinolone 0.1 % cream

Medication List (continued)

Discontinued by: Van Hoff, Linda A, ARNP — Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Apply topically 2 times a day. Apply to both forearms.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 4/5/2023
Start date: 4/5/2023 — End date: 6/12/2024
Action: Patient not taking — Quantity: 28.4 g
Refill: 1 refill by 4/4/2024

Wound Dressings (medihoney) topical gel

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: Apply topically every other day. Apply to wound before applying dressing
Authorized by: Neighbor Jr., William E, MD — Ordered on: 4/26/2023
Start date: 4/26/2023 — End date: 3/8/2025
Quantity: 44 mL — Refill: 4 refills by 4/25/2024

nystatin 100000 UNIT/ML mouth/throat suspension

Discontinued by: Van Hoff, Linda A, ARNP — Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions: Swish and swallow 5 mL 4 times a day.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 10/31/2023
Start date: 10/31/2023 — End date: 6/12/2024
Action: Patient not taking — Quantity: 60 mL
Refill: No refills remaining

pantoprazole 40 MG EC tablet

Discontinued by: Navalurkar, Reema, MD — Discontinued on: 8/20/2024
Reason for discontinuation: Med list cleanup
Instructions: Take 1 tablet (40 mg) by mouth 2 times a day before meals.
Authorized by: Nguyen, Liem Hieu, MD — Ordered on: 11/27/2023
Start date: 11/27/2023 — End date: 8/20/2024
Quantity: 102 tablet — Refill: No refills remaining

atorvastatin 10 MG tablet

Discontinued by: Navalurkar, Reema, MD — Discontinued on: 9/24/2024
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (10 mg) by mouth daily.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 1/3/2024
Start date: 1/3/2024 — End date: 9/24/2024
Quantity: 90 tablet — Refill: 3 refills by 1/2/2025

lidocaine 4 % patch

Discontinued by: Discharge Provider, Automatic — Discontinued on: 3/14/2025
Reason for discontinuation: System automatic cancellation for deceased patient
Instructions: Apply 1 patch onto the skin every 24 hours. Apply to painful area for up to 12 hours in a 24 hour period.
Authorized by: Nguyen, My-Linh Trinh, MD — Ordered on: 1/18/2024
Start date: 1/18/2024 — End date: 3/14/2025
Quantity: 15 each — Refill: No refills remaining

timolol maleate 0.5 % ophthalmic solution

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: instill 1 drop into both eyes twice a day
Authorized by: Neighbor Jr., William E, MD — Ordered on: 4/10/2024
Start date: 4/10/2024 — End date: 3/8/2025
Quantity: 10 mL — Refill: 6 refills by 4/10/2025

pentoxifylline ER 400 MG ER tablet

Discontinued by: Navalurkar, Reema, MD — Discontinued on: 8/20/2024
Reason for discontinuation: Med list cleanup
Instructions: take 1 tablet by mouth three times a day
Authorized by: Neighbor Jr., William E, MD — Ordered on: 4/10/2024

None

Clinical Notes

Progress Notes

Melsher, Jennifer L, ARNP at 6/5/2024 1120

Chief Complaint

Patient presents with

- Chronic Wound

Subjective

Subjective:

Jeanne Hoffman is a 99 year old female who presents on 6/5/2024.

Patient here for routine wound care of left lower extremity ulcerations. Asked to evaluate by RN due to some increased redness and pain of the lower extremity. Patient's caregiver reports that he recently stopped sterilizing the bucket that she soaks her foot in due to some challenging living situations, but now will restart. Has been treated with cephalexin in the past for similar.

Objective

Objective:

Vitals: BP (!) 164/75 | Pulse (!) 52 | Temp 37.1 °C (Temporal)

Physical Exam

06/05/2024 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Appears well, in no apparent distress. Alert and oriented times three, pleasant and cooperative.
Left lower extremity: multiple pink ulcerations of various sizes (see nursing notes for more detailed descriptions). There is generalized pinkness of the lower extremity surrounding the ulcerations and some trace edema. Exquisite TTP of the posterior lower extremity, an area without ulcerations.
Pedal pulse intact
Able to wiggle toes slightly

Assessment/Plan

Assessment and Plan:

Jeanne was seen today for chronic wound.

Lower extremity ulceration, left, limited to breakdown of skin (HCC)
With likely secondary infection
Culture wound
Treat with cephalexin
Will resort to previous wound care routine at home

- Culture Wound, Bact w/ Stain
- cephalexin 500 MG capsule; Take 1 capsule (500 mg) by mouth 4 times a day for 7 days. Dispense: 28 capsule; Refill: 0

Cellulitis of left lower extremity
As above
- Culture Wound, Bact w/ Stain
- cephalexin 500 MG capsule; Take 1 capsule (500 mg) by mouth 4 times a day for 7 days. Dispense: 28 capsule; Refill: 0

Other orders
- ZEBRA LABELS

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**

Start date: 6/5/2024
End date: 6/12/2024
Quantity: 28 capsule
Refill: No refills remaining

Stopped in Visit

None

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 6/5/2024 0940

Jeanne Hoffman is a 99 yr old female in clinic with son, Louis, for continued wound care of Left Lower Extremity (LLE) venous stasis ulcers. Last visit was on May 15, 2024. Pt and son describe difficulty managing wound care at their residence due to limitations of space for storing the appropriate equipment for home treatments, ensuring clean spaces for dressing changes, and delayed repairs leaving open ceilings and moisture abatement increasing the risk of airborne pathogens. Also described are safety concerns in the shower where appropriate fall prevention interventions cannot be implemented and the pt has experienced at least one fall needing an ER visit. Their living situation is such that one of them reportedly sleeps on the couch.
Today's wound care is described below. A provider appt was scheduled as the LLE was exquisitely painful to the touch and the closed skin much redder than the previous visit. Pt next scheduled on Monday, June 17, 2024, as the clinic is closed for a holiday in 2 Wednesdays and the pt has an appt scheduled at Harborview in 3 Wednesdays.

Today's care:
1. The home dressings were gently removed.
2. The left lower leg was wrapped with a warm wet towel and chlorhexidine soap applied to the wounds.
3. The sites were wiped with NS moistened gauze.
4. Lidocaine 2% jelly was applied to the open wounds.
5. Each open area was gently debrided using a 4 mm curette.
6. All sites were gently wiped with NS moistened gauze
7. Carradres hydrogel dressings were cut to fit and applied to each wound
8. 4 inch stretch gauze was wrapped around the LLE and taped to itself with paper tape
9. Surgilast 5.5 was placed over the gauze wrap.
10. The sock was replaced with a clean one brought from home.

Left Leg wounds:
1. Left Medial Ankle: C-shaped, 2.3 cm x 2.2 cm x 0.1-0.2 cm
2. Left Medial Ankle Anterior Satellite: 1.0 cm x 0.7 cm x 0.2-0.3 cm
3. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 6.0 cm x 2.2 cm x 0.2. The whole wound

06/05/2024 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

is filling in from its base.

4. New between wounds 3 & 4: 1.1 cm x 0.6 cm x 0.1-0.2 cm.
5. Left Distal Lateral Shin and small medial satellite: 6.7 cm x 4.2 cm x 0.2 cm. Filling in from its base, the wound is shallower.

Clinical Notes

Progress Notes

Perez, Delmis Joel, RN at 5/15/2024 1000

Pt in clinic with son, Louis, for continued wound care. Pt continues to be self-showering and hoping to restart PT/OT soon. Her right knee is in a lot of pain today and her left big toe has improved. The toe looks normal and without S&S of infection and the displaced toenail is even closer to coming off. Pt is able to get on the Procedure Room bed with moderate assist. Scheduled next wound care for June 5, 2024.

1. The home dressings were gently removed.
2. The left lower leg was wrapped with a warm wet towel and chlorhexidine soap applied to the wounds.
3. The sites were wiped with NS moistened gauze.
4. Lidocaine 2% jelly was applied to the open wounds.
5. Each open area was gently debrided using a 4 mm curette.
6. All sites were gently wiped with NS moistened gauze
7. Carradres hydrogel dressings were cut to fit and applied to each wound
8. 4 inch stretch gauze was wrapped around the LLE and taped to itself with paper tape
9. Surgilast 5.5 was placed over the gauze wrap.
10. The sock was not replaced as it was dirty and they did not bring

Left Leg wounds:

1. Left Medial Ankle: shrinking posteriorly with a small anterior satellite: 1.0 cm x 1.0 cm x 0.1 cm, filling in from the base up
2. Left Medial Ankle Anterior Satellite: 1.0 cm x 0.7 cm x 0.2 cm.
3. Left Proximal Lateral Ankle and Superior Lateral Foot: irregular and long, 6.0 cm x 2.0 cm x 0.2. The whole wound is filling in from its base.
4. Left Distal Lateral Shin and small medial satellite: 4.5 cm x 3.5 cm x 0.2 cm. Filling in from its base, the wound is shallower.

Electronically signed by Perez, Delmis Joel, RN at 5/15/2024 10:30 AM

After Visit Summary (continued)

How do I renew my prescription?

- **Start with your pharmacy first:** The fastest and easiest way to renew your prescription is to call your pharmacy. They can tell you if there are refills remaining and request a renewal.
- **Avoid making duplicate requests for refills:** If you called your pharmacy, don't send a duplicate renewal request to your provider unless told to do so by your pharmacy. Duplicate requests cause delays and confusion.
- **Use MyChart to request refills, if appropriate:** If told to do so by your pharmacy, use MyChart to send a fast, secure prescription renewal request to your provider.

If you need help paying your bill, whether or not you have insurance, you may qualify for financial assistance. For more information, see our website at **www.uwmedicine.org/financialassistance** or call **206-744-3084.**
