Hi,

There are plenty of refills at Safeway. Give them a call and they will set you up.

Thanks,
Terri

The Tylenol with Codeine was refilled Dec 20 for 60 tabs due to your train trip. There were two additional refills on that prescription so you do not yet need a new prescription. Just go to your pharmacy.

Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 12/20/2017
Start date: 12/20/2017 — End date: 9/4/2019
Quantity: 270 tablet — Refill: 3 refills remaining

Atorvastatin Calcium 20 MG Oral Tab

Discontinued by: Ong, Thuan Duc, MD — Discontinued on: 6/7/2018
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD — Ordered on: 12/20/2017
Start date: 12/20/2017 — End date: 6/7/2018
Quantity: 45 tablet — Refill: 3 refills remaining

Warfarin Sodium (COUMADIN) 5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 9/26/2018
Reason for discontinuation: Dose adjustment
Instructions: 1 TAB PO ONCE each evening except one half tab on Thursdays and Sundays
Authorized by: Neighbor Jr., William E, MD — Ordered on: 12/20/2017
Start date: 12/20/2017 — End date: 9/26/2018
Action: Patient taking differently — Quantity: 90 tablet
Refill: 3 refills remaining

02/28/2018 - Office Visit in Husky Health Primary Care Clinic (continued)

Medication List (continued)

Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 11/29/2018
Reason for discontinuation: Reorder
Instructions: one po once daily for arthritic pain as needed
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/20/2017
Start date: 12/20/2017
End date: 11/28/2018
Action: Patient taking differently
Quantity: 60 tablet
Refill: 2 refills remaining

Losartan Potassium 25 MG Oral Tab

Discontinued by: Ong, Thuan Duc, MD
Discontinued on: 6/7/2018
Instructions: TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/8/2017
Start date: 12/8/2017
End date: 6/7/2018
Quantity: 45 tablet
Refill: 2 refills remaining

Timolol Maleate 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/16/2019
Reason for discontinuation: Reorder
Instructions: INSTILL ONE DROP IN EACH EYE TWICE DAILY.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/8/2017
Start date: 12/8/2017
End date: 4/12/2019
Quantity: 5 mL
Refill: No refills remaining

Stopped in Visit

None

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 2/28/2018 1000

Jeanne Leonie Hoffman is a 93 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  left leg wounds

History:

Jeanne comes in for INR. She continues wound care at Northwest Hospital for left lower leg ulcerations. Next appointment is tomorrow. She's had no fever, chills, night sweats. She has some diffuse tenderness in the leg but this has not changed.

Medications

Outpatient Prescriptions Marked as Taking for the 2/28/18 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab	one po once daily for arthritic pain as needed	60 tablet	2

• Atorvastatin Calcium 20 MG Oral Tab	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	45 tablet	3
• Losartan Potassium 25 MG Oral Tab	TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY	45 tablet	2
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	3
• Timolol Maleate 0.5 % Ophthalmic Solution	INSTILL ONE DROP IN EACH EYE TWICE DAILY.	5 mL	0
• Warfarin Sodium (COUMADIN) 5 MG Oral Tab	1 TAB PO ONCE each evening except one half tab on Thursdays and Sundays	90 tablet	3

Objective:
BP 164/81 | Pulse 69 | Temp 97.7 °F (36.5 °C) (Oral) | Wt 54.1 kg (119 lb 3.2 oz) | BMI 22.52 kg/m²
Estimated body mass index is 22.52 kg/m² as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of this encounter: 54.1 kg (119 lb 3.2 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
164/81	69	---	---	---	11:27 AM	2/28/2018

Last blood pressure recorded in this encounter: 164/81
General: NAD
Left lower leg shows at least 2 ulcerations
On the lateral aspect there is a 4.5 x 2.5 ulceration through the skin but with healthy friable tissue and no exudate.
Medially over the medial malleolus there is a more superficial 3.5 x 2 cm ulceration again with fairly healthy appearing tissue.
There is slight redness throughout the lower extremity, but I do not know if this is different than what is present at other visits at Northwest Hospital.

Lab and other tests: pending

Assessment and Plan:
1. Long term current use of anticoagulant therapy
Stable dose. Last INR though was subtherapeutic but had just returned from a trip so may have had some compliance issues. Repeat INR today. Goal low 2-3 range.
- PROTHROMBIN TIME; Standing

2. Chronic recurrent deep vein thrombosis (DVT) of lower extremity, unspecified laterality (HCC)
Same as agove
- PROTHROMBIN TIME; Standing

3. Unspecified vitamin B deficiency

02/28/2018 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Last two MMAs have been normal. No need for refill of vitamin B12 prescription dose vitamin

4. Skin ulcer, limited to breakdown of skin (HCC)
Wound care visit tomorrow at NW. Redress today. Slight redness but not clear signs of infection. As her continuity care for the ulcer is at NW and appointment tomorrow, she should be fine until then.

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

Orders Only on 02/28/18
1. PROTHROMBIN TIME

Result	Value	Ref Range
Prothrombin Time Patient	22.4 (H)	10.7 - 15.6 s
Prothrombin INR	2.0 (H)	0.8 - 1.3

Reported to patient, In tx range. Repeat 2-4 weeks given recent sub tx value of 1.7 in January.

Electronically signed by Neighbor Jr., William E, MD at 2/28/2018 6:35 PM

Lewis, Elizabeth, RN at 2/28/2018 1000

Redressed wound per Dr. Neighbor until returns to wound care tomorrow. Applied oil emulsion gauze, secondary non-adherent pads and secured with gauze wrap.

Beth Lewis, RN

Notes recorded by Neighbor Jr., William E, MD on 5/3/2018 at 7:11 PM PDT
Jeanne and Louis
Jeannes INR is higher than it was two weeks ago being 4.6. This may account from some of the bleeding for the leg ulcerations. It argues against any risk of blood clot.

Her usual dose of coumadin is: 5 mg once each evening except a half tab on Thursdays and Sundays. I know that you stated you are compliant with taking the medicine as directed. I believe that given your living situation you may be eating less green leafy vegetables, broccoli, etc which are sources of vitamin K that balances against the coumadin. So, without eating those vegetables, you need less coumadin.

We first need to correct the INR by having you not take coumadin this evening and tomorrow evening.

Then I would change your prescribed dose to 5 mg once each evening except a hafl tablet on Sundays, Tuesday, and Thursday.

Caregiver Endorsement

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	2/14/2018 3:36 PM

Ms Doran and Presiding Judge and Tina Robinson... condensed

Housing Kitsap Administration and staff has offer to further have Jean Alloin/aka Hoffman abuse by resident abuse, who have deep political hatred ideals toward LGBTQ Americans and as such want Jean Alloin/aka Hoffman and Louis Alloin to be involve in Hereon Addict Camaraderie, which Defendant refused. Thereby are subjected to malicious hatred civil prosecution, for refusing Eileen Clyde to access our home for Hereon Socialization and Jerry Andrew Araneda Criminal Behavior was sanctioned by Housing Kitsap, in which Julie Combs refused to provide investigating BIPD with information as to alleged report or complaint file by Gary Ramsey, as eye witness. Whereas, Julie Combs wanton behavior of hatred was to obstruct justice.

02/14/2018 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Messages (continued)

Mr Alloin, did contact various geriatric home care organization, but quickly discovered that personnel were untrained and that many were violent opposed to LGBTQ Americans.

No such organizations, submitted potential caregiver resume, to a background check.

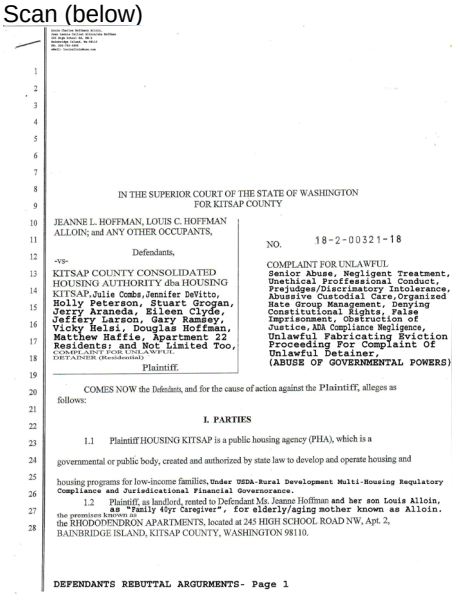
Jean Alloin, is an active 93 year old, who has medical issues, requiring 24 hour care.

Housing Kitsap proposal, was to allow Douglas Hoffman as caregiver or other LGBTQ hate individuals.

Jean Alloin UWMC Physicians were opposed to Housing Kitsap plan to allow individuals with hatred to care for Jean
and fact that Julie Combs wanted Rhododendron Residents who participated in hate scheme to have open and uncontrolled access to Jean Alloin/aka Hoffman apartment to further degrade her beloved son Louis Alloin, which the hate cell have disdain for.

It was imperative that Jean Alloin/aka Hoffman have 24 hour care, to which her son Louis is full trained to provide care. This include providing security for Jean Alloin/aka Hoffman safety. As it is alleged that Julie Combs made contact with Douglas Hoffman make contact with Jean Alloin/aka Hoffman which did occur on about December 1, 2017. In which it is alleged that Douglas Hoffman make contact with Julie Combs to further hate objectives.

Louis Alloin, as Family Caregiver for over 40+ years, can not leave Jean Alloin/aka Hoffman with individuals who are known to be abusive, intolerant, during proceeding of moving out



Jean Alloin/aka Hoffman does not wish to reside under Housing Kitsap, her health, well being or security interest are not being meet by Housing Kitsap and her life under such barbarous organization is as risk.

COMPLAINT FOR UNLAWFUL DETAINER (Residential)

Plaintiff.

NO. 18-2-00321-18

COMPLAINT FOR UNLAWFUL DETAINER (Residential)

MOTION FOR REMEDY AND RELIEF

GERIATRICS FAMILY CAREGIVER

COMES NOW the Defendants, and for the cause of action against the Plaintiff, alleges as follows:

DEFENDANT, Louis Charles Hoffmann Alloin, is an academician who studied under the authority of United States Department Of Health and Human Services, National Institute Of Health, National Institute on Aging, who was grant Federal Depository Library, to further studies in geriatician cognitive health, exercise and physical activity, proficient in doctor-patient communication, having understanding in Alzheimer's and related dementias, healthy eating studies under US Department of Agriculture Food and Nutrient for dietary studies, caregiver, end of life, including correlated National Institute Studies.

Mr.. Alloin is well adaptive for the care and wellbeing of his mother Jean Leonie Calliet Alloin/aka Deceased Husband Hoffma

Housing Kitsap, Julie Combs and other employees has a lack of general knowledge on health and wellbeing of aging humans, thereby, have made inappropriate recommendation, to which Mr.. Alloin, did in-depth analysis of DSHS COPES and other seni service, which were found to be inadequate and offer limited services. Housing Kitsap Offered Services provided no security, restricted senior opportunities for healthy wellbeing, in that Jean Alloin/aka Hoffman would be subjected to white supremacy care, that would be offensive and diabolical service to castigate Jean Alloin/aka Hoffman, for having LGBTQ support, including raising a well educated gay son, who has provided exceptional gerontological care for over 40 years to the family longevity.

Housing Kitsap has a record of provide poor and inadequate care and abusive housing property care management, lack living standard, thereby Jean Alloin/aka Hoffman would be in harms way, if continued residency under Housing Kitsap Authority. Currently Apt 2 Occupants are being kept as prisoner in prison like environment, deny free access to move out.

Discontinued by: Ong, Thuan Duc, MD — Discontinued on: 6/7/2018
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD — Ordered on: 12/20/2017
Start date: 12/20/2017 — End date: 6/7/2018
Quantity: 45 tablet — Refill: 3 refills remaining

Warfarin Sodium (COUMADIN) 5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 9/26/2018
Reason for discontinuation: Dose adjustment
Instructions: 1 TAB PO ONCE each evening except one half tab on Thursdays and Sundays
Authorized by: Neighbor Jr., William E, MD — Ordered on: 12/20/2017
Start date: 12/20/2017 — End date: 9/26/2018
Action: Patient taking differently — Quantity: 90 tablet
Refill: 3 refills remaining

Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 11/29/2018
Reason for discontinuation: Reorder
Instructions: one po once daily for arthritic pain as needed
Authorized by: Neighbor Jr., William E, MD — Ordered on: 12/20/2017
Start date: 12/20/2017 — End date: 11/28/2018
Action: Patient taking differently — Quantity: 60 tablet
Refill: 2 refills remaining

Losartan Potassium 25 MG Oral Tab

Discontinued by: Ong, Thuan Duc, MD — Discontinued on: 6/7/2018
Instructions: TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY

02/05/2018 - Abstract in UW Med Health Information Management (continued)

Medication List (continued)

Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/8/2017
Start date: 12/8/2017

PACIFIC VASCULAR

Lower Extremity Venous Reflux Exam

UW Medicine NORTHWEST HOSPITAL & MEDICAL CENTER CARDIAC & VASCULAR IMAGING CENTER

Patient Name:	**JEANNE L HOFFMAN**	Date of Exam:	**02/02/2018 03:08 PM**
PVI #:	**10114841-50197618-40226773**	DOB, Age, Gender:	**1/6/1925 93 Female**
MRN / Acct#:	**U8170135-1823773755**	Patient Type:	**Inpatient**
Referring Clinician:	**TERESA L. GEGAX MARTINEZ, ARNP**	Exam Location:	**Northwest Hospital Medical Center**
Cc:		Technologist:	**Julie T. Harrold, RVT**

NON UW EPIC ORDER

Clinical Indication:
Patient is referred for chronic venous ulcers of the left lower extremity. Patient reports of over a year history of painful non-healing ulcers on her left calf and foot. At the time of the exam there is erythema noted throughout the left calf. Patient reports of prior bilateral lower extremity vein stripping years ago. Risk factors include: history of deep vein thrombosis, pregnancies (2) and limb trauma/surgery.

Interpretation:

Side	Vein	Maximum Reflux (sec)	Maximum Diameter (mm)
Right	Great saphenous		0
	Small saphenous		0
Left	Great saphenous	2.5	8
	Small saphenous	0.21	2.1

Technically challenging and limited exam due to tenderness in the left calf.
Right Lower Extremity:
Superficial venous reflux/valvular incompetence (0.5 seconds or greater):
**Superficial tributary D and superficial tributary E
Deep venous reflux/valvular incompetence:
**Common femoral vein distal and femoral vein mid
Great saphenous vein is not positively identified
Small saphenous vein is not positively identified
The remainder of the veins are patent and without evidence of thrombosis
Left Lower Extremity:
Common femoral vein proximal to distal: chronic non-occlusive deep venous fibrotic changes
Femoral vein proximal to mid: chronic non-occlusive deep venous fibrotic changes
Superficial venous reflux/valvular incompetence (0.5 seconds or greater):
**Great saphenous at saphenofemoral junction, below the saphenofemoral junction, mid thigh, and distal thigh
**Great saphenous proximal calf
Patient could not tolerate compressions in the calf, unable to evaluate for reflux in the mid to distal great saphenous vein and small saphenous vein
**Superficial tributary D
Deep venous reflux/valvular incompetence:
**Common femoral vein distal, femoral vein mid, and popliteal vein mid
The remainder of the veins are patent and without evidence of thrombosis

Summary/Conclusion: There are findings on this exam that may correlate with the referring indication:
1. **There is evidence of deep venous valvular insufficiency in the bilateral common femoral, main femoral and left popliteal veins.**
2. **There is also evidence of superficial venous valvular insufficiency in the left great saphenous and bilateral tributary veins as detailed on the accompanying table.**

Referring Clinician:	**TERESA L. GEGAX MARTINEZ, ARNP**	Exam Location:	**Northwest Hospital Medical Center**
Cc:		Technologist:	**Julie T. Harrold, RVT**

NON UW EPIC ORDER

Clinical Indication:
Patient is referred for non-healing venous leg ulcers. Patient has three ulcers on her left distal calf and foot which she has had for over a year. The leg is tender to the touch with erythema noted throughout the calf.

Interpretation: Ankle brachial indices: Right - [1.54], Left - [n/a], Digit brachial indices: Right - [0.49], Left - [0.35]

Technically challenging and limited exam due to left leg tenderness.

Abdominal Aorta:
Limited visualization of the abdominal aorta due to overlying bowel gas

Right Lower Extremity:
Ankle/brachial indices are felt to be unreliable secondary to medial calcification.
Based on waveform analysis there is: mild arterial insufficiency at rest
Common iliac artery: non-visualized due to overlying bowel gas
Diffuse calcification throughout the femoral and popliteal arteries
Popliteal artery distal and tibioperoneal trunk artery: 20-49% stenosis
Posterior tibial artery distal: suspected occlusion; heavy calcification noting retrograde flow in the mid segment
Anterior tibial artery mid: 20-49% stenosis
Three vessel runoff
Digit brachial index is abnormal suggestive of small vessel disease
No other significant abnormalities identified

Left Lower Extremity:
Ankle brachial indices were not obtained due to patient inability to tolerate blood pressure cuffs
Based on waveform analysis there is moderate arterial insufficiency at rest
Common iliac artery: non-visualized due to overlying bowel gas
Diffuse calcification throughout the femoral and popliteal arteries
Superficial femoral artery proximal: 20-49% stenosis and 20-49% stenosis
Superficial femoral artery mid: stenosis and 20-49% stenosis
Superficial femoral artery distal: 20-49% stenosis
Posterior tibial artery: heavy calcification throughout the distal segment, unable to rule out areas of segmental occlusion
Anterior tibial artery proximal: 20-49% stenosis
Digit brachial index is abnormal suggestive of small vessel disease
Three vessel runoff
No other significant abnormalities identified

Summary/Conclusion: Unreliable ABI due to medial calcifications. Mild right lower extremity arterial insufficiency at rest. Moderate left lower extremity arterial insufficiency at rest. Multifocal low grade stenosis throughout the left lower extremity.

Medication List

This report is for documentation purposes only. The patient should not follow medication instructions within. For accurate instructions regarding medications, the patient should instead consult their physician or after visit summary.

Active at the End of Visit

Unclassified (OTHER MEDS, SEE COMMENTS,)

Discontinued by: Ong, Thuan Duc, MD
Discontinued on: 6/7/2018
Instructions: Vitamin B12 500 mcg once daily over the counter
Entered by: Neighbor Jr., William E, MD
Entered on: 2/21/2014
Start date: 2/21/2014
End date: 6/7/2018

Pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/20/2017
Start date: 12/20/2017
End date: 9/4/2019
Quantity: 270 tablet
Refill: 3 refills remaining

Atorvastatin Calcium 20 MG Oral Tab

Discontinued by: Ong, Thuan Duc, MD
Discontinued on: 6/7/2018
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/20/2017
Start date: 12/20/2017
End date: 6/7/2018
Quantity: 45 tablet
Refill: 3 refills remaining

Warfarin Sodium (COUMADIN) 5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/26/2018
Reason for discontinuation: Dose adjustment
Instructions: 1 TAB PO ONCE each evening except one half tab on Thursdays and Sundays
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/20/2017
Start date: 12/20/2017
End date: 9/26/2018
Action: Patient taking differently
Quantity: 90 tablet
Refill: 3 refills remaining

Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 11/29/2018
Reason for discontinuation: Reorder
Instructions: one po once daily for arthritic pain as needed
Authorized by: Neighbor Jr., William E, MD

CEREBROVASCULAR EVALUATIONS:
- ☐ Carotid/Vertebral Duplex + Transcranial Doppler (TCD) - *Complete*
- ☐ Carotid/Vertebral Duplex + TCD prn* - *Conditional*
  (*prn = >50% pre-cerebral stenosis; TIA/CVA symptoms)
- ☐ Carotid/Vertebral Duplex Only - *Abbreviated*
- ☐ Transcranial Doppler Only (TCD)
- ☐ TCD Emboli Monitoring Study
  Specify: ☐ Anterior circulation ☐ Posterior circulation
- ☐ Temporal Arteritis Duplex
- ☐ Head Turn Study
- ☐ TCD Right to Left Bubble Study (PFO) – IV access needed

ARTERIAL EVALUATIONS:
- ☒ Lower Extremity ✳
  Physiologic Testing (ABI's and/or DBI's, treadmill)
  Duplex: Aortoiliac & femoropopliteal prn
  (prn=Abnormal ABI; treadmill not performed)
  If applicable: ☐ Bypass Graft ☐ Stent Specify location: _____
- ☐ Upper Extremity
- ☐ Pseudoaneurysm Evaluation
  Specify: ☐ Right ☐ Left
- ☐ Thoracic Outlet
- ☐ Radial Artery Mapping
- ☐ Raynaud's Phenomenon
  Specify: ☐ Hands ☐ Feet

ABDOMINAL VASCULAR DUPLEX EVALUATIONS: ✳
- ☐ Abdominal Aortic Aneurysm
  Specify Indication:
  ☐ Follow-up/Known ☐ Endograft ☐ Symptomatic ☐ Other
  ☐ Medicare Screening (Age 65-75 + family hx AAA &/or male smoker)
- ☐ Renal Artery ☐ Celiac/Mesenteric Arteries
- ☐ Hepato-Portal ☐ Renal/Liver Transplant
- ☐ Aorta/Iliac Arteries ☐ Inferior Vena Cava/Iliac Veins

VENOUS EVALUATIONS:

Assessment for Venous Thrombosis (DVT)
- ☐ Lower Extremity + Iliocaval, Bilateral - *Complete*
- ☐ Lower Extremity - *Conditional* ☐ Bilateral ☐ Right ☐ Left
  (Conditional = bilateral & iliocaval duplex only if DVT or acute SVT in symptomatic leg, abnormal waveforms in CFV, DVT risk factors, or clinical concern for PE)
- ☐ Lower Extremity Only - *Abbreviated* ☐ Bilateral ☐ Right ☐ Left
- ☐ Upper Extremity Duplex ☐ Bilateral ☐ Right ☐ Left

Specialized Venous Evaluations
- ☐ Lower Extremity Reflux - To test for venous insufficiency
  Specify: ☐ Right ☐ Left
- ☐ Pelvic Congestion Syndrome ✳ **(NEW EXAM)**
  (Duplex of the Iliocaval, Ovarian and Uterine Veins)
- ☐ Post-Ablation Lower Extremity Duplex Specify: ☐ Right ☐ Left
- ☐ Vein Mapping Duplex Specify: ☐ Right ☐ Left ☐ Upper ☐ Lower

DIALYSIS VASCULAR ACCESS SITE EVALUATIONS:
- ☐ Dialysis Access Site Evaluation
- ☐ Pre-op Dialysis Access Site
  Specify: ☐ Right ☐ Left

Other Request/Info: _____

✳ *No Food or Drink 8 hours prior to Test (Fasting) for Lower Extremity Arterial & All Abdominal Vascular Exams (exception for diabetics)*

Clinical Notes

Progress Notes

Collins V, Marta, RN at 1/3/2018 1140

Dr Neighbor asked if I could redress 3 leg wounds on Jeanne's lower L leg. I offered her son the option of having me clean and dress the wound but he states they have a pretty strict regimen that the wound care clinic has given him. He did say they use medihoney so I applied medihoney lightly to her wounds and put a telfa and gauze wrap around her leg. He will do a full drsg change later this afternoon or evening.

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 1/3/2018 1040

Jeanne Leonie Hoffman is a 92 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Physical
  wound on left leg
- Allergic Reaction
  discuss coumadin dc for skin graft

History:

Jean and her son Louise return after at least a month of train travel in the US. During the visit Jean expressed great enjoyment in that trip and was able to recall details. She was bright as usual.

She is here for two issues:
--she is on stable dose of Coumadin and due for repeat INR. Two weeks ago after they had returned from their trip, her INR was sub tx (goal is low end of 2-3 range). A corrective dose of coumadin was given and they are following up today for a repeat test.
--She is see NWH wound care clinic for chronic ulcerations of left lower leg. She may need a skin graft. She has appointment for follow up there next week. If a skin graft is needed, then will need to plan for her anticoagulation.

Review of Systems:
No bleeding
No acute swelling of lower legs
No shortness of breath

Medications
Outpatient Prescriptions Marked as Taking for the 1/3/18 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab	one po once daily for arthritic pain as needed	60 tablet	2
• Atorvastatin Calcium 20 MG Oral Tab	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	45 tablet	3
• Losartan Potassium 25 MG Oral Tab	TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY	45 tablet	2
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	3
• Unclassified (OTHER MEDS, SEE COMMENTS,)	Vitamin B12 500 mcg once daily over the counter		
• Warfarin Sodium (COUMADIN) 5 MG Oral Tab	1 TAB PO ONCE each evening except one half tab on Thursdays and Sundays	90 tablet	3

Objective:
BP 144/68 | Pulse 65 | Temp 97.7 °F (36.5 °C) (Oral) | Wt 53.8 kg (118 lb 9.6 oz) | BMI 22.41 kg/m²
Estimated body mass index is 22.41 kg/m² as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of this encounter: 53.8 kg (118 lb 9.6 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
144/68	65	---	---	---	10:32 AM	1/3/2018

Last blood pressure recorded in this encounter: 144/68
General: NAD
Skin: See photos of left lower leg taken medial and lateral views. There is some lymphatic oozing which she and her son say have been present for a couple of months without change. The areas of ulceration are larger than I had seen before, but she and Louis say this has been stable for 1-2 months.

Lab and other tests: INR pending.

Assessment and Plan:

01/03/2018 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

1. Long term current use of anticoagulant therapy
INR pending

2. History of recurrent deep vein thrombosis (DVT)
No clinical evidence of recurrence

3. Skin ulcer, limited to breakdown of skin (HCC)
Managed at NW hospital wound clinic. Photos taken today. I will call Dr. Lu there to discuss management plans. If a graft is required, she could stop coumadin 5 days before the procedure and then restart after the procedure. I do not think she needs bridging she has not had a DVT for many many years. Injections would be difficult for the family for bridging. One of the newer oral anticoagulants might be used. I will review.

4. Essential hypertension, benign
Well controlled.

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 1/3/2018 1010

INR subtherapeutic. Dose has been coumadin 5 mg one daily except a half on Thursday and Sunday. This regimen in general has resulted in tx INRs. However patient has been traveling and also moving apartments so may have missed some doses. Will have take a full tablet tonight, Thursday and extra half dose tomorrow then resume usual regimen. Repeat INR in 7 days.

RE: Jean's Reference Letter

From	To	Sent and Delivered
William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	1/2/2018 10:38 AM

Last Read in MyChart
1/14/2018 5:49 PM by Hoffman, Jeanne Leonie

Regarding appointments, tomorrow. You are both scheduled for 40 minutes for "physicals". Is that what is needed. I have other patients needing to be seen so if the appointments should actually be a regular 20 minute appointment for one or both of you, let me know.

William E Neighbor, MD

Jean's Reference Letter

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	1/1/2018 10:36 AM

Bill.....

Jean is also the target of hatred and senior abuse by Housing Kitsap.
If we fail, we will both be condemned to life of homelessness, as Kitsap Housing is blocking attempts to secure affordable housing by using EVICTION Threat and refusal to provide positive rental history.

Not one American has questioned Housing Kitsap motives.

Please be advised, that Housing Kitsap is protecting a Heroin House(apt5)...ie people who are using Heroin, who attacked use/harass us. Thus, providing false documents to Kitsap Procescutor Ms Doran, then using fear to residents, who want to help us.

01/01/2018 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Messages (continued)

See you on 1-3-2018 Member Jean will be 93 on 6th. I will bring a Birthday Cake

December 29, 2017

To whom It may concern,

I have had the pleasure of knowing Louis Alloin and his mother Jean for the past two years. I am employed at the Bainbridge Island Safeway where they shop and look forward to seeing their smiling faces each day. Many of my co-workers in the store know them and think very highly of them. They are upstanding citizens in Bainbridge Island in my opinion. Louis and his mother love traveling and have told me of their trips on trains and have encouraged my husband and I to book a trip and travel along with them some time. I would not hesitate to be in their company.

It is absolutely ridiculous to me to hear they are being denied housing due to some adverse report nonsense. Nothing could be further from the truth. They are some of the most honest, caring, articulate people a person could know.

Sincerely,
Brennan Devine
Personnel Coordinator Bookkeeper
Bainbridge Island Safeway

March 7, 2017

Louis Allion has been a regular volunteer at the Bainbridge Island branch of Kitsap Regional Library for the past six months. During that time he has been instrumental in helping with the maintenance of the grounds and working with library patrons who are homeless in our community.

A passionate train lover, Louis has also worked with me to develop a March display at the Library on trains. It has been popular with library patrons and we are restocking books regularly.

Louis has been a pleasure to work with and has been a great help as a volunteer.

Rebecca Judd
Manager
Bainbridge Island Branch of Kitsap Regional Library

To Whom It May Concern:

I have known Louis Alloin since 1981 and have the upmost respect for him and love for Jean, his mother. Louis lived with me for several years in the 80's and I found him to be honest, industrious and talented with computers and railroad management. The fact that Louis happens to be Gay has no negative effect on his character.

Louis is not a trouble-maker. I believe he would run away from a troublesome situation, then stand his ground to protect himself and his family. He is also extremely protective of Jean, his mother. The trips he plan each year have contributed greatly to her health and well-bring since they encourage her to remain active. I envy her energy and spunk.

I understand that there is a plot to try and evict Louis and Jean because of some petty and childish politics of a few apparently senile neighbors and the viciousness of someone named Julie Combs. I am told that they are combining their disagreements with anti LGBTQ issues. Please correct me if I am wrong, but I believe the U.S. Supreme Court has declared people who are categorized as LGBTQ (Lesbian, Gay, Bisexual, Trans-sexual, Queer) to be equal with non LGBTQ people in the eyes of the law. Even Pope Francis has declared them to be equal in the eyes of God.

No matter what your opinion, acceptance by the Law and the Lord should be good enough for the both of us.

01/01/2018 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Documents (continued)

Louis has been Gay since age 6. Sadly he has been victimized through both physical and emotional aggression causing him to be ultra-sensitive to these issues, which in turn causes a distorted reaction by Louis. But defending one's rights should not be just cause for eviction. On the contrary, Louis is an asset to his community, a hard worker and brilliant innovator in the transportation industry.

If you require any additional information or have any specific questions, please feel free to contact me at 510-528-7425 … I'm home most of the time.

Sincerely,

Kenneth C. Jones

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 12/21/2017 1102

INR 1.8. Goal due to age is in the lower end of the 2-3 range. Will have her take extra 2.5 mg this week and repeat in 10 days. As she would ordinarily take a half tab of 5 mg today, will have her take a full tab instead.

Older Notes

Notes Recorded by Neighbor Jr., William E, MD on 12/21/2017 at 11:51 AM PST
INR 1.8. Goal due to age is in the lower end of the 2-3 range. Will have her take extra 2.5 mg this week and repeat in 10 days. As she would ordinarily take a half tab of 5 mg today, will have her take a full tab instead.

Hi Jeanne,

I need the name of the pharmacy, address, and phone number to send your prescription.

Thank you,
Rcike, CMA

Pentoxifylline ER 400 MG Tab CR

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	11/12/2017 10:45 AM

From: Chemult, Oregon Dawson House Lodge RM: 1 PH: 1-888-281-8375 or 1-541-365-2232

Pentoxifylline ER 400 MG Tab CR is empty, requiring refill (If Necessary).
Refill can be made in Ruby, ND November 17th.
QUESTION: Can such medication be without for next 5 day. What would be the risks to beware of? or conditions to be aware or other such patient care for next 5 days?

Clinical Notes

Telephone Encounter

Martinez, Ricardo C, CMA at 10/2/2017 1413

Jeanne was hospitalized over the weekend per Atty Samantha Adams tel.206.707.0838 wants to talk to Dr. Neighbor. I spoke to Samantha and let her know that Dr. Neighbor still on vacation until 10/16/17. She's okay to wait for Dr. Neighbor to call her back.

Electronically signed by Martinez, Ricardo C, CMA at 10/2/2017 2:26 PM

Neighbor Jr., William E, MD at 10/19/2017 1506

10/19/2017
I returned from leave yesterday. I called the NW Justice Project attorney Samantha Adams today. As I understand, Housing Kitsap says that Louis, her son, can not live with her as a care giver. Jean has a right to a caregiver, but not any caregiver she choose but one approved by Housing Kitsap. Jean can file for COPES. Jean was not willing to live separately from her son so both may face eviction when they return from their train trip vacation. There does not appear to be anything that can be done at this time. When they do return, if Jean wishes to speak with Samantha, she may. This is obviously a difficult situation.

Maravilla, Kenneth Richard, MD
Filed by: Uw Radiology Results Interface, User 09/28/17 1209
Performed: 09/28/17 0029 - 09/28/17 0029
Accession number: 10970034
Resulting lab: UW RADIOLOGY
Lab Technician: ARIESSUNNA BROWN
Narrative:

EXAMINATION:
CT HEAD WO CONT

CLINICAL INDICATION:
Altered mental status, visual hallucinations

TECHNIQUE:
CT Head Routine wo contrast (N-1)
Contiguous axial sections were obtained through the head without contrast.
Patient age specific scan parameters were used for radiation exposure

COMPARISON:
7/15/2015

FINDINGS:
MASS EFFECT & VENTRICLES: No shift. The lateral ventricles are symmetric. The ventricles, sulci and cisterns are normal.
BRAIN: Moderate global parenchymal volume loss. Unchanged calcification of bilateral basal ganglia and focal calcification the left posterior periventricular white matter. Scattered foci of hypodensities in the periventricular and subcortical white matter, likely chronic microvascular ischemic disease. No acute large infarct or intraparenchymal hemorrhage.
VASCULAR: Atherosclerosis of the cavernous carotids and vertebral arteries
EXTRA-AXIAL: Extra-axial spaces are normal.

09/28/2017 - Orders Only in UW Medicine Radiology (continued)

Imaging (continued)

EXTRA-CRANIAL: Bilateral lens replacements. Scalp is normal. Sinuses are clear. Mastoids are clear

ATTENDING RADIOLOGIST AND PAGER NUMBER
007470 Maravilla Kenneth R MD
(206)994-3872
Impression:
IMPRESSION:

No acute infarct, hemorrhage or mass effect.

Preliminary results and a final report will be available for review by 10am the following morning Monday through Friday or after 3pm Saturday/Sunday and holidays.

Unless a final report appears below, an attending Radiologist has not reviewed the images.

*****

ATTENDING FINAL REPORT

I agree with the preliminary report (Cat 1).

IMPRESSION:

1. No acute intracranial abnormalities identified.

2. Chronic microvascular ischemic changes. Mild cerebral volume loss.

Prior To Admission

None

Discharge Medication List

Unclassified (OTHER MEDS, SEE COMMENTS,)

Discontinued by: Ong, Thuan Duc, MD | Discontinued on: 6/7/2018
Instructions: Vitamin B12 500 mcg once daily over the counter
Entered by: Neighbor Jr., William E, MD | Entered on: 2/21/2014
Start date: 2/21/2014 | End date: 6/7/2018

Pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD | Discontinued on: 12/20/2017
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD | Ordered on: 9/21/2016
Start date: 9/21/2016 | End date: 12/20/2017
Quantity: 270 tablet | Refill: 3

Atorvastatin Calcium 20 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD | Discontinued on: 12/20/2017
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD | Ordered on: 12/7/2016
Start date: 12/7/2016 | End date: 12/20/2017
Quantity: 45 tablet | Refill: 3

Losartan Potassium 25 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD | Discontinued on: 12/8/2017
Reason for discontinuation: Reorder
Instructions: TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY
Authorized by: Neighbor Jr., William E, MD | Ordered on: 4/17/2017
Start date: 4/17/2017 | End date: 12/8/2017
Quantity: 45 tablet | Refill: 2

Timolol Maleate 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD | Discontinued on: 11/30/2017
Reason for discontinuation: Reorder
Instructions: Place 1 drop in each EYE 2 times a day.

09/27/2017 - Admission (Discharged) in 6NE MED FAMMED (continued)

Medication List (continued)

Authorized by: Neighbor Jr., William E, MD
Start date: 8/21/2017
Quantity: 5 mL
Ordered on: 8/21/2017
End date: 11/30/2017
Refill: No refills remaining

Warfarin Sodium (COUMADIN) 5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Reason for discontinuation: Reorder
Instructions: 1 TAB PO ONCE each evening except one half tab on Thursdays and Sundays
Entered by: Neighbor Jr., William E, MD
Start date: 8/21/2017
Quantity: 90 tablet
Discontinued on: 12/20/2017
Entered on: 8/21/2017
End date: 12/3/2017

Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Reason for discontinuation: Reorder
Instructions: one po once daily for arthritic pain as needed
Authorized by: Neighbor Jr., William E, MD
Start date: 9/20/2017
Quantity: 60 tablet
Discontinued on: 12/20/2017
Ordered on: 9/20/2017
End date: 12/3/2017
Refill: 2 refills remaining

Comment:
This test was developed and its performance characteristics determined by the University of Washington Department of Laboratory Medicine in a manner consistent with CLIA requirements. This test has not been cleared or approved by the U.S. FDA.

Result:
Results for quantitative testing less than 10 ng/mL (except fentanyl 0.25 ng/mL and 6-monoacetyl morphine 5 ng/mL) and results for qualitative testing less than 50 ng/mL (except ethyl glucuronide 500 ng/mL) are reported as negative.

Medication List (continued)

Reason for discontinuation: Reorder
Instructions: Place 1 drop in each EYE 2 times a day.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 8/21/2017
Start date: 8/21/2017 — End date: 11/30/2017
Quantity: 5 mL — Refill: No refills remaining

Warfarin Sodium (COUMADIN) 5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 12/20/2017
Reason for discontinuation: Reorder
Instructions: 1 TAB PO ONCE each evening except one half tab on Thursdays and Sundays
Entered by: Neighbor Jr., William E, MD — Entered on: 8/21/2017
Start date: 8/21/2017 — End date: 12/3/2017
Quantity: 90 tablet

Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 12/20/2017
Reason for discontinuation: Reorder
Instructions: one po once daily for arthritic pain as needed
Authorized by: Neighbor Jr., William E, MD — Ordered on: 9/20/2017
Start date: 9/20/2017 — End date: 12/3/2017
Quantity: 60 tablet — Refill: 2 refills remaining

Stopped in Visit

None

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 9/20/2017 1100

Jeanne Leonie Hoffman is a 92 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Physical

  Patient is here today for physical exam.

History:

Arrived one hour late for appointment. Focus was on med and lab review and generating a lettered need for planned train tip with her son in November.

Jeanne continues to be seen at NW wound care for slow healing left lower leg ulceration.

She is now taking coumadin 5 mg one tab daily except one half on two days of week rather than just one and is due for INR. She has been on a stable dose for about 3 weeks. She has had no clotting symptoms and no bleeding.

Medications

Outpatient Prescriptions Marked as Taking for the 9/20/17 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab	one po once daily for arthritic pain as needed	60 tablet	2

09/20/2017 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

• Atorvastatin Calcium 20 MG Oral Tab	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	45 tablet	3
• Losartan Potassium 25 MG Oral Tab	TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY	45 tablet	2
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	3
• Timolol Maleate 0.5 % Ophthalmic Solution	Place 1 drop in each EYE 2 times a day.	5 mL	0
• Unclassified (OTHER MEDS, SEE COMMENTS,)	Vitamin B12 500 mcg once daily over the counter		
• Warfarin Sodium (COUMADIN) 5 MG Oral Tab	1 TAB PO ONCE each evening except one half tab on Thursdays and Sundays	90 tablet	3

Objective:
BP 134/64 | Pulse 62 | Temp 97.9 °F (36.6 °C) (Oral) | Wt 52.3 kg (115 lb 6.4 oz) | BMI 21.80 kg/m²
Estimated body mass index is 21.8 kg/m² as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of this encounter: 52.3 kg (115 lb 6.4 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
134/64	62	---	---	---	11:40 AM	9/20/2017

Last blood pressure recorded in this encounter: 134/64
General: NAD
No other exam

Lab and other tests: pending

Assessment and Plan:
(Z71.89) Vaccine counseling (primary encounter diagnosis)
Flu vaccine today
Plan: influenza high dose vaccine trivalent PF (adult greater than 65yrs) 0.5 mL IM - 90662, Tdap vacc (adult) 0.5 mL IM - 90715

(M15.9) GENERAL OSTEOARTHROSIS
Refilled codeine tabs for 60 days as they will be on the train trip for more than a month. She continues to use just one daily though occasionally needs extra tab for wound debridement at NW wound care.
Plan: Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab

09/20/2017 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

INR pending today.

RE: Jeanne Leonie Hoffman
DOB: 1/6/1925

To whom it may concern:

For the purposes of her travel with her son, below is a list of the above individual's medications and problems.

Outpatient Medications Prior to Visit

Medication	Sig	Dispense	Refill
• Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab	one po once daily for arthritic pain as needed	30 tablet	3
• Atorvastatin Calcium 20 MG Oral Tab	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	45 tablet	3
• Losartan Potassium 25 MG Oral Tab	TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY	45 tablet	2
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	3
• Timolol Maleate 0.5 % Ophthalmic Solution	Place 1 drop in each EYE 2 times a day.	5 mL	0
• Unclassified (OTHER MEDS, SEE COMMENTS,)	Vitamin B12 500 mcg once daily over the counter		
• Warfarin Sodium (COUMADIN) 5 MG Oral Tab	1 TAB PO ONCE each evening except one half tab on Thursdays and Sundays	90 tablet	3

No facility-administered medications prior to visit.

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

09/20/2017 - Office Visit in Husky Health Primary Care Clinic (continued)

Letters (continued)

- Long term current use of anticoagulant therapy [Z79.01] 01/08/2008
  Reason for anticoagulation: Recurrent dvts
  Duration of anticoagulation: life
  INR goal: 2.-3 (lower end of this range desired because of age)

- Unspecified vitamin B deficiency [E53.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic (HCC) [I82.509] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no

Sexual practice/contraception: Not active
Advanced directives: Yes/ 9/21/2016 POLST forms signed.
Scanned to record.
Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
Advise Vit D 800 IU daily.

- Skin ulcer (HCC) [L98.499] 03/23/2017
  Left lower leg. Began early 2017. Followed at Northwest wound care center.

- Primary osteoarthritis of both hips [M16.0] 02/01/2017
- Thrombocytopenia (HCC) [D69.6] 11/02/2016
- Imbalance [R26.89] 11/02/2016
- History of recurrent deep vein thrombosis (DVT) [Z86.718] 06/02/2016
- Other physical therapy [IMO0001] 01/22/2015
- Hip joint stiffness [M25.659] 01/06/2015
- Leg weakness, bilateral [M62.81] 01/06/2015
- Weakness of trunk musculature [M62.81] 01/06/2015
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication (HCC) [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 8/30/2017 1040

Jeanne Leonie Hoffman is a 92 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  Patient is here today for follow up.

In for refill of low dose codeine and importantly for INR review. Last INR one week ago at NW was 2.4 after holding dose as per telephone encounter. Aim is INR close to but above 2.0 given age. She is presently taking coumadin one tab daily except a half tab on Thursday and Sunday.
No bleeding or clotting issues

Needs refill on tylenol with codeine which she takes half to one per day. She has been on stable dose. Has needed a bit more on days when she sees wound care for procedure but cuts back other days. Son reports that one tab twice daily results in her being a bit "whoozy." No falls.

Other:
--Wound care at NW. Report from son is that wound is beginning to improve.

Social: Planning 48 day train trip around the country which Jeanne states she is looking forward to. They have appt for Sept 20 for letters regarding meds and hx, refills, etc in prep for that visit.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [M47.816]	08/30/2013
• Vertebral fracture [IMO0002] Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed	12/13/2012
• Thyroid nodule, uninodular [E04.1] CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.	12/13/2012
• Osteoporosis, unspecified [M81.0] T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continued for five years, then stopped	03/04/2008
• Long term current use of anticoagulant therapy [Z79.01] Reason for anticoagulation: Recurrent dvts Duration of anticoagulation: life INR goal: 2.-3	01/08/2008
• Closed fracture of unspecified intracapsular section of neck of femur (HCC) [S72.019A] Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.	05/01/2007
• Unspecified vitamin B deficiency [E53.9] Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency	05/01/2007
• Other convulsions [R56.9] Petit Mal since 1975 Carbamazepine level 7.6 on Feb 2007 Discontinued based on ER neuro consult in early 2013 No recurrence	11/20/2006
• Esophageal reflux [K21.9]	11/20/2006
• Sensorineural hearing loss, unspecified [H90.5]	11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic (HCC) [I82.509] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- Allergic rhinitis, cause unspecified [J30.9] 11/20/2006
- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006

Long term current use of anticoagulant therapy [Z79.01 (ICD-10-CM)]

Result Notes

Older Notes

Notes Recorded by Neighbor Jr., William E, MD on 8/31/2017 at 4:15 PM PDT
INR 1.8. This may reflect that last week she was instructed to skip a dose. As her INRs of late having been running at the upper end of the 2.0-3.0 range, I would stay with the new dose of coumadin 1 tab daily except half on Thursday and Sunday. Repeat INR in one week.

Clinical Notes

Telephone Encounter

Neighbor Jr., William E, MD at 8/21/2017 1507

See e care message.
Jeanne has had no clotting issues or bleeding.
She continues weekly follow up at NW Wound Care.

William E Neighbor, MD

Electronically signed by Neighbor Jr., William E, MD at 8/21/2017 3:07 PM

Messages

Elevated INR. Coumadin dose adjustment.

From	To	Sent and Delivered
William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	8/21/2017 3:05 PM

Last Read in MyChart
8/22/2017 8:54 AM by Hoffman, Jeanne Leonie

Louis: Jeanne's INR has been elevated well above the target on the last three blood tests. The number has been in the high 3's. The target is closer to 2. I spoke with you by phone this afternoon to better understand why this is Jeanne has been taking the coumadin as directed: One tablet daily and a half tablet on Sundays. She is not on any new medications. Her diet has changed in that she may be eating fewer green leafy vegetables which contain vitamin K that counteracts some of the effect of coumadin.

The plan at this time is:
--She should not take any Coumadin tonight, Monday. This is to allow the INR to correct.
--Her new dose of Coumadin will be one tablet daily except one half tablet on Thursday (including this Thursday) and Sundays.

08/21/2017 - Telephone in Husky Health Primary Care Clinic (continued)

Messages (continued)

--Please schedule a follow up visit with me for 1-2 weeks from now.
--Have an INR done at Northwest at the wound care appointment there this Thursday, Aug 24.

Thank you.

William E Neighbor, MD

CLIA number: 50D0661462

Components

Component	Value	Reference Range	Flag	Lab
Not Reported	--	—	—	UWMC Pathology

Result:

FINAL DIAGNOSIS:

A) Left lat calf, procedure not specified:
- Granulation tissue associated with fibrin, necroinflammatory debris, and underlying fibrous stroma with focal dystrophic calcifications, consistent with sampling of a chronic ulcer bed.
- Negative for neoplasm.
- Multiple levels examined.

COMMENT:
If there is clinical suspicion of a more significant lesion or process, additional sampling is recommended if clinically indicated.
A Von Kossa stain highlights focal calcium deposits with appropriately staining controls, supporting the above diagnosis.

Clinical Notes

Telephone Encounter

Brighton, Marcelle, RN at 8/3/2017 1530

Calls placed to both pt and her son. No answer but messages left with both patient and son. Instructed to hold Coumadin tonight and then resume usual schedule tomorrow. Repeat INR blood test in 7-10 days. Will try again prior to closing if call is not returned.

Marcy Brighton, RN

Electronically signed by Brighton, Marcelle, RN at 8/3/2017 4:45 PM

Brighton, Marcelle, RN at 8/3/2017 1635

Second call placed to pt son. No answer. Left message restating medication change.

Marcy Brighton, RN

Electronically signed by Brighton, Marcelle, RN at 8/3/2017 4:46 PM

Walker, Courtney M, RN at 8/4/2017 0921

Phone call to Jeanne's son, Louis, to verify if he or Jeanne received the message to not take the coumadin medication on 8/3/17 and then resume normal medication schedule and have INR blood test in 7-10 days. Louis reports that they just got home from Northwest Hospital and neither received the message about skipping 8/3's dose of Coumadin and that she did take the medication last night. RN informed Louis that I will re-route this back to Dr. Neighbor for further instruction.

Louis shares ongoing frustration with treating Jeanne's foot ulceration, feeling like healing has been stagnant and her pain poorly controlled which makes wound care difficult. They have a plan for wound care moving forward and he feels better about that but still exhausted with the ongoing treatment without improvement.

08/03/2017 - Telephone in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Reports some frustration about some lack of communication between Hall Health and Northwest Hospital over the pain medication refill and then having to wait for the refill.

Routing note to Dr. Neighbor for further instruction.

C.Walker, RN

Electronically signed by Walker, Courtney M, RN at 8/4/2017 9:57 AM

Walker, Courtney M, RN at 8/4/2017 1546

Verified with Dr. Neighbor that tonight's dose of Coumadin should be skipped then resume Coumadine medication tomorrow and have INR blood test drawn in 7-10 days. Left VM with home phone (Jeanne's) and cell (Louis). Will call back before end of day and check in on Monday if unable to reach.

Hi Jeanne and Louis,

This is Courtney. One of the nurses at Hall Health. I wanted to verify that you received the voicemail with instructions regarding the coumadin medication. Dr. Neighbor would like Jeanne to skip tonight's dose, Friday 8/4, then resume taking the medication as she usually does. In 7-10 days after the skipped dose, she should have an INR blood test. If she skips tonight's dose, 7 days would be Sat 8/12 and 10 days would be Mon 8/14. Please call or eCare message to let us know you've received this message.

Thank you and take good care,
Courtney, RN

Jeanne: Please see prior message. I refilled this medication on July 6 for 30 days. If you are needing to use it more frequently, I need to understand the reason.

William E Neighbor, MD

RE:tylenol with codeine refill

From	To	Sent
Hoffman, Jeanne Leonie	William E Neighbor Jr., MD	7/21/2017 5:39 PM

NWH-performed topic surgery, as part of wound care. Removing calcified material.
It was perceived that Jean had prescription for pain relief, through your care.
NWH should have checked eCare prescriptions records or provide a new prescription...knowing management issues exist between your office.

However, it is now understood, that eCare and health communication between NWH and Hall Health does not exist for patient care.

Jeanne: I received a request for refill of your Tylenol with Codeine. This was last written on July 6 for one month so the next refill would not be due until August 6. Let me know if you are needing to use the medication more frequently and the reasons for this and when you will run out. If you are needing to use it more frequently, I would like to see you the discuss this.

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 7/20/2017 1234

INR 4.9 . E care message sent to hold part of dose tonight. Surprised at the jump as recent values have been in the target range of 2-3 and toward the lower end of that range which is desirable because of her age. Vascular appointment does not yet appear to have happened.

Current warfarin dose is 5 mg daily except half tablet on Sundays.
Will have her hold dose this evening and then resume regular schedule and recheck INR in 7 days.

RE: Health Information Update

From	To	Sent and Delivered
William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	7/6/2017 4:05 PM

Last Read in MyChart
7/10/2017 11:45 AM by Hoffman, Jeanne Leonie

Let us do this when she comes in for her next visit which should be soon.

William E Neighbor, MD

Health Information Update

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	7/6/2017 2:05 PM

Need a prescription for walker, DSHS refusing medical credit, without doctors prescription for medical device. Cost 170.00-

Please Note: Louis Husband of 20 yrs/friend for 40+ yrs died June 9, 2017. Louis is devastated/memorial at end of month. visit: www.atdlines.com/kcjonesSF.htm for celebration of life.

Clinical Notes

Telephone Encounter

Mohova, Elena, CMA at 5/22/2017 1408

Louis Hoffman called for Jeanne Hoffman asking if the information for Jeanne recertification has been sent. If so, he needs a confirmation to provide it to his attorney. He also stated that he changed the dressing on Jeanne's wound on Friday and going to change it today. He will send new pictures of the wound later.

When is the appointment for follow up at Northwest. I am happy to see Jeanne for follow up in our clinic but will defer to Northwest. Is there a person I can call there who has been involved in her care so I can confirm a follow up plan with them. I have not received any notes from them.

Dear Rhododendron Apartments:

Below is a list of all Over the Counter medical items recommended for treatment of a medical condition for the above patient

Acetaminophen 500 mg, one pill twice daily
Vitamin D Strength 400 IU/ Calcium 600mg, one on even number days
Vitamin D-3 :Strength 2000 IU, one on odd numbered days
Vitamin B-complex: 500 mcg, once daily
Urinary Incontinence Pads, use as needed; average 54 pads per week

05/22/2017 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Letters (continued)

Hearing aide batteries
Walker maintenance
Wound care supplies for lower extremity ulcers
Compression stockings

I have asked the family to provide the out of pocket expenses as I do not have access to this information.

Sincerely,

Sincerely,

Thanks for confirming those things. I will update the information and send in. One item you did not respond to is what was the total out of pocket expenses for these items from April 1 2016 to March 30, 2017. I don't know why they want me to provide that information as I do not have access to that nor could I confirm its veracity, only you could do that.

William E Neighbor, MD

RE: Results Question

From	To	Sent
Hoffman, Jeanne Leonie	William E Neighbor Jr., MD	5/26/2017 8:59 AM

Bill...

HK is requiring a yearly update of over-counter and medical supplies. Last years is not acceptable

Do not forget Compression Socks and Wound Care and Walker Maintenance.

This also includes: "Reasonable Accommodations", such as Wheelchairs/Walker Ramp, Security Screen door, storage for medical bulk purchase of medical supplies, walker security storage/security(in Home Mobility/without having walker /medical supplies/devices blocking

05/22/2017 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Messages (continued)

ways or creating clutter/dangerous obstacles/etc aging requirement for independent living)

Confirm that she is still taking/using:
Acetaminophen (Tylenol) 500 mg twice daily
Taking Vitamin D and Calcium. YES, taking two forms of Vitamin D as listed above.
Average urinary incontinence pad use, 54 pads per week.

RE: Results Question

From	To	Sent and Delivered
William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	5/25/2017 1:53 PM
Last Read in MyChart		
5/26/2017 8:35 AM by Hoffman, Jeanne Leonie		

They also want a more specific listing of over the counter medications that you are paying for.

I had listed Vitamin B12 already.

Last year I listed:
Acetaminophen 500 mg, one pill twice daily
Vitamin D Strength 400 IU/ Calcium 600mg, one on even number days
Vitamin D-3 :Strength 2000 IU, one on odd numbered days
Vitamin B-complex: 500 mcg, once daily
Urinary Incontinence Pads, use as needed; average 54 pads per week
Hearing aide batteries

I need to confirm that she is still taking/using:
Acetaminophen (Tylenol) 500 mg twice daily
How she is taking Vitamin D and Calcium. Is she still taking two forms of Vitamin D as listed above.
What is the average urinary incontinence pad use, still 54 pads per week?

You should call the wound care center to report this so they can give you instruction. I would continue care there. They are very good and we were not achieving the improvement we had hoped for with routine ambulatory care management.

Louis for Jean:

Bill...

NWH Wound Care Dressing, was not done properly....It unraveled. (Possibly thinking that Jean does not walk/motorist)

It maybe best that we "continue" coming to Hall Health for treatment/w UWMC as referral treatment..

Have med-supplies for re-dressing at home.

NW wound care & culture results

From	To	Sent
Hoffman, Jeanne Leonie	William E Neighbor Jr., MD	5/18/2017 8:37 AM

I ave asked Louis to Respond.

Appointment at NWH Examination o wound was non analytic, rather a wound inspection, "Therahoney" light application and cleaning bandages.

Bandage wrap was irritating on wound (insufficient therahoney as lubricant between gauge pad/sticking/bounding to wound), causing walking difficulty.

Possibly staring out as minor infection of bacteria, then being contaminated by other unknown bacteria pathogen source.
This could of happen when Jean handled the "therahoney strips" with out protective gloves or unwashed hands.

However, Jean did take a shower and reported that wound was lightly washed, before wound therahoney reapplication.

Jeanne:
Your wound culture is growing mixed bacteria rather than a single bacteria so it is unclear if this represents an infection or contamination. I wanted to double check that you have an appointment at Northwest tomorrow for wound care.

Active at the End of Visit

Unclassified (OTHER MEDS, SEE COMMENTS,)

Discontinued by: Ong, Thuan Duc, MD — Discontinued on: 6/7/2018
Instructions: Vitamin B12 500 mcg once daily over the counter
Entered by: Neighbor Jr., William E, MD — Entered on: 2/21/2014
Start date: 2/21/2014 — End date: 6/7/2018

Pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 12/20/2017
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 9/21/2016
Start date: 9/21/2016 — End date: 12/20/2017
Quantity: 270 tablet — Refill: 3

Acetaminophen-Codeine #3 300-30 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 6/1/2017
Reason for discontinuation: Reorder
Instructions: TAKE ONE TABLET BY MOUTH DAILY AS NEEDED FOR ARTHRITIC PAIN
Authorized by: Neighbor Jr., William E, MD — Ordered on: 11/28/2016
Start date: 11/28/2016 — End date: 6/1/2017
Quantity: 30 tablet — Refill: 3

Atorvastatin Calcium 20 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 12/20/2017
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD — Ordered on: 12/7/2016
Start date: 12/7/2016 — End date: 12/20/2017
Quantity: 45 tablet — Refill: 3

05/10/2017 - Office Visit in Husky Health Primary Care Clinic (continued)

Medication List (continued)

Timolol Maleate 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 5/23/2017
Reason for discontinuation: Reorder
Instructions: Place 1 drop in each EYE 2 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 1/18/2017
Start date: 1/18/2017
End date: 5/23/2017
Quantity: 5 mL
Refill: 0

Warfarin Sodium (COUMADIN) 5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 8/21/2017
Reason for discontinuation: Reorder
Instructions: 1 TAB PO ONCE each evening except one half tab on Sundays
Entered by: Neighbor Jr., William E, MD
Entered on: 4/7/2017
Start date: 4/7/2017
End date: 8/21/2017
Quantity: 90 tablet

Losartan Potassium 25 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 12/8/2017
Reason for discontinuation: Reorder
Instructions: TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/17/2017
Start date: 4/17/2017
End date: 12/8/2017
Quantity: 45 tablet
Refill: 2

Stopped in Visit

Clinical Notes

Progress Notes

Dmyterko, Minami, RN at 5/10/2017 1231

Wound Care Visit (Joint Visit with Dr. Neighbor)
S:
Jeanne Leonie Hoffmanwho is 92 year old presents today for wound care.
History of wound: chronic venous ulcers, DVT, grafting more than 20 years ago.
ER 4/25/17 for cellulitis of LLE venous ulcers. Completed Keflex and doxycycline PO on 5/3/17. Xray of R tibia and ankle and CBC/CRP/BMP all normal.
Pain: L upper lateral leg wound is very sensitive.
Home treatment: elevation
Other: Son is the primary caregiver of Mrs. Hoffman, pt performs ADLs independently. Ambulates with walker. Son helps with home dressing change.

O:
Location: LLE
Duration: Feb 2017, 3 months
Measurements:
#1) 2.3 x 1.2 x 0.2 (lower lateral ankle), oval shape
#2) 2.1 x 2.1 x depth unable to measure due to slough (lateral mid leg), circular shape
#3) 0.7 x 0.7 x 0.2cm due to slough (medial ankle), round
Undermining/Tunneling: none

Wound Bed: slough 90-100%, subcutaneous ossification in Wound #2.
Wound Edges: diffused wound edges, slightly rounded and thickened
Exudate: moderate serous drainage, mild odor
Circulation: intact, pulse palpated in DP
Periwound condition: hemosiderin, continues to have pink hue in the lower 3/4 of the leg, 11cm below the bottom of the patella, edema 1+ knee down.

Ambulates with walker slowly
Hx. Peripheral neuropathy

Vascular Study: 3/15/17
Rt ABI (rt dors ped A BP / max brach A BP) 0.98
Rt TBI (rt toe BP / max brach A BP) 0.70
Lt ABI dors ped (lt dors ped A BP / max brach A BP) 1.09
Lt TBI (lt toe BP / max brach A BP) 0.68

A: **Cellulitis**
Wound Healing Status: No significant change since last visit.
Presence of signs of infection or over-colonization? Yes - suspect unresolved infection
No s/s of osteomylitis noted in ER Xray on 4/25/17
Etiology of Wound: venous ulcers
Extent of Tissue Injury: full
Barriers/Risk Factors: warfarin, venous insufficiency, mild arterial insufficiency, impaired mobility, psychosocial, elevated BP, DM II (last a1c 6.2 in Feb 2016); scarring from previous grafting; peripheral neuropathy; pain; subcutaneous ossification; lives in Bainbridge (takes a long time to commute and has difficulty making frequent office visits)

No improvement noted with Viscopaste. Excessive moisture is trapped under Viscopaste.

P:
Cleansed with NS
Use of skin barrier - Y
Vaseline to dry skin on periwound.
Primary dressing and topical: Acticoat/silver dressing (Silver alginate unavailable)
Secondary dressing - ABD pad
Secured with roll gauze and stockinet to provide ventilation
Debridement Type: Premedicated with lidocaine 2% gel for 20-30 min. Conservative sharp debridement of slough performed. Tolerated the debridement in Wound #1 and #3, but it was too painful in Wound #2. Procedure terminated when pt exhibited discomfort.

wound culture done
Pt tolerated the procedure well? See above
Viscopaste DCed due to excessive moisture. Pt need more frequent dressing change.
Medihoney alginate DCed due to no improvement
Referral to NW Wound Care Clinic.
Photos updated.

Instructed pt and son to 1) wash hands before and after wound care, 2) clean with NS,

Clinical Notes (continued)

3) apply a small piece of silver dressings directly to the wounds, 4) cover with ABD pad, 5) wrap with roll gauze, 4) continue elevation.

Patient and son verbalize understanding and agreement.

Electronically signed by Dmyterko, Minami, RN at 5/10/2017 2:45 PM

Neighbor Jr., William E, MD at 5/10/2017 1335

Jeanne Leonie Hoffman is a 92 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  Patient is here today for left leg ulcers follow up.
- RN60

Jeanne is in today for two issues:

Left lower extremity ulcers
Though she and son were contacted to come in late last week or earlier this week they did not check their messages. She has been having less pain in the leg. Son has been changing dressings.

Left wrist pain
She states that she has noted swellling and pain in the left wrist but denies injury or fall. She did recently clean her oven.

Medications

Outpatient Prescriptions Marked as Taking for the 5/10/17 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• Acetaminophen-Codeine #3 300-30 MG Oral Tab	TAKE ONE TABLET BY MOUTH DAILY AS NEEDED FOR ARTHRITIC PAIN	30 tablet	3
• Atorvastatin Calcium 20 MG Oral Tab	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	45 tablet	3
• Losartan Potassium 25 MG Oral Tab	TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY	45 tablet	2

Substance Use Topics

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used
- Alcohol Use: No

Objective:

BP 121/54 mmHg | Pulse 59 | Temp(Src) 97.4 °F (36.3 °C) (Oral)
Estimated body mass index is 22.76 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of 5/3/17: 54.613 kg (120 lb 6.4 oz).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 121/54
General: NAD
Skin: See nurse note. Wound dorsum of left foot and anterolateral lower leg not healing
MSK: Left wrist mild swelling dorsum without focal tenderness. Flexion 10 degrees less than opposite wrist and also 5 degrees of limitation internal and external angulation

Lab and other tests: X ray pending.

Assessment and Plan:

(L98.491) Skin ulcer, limited to breakdown of skin (HCC) (primary encounter diagnosis)
Lack of progressive improvement.
Wound culture today but no clear evidence of cellulitis requiring antibiotics to be restarted today
See nurse note
Referral to NW hospital wound care which is most convenient for them.

(Z79.01) Long term current use of anticoagulant therapy
Continues on anticoag. Last INR 4.27 was 2.5. Plan repeat end of May. Goal is close to 2 (rather than 3.0).
Pending vascular surgery review and visit to determine if needs to continue. Last seen there nearly ten years ago.

(I82.509) DVT, recurrent, lower extremity, chronic, unspecified laterality (HCC)
No recurrence.

(M25.532) Left wrist pain
Left wrist dorsal swelling without bruising. Unclear if she injured it. The limited ROM may be old. X ray obtained.

Accession number: 10662305 Resulting lab: UW RADIOLOGY
Lab Technician: AJAY CHHABRA HALL HEALTH TECH
Narrative:
EXAMINATION:
XR WRIST MIN 3 VIEWS LEFT

CLINICAL INDICATION:
left wrist pain and swelling. No hx of fall

COMPARISON:
3.29.2011

FINDINGS:
Collapsed and sclerotic lunate is as before. There are some ossicles in the scapholunate interval probably secondary to avascular necrosis of the lunate.

There is moderate osteoarthritis at the radiocarpal joint. There is moderate osteoarthritis at the first CMC, and triscaphe joints. Dorsal tilt of the lunate is in keeping with dorsal intercalated segmental instability. There is no acute fracture. There is extensive arterial vascular calcification.

RE:visit summary

From	To	Sent
Hoffman, Jeanne Leonie	William E Neighbor Jr., MD	5/11/2017 8:19 AM

Subject: Skin Ulcer. Home Wound Care of 5-6-17

While Louis was scrubbing up and implement sterilization.
Jean began removing wound bandages with non sterilized implements.
While Louis putting on sterilized latex groves, Jean open therahoney strips, with unclean hands and cutting strip with non sterilized implements.

Louis did not have another sterilized therahoney pack, thus had to use contaminated therahoney strips.

Messages (continued)

This may have had impact on non healing improvement of ulcer areas, causing further infection.

Next wound care inspection 5-13-17, cleaning/Nanocrystals "Acticoat" applied and clean bandage application.
Written By Louis

Telephone Encounter

Dmyterko, Minami, RN at 5/9/2017 0959

I was not able to reach pt last week by phone or email.
TC with Louis, son today. Louis changed dressings yesterday. Reports the L upper lateral leg wound is slightly red around the wound, but the lower lateral leg and ankle wounds are getting smaller. Denies fever or increased pain. When I suggested increasing visit frequency to Tue/Fri, son stated it is too late to come in from Bainbridge on ferry and bus today and he does not think clinic visit is indicated today because the wounds are not worsening.
Son wishes to keep the appointment for tomorrow.

P: Will see pt and son tomorrow at 10:20am.

Hello Mrs. Hoffman and Louis,

This is Minami (nurse). I just tried to reach you on the phone. How is your left leg?. It has been 48 hours since you finished your antibiotics, so I want to make sure your wound is not getting worse. Do you have increased pain, swelling, drainage, fever, or redness? If so, please call us immediately. Until your wound shows significant improvement, I think we should see you in our clinic twice a week and monitor it closely. I understand your long commute, but I strongly recommend that we reschedule your appointment to Tuesday and Friday Dr. Neighbor and myself next week. Please let us know.

Progress Notes

Dmyterko, Minami, RN at 5/3/2017 1422

Wound Care Visit (Joint Visit with Dr. Neighbor)
S:
Jeanne Leonie Hoffmanwho is 92 year old presents today for wound care.
History of wound: chronic venous ulcers, DVT, grafting more than 20 years ago.
ER 4/25/17 for cellulitis of LLE venous ulcers. Completed Keflex and doxycycline PO this morning.
Xray of R tibia and ankle and CBC/CRP/BMP all normal.

Pain: Slightly better than last week, but still wakes up multiple times at night due to "biting" pain in her leg.

Home treatment: elevation

Other: Son is the primary caregiver of Mrs. Hoffman, pt performs ADLs independently. Ambulates with walker.

O:
Location: LLE
Duration: Feb 2017, 3 months
Measurements:
#1) 2 x 1.5 x depth unable to measure due to slough (lower lateral ankle), irregular shape

#2) 2.1 x 1.8 x depth unable to measure due to slough (lateral mid leg), irregular shape
#3) 0.7 x 0.7 x depth unable to measure due to slough (medial ankle), round
Undermining/Tunneling: none
Wound Bed: slough 90-100%, subcutaneous ossification in Wound #2.
Wound Edges: diffused wound edges, slightly rounded and thickened
Exudate: small serous drainage, mild odor
Circulation: intact, pulse palpated in DP
Periwound condition: hemosiderin, continues to have pink hue in the lower 3/4 of the leg.

Ambulates with walker slowly
Hx. Peripheral neuropathy

Vascular Study: 3/15/17
Rt ABI (rt dors ped A BP / max brach A BP) 0.98
Rt TBI (rt toe BP / max brach A BP) 0.70
Lt ABI dors ped (lt dors ped A BP / max brach A BP) 1.09
Lt TBI (lt toe BP / max brach A BP) 0.68

A: **Cellulitis**
Wound Healing Status: No significant change since last visit.

Presence of signs of infection or over-colonization? Yes

No s/s of osteomylitis noted in ER Xray on 4/25/17

Etiology of Wound: venous ulcers
Extent of Tissue Injury: full
Barriers/Risk Factors: warfarin, venous insufficiency, mild arterial insufficiency, impaired mobility, psychosocial, elevated BP, DM II (last a1c 6.2 in Feb 2016); scarring from previous grafting; peripheral neuropathy; pain; subcutaneous ossification; lives in Bainbridge (takes a long time to commute and has difficulty making frequent office visits)

No improvement noted with Viscopaste. Excessive moisture is trapped under Viscopaste.

P:
Cleansed with NS
Use of skin barrier - Y
Primary dressing and topical: Medihoney alginate
Secondary dressing - ABD pad
Secured with roll gauze and stockinet to provide ventilation
Debridement Type: Premedicated with lidocaine 2% gel for 20-30 min. Conservative sharp debridement of slough performed. Tolerated the debridement in Wound #1 and #3, but it was too painful in Wound #2. Procedure terminated when pt exhibited discomfort.

Pt tolerated the procedure well? See above
Viscopaste DCed due to excessive moisture. Pt need more frequent dressing change.

Instructed pt and son to 1) wash hands before and after wound care, 2) clean with NS,

05/03/2017 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

3) apply a small piece of medihoney alginate to wound bed, 4) cover with ABD pad, 5) wrap with roll gauze, 4) continue elevation.

RTC on Wednesday next week to see Dr. Neighbor and nurse. Sooner if pain increases or s/s infection become worse. **Will consider wound culture at the next visit.**

Patient and son verbalize understanding and agreement.

Electronically signed by Dmyterko, Minami, RN at 5/3/2017 5:48 PM

Neighbor Jr., William E, MD at 5/3/2017 1745

Briefly saw the patient with the nurse. See nurse note.
Debridement completed by nurse.
Jeanne just completed seven day course of kelfex plus doxycycline this morning. Cellulitis appear resolved.
Would like 2 day follow up and at that visit may arrange for transfer of care for wound to NW Wound Care. They live on Bainbridge. The nearest wound care facility there would be at Harrison in Bremerton which may be more difficult for them to get to.

Louise
Re: Jean's next appointment
I believe that at your visit on Wednesday, a visit was scheduled for a one week follow up on Jean's leg. I conferred with Minami after your visit. We think that is a bit long to wait. Could you come in tomorrow morning or early afternoon. I could see her in the morning or up until 2 pm in the afternoon. Monday would be possible, but we would really prefer tomorrow Friday as we want to make sure that infection does not recur.

I also think it likely that Jean will need to be referred to a wound care specialty center. There is one at Northwest Hospital in Seattle. In the Bainbridge area, the nearest is Harrison Memorial in Bremerton. Which would be easiest for you to get to transportation-wise.

Bill

Health Information Update

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	4/28/2017 7:47 AM

Sam and Bill...

REF: Housing Kitsap Senior Abuse and Hatred.

I (Jean) Have asked Louis To respond.

I (Jean) an living in fear, that Housing Kitsap is abusing me(Jean) and My son, using my son Louis against me (jean).
The residents under Housing Kitsap falsified complaint, My son did none of the thing reported, my son does not have behavior problems.

My (Jean) and my Son Louis Constitutional Rights, civil Rights, free speech to communicate with government and elected official is being denied to me, as if we are mentally ill or doing wrong by terrorize government officials , which is not true.

Both my Son Louis and I Jean) raised an issue publicly and of which we are being punished, terrorized, oppressed and living in fear of further hatred attacks under Housing Kitsap Authority to control and prevent free speech and participation in our government.

Wound Care Visit

S:
Jeanne Leonie Hoffmanwho is 92 year old presents today for wound care.
History of wound: chronic venous ulcers, DVT, grafting more than 20 years ago
Pain: "biting" sensation upon movement of ankle"
Increased pain last week in LLE - codeine; 0/10 at rest, 10/10 with touch
Home treatment: applying lotion to legs
Other: transportation provided by son, son is the primary caregiver of Mrs. Hoffman, pt performs ADLs independently

O:
Location: LLE
Duration: Feb 2017, 2.5 months
Measurements: 1) 3 x 4 x depth unable to measure due to slough (lower lateral ankle), 2) 2 x 3 x depth unable to measure due to slough (lateral mid leg), 0.7 x 0.7 x depth unable to measure due to slough (medial ankle) in cm
Undermining/Tunneling: none
Wound Bed: slough 100%
Wound Edges: attached, diffused wound edges, slightly rounded and thickened

04/25/2017 - Clinical Support Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Exudate: moderate purulent drainage, malodorous
Circulation: warm
Periwound condition: hemosiderin, faint erythema knee down
Ambulates with walker slowly

3/15/17
Rt ABI (rt dors ped A BP / max brach A BP) 0.98
Rt TBI (rt toe BP / max brach A BP) 0.70

Lt ABI dors ped (lt dors ped A BP / max brach A BP) 1.09
Lt TBI (lt toe BP / max brach A BP) 0.68

A: Cellulitis
Wound Healing Status: worse, wounds larger, increased erythema and sensitivity
Presence of signs of infection or over-colonization? Infected
Etiology of Wound: venous ulcers
Extent of Tissue Injury: full
Barriers/Risk Factors: warfarin, venous insufficiency, mild arterial insufficiency, impaired mobility, psychosocial, support, IADLs, elevated BP, DM II (last a1c 6.2 in Feb 2016); scarring from previous grafting

P:
Cleansed with diluted hibiclens, rinsed with NS
Use of skin barrier - Y
Primary dressing and topical: covered with Mepilex Border (temporary dressings until seen by ER)
Debridement Type: conservative sharp debridement of slough; unable to tolerated due to pain
Pt tolerated the procedure well? Y
Informed Dr. William Neighbor about cellulitis. Dr. Neighbor briefly assessed the wounds.
Called Taxi to transport pt to UWMC ER. Pt likely need IV antibiotics for cellulitis of LLE.
Patient and son verbalize understanding and agreement.

Jeanne Leonie Hoffmanwho is 92 year old presents today for wound care.
History of wound: chronic venous ulcers, DVT, grafting more than 20 years ago
Pain: "biting" sensation upon movement of ankle"
Increased pain last night in LLE - codeine and NSAIDs
Home treatment: applying lotion to legs
Other: transportation provided by son, performs ADLs independently

O:
Location: LLE
Duration: Feb 2017, 2 months
Measurements: 1) 2 x 0.9 x 0.3 (lower lateral ankle), 2) 1.9 x 2.8 x depth unable to measure due to slough (lateral mid leg), 0.5 x 0.8 x depth unable to measure due to slough (medial ankle) in cm
Undermining/Tunneling: none
Wound Bed: slough 95%, non-granulating tissue 5%
Wound Edges: attached, diffused wound edges, slightly rounded and thickened
Exudate: moderate serous drainage, no odor
Circulation: warm
Periwound condition: hemosiderin, less dry today

04/19/2017 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Ambulates with walker slowly

3.15.17
Rt ABI (rt dors ped A BP / max brach A BP) 0.98
Rt TBI (rt toe BP / max brach A BP) 0.70

Lt ABI dors ped (lt dors ped A BP / max brach A BP) 1.09
Lt TBI (lt toe BP / max brach A BP) 0.68

A:
Wound Healing Status: wounds slightly larger
Presence of signs of infection or over-colonization? Probable colonization
Etiology of Wound: venous ulcers
Extent of Tissue Injury: full
Barriers/Risk Factors: warfarin, venous insufficiency, mild arterial insufficiency, impaired mobility, psychosocial, support, IADLs, elevated BP, DM II (last a1c 6.2 in Feb 2016)

P:
Cleansed with NS
Use of skin barrier - Y
Primary dressing and topical: Iodosorb
Secondary dressing: Mepilex foam, Viscopaste
Secured with Coban
Debridement Type: conservative sharp debridement of slough
Pt tolerated the procedure well? Y

Patient's Home Care Instructions: see AVS
RTC in 7 days

Electronically signed by Dmyterko, Minami, RN at 4/20/2017 7:44 PM

Neighbor Jr., William E, MD at 4/20/2017 1942

Patient briefly seen by me. Superficial ulcer slowly enlarging. Plan is unna boot as documented by nurse. Reminded Jeanne that she is due for an INR. The goal is above but close to 2. She has not yet heard from vascular surgery regarding an appointment.

Orders Only on 04/19/17
1. PROTHROMBIN TIME

Result	Value	Ref Range
Prothrombin Time Patient	25.1 (H)	10.7 - 15.6 s
Prothrombin INR	2.3 (H)	0.8 - 1.3

INR in desired range of above but close to two. Repeat in one month.

Clinical Notes (continued)

A:
Wound Healing Status: no significant change
Presence of signs of infection or over-colonization? none
Etiology of Wound: mixed venous arterial
Extent of Tissue Injury: partial
Barriers/Risk Factors: warfarin, venous insufficiency, arterial insufficiency, impaired mobility, psychosocial, support, IADLs

P:
Cleansed with NS
Use of skin barrier - Y
Primary dressing and topical: medihoney alginate
Secondary dressing: Mepilex border
Debridement Type: conservative sharp debridement
Pt tolerated the procedure well? Y
Other: will order viscopaste for next visit

Patient's Home Care Instructions: see AVS

Electronically signed by Dmyterko, Minami, RN at 4/12/2017 6:58 PM

Neighbor Jr., William E, MD at 4/12/2017 1340

Jeanne Leonie Hoffman is a 92 year old female here to discuss the following:
Chief Complaint
Patient presents with
- Follow-Up
  cc: Follow up right leg ulcers.
- RN60
- Wound Care

History:
Jeanne is in with her son today for follow up wound care with our nurse and to review plans with me.

She reports to me that her housing situation which involves conflict with their neighbors and potentially loosing her son Louis as a live in care provider which is a role she values are a problem for her. I did speak with NW Justice yesterday.

Louis reports that they followed the instructions for use of medihoney in alginate.

No fever, chills, nightsweats

Medications
Outpatient Prescriptions Marked as Taking for the 4/12/17 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• Acetaminophen-Codeine #3 300-30 MG Oral Tab	TAKE ONE TABLET BY MOUTH DAILY AS NEEDED FOR ARTHRITIC PAIN	30 tablet	3

Clinical Notes (continued)

• Atorvastatin Calcium 20 MG Oral Tab	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	45 tablet	3
• Losartan Potassium 25 MG Oral Tab	One half tablet daily	45 tablet	3
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	3
• Timolol Maleate 0.5 % Ophthalmic Solution	Place 1 drop in each EYE 2 times a day.	5 mL	0
• Unclassified (OTHER MEDS, SEE COMMENTS,)	Vitamin B12 500 mcg once daily over the counter		
• Warfarin Sodium (COUMADIN) 5 MG Oral Tab	1 TAB PO ONCE each evening except one half tab on Sundays	90 tablet	3

Objective:
BP 145/62 mmHg | Pulse 57 | Temp(Src) 98 °F (36.7 °C) (Oral)
Estimated body mass index is 23.67 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of 3/8/17: 56.79 kg (125 lb 3.2 oz).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 145/62
General: NAD
Skin:
Left foot dorsolateral superficial ulceration perhaps slightly larger.
One area on inner aspect of lower leg shows scab but no ulcer.
Some dryness of skin

Lab and other tests: INR 2.1

Assessment and Plan:
(L98.491) Skin ulcer, limited to breakdown of skin (HCC) (primary encounter diagnosis)
See nurse note. Plan is return next week for placement of Unna boot which nurse will order. Otherwise see nurse note.

(Z79.01) Long term current use of anticoagulant therapy
INR today was 2.1. Current dose of warfarin is now 5 mg daily except one half tab on Sundays. Repeat in two weeks. Goal is to keep INR close to 2; it had been running a bit higher

(Z86.718) History of recurrent deep vein thrombosis (DVT)
As noted at last visit, it has been ten years since she saw vascular surgery. Follow up visit ordered and referral completed with question of whether to continue anticoagulation and, if so, whether to continue warfarin or move to newer mediation that does not require monthly blood work. She has done well with warfarin. I suspect the newer medications will be beyond what she can afford. So the basic question is whether to continue anticoagulation at all.

Patient Instructions

The underlying cause of your wounds on the legs is due to alteration in your circulation to your legs. Mild compression and exercise will improve your circulation.

- Elevate your leg when sitting or lying to reduce swelling. If elevation causes pain, lower legs immediately.

- Foot (e.g., up and down) exercise and walking as tolerated twice a day.

- Wear compression stockings every day as tolerated. Be careful not to dislodge the dressings.

- Wash your hands before and after caring for your wounds.

- Keep dressings clean and dry. If the outer dressings get saturated, change the dressings (extra dressings supply provided today.)

- Honey can be left in the wounds for about 1 week.

- Apply moisturizer to your legs 2 times a day.

- The best time to take a shower is morning before your appointment or the day before your next appointment. Then, cover the wounds with gauze for temporary protection.

- Monitor for signs and symptoms of infection (e.g., increased redness, yellow, green, thick drainage, increased pain, fevers, warmth)

04/12/2017 - Office Visit in Husky Health Primary Care Clinic (continued)

Documents

Business Documents - Scan on 4/18/2017 12:43 PM: Agreement to Pay for Healthcare Services; 2017/04/12

Scan (below)

U8170135

Washington State Health Care Authority

Agreement to Pay for Healthcare Services

WAC 182-502-0160 ("Billing a Client")

This is an agreement between a "client" and a "provider," as defined below. The client agrees to pay the provider for healthcare service(s) that the Health Care Authority (HCA) will not pay. Both parties must sign this Agreement. For the purposes of this Agreement, "services" include but are not limited to healthcare treatment, equipment, supplies, and medications

Client - A recipient of Medicaid or other healthcare benefits through the HCA or a managed care organization (MCO) that contracts with the HCA.

Provider - An institution, agency, business, or person that provides healthcare services to HCA clients and has a signed agreement with the HCA or authorization from an MCO.

This Agreement and WAC 182-502-0160 apply to billing a client for covered and noncovered services as described in WAC 182-501-0050 through WAC 182-501-0070. Providers may not bill any HCA client (including those enrolled with an MCO that contracts with the HCA) for services which the HCA or an MCO that contracts with the HCA may have paid until the provider has completed all requirements for obtaining authorization.

Client's printed name	Client's ID number
Hoffman, Jeanne Leonie	**100675002WA**
Provider's printed name	Provider number
William Neighbor, MD	**1265518989**

Directions:

- Both the provider and the client must fully complete this form **before** an HCA client receives any service for which this Agreement is required.
- You must complete this form no more than 90 calendar days before the date of the service. If the service is not provided within 90 calendar days, the provider and client must complete and sign a new form.
- **The provider and the client must complete this form only *after* they exhaust all applicable HCA or HCA-contracted MCO processes which are necessary to obtain authorization for the requested service(s). These may include the exception to rule (ETR) process for noncovered services as described in WAC 182-501-0160 or the administrative hearing process, if the client chooses to pursue these processes.**
- Limited English proficient (LEP) clients must be able to understand this form in their primary language. This may include a translated form or interpretation of the form. If the form is interpreted for the client, the interpreter must also sign and date the form. Both the client and the provider must sign a translated form.

Fully complete the table on back of this form. If needed, attach another sheet for additional services. The client, provider, and interpreter (if applicable) must sign and date each additional page.

Important Note from HCA:

- This agreement is void and unenforceable if the provider fails to comply with the requirements of this form and WAC 182-502-0160 or does not satisfy HCA conditions of payment as described in applicable Washington Administrative Code (WAC) and Billing Instructions. The provider must reimburse the client for the full amount paid by the client.
- See WAC 182-502-0160(9) for a list of services that cannot be billed to a client, regardless of a written agreement.
- Keep the original agreement in the client's medical record for 6 years from the date this agreement is signed. Give a copy of this completed, signed agreement to the client.
- Providers are responsible for ensuring that translation or interpretation of this form and its content is provided to LEP clients. Translated forms are available at http://hrsa.dshs.wa.gov/mpforms.shtml.

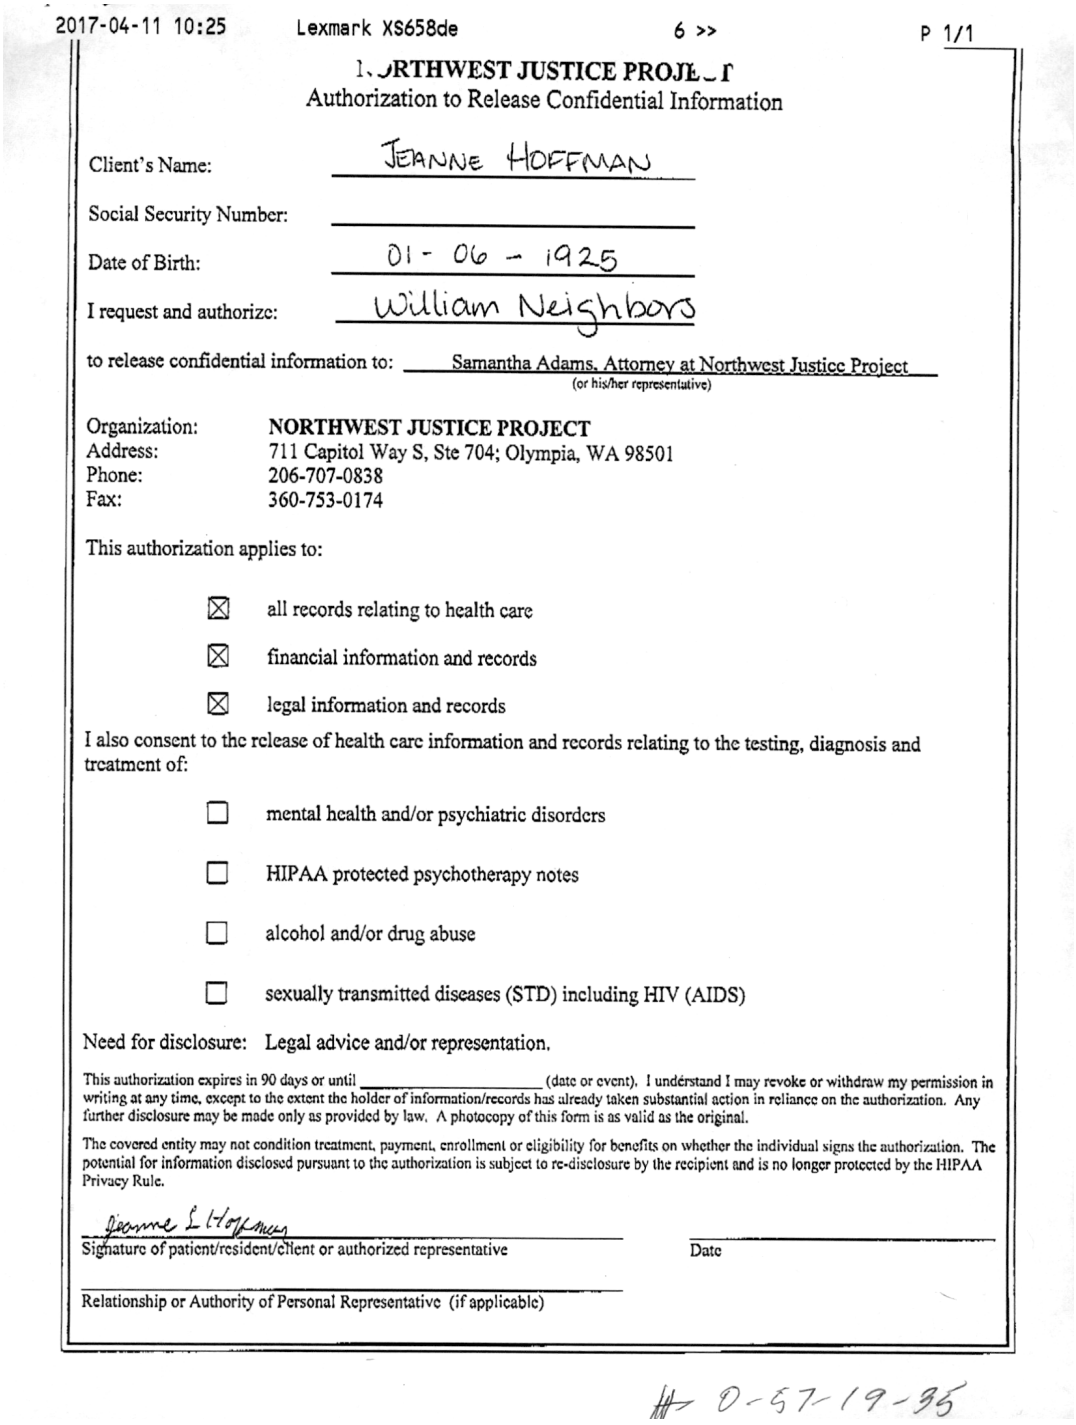
- I understand that HCA or an MCO that contracts with HCA will not pay for the specific service(s) being requested for one of the following reasons, as indicated in the above table: 1) HCA does not cover the service(s); 2) the service(s) was denied as not medically necessary for me, or 3) the service(s) is covered but the type I requested is not.
- I understand that I can, but may choose not to: 1) ask for an Exception to Rule (ETR) after an HCA or HCA-contracted MCO denial of a request for a noncovered service; or 2) ask for a hearing to appeal an HCA or HCA-contracted MCO denial of a requested service.
- I have been fully informed by this provider of all available medically appropriate treatment, including services that may be paid for by the HCA or an HCA-contracted MCO, and I still choose to get the specified service(s) above.
- I understand that HCA does not cover services ordered by, prescribed by, or are a result of a referral from a healthcare provider who is not contracted with HCA as described in Chapter 182-502 WAC.
- ***I agree to pay the provider directly for the specific service(s) listed above.***
- I understand the purpose of this form is to allow me to pay for and receive service(s) for which HCA or an HCA-contracted MCO will not pay. This provider answered all my questions to my satisfaction and has given me a completed copy of this form.
- I understand that I can call HCA at 1-800-562-3022 to receive additional information about my rights or services covered by HCA under fee-for-service or managed care.



I AFFIRM: I understand and agree with this form's content, including the bullet points above.	Client's or client's legal representative's signature	Date 4/12/17
I AFFIRM: I have complied with all responsibilities and requirements as specified in WAC 182-502-0160.	Provider of service(s) signature	Date 4/12/17
I AFFIRM: I have accurately interpreted this form to the best of my ability for the client signing above.	Interpreter's printed name and signature	Date

No Contact/Not illegal

From: " Jean Hoffman" <jeanhoffman@usa.com>
To: "Samantha Adams" <sama@nwjustice.org>, djohnson@bainbridgewa.gov
Date: Apr 10, 2017 9:08:09 AM

Sam....

I (Jean) has asked my son Louis to respond, as to request for October 31, 2016 No contact with Eileen Clyde:

Eileen Clyde was asked, in a respectful, polite, non threatening guise an without euphemisms that Jean Hoffman and
Louis Alloin, did not want to engage in contact with Eilleen Clyde.

Reason and Justification: Eileen Clyde was seen (Since moving into Rhododendron Apt 5) under the influence of drugs, alcohol, or chemicals, exhibiting behavior toward us that was offensive, including unsteady walking/weaving and speech that was difficult to understand, walking around Apt Complex with wine glass, Apt 5 smelling/Oder coming for Apt 5, discharging bio fluids at our door step, make unreasonable demands that she wanted our plants and blocking leaving our Apt 2/not limited too.

It is not illegal, to ask a person to not have contact, do to their behavior or under influence of a controlled substance.

Jean and Louis just anted to not have contact when Eileen was exhibiting behavior that was not in good mannerism and that we wanted not conflicts.

This statement is trues and correct to My (Jean Hoofman) best of knowledge under oath of perjury.

lcha
Just email me for a "Phone Contact", as your call is just as important to me, as it is to you. Have a nice day and hope to hear from you soon.

Clinical Notes

Telephone Encounter

Mohova, Elena, CMA at 4/10/2017 1631

Received a call from Samantha Adams, staff attorney, who is working with Jean Hoffman on her case regarding housing. She would like to discuss with Dr. Neighbor some questions regarding in home care for Jean Hoffman. Please call her at 206-707-0838.

Electronically signed by Mohova, Elena, CMA at 4/10/2017 4:33 PM

Neighbor Jr., William E, MD at 4/11/2017 1040

4/11/2017 10:40 AM
Spoke with Attorney Samantha Adams at Northwest Justice Project. Authorizatioin for release of confidential information signed by Jean was faxed to me and is being scanned into her record.

Care giver tenancy agreement which allows her son Louis to reside with her as a caregiver is likely being terminated due to Louis' interactions with other occupants of their apartment building.

Attorney is trying to determine services that Jean needs and what she will loose if Louis is required to move out. I communicated the following:
--Louise has been a strong support for Jean. There interactions have always been positive. When I see Jean separately from Louis she continues to speak positively of their relationship.
--Louis helps remind her of medications, assure that she is taking her medications including warfarin which needs to be overseen carefully. He also helps with apartment cleaning and laundry as well as food preparation.
--Louis also seems to provide important emotional support to Jean. Jean has expressed to me that she is upset by the way they are treated at the apartment.

I understand that if Louis were to get into some treatment program for mental health/possible PTSDT, that step could be viewed positively.

William E Neighbor, MD

Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	4/8/2017 9:27 AM

Sam will be contacting you.

Sam...

I (Jean) has directed my son Louis to provide a copy of rent checks and to provide image documentation that clear prove, that I(Jean) and my son (Louis) are the targeted victim. as the BIO-FLUIDS are from Apt 5, who are harassing me (Jean) and no respect for my family. I (Jean) am in very serious danger form these people who are harassing me and being protected by Housing Kitsap.

Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	4/8/2017 7:05 PM

Sam and Officer Dale Johnson #814

See Attachment

I (Jean) am no longer safe on Bainbridge Island, as a lawful plea for 911 help, is being used to harm me (Jean) and my son Louis.
To live where I (jean) have to fear the police department, that the police allows and encourage a victim plea for help to be used to further the fear, that at any moment I will be attacked and not protect by law.

I (Jean) am total ashamed of the despicable conduct of Dale Johnson to be used as a tool to evict me (Jean) 92 yrsold from my home, that my son Louis was protecting me from people who have no respect for my health, safety, welfare and dignity. Who are using the Bainbridge Island Police Dept. to further there abuse toward me (Jean).

CC: William Neigbor, MD

Documents

Patient Entered Attachment - Document on 4/8/2017 7:05 PM: statements

Document (below)

Date: 4/6/2017 6:34pm

Bainbridge Island Police Department
625 Winslow Way East
Baibridge Is, WA-98110
ATN: Officer Dale Johnson #814
Ph: 206-780-4684
REF: Rhododendron Apt 5 attack Nov. 1, 2016

Jean Hoffman
Louis Allain
245 High School Rd, NW2
Bainbridge Is, WA 98110
Ph: 206-780-6885

I, Jean Leonie Callier Allain Hoffman have read the statements made by:

1). Julie Combs December 2, 2016 8:12pm ph: 206-842-8144
2) Matthew Haffie November 3, 2016 ph: 206-842-8144
3). Jeffrey Larsen 12-2-16 Apt 5 ph: 360-362-2093
4). Gary Ramsey 11-4-16 Apt 6 ph: 360-536-5882
5). Gary Ramsey 12-8-16 Apt 6 ph: 360-536-5882
6). Vicky Hilse 10-20-2016 Apt 10 ph: 360-954-2714
7). Eileen Clyde 11-4/2016 Apt 5 ph: 360-824-1971

It is false, misleading and untrue.
I, Jean Hoffman am the victim, I was attack by Eileen Clyde as she blocked my path to leave my home.
It now appear that the above people are using Bainbridge Island Police Dept to further attack me.
I have been living in fear and fear that they will harm me physical and mentally. As I can not trust the Bainbridge Island Polic Dept

Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	4/7/2017 4:50 PM

Sam .....

Jean has asked me (Louis) to respond to you, as to our meeting at BI Library.

Jean want to ensure, that you understand, that her son Louis is focused on protecting his mother's constitutional rights, safety, health, welfare, dignity as a senior citizen and to preserve what is left of her family, by mutual efforts.

Louis, her son, is the only family member she has left. To represent her (Jean) in this case must include the preservation of family integrity.

Louis is not the monster, but the targeted victim of Housing Kitsap Scheme. In which I (Jean) am the real victim. having my family torn apart from me, do to prejudice, hatred, discrimination and intolerance.

Housing Kitsap's evil scheme has greatly hurt's me, as a mother, as a citizen, as an American.

To be faced with eviction, became I and my son, participated in Constitutional Rights of free speech. In contacting Federal, State, Local Agencies, elected officials, including senators, that to whistle blowing and voice opposition opinions and participation in governmental affairs, that I)Jean) must be dehumanized and face ostracized from society and deprivation of family for legally and constitutionally speaking out.

Mu son Louis, has more supporting evidence of Housing Kitsap abusing my Jean) family.

Sam....My son Louis and I (Jean) were blamed for following.

Neighbor Jr., William E, MD at 4/7/2017 1751

Jeanne Leonie Hoffman is a 92 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Results

  Patient is here today to f/u PTT and INR resullts.

- RN15

History:
Anticoagulation
Jeanne returns for follow up on anticoagulation. She has had no bleeding or unexpected lower extremity swelling. She continues to wear elastic stockings with low level of compression. She has been complaint with her medication per her son's report who is with her as usual.

Left foot ulcer
She has been apply medihoney and non adhering bandage each day.
She did have vascular studies done as reported below.

Medications
Outpatient Prescriptions Marked as Taking for the 4/5/17 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• Acetaminophen-Codeine #3 300-30 MG Oral Tab	TAKE ONE TABLET BY MOUTH DAILY AS NEEDED FOR ARTHRITIC PAIN	30 tablet	3
• Atorvastatin Calcium 20 MG Oral Tab	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	45 tablet	3
• Losartan Potassium 25 MG Oral Tab	One half tablet daily	45 tablet	3
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	3
• Timolol Maleate 0.5 % Ophthalmic Solution	Place 1 drop in each EYE 2 times a day.	5 mL	0
• Unclassified (OTHER MEDS, SEE COMMENTS,)	Vitamin B12 500 mcg once daily over the counter		
• Warfarin Sodium (COUMADIN) 5 MG Oral Tab	1 TAB PO ONCE each evening	90 tablet	3

Objective:
BP 130/56 mmHg | Pulse 58 | Temp(Src) 98 °F (36.7 °C) (Oral)
Estimated body mass index is 23.67 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of 3/8/17: 56.79 kg (125 lb 3.2 oz).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 130/56
General: NAD
Left foot dorsum/lateral wound as described in nurse note and photo taken today. Wound is somewhat moits

Lab and other tests: INR 2.9
Vascular study March 15, 2017
Impression
=========

1. The resting ankle/brachial indices may not be reliable due to medial calcification resulting in non-compressible tibial

Clinical Notes (continued)

arteries and artificially high measured ankle
pressures. The values obtained are borderline normal on the right 0.98 and normal on the left at 1.09 (previously right 1.17 and left 1.01 on 3/3/2010).
2. Distal tibial artery flow waveforms are normally multiphasic to strongly monophasic bilaterally.
3. The toe/brachial indices are normal on the right at 0.70 and borderline abnormal on the left at 0.68 (normal toe brachial index is 0.70 or greater).
4. The great toe volume pulse waveforms are normally pulsatile bilaterally

Assessment and Plan:
(Z79.01) Long term current use of anticoagulant therapy (primary encounter diagnosis)
Her recent INRs have been closer to 3 rather than the goal of closer to 2. Plan is to reduce coumadin dose.
Current dose is 5 mg once daily.
New dose 5 mg once daily except one half tablet on Sundays. Recheck INR in two weeks.

(I82.509) DVT, recurrent, lower extremity, chronic, unspecified laterality (HCC)
No recurrence for many years. Last evaluation was in 2006, ten years ago, in vascular surgery at which time it was felt due to the degree of venous disease particularly on the left that she should remain on anticoagulation though to keep her INR closer to 2. She is now 92 years old. I think her need for anticoagulation should be reassessed so am referring her back to vascular surgery.

(L98.491) Skin ulcer, limited to breakdown of skin (HCC)
Vascular studies above show borderline toe/brachial index on left, normal on right. Given this it may be best to avoid unna boot. As per nurse note, the wound is somewhat wet today so will switch to medihoney alginate which may be provide a bit drying effect. Recheck in one week.

Diagnoses
Long term current use of anticoagulant therapy [Z79.01]
DVT, recurrent, lower extremity, chronic, unspecified laterality [I82.509]
Scheduling instructions
Referral to: UWMC: Vascular Surgery (DEP 220052) 206-598-4477

----Please be aware that while I, as your health care provider, have identified this referral as medically indicated, I cannot guarantee your insurance plan will cover it. I recommend you contact your insurance carrier to make sure this is a covered service they will pay for.
Order comments: Coverage for this visit--Payor: MEDICARE / Plan: MEDICARE PART A AND B / Product Type: Medicare Referral for: This referral for consultation or procedure grants authorization to perform diagnostic or other services required. REASON FOR REFERRAL: 92 year old female who has been seen by Dr. Zerler intermittently in the past but not for ten years. At last evaluation in 2006, it was advised to continue her on anticoagulation (coumadin) keeping her INR closer to 2 than 3. She has had no bleeding or clotting incidents over ten years, but she is now 92. The question is whether she should remain on anticoagulation at all or switch to newer anticoagulant. William E Neighbor, MD

follow up from your visit this week

From	To	Sent and Delivered
William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	4/7/2017 6:06 PM

Last Read in MyChart
4/8/2017 9:23 AM by Hoffman, Jeanne Leonie

Jeanne: I have reviewed your labs and vascular studies done in mid March. I recommend the following:
--Your INR has been running a bit high being close to 3. We want to closer to 2. I want you to continue coumadin 5 mg daily except on Sundays take a half tablet. Have your blood test repeated in 10-14 days.
--You have not seen Dr. Zerler for ten years. I am referring you back to him to determine if at your current age you should continue on anticoagulation.
--I want you to follow up with me next week on Wednesday so that the nurse Manami can again look at your wound.

William E Neighbor, MD

Clinical Notes

Progress Notes

Hanna, Sarah J, PT at 4/5/2017 1337

S: Patient reports right hip pain > left. Patient reports left ankle pain and points out oozing ulcer left lateral foot.
O: I personally treated Patient in physical therapy x 15 minutes
Findings: limitation of active hip motion 10 degrees in flexion and extension 0 degrees. Patient ambulates with walking and stiff lower extremities secondary to pain. Inability to plantarflexion or dorsiflexion left ankle secondary to pain, 8/10.
Treatment included therapeutic exercise:
Practice of sit to stand difficult secondary to ankle pain
Ambulation of stairs side-ways while holding onto railings

A: Patient presents with limitation of hip and ankle mobility secondary to pain and weakness 3+/5 hip extension, 4/5 hip flexion.
P: Patient to use home exercise program and return to physical therapy in 4 weeks for progression of care.

Health Information Update

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	4/3/2017 4:27 PM

Ms. Hoffman:

I am an attorney at Northwest Justice Project. I was transferred your housing voucher case for investigation. Attached is a release to allow me to meet with Housing Kitsap to review your file and find out about the issues of your case. If you would like me to help you, please sign the release and return to me via email (or regular mail, as soon as possible).

I have scheduled a meeting with the case manager at Housing Kitsap for Thursday, April 6 at 2 pm. I will need to have the release before that meeting.

You and I have a meeting scheduled for the following day on Friday, April 7 at 11 am. I have reserved a conference room at the Bainbridge Island Library for that time. At that meeting, you and I will discuss the information I obtain from the housing authority and your rights and options. In the meantime, please contact me if you are served with any court paperwork or notices pertaining to your housing voucher and your apartment.

I look forward to meeting with you next week.

Take care,
Sam

Samantha L. Adams | Staff Attorney

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 3/23/2017 1204

Jeanne Leonie Hoffman is a 92 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  poss bacteria infection; ears blocked; coughing

History:

Resolving URI

Her son who was also seen today brought Jeanne in because he is concerned that she may have a bacterial infection following a URI several weeks ago. She has intermittent nasal congestion and cough by his report, though Jean states that she has felt fine. She does feel cold intermittently this Spring but the weather has been colder than usual and she states she has felt cold all winter long. There has been no nigh sweats.

Left foot ulceration

Although they came in for the URI symptoms described above, I also wanted to follow up on the foot superficial ulcer. She has been wearing her elastic stockings but no dressing on it.

Medications

Objective:
BP 164/64 mmHg | Pulse 67 | Temp(Src) 97.9 °F (36.6 °C) (Oral)
Estimated body mass index is 23.67 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of 3/8/17: 56.79 kg (125 lb 3.2 oz).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 164/64
General: NAD
Eyes: Conjunctiva: clear.
ENT: External ears and canals not examined; Tympanic membranes: Not examined; Nose not congested; Sinuses non tender; Oropharynx clear. Tonsil and peritonsilar tissue: nl.
Neck supple. Anterior cervical nodes neg. Posterior cervical nodes neg. Occipital nodes: neg.
Lungs: Auscultation: clear. Percussion not done.
Skin: Left foot dorsum laterally over instep 1.5 cm x 0.5 cm superficial skin breakdown without surround erythema or tenderness with some exudaate. No other skin breakdown on left leg or foot.

Procedure: Medihoney applied with non adherent dressing.

Lab and other tests: Vascular study March 15, 2017
Impression
=========

1. The resting ankle/brachial indices may not be reliable due to medial calcification resulting in non-compressible tibial arteries and artificially high measured ankle
pressures. The values obtained are borderline normal on the right 0.98 and normal on the left at 1.09 (previously right 1.17 and left 1.01 on 3/3/2010).
2. Distal tibial artery flow waveforms are normally multiphasic to strongly monophasic bilaterally.
3. The toe/brachial indices are normal on the right at 0.70 and borderline abnormal on the left at 0.68 (normal toe brachial index is 0.70 or greater).
4. The great toe volume pulse waveforms are normally pulsatile bilaterally.

Assessment and Plan:
(L98.491) Skin ulcer, limited to breakdown of skin (HCC) (primary encounter diagnosis)

03/23/2017 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Superficial non infect skin ulceration. Vascular studies show borderline left toe-brachial index. Instructions for daily dressing with medihoney and non adherent dressing. Supplies given. Follow up in one week for re-evaluation. Will consult with nursing here regarding whether unna boot needed or safe particularly given vascular studies.

(J06.9) Upper respiratory tract infection, unspecified type
No bacterial infection. Actually seems completely resolved.

Next visit one week.

Documents

Business Documents - Scan on 4/5/2017 9:29 AM: Agreement to Pay for Healthcare Services; 2017/03/24

Scan (below)

Washington State Health Care Authority

Agreement to Pay for Healthcare Services

U 8170135

WAC 182-502-0160 ("Billing a Client")

This is an agreement between a "client" and a "provider," as defined below. The client agrees to pay the provider for healthcare service(s) that the Health Care Authority (HCA) will not pay. Both parties must sign this Agreement. For the purposes of this Agreement, "services" include but are not limited to healthcare treatment, equipment, supplies, and medications

Client - A recipient of Medicaid or other healthcare benefits through the HCA or a managed care organization (MCO) that contracts with the HCA.
Provider - An institution, agency, business, or person that provides healthcare services to HCA clients and has a signed agreement with the HCA or authorization from an MCO.

This Agreement and WAC 182-502-0160 apply to billing a client for covered and noncovered services as described in WAC 182-501-0050 through WAC 182-501-0070. Providers may not bill any HCA client (including those enrolled with an MCO that contracts with the HCA) for services which the HCA or an MCO that contracts with the HCA may have paid until the provider has completed all requirements for obtaining authorization.

Client's printed name Jeanne Hoffman	Client's ID number 100675002WA
Provider's printed name Melissa Sutton	Provider number 1154610420

Directions:

- Both the provider and the client must fully complete this form **before** an HCA client receives any service for which this Agreement is required.
- You must complete this form no more than 90 calendar days before the date of the service. If the service is not provided within 90 calendar days, the provider and client must complete and sign a new form.
- **The provider and the client must complete this form only *after* they exhaust all applicable HCA or HCA-contracted MCO processes which are necessary to obtain authorization for the requested service(s). These may include the exception to rule (ETR) process for noncovered services as described in WAC 182-501-0160 or the administrative hearing process, if the client chooses to pursue these processes.**
- Limited English proficient (LEP) clients must be able to understand this form in their primary language. This may include a translated form or interpretation of the form. If the form is interpreted for the client, the interpreter must also sign and date the form. Both the client and the provider must sign a translated form.

Fully complete the table on back of this form. If needed, attach another sheet for additional services. The client, provider, and interpreter (if applicable) must sign and date each additional page.

Important Note from HCA:

- This agreement is void and unenforceable if the provider fails to comply with the requirements of this form and WAC 182-502-0160 or does not satisfy HCA conditions of payment as described in applicable Washington Administrative Code (WAC) and Billing Instructions. The provider must reimburse the client for the full amount paid by the client.
- See WAC 182-502-0160(9) for a list of services that cannot be billed to a client, regardless of a written agreement.
- Keep the original agreement in the client's medical record for 6 years from the date this agreement is signed. Give a copy of this completed, signed agreement to the client.
- Providers are responsible for ensuring that translation or interpretation of this form and its content is provided to LEP clients. Translated forms are available at http://hrsa.dshs.wa.gov/mpforms.shtml.

03/23/2017 - Office Visit in Husky Health Primary Care Clinic (continued)

Documents (continued)

Specific service(s) or item(s) to be provided and anticipated date of service	CPT/CDT/ hcpc code (billing code)	Amount to be paid by client	Reason why the client is agreeing to be billed (check the one that applies for each service)	Covered treatment alternatives offered but not chosen by client	Date(s) etr/nfj requested/denied or waived, or prior authorization (pa) requested/denied, if applicable	
Office Visit and all related services		$50-450	☒ Noncovered service, ETR denied ☐ Noncovered service, ETR waived ☐ Covered but denied as not medically necessary ☐ Covered, but specific type not paid for ☐ Order, prescribed, or referred by non-enrolled licensed health care professional		ETR requested or waived PA request	ETR denial (attach HCA notice) PA denial (attach HCA notice)
			☐ Noncovered service, ETR denied ☐ Noncovered service, ETR waived ☐ Covered but denied as not medically necessary ☐ Covered, but specific type not paid for ☐ Order, prescribed, or referred by non-enrolled licensed health care professional		ETR requested or waived PA request	ETR denial (attach hca notice) PA denial (attach HCA notice)
			☐ Noncovered service, ETR denied ☐ Noncovered service, ETR waived ☐ Covered but denied as not medically necessary ☐ Covered, but specific type not paid for ☐ Order, prescribed, or referred by non-enrolled licensed health care professional		ETR requested or waived PA request	ETR denial (attach HCA notice) PA denial (attach HCA notice)

- I understand that HCA or an MCO that contracts with HCA will not pay for the specific service(s) being requested for one of the following reasons, as indicated in the above table: 1) HCA does not cover the service(s); 2) the service(s) was denied as not medically necessary for me, or 3) the service(s) is covered but the type I requested is not.
- I understand that I can, but may choose not to: 1) ask for an Exception to Rule (ETR) after an HCA or HCA-contracted MCO denial of a request for a noncovered service; or 2) ask for a hearing to appeal an HCA or HCA-contracted MCO denial of a requested service.
- I have been fully informed by this provider of all available medically appropriate treatment, including services that may be paid for by the HCA or an HCA-contracted MCO, and I still choose to get the specified service(s) above.
- I understand that HCA does not cover services ordered by, prescribed by, or are a result of a referral from a healthcare provider who is not contracted with HCA as described in Chapter 182-502 WAC.
- ***I agree to pay the provider directly for the specific service(s) listed above.***
- I understand the purpose of this form is to allow me to pay for and receive service(s) for which HCA or an HCA-contracted MCO will not pay. This provider answered all my questions to my satisfaction and has given me a completed copy of this form.
- I understand that I can call HCA at 1-800-562-3022 to receive additional information about my rights or services covered by HCA under fee-for-service or managed care.

I AFFIRM: I understand and agree with this form's content, including the bullet points above.	Client's or client's legal representative's signature Louise Hillow Hoffman	Date 3/23/17
I AFFIRM: I have complied with all responsibilities and requirements as specified in WAC 182-502-0160.	Provider of service(s) signature	Date 3/27/17
I AFFIRM: I have accurately interpreted this form to the best of my ability for the client signing above.	Interpreter's printed name and signature	Date

RE: Health Information Update

From	To	Sent and Delivered
William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	3/16/2017 1:35 PM

Last Read in MyChart
4/3/2017 4:21 PM by Hoffman, Jeanne Leonie

I am scheduled to be in clinic all day that day so with relatively short notice I will not be able to attend.

William E Neighbor, MD

Health Information Update

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	3/15/2017 7:32 PM

Will will discuss leg requirement on next visit..

I hope you can attend the March 22, 2017 meeting with Hosing Kitsap at Rhododendron Apartment, Community Center.
This is very important to have our Doctor present and able to speak on out behave, concerning our health and future health need for a good standard of living.

Please advise me

Telephone Encounter

Weldu, Abeba F, CMA at 3/13/2017 1620

Liz ~ from vulnerable adult service called and left a VM for a call back, stating she needs help assessing an investigation that was reported of Vulnerable adult abuse. Her phone number is 360-473-2169. Please advise

Electronically signed by Weldu, Abeba F, CMA at 3/13/2017 4:27 PM

Neighbor Jr., William E, MD at 3/15/2017 1214

Have tried on several occassions to reach Liz Grile at Adult protective services before and after this message.

3/15/2017 12:14 PM
Left message again for her. Gave cell phone number.

William E Neighbor, MD

Electronically signed by Neighbor Jr., William E, MD at 3/15/2017 12:15 PM

Neighbor Jr., William E, MD at 3/16/2017 1352

3/16/2017
Spoke with Liz Grile at Adult Protective Services 360-473-2169. She reported she was investigating complaints at the apartment where Jean lives with her son and concerns about Jean being vulnerable to abuse.
I reported that I have not found any evidence of dementia in Jean and that when I have spoke with her alone at her visits she has reported that she is able to perform ADLS and finds her son Louis supportive and helpful. My observation of their interactions when Louis and Jeanne are present in a room together is their interaction is appropriate and supportive of one another.

Email: UKN
Have you tried to resolve the issue directly with whom the complaint is against? ☐Yes ☐No

COMPLAINT: Please explain the nature of the complaint in detail. Be as specific as possible and include all persons involved, and include dates and times. (Attach additional pages if necessary) November 4, 2016
about Noon, as I was leaving my Apt., I was stopped by the woman from Apt 5, who started to block my path and began yelling at me. As my son was leaving Apt 2, he stated that I was being harassed & was blocked from continuing on my way. My son stepped between this woman & me and got my walk to move again. As we were leaving this woman continued to yell at us as we left the property. [illegible]

REMEDY REQUESTED: Please state what action(s) will resolve your complaint.
Stop the false writes. I was the victim, it was appalling that on me. Dale Tolpson Long time Island Hyde & Hooped to ask them to stop, as they are drunk all the time

I hereby certify that the statements made on this form and in the attached documents are true and complete to the best of my knowledge, information and belief.

This Complaint was done because I am born of threat by these people

Clinical Notes

Progress Notes

Dmyterko, Minami, RN at 3/8/2017 1325

Assessed wound on L ankle per Dr. Neighbor's request.

O: Wound edges rolled in.
Noted beige and pink non-granulated tissues.
No drainage noted. Pt reports occasional green drainage.
Pt cannot feel touch to the area
Periwound - no periwound erythema, swelling, induration, warmth, or fluctuant.
Noted multiple scars and discoloration and old grafting sites on bilateral ankles and feet. Hemosiderin on BLE.
Pt reports she first noted it in Nov 2016.
2+ non-pitting edema in BLE
Intermittent "biting" pain
Wears compression stockings, which appear to be loose.
Barriers: warfarin (INR 2.8), hx recurrent DVT and phlebitis in BLE, HTN, peripheral neuropathy

A: Probable chronic mix venous/arterial wound on LLE
Senescent wound - need debridement

P: Cleansed the wound with NS, covered with Mepilex border.
Instructed to remove it develop reactions to the dressings. Change after shower.
Instructed to perform ankle exercise, wear current compression stockings, and elevate LE to decrease swelling.
Pt will likely need ABI and appropriate compression as well as debridement (if tolerated) for senescent wound.

03/08/2017 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Discussed above with Dr. Neighbor.

Electronically signed by Dmyterko, Minami, RN at 3/10/2017 5:20 PM

Neighbor Jr., William E, MD at 3/10/2017 1711

Jeanne Leonie Hoffman is a 92 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  Patient is here today c/o of both feet soreness and wounds. Follow up on DVT, anticoagulation therapy, and osteoarthritis of both hips.
- RN30

History:

Superficial skin breakdown
She reports that in November she first became concerned that her skin of left foot dorsum may break down. She did not mention this at her last visit. Today she reports for several weeks she has had slowly progressive skin breakdown left foot dorsum.

Hip arthritis
She is continuing PT and seems to have some improvement. Less times when she has acute hip pain. No falls.

ROS:

No fever, chills, sweats.

Medications

Outpatient Prescriptions Marked as Taking for the 3/8/17 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• Acetaminophen-Codeine #3 300-30 MG Oral Tab	TAKE ONE TABLET BY MOUTH DAILY AS NEEDED FOR ARTHRITIC PAIN	30 tablet	3
• Atorvastatin Calcium 20 MG Oral Tab	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	45 tablet	3
• Losartan Potassium 25 MG Oral Tab	One half tablet daily	45 tablet	3
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	3
• Timolol Maleate 0.5 % Ophthalmic Solution	Place 1 drop in each EYE 2 times a day.	5 mL	0
• Unclassified (OTHER MEDS, SEE COMMENTS,)	Vitamin B12 500 mcg once daily over the counter		
• Warfarin Sodium (COUMADIN) 5 MG Oral Tab	1 TAB PO ONCE each evening	90 tablet	3

Objective:

03/08/2017 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

BP 160/69 mmHg | Pulse 66 | Temp(Src) 97.5 °F (36.4 °C) (Oral) | Wt 56.79 kg (125 lb 3.2 oz)
Estimated body mass index is 23.67 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of this encounter: 56.79 kg (125 lb 3.2 oz).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 160/69
General: NAD
Skin:
Left foot lateral dorsum shows superficial skin break down with some edema pulling edges apart. There is small amount of exudate. No erythema.

Lab and other tests: INR 2.8

Assessment and Plan:
1. Skin ulcer, limited to breakdown of skin (HCC)
Primary reason for visit today is superficial skin breakdown and some edema left ankle instep laterally. This was dressed as described by nurse note today. Ideally she would have wound care on Bainbridge Island, but the closest wound care center is Bremerton to which they do not have transportation. We will first obtain vascular ABI to determine safety of using Unna boot which she had a good response to albiet 20 years ago. Also may be able to arrange for a visit nurse on Bainbridge.

- REFERRAL TO VASCULAR LAB

2. Primary osteoarthritis of both hips
She is continuing PT and seem to experience less problems with recurrent acute hip pain. She has had no falls.

3/10/2017

Other: Received call from Liz Grile. Adult Protective Services, 360-473-2169. Have returned call twice and left message. Left my cell phone number.

Dear Senator Rolfes, Representatives Appleton and Hansen,

03/01/2017 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Messages (continued)

I am 92 years old, born on Bainbridge Island (120 yrs of Island Family) and live with my 68 year old son, who provide mutual care, as we are both physical disabled and live on limited income. in a USDA-RD Multi Housing Program for past 20 years

I am being abused by:
Jule Combs,
Jennifer Divitto, 360-535-6171
Holly Paterson 360-535-6115
Stuart Grogan, 360-535-6142

Who acting together to falsify documents against me, to mentally abuse me, by try to divide my family and blaming my son, who has not done anything wrong, but help me.

The above people, encouraged residents to hate me, so I live in fear daily.

I need help, other wise I will be force to homelessness till death. As the above people are planning to trash all my belongings.

CC Jesse
Just email me for a "Phone Contact", as your call is just as important to me, as it is to you.
Have a nice day and hope to hear from you soon.
Island Hometown for 110 Years

Medical Advice

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	2/6/2017 8:14 PM

What can be done to improve or treatment therapy for::

Severe left hip osteoarthritis, manifested as axial joint space loss and bulky marginal osteophyte formation. Enthesophytosis about the iliac crests and ischial tuberosities is also demonstrated and unchanged.

Hip replacement an option?

Clinical Notes

Progress Notes

Hanna, Sarah J, PT at 2/1/2017 1308

S: Patient reports compliance with home program. Patient reports hip pain right > left and ulcers on left upper ankle region. Patient reports ulcers on upper ankle region make it difficult for her to rise up on toes.
O: I personally treated Patient in physical therapy x 45 minutes
Treatment included:
therapeutic exercises
instruction and practice in side stepping around walking while holding onto walker
instruction and practice in toe raises while holding onto walker
Practice of march step, ankle dorsiflexion, plantarflexion in sitting and standing at walker
Practice of bridge
Manual resisted hip abduction, adduction, internal rotation and external rotation
Discussion of plan of care

A: Patient presents with limitation of right hip motion during ambulation with walker. Patient drags right foot and lifts slightly to accomplish step.
P: Patient to use home exercise program and return to physical therapy in 1 month for progression of care.

Electronically signed by Hanna, Sarah J, PT at 2/1/2017 1:15 PM

02/01/2017 - Office Visit in Husky Health Primary Care Clinic

Reason for Visit

Chief complaint: Follow-Up
Visit diagnoses:

- DVT, recurrent, lower extremity, chronic, bilateral (primary)
- Long term current use of anticoagulant therapy
- Primary osteoarthritis of both hips

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 2/1/2017 1929

Jeanne Leonie Hoffman is a 92 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up

  Patient is here for blood test particularly Coumadin.

History:

Jeanne comes in today for 2 problems

Anticoagulation
She has been on a stable dose of medications. There's been no bleeding and no recurrent lower extremity swelling or pain in calves. She is due for INR which he did not have before her visit.

Osteoarthritis of hips
See last clinic note. She continues to have episodes of severe pain in either hip and some popping. She has had radiographs which show hardware is in place. She was seen by physical therapy today. She is interested in possible referral to orthopedics. She has had no falls.

Medications

Outpatient Prescriptions Marked as Taking for the 2/1/17 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• Acetaminophen-Codeine #3 300-30 MG Oral Tab	TAKE ONE TABLET BY MOUTH DAILY AS NEEDED FOR ARTHRITIC PAIN	30 tablet	3
• Atorvastatin Calcium 20 MG Oral Tab	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	45 tablet	3
• Losartan Potassium 25 MG Oral Tab	One half tablet daily	45 tablet	3
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	3
• Timolol Maleate 0.5 % Ophthalmic Solution	Place 1 drop in each EYE 2 times a day.	5 mL	0
• Unclassified (OTHER MEDS, SEE COMMENTS,)	Vitamin B12 500 mcg once daily over the counter		
• Warfarin Sodium (COUMADIN) 5 MG Oral Tab	1 TAB PO ONCE each evening	90 tablet	3

Objective:
BP 149/58 mmHg | Pulse 62 | Wt 57.516 kg (126 lb 12.8 oz)
Estimated body mass index is 23.97 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of this encounter: 57.516 kg (126 lb 12.8 oz).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 149/58
General: NAD
No other exam today as late for appointment

Lab and other tests: none

Assessment and Plan:
(I82.503) DVT, recurrent, lower extremity, chronic, bilateral (HCC) (primary encounter diagnosis)
No recurrence.. Stable dose of medication. INR due today.

(Z79.01) Long term current use of anticoagulant therapy
As above.

(M16.0) Primary osteoarthritis of both hips
We'll confer with physical therapy who saw her today. Likely will refer to orthopedics clinic.

Result Notes

Older Notes

Notes Recorded by Neighbor Jr., William E, MD on 8/31/2017 at 4:15 PM PDT
INR 1.8. This may reflect that last week she was instructed to skip a dose. As her INRs of late having been running at the upper end of the 2.0-3.0 range, I would stay with the new dose of coumadin 1 tab daily except half on Thursday and Sunday. Repeat INR in one week.

Older Notes

Notes Recorded by Neighbor Jr., William E, MD on 12/21/2017 at 11:51 AM PST
INR 1.8. Goal due to age is in the lower end of the 2-3 range. Will have her take extra 2.5 mg this week and repeat in 10 days. As she would ordinarily take a half tab of 5 mg today, will have her take a full tab instead.

William E Neighbor, MD

Indications

DVT, recurrent, lower extremity, chronic, bilateral (HCC) [I82.503 (ICD-10-CM)]
Long term current use of anticoagulant therapy [Z79.01 (ICD-10-CM)]

Result Notes

Older Notes

Notes Recorded by Neighbor Jr., William E, MD on 1/4/2018 at 2:58 PM PST
INR subtherapeutic. Dose has been coumadin 5 mg one daily except a half on Thursday and Sunday. This regimen in general has resulted in tx INRs. However patient has been traveling and also moving apartments so may have missed some doses. Will have take a full tablet tonight, Thursday and extra half dose tomorrow then resume usual regimen. Repeat INR in 7 days.

Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	1/16/2017 5:11 PM

Louis sent SSA 545-BK Work While Disabled Form to Seattle SSA Office.
Louis need medical report for SSA-545 and for co-occupancy lease application for Housing Kitsap.

Louis and I have no friend, that can provide referrals.

Louis's X-Husband, has throat cancer at 79yrs,, will ask him for referral

Progress Notes

Hanna, Sarah J, PT at 1/10/2017 1017

Physical Therapy Evaluation

Duration: 45 minutes
Today's date: 1/10/2017
Onset date: Insidious
Referring Provider: William E Neighbor Jr. Referring provider NPI: 1265518989

Treatment/Therapy diagnosis: Left hip pain; imbalance

Order/Reason for referral: Decreased ability to walk with walker secondary to left hip pain with movement

Past Medical History

Diagnosis	Date
• Impaired fasting glucose	3/22/2007
• Carpal tunnel syndrome *Carpal tunnel release right wrist in 1989*	11/20/2006
• DIAPHRAGMATIC HERNIA *CT of abdomen in 2006*	11/20/2006

No past surgical history on file.

Subjective: Patient reports increased left hip pain where patient winces with each movement of left hip while walking with walker. Patient reports difficulty walking to the laundry room secondary to left hip pain. Patient reports difficulty turning over in bed secondary to left hip pain. Patient describes left hip pain today as, "it's a bad day."

Objective:

01/04/2017 - Rehab Therapy in Husky Health Physical Therapy (continued)

Clinical Notes (continued)

Observation: Patient ambulates slowly with wheeled walker secondary to left hip pain. Patient appears in significant pain with any forward ambulation. Patient appears to drag left foot in order to avoid left hip flexion.
I**mpairments**:

Range of motion: left hip flexion 10 degrees and painful, left hip extension 0 degrees, left hip abduction 5 degrees, left hip adduction 10 degrees; passive left hip internal rotation and external rotation are extremely painful.

Muscle Strength: Toe raises 4/5 bilateral, left hip extension in bridge 4+/5, left hip flexion painful, left hip abduction 4/5 in available range, left hip adduction 4/5 in available range; left hip internal rotation/external rotation not tested secondary to pain

Sensation: Intact for lower extremities with light touch test over clothing; not tested: feet

Reflexes: deferred

Special tests: Not tested secondary to pain

Interventions/Treatment provided: Therapeutic exercise for x 25 minutes: instruction and practice in sit-to-stand and stand to sit progression, instruction and practice in toe raises with walker, instruction and practice in bridge with gluteal recruitment, instruction and practice in use of light theraband for bilateral hip abduction in available range; review of previous home exercise program and omit non-weight bearing exercises at this time secondary to left hip pain.

Assessment: Patient presents with left hip pain today interfering with patient ability to ambulate with walking. Patient appears to drag left foot in order to avoid left hip flexion. Patient will benefit from skilled physical therapy services in order to reach the following goals:

Functional goals:

Short term functional goals: 7 weeks

1. Improve left hip flexion to 20 degrees and pain free
2. Patient able to ambulate with walker and equal hip flexion
3. Patient able to ambulate to laundry room with walker

Long term functional goals/Outcome: 14 weeks

1. Patient able to turn in bed independently
2. Patient able to improve hip abduction/adduction strength to 4+/5
3. Patient to demonstrate compliance with home exercise program, independently

Plan of care: Plan to see Patient in physical therapy 1-2x/month x 10-16 weeks. Plan to administer manual care, modalities as needed, and progression of therapeutic exercise program in order to reach the above set goals.

The plan outlined above was formulated, reviewed, and agreed upon with the patient.
I certify the need for these services furnished under this plan of treatment and while under my care.

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 1/4/2017 1327

Jeanne Leonie Hoffman is a 91 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up

Jeanne came in today for monthly anticoagulation visit. She has been taking her medication regularly. She's had no bleeding and no unexpected weight swelling. No unexpected shortness of breath.

Her medications were reviewed. She has sufficient refills.

Her son commented that she was limping today. She denied any falls or injuries. During the visit when she went from a sitting to standing position she developed right lateral hip pain which was rated a 10 out of 10. This subsided after sitting. She found flexing her hip helped to relieve the discomfort. However when using her walker to exit from the clinical area she was limping and having right hip pain.

She has not started the physical therapy which was prescribed in early November. At that time she also reported an episode of right lateral hip pain. She states today that she's had perhaps one additional episode since that time.

Review of Systems:
She denies any fever chills or night sweats.

Social hx;
She and her son Louis who lives with her as care provider are having disputes with their apartment manager and Housing Kitsap. Jean enjoys living where she is and doing some gardening. She enjoys having her son with her for conversation and support. She is quite alert for her age which is 91 soon to be 92 in two days.

Medications
Outpatient Prescriptions Marked as Taking for the 1/4/17 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• Acetaminophen-Codeine #3 300-30 MG Oral Tab	TAKE ONE TABLET BY MOUTH DAILY AS NEEDED FOR ARTHRITIC PAIN	30 tablet	3
• Atorvastatin Calcium 20 MG Oral Tab	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	45 tablet	3
• Losartan Potassium 25 MG Oral Tab	One half tablet daily	45 tablet	3
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	3
• Timolol Maleate 0.5 % Ophthalmic Solution	INSTILL ONE DROP INTO EACH EYE TWICE DAILY	5 mL	0

• Alcohol Use:	No

Objective:
BP 146/73 mmHg | Pulse 60 | Temp(Src) 97.6 °F (36.4 °C) (Oral)
Estimated body mass index is 22.31 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of 11/2/16: 53.524 kg (118 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 146/73
General: Initially no acute distress. When had the pain developed she was quite uncomfortable. This improved by the time she went to radiology.
MSK: Her exam was limited because it was too painful for Jeanne to get onto the exam room and reclining. Examination in the sitting position showed some tenderness over the greater trochanter and discomfort on both

Clinical Notes (continued)

internal and external rotation.

Lab and other tests: Hip X ray right shows intact pin. Femur itself intact. She does have substantial arthritis of the joint fossa. Not changed from prior exam in August. No acute process

Assessment and Plan:
1. Pain of right hip joint
DJD of Right hip with pin in place due to prior fracture in distant past. She doe fairly well in general but intermittent episodes every 2-3 months in the half of 2016 with acute hip pain. This may be due to loose body in the hip joint or may be ligamentous. She does need PT which was ordered in November but not yet pursued.
Plan:
--PT today
--Continue low dose codeine for pain along with acetaminophen
--Consider ortho referral

2. Long term current use of anticoagulant therapy
INR pending today

Other: MMA to evaluate B12 status pending.

Regarding living situation, see above. I will provide whatever reports are appropriate and requested.

XR HIP UNILAT AP SUPINE

CLINICAL INDICATION:
episodic severe sharp right lateral hip pain

COMPARISON:
8/24/2016

FINDINGS AND IMPRESSION:
A single frog-leg view of the right hip is provided and interpreted with the pelvic AP radiograph acquired concurrently.

Redemonstrated dynamic hip screw and lateral plate and screw fixation of a remote proximal femoral fracture deformity. This is in unchanged alignment as compared to 8/24/2016. No evidence of hardware complication.

No acute fracture detected. Severe osteoarthritis manifested as axial joint space loss, marginal osteophyte and subchondral cyst formation. Alignment is normal.

Vascular calcifications.

Health Information Update

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	12/29/2016 8:58 PM

Bainbridge Island Police Department, and Mary Traxler,

Jean Hoffman and I, Louis Alloin, have discused Mary Traxlers Letter.

We are no longer safe on Bainbridge Island, do to Housing Kitsap promoting motivated hatred and domestic violence against us.

On/about January 1-5, 2017 Jean and Louis, will leave Apt 2, to seek a safe domestic violence shelter.

Apt 2 will be secured and locked down.

Jean and I are very disappointed, that we are no longer accepted.

HOUSING INCORRECT ADA ASSESSMENT
Promoted By: Julie Combs, Jennifer and Holly Paterson/other employees
(FOIA Filed Document) Dwelling Units Common Spaces: Remodel common spaces to provide accessibility to accessible units. (Common storage 1st floor building 225: do not provide accessible units storage where storage units are across from each other. Storage depth would require a 60 inches turning space inside the storage locker. Door not 32 inches clear opening. Proposed Capital Needs Assessment the owner (Housing Kitsap) will remove all storage units because the accessible storage unit required by law does not exist.

CORRECT ADA ASSESSMENT 28 CFR SECTION 35.151 REGULATIONS
Louis Alloin and Jean Hoffman Governmental Affairs Research Fact Findings

(Rhododendron Apartments 225 (1st floor) Complex has Wheelchair Accessible Laundry Room Facility Closets)

ADA 225.2 Storage: Where storage is provided in accessible space, at least one of each type shall comply with 811

Rhododendron Apartments 225/245 Each Floor has Laundry Room Facilities, 4 Closets (Each of 4 Laundry Room Facility) provide *accessible closets, measuring 36 inch Depth By 35 inch wall to wall width and 32 inch clear door clearance. Accessible Space Clearance Area between closets and wash machines is over 60 inch rotation capacity and interior Laundry Room Facility movement ability.

*(Wheelchair can move in/out of closet for self services reach range shelving or access from door side of closet reach range usability from accessible space, as required by disable

resident closet use requirements in closet configuration of stored content utilization.)

ADA 103 Equivalent Facilitation: Nothing in these (ADA Application and Administration) requirements prevents the use of design, products, or technologies as alternatives to those (ADA Application and Administration) prescribed, provide they results in substantially equivalent or greater accessibility and usability.
308 Reach Range: It is permissible to install additional storage outside the reach range.

ADA 2010 and 1991 Standard should be read broadly to apply to all types of closet storage shelves, racks, hook or fittings to allow above/below reach range and for the disabled to utilize space efficiently as possible.

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 12/7/2016 0846

Jeanne Leonie Hoffman is a 91 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up

Jeanne Was last seen in early November prior to a train trip with her son.

At her last visit she was having pain which has since resolved her return to baseline. She never started PT on Bainbridge Island

She has been compliant with her medications. She's had no nosebleeds or gum bleeding. She continues to wear her compression stockings and has not noted any unexpected swelling.

Her son is present with her today. There's been some recent conflicts with neighbors in her apartment or drink and smoke. There is a conflict resolution scheduled for tomorrow and perhaps next Thursday. Jean has been upset by the behavior of the neighbors, but feels safe. Her son is her main care provider and lives with her. Jean was visited by a social worker who apparently felt it was safe for she continued to be in her living situation. Jeanne passed memory test administered by the social worker. She does not want to move into an assisted living situation

Medications

Outpatient Prescriptions Marked as Taking for the 12/7/16 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• Acetaminophen-Codeine #3 300-30 MG Oral Tab	TAKE ONE TABLET BY MOUTH DAILY AS NEEDED FOR ARTHRITIC PAIN	30 tablet	3
• Atorvastatin Calcium 20 MG Oral Tab	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	15 tablet	3
• Losartan Potassium 25 MG Oral Tab	One half tablet daily	45 tablet	3
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	3
• Timolol Maleate 0.5 % Ophthalmic Solution	INSTILL ONE DROP INTO EACH EYE TWICE DAILY	5 mL	0
• Unclassified (OTHER MEDS, SEE COMMENTS,)	Vitamin B12 500 mcg once daily over the counter		
• Warfarin Sodium (COUMADIN) 5 MG Oral Tab	1 TAB PO ONCE each evening	90 tablet	3

Social history:

History

Sexual Activity

- Sexual Activity: Not on file

Social History

Substance Use Topics

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used
- Alcohol Use: No

Objective:

BP 145/66 mmHg | Pulse 54 | Temp(Src) 98.7 °F (37.1 °C) (Oral)
Estimated body mass index is 22.31 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of 11/2/16: 53.524 kg (118 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 145/66
General: NAD
Psych: Affect is positive. She's quite interactive today. Her hearing aids are working well.

Lab and other tests: INR 3.1

Assessment and Plan:

1. HYPERLIPIDEMIA NEC/NOS

I had earlier this year had her stop her statin but her LDL cholesterol be increased. She has been placed back on half of her previous dose which she is tolerating well.
- Atorvastatin Calcium 20 MG Oral Tab; Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction Dispense:

12/07/2016 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

45 tablet; Refill: 3

2. Unspecified vitamin B deficiency
Her mean cell volume for her blood cells were slightly increased at her last blood draw. She is periodically shown evidence of vitamin B12 deficiency. She is on vitamin B12 replacement. Plan is to repeat her blood test.
- METHYLMALONIC ACID

3. History of recurrent deep vein thrombosis (DVT)
No recent recurrence. She continues to wear compression stockings

4. Long term current use of anticoagulant therapy
Her INR today was 3.1. I would not make any change in her current Coumadin dose is simply repeat in one month.

5. Living accommodation issues
Discussed as described above with Jean and her son. They're currently in the apartment she has been in for 20 years and probably will continue to be able to live there. They will contact me if you need my assistance.

Need to get emergency domestic violence shelter... by December 31m 2915 or ASAP.
Please schedule Social Worker to meet with Louis and I on 12/7 appointment at Hall Health.

Louis and I are prepared for homeless street camping, till mediation resolution and permanent relocation housing in Seattle Area.

Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	12/4/2016 9:28 AM

Sent: Sunday, December 04, 2016 at 8:28 AM
From: " Jean Hoffman" < jeanhoffman@usa.com>
To: divittoj@housingkitsap.org, Council < council@bainbridgewa.gov>, FAMILY-Louis < louisalloin@usa.com>, KCCHA-Council < vtollefson@bainbridgewa.gov>
Subject: Request for Co-ocupancy
To Housing Kitsap,

I, Jean Leonie Calliet Alloin Hoffman is a request for:
Co-Occupancy Lease Agreement, staring January 1, 2017, at the Rhododendron Apartment #2.

Louis Chales Hoffmann Alloin is my elder son, with good upstanding character, a lawful American Citizen, well educated with extensive academic interest and excellent community leadership.

My Son has been with me for over 40 years and has provided great family participation with me for past 20 years at Rhododendron Apartment #2. He has my best interest as a family son and providing the best friendship anyone can ask for, during my elder years.

My son, has exceptional National Institute of Health knowledge on geriatrics's/elderly requirements and needs.

Bill ...

Had a great time in Columbus, WI
It allowed me to get move exercise and gave me a new prospect on life.
Better mental out look. Need to do more.
See the Itinerary Picture

None

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 11/2/2016 1047

Jeanne Leonie Hoffman is a 91 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up

Jeanne is in for her monthly visit. She did not have her INR done prior to the visit. She's been compliant with her medications. However in the last few weeks she's noted some recurrent swelling of the left lower leg without pain but concerning for her for a recurrent clot.

Additionally she is noted left hip pain in the upper anteroposterior thigh without radiation and without history of injury. She had right hip pain in August and September which is less of an issue at the present time. She's been taking half of one of her Tylenol with codeine tablets twice daily. Additionally she sometimes takes additional Tylenol.

She has been feeling well otherwise. She is planning on a train trip with her son Louis next Monday. She needs a letter listing her medications and medical diagnoses as she has required in the past when traveling.

She reports that her urine has been clear and she said no discomfort with urination.

Review of Systems:
She denies any fever, chills, night sweats. There's been no shortness of breath or chest pain. No nausea or vomiting. No change in her bowel movements.

Medications
Outpatient Prescriptions Marked as Taking for the 11/2/16 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab	one po once daily for arthritic pain as needed	30 tablet	3
• Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab	one po once daily for arthritic pain as needed	20 tablet	0
• Atorvastatin Calcium 20 MG Oral Tab	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	15 tablet	3
• Losartan Potassium 25 MG Oral Tab	One half tablet daily	45 tablet	3
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	3
• Timolol Maleate 0.5 % Ophthalmic Solution	Place 1 drop in each EYE 2 times a day.	5 mL	1
• Unclassified (OTHER MEDS, SEE COMMENTS,)	Vitamin B12 500 mcg once daily over the counter		
• Warfarin Sodium (COUMADIN) 5 MG Oral Tab	1 TAB PO ONCE each evening	90 tablet	3

Social history:
History

• Smokeless tobacco:	Never Used
• Alcohol Use:	No

Objective:
BP 160/80 mmHg | Pulse 69 | Temp(Src) 97.8 °F (36.6 °C) (Oral)
Estimated body mass index is 22.53 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of 9/21/16: 54.069 kg (119 lb 3.2 oz).
Extended Vitals not filed for this encounter.

Clinical Notes (continued)

Last blood pressure recorded in this encounter: 160/80
General: NAD
Hips: Internal and external rotation of both hips is without discomfort. There is no tenderness over the left greater trochanter or the upper thigh muscles.
She has compression stockings in place on both lower legs. She does have some calf tenderness on the left. There is mild edema worse on the left.

Lab and other tests: pending

Assessment and Plan:

1. DVT, recurrent, lower extremity, chronic, bilateral (HCC)
She is due for INR. Vascular ultrasound ordered to be done today. We need to get the study done urgently given a pair of leaving next Monday for drain drip. Additionally they live on Bainbridge Island which is 1+ and one area right taking it difficult for her to get into town. She has declined getting medical care on the island.
- PROTHROMBIN TIME
- REFERRAL TO VASCULAR LAB

2. Long term current use of anticoagulant therapy
INR pending

3. Left hip pain
X-ray in August showed mild to moderate DJD of the left hip. We'll check sedimentation rate to exclude the possibility of polymyalgia rheumatica. I would advise up some physical therapy which her son would like her to have done here at Hall health. Will also ask that PT focus on improving balance if possibe.
- SED RATE

4. Thrombocytopenia (HCC)
Noted blood work in September. Due for repeat. Previously platelet count had been normal.
- CBC, DIFF

5. History of UTI
Was treated for bladder infection in late August. Due for repeat urinalysis.
- BASIC METABOLIC PANEL
- Urinalysis with Reflex Culture

11/02/2016 - Office Visit in Husky Health Primary Care Clinic (continued)

Other Orders (continued)

Is this the patient's first post-operative therapy visit?: NO

91 year old female with recurrent bilateral hip pain now mostly on left due to DJD. She also has balance issues for which she uses a walker. She is quite headstrong but very pleasant and alert 91 year old. Would like review of exercises for her hips and some balance training as appropriate for her age.
Precautions: None

Please evaluate and treat, including: Services as deemed appropriate by the therapist.

Treatment frequency: As deemed appropriate by theTherapist
Physician recheck date: She sees me monthly for anticoagulation

NEIGHBOR JR, WILLIAM E

A copy of the patient's chart notes available upon request.

Indications

Left hip pain [M25.552 (ICD-10-CM)]
Imbalance [R26.89 (ICD-10-CM)]

Flowsheets

Jeanne Leonie Hoffman

RE: Jeanne Leonie Hoffman
DOB: 1/6/1925

Dear Jeanne Leonie Hoffman:

You asked for a list of your medications and diagnoses. These are listed below:

Patient Active Problem List

Diagnosis	Date Noted

11/02/2016 - Office Visit in Husky Health Primary Care Clinic (continued)

Letters (continued)

- DJD (degenerative joint disease) of lumbar spine [M47.816] 08/30/2013
- Vertebral fracture [IMO0002] 12/13/2012
  Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed

- Thyroid nodule, uninodular [E04.1] 12/13/2012
  CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011.
  5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.

- Osteoporosis, unspecified [M81.0] 03/04/2008
  T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
  Began fosamax spring 2008. Continued for five years, then stopped

- Long term current use of anticoagulant therapy [Z79.01] 01/08/2008
  Reason for anticoagulation: Recurrent dvts
  Duration of anticoagulation: life
  INR goal: 2.-3

- Closed fracture of unspecified intracapsular section of neck of femur (HCC) [S72.019A] 05/01/2007
  Pinned April 2007.
  Post op hematocrit 25
  Has walker with wheels for use outside of home. Uses cane in home.

- Unspecified vitamin B deficiency [E53.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Other convulsions [R56.9] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013
  No recurrence

- Esophageal reflux [K21.9] 11/20/2006
- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

11/02/2016 - Office Visit in Husky Health Primary Care Clinic (continued)

Letters (continued)

- DVT, recurrent, lower extremity, chronic (HCC) [I82.509] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- Allergic rhinitis, cause unspecified [J30.9] 11/20/2006
- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed.
  Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

- Thrombocytopenia (HCC) [D69.6] 11/02/2016
- History of recurrent deep vein thrombosis (DVT) [Z86.718] 06/02/2016
- Other physical therapy [IMO0001] 01/22/2015
- Hip joint stiffness [M25.659] 01/06/2015
- Leg weakness, bilateral [M62.81] 01/06/2015
- Weakness of trunk musculature [M62.81] 01/06/2015
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication (HCC) 03/27/2007 [E11.9]
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

Outpatient Prescriptions Prior to Visit

Medication	Sig	Dispense	Refill
• Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab	one po once daily for arthritic pain as needed	30 tablet	3
• Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab	one po once daily for arthritic pain as needed	20 tablet	0
• Atorvastatin Calcium 20 MG Oral Tab	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	15 tablet	3

Documents

Business Documents - Scan on 11/10/2016 10:40 AM: Advance Beneficiary Notice of Noncoverage (ABN); 2016/11/02; Hall Health

Scan (below)

ADVANCE BENEFICIARY NOTICE OF NONCOVERAGE (ABN)

NOTE: If Medicare doesn't pay for _____ below, you may have to pay. Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the _____ below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost
CPT Code(s): _____ CPT Description(s): Office Visit and all related services	☐ Medicare does not pay for experimental or research use tests/services ☐ Medicare does not pay for this test or service as often as this (denied as too frequent) ☐ Medicare does not pay for this test or service for your condition ☐ Other _____	$75-480

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the _____ listed above.

Note: If you choose Option 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

OPTIONS: Check only one box. We cannot choose a box for you.

☑ **OPTION 1.** I want the VISIT listed above. You may be ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I'm responsible for payment, but **I can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2.** I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3.** I don't want the _____ listed above. I understand with this choice I am **not** responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional Information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-MEDICARE** (1-800-633-4227/**TTY:** 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

US LOWER EXTREMITY VENOUS DPLX LEFT

Order status: Completed
Resulted by: Zierler, Robert Eugene, MD
Filed by: Uw Radiology Results Interface, User 11/03/16 1638
Performed: 11/02/16 1141 - 11/02/16 1141
Accession number: 10267707
Resulting lab: UW RADIOLOGY
Lab Technician: LONNIE N PATTERSON VASC SONOGRAPHER
Narrative:

Indication
========

This is a 91 year old woman with a history of deep vein thrombosis dating back over 35 years. The patient presents with chronic left lower extremity swelling. The swelling has possibly changed recently, but she is unsure if the swelling is any different than usual.

History
======

General History
Other: Previous Examinations: 4-13-2007

Method
======

IVC, Common and External Iliac Vein Duplex
Lower Extremity Venous.

Abdominal Veins
==========

Inferior vena cava prox details: spontaneous, phasic flow, complete color Doppler filling visualized.

11/02/2016 - Orders Only in UW Medicine Radiology (continued)

Imaging (continued)

Inferior vena cava mid details: not visualized
Inferior vena cava distal details: not visualized

Lower Extremities
==========

Rt CIV: not visualized
Rt EIV: spontaneous, phasic flow, complete color fill
Lt CIV: not visualized
Lt EIV: INCOMPRESSIBLE CHRONIC, Doppler silent
Lt CFV: PARTIAL COMPRESSION CHRONIC, partial color fill, continuous flow
Lt DFV: complete compression, spontaneous, complete color fill
Lt prox femoral V: PARTIAL COMPRESSION CHRONIC, spontaneous, continuous flow, complete color fill
Lt mid femoral V: PARTIAL COMPRESSION CHRONIC, continuous flow, spontaneous, complete color fill
Lt distal femoral V: PARTIAL COMPRESSION CHRONIC, spontaneous, continuous flow, complete color fill
Lt popliteal V fossa: complete compression, spontaneous, phasic flow, complete color fill
Lt post tibial V: complete compression, complete color fill with augmentation
Lt peroneal V: complete compression, complete color fill with augmentation
Lt GSV: complete compression at the saphenofemoral junction, spontaneous, phasic flow, complete color fill
Lt SSV: complete compression at the saphenopopliteal junction
Other: Complete vein wall compression is noted on B-mode image in the bilateral gastrocnemius and soleal vein branches unless noted above otherwise.

Impression
==========

No definite change in the left lower extremity venous findings compared to the examination done on 4-13-2007.

1. The proximal inferior vena cava is patent.
- The bilateral common iliac veins are not visualized.
- The right external iliac vein is patent.
- The left external iliac vein appears chronically occluded with collateral vessels noted.

2. LEFT
- No acute deep vein thrombosis in the left lower extremity.
- The left femoral vein is patent with chronic wall thickening again noted.
- No superficial vein thrombosis in the left lower extremity, where evaluated.

Filed by: Uw Radiology Results Interface, User 11/03/16 1638 — Performed: 11/02/16 1308 - 11/02/16 1308
Accession number: 10268031 — Resulting lab: UW RADIOLOGY
Lab Technician: LONNIE N PATTERSON VASC SONOGRAPHER
Narrative:

Indication
========

This is a 91 year old woman with a history of deep vein thrombosis dating back over 35 years. The patient presents with chronic left lower extremity swelling. The swelling has possibly changed recently, but she is unsure if the swelling is any different than usual.

History
======

General History
Other: Previous Examinations: 4-13-2007

Method
======

IVC, Common and External Iliac Vein Duplex
Lower Extremity Venous.

Abdominal Veins
==========

Inferior vena cava prox details: spontaneous, phasic flow, complete color Doppler filling visualized.

11/02/2016 - Orders Only in UW Medicine Radiology (continued)

Imaging (continued)

Inferior vena cava mid details: not visualized
Inferior vena cava distal details: not visualized

Lower Extremities
==========

Rt CIV: not visualized
Rt EIV: spontaneous, phasic flow, complete color fill
Lt CIV: not visualized
Lt EIV: INCOMPRESSIBLE CHRONIC, Doppler silent
Lt CFV: PARTIAL COMPRESSION CHRONIC, partial color fill, continuous flow
Lt DFV: complete compression, spontaneous, complete color fill
Lt prox femoral V: PARTIAL COMPRESSION CHRONIC, spontaneous, continuous flow, complete color fill
Lt mid femoral V: PARTIAL COMPRESSION CHRONIC, continuous flow, spontaneous, complete color fill
Lt distal femoral V: PARTIAL COMPRESSION CHRONIC, spontaneous, continuous flow, complete color fill
Lt popliteal V fossa: complete compression, spontaneous, phasic flow, complete color fill
Lt post tibial V: complete compression, complete color fill with augmentation
Lt peroneal V: complete compression, complete color fill with augmentation
Lt GSV: complete compression at the saphenofemoral junction, spontaneous, phasic flow, complete color fill
Lt SSV: complete compression at the saphenopopliteal junction
Other: Complete vein wall compression is noted on B-mode image in the bilateral gastrocnemius and soleal vein branches unless noted above otherwise.

Impression
==========

No definite change in the left lower extremity venous findings compared to the examination done on 4-13-2007.

1. The proximal inferior vena cava is patent.
- The bilateral common iliac veins are not visualized.
- The right external iliac vein is patent.
- The left external iliac vein appears chronically occluded with collateral vessels noted.

2. LEFT
- No acute deep vein thrombosis in the left lower extremity.
- The left femoral vein is patent with chronic wall thickening again noted.
- No superficial vein thrombosis in the left lower extremity, where evaluated.

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 9/21/2016 1053

Jeanne Leonie Hoffman is a 91 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up

Jeanne is in for routine follow up after treatment of bladder infection a month ago and for her monthly INR. She was also seen last month for right hip pain with x rays at that time showing hardware in place from prior hip replacement. She reports now that earlier this week after flexing her hip twice to stretch it when she stood up she felt that her hip went out of joint. It was very painful. She put pressure over her hip and felt something pop back into place after which she felt fine. She has had no recurrence and otherwise feels that the pain for which she was seen last month has improved.

Medications

Outpatient Prescriptions Marked as Taking for the 9/21/16 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab	one po once daily for arthritic pain as needed	30 tablet	3
• Atorvastatin Calcium 20 MG Oral Tab	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	15 tablet	3
• Losartan Potassium 25 MG Oral Tab	One half tablet daily	45 tablet	3
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	0
• Timolol Maleate 0.5 % Ophthalmic Solution	Place 1 drop in each EYE 2 times a day.	5 mL	1
• Unclassified (OTHER MEDS, SEE COMMENTS,)	Vitamin B12 500 mcg once daily over the counter		
• Warfarin Sodium (COUMADIN) 5 MG Oral Tab	1 TAB PO ONCE each evening	90 tablet	0

Objective:

BP 109/64 mmHg | Pulse 73 | Wt 54.069 kg (119 lb 3.2 oz)
Estimated body mass index is 22.53 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of this encounter: 54.069 kg (119 lb 3.2 oz).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 109/64
General: NAD
HIP EXAM: SIDE EXAMINED: right

STANDING
Gait: Analgic but baseline. Inspection posteriorily: nl. Tredenlenberg: unable to do due to balance issues long standing.
RANGE OF MOTION
LS Spine
No midline pain
Hip
Flexion (nl 100 deg): full with mild pain. Extension (nl 30 deg): unable to get into position to check due to general muscle pain

Internal rotation (nl 45 deg): 30 with mild pain. External rotation (nl 45 deg): 30 with mild pain
Adduction (nl 20 deg): Full. Abduction (nl 40 deg): Limited but symmetrical
STRENGTH
Flexion: 4/5. Extension: 4/5.
Abduction: 4/5. Adduction: 4/5.
Internal rotation: 4/5. External rotation: 4/5 All are symmetrcial
PALPATION
Greater trocanter: non tender. Adductor insertion: non tender. ASIS: Non tender. Ischial tuberosity: Not examined
SENSATION: intact

Lab and other tests: none

Assessment and Plan:
(M25.551) Hip pain, right (primary encounter diagnosis)
S/P right hip replacement in distant past with recent hip pain last visit in August and x rays negative at that time showing no hardware loosening. Recent acute episode of hip pain which she believes as above was due to hip coming out of socket. It is more likely ligamentous. She may need PT in the future but is not interested at this time. Plan is observation and contact us if this should recur. See me in just over 1 month.

(Z86.718) History of recurrent deep vein thrombosis (DVT)
INR pending. Refilled med
Plan: Pentoxifylline ER 400 MG Oral Tab CR

(E78.5) HYPERLIPIDEMIA NEC/NOS
Her LDL dramatically increased when off of statin as a trial. She is low dose of atorvastatin at this time and tolerating.
Plan: Atorvastatin Calcium 20 MG Oral Tab

(Z79.01) AFTERCARE LONG TERM ANTICOAG USE
INR pending. Refilled med.
Plan: Warfarin Sodium (COUMADIN) 5 MG Oral Tab

(Z71.89) Vaccine counseling
Due for influenza vaccine. Other vaccines current.
Plan: influenza high dose vaccine trivalent PF (adult greater than 65yrs) 0.5 mL IM - 90662

(D69.6) Thrombocytopenia (HCC)
Blood work done last month showed platelets 139K whereas usual is in normal range. Recheck.
Plan: CBC, DIFF

Weight decrease. Her appetite has been decreased. Will check weight at next visit.

POLST forms completed. Original to son who cares for her and copy to chart.

NOTE: If Medicare doesn't pay for _____ below, you may have to pay. Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the _____ below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost
CPT Code(s): Office Visit and all related services CPT Description(s):	☐ Medicare does not pay for experimental or research use tests/services ☐ Medicare does not pay for this test or service as often as this (denied as too frequent) ☒ Medicare does not pay for this test or service for your condition ☐ Other _____	$200 $500

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the _____ listed above.
  Note: If you choose Option 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

OPTIONS: Check only one box. We cannot choose a box for you.

☐ **OPTION 1.** I want the _____ listed above. You may be ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I'm responsible for payment, but **I can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2.** I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3.** I don't want the _____ listed above. I understand with this choice I am **not** responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional Information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-MEDICARE** (1-800-633-4227/**TTY:** 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

Clinical Notes

Telephone Encounter

Mohova, Elena, CMA at 9/6/2016 1624

Her son, Louis, called stated that Jeanne has reaction to medication (possible to antibiotics she is taking now). Shaking, weak, diarrhea, urgency going to the bathroom, lack of appetite. Asked to call back ASAP to find out if she needs to stop taking antibiotics and get your advise.
Contact number is 206-780-6885. Other phone numbers in file.

Electronically signed by Mohova, Elena, CMA at 9/6/2016 4:27 PM

Neighbor Jr., William E, MD at 9/6/2016 1634

9/6/2016 4:34 PM
This is old message. I called and confirmed with son Louis that this is old message and that Jeanne is actually back to normal after I saw her last week.

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 9/2/2016 1359

Jeanne Leonie Hoffman is a 91 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Loss of Appetite
  x3days

Follow up UTI and new confusion and chills.
Jeanne is in with her son. They were not able to start the antibiotic until Monday. She has two more pills from 5 day course remaining. She did well until yesterday evening when she seemed confused and also had chills feeling cold. She did not have headache, cough, shortness of breath, nausea, vomiting, abdominal pain. She has had watery diarrhea for 1-2 days. No skin rash. Her appetite has been decreased

Last dose of nitrofurantoin was last evening. Held today.

Medications

Outpatient Prescriptions Marked as Taking for the 9/2/16 encounter (Office Visit) with

Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab	one po once daily for arthritic pain as needed	20 tablet	0
• Atorvastatin Calcium 20 MG Oral Tab	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	15 tablet	3
• Losartan Potassium 25 MG Oral Tab	One half tablet daily	45 tablet	3
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	0
• Timolol Maleate 0.5 % Ophthalmic Solution	Place 1 drop in each EYE 2 times a day.	5 mL	1
• Unclassified (OTHER MEDS, SEE COMMENTS,)	Vitamin B12 500 mcg once daily over the counter		
• Warfarin Sodium (COUMADIN) 5 MG Oral Tab	1 TAB PO ONCE each evening	90 tablet	0

Social history:

History

Sexual Activity	
• Sexual Activity:	Not on file

Social History

Substance Use Topics	
• Smoking status:	Never Smoker
• Smokeless tobacco:	Never Used
• Alcohol Use:	No

Objective:
BP 97/65 mmHg | Pulse 83 | Temp(Src) 98.5 °F (36.9 °C) (Oral)
Estimated body mass index is 23.90 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of 1/6/16: 57.335 kg (126 lb 6.4 oz).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 97/65
General: VItal signs above. Oriented x4. Date, time, year, purpose.
Back: Left CVAT and midline but in area where she has had mid thoracic pain in the past.
Chest clear
Abd: Benign without tenderness or guarding

Lab and other tests:
CBC, UA pending

Assessment and Plan:
1. Confusion
In 2008, nitrofurantoin caused confusion. However it has been used subsequently in 2011 and 2012 without problems. Suspect recent confusion due to nitrofurantoin. Plan is to stop nitrofurantoin. Check labs to rule out

electrolyte disturbance or infection as cause of confusion noted at home. She has not taken nitrofurantoin today and son does note near resolution of confusion.

2. Acute cystitis without hematuria
She has allergies to pencillins and sulfonamides both of which cause rash. The urine culture done earlier this week grew 60K colonies of E coli pansensitive.. She was treated for cystitis in Sept 2015 and Feb 2016 with cipro, but recent FDA warnings have cautioned against using fluoroquinolones for uncomplicated infections due to risk of neuropathy and tendinopathy. Review of her medication record in Epic does not show that she has ever taken cephalosporin.

Suspect she has taken sufficient course of nitrofurantoin to treat infection.

Repeat UA and also CBC pending.

Last Read in MyChart
9/23/2016 8:22 AM by Hoffman, Jeanne Leonie

Jeanne:
To summarize your visit today:
--I think the confusion you experienced yesterday and perhaps the day before was related to the nitrofurantoin antibiotic. You had experienced this once before (8 year ago) but had not experienced it when used since then. You should not expect recurrence of this now that you have stopped the medication.
--You should expect that your urine will continue to clear up. If chills as happened yesterday

09/02/2016 - Office Visit in Husky Health Primary Care Clinic (continued)

Messages (continued)

or the urine changes color again or other symptoms occur, do not hesitate to call our on call nures: Hall Health after hours: 722-2500. I happened to be the doctor who is on call.

William E Neighbor, MD

Documents

Business Documents - Scan on 9/13/2016 9:37 AM: HALL HEALTH NOTICE & BENEFICIARY AGREEMENT TO PAY; 2016/09/02

Scan (below)

ADVANCE BENEFICIARY NOTICE OF NONCOVERAGE (ABN)

NOTE: If Medicare doesn't pay for _____ below, you may have to pay. Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the _____ below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost
CPT Code(s): _____ CPT Description(s): Office Visit and all related services	☒ Medicare does not pay for experimental or research use tests/services ☐ Medicare does not pay for this test or service as often as this (denied as too frequent) ☐ Medicare does not pay for this test or service for your condition ☐ Other _____	$100-450

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the _____ listed above.

  Note: If you choose Option 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

OPTIONS: Check only one box. We cannot choose a box for you.

☒ **OPTION 1.** I want the Visit listed above. You may be ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I'm responsible for payment, but **I can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2.** I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3.** I don't want the _____ listed above. I understand with this choice I am **not** responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional Information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-MEDICARE** (1-800-633-4227/**TTY:** 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

Clinical Notes

Telephone Encounter

Opkepklo, Kyle at 9/1/2016 1709

Louis called in for the patient saying that she has been having a negative reaction to the recent antibiotics she was presribed. She has been feeling weak, shaking, diarrhea, poor appetite & chills. Louis advised her to stop taking the antibiotic & stated that she has two left of it. He stated that the best number to reach them is at (206) 780-6885.

Electronically signed by Opkepklo, Kyle at 9/1/2016 5:15 PM

Walker, Courtney M, RN at 9/2/2016 0814

RN following up with Louis regarding Jeanne. Louis states "the medication didn't go well with her, she started having diarrhea, then didn't want to drink or eat anything." He was able to make a spread of options and she "nibbled" on some food. He instructed Jeanne to not take the medication last night and see if she got better. He was concerned about the diarrhea, states "she just wasn't herself, shivering, cold, stayed under her blanket, very lethargic" and wasn't getting up to make her coffee or take part in her normal day routine. Reports that he thinks she is a little more like herself today vs last night, her current temperature is 97F. Unsure if she had a temperature during her shivering/cold episodes, hadn't yet taken her temperature. Louis reports that she started the antibiotics on Monday 8/27, he picked up her warfarin prescription the same day as the antibiotics, so there was a delay in initiation after they were written for.

C.Walker, RN

Results Question

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	8/25/2016 9:18 PM

I am doing some of the exercises that Louis has suggested.

Using wall to stand up straight.
Raising bending legs, while laying down and wiggling joints...very slowly.

Preparing vegetables for canning
Making jelly
This is great exercise, keeping busy

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 8/24/2016 1105

Jeanne Leonie Hoffman is a 91 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  labs

Hip pain

Clinical Notes (continued)

Right hip pain x 1 week when while walking she noted a "crack." No falls. She is status post right hip hardware placement several years ago. No leg swelling.

Change in color of urine
In last week she has noted change in color of urine without fever, chills, sweats, change in frequency, dyuria. Prior hx of UTI.

Medications

Outpatient Prescriptions Marked as Taking for the 8/24/16 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• Atorvastatin Calcium 20 MG Oral Tab	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	15 tablet	3
• Losartan Potassium 25 MG Oral Tab	One half tablet daily	45 tablet	3
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	0
• Timolol Maleate 0.5 % Ophthalmic Solution	Place 1 drop in each EYE 2 times a day.	5 mL	1
• Unclassified (OTHER MEDS, SEE COMMENTS,)	Vitamin B12 500 mcg once daily over the counter		
• Warfarin Sodium (COUMADIN) 5 MG Oral Tab	1 TAB PO ONCE each evening	90 tablet	0

Social history:

History

Sexual Activity

- Sexual Activity: Not on file

Social History

Substance Use Topics

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used
- Alcohol Use: No

Objective:

BP 137/72 mmHg | Pulse 72
Estimated body mass index is 23.90 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of 1/6/16: 57.335 kg (126 lb 6.4 oz).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 137/72
General: NAD. Much improved communication with new hearing aids.
Hip: Right. Decreased flexion by 10% and pain on internal but not external rotation. No trocanteric pain. No bruising.

08/24/2016 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Lab and other tests: pending

Assessment and Plan:
1. Arthralgia of right hip
Right hip pain x 1 week when while walking she noted a "crack." Since then she has had right hip pain. Pain on internal rotation, not external rotation today. X ray pending.

2. Mixed incontinence
Some change in color of urine. No fever, chills, dysuria. Will check UA as she has had infections in the past.
- Urinalysis with Reflex Culture

Other:
--She did not have INR before visit so will do so and will have lipid panel with it as she restarted statin after marked rise in LDL during trial off statin.
--She has amazing new hearing aids which allowed good communication today. Her spirits were improved.

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

8/26/2016
Urine culture grew 60K colonies of E Coli.
Prescription for macrobid bid x 5 days sent. E care message sent to patient. Her son checks her messages.

Business Documents - Scan on 8/31/2016 3:06 PM: Advance Beneficiary Notice of Noncoverage; 2016/08/24; Hall Health

Scan (below)

ADVANCE BENEFICIARY NOTICE OF NONCOVERAGE (ABN)

NOTE: If Medicare doesn't pay for _____ below, you may have to pay. Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the _____ below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost
CPT Code(s): _____ CPT Description(s): office visit	☐ Medicare does not pay for experimental or research use tests/services ☐ Medicare does not pay for this test or service as often as this (denied as too frequent) ✓ Medicare does not pay for this test or service for your condition ☐ Other _____	$200 $500

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the _____ listed above.
  Note: If you choose Option 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

OPTIONS: Check only one box. We cannot choose a box for you.

☑ **OPTION 1.** I want the _____ listed above. You may be ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I'm responsible for payment, but **I can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2.** I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3.** I don't want the _____ listed above. I understand with this choice I am **not** responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional Information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-MEDICARE** (1-800-633-4227/**TTY:** 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

Telephone Encounter

Mercado, Mila N, CMA at 7/29/2016 1038

1. Name of requested medication: atorvastatin, acetaminophen/codeine
2. Date last refilled: atorvastatin x2 3/31/15, acetaminophen w/ codeine, 4/29/16
3. Date of last office visit: 7/20/16
4. Next office visit (scheduled or expected): na

Safeway pharmacy also faxed a request for tylenol w/ codeine.

Electronically signed by Mercado, Mila N, CMA at 7/29/2016 10:42 AM

Neighbor Jr., William E, MD at 7/29/2016 1356

Meds reviewed.
Currently taking atorvastatin 20 mg one half tab daily with plans to recheck lipids. She had been off the statin for a trial, but lipids increased quite a bit so restarted but trying lower dose to get by with the lowest dose needed.

Tylenol with codeine. Last filled in April. Acetaminophen alone has not been effective. Avoid NSAIDs due to being on coumadin, age, and renal function as previously documented. Stable low does of codeine without side effect.

William E Neighbor, MD

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 7/20/2016 1341

Jeanne Leonie Hoffman is a 91 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow Up Visit
  lab

Anticoagulation
On stable dose of medication. Did not have INR before her visit. Does not report any bleeding. Her lites are stable without swelling.

Leg cramps
She states that she is now noted a direct relationship for standing too long on her legs during the day preparing jam and canning and leg cramps in the evening.

Hyperlipidemia
Her LDL cholesterol off medications was markedly elevated. She restarted atorvastatin at one half tablet daily.

Medications

Outpatient Prescriptions Marked as Taking for the 7/20/16 encounter (Office Visit) with Neighbor Jr., William E, MD

07/20/2016 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Medication	Sig	Dispense	Refill

- Sexual Activity: Not on file

Social History

Substance Use Topics

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used
- Alcohol Use: No

Objective:

BP 130/62 mmHg | Pulse 66
Estimated body mass index is 23.90 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of 1/6/16: 57.335 kg (126 lb 6.4 oz).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 130/62
General: NAD

LDL 179 6/22/2016
LDL 73 5/4/2016
LDL 93 2/24/2016
LDL 93 1/6/2016
LDL 59 12/24/2013
LDL 86 7/20/2012

Lab and other tests: Last labs were reviewed. Basic metabolic panel and magnesium did not show cause for leg cramps

Assessment and Plan:

07/20/2016 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

1. DVT, recurrent, lower extremity, chronic, bilateral (HCC)
She did not have an INR before her visit. She will do so now. She is on a stable dose of Coumadin.

2. Other and unspecified hyperlipidemia
Her LDL cholesterol markedly increased when she discontinued atorvastatin. She is now on atorvastatin 20 mg one half tablet daily. Plan is lipid panel in one month at which time she will have been back on atorvastatin for about 6 weeks.

Other:
Advanced directives. Her son had sent me her financial will rather than health care directives. They do not have written health care directives at this time. POLST forms given for them to bring to next visit.

Next visit in one month.

Thank you for this information. I am using it to complete the required information for Housing Kitsap for Jeanne.

William E Neighbor, MD

RE: Medication Question

From	To	Sent
Hoffman, Jeanne Leonie	William E Neighbor Jr., MD	6/28/2016 1:39 PM

Response 1: Taking acetaminophen 500 mg .... twice daily.
Response 2: Vitamin D Strength 400 IU combined with Calcium 600mg ..... once daily.
Response 2a: Vitamin D-3 :Strength 2000 IU ..... once daily.(interchange every other day with Response 2)
Response 3: Vitamin B-complex: (500 mcg ?) ..... once daily.
Response 4: Incontinence Pads..... average 54 pads per week
Response 5: Hearing aides and batteries See notation

Note 1: This is a housing authority, to itemize what expense are incurred for health products over the counter/out of pocket expenses. Since Jeans Medical Insurance is covering medical devises (hearing Aids), as such batteries are requires to make medical devise work and function as proscribe by UW Hearng Center.

Note 2: Any Medical Aid, Devise, Medication, can be listed for Housing Authority, review and consideration.
Expenses incurred for maintaining health are deducted from rent, under USDA-RD Authority

Jeanne

Thank you for this information. I need the following additional information in order to complete the form:
Vitamin D: Strength (eg. 2000 IU) and how often it is taken (presumably once daily)

06/24/2016 - Patient E-mail in Hall Health Primary Care Center (continued)

Messages (continued)

Vitamin B: I had written a prescription for 500 mcg once daily. Is that the dose being taken as an over the counter medication
Incontinence Pads. How many does she use in a day on average
What "prescribed health care aide" do you use?
The form did not indicate that hearing aides and batteries needed to be listed.

Finally, just to clarify, she is taking acetaminophen 500 mg twice daily. Correct?

William E Neighbor, MD

Medication Question

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	6/24/2016 2:02 PM

Jean is taking 500mg Acetaminophen as directed.

The Letter from Hosing Kitsap:
Should include all over-counter medications, as in: Vitamins D & B, Acetaminophen
As well as, Incontinent PADS and any proscribed health aide, for the year.
Including hearing aids and batteries.

Necessary to sustain health and safe healthy standard of human self dignity and disease prevention/etc.

If you have any question call or email
Luis

Bill ...

It was discovered that Jean was adding tremendous amount of cheese and other fatty with her meals, during the period on no Atorvastatin .
Which increased her cholesterol level.
During July reinstated Atorvastatin, cheese and other fatty foods will again be reduced or removed from diet..

Louis

Thank you for the added information about Jean over-eating cheese and other things prior to her blood test which was unusual for her. In the interest of keeping meds to to lowest level that is needed, based on this additional information, I suggest she take atorvastatin 10 mg once daily and have a repeat blood test in 2 months (which can be combined with one of her monthly blood test.

William E Neighbor, MD

Medication Question

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 6/22/2016 1103

Jeanne Leonie Hoffman is a 91 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow Up Visit
  lab

Leg cramps
In the last year she has experienced periodic leg cramps in either thigh or either calf. She often notices this when sitting with her legs extended and lifted up resting on a bench. She has not experienced leg cramps at night. She does not note any relationship to specific physical acuity.

Anticoagulation
She is in for her monthly INR. She is on a stable dose of medication. Reports no problems with leg swelling or pain other than as noted and no bleeding nose or gums.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine	08/30/2013

06/22/2016 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

[M47.816]

- Vertebral fracture [IMO0002] 12/13/2012
  Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed

- Thyroid nodule, uninodular [E04.1] 12/13/2012
  CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011.
  5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.

- Osteoporosis, unspecified [M81.0] 03/04/2008
  T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
  Began fosamax spring 2008. Continued for five years, then stopped

- Long term current use of anticoagulant therapy [Z79.01] 01/08/2008
  Reason for anticoagulation: Recurrent dvts
  Duration of anticoagulation: life
  INR goal: 2.-3

- Closed fracture of unspecified intracapsular section of neck of femur [S72.019A] 05/01/2007
  Pinned April 2007.
  Post op hematocrit 25
  Has walker with wheels for use outside of home. Uses cane in home.

- Unspecified vitamin B deficiency [E53.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Other convulsions [R56.9] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013
  No recurrence

- Esophageal reflux [K21.9] 11/20/2006
- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic (HCC) 11/20/2006

06/22/2016 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

[I82.509]
Recurrent DVT and phlebitis since 1982
Per Vascular Surgery note 5/9/2006: continue warfarin
3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- Allergic rhinitis, cause unspecified [J30.9] 11/20/2006
- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: yes
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

- History of recurrent deep vein thrombosis (DVT) [Z86.718] 06/02/2016
- Other physical therapy [IMO0001] 01/22/2015
- Hip joint stiffness [M25.659] 01/06/2015
- Leg weakness, bilateral [M62.81] 01/06/2015
- Weakness of trunk musculature [M62.81] 01/06/2015
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication (HCC) [E11.9] 03/27/2007

Year onset: Dx March 2007
Metformin discontinued 2011 as A1c in target range without it.
Diet and weight controlled.

Outpatient Prescriptions Marked as Taking for the 6/22/16 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• Acetaminophen (TYLENOL) 500 MG OR TABS	2 in am 2 in pm and 3 before bed		
• Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab	one po once daily for arthritic pain as needed	20 tablet	0
• Atorvastatin Calcium 20 MG Oral Tab	Take 1 tablet (20 mg) by mouth daily. For cholesterol reduction	30 tablet	2
• Losartan Potassium 25 MG Oral Tab	One half tablet daily	45 tablet	3
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	0
• Timolol Maleate 0.5 % Ophthalmic Solution	Place 1 drop in each EYE 2 times a day.	5 mL	1
• Unclassified (OTHER MEDS, SEE COMMENTS,)	Vitamin B12 500 mcg once daily over the counter		
• Warfarin Sodium (COUMADIN) 5 MG Oral Tab	1 TAB PO ONCE each evening	90 tablet	0

Substance Use Topics

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used
- Alcohol Use: No

Objective:

BP 137/61 mmHg | Pulse 65
Estimated body mass index is 23.90 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of 1/6/16: 57.335 kg (126 lb 6.4 oz).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 137/61
General: NAD
Legs: No tenderness. No swelling
She uses a walker for ambulation because of difficulties with balance which is stable.

Lab and other tests: Pending

Assessment and Plan:
1. Muscle cramp
One-year history of periodic leg cramps during the day but not at night. Will check basic metabolic panel and magnesium level. Otherwise advise adequate water intake during the day and stretching exercises.
- BASIC METABOLIC PANEL
- MAGNESIUM

2. DVT, recurrent, lower extremity, chronic, unspecified laterality (HCC)
No recurrence. Due for INR
- PROTHROMBIN TIME

3. Long term current use of anticoagulant therapy
Due for INR
- PROTHROMBIN TIME

4. Imbalance
She lives on Bainbridge Island. Due to some changes in their community, according to her son, she is needing to walk in the streets rather than on a sidewalk. Certainly for safety she should be on a sidewalk. I wrote a letter indicating this.

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

6/22/2016 3:40 PM
Noted after visit that chart contains prescription for acetminophen 500 mg two in AM, two in mid day and three before bed which when combined with the 300 mg of acetminophen in codeine is beyond what would be advised for her age. I would prefer max of 2000 mg.

I have written to her clarifying instructions for acetaminophen use.

6/22/2016 4:37 PM
Lipid panel showed LDL elevated to 179 off atorvastatin. Plan is to restart atorvastatin at 10 mg dose for one week then return to historical dose of 20 mg daily. Patient written.

Note: Check orthostatics at next visit.

6/27/2016
Review status of living will for health care directives at next visit. Her son Louis sent me her regular will not her health care directives.

tylenol (acetaminophen dose)

From	To	Sent and Delivered
William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	6/22/2016 3:45 PM

Last Read in MyChart
6/24/2016 2:05 PM by Hoffman, Jeanne Leonie

Jeanne:
After your visit I received a form to sign attesting to your need for over the counter medications, that being Tylenol (acetaminophen). I then saw that your med list included acetaminophen 500 mg two in morning, two a noon, and three in the evening for a total dose of 3500 mg. In addition you are taking 300 mg in combination with codeine which you take once daily. This total dose of acetaminophen is too high. The maximum dose for your age should be close to 2000 mg. Perhaps you have not been taking the dose that is listed in your chart.

You should take 500 mg 3-4 times a day but not more.

Let me know if you have questions.

William E Neighbor, MD

Documents

Business Documents - Scan on 7/1/2016 7:01 AM: AGREEMENT TO PAY FOR HEALTHCARE SERVICES; 2016/06/22; HALL HEALTH

Scan (below)

ADVANCE BENEFICIARY NOTICE OF NONCOVERAGE (ABN)

NOTE: If Medicare doesn't pay for _____ below, you may have to pay. Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the _____ below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost
CPT Code(s): _____ CPT Description(s): Office Visit and all related services _____	☐ Medicare does not pay for experimental or research use tests/services ☐ Medicare does not pay for this test or service as often as this (denied as too frequent) ☐ Medicare does not pay for this test or service for your condition ☐ Other _____	$100-450

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the _____ listed above.
  Note: If you choose Option 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

OPTIONS: Check only one box. We cannot choose a box for you.

☐ **OPTION 1.** I want the V1817 listed above. You may be ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I'm responsible for payment, but **I can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2.** I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3.** I don't want the _____ listed above. I understand with this choice I am **not** responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional Information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-MEDICARE** (1-800-633-4227/**TTY:** 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

RE: Health Information Update

From	To	Sent
Hoffman, Jeanne Leonie	William E Neighbor Jr., MD	6/28/2016 2:26 PM

OOPS ....had some discussion already, as to terminal in ability to maintain self-supporting daily life.
Jeans expectation is to expire at home or pass doing daily activities.
I will provide, if necessary home bed-side care/similar to my Grandmother's end of life care.
Hospices is not considered at this time.
An Amendment should be added.

Note: Haves required "Family Mediation" as referral from Bainbridge Island Police Dept, in order to end family hostility and build a better family unity.

Be advised, that Jack Louis Calliet Alloin (Jeans Brother) is in the n-stage of life, unable to care for himself.
Since the family fell apart over the last 40 years ago, over homophobia, family members have

06/22/2016 - Patient E-mail in Hall Health Primary Care Center (continued)

Messages (continued)

avoid contact with Jean.
Deep inside Jean, she is gravely hurt, that she is denied interaction with grand and great grand children and nephews.
Because she supports LGBQT Community & Civil Rights, including giving birth to a gay son.
It is very hard on Jean, to be rejected by family members and scorned and dehumanized by family.
Jean's, pioneering spirit, as you have seen, hides the shame of not being allowed to talk about her bio-family.
This including, not being accepted in the social community, as Jean, has no friends, no one to share conversation.
Being isolated from society.

Remember, even you have reject human interactions with to her, hiding her feeling in fear of total rejection.
Are you understanding what ESSEX was about and what rejection is?
Having to make up the excuse, so a part of Jean can be happy.

William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	6/27/2016 11:58 AM

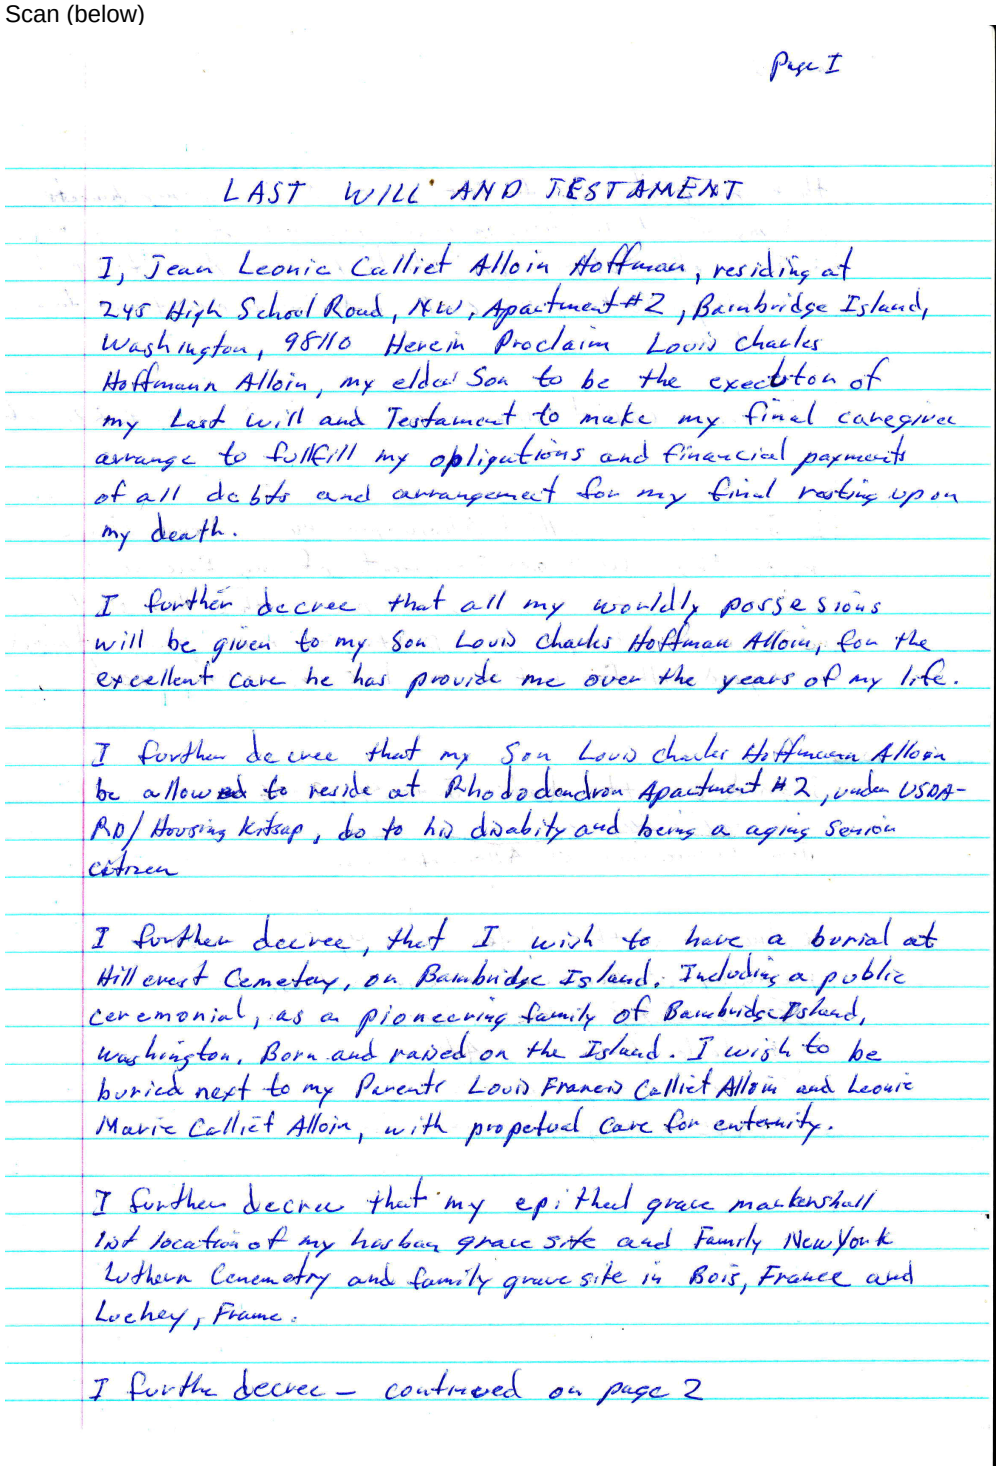
Last Read in MyChart
6/28/2016 1:41 PM by Hoffman, Jeanne Leonie

What I need is her health care directives for how she wants to be cared for at the end of life.
We can discuss more at the next visit which would be better than E care.

William E Neighbor, MD

Health Information Update

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	6/22/2016 6:52 PM



As request My Will as of June 4, 2016. It may be amended as time dictates.

Progress Notes

Neighbor Jr., William E, MD at 5/4/2016 1102

Jeanne Leonie Hoffman is a 91 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow Up Visit
  labs

She comes in today for followup. She did not have time to have an INR done prior to the visit. She's been on a stable dose of Coumadin. She's had no recent swelling of her legs. She continues to use the below-the-knee stockings.

She is requesting a 90 day refill on her atorvastatin rather than 30 day period

Her son is present with her today.

Problem List

Patient Active Problem List

Diagnosis	Date Noted

05/04/2016 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

- DJD (degenerative joint disease) of lumbar spine [M47.816] 08/30/2013
- Vertebral fracture [IMO0002] 12/13/2012
  Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed

- Thyroid nodule, uninodular [E04.1] 12/13/2012
  CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011.
  5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.

- Osteoporosis, unspecified [M81.0] 03/04/2008
  T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
  Began fosamax spring 2008. Continued for five years, then stopped

- Long term current use of anticoagulant therapy [Z79.01] 01/08/2008
  Reason for anticoagulation: Recurrent dvts
  Duration of anticoagulation: life
  INR goal: 2.-3

- FX FEMUR INTRCAPS NOS-CLOSE [S72.019A] 05/01/2007
  Pinned April 2007.
  Post op hematocrit 25
  Has walker with wheels for use outside of home. Uses cane in home.

- VITAMIN B DEFICIENCY NOS [E53.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Other convulsions [R56.9] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013
  No recurrence

- ESOPHAGEAL REFLUX [K21.9] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [H90.5] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic [I82.509] 11/20/2006

Recurrent DVT and phlebitis since 1982
Per Vascular Surgery note 5/9/2006: continue warfarin
3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- HYPERLIPIDEMIA NEC/NOS [E78.5] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- ALLERGIC RHINITIS NOS [J30.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: yes
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

- Other physical therapy [IMO0001] 01/22/2015
- Hip joint stiffness [M25.659] 01/06/2015
- Leg weakness, bilateral [M62.81] 01/06/2015
- Weakness of trunk musculature [M62.81] 01/06/2015
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

Outpatient Prescriptions Marked as Taking for the 5/4/16 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• Atorvastatin Calcium 20 MG Oral Tab	Take 1 tablet (20 mg) by mouth daily. For cholesterol reduction	30 tablet	2
• Losartan Potassium 25 MG Oral Tab	One half tablet daily	45 tablet	3
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	0
• Timolol Maleate 0.5 % Ophthalmic Solution	Place 1 drop in each EYE 2 times a day.	5 mL	1
• Unclassified (OTHER MEDS, SEE COMMENTS,)	Vitamin B12 500 mcg once daily over the counter		
• Warfarin Sodium (COUMADIN) 5 MG Oral Tab	1 TAB PO ONCE each evening	90 tablet	0

Social history:

History

• Sexual Activity:	Not on file

History

Substance Use Topics	
• Smoking status:	Never Smoker
• Smokeless tobacco:	Never Used
• Alcohol Use:	No

Objective:
BP 116/72 mmHg | Pulse 76
Estimated body mass index is 23.90 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of 1/6/16: 57.335 kg (126 lb 6.4 oz).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 116/72
General: NAD
Mild redness of the face noted at her last visit which may have been due to rubbing is resolved.

Lab and other tests: Her urinalysis at her last visit was unremarkable.

Assessment and Plan:
1. BENIGN HYPERTENSION
Blood pressure averages 150/80. A bit lower today. Plan is to continue low dose diuretic and repeat blood pressure in one month.

2. HYPERLIPIDEMIA NEC/NOS
Has been on statins since 2004. LDL well controlled. In interim diet has changed. Will stop atorvastatin and check

05/04/2016 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

lipids in 4-6 weeks.
- LIPID PANEL; Future

3. DVT, recurrent, lower extremity, chronic, unspecified laterality
No recurrence. Due for protime.
- PROTHROMBIN TIME

4. Long term current use of anticoagulant therapy
Due for protime. Complaint with medication.
- PROTHROMBIN TIME

Other:
-Follow up with audiology.

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

5/5/2016
Lipid panel had been future ordered for after she stopped statin, but was done with her INR yesterday. LDL was in desired range. Next step is to stop medication and check lipids in 6 weeks as part of the desirable level may be due to substantial dietary changes.

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 3/30/2016 1109

Jeanne Leonie Hoffman is a 91 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow Up Visit
  lab work

Anticoagulation

Stable dose of Coumadin. Compliant. INR pending at time of visit.

Skin rash

3 day history of dry slightly red rash over the midportion of her forehead and upper nose.. She reports she began using a hair cream that she had not used before.

Followup UTI

She completed the course of antibiotics one month ago. She has felt energetic and improved. She's had no fever, chills, night sweats. No dysuria. Urine has been clear.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [M47.816]	08/30/2013
• Vertebral fracture [IMO0002]	12/13/2012
Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed	
• Thyroid nodule, uninodular [E04.1]	12/13/2012
CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.	
• Osteoporosis, unspecified [M81.0]	03/04/2008
T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continued for five years, then stopped	
• Long term current use of anticoagulant therapy [Z79.01]	01/08/2008
Reason for anticoagulation: Recurrent dvts Duration of anticoagulation: life INR goal: 2.-3	
• FX FEMUR INTRCAPS NOS-CLOSE [S72.019A]	05/01/2007
Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.	
• VITAMIN B DEFICIENCY NOS [E53.9]	05/01/2007
Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency	
• Other convulsions [R56.9]	11/20/2006
Petit Mal since 1975 Carbamazepine level 7.6 on Feb 2007 Discontinued based on ER neuro consult in early 2013 No recurrence	

03/30/2016 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

- ESOPHAGEAL REFLUX [K21.9] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [H90.5] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic [I82.509] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- HYPERLIPIDEMIA NEC/NOS [E78.5] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- ALLERGIC RHINITIS NOS [J30.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: yes
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

- Other physical therapy [IMO0001] 01/22/2015
- Hip joint stiffness [M25.659] 01/06/2015
- Leg weakness, bilateral [M62.81] 01/06/2015
- Weakness of trunk musculature [M62.81] 01/06/2015
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

Outpatient Prescriptions Marked as Taking for the 3/30/16 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab	one po once daily for arthritic pain as needed	20 tablet	0
• Atorvastatin Calcium 20 MG Oral Tab	Take 1 tablet (20 mg) by mouth daily. For cholesterol reduction	30 tablet	2
• Losartan Potassium 25 MG Oral Tab	One half tablet daily	45 tablet	3
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	0
• Timolol Maleate 0.5 % Ophthalmic Solution	Place 1 drop in each EYE 2 times a day.	5 mL	1
• Unclassified (OTHER MEDS, SEE COMMENTS,)	Vitamin B12 500 mcg once daily over the counter		
• Warfarin Sodium (COUMADIN) 5 MG Oral Tab	1 TAB PO ONCE each evening	90 tablet	0

• Sexual Activity:	Not on file

History

Substance Use Topics	
• Smoking status:	Never Smoker
• Smokeless tobacco:	Never Used
• Alcohol Use:	No

Objective:
BP 159/78 mmHg | Pulse 69
Estimated body mass index is 23.90 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of 1/6/16: 57.335 kg (126 lb 6.4 oz).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 159/78
General: NAD
Skin: Dry confluent mildly erythematous rash over the glabellar area therefore had an upper nose. No involvement of the nasolabial folds. No involvement of the periorbital areas

03/30/2016 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Lab and other tests: Labs from last visit reviewed

Assessment and Plan:
1. History of UTI
Completed treatment for UTI one month ago. Repeat urinalysis ordered today. She is currently asymptomatic.
- URINALYSIS WORKUP

2. Skin rash
Nonspecific skin inflammation dryness. Advise lubricating lotion and topical hydrocortisone 1/2-1% applied over the next 10 days then discontinued. She should avoid using the hair cream which he thinks may have caused this rash.

3. DVT, recurrent, lower extremity, chronic, bilateral
INR is pending today. Recheck in one month.

Other:
Her labs were reviewed. Vitamin D level was borderline low. Advise vitamin D 1000 2000 units daily particularly during the winter months but probably all year round given that she does have not been out in the sun very much.

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

3/30/2016 5:41 PM
INR was 2.9.
Urinalysis showed trace leukocyte esterase however microscopic examination showed vaginal contamination and no white blood cells. I believe her urinary tract infection is resolved.

Hi Louis,

02/26/2016 - Patient E-mail in Hall Health Primary Care Center (continued)

Messages (continued)

My name is Kate and I'm one of the nurses here at Hall Health. I'm glad to see that you were able to access the lab results. Dr. Neighbor sent another message with further instructions about Jeanne's warfarin tablets. I'm not sure you were able to view that, so I've included the body of that message here:

"I sent in a prescription to your Bainbridge pharmacy for ciprofloxacin 250 mg twice daily for five days for a bladder infection. This antibiotic worked well when you had an infection in September 2015. Because it can result in an increase your protime, I would reduce your dose of coumadin slightly. You currently take one 5 mg tab of warfarin daily. I would like you to reduce the dose on Saturday to one half tablet. I would like you to get an INR done on Wednesday of next week."

I will forward your message to Dr. Neighbor, but I wanted to be sure you saw these instructions in addition to the information about the antibiotics.

Take care,

Kate, RN

Medical Advice

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	2/26/2016 8:39 AM

After reviewing test results, particular to reoccurring infection.
I discussed this with Jean, that a better hygiene program, must be introduced to daily cleaning upon soiled incontinence pad use and cleaning under garments with ammonia rinse wash. Including better bathing habits, that concentrate on washing with shower wan spry in infected area.

Louis

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 2/24/2016 1059

Jeanne Leonie Hoffman is a 91 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Medication Management
  medication managment/ lab work/ poss shots

Jeanne comes in with her son for monthly visit for anticoagulation review. She has an appointment for a change in her

hearing aids coming up. She reports that she feels like something is not quite right. She denies any fever or chills. Her appetite has been good according to her son. She's had no nausea or vomiting or complaints of chest pain, cough, abdominal pain, diarrhea, or other change in bowel movements. She denies any change in urinary frequency, urine color, or any dysuria. There's been no incontinence. She reports being compliant with her medications are overseen by her son. He confirms this.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [M47.816]	08/30/2013
• Vertebral fracture [IMO0002] Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed	12/13/2012
• Thyroid nodule, uninodular [E04.1] CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.	12/13/2012
• Osteoporosis, unspecified [M81.0] T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continued for five years, then stopped	03/04/2008
• Long term current use of anticoagulant therapy [Z79.01] Reason for anticoagulation: Recurrent dvts Duration of anticoagulation: life INR goal: 2.-3	01/08/2008
• FX FEMUR INTRCAPS NOS-CLOSE [S72.019A] Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.	05/01/2007
• VITAMIN B DEFICIENCY NOS [E53.9] Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency	05/01/2007
• Type II or unspecified type diabetes mellitus without	03/27/2007

mention of complication, not stated as uncontrolled [E11.9]
Year onset: Dx March 2007
Metformin discontinued 2011 as A1c in target range without it.
Diet and weight controlled.

- Other convulsions [R56.9] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007

Sexual Activity

- Sexual Activity: Not on file

History

Substance Use Topics

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used
- Alcohol Use: No

Objective:

BP 153/70 mmHg | Pulse 59
Estimated body mass index is 23.90 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of 1/6/16: 57.335 kg (126 lb 6.4 oz).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 153/70
General: NAD
Appears well.
Chest; Clear
Cor: Regular pulse. No murmur
Abd: Soften and non tender in sitting position
Extr: Without swelling

Lab and other tests: pending

Assessment and Plan:

1. Fatigue, unspecified type

No specific cancer on history or physical examination pointing to a cause for her subjective sense that something is "wrong". Labs have been ordered.
- CBC, DIFF
- THYROID STIMULATING HORMONE
- CRP, HIGH SENSITIVITY
- Urinalysis with Reflex Culture
- FERRITIN

2. VITAMIN B DEFICIENCY NOS

She continues to take vitamin B12. She is due for followup testing.
- METHYLMALONIC ACID

3. Type 2 diabetes mellitus without complication

Diet controlled. Due for A1c and lipid panel. Depending upon results may be able to reduce or discontinue lipid-lowering agent and then followup with repeat lipid panel.
- LIPID PANEL
- HEMOGLOBIN A1C, HPLC

4. Mixed incontinence

She denies any incontinence currently.

5. BENIGN HYPERTENSION

02/24/2016 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Blood pressure reasonably controlled for age in clinic. Due for a basic metabolic panel.
- BASIC METABOLIC PANEL

6. Vitamin D deficiency
She's had vitamin D deficiency in the past. Because of chronic issues with balance though she's had no recent falls we'll recheck vitamin D level.
- VITAMIN D (25 HYDROXY)

I will contact her with test results. Next visit with me in one month.

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

2/25/2016 1:57 PM
Urinalysis reveals microscopic pyuria and bacteriuria and urine culture is growing Escherichia coli. Sensitivities pending. Last Escherichia coli urinary tract infection was in September of 2000 T. The Escherichia coli at that time was pansensitive. She was prescribed ciprofloxacin at that time. She tolerated this well. She has prior sensitivity to nitrofurantoin. She is instructed to reduce warfarin by one half tablet on Saturday.

antibiotic treatment for bladder infection

From	To	Sent and Delivered
William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	2/25/2016 2:06 PM

Last Read in MyChart
Not Read

I sent in a prescription to your Bainbridge pharmacy for ciprofloxacin 250 mg twice daily for

02/24/2016 - Office Visit in Hall Health Primary Care Center (continued)

Messages (continued)

five days for a bladder infection. This antibiotic worked well when you had an infection in September 2015. Because it can result in an increase your protime, I would reduce your dose of coumadin slightly. You currently take one 5 mg tab of warfarin daily. I would like you to reduce the dose on Saturday to one half tablet. I would like you to get an INR done on Wednesday of next week.

William E Neighbor, MD

01/06/2016 - Office Visit in Hall Health Primary Care Center

Reason for Visit

Chief complaint: Follow-Up
Visit diagnoses:

- (primary)
- AFTERCARE LONG TERM ANTICOAG USE

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 1/6/2016 1139

Jeanne Leonie Hoffman is a 91 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up

Jeanne he is in with her son Louis today. She has decreased her losartan to one half tab of 25 mg tablet daily. She continues otherwise on her same medications. She has an INR and lipid panel pending today. Today is her 91st birthday. She has no specific complaints.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [M47.816]	08/30/2013
• Vertebral fracture [IMO0002]	12/13/2012

Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up

imaging in 6 months showed healed

- Thyroid nodule, uninodular [E04.1] 12/13/2012
  CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011.
  5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.

- Osteoporosis, unspecified [M81.0] 03/04/2008
  T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
  Began fosamax spring 2008. Continued for five years, then stopped

- Long term current use of anticoagulant therapy [Z79.01] 01/08/2008
  Reason for anticoagulation: Recurrent dvts
  Duration of anticoagulation: life
  INR goal: 2.-3

- FX FEMUR INTRCAPS NOS-CLOSE [S72.019A] 05/01/2007
  Pinned April 2007.
  Post op hematocrit 25
  Has walker with wheels for use outside of home. Uses cane in home.

- VITAMIN B DEFICIENCY NOS [E53.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

- Other convulsions [R56.9] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013
  No recurrence

- ESOPHAGEAL REFLUX [K21.9] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic [I82.509] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- HYPERLIPIDEMIA NEC/NOS [E78.5] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- ALLERGIC RHINITIS NOS [J30.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: yes
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

- Other physical therapy [IMO0001] 01/22/2015
- Hip joint stiffness [M25.659] 01/06/2015
- Leg weakness, bilateral [M62.81] 01/06/2015
- Weakness of trunk musculature [M62.81] 01/06/2015
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

No outpatient prescriptions have been marked as taking for the 1/6/16 encounter (Office Visit) with Neighbor Jr., William E, MD.

Medical and Surgical History

Past Medical History

Diagnosis	Date
• Impaired fasting glucose	3/22/2007
• Carpal tunnel syndrome	11/20/2006
Carpal tunnel release right wrist in 1989	
• DIAPHRAGMATIC HERNIA	11/20/2006
CT of abdomen in 2006	

No past surgical history on file.

No family history on file.

History

Substance Use Topics	
• Smoking status:	Never Smoker
• Smokeless tobacco:	Never Used
• Alcohol Use:	No

Objective:
BP 167/70 mmHg | Pulse 60 | Wt 57.335 kg (126 lb 6.4 oz)
Estimated body mass index is 23.9 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of this encounter: 57.335 kg (126 lb 6.4 oz).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 167/70
General: NAD
Her affect was positive.

Lab and other tests: pending

Assessment and Plan:
1. AFTERCARE LONG TERM ANTICOAG USE
INR pending at time of visit
- Warfarin Sodium (COUMADIN) 5 MG Oral Tab; 1 TAB PO ONCE each evening Dispense: 90 tablet; Refill: 0

2. GENERAL OSTEOARTHROSIS
Stable low dose of Tylenol with codeine. Needs refill.
- Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab; one po once daily for arthritic pain as needed Dispense: 20 tablet; Refill: 0

01/06/2016 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Other:
Blood pressure was elevated today. This was not re-measured. It will be rechecked at her next visit. We had small birthday party for her today.

William E Neighbor, MD
Clinical Professor
Department of Family Medicine
University of Washington

Orders Only on 01/06/16

1. PROTHROMBIN TIME

Result	Value	Ref Range
Prothrombin Time Patient	24.2 (H)	10.7 - 15.6 s
Prothrombin INR	2.3 (H)	0.8 - 1.3

2. LIPID PANEL

Result	Value	Ref Range
Cholesterol (Total)	168	<200 mg/dL
Triglyceride	88	<150 mg/dL
Cholesterol (HDL)	57	>39 mg/dL
Cholesterol (LDL)	93	<130 mg/dL
Non-HDL Cholesterol	111	0 - 159 mg/dL
Cholesterol/HDL Ratio	2.9	
Lipid Panel, Additional Info.	(NOTE)	

Patient was written for the results. INR is in the target range. No change in Coumadin dose. LDL is well controlled with a favorable HDL cholesterol. Consider decrease in atorvastatin dose to 10 mg daily.

This is the 3 person from the UW that has been involved in hatred. Appears that UW is supporting them.

Question: How many people at Hall Health are radical extremist?
How dangerous is Hall Health or UWMC or UW as a whole.?

Lady -

You're nuts...and always have been. Please remove me from the onslaught of email you send about your ridiculous, self serving family train trip bullshit with that gay, child abusing convict you call a son.

He even tried serving up drugs to me as a teenager in our home at Thanksgiving. You two deserve each other. Since he's never been able to sustain employment, no doubt he keeps Doug away from you to protect you paying for everything! Since he was never rehabilitated, he should still be behind bars!

From what I understand, that gay bastard doesn't even let your own son see you anymore!! And you're going to lecture my dad??? You're crazier than a rat in a tin shithouse!

As it relates to your sister..my mother, you two idiots couldn't even bother to come to see her on her death bed...but can beetle around the country on trains!!!

You're not worth the keystrokes to comment further. Hope the next time I hear about you is in an obituary...soon! Society will be better off. No more email from you...PERIOD!

Received request to refill:

1-Name of requested medication: atorvastatin
2-Date last refilled: 12/24/14

1-Name of requested medication: timolol
2-Date last refilled: 9/17/2015

1-Name of requested medication: lipitor / Comments: I couldn't reorder this med and pull it out from the list of meds history
2-Date last refilled: 3/23/09
3-Date of last office visit: 12/2/2015
4-Next office visit: 01/06/2016

Please advise, pharmacy on file.

Electronically signed by Mohova, Elena at 12/18/2015 3:32 PM

Neighbor Jr., William E at 12/18/2015 1617

In refilling atorvastatin, note that last LDL in 2014 was about 60. I think we can reduce dose in half to 20 mg and recheck lipids at next INR blood draw. Communicated to her via E care.

refills. Reduced atorvastatin dose

From	To	Sent and Delivered
William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	12/18/2015 4:20 PM

Last Read in MyChart
Not Read

In refilling your cholesterol medication, I noted that your last blood test in 2014 showed that perhaps we can reduce the dose of atorvastatin (Lipitor). I have reduced this from 40 mg to 20 mg. At your next blood test in January, I have asked that a lipid panel be done. If you are not yet out of your 40 mg tabs, you should start take just a half tab daily now.

Clinical Notes

Progress Notes

Neighbor Jr., William E at 12/2/2015 1106

Jeanne Leonie Hoffman is a 90 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Ear Problem
  hearing problem

Jean came in a bit late after INR at Roosevlet which is pending. She has had some swelling of both feet, more on left. This as best as I can determine occurs mid day and is resolved by laying down. It has been happening for several weeks. She has been on regular dose of coumadin.

Review of Systems:
No shortness of breath, chest pain.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [M47.816]	08/30/2013

12/02/2015 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

- Vertebral fracture [IMO0002] 12/13/2012
  Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed

- Thyroid nodule, uninodular [E04.1] 12/13/2012
  CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011.
  5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.

- Osteoporosis, unspecified [M81.0] 03/04/2008
  T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
  Began fosamax spring 2008. Continued for five years, then stopped

- Long term current use of anticoagulant therapy [Z79.01] 01/08/2008
  Reason for anticoagulation: Recurrent dvts
  Duration of anticoagulation: life
  INR goal: 2.-3

- FX FEMUR INTRCAPS NOS-CLOSE [S72.019A] 05/01/2007
  Pinned April 2007.
  Post op hematocrit 25
  Has walker with wheels for use outside of home. Uses cane in home.

- VITAMIN B DEFICIENCY NOS [E53.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

- Other convulsions [R56.9] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013
  No recurrence

12/02/2015 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

- ESOPHAGEAL REFLUX [K21.9] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [H90.5] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic [I82.509] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- HYPERLIPIDEMIA NEC/NOS [E78.5] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- ALLERGIC RHINITIS NOS [J30.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: yes
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

- Other physical therapy [Z76.89] 01/22/2015
- Hip joint stiffness [M25.659] 01/06/2015
- Leg weakness, bilateral [R29.898] 01/06/2015
- Weakness of trunk musculature [M62.81] 01/06/2015
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

Objective:

12/02/2015 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

BP 115/70 mmHg | Pulse 62 | Temp(Src) 98.5 °F (36.9 °C) (Oral) | Wt 54.432 kg (120 lb)
Estimated body mass index is 22.69 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of this encounter: 54.432 kg (120 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 115/70
General: NAD. Hearing impaired. Son present
Chest clear
Extr: With elastic stockings removed. Skin intact. There is one small scab on left lateral pretibial area that is healing with out infection. Feet normal without skin disruption. At 11 am there is no swelling noted. She has mild tenderness over lateral upper portion of lower leg but no calf tenderness.

Lab and other tests: INR pending. BMP was normal in July.

Assessment and Plan:
1. Ankle swelling, unspecified laterality
No evidence of source for her perception of ankle swelling. As it is bilateral unlikely due to recurrent DVT. Additionally, INRs have been in therapeutic range. Her renal function has been fine and no evidence of cardiac disease. There is no evidence of infection. I do advise continued use of compression stockings and some lotion to keep skin soft. Follow up in one month.

• Vertebral fracture [IMO0002] Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed	12/13/2012
• Thyroid nodule, uninodular [E04.1] CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.	12/13/2012
• Osteoporosis, unspecified [M81.0] T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continued for five years, then stopped	03/04/2008
• Long term (current) use of anticoagulants [Z79.01] Reason for anticoagulation: Recurrent dvts Duration of anticoagulation: life INR goal: 2.-3	01/08/2008
• FX FEMUR INTRCAPS NOS-CLOSE [S72.019A] Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.	05/01/2007
• VITAMIN B DEFICIENCY NOS [E53.9] Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency	05/01/2007
• Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [E11.9] Year onset: Dx March 2007 Metformin discontinued 2011 as A1c in target range without it. Diet and weight controlled.	03/27/2007
• Other convulsions [R56.9] Petit Mal since 1975	11/20/2006

11/18/2015 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Carbamazepine level 7.6 on Feb 2007
Discontinued based on ER neuro consult in early 2013
No recurrence

- ESOPHAGEAL REFLUX [K21.9] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [H90.5] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic [I82.509] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- HYPERLIPIDEMIA NEC/NOS [E78.5] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- ALLERGIC RHINITIS NOS [J30.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: yes
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

- Other physical therapy [Z76.89] 01/22/2015
- Hip joint stiffness [M25.659] 01/06/2015
- Leg weakness, bilateral [R29.898] 01/06/2015

- Weakness of trunk musculature [M62.81] 01/06/2015
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

Outpatient Prescriptions Marked as Taking for the 11/18/15 encounter (Office Visit) with Neighbor Jr., William E

Medication	Sig	Dispense	Refill
• Acetaminophen (TYLENOL) 500 MG OR TABS	2 in am 2 in pm and 3 before bed		
• Atorvastatin Calcium 40 MG Oral Tab	Take 1 tablet (40 mg) by mouth daily.	90 tablet	3
• Losartan Potassium 25 MG Oral Tab	One half tablet daily	45 tablet	3
• Timolol Maleate 0.5 % Ophthalmic Solution	Place 1 drop in each EYE 2 times a day.	5 mL	1
• Unclassified (OTHER MEDS, SEE COMMENTS,)	Vitamin B12 500 mcg once daily over the counter		
• Warfarin Sodium (COUMADIN) 5 MG Oral Tab	1 TAB PO ONCE each evening	90 tablet	0

Objective:

BP 158/68 mmHg | Pulse 58 | Temp(Src) 97.4 °F (36.3 °C) (Oral) | Wt 58.06 kg (128 lb)

11/18/2015 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Estimated body mass index is 24.2 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of this encounter: 58.06 kg (128 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 158/68
General: NAD
none

Lab and other tests: INR 2.9

Assessment and Plan:
1. Vaccine counseling
Flu vaccine today. Needs Shingles vaccine but as part of Medicare D needs to be done at pharmacy.
- influenza vaccine quadrivalent PF (adult) 0.5 mL IM - 90686

Anticoag. INR stable. Recheck in on month

Addnedum: She nearly fainted after the flu vaccine. Had not eaten breakfast. Given some juice and laid down. Recovered fully and ambulated with son out of clinic. Vitals were stable.

Hello Jeanne,

At UW Medicine, we want to help you stay as healthy as possible. This is why we're letting you know that your UW Medicine medical record shows you're due for preventive care. You may be due for this care, or you may have had it done elsewhere and our medical record does not include that information.

Click epichttp://healthmaint[here] to go to the Preventive Care page to view additional information, make an appointment, or send a message to your provider to update your records.

Clinical Notes

Progress Notes

Duckert, Larry G at 9/28/2015 0000

HOFFMAN, JEANNE LEONIE U8170135 09/28/2015

OTOLARYNGOLOGY CLINIC

Jeanne is a 90-year-old lady with a long-standing sensorineural hearing loss which has been slowly deteriorating. Both ears have been aided in the past successfully. More recently, somehow she lost the aids she was using and borrowed her brother's aids which were reprogrammed at Costco. They are ill-fitting, but do help her nonetheless. She has tried other instruments in the community. She is well aware that if fit properly, she can benefit significantly from amplification. There is the problem, however, of limited financial resources.

Today, we retested her. Her sensorineural thresholds have increased bilaterally. Nonetheless, the ears remain aidable.

We discussed treatment alternatives, discussed both with her and her son. With Kevin Kimmely's help, I

09/28/2015 - Office Visit in UW Medicine Montlake Otology Clinic (continued)

Clinical Notes (continued)

was reminded of a program available at Speech and Hearing Clinic. This information was provided to her, and our hope is that, with their assistance, she may be fit with appropriate instruments.

Electronically signed by Duckert, Larry G at 10/1/2015 12:47 PM

Duckert, Larry G at 9/28/2015 1640

This note was dictated by Larry Duckert M.D., Ph.D. CSN 1798064556

Greater than 50% of this 15 minute encounter was devoted to face to face counseling which provided validation of the symptoms, a review of the diagnostic alternatives, rational for additional testing, discussion of prognosis, explanation of treatment and rehabilitation options for hearing rehabilitation

Scan (below)

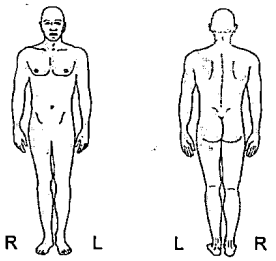
Patient Self-Assessment of Pain

To be completed by the patient at the initial visit and at follow-up visits when past pain has been reported.

Are you having pain related to your visit today? See Hall Health Center/UW

☐ Yes ☐ No If No, please return this form to the Medical Assistant or front desk.



Do you want to talk to your health care provider about your pain today?

☐ Yes ☐ No If No, please return this form to the Medical Assistant or front desk.

If you've answered "Yes" to both questions above, please complete questions #1-6 below

1. **How long have you had this pain?**_____

2. **Where is your pain?** On the diagram, shade the areas where you feel pain. Put an X on the area that hurts most.

3. Below is a scale of numbers you may use to **describe how bad your pain is:**

0 1 2 3 4 5 6 7 8 9 10
No Pain — Worst Pain Imaginable

My AVERAGE pain over the past 24 hrs

My WORST pain over the past 24 hrs

See Hall Health Center/UW

4. **Circle a word(s) that describes your pain.**

Aching	Sharp
Burning	Shock-like
Dull	Stabbing
Heavy	Tender
Radiating	Other_____

5. **Circle how often you have pain.**

Continuous

Intermittent

Clinical Notes

Progress Notes

Kiemele, Kevin L at 10/4/2015 1154

Audiology Note - Interdisciplinary Otology/Audiology clinic

Patient referred by Larry Duckert, MD, PhD, and seen in conjunction with otology visit. Further details can be viewed in the otology attending notes.

Subjective:
Patient referred for audiologic/otologic evaluation due to long history of hearing loss with concern for significant progression since last seen at UWMC.

Pt w/ known bilateral SNHL returns for evaluation to determine degree of progression since last UWMC audiogram in 2008; currently wearing brother's BTE h/aids, reprogrammed at Costco for her.

Objective/Assessment: Audiogram and tympanogram performed. See results in Media tab in EpicCare.

Today: AU w/ severe to profound SNHL across frequencies, AD > AS for pure tones, but similar PB max across ears; minimal change w/ binaural speech presentation compared to monaural. Significant progression of HL compared to '08 audio (PTA then 58 dB AD, 50 dB AS).

09/28/2015 - Office Visit in UW Medicine Montlake Audiology (continued)

Clinical Notes (continued)

Tymps: DNT

Plan:
Patient to be seen by otology immediately following this visit.
Recommend HAE post medical clearance; may qualify for SPHSC h/aid program; contact information for SPHSC clinic and Audiology program provided for patient and/or her son to contact re: hearing aid evaluation and new hearing aids.

Electronically signed by Kiemele, Kevin L at 10/4/2015 11:59 AM

Clinical Notes

Progress Notes

Neighbor Jr., William E at 9/16/2015 1150

Jeanne Leonie Hoffman is a 90 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Urine Problem
  poss bladder infe x 1 month
- Hearing Problem
  getting worse

Hearing

Last visit with audiology appears to have been in 2008. Her son who is present today states her hearing is worsening

which is frustrating for him and others in communicating with her.

Anticoag
Stable dose of coumadin. Denies bleeding or unexpected brusing.

Dysuria
She states she has burning when urinates and perhaps increased frequency. This has improved over the last few days when she has drank cranberry juice. When asked how long she has had symptoms, she states it began before their train trip--which lasted 3-4 weeks--but was worse earlier this week. She denies fever, chills, nausea, vomiting, blood in urine.

ROS:
She states that since returning from her trip she has swelling in her knees but only when she awakens at night. She has also had some knee discomfort

Problem List
Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [721.3]	08/30/2013
• Vertebral fracture [805.8] Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed	12/13/2012
• Thyroid nodule, uninodular [241.0] CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.	12/13/2012
• Osteoporosis, unspecified [733.00] T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continued for five years, then stopped	03/04/2008
• Long term (current) use of anticoagulants [V58.61] Reason for anticoagulation: Recurrent dvts Duration of anticoagulation: life INR goal: 2.-3	01/08/2008
• FX FEMUR INTRCAPS NOS-CLOSE [820.00] Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.	05/01/2007

09/16/2015 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

- VITAMIN B DEFICIENCY NOS [266.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

- Other convulsions [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013
  No recurrence

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- Unspecified glaucoma(365.9) [365.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.

Substance Use Topics

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used
- Alcohol Use: No

Objective:

BP 170/72 mmHg | Pulse 66 | Temp(Src) 97.8 °F (36.6 °C) (Oral)
Estimated body mass index is 24.20 kg/(m^2) as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of 7/29/15: 58.06 kg (128 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 170/72
General: NAD.
ENT: With hearing aids removed, TM clear bilaterally.
MSK: Knees show age related DJD soft tissue swelling but no acute effussion and no tenderness. No increased warmth. Gait normal for her.

Lab and other tests: INR 3.0
UA and culture pending.

Assessment and Plan:

(788.1) Dysuria (primary encounter diagnosis)
Dysuria for at least one month worse this week, improved with cranberry juice. No hx of frequently recurring UTIs and no generalized symptoms. Plan is to cover her with Cipro 250 mg bid x 3 while await culture. I did not make a change in her coumadin given the short course of antibiotics. She however is to have a repeat INR next Monday or Tuesday. Her son who was present said he would bring her to the Roosevelt clinic for this.
Plan: Urinalysis Complete, URN, CULTURE:BACT-URINE W/GRAM STN, Ciprofloxacin HCl 250 MG Oral Tab

(715.00) GENERAL OSTEOARTHROSIS
For her back she uses codeine tabs sparingly. As before would not use non steroidals due to being on Coumadin and acetaminophen alone has not been sufficient. She is a on low and stable dose which has been helpful to her mobility. Refilled today.
Plan: Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab

(389.10) SENSORNEUR HEAR LOSS NOS
Chronic. Has hearing aids. No wax today. Plan is refer back to audiology whom she may not have seen for about seven years to see if any change in her hearing aids is needed.
Plan: REFERRAL TO AUDIOLOGY

Hello Jeanne,

Unfortunately Dr Neighbor will not be in tomorrow to see you for your medical appointment as he has been called away from his clinic that day. Please call us at 206-616-2495 to reschedule.

Thank you,

Kim

Active at the End of Visit

Acetaminophen (TYLENOL) 500 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 6/22/2016
Instructions: 2 in am 2 in pm and 3 before bed
Entered by: Smith, Courtney A, CM
Entered on: 3/8/2010
End date: 6/22/2016

Unclassified (OTHER MEDS, SEE COMMENTS,)

Discontinued by: Ong, Thuan Duc, MD
Discontinued on: 6/7/2018
Instructions: Vitamin B12 500 mcg once daily over the counter
Entered by: Neighbor Jr., William E, MD
Entered on: 2/21/2014
Start date: 2/21/2014
End date: 6/7/2018

Atorvastatin Calcium 40 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 12/18/2015
Reason for discontinuation: Dose adjustment
Instructions: Take 1 tablet (40 mg) by mouth daily.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/24/2014
Start date: 12/24/2014
End date: 12/18/2015
Quantity: 90 tablet
Refill: 3

Timolol Maleate 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/17/2015
Reason for discontinuation: Reorder
Instructions: Place 1 drop in each EYE 2 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 7/21/2015
Start date: 7/21/2015
End date: 9/17/2015
Quantity: 5 mL
Refill: 1

Losartan Potassium 25 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 3/31/2016
Reason for discontinuation: Reorder
Instructions: One half tablet daily
Authorized by: Neighbor Jr., William E, MD
Ordered on: 7/29/2015
Start date: 7/29/2015
End date: 3/31/2016
Quantity: 45 tablet
Refill: 3

Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab

07/29/2015 - Orders Only in Hall Health Primary Care Center (continued)

Medication List (continued)

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/16/2015
Reason for discontinuation: Reorder
Instructions: one po once daily for arthritic pain as needed
Authorized by: Neighbor Jr., William E, MD
Ordered on: 7/29/2015
Start date: 7/29/2015
End date: 9/16/2015
Quantity: 20 tablet
Refill: 0

Warfarin Sodium (COUMADIN) 5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 1/6/2016
Reason for discontinuation: Reorder
Instructions: 1 TAB PO ONCE each evening
Authorized by: Neighbor Jr., William E, MD
Ordered on: 7/29/2015
Start date: 7/29/2015
End date: 1/6/2016
Quantity: 90 tablet
Refill: 0

Pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 6/2/2016
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 7/29/2015

Clinical Notes

Progress Notes

Neighbor Jr., William E at 7/29/2015 1035

Jeanne Leonie Hoffman is a 90 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Annual Exam
  routine

Anticoagulation for prevention of recurrent DVT

She comes in for INR. She has been on stable dose of coumadin of 5 mg daily. She reports to bleeding or unexpected bruising. She has had no edema. She is leaving with son in two days for 6 week trip by train across Canada.

Hypertension

She is taking her meds. No interval readings.

Recent syncopal episode and knee MCL strain

07/29/2015 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Seen in ER for syncopal episode related to wearing heavy coat in hot weather. Episode observed by son and very transient. There has been no recurrence. In the ER head CT was negative. She did sustain strain the MCL of right knee but reports this has resolved.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [721.3]	08/30/2013
• Vertebral fracture [805.8] Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed	12/13/2012
• Thyroid nodule, uninodular [241.0] CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.	12/13/2012
• Osteoporosis, unspecified [733.00] T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continued for five years, then stopped	03/04/2008
• Long term (current) use of anticoagulants [V58.61] Reason for anticoagulation: Recurrent dvts Duration of anticoagulation: life INR goal: 2.-3	01/08/2008
• FX FEMUR INTRCAPS NOS-CLOSE [820.00] Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.	05/01/2007
• VITAMIN B DEFICIENCY NOS [266.9] Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency	05/01/2007
• Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00] Year onset: Dx March 2007	03/27/2007

Metformin discontinued 2011 as A1c in target range without it.
Diet and weight controlled.

- Other convulsions [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013
  No recurrence

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- Unspecified glaucoma(365.9) [365.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

Substance Use Topics

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used
- Alcohol Use: No

Objective:

BP 144/65 mmHg | Pulse 55 | Temp(Src) 98.3 °F (36.8 °C) (Oral) | Ht 5' 1" (1.549 m) | Wt 58.06 kg (128 lb) | BMI 24.20 kg/m2

Estimated body mass index is 24.2 kg/(m^2) as calculated from the following:
Height as of this encounter: 5' 1" (1.549 m).
Weight as of this encounter: 58.06 kg (128 lb).

Extended Vitals not filed for this encounter.

Last blood pressure recorded in this encounter: 144/65

General: NAD

Right knee non tender medially.

Lab and other tests:

Orders Only on 07/29/15

1. PROTHROMBIN TIME (RAPID INR)

Result	Value	Ref Range
Prothrombin INR	2.9 (H)	0.8 - 1.3

Assessment and Plan:

(401.1) BENIGN HYPERTENSION (primary encounter diagnosis)
Blood pressure in reasonable range for age. Refill meds for her trip.
Plan: Losartan Potassium 25 MG Oral Tab

(V58.61) AFTERCARE LONG TERM ANTICOAG USE
INR in Tx range and stable. Refilled meds for trip. INR when returns.
Plan: Warfarin Sodium (COUMADIN) 5 MG Oral Tab

(451.19) DEEP VENOUS PHLEBITIS-LEG NEC
No recurrence.for many years.
Plan: Warfarin Sodium (COUMADIN) 5 MG Oral Tab

(715.00) GENERAL OSTEOARTHROSIS
Back pain secondary to compression fracture and diffuse DJD. She benefits from a single table of codeine daily without side effects. Would avoid NSAIDs given her use of coumadin.
Plan: Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE
#3) 300-30 MG Oral Tab

Note: During her train trip Louis, her son, states their itinerary will be at www.atdline.com/s-tour-15.ntm. OBA Itinerary. Depart Aug 1, return sept 10.

Via Rail
Montreal, Quebec, Canada

RE: Jeanne Leonie Hoffman
DOB: 1/6/1925
MRN: N3927850

Via Rail:

I am the personal care physician for Jean Hoffman. Mrs. Hoffman is a delightful, strong minded individual for whom I have been privileged to care for well over for nearly 30 years.

Mrs. Hoffman lives with her son Louis Hoffman who assists her with taking six prescribed medications, some personal hygiene including use of compression stockings for recurrent leg clots, accommodations for her hearing impairment that is only partially corrected with hearing aids, and helping to assure safe ambulation and use of her walker. Additionally, she easily becomes lost and needs assistance with directions. Mrs. Hoffman will require this same personal assistance during her rail trip. She will greatly benefit from having her son Louis Hoffman travel with her.

Please contact me if you have any questions.

Best regards,

Sincerely,

Active at the End of Visit

Acetaminophen (TYLENOL) 500 MG OR TABS

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 6/22/2016
Instructions: 2 in am 2 in pm and 3 before bed
Entered by: Smith, Courtney A, CM
Entered on: 3/8/2010
End date: 6/22/2016

Unclassified (OTHER MEDS, SEE COMMENTS,)

Discontinued by: Ong, Thuan Duc, MD
Discontinued on: 6/7/2018
Instructions: Vitamin B12 500 mcg once daily over the counter
Entered by: Neighbor Jr., William E, MD
Entered on: 2/21/2014
Start date: 2/21/2014
End date: 6/7/2018

Losartan Potassium 25 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 7/29/2015
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (25 mg) by mouth daily.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 8/25/2014
Start date: 8/25/2014
End date: 7/29/2015
Quantity: 90 tablet
Refill: 3

Atorvastatin Calcium 40 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 12/18/2015
Reason for discontinuation: Dose adjustment
Instructions: Take 1 tablet (40 mg) by mouth daily.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/24/2014
Start date: 12/24/2014
End date: 12/18/2015
Quantity: 90 tablet
Refill: 3

Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 7/28/2015
Reason for discontinuation: Reorder
Instructions: one po once daily for arthritic pain as needed
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/24/2014
Start date: 12/24/2014
End date: 7/27/2015
Quantity: 30 tablet
Refill: 3

Warfarin Sodium (COUMADIN) 5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 7/28/2015
Reason for discontinuation: Reorder
Instructions: 1 TAB PO ONCE each evening
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/11/2015
Start date: 2/11/2015

Medical Advice

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	7/6/2015 5:09 PM

Jean fainted to day at Ferry Board Ramp/Gang Blank.2:05pm
Injury: Very small abrasion at knee.
EMR Medic-1: Looked at Abrasion/Release/Blooding Stopped.
Possible Cause: Heat Exhaustion

Jean wore a "winter Insulated coat" today.
She refused to take it off, in direct sunlight. "Bus Heat" was over 100 degrees/with some venting.
During a walk from Bus to Ferry Terminal, heat was intense, doing fast pace walk.
5:PM a little stiffness in knee/good spirits/drinking fluids.

Below is the letter I drafted. I re read your e care messages but could not figure out where I am to send or address the letter. Do you want me to sign and send it to you or fax it to Via Rail (need fax number) or mail to Via rail (need address).

Via Rail

Re: Jean Hoffman Health Status
DOB 1/06/1925

I am the personal care physician for Jean Hoffman. Mrs. Hoffman is a delightful, strong minded individual for whom I have been privileged to care for well over for nearly 30 years.

Mrs. Hoffman lives with her son Louis Hoffman who assists her with taking six prescribed medications, some personal hygiene (including use of compression stockings for recurrent leg clots, accommodations for her hearing impairment that is only partially corrected with hearing aids, and helping to assure safe ambulation and use of her walker. Mrs. Hoffman will require this same personal assistance during her rail trip. She will greatly benefit from having her son Louis Hoffman travel with her.

Please contact me if you have any questions.

Best regards,

William E Neighbor Jr. MD

William E Neighbor Jr., MD)

The reason for a Via Rail Letter:

I need a strong detailed letter.
Reason ... Letter is to be presented in Montreal ticket agent.

I will not be able to have you write a letter or respond to guestion at ticket pickup time.
Thus, a strong documented letter on my elderly condition.

The last time I was on Via Rail i got lost, causing train to be late, as they searched the train and station for me.
I was found in the wrong car.

A good detailed letter with your short version ...Should do just fine.

Referral Question

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	6/25/2015 12:21 PM

Need a Via Rail Letter, Confirming Jeans Health Status:

Companion needed:

Passengers who need assistance in attending to their personal needs (eating, medical care, personal hygiene) during their trip must travel with a companion capable of providing such assistance. The companion travels free in the same class of service.

"To be valid, the letter must describe exactly which of the following personal needs the traveller cannot attend to him/herself:

1).Eating
2). Personal hygiene
3). Medical care (administration of medication, supervision by a nurse, etc.)"

==========
VIA RAIL POLICY
Priority boarding and additional assistance

At many stations, passengers in Sleeper, Touring or Sleeper Touring class and Business class

can enjoy priority boarding. Please check beforehand if your departure station(s) have priority boarding.

Seniors with difficulty walking, passengers with young children, pregnant women and all passengers with reduced mobility may also board the train before other passengers at stations where this is possible.

If you qualify for any one of these categories, please mention this when you book your ticket. Then come to the station early and let station staff know what help you have requested.

Companion needed

Passengers who need assistance in attending to their personal needs (eating, medical care, personal hygiene) during their trip must travel with a companion capable of providing such assistance. The companion travels free in the same class of service.

Where necessary, the companion is expected to assist VIA personnel in boarding and disembarking the passenger and in helping the passenger move about while on board.

To take advantage of this privilege, the special needs traveller must present, for each trip, a valid card from a recognized association or institution for persons with disabilities, or a recent letter dated within the last 9 months (unless the letter states that the condition is permanent) and signed by a physician. Since the escort must be able to take the responsibilities related to such status, the companion must be at least 12 years old.

To be valid, the letter must describe exactly which of the following personal needs the traveller cannot attend to him/herself:

Eating
Personal hygiene
Medical care (administration of medication, supervision by a nurse, etc.)
Children: In cases where a child cannot travel alone, an escort is not allowed. Examples:

Child under the age of 8.
Child ages 8 to 11 on a trip where they are not entitled to travel alone according to our "unaccompanied children" - select to display the contents service (travelling in sleeper or overnight for example).
Visually-, hearing- or speech-impaired travellers

Messages (continued)

We recommend that our visually-impaired clients find out about the services available to them by contacting one of our sales agents by telephone at 1 888 842-7245 or from one of our ticket counters at the station nearest you.

If you are hearing- or speech-impaired, contact us via a teletypewriter (TTY) at 1 800 268-9503 (toll-free).

In most locations where we have personnel, our staff can escort you to the platform, assist you in boarding and disembarking from the train, and help with loading and unloading your baggage. You can even benefit from priority boarding five minutes before regular boarding commences.

Once on board, we will be pleased to give you information on our menus and services. If you like, we can notify you of any schedule changes as well as your arrival at the destination.

To benefit from these services, we suggest that you identify yourself to VIA personnel once you arrive at the station and as soon as you get on board. If you are speech-impaired, please bring written instructions to inform station and on-board personnel of your itineraries, connections and needs.

Clinical Notes

Progress Notes

Neighbor Jr., William E at 4/1/2015 1827

Jeanne Leonie Hoffman is a 90 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow Up Visit

Venous stasis disease

Returns for follow up on small skin break down on left ankle She has been using gauze and uncertain ointment on the area. She stopped using triple antibiotic ointment, appropriately, and as instructed.

Anticoag

Due for INR

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [721.3]	08/30/2013

04/01/2015 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

- Vertebral fracture [805.8] 12/13/2012
  Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed

- Thyroid nodule, uninodular [241.0] 12/13/2012
  CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011.
  5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.

- Osteoporosis, unspecified [733.00] 03/04/2008
  T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
  Began fosamax spring 2008. Continued for five years, then stopped

- Long term (current) use of anticoagulants [V58.61] 01/08/2008
  Reason for anticoagulation: Recurrent dvts
  Duration of anticoagulation: life
  INR goal: 2.-3

- FX FEMUR INTRCAPS NOS-CLOSE [820.00] 05/01/2007
  Pinned April 2007.
  Post op hematocrit 25
  Has walker with wheels for use outside of home. Uses cane in home.

- VITAMIN B DEFICIENCY NOS [266.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

- Other convulsions [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013
  No recurrence

- ESOPHAGEAL REFLUX [530.81] 11/20/2006

04/01/2015 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- Unspecified glaucoma(365.9) [365.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [V70.0] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms

Social History Narrative

Soc Hx.
1/30/2007 Nancy at Helpline House, 282 Knechtel Ave NE, Bainbridge Island , WA 98110 Voice 842-7624, Fax 842.9867, called last week. See RN telephone. Note. The plan is to call Nancy once I have assessed Mrs. Hoffman's needs when I see her at an upcoming visit.

6/15/2010 Grew up on Bainbridge. Both parents from Paris. Spoke French at home and English in Public. She recalls her first clot was in her legs when she was 30. She also developed clot in her arms later. She states her grandmother had the same problem.

William E Neighbor, MD

History

History

Substance Use Topics

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used
- Alcohol Use: No

Objective:

BP 132/65 | Pulse 58 | Temp(Src) 97.4 °F (36.3 °C) (Oral)
Estimated body mass index is 23.24 kg/(m^2) as calculated from the following:
Height as of 2/25/15: 5' 1.5" (1.562 m).
Weight as of 2/25/15: 56.7 kg (125 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 132/65
General: NAD
Extr: Left lower leg. No edema. Skin break down has healed. Still has some dry skin.

INR pending.

Assessment and Plan:

1. DEEP VENOUS PHLEBITIS-LEG NEC

Healed superficial skin breakdown. To prevent future breakdown need to remedy the dry skin. Reviewed with her using topical emollients and moisturizers. She no longer needs to wear gauze.

She is due for INR today.

See me in 1-2 months. As she and son are planing train trip for summer, they needed a letter stating her need for son to accompany her as her care provider.

Letter body:

April 1, 2015

Jeanne Leonie Hoffman

RE: Jeanne Leonie Hoffman
DOB: 1/6/1925
MRN: N3927850

To whom it may concern:

Jean will be taking Canadia Via Rail in August. Due to her age and difficulties with ambulation as well as hearing impairment, she needs to be accompanied by her son. Her son also administered her medications to her.

Sincerely,

Electronically signed by
William E Neighbor, MD

Letters

Letter by Neighbor Jr., William E on 3/23/2015

Status: Sent
Letter body:

March 23, 2015

ATTN: Mary O' Conner, site manager
225 High School Rd NW,
Bainbridge Island, WA 98110

RE: Jeanne Leonie Hoffman
DOB: 1/6/1925

To whom it may concern:

I am the primary care physician for the above individual at University of Washington Medicine Hall Health on the UW campus.

She comes to the UW from Bainbridge Island via ferry and bus. She uses a walker and because of this needs a bus that has a lift. Because of her need for a walker and her marked hearing impairment, she does need her son Louis to accompany her to and from visist. Jean with the help of her son has good knowledge of how to use the transit service to get to and from our office.

Need for Pose Adult Pads.
Due to age associate urine incontinence, Jean needs to purchase Poise Pads of which she uses 3-4 Adult per day. The over the counter cost to her for these pads is $10.90 per week.

We do not send patient information via E mail. I did send the requested information via US mail this afternoon.

William E Neighbor Jr.

Referral Question

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	3/23/2015 11:18 AM

Dear William,

The Rhododendron Apartments, requires a medical statement, concerning Jean's urinary track inconstancy, requiring purchase of "Poise Pads" .
They request a letter confirming the need to purchase such medical supplies, as this is important for her out of pocket cost and rental deductions.
At present the Pads are $10.90 per week, over the counter cost.

Please email oconnorm@kccha.org

Clinical Notes

Progress Notes

Neighbor Jr., William E at 2/25/2015 1146

Jeanne Leonie Hoffman is a 90 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Foot Pain
  left pain

(721.3) DJD (degenerative joint disease) of lumbar spine (primary encounter diagnosis)
PT is helping with back pain due to vertebral compression fractures.

(V58.61) Long term (current) use of anticoagulants
Taking coumadin 5 Mg once daily in the last week. No change in green leafy vegetables or teas.
No bleeding or bruising.

(451.19) DEEP VENOUS PHLEBITIS-LEG NEC

02/25/2015 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Returns to evaluate healing of superficial skin break down left leg. Wears compression stockings.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [721.3]	08/30/2013
• Vertebral fracture [805.8] Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed	12/13/2012
• Thyroid nodule, uninodular [241.0] CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.	12/13/2012
• Osteoporosis, unspecified [733.00] T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continued for five years, then stopped	03/04/2008
• Long term (current) use of anticoagulants [V58.61] Reason for anticoagulation: Recurrent dvts Duration of anticoagulation: life INR goal: 2.-3	01/08/2008
• FX FEMUR INTRCAPS NOS-CLOSE [820.00] Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.	05/01/2007
• VITAMIN B DEFICIENCY NOS [266.9] Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency	05/01/2007
• Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00] Year onset: Dx March 2007 Metformin discontinued 2011 as A1c in target range without it. Diet and weight controlled.	03/27/2007

Tobacco and Alcohol Use:
History
Substance Use Topics

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used
- Alcohol Use: No

Objective:
BP 160/80 | Pulse 69 | Temp(Src) 97.8 °F (36.6 °C) (Oral) | Ht 5' 1.5" (1.562 m) | Wt 56.7 kg (125 lb) | BMI 23.24 kg/m2
Estimated body mass index is 23.24 kg/(m^2) as calculated from the following:
Height as of this encounter: 5' 1.5" (1.562 m).
Weight as of this encounter: 56.7 kg (125 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 160/80
General: NAD
Extr: Left lower leg. Superficial skin break down mid anterolateral leg nearly healed. Single superficial break down left lateral mid foot dorsum healling. Minimal serous exudate in banaide placed early this morning.

INR 3.2

Assessment and Plan:
(721.3) DJD (degenerative joint disease) of lumbar spine (primary encounter diagnosis)
Doing well with PT. Continue to do exercises as directed by PT

02/25/2015 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

(V58.61) Long term (current) use of anticoagulants
INR 3.2. Stable compared to one week ago. Her INR had been below 2, unexplained. I corrected her with an extra half tab a couple of weeks ago and then was planning on having her continue an extra half tab once weekly on Fridays. However, INR has bumped up to 3.2. She should return to her usual dose of just one tab of coumadin (5 mg) daily. Over time this has proven the correct dose for her though there have been times when her INR has been unexplainably low or high. Sometimes this has been due to missing doses, sometimes probably related to diet changes, but often unexplained. Recheck in 3-4 weeks.

(451.19) DEEP VENOUS PHLEBITIS-LEG NEC
Superficial skin breakdown improving andr resolving. Would like her to use vaseline intensive care for skin moisturizing.

Progress Notes

Caraig, Emmanuel B at 2/17/2015 1359

Physical Therapy Progress Note.

Time in: 11:30 AM
Duration: 30 minutes.
Today's date: 2/3/2015

Referring Provider: William E Neighbor Jr. Referring provider NPI: 1265518989
Treatment/Therapy diagnosis: degenerative joint disease of the lumbar spine, chronic history of spine fractures
The following patient identifiers were confirmed today: name and date of birth.

Subjective: She did better with communication today and the patient had her hearing aids. The patient is reporting 5/10 level of pain, on a 0-10 Numeric Pain Distress Scale.

Observation: She is able to ambulate from the waiting room into the clinic using a straight cane independently and did not want any assistance getting up out of a chair.

Interventions/Treatment provided: Therapeutic exercise for 30 minutes:

02/17/2015 - Office Visit in UW Medical Center Roosevelt Exercise Training Center (continued)

Clinical Notes (continued)

Knee to chest with assistance from the **ball and a pillow.**
Hip external rotation. 15 repetitions, 2 sets performed
Side-lying hip extension.15 repetitions, 2 sets performed
side-lying Knee flexion for quadricep muscle stretching.
Hamstring active assisted stretch.
Supine bridging.
Supine hip circles with the knee flexed to 90°, clockwise, 10 times; counterclockwise, 10 times.

Patient's response to therapy: Jeanne was able to perform all the exercises with the assistance from the physical therapist.

Education and instruction: verbal instructions and demonstrations were provided for the above exercises.

Progress towards goals:

IMPAIRMENTS	FUNCTIONAL DEFICITS	LONG TERM GOALS
1.weakness of the trunk and lower extremity muscles.	1.the patient is unable to walk for up and down one flight of stairs without assistance.	1. The patient will be able to walk up and down one flight of stairs using a railing for support by April 1, 2015.**- She is not able to walk up and down stairs yet. 1-22-2015.**
2. Lower extremity flexibility issues, including joint mobility dysfunction, on both hips and knees, tissue extensibility dysfunction of the lower extremity muscles.	2. The patient is able to address her flexibility issues because of limited knowledge of proper exercise parameters and techniques.	2. The patient will be able to perform assisted exercises for regaining flexibility around both hips, both knees by February 20, 2015. **-She is working on the home program with her son. 1-22-2015.**

Any changes in impairment: She did have improved ability to walk a longer distance.

Functional impairment remaining requiring continued skilled services: Jeanne is working on the above exercise program in order to reach the goals of walking up and down stairs and increasing her range of motion to be able to

02/17/2015 - Office Visit in UW Medical Center Roosevelt Exercise Training Center (continued)

Clinical Notes (continued)

increase her endurance.

Any changes in the plan of care: Continue 4 more sessions of physical therapy to assist her son with exercises to assist the patient with range of motion and stretching for the lower extremities and trunk. Continue to work on flexibility exercises for the lower extremities with her son's assistance. We again do not expect the patient to be independent with exercise program, given that she cannot hear very well, nor does she seem to remember or understand the purpose of the exercises.

Clinical Notes

Progress Notes

Neighbor Jr., William E at 2/11/2015 1222

Jeanne Leonie Hoffman is a 90 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Other

  leg examinatiom; general office visit

(V58.61) AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
Returns for INR today.

(451.19) DEEP VENOUS PHLEBITIS-LEG NEC
Returns for follow up of skin break down left lower leg. Has been dressing daily.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine	08/30/2013

[721.3]

- Vertebral fracture [805.8] 12/13/2012
  Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed

- Thyroid nodule, uninodular [241.0] 12/13/2012
  CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011.
  5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.

- Osteoporosis, unspecified [733.00] 03/04/2008
  T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
  Began fosamax spring 2008. Continued for five years, then stopped

- Long term (current) use of anticoagulants [V58.61] 01/08/2008
  Reason for anticoagulation: Recurrent dvts
  Duration of anticoagulation: life
  INR goal: 2.-3

- FX FEMUR INTRCAPS NOS-CLOSE [820.00] 05/01/2007
  Pinned April 2007.
  Post op hematocrit 25
  Has walker with wheels for use outside of home. Uses cane in home.

- VITAMIN B DEFICIENCY NOS [266.9] 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

- Other convulsions [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013
  No recurrence

02/11/2015 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- Unspecified glaucoma(365.9) [365.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [V70.0] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: yes
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

- Other physical therapy [V57.1] 01/22/2015
- Hip joint stiffness [719.55] 01/06/2015
- Leg weakness, bilateral [729.89] 01/06/2015
- Weakness of trunk musculature [728.87] 01/06/2015
- Pseudophakia, both eyes [V43.1] 11/08/2014
- Urine incontinence [788.30] 08/27/2014
  Uses pads

Social History Narrative

Soc Hx.
1/30/2007 Nancy at Helpline House, 282 Knechtel Ave NE, Bainbridge Island , WA 98110 Voice 842-7624, Fax 842.9867, called last week. See RN telephone. Note. The plan is to call Nancy once I have assessed Mrs. Hoffman's needs when I see her at an upcoming visit.

6/15/2010 Grew up on Bainbridge. Both parents from Paris. Spoke French at home and English in Public. She recalls her first clot was in her legs when she was 30. She also developed clot in her arms later. She states her grandmother had the same problem.

William E Neighbor, MD

History
Sexual Activity

- Sexual Activity: Not on file

Tobacco and Alcohol Use:
History
Substance Use Topics

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used
- Alcohol Use: No

Review of Systems:
No fever, chills, sweats
No unexpected leg pain

Objective:
BP 166/75 | Pulse 60 | Temp(Src) 96.8 °F (36 °C) (Oral)
Estimated body mass index is 23.03 kg/(m^2) as calculated from the following:
Height as of 7/30/14: 5' 1.02" (1.55 m).
Weight as of 7/30/14: 55.339 kg (122 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 166/75
General: NAD. Son present today
Left leg: Two small superfiicial areas of skin breakdown on dorsal lateral left foot without infection and one area on anterolateral lower leg which is very superficial. Redness on shin area present two weeks ago healed.

INR 1.8 today

Assessment and Plan:
(V58.61) AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
Inadequate anticoagulation. See instructions for change in dose. Refill provided. See me in two weeks.

02/11/2015 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Plan: Warfarin Sodium (COUMADIN) 5 MG Oral Tab

(451.19) DEEP VENOUS PHLEBITIS-LEG NEC
Superficial skin breakdown. Will be slow to heal but see no signs that it will not. Redressed today with gauze. The redness on the shin for which she used HC cream has resolved so she can stop using that cream. May use small amount of triple antibiotic ointment if she likes.
Plan: Warfarin Sodium (COUMADIN) 5 MG Oral Tab

ADVANCE BENEFICIARY NOTICE OF NONCOVERAGE (ABN)

***NOTE*: If Medicare doesn't pay for _____ below, you may have to pay.**

Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the _____ below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost:
Code _____ Description: office visit	**Check reason code (see back)** A ☐ B ☒ C ☐ D ☐	$75 - $450

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the _____ listed above.

Note: If you choose Options 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

Options: **Check only one box. We cannot choose a box for you.**

☒ **OPTION 1**. I want the _____ listed above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I am responsible for payment, but **I can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2**. I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3**. I don't want the _____ listed above. I understand with this choice I am not responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional information:

Clinical Notes

Progress Notes

Caraig, Emmanuel B at 2/3/2015 2017

Physical Therapy Progress Note.

Time in: 11:30 AM
Duration: 30 minutes.
Today's date: 2/3/2015

Referring Provider: William E Neighbor Jr. Referring provider NPI: 1265518989
Treatment/Therapy diagnosis: degenerative joint disease of the lumbar spine, chronic history of spine fractures
The following patient identifiers were confirmed today: name and date of birth.

Subjective: She did better with communication today if I looked right at her and was really close to her ears she could understand simple commands. The patient is reporting 5/10 level of pain, on a 0-10 Numeric Pain Distress Scale. After the treatment she did have a better time with hip mobility.

Observation: She is able to ambulate from the waiting room into the clinic using a 4 wheeled walker independently and did not want any assistance getting up out of a chair.

Interventions/Treatment provided: Therapeutic exercise for 30 minutes:

Continued assisting her son with supine lower extremity stretching including;

Knee to chest with assistance from the **ball and a pillow.**
Hip external rotation.
Side-lying hip extension.
Knee flexion for quadricep muscle stretching.
Hamstring active assisted stretch.
Sidelying hip abduction. Supine bridging.

Patient's response to therapy: Jeanne was able to with the assistance of her son perform all of the above exercises.

Education and instruction: verbal instructions and demonstrations were provided for the above exercises. The patient's son was present to assist her with the exercises. She forgot her hearing aid at home.

Progress towards goals:

IMPAIRMENTS	FUNCTIONAL DEFICITS	LONG TERM GOALS
1.weakness of the trunk and lower extremity muscles.	1.the patient is unable to walk for up and down one flight of stairs without assistance.	1. The patient will be able to walk up and down one flight of stairs using a railing for support by April 1, 2015.**- She is not able to walk up and down stairs yet. 1-22-2015.**
2. Lower extremity flexibility issues, including joint mobility dysfunction, on both hips and knees, tissue extensibility dysfunction of the lower extremity muscles.	2. The patient is able to address her flexibility issues because of limited knowledge of proper exercise parameters and techniques.	2. The patient will be able to perform assisted exercises for regaining flexibility around both hips, both knees by February 20, 2015. **-She is working on the home program with her son. 1-22-2015.**

02/03/2015 - Office Visit in UW Medical Center Roosevelt Exercise Training Center (continued)

Clinical Notes (continued)

Any changes in impairment: She did have improved ability to walk a longer distance.

Functional impairment remaining requiring continued skilled services: Jeanne is working on the above exercise program in order to reach the goals of walking up and down stairs and increasing her range of motion to be able to increase her endurance.

Any changes in the plan of care: Continue 5 more sessions of physical therapy to assist her son with exercises to assist the patient with range of motion and stretching for the lower extremities and trunk. Continue to work on flexibility exercises for the lower extremities with her son's assistance. We again do not expect the patient to be independent with exercise program, given that she cannot hear very well, nor does she seem to understand the purpose of the exercises.

This patient will be seen for 6 therapy sessions within 12 weeks.
The patient And her son will perform the instructed home program 2 times per day.
The therapy will include therapeutic exercise, therapeutic activities and self-care home management training
This patient will recheck with the referring provider in 12 weeks.

Progress Notes

Neighbor Jr., William E at 1/28/2015 1217

Jeanne Leonie Hoffman is a 90 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Wound Check

(459.81) Venous insufficiency of leg (primary encounter diagnosis)
Skin break down left lateral ankle in the last week with three areas than weep serous fluid. No redness no swelling. She though has in the last day had an area of redness over the shin with itching. For treatment she has been using dry dressing with paper tape. She denies swelling of leg. Denies fever, chills, sweats. Activity: She has been walking a lot on her feetl

(451.19) DEEP VENOUS PHLEBITIS-LEG NEC
(V58.61) Long term (current) use of anticoagulants
In for INR. Her INR had been low. She thinks was because missed a dose. I had her increase the dose. No

bleeding. In for INR today.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [721.3]	08/30/2013
• Vertebral fracture [805.8] Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed	12/13/2012
• Thyroid nodule, uninodular [241.0] CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.	12/13/2012
• Osteoporosis, unspecified [733.00] T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continued for five years, then stopped	03/04/2008
• Long term (current) use of anticoagulants [V58.61] Reason for anticoagulation: Recurrent dvts Duration of anticoagulation: life INR goal: 2.-3	01/08/2008
• FX FEMUR INTRCAPS NOS-CLOSE [820.00] Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.	05/01/2007
• VITAMIN B DEFICIENCY NOS [266.9] Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency	05/01/2007
• Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00] Year onset: Dx March 2007 Metformin discontinued 2011 as A1c in target range without it. Diet and weight controlled.	03/27/2007

01/28/2015 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

- Other convulsions [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013
  No recurrence

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- Unspecified glaucoma(365.9) [365.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.

Social history:

History

Social History Narrative

Soc Hx.
1/30/2007 Nancy at Helpline House, 282 Knechtel Ave NE, Bainbridge Island , WA 98110 Voice 842-7624, Fax 842.9867, called last week. See RN telephone. Note. The plan is to call Nancy once I have assessed Mrs. Hoffman's needs when I see her at an upcoming visit.

6/15/2010 Grew up on Bainbridge. Both parents from Paris. Spoke French at home and English in Public. She recalls her first clot was in her legs when she was 30. She also developed clot in her arms later. She states her grandmother had the same problem.

Review of Systems:

Objective:

BP 171/75 | Pulse 66 | Temp(Src) 98.1 °F (36.7 °C)
Estimated body mass index is 23.03 kg/(m^2) as calculated from the following:
Height as of 7/30/14: 5' 1.02" (1.55 m).
Weight as of 7/30/14: 55.339 kg (122 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 171/75
General: NAD. Has hearing aids in today so can hear me.
Left lower leg. No swelling. She has on lateral aspect of left foot below ankle three small 3 mm areas of skin break down which are superficial without redness. In the pretibial area there is some redness without skin breakdown. No edema. Capillary refill fine.

Assessment and Plan:

(459.81) Venous insufficiency of leg (primary encounter diagnosis)
Two small superficial areas of skin breakdown on left foot lateral aspect just below ankle. Area of redness over shin.

01/28/2015 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Plan is to use triple antibiotic ointment with bandaid over the area just below the ankle. For the area on the shin advise hydrocortisone cream or benadryl cream to help with the itching. She may also use topical emollient to help with skin driness which her son says is an issue. Her INR is now in the therapeutic range. I did tell her to rest and raise foot for 30 minutes several times a day. See me in 1 week or sooner if does not improve.

(V65.49) Vaccine counseling
Due of pneumonia booster shot today.
Plan: pneumococcal (Prevnar 13) conjugate vacc
(adult) 0.5 mL IM - 90670

(451.19) DEEP VENOUS PHLEBITIS-LEG NE
(V58.61) Long term (current) use of anticoagulants
INR 2.8 today in the therapeutic range. She usually keeps INR in that range with one tab of coumadin (warfarin) daily. Will stay with that.

She should see me in one week if skin not improving. Otherwise as needed but definitely in one month.

William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	1/26/2015 2:29 PM

Last Read in MyChart
1/27/2015 6:11 PM by Hoffman, Jeanne Leonie

Please come in if this does not heal quickly or worsens.

William E Neighbor, MD

Medical Advice

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	1/23/2015 6:09 AM

I have a sore on my foot/appears to be ulcer like.
Keeping wound clean and bandaged.

01/22/2015 - Office Visit in UW Medical Center Roosevelt Exercise Training Center

Reason for Visit

Chief complaint: Physical Therapy
Visit diagnoses:

- Weakness of trunk musculature (primary)
- Hip joint stiffness, unspecified laterality
- Spine fracture
- Other physical therapy

Clinical Notes

Progress Notes

Wilson, Marni L at 1/22/2015 1314

Physical Therapy Progress Note.

Time in: 1:15 p.m.
Duration: 30 minutes.
Today's date: 1/22/2015.
Onset date: 12/24/2015.
Referring Provider: William E Neighbor Jr. Referring provider NPI: 1265518989
Treatment/Therapy diagnosis: degenerative joint disease of the lumbar spine, chronic history of spine fractures
The following patient identifiers were confirmed today: name and date of birth.

Subjective: She did better with communication today if I looked right at her and was really close to her ears she could understand simple commands. The patient is reporting 5/10 level of pain, on a 0-10 Numeric Pain Distress Scale. After the treatment she did have a better time with hip mobility.

Observation: She is able to ambulate from the waiting room into the clinic using a 4 wheeled walker independently and did not want any assistance getting up out of a chair.

Interventions/Treatment provided: Therapeutic exercise for 30 minutes:

Continued assisting her son with supine lower extremity stretching including;

Knee to chest with assistance from the **ball and a pillow.**
Hip external rotation.
Side-lying hip extension.
Knee flexion for quadricep muscle stretching.
Hamstring active assisted stretch.
They are doing this home program together at least one time a day.

Patient's response to therapy: Jeanne was able to with the assistance of her son perform all of the above exercises. She did need cueing to release tension in her hips and to go with the movement versus resist it. We talked about not using the word relax as she finds resistance to it. Stating that she has never been able to relax and then she tenses up even more.

Education and instruction: verbal instructions and demonstrations were provided for the above exercises. The patient's son was present to assist her with the exercises.

Progress towards goals:

IMPAIRMENTS	FUNCTIONAL DEFICITS	LONG TERM GOALS
1.weakness of the trunk and lower extremity muscles.	1.the patient is unable to walk for up and down one flight of stairs without assistance.	1. The patient will be able to walk up and down one flight of stairs using a railing for support by April 1, 2015.**-She is not able to walk up and down stairs yet. 1-22-2015.**
2. Lower extremity flexibility issues, including joint mobility dysfunction, on both hips and knees, tissue extensibility dysfunction of the lower extremity muscles.	2. The patient is able to address her flexibility issues because of limited knowledge of proper exercise parameters and techniques.	2. The patient will be able to perform assisted exercises for regaining flexibility around both hips, both knees by February 20, 2015. **- She is working on the home program with her son. 1-22-2015.**

Any changes in impairment: She did have improved ability to walk a longer distance.

Functional impairment remaining requiring continued skilled services: Jeanne is working on the above exercise program in order to reach the goals of walking up and down stairs and increasing her range of motion to be able to increase her endurance.

Any changes in the plan of care: Continue 5 more sessions of physical therapy to assist her son with exercises to assist the patient with range of motion and stretching for the lower extremities and trunk. Continue to work on flexibility exercises for the lower extremities with her son's assistance. We again do not expect the patient to be independent

01/22/2015 - Office Visit in UW Medical Center Roosevelt Exercise Training Center (continued)

Clinical Notes (continued)

with exercise program, given that she cannot hear very well, nor does she seem to understand the purpose of the exercises.

This patient will be seen for 6 therapy sessions within 12 weeks.
The patient And her son will perform the instructed home program 2 times per day.
The therapy will include therapeutic exercise, therapeutic activities and self-care home management training
This patient will recheck with the referring provider in 12 weeks.

Marni L Wilson, P.T.A.

Progress Notes

Caraig, Emmanuel B at 1/6/2015 1423

Physical Therapy Evaluation

This note serves as a CMS evaluation form that requires the referring provider to certify the need for therapy services furnished under this Plan of Treatment. The signing provider is certifying the plan of care.

Certification: From 1/6/2015 through 4/3/2050
Report Date: From: 1/6/2015 through 2/5/2015

Time in:12:00 PM Duration: 60 minutes
Today's date: 1/6/2015
Onset date: 12/24/2015
Referring Provider: William E Neighbor Jr. Referring provider NPI: 1265518989

Treatment/Therapy diagnosis: degenerative joint disease of the lumbar spine, chronic history of spine fractures
The following patient identifiers were confirmed today: name and date of birth.

01/06/2015 - Office Visit in UW Medical Center Roosevelt Exercise Training Center (continued)

Clinical Notes (continued)

Order: evaluate and treat, would benefit from core strengthening, and postural exercises.,
Initial assessment:
Reason for referral: patient is a 90-year-old female coming in to physical therapy for postural exercises and core strengthening, with a long-standing history of compression fractures of the spine, left-sided hip fracture with ORIF on the left side and femoral fracture on the right side. The patient also recalls of ankle fracture on the right side from several years ago. The patient is coming in with a history of deconditioning and weakness of the trunk muscles. The patient also presents with tissue extensibility dysfunction of the lower extremity, joint mobility, dysfunction of both hips and knees from DJD.

The patient is hard of hearing and does not have a properly working hearing aid. Even when her son tries to speak directly into her ear, the patient does not appear to hear questions or instructions. She is able to follow instructions provided to her with hand gestures. The patient is also on chronic Coumadin for thrombophlebitis.

At this time, the patient will benefit from followup with physical therapy providing her son with exercise , instruction on lower extremity flexibility using active assisted joint range of motion exercises, active assistive stretching exercises for the hamstrings, hip rotators, quadriceps, ankle, plantar flexors and dorsiflexors. The patient will also benefit from some basic core strengthening exercises, although instructions for this will be especially challenging since the patient isn't able to hear any verbal instructions provided to her. The main focus for the next few sessions as for her son to get instructions on proper exercises for range of motion and flexibility, So that follow-through on home exercise program can be consistent

Subjective: the patient reports that she cannot hear questions or instructions even when I spoke in a loud voice directly to either ear.

The patient's son , answered some questions for the patient. The patient is reporting 5/10 level of pain, on a 0-10 Numeric Pain Distress Scale.

IMPAIRMENTS	FUNCTIONAL DEFICITS	LONG TERM GOALS
1.weakness of the trunk and lower extremity muscles	1.the patient is unable to walk for up and down one flight of stairs without assistance	1.the patient will be able to walk up and down one flight of stairs using a railing for support by April 1, 2015
2. Lower extremity flexibility issues, , including joint mobility dysfunction, on both hips and knees, tissue extensibility dysfunction of the lower extremity muscles	2. The patient is able to address her flexibility issues because of limited knowledge of proper exercise parameters and techniques	2.the patient will be able to perform assisted exercises for regaining flexibility around both hips, both knees by February 20, 2015

Barriers to learning: hearing and cognitive

Preferred Learning style: demonstration, written, verbal and her son will need to be present for exercise instruction as the patient is not anticipated to become independent with her home exercises

Past Medical History

Diagnosis	Date
• Impaired fasting glucose	3/22/2007
• Carpal tunnel syndrome	11/20/2006

Carpal tunnel release right wrist in 1989

- DIAPHRAGMATIC HERNIA 11/20/2006
  CT of abdomen in 2006

No past surgical history on file.

Previous interventions: none

Fall Risk: The patient has a moderate risk for falls and this note will be forwarded to the referring physician.

Prior Level of Function: Before the onset of the current condition, the patient was able to walk with a cane at a community level. The patient was able to walk up and down one flight of stairs.
Level of function at start of care: Currently, the patient is unable to walk with a cane, and is dependent on a 4 wheeled walker. She is able to walk up and down stairs independently. She is a

FUNCTIONAL REPORTING

MOBILITY: Walking and moving around
Current Status: G8978: Based on Care connections cautioned on intake form, the patient has a severity code of CK, with an impairment rating of percent. The patient presents with difficulty ambulating stairs and on indoor and community level. She is unable to perform exercises for range of motion consistently
Goal: G8979: CJ

Cultural Practices that Influence Care: the patient is dependent on her son for transportation and assistance for home activities. Her reports that the patient had been verbally abused by her other son who used to stay with her.

Objective:
Observation: she is able to ambulate from the waiting room into the clinic using a 4 wheeled walker independently.
Impairments:

Range of motion:

	Right	Left
Hip flexion	Active:105 ° Passive: 110 °	Active:105 ° Passive: 110 °
Hip extension	Active:-5 ° Passive: zero °	Active:-5 ° Passive: zero °
Hip external rotation	Active:20 ° Passive: 30 °	Active:20 ° Passive: 30 °
Hip Internal rotation	not tested	Not tested
Straight Leg Raise	Active:35 ° Passive: 45 °	Active:35 ° Passive: 45 °
Prone knee flexion	Active:75 ° Passive: 80 °	Active75 ° Passive: 80 °

It is difficult to determine whether the patient completely understands the purpose of the range of motion exercises

Muscle Strength: 3+/5 hip abduction, hip flexion, quadriceps. 3-/5 hip extension, hamstrings

Special tests: chair sit to stand: Within 30 seconds: 5 repetitions with the patient using both hands, transfers from supine to side-lying: The patient has a difficult time with the maneuver, , but it is unclear whether she understands the instructions.

Interventions/Treatment provided: Therapeutic exercise for 15 minutes and Physical Therapy evaluation for 30 minutes. Therapeutic exercise: This included teaching the patient's son, was present during the treatment session

01/06/2015 - Office Visit in UW Medical Center Roosevelt Exercise Training Center (continued)

Clinical Notes (continued)

today to assist the patient with supine lower extremity stretching, this includes knee to chest, hip external rotation, side-lying hip extension, knee flexion for quadricep muscle stretching. Hamstring active assisted stretch

Home exercise instruction: verbal instructions and demonstrations were provided for the above exercises
The patient's son was present to assist with patient education
the patient's son was able to return demonstrate the exercises accurately after instructions
The patient's son was able to communicate understanding of the instructions and precautions.

Plan of care: the patient will followup with 6sessions of physical therapy to assist her son with exercises to assist the patient with range of motion and stretching for the lower extremities and trunk. The patient has compression fractures of the trunk eye and not anticipating extensive improvement in her posture is given This. I anticipated the patient will benefit from flexibility exercises for the lower extremities, if her son can perform this with her at home on a consistent basis. I do not expect the patient to be independent with exercise program, given that she cannot hear very well, nor does she seem to understand the purpose of the exercises
This patient will be seen for 6 therapy sessions within12weeks.
The patient And her son will perform the instructed home program 2 times per day.
The therapy will include therapeutic exercise, therapeutic activities and self-care home management training
This patient will recheck with the referring provider in 12 weeks.

ASSESSMENT: Rehabilitation potential is: Fair
These goals were discussed and the patient's son actively participated in developing them. The patient's family/caregiver assisted in the development of these goals.
This patient will be seen by a physical therapist or a physical therapist assistant following this plan of care.

Instructions: Vitamin B12 500 mcg once daily over the counter
Entered by: Neighbor Jr., William E, MD
Entered on: 2/21/2014
Start date: 2/21/2014
End date: 6/7/2018

Losartan Potassium 25 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 3/31/2016
Reason for discontinuation: Reorder
Instructions: One half tablet daily
Authorized by: Neighbor Jr., William E, MD
Ordered on: 7/29/2015
Start date: 7/29/2015
End date: 3/31/2016
Quantity: 45 tablet
Refill: 3

Pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 6/2/2016
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 7/29/2015
Start date: 7/29/2015
End date: 6/2/2016
Quantity: 270 tablet
Refill: 0

Timolol Maleate 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 3/7/2016
Reason for discontinuation: Reorder
Instructions: Place 1 drop in each EYE 2 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/18/2015
Start date: 12/18/2015
End date: 3/7/2016
Quantity: 5 mL
Refill: 1

Atorvastatin Calcium 20 MG Oral Tab

01/06/2015 - Orders Only in Hall Health Primary Care Center (continued)

Medication List (continued)

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 3/31/2016
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (20 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/18/2015
Start date: 12/18/2015
End date: 3/31/2016
Quantity: 30 tablet
Refill: 2

Warfarin Sodium (COUMADIN) 5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 5/27/2016
Reason for discontinuation: Reorder
Instructions: 1 TAB PO ONCE each evening
Authorized by: Neighbor Jr., William E, MD
Ordered on: 1/6/2016
Start date: 1/6/2016
End date: 5/27/2016
Quantity: 90 tablet
Refill: 0

Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/29/2016
Reason for discontinuation: Reorder
Instructions: one po once daily for arthritic pain as needed
Authorized by: Neighbor Jr., William E, MD
Ordered on: 1/6/2016
Start date: 1/6/2016
End date: 4/28/2016
Quantity: 20 tablet

Progress Notes

Neighbor Jr., William E at 12/24/2014 1314

Jeanne Leonie Hoffman is a 89 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Results
  abnormal labs

(V58.61) AFTERCARE LONG TERM ANTICOAG USE (primary encounter diagnosis)
Stable dose of coumadin. In for INR.

(451.19) DEEP VENOUS PHLEBITIS-LEG NEC
Wearing compression stockings.

(721.3) DJD (degenerative joint disease) of lumbar spine
Continues to need codeine several times weekly for back pain related to old compression fracture.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [721.3]	08/30/2013
• Vertebral fracture [805.8] Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed	12/13/2012
• Thyroid nodule, uninodular [241.0] CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.	12/13/2012
• Osteoporosis, unspecified [733.00] T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continued for five years, then stopped	03/04/2008
• Long term (current) use of anticoagulants [V58.61] Reason for anticoagulation: Recurrent dvts Duration of anticoagulation: life INR goal: 2.-3	01/08/2008
• FX FEMUR INTRCAPS NOS-CLOSE [820.00] Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.	05/01/2007
• VITAMIN B DEFICIENCY NOS [266.9] Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency	05/01/2007
• Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00] Year onset: Dx March 2007 Metformin discontinued 2011 as A1c in target range without it. Diet and weight controlled.	03/27/2007

12/24/2014 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

- Other convulsions [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013
  No recurrence

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- Unspecified glaucoma(365.9) [365.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [V70.0] 11/20/2006

Social History Narrative

Soc Hx.
1/30/2007 Nancy at Helpline House, 282 Knechtel Ave NE, Bainbridge Island , WA 98110 Voice 842-7624, Fax 842.9867, called last week. See RN telephone. Note. The plan is to call Nancy once I have assessed Mrs. Hoffman's needs when I see her at an upcoming visit.

6/15/2010 Grew up on Bainbridge. Both parents from Paris. Spoke French at home and English in Public. She recalls her first clot was in her legs when she was 30. She also developed clot in her arms later. She states her grandmother had the same problem.

Review of Systems:

Objective:
BP 155/72 | Pulse 59 | Temp(Src) 97.8 °F (36.6 °C)
Estimated body mass index is 23.03 kg/(m^2) as calculated from the following:
Height as of 7/30/14: 5' 1.02" (1.55 m).
Weight as of 7/30/14: 55.339 kg (122 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 155/72
General: NAD
Difficult understanding what I am saying as she did not bring in hearing aids. Son present.

Assessment and Plan:
1. HYPERLIPIDEMIA NEC/NOS
Continue lipid medication
- Atorvastatin Calcium 40 MG Oral Tab; Take 1 tablet (40 mg) by mouth daily. Dispense: 90 tablet; Refill: 3

2. AFTERCARE LONG TERM ANTICOAG USE

Clinical Notes (continued)

INR in desired range. Continue same dose.
- Warfarin Sodium (COUMADIN) 5 MG Oral Tab; 1 TAB PO ONCE each evening Dispense: 30 tablet; Refill: 6

3. DEEP VENOUS PHLEBITIS-LEG NEC
As above
- Warfarin Sodium (COUMADIN) 5 MG Oral Tab; 1 TAB PO ONCE each evening Dispense: 30 tablet; Refill: 6

4. DJD (degenerative joint disease) of lumbar spine
She is taking Tylenol with Codeine just one half to one daily when needed. We want to avoid NSAIDs because of GI bleed risk in this patient who is on coumadin. I would be concerned about risk of falls with Tramadol. She does take acetaminophen as the main stay but several times weekly needs the codeine for the back pain related to old compression fractures. I completed a referral to PT at Roosevelt today.
- Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab; one po once daily for arthritic pain as needed Dispense: 30 tablet; Refill: 3
- REFERRAL TO PHYSICAL THERAPY

5. Vaccine counseling
Flu vaccine given.
- influenza vaccine quadrivalent PF (adult) 0.5 mL IM - 90686

She did not have hearing aids today, but son was with her.

Greig, Elaine M at 12/24/2014 1424

HH Vaccine Screening Questions
(MAs -if yes to any question, consult w/ provider before administering vaccine)

1. Is the patient sick today? NO

2. Is the patient < 18 yrs of age? NO (if yes, parent/guardian must be present to give consent)

3. Does the patient have allergies to foods (including eggs), latex, or any known vaccine component? No

4. Is the patient pregnant or planning to become pregnant in the next month? No

5. Is Influenza vaccine being given today? Yes : Additional influenza questions
Has the patient ever had Guillain-Barre syndrome? NO (if yes, consult with provider)

RN giving Influenza vaccine? Yes: RN Flu questions
Is the patient going to get Flu Mist? No

12/24/2014 - Office Visit in Hall Health Primary Care Center (continued)

Clinical Notes (continued)

Is the patient older than 6 mos and less than 36 mos of age? NO (Use PF 0.25 VFC vaccine only)

Is the patient older than 6 mos and less than 9 yrs old? NO (Make sure that the child has had or will be set up to have 2 doses at least 4 weeks apart of an H1N1-containing vaccine within one flu season)

Is the patient a candidate for high-dose flu, intradermal flu, or PF(pregnant only)? NO

6. Has the patient received any vaccinations in the past 4 weeks? NO

7. Are any live vaccines being given today? No

Vaccine(s) being given today: Influenza (preservative free, > 36 mos)

Has patient or guardian given consent and received the corresponding VIS statements? YES

VFC vaccines given? NO (if yes, list Native American/Alaskan Native;Medicaid;Uninsured;Private/Commercial Insurance;Insured[admin fee not covered])

Adolescents are encouraged to wait 15 minutes before leavingnafter receiving any vaccine.

ADVANCE BENEFICIARY NOTICE OF NONCOVERAGE (ABN)

***NOTE*: If Medicare doesn't pay for** Office Visit **below, you may have to pay.**

Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the _____ below.

Items or Services	Reason Medicare May Not Pay:	Estimated Cost:
Code _____ Description: Office Visit & all related SVC	**Check reason code (see back)** A ☐ B ☒ C ☐ D ☐	$300-500

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the _____ listed above.

Note: If you choose Options 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

Options: Check only one box. We cannot choose a box for you.

☒ **OPTION 1**. I want the Visit listed above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn't pay, I am responsible for payment, but **I can appeal to Medicare** by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.

☐ **OPTION 2**. I want the _____ listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. **I cannot appeal if Medicare is not billed.**

☐ **OPTION 3**. I don't want the _____ listed above. I understand with this choice I am not responsible for payment, and **I cannot appeal to see if Medicare would pay.**

Additional information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call **1-800-Medicare** (1-800-633-4227/**TTY**: 1-877-486-2048). Signing below means that you have received and understand this notice. You also receive a copy.

Washington State Health Care Authority

Agreement to Pay for Healthcare Services

N3927850

WAC 182-502-0160 ("Billing a Client")

This is an agreement between a "client" and a "provider," as defined below. The client agrees to pay the provider for healthcare service(s) that the Health Care Authority (HCA) will not pay. Both parties must sign this Agreement. For the purposes of this Agreement, "services" include but are not limited to healthcare treatment, equipment, supplies, and medications.

Client - A recipient of Medicaid or other healthcare benefits through the HCA or a managed care organization (MCO) that contracts with the HCA.
Provider - An institution, agency, business, or person that provides healthcare services to HCA clients and has a signed agreement with the HCA or authorization from an MCO.

This Agreement and WAC 182-502-0160 apply to billing a client for covered and noncovered services as described in WAC 182-501-0050 through WAC 182-501-0070. Providers may not bill any HCA client (including those enrolled with an MCO that contracts with the HCA) for services which the HCA or an MCO that contracts with the HCA may have paid until the provider has completed all requirements for obtaining authorization.

CLIENT'S PRINTED NAME	CLIENT'S ID NUMBER
Hoffman, Jeanne	100675002WA
PROVIDER'S PRINTED NAME	PROVIDER NUMBER
Neighbor, WILLIAM	1265518989

Directions:

- Both the provider and the client must fully complete this form **before** an HCA client receives any service for which this Agreement is required.
- You must complete this form no more than 90 calendar days before the date of the service. If the service is not provided within 90 calendar days, the provider and client must complete and sign a new form.
- The provider and the client must complete this form only **after** they exhaust all applicable HCA or HCA-contracted MCO processes which are necessary to obtain authorization for the requested service(s). These may include the exception to rule (ETR) process for noncovered services as described in WAC 182-501-0160 or the administrative hearing process, if the client chooses to pursue these processes.
- Limited English proficient (LEP) clients must be able to understand this form in their primary language. This may include a translated form or interpretation of the form. If the form is interpreted for the client, the interpreter must also sign and date the form. Both the client and the provider must sign a translated form.

Fully complete the table on back of this form. If needed, attach another sheet for additional services. The client, provider, and interpreter (if applicable) must sign and date each additional page.

Important Note from HCA:

- This agreement is void and unenforceable if the provider fails to comply with the requirements of this form and WAC 182-502-0160 or does not satisfy HCA conditions of payment as described in applicable Washington Administrative Code (WAC) and Billing Instructions. The provider must reimburse the client for the full amount paid by the client.
- See WAC 182-502-0160(9) for a list of services that cannot be billed to a client, regardless of a written agreement.
- Keep the original agreement in the client's medical record for 6 years from the date this agreement is signed. Give a copy of this completed, signed agreement to the client.
- Providers are responsible for ensuring that translation or interpretation of this form and its content is provided to LEP clients. Translated forms are available at http://hrsa.dshs.wa.gov/mpforms.shtml.

AGREEMENT TO PAY FOR HEALTHCARE SERVICES

- I understand that HCA or an MCO that contracts with HCA will not pay for the specific service(s) being requested for one of the following reasons, as indicated in the above table: 1) HCA does not cover the service(s); 2) the service(s) was denied as not medically necessary for me, or 3) the service(s) is covered but the type I requested is not.
- I understand that I can, but may choose not to: 1) ask for an Exception to Rule (ETR) after an HCA or HCA-contracted MCO denial of a request for a noncovered service; 2) submit a Non-Formulary Justification (NFJ) with the help of my prescriber fro a non-formulary medication; or 3) ask for a hearing to appeal an HCA or HCA-contracted MCO denial of a requested service.
- I have been fully informed by this provider of all available medically appropriate treatment, including services that may be paid for by the HCA or an HCA-contracted MCO, and I still choose to get the specified service(s) above.
- I understand that HCA does not cover services ordered by, prescribed by, or are a result of a referral from a healthcare provider who is not contracted with HCA as described in Chapter 182-502 WAC.
- ***I agree to pay the provider directly for the specific service(s) listed above.***
- I understand the purpose of this form is to allow me to pay for and receive service(s) for which HCA or an HCA-contracted MCO will not pay. This provider answered all my questions to my satisfaction and has given me a completed copy of this form.
- I understand that I can call HCA at 1-800-562-3022 to receive additional information about my rights or services covered by HCA under fee-for-service or managed care.

I AFFIRM: I understand and agree with this form's content, including the bullet points above.	CLIENT'S OR CLIENT'S LEGAL REPRESENTATIVE'S SIGNATURE X for Jean Hoffman	DATE X 12/24/14
I AFFIRM: I have complied with all responsibilities and requirements as specified in WAC 182-502-0160.	PROVIDER OF SERVICE(S) SIGNATURE William Leigh	DATE 12/24/14
I AFFIRM: I have accurately interpreted this form to the best of my ability for the client signing above.	INTERPRETER'S PRINTED NAME AND SIGNATURE	DATE

Patient Instructions

Thank you for coming in today.
During today's visit we reviewed only your ophthalmology (eye-related) medications.
Please follow up with your primary care provider for any questions regarding other medications.

If your eyes were dilated during today's visit, the average dilation will last 4 to 6 hours and may impact your overall vision during this period. Please use caution during this period.

If you need to schedule or change a follow up appointment, please call 206-744-2020.
Our phone lines are open 7:00am to 8:00pm Monday through Saturdays and 9:00am to 5:30pm on Sundays.

FOR NEW PATIENT APPOINTMENTS

University of Washington Medical Center
Eye Center
Seattle, Washington
Patient History/General Health Questionnaire

Patient Name Jeanne L. Hoffman Date 11/7/14

At your initial visit, it can be valuable for your care to have a summary letter or copies of your ophthalmologist's office records, and any other relevant photographs or tests (for example: fluorescein angiogram, visual fields, CT/MRI scans, or contact lens information) or other medical records. We suggest that these records be brought in-person rather than mailed to ensure that they are present at your examination. Having this information will help to make your eye evaluation as thorough and complete as possible. Please contact your ophthalmologist's office directly for this purpose.

In order to carry out your first appointment as efficiently as possible, please fill out this form as completely as you can at home and **BRING THIS FORM WITH YOU TO YOUR APPOINTMENT**. Also, if you wear glasses, be sure to bring them.

Referring Ophthalmologist or Provider (name, address, and phone number)
Same As

General M.D./Primary Care Provider (name, address, and phone number)
Dr. William Neighbors, Hall Health Center UW

Other doctors you wish us to include (name, address, and phone number)

Clinical - Scan on 11/20/2014 8:21 PM: Notice & Beneficiary Agreement to Pay

Scan (below)

NOTICE & BENEFICIARY AGREEMENT TO PAY

Based on this Insurance Program Medicare these service(s), procedure(s), and/or item(s) are not covered: DM, routine vision care, refraction or contact lens fitting

The Insurance Program will not pay based on one or more of the following reason codes:

- ☐ Purpose is for "investigative or research use only"
- ☐ Exceeds covered limit within a specified period
- ☐ Not medically necessary
- ☒ Other: may or may not be covered based on insurance benefits
- ☐ Your diagnosis
- ☐ No diagnosis
- ☐ Not approved by the FDA
- ☐ Not a covered benefit

Does the Insurance Program require a cost estimate prior to service(s) being rendered:

☐ Yes Total Cost Estimate $_____ ☐ No

If you disagree with your insurance's decision and wish to request a review, you should contact the third party payor directly at:

Insurance ID#

Address:

Phone:

Requests for a review in your case should be made immediately and within 30 days from the day of this notice receipt. If the payor disagrees with UW Medicine and provides a written determination that your care is covered, you will be refunded any amounts collected except for payments of the deductible, coinsurance, or any convenience services on items not normally covered. If the payor agrees with UW Medicine, you will be responsible for payment of all non-covered services provided during this stay.

☒ I understand that my signature below does not indicate that I agree with the notice, only that I have been informed. In addition, all my questions were answered to my satisfaction.
☒ I choose to receive and agree to pay for these specific service(s)/procedure(s)/item(s).

Narrative:

Comparison
Comparison is made to images from 08/30/2013 (bilateral) and images from 08/24/2012 (bilateral) and images from 07/06/2011 (bilateral) and images from 06/15/2010 (bilateral) and images from 06/05/2009 (bilateral) and images from 06/03/2008 (bilateral) and images from 03/22/2007 (bilateral) and images from 01/11/2006 and images from 12/07/2004.

Findings
Bilateral Breast Findings:
There are scattered fibroglandular densities (25% - 50% fibroglandular). No significant masses, calcifications or other abnormalities are seen.

Impression

BILATERAL BREASTS
Negative, no evidence of malignancy. Normal interval follow-up is recommended in 12 months.

OVERALL ASSESSMENT - CATEGORY 1 - NEGATIVE
ATTENDING RADIOLOGIST AND PAGER NUMBER
318690 Rahbar Habibollah MD
(206)540-6154
Examination:
A digital screening mammogram was performed and computer-aided detection was applied.
The patient will be notified by letter of these findings. (Patients with findings requiring additional imaging will also be sent instructions on how to schedule this appointment).

11/05/2014 - Orders Only in Hall Health Primary Care Center (continued)

Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool	10/30/2014 9:03 AM

Dear William,

As to pain Medical Request:

I have discuss this with Louis.

Jean is taking "ACETAMIN/COD 300-30MG TB QUA./OTY: 30
She is cutting them in half at times and taking a full TB for extreme pain.

She is also taking ACETAMINOPHEN-Extra Strength 500MG, taking them as needed for pain.

She is not taking another pain medication.

She has 9 TB left, with one refill available ("ACETAMIN/COD 300-30MG TB QUA")
She will get refill ASAP

Dear William,

Need to get a copy of all Jeans UWMC Medical Expense for and between: 5-1-2014 to 10-31-2014.

DSHS/CSD has rejected UWMC submitted Medical Expense as incomplete.

10/24/2014 - Patient E-mail in Hall Health Primary Care Center (continued)

Messages (continued)

Must have Medical Service totals and after insurance totals..ie what Jean is expected to pay.

If there is more then one accounting office for UWMC Billing Service for Jeans Medical Service, please list and provide contacts.

or

In alternative sent a request from your office for UWMC accounting offices for information where such services were provided by a difference UWMC approved medical services for Jean.

If returned, ASAP or returned to DSHS by 11-30-2014.

Jean will comply for additional medical Coverage and Dental Coverage will be available to Jean for current dental needs.

Last Read in MyChart
10/30/2014 8:49 AM by Hoffman, Jeanne Leonie

I wrote you today with the final read on her x rays. This shows a recurrence of a compression fracture of her first lumbar vertebra. She should be taking tylenol plus as needed narcotic for the pain. I would like to see her to discuss pain management. She may benefit from some PT at this point. I ordered PT to be done at Roosevelt.

Medical Advice

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool	10/23/2014 4:05 PM

Dear william.

REF: Physical Therapy
Representative: Louis

Jean is very positive about participating in PT to improve muscular fitness.
The past problems with PT, was that Jean was subjected "CRITICIZED", "RIDICULED", "ABUSIVE DEHUMANIZATION REMARKS" and "MADE FUN OF FOR TRY TO IMPROVE HER LIFE" by family members (such as Douglas's Family and Jack Alloin's Family).

Thus Jean has become very fearful to participate in PT Training.

Things have changed with blocking Douglas's and Jack's direct access to Jean.
Jean has made significant improvements over the past few years, with a decrease in major injuries.

Jean's outlook for PT is very good, so long as the approach is based on positive mind-set building to reinforce positive achievements. The Go Girl, you can do it! attitude to spark self achievement.

In other words, I (Louis) will be her friend in PT Training, if necessary to set a positive path of goals.

Currently Jean is very "DEPRESSED", with self esteem outlook, relying on pain and suffering for future life.

I believe that Jean's misery can be changed with positive and structured PT Program of self-help and training. To build self confidence "I can do"!

Jean has a lot of potential, she is a great artist, food preservation professional, seamstress, Bainbridge Island historian/etc..ie, that just need to be valued positively, to encourage personal growth.

Clinical Notes

Progress Notes

Neighbor Jr., William E at 10/22/2014 1030

Jeanne Leonie Hoffman is a 89 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Hearing Problem

(724.5) Back pain (primary encounter diagnosis)
Biggest issue today is low back pain and right hip pain that she has has required her to take more codeine pills than usual. She denies a fall. She has a hx of compression fracture of lower spine.

(389.10) SENSORNEUR HEAR LOSS NOS
Has not yet seen audiology. They are checking on coverage for hearing aids.

(451.19) DEEP VENOUS PHLEBITIS-LEG NEC
The compression stockings with zippers that she used in the past have worn out and she needs new ones but they have not been able to find one's with zipper.

(V58.61) Long term (current) use of anticoagulants
Complaint with warfarin.

(788.30) Urine incontinence
Stable. Uses incontinence pads.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• DJD (degenerative joint disease) of lumbar spine [721.3]	08/30/2013
• Vertebral fracture [805.8]	12/13/2012
Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed	
• Thyroid nodule, uninodular [241.0]	12/13/2012
CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.	
• Osteoporosis, unspecified [733.00]	03/04/2008
T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continued for five years, then stopped	
• Long term (current) use of anticoagulants [V58.61]	01/08/2008
Reason for anticoagulation: Recurrent dvts Duration of anticoagulation: life INR goal: 2.-3	
• FX FEMUR INTRCAPS NOS-CLOSE [820.00]	05/01/2007
Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.	
• VITAMIN B DEFICIENCY NOS [266.9]	05/01/2007
Vitamin B12 217 in February 2007; however methylmalonic acid	

and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type II or unspecified type diabetes mellitus without mention of complication, not stated as uncontrolled [250.00] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

- Other convulsions [780.39] 11/20/2006
  Petit Mal since 1975
  Carbamazepine level 7.6 on Feb 2007
  Discontinued based on ER neuro consult in early 2013
  No recurrence

- ESOPHAGEAL REFLUX [530.81] 11/20/2006
- SENSORNEUR HEAR LOSS NOS [389.10] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DEEP VENOUS PHLEBITIS-LEG NEC [451.19] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- HYPERLIPIDEMIA NEC/NOS [272.4] 11/20/2006
  On lipitor. LIpid panel March 2008 LDL 89. Trig 239.

- CATARACT NOS [366.9] 11/20/2006
  Extraction left eye in 1989

- ALLERGIC RHINITIS NOS [477.9] 11/20/2006
- GENERAL OSTEOARTHROSIS [715.00] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- BENIGN HYPERTENSION [401.1] 11/20/2006
- Unspecified glaucoma(365.9) [365.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [V70.0] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension

Cholesterol: dx hyperlipidemia
Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
Pap smear (q2-3 yrs to age 65)--82 years old
Colorectal cancer screening: Sig to 30 cm in May 2001.
Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
Tobacco: no
Alcohol: no
Drugs: no
Sexual practice/contraception: Not active
Advanced directives: yes
Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
Advise Vit D 800 IU daily.

- Urine incontinence [788.30] 08/27/2014
  Uses pads

Tobacco and Alcohol Use:

History

Substance Use Topics

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used
- Alcohol Use: Not on file

Review of Systems:

Objective:

BP 154/72 | Pulse 60 | Temp(Src) 97.7 °F (36.5 °C)
Estimated body mass index is 23.03 kg/(m^2) as calculated from the following:
Height as of 7/30/14: 5' 1.02" (1.55 m).

Weight as of 7/30/14: 55.339 kg (122 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter: 154/72
General: Having back and right hip pain. Difficult to communicate with because of hearing issues. Son present. She has tendernss over midline of lumbar spine. Hips shows normal internal and external rotation. No trochanter tenderness. Able to use walker safely.

Assessment and Plan:
(724.5) Back pain (primary encounter diagnosis)
Worsened low back pain in patient who has had compression fractures in the past related to Fall. Will obtain imaging of back and hips as much of the pain she localizes to the hip. Also check Crp and CK to rule out inflammatory joint disease (PMR) or myopathy due to statin. Arrange PT at Roosevelt. Although she states she has been taking several codeine per day, she has no other prescription other than what I prescribed such that she would not have enough to be doing this. I asked her son to check on what she is actually taking. It may be acetaminophen.

Plan: CBC, DIFF, CRP, HIGH SENSITIVITY, CREATINE
KINASE TOTAL ACTIVITY, X-RAY LUMBAR SPINE 4 VW

(389.10) SENSORNEUR HEAR LOSS NOS
She is to see audiology to see what other hearing aid options would work better for her.

(451.19) DEEP VENOUS PHLEBITIS-LEG NEC
Her stockings are worn out. The new ones she has do not have a zipper and they are having a hard time finding these. The zippered ones are the kind she can get one easily.

(401.1) BENIGN HYPERTENSION
Controlled.

(V58.61) Long term (current) use of anticoagulants
INR in Tx range. Continue current dose. Monthly INR.

(788.30) Urine incontinence
Although this is chronic would like to rule out interval UTI. Urine ordered. She uses incontinence pads.
Plan: URINALYSIS WORKUP, CULTURE:BACT-URINE W/GRAM
STN, URINALYSIS WORKUP, CULTURE:BACT-URINE
W/GRAM STN

(719.45) Hip pain, right
Plan: X-RAY FEMUR 2 VIEW RIGHT, X-RAY HIP UNILAT 2 VW
