Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 10/23/2019 1020

Jeanne Leonie Hoffman is a 94 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Follow-Up
  wound care etc

Jeanne is brought in by her son today because of redness of right lower leg without fever chills or sweats or drainage that his be present for about 3-4 days and worsening.

She is receiving would care from LE venous ulcer disease at NWH Wound Care Center. Her son is doing wound dressing changes at home in their new apartment. He would appreciate our nurses doing dressing change today.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Unspecified vitamin B deficiency [E53.9] 05/01/2007

Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic (HCC) [I82.509] 11/20/2006

Recurrent DVT and phlebitis since 1982
Per Vascular Surgery note 5/9/2006: continue warfarin
3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006

On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006

10/23/2019 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

- Type 2 diabetes mellitus without complication, without long-term current use of insulin [E11.9] 10/10/2019
- Primary open angle glaucoma (POAG) of both eyes [H40.1130] 10/10/2019
- Fracture of humeral head, closed [S42.293A] 09/20/2019

- Alcohol use: No

Objective:

BP (!) 156/66 | Pulse 59 | LMP (Exact Date)
Estimated body mass index is 21.16 kg/m² as calculated from the following:
Height as of 8/20/19: 5' 1" (1.549 m).
Weight as of 11/25/19: 50.8 kg (112 lb).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
(!) 176/82	66	---	---	---	11:06 AM	10/23/2019
(!) 156/66	59	---	---	---	11:08 AM	10/23/2019

10/23/2019 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Last blood pressure recorded in this encounter: **(!) 156/66**
General: NAD
Alert and interactive.
Right shoulder shows FROM following dx of non displaced greater tuberosity fracture in mid September for which he followed up with ortho and has been seeing PT.
Right lower extremity shows 5 inch diameter area of erythema and induration without drainage. No other erythema of note.

Lab and other tests: none

Assessment and Plan:
(L03.115) Cellulitis of right lower extremity (primary encounter diagnosis)
Patient with chronic venous stasis disease with ulceration of both lower extremities which improved markedly last summer during hospital stay for traumatic rib fracture at HMC. She has now developed area of redness and induration right lower leg mid portion consistent with cellutlitis. She has been afebrile.
Plan:
Treat as out patient with elevation and antibiotic Keflex for 7 days and expect marked improvement in two days. If not recheck

(Z71.89) Vaccine counseling
High dose flu vaccine today

Other:
Seen by nurse separately for dressing change.
Continue follow up at Northwest wound care clinic.
She is continuing to participate in physical therapy for balance and right shoulder non displaced greater tuberosity fracture dx 9.19.2019. Today she has FROM of right shoulder.

See me in 1 month.

Vaccine Screening Questions

Interpreter: No

1. Are you allergic to Latex? NO

2. Have you had a serious reaction or an allergic reaction to a vaccine? NO

3. Currently have a moderate or severe illness, including fever? NO

10/23/2019 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

4. Ever had a seizure or any neurological problem associated with a vaccine? *(DTaP/TDaP/DTP pertinent)* NO

5. Is patient receiving any live vaccinations today? *(Varicella-Chickenpox, MMR-Measles/Mumps/Rubella, Zoster-Shingles, Flumist, Yellow Fever) NOTE: oral rotavirus is exempt* NO

If **YES** to any of the questions above – Do **NOT** give vaccine. Consult with RN or provider in clinic. (#5 can be YES if all Live vaccine questions are answered NO)

If **NO** to all questions above - Patient may receive vaccine.

6. Do you need to receive the Flu vaccine today? YES - Additional Flu Questions **Flu Vaccine Screening Questions:**

Ever had a serious allergic reaction to eggs? NO

Ever had Guillain-Barre syndrome associated with a vaccine? NO

Less than 6 months old? NO

If **YES** to any of the *Flu* questions above - NO Flu Vaccine to be given. Patient may consult provider as needed.

If **NO** to all questions above - Patient may receive Flu Shot (IM)

Is the patient requesting Flumist? NO

If between 6 months and 8 years of age, was flu vaccine received last year? N/A
If **NO** to above question:
- Children who are receiving influenza vaccine for the first time - administer 2 doses of the current influenza vaccine (separated by at least 4 weeks).

Influenza (high dose)

All patients are encouraged to wait 15 minutes before leaving after receiving any vaccine.

VIS given 10/23/2019 by Terri J Pearson, CMA

Was Jeanne Leonie Hoffman alert, oriented, and without adverse reaction after the vaccine was given y/n: YES.

Watridge, Penelope A, RN at 10/23/2019 1020

TRIAGE WOUND CARE/DRESSING CHANGE

SUBJECTIVE:
Jeanne Leonie Hoffman is a 94 year old female presents for wound care of bilateral lower leg chronic wounds.
Wound hx:as per patient's son, she has had ulcerative lags for 3 years. Please see previous charting about them.

OBJECTIVE: erythematous, draining

ASSESSMENT: wound care/ dressing change for healing wound.

PLAN: Wound was cleansed with normal saline and clean, warm water. Her feet were placed in a large plastic bin and water poured from knee down to foot, one leg at a time.
Legs were patted dry with clean towel, lots of dead, flaky skin came off in the water and on the towel. Carefully dried between toes.
Vaseline impregnated gauze applied, AB gauze pads placed and bandaged with Coban.
Patient tolerated procedure well.

Advised patient to keep dressing in place and return for recheck in 2 days, as per the son's instructions from the wound clinic.

Advised pt to call and make an appointment with a provider if no improvement after 2-3 days of self –care or sooner if developing signs of infection.

Patient voiced understanding and agreement with plan.

End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA
Entered on: 9/4/2019
End date: 3/8/2025
Informant: Patient Reported

atorvastatin 20 MG Oral Tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/16/2020
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/4/2019
Start date: 9/4/2019
End date: 9/16/2020
Quantity: 45 tablet
Refill: 3 refills by 9/3/2020

timolol 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 1/13/2020
Instructions: One drop in each eye twice daily. Block tear duct for 1-2 minutes after use.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/4/2019
Start date: 9/4/2019
End date: 1/13/2020
Quantity: 10 mL
Refill: No refills remaining

pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/16/2020
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/4/2019
Start date: 9/4/2019
End date: 9/16/2020
Quantity: 90 tablet
Refill: 6 refills by 9/3/2020

ACETAMINOPHEN-CODEINE 300-30 MG Oral Tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 11/12/2019
Reason for discontinuation: Reorder
Instructions: TAKE ONE TABLET BY MOUTH DAILY AS NEEDED ARTHRITIC PAIN AS NEEDED
Authorized by: Terry, Anne Catherine, ARNP
Ordered on: 9/26/2019
Start date: 9/26/2019
End date: 11/9/2019
Quantity: 30 tablet
Refill: No refills remaining

cephalexin (KEFLEX) 500 MG Oral Capsule

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 5/5/2021
Reason for discontinuation: Reorder
Instructions: Take 1 capsule (500 mg) by mouth 4 times a day for 7 days. For 7 days.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 10/23/2019
Start date: 10/23/2019
End date: 5/5/2021
Quantity: 28 capsule
Refill: No refills remaining

Clinical Notes (continued)

Patient denies any changes to allergies or medications since last visit.

Wound Center Orders for Topical Lidocaine Wound Application:

Apply 2% topical gel or 4% topical liquid lidocaine to open wound prior to surgical debridement and assessment, not to exceed 10 ml.

Wound/Ulcer: #9, 10, 12, 13, 14, 15, 16
Anesthetic: lidocaine 2% topical gel

New Wounds:
#15 Right medial calf cluster, picture taken.
#16 Right Lateral Pretib/calf cluster, picture taken.

Electronically signed by Warner, Desiree E at 10/24/2019 7:43 AM

Null, Margaret K, RN at 10/21/2019 1030

Pt has 2 new wounds on the right leg. She is stable using the xeroform gauze. She will see us monthly.

Left lateral ankle, left medial ankle, right medial ankle, right pretib,:left pretib: Clean with water, apply xeroform gauze onto the wounds, cover with gauze or ABD pad. Secure with kling and tape. Change every other day.

Electronically signed by Null, Margaret K, RN at 10/24/2019 7:43 AM

Norsworthy, Nilufer Bozdemir, MD at 10/21/2019 1030

PROGRESS NOTE
10/21/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with multiple bilateral lower leg ulcers with mixed vascular disease is seen today for Follow Up Visit

INTERVAL HISTORY: Both side lower leg ulcers are smaller, there are skin islands at wound beds. There is no inflammation with ulcers. Her leg pain is less bothersome. She is feeling good overall.
She is now living in an apartment with her son Louis, regular access to showers, regular meals, taking supplemental protein.
This is a patient with DM2, CLI with extensive atherosclerotic disease and chronic leg edema with venous hypertension. She was in hospital after two falls, hemopneumothorax and also fractured ribs and ramus pubis bone in early July. After a long hospital stay she was discharged to SNF where she rest well, legs were elevated and with better nutritional support. She actually gained some weight. She was recently discharged home to her son's (Louis) care.

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:Denies, fatigue, unexpected weight loss, unexpected weight gain, fever . Does have intense itch at both lower limbs and intermittent limb pain, mostly with ambulation. She walked with a walker.

10/21/2019 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

PROCEDURE
A preprocedure time out was performed confirming the patient's identity, procedure to be performed, and site. A verbal consent was obtained.
Wound/Ulcer: # 10 / Description: wound bed and edges are covered with heavy bioburden with mild inflammation at edges
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue
Tissue and/or Material Removed: fibrin/slough, non-viable, skin, subcutaneous and viable
Severity: fat layer exposed
Instruments Used: curette
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~27 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements: Improved: Length 6cm X Width 4.6cm X Depth: 0.3cm
Patient tolerated the procedure well.
The wound looked improved after the debridement

ASSESSMENT: This is a patient with advanced age, venous hypertension and limb ischemia with atherosclerotic disease and DM2 has been treated at our center for extensive bilateral lower limb ulcers. With improved living situations and nutritional support along with advanced wound care dressing infection control and intermittent debridement her ulcers have much improved.
(L97.323) Non-pressure chronic ulcer of left ankle with necrosis of muscle (primary encounter diagnosis)
(L97.223) Non-pressure chronic ulcer of left calf with necrosis of muscle
(I87.332, L97.929) Chronic venous hypertension with ulcer and inflammation, left
(I70.442) Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf
(E11.622, L97.909) Diabetic ulcer of lower extremity (HCC)

PLAN: We will continue current management.
Patient education took place regarding the treatment progress and further measures to address the condition. The patient was given an opportunity to ask questions.
It was a pleasure to see Ms. Hoffman at my clinic. Please do not hesitate to call me for any questions or concerns.
Treatment plan recommended at this time includes the following:
Jeanne was seen today for follow up visit.

Diagnoses and all orders for this visit:

Non-pressure chronic ulcer of left ankle with necrosis of muscle
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Non-pressure chronic ulcer of left calf with necrosis of muscle

10/21/2019 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

Clinical Notes (continued)

- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Chronic venous hypertension with ulcer and inflammation, left

- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf

- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Diabetic ulcer of lower extremity (HCC)

- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Patient Instructions

Left lateral ankle, left medial ankle, right medial ankle, right pretib,:left pretib: Clean with water, apply xeroform gauze onto the wounds, cover with gauze or ABD pad. Secure with kling and tape. Change every other day.

Return in about 4 weeks (around 11/18/2019).

Visit Summary
Patient denies any changes to allergies or medications since last visit.

Wound Center Orders for Topical Lidocaine Wound Application:

Apply 2% topical gel or 4% topical liquid lidocaine to open wound prior to surgical debridement and assessment, not to exceed 10 ml.

Wound/Ulcer: #9, 10, 12, 13, 14, 15, 16
Anesthetic: lidocaine 2% topical gel

New Wounds:
#15 Right medial calf cluster, picture taken.
#16 Right Lateral Pretib/calf cluster, picture taken.

PROGRESS NOTE
10/21/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with multiple bilateral lower leg ulcers with mixed vascular disease is seen today for Follow Up Visit

INTERVAL HISTORY: Both side lower leg ulcers are smaller, there are skin islands at wound beds. There is no inflammation with ulcers. Her leg pain is less bothersome. She is feeling good overall. She is now living in an apartment with her son Louis, regular access to showers, regular meals, taking supplemental protein.
This is a patient with DM2, CLI with extensive atherosclerotic disease and chronic leg edema with venous hypertension. She was in hospital after two falls, hemopneumothorax and also fractured ribs and ramus pubis bone in early July. After a long hospital stay she was discharged to SNF where she rest well, legs were elevated and with better nutritional support. She actually gained some weight. She was recently discharged home to her son's (Louis) care.

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:Denies, fatigue, unexpected weight loss, unexpected weight gain, fever . Does have intense itch at both lower limbs and intermittent limb pain, mostly with ambulation. She walked with a walker.

Review of patient's allergies indicates:
Allergies

PROCEDURE
A preprocedure time out was performed confirming the patient's identity, procedure to be performed, and site. A verbal consent was obtained.
Wound/Ulcer: # 10 / Description: wound bed and edges are covered with heavy bioburden with mild inflammation at edges
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue
Tissue and/or Material Removed: fibrin/slough, non-viable, skin, subcutaneous and viable
Severity: fat layer exposed
Instruments Used: curette
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~27 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements: Improved:
Length 6cm X Width 4.6cm X Depth: 0.3cm
Patient tolerated the procedure well.
The wound looked improved after the debridement

ASSESSMENT: This is a patient with advanced age, venous hypertension and limb ischemia with atherosclerotic disease and DM2 has been treated at our center for extensive bilateral lower limb ulcers. With improved living situations and nutritional support along with advanced wound care dressing infection control and intermittent debridement her ulcers have much improved.
(L97.323) Non-pressure chronic ulcer of left ankle with necrosis of muscle (primary encounter diagnosis)
(L97.223) Non-pressure chronic ulcer of left calf with necrosis of muscle

10/21/2019 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

Letters (continued)

(I87.332, L97.929) Chronic venous hypertension with ulcer and inflammation, left
(I70.442) Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf
(E11.622, L97.909) Diabetic ulcer of lower extremity (HCC)

PLAN: We will continue current management.
Patient education took place regarding the treatment progress and further measures to address the condition. The patient was given an opportunity to ask questions.
It was a pleasure to see Ms. Hoffman at my clinic. Please do not hesitate to call me for any questions or concerns.
Treatment plan recommended at this time includes the following:
Jeanne was seen today for follow up visit.

Diagnoses and all orders for this visit:

Non-pressure chronic ulcer of left ankle with necrosis of muscle
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Non-pressure chronic ulcer of left calf with necrosis of muscle

Active at the End of Visit

Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Instructions: Take 1 tablet by mouth 2 times a day.
Entered by: Ong, Thuan Duc, MD
Entered on: 6/7/2018
End date: 10/13/2021

acetaminophen 500 MG Oral Tab

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions:
1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 6/12/2024
Action: Patient not taking

Calcium Carbonate 500 MG Oral Chew Tab

Discontinued by: Clark, Trika L, Pharmacy Technician
Discontinued on: 1/9/2025
Reason for discontinuation: Discontinued by patient
Instructions: Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 1/9/2025

Cholecalciferol 1000 units Oral Tab

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/20/2019
End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA
Entered on: 9/4/2019
End date: 3/8/2025
Informant: Patient Reported

10/11/2019 - Office Visit in Sports Medicine Center at Harborview (continued)

Medication List (continued)

atorvastatin 20 MG Oral Tablet

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 9/16/2020
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD — Ordered on: 9/4/2019
Start date: 9/4/2019 — End date: 9/16/2020
Quantity: 45 tablet — Refill: 3 refills by 9/3/2020

timolol 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 1/13/2020
Instructions: One drop in each eye twice daily. Block tear duct for 1-2 minutes after use.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 9/4/2019
Start date: 9/4/2019 — End date: 1/13/2020
Quantity: 10 mL — Refill: No refills remaining

pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 9/16/2020
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 9/4/2019
Start date: 9/4/2019 — End date: 9/16/2020

UW MEDICINE SPORTS & SPINE

REASON FOR VISIT/CONSULTATION:
New Patient Consult and Shoulder Pain (right)

HISTORY OF PRESENT ILLNESS:
Ms. Hoffman is a 94 year old right-hand dominant female referred by Dr. William Neighbor Jr. for the evaluation of right shoulder pain. The patient reports onset of pain after falling in early September. X-rays done a week or so after the injury demonstrated minimally displaced greater tuberosity fracture. She was referred for physical therapy and has been doing some exercises. She reports that there is really no pain at the shoulder at this time, and she feels she has full function and range of motion. No radiating pain down the arm.
She is here with her son today, and his main objective for the visit was to have someone to help convince her to do

regular exercises. It seems the 2 of them disagree of it on her performance of her exercises.

PAST MEDICAL HISTORY:

Past Medical History:

Diagnosis	Date
• Allergic rhinitis, cause unspecified	11/20/2006
• Carpal tunnel syndrome *Carpal tunnel release right wrist in 1989*	11/20/2006
• Closed fracture of unspecified intracapsular section of neck of femur *Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.*	5/1/2007
• Diabetes mellitus (HCC)	
• DIAPHRAGMATIC HERNIA *CT of abdomen in 2006*	11/20/2006
• Esophageal reflux	11/20/2006
• Impaired fasting glucose	3/22/2007
• Other convulsions *Petit Mal since 1975 Carbamazepine level 7.6 on Feb 2007 Discontinued based on ER neuro consult in early 2013 No recurrence*	11/20/2006
• PAD (peripheral artery disease) (HCC)	
• Thyroid nodule, uninodular *CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.*	12/13/2012
• Ulcer of left lower extremity, limited to breakdown of skin *Chronic, Multiple sites of lower leg and ankle, with MSSA*	
• Vertebral fracture *Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed*	12/13/2012

PAST SURGICAL HISTORY:

Past Surgical History:

Procedure	Laterality	Date
• TOTAL ABDOMINAL HYSTERECT W/WO RMVL TUBE OVARY		

ALLERGIES:

Review of patient's allergies indicates:

Allergies

Allergen	Reactions

- Adhesives
- Aspirin — Other
- Nitrofurantoin — Other
  Confusion, loss of appetitie, nausea, abdominal pain
- Nitrofurantoin — Other
  confusion
- Penicillins — Rash
- Sulfa Antibiotics — Rash

MEDICATIONS:

Current Outpatient Medications

Medication	Sig	Dispense	Refill

FAMILY HISTORY:

Family History

Problem (# of Occurrences)	Relation (Name,Age of Onset)
No Known Problems (2)	**Mother**, **Father**

SOCIAL HISTORY:
Lives with son

REVIEW OF SYSTEMS:
Except for those mentioned in the HPI and any positives noted below, complete review of systems is negative.
+ falls, poor balance, leg pain

PHYSICAL EXAMINATION:
VITAL SIGNS: BP 124/44 | Pulse 68 .
Physical Exam
Constitutional: She is oriented to person, place, and time and well-developed, well-nourished, and in no distress.
HENT:
Head: Normocephalic and atraumatic.
Eyes: Conjunctivae and EOM are normal.
Pulmonary/Chest: Effort normal.
Neurological: She is alert and oriented to person, place, and time.
Skin: Skin is warm and dry. No rash noted. No erythema.
Psychiatric: Mood and affect normal.
MSK: Full symmetric range of motion of both shoulders without significant pain. Nontender to palpation around the right shoulder including the greater tuberosity. She has good strength of her right rotator cuff.

DIAGNOSTIC STUDIES:
I personally reviewed the following images with the patient.
X-rays right shoulder 9/19/19: Minimally displaced right greater tuberosity fracture

IMPRESSION:
1. Right shoulder pain, now resolved
2. Right greater tuberosity fracture

PLAN:
I discussed with the patient and her son the above exam and imaging findings as well as impression. As her symptoms are resolved at this time, recommend continuing with physical therapy exercises. Discussed with her the importance of regular exercise to try to prevent falls going forward.
Follow-up as needed.

(To be completed by patient)

10 / 11 / 19
MO / DA / YEAR
Today's Date

Allora Hoffman — Last Name
Jeanne ~~Eo~~ — First Name
Leonie — Middle Name

1 / 6 / 25
MO / DA / YEAR
Date of Birth

Hall Health Dr. Neighbor — Referral Source

(360) 649-5702 — Telephone Number

Dominant Hand: ☒ R ☐ L Age: 94.10 Sex: ☐ M ☒ F

ONSET:
When did your most recent episode of pain begin? 9 / 23 / 19
MO / DA / YEAR

How did the current episode of pain occur? *(check all that apply)*

☐ Gradual onset	☐ Reaching	☐ Lifting	☐ Don't know
☒ Fall	☒ Twisting	☐ Pushing	☒ Other: Sink Hole
☐ Direct blow	☐ Bending	☐ Pulling	

Was your injury the result of one of the following?
☒ Vehicle accident Walker chair ☐ On-the-job injury ☐ No known cause
☐ Recreational accident ☐ Non-work-related accident

If your injury was work-related, what is your L&I or Workers' Compensation claim number? Medical AB etc
Please briefly describe the onset of your pain and the events that preceded the onset:

Ferry Loaded Pedestrians to Alaska Construction Area to Access Bus on 1st, 2nd & 3rd Ave Heading to Harborview.
In the Sink Hole, Reefing Shoulder & Rim, of the Pedestrians' Saw the incident & provided Aid to lift WalkerChair out of Sink Hole, no incidents reported at that time. Next day Shoulder arm movement Pain/discomfort. No Broken/fracture observed in Hall Health X rays

Do you find this injury was your employer's or another person's fault? Yes No
Washington State Ferry & Alaska Way Construction ☒ & Seattle Dept of Transportation ☐

CURRENT STATUS:
Using any or all of the symbols from the box on the right, mark the areas on the drawings below where you now feel your typical pain. Include all affected areas.

SYMBOLS:
Ache: >>>>> **Pins & Needles** oooooo
Numbness: = = = = **Stabbing:** //////////

Do you have back or leg pain? ☒ No ☐ Yes **If yes, please answer the following 3 questions:**
1. Which is worse, your back pain or your leg pain? ☒ back pain ☐ leg pain ☐ about equal
2. Do you often have just back pain without leg pain? ☒ Yes ☐ No
3. Do you often have just leg pain without back pain? ☒ Yes ☐ No

Do you have neck or arm pain? ☐ No ☒ Yes **If yes, please answer the following 3 questions:**
1. Which is worse, your neck pain or your arm pain? ☐ neck pain ☒ arm pain ☐ about equal
2. Do you often have just neck pain without arm pain? ☐ Yes ☒ No
3. Do you often have just arm pain without neck pain? ☒ Yes ☐ No

In the last week, how many days did you have your usual pain? Circle one number:
0 1 2 3 4 5 6 7

In the last week, during an average day, how much of the time were you in pain because of your back/neck/joint problems? Check one box:
☐ Less than 1 hour per day ☐ Between 1 and 4 hours per day ☒ Between 4 and 8 hours per day
☒ Almost any time I was awake ☐ Almost 24 hours per day and night

Check the worst and best times for your pain:

WORST	**BEST**
☒ First awakening	☐ First awakening
☒ Morning	☐ Morning
☐ Afternoon	☒ Afternoon
☐ Evening	☒ Evening
☐ Night time	☐ Night time

If you have **NIGHT** pain, does it:
☒ Prevent you from falling asleep?
☒ Awaken you at night?
☐ Hurt worse when lying down at night than during the day?

What do each of the following activities do to your pain?

	No Change	Relieves Pain	Increases Pain	After how long of that activity?
Sitting				
Walking				
Standing				
Lying down				
Bending forward				
Bending backward				
Lifting				
Coughing/sneezing				
Changing positions				

What do you do to relieve your pain?
1) _____ 3) _____
2) _____ 4) _____

PAIN INTENSITY (Please circle one number for each question.)	No Pain										Pain as bad as could be
How intense is your pain right now?	0	1	2	3	4	5	6	7	8	9	10
In the PAST WEEK, how intense was your WORST pain?	0	1	2	3	4	5	6	7	8	9	10
In the PAST WEEK, how would you rate your LEAST pain?	0	1	2	3	4	5	6	7	8	9	10
In the PAST WEEK, how would you rate your AVERAGE pain?	0	1	2	3	4	5	6	7	8	9	10

How would you describe your **overall** severity of pain **over the past few months**?
___ Minimal pain
___ Mild, but can live with it
___ Moderate; I am having difficulty dealing with it
___ Severe, it is ruining my quality of life

PROGRESSION:
How is your current back/neck/joint pain, compared to when this pain episode first started?
___ Much improved__X__Somewhat improved_____No change_____A little worse_____Much worse_____N/A

How is your current leg/arm pain, compared to when this pain episode started?
___ Much improved__X__Somewhat improved_____No change_____A little worse_____Much worse_____N/A

How much change do you expect in your pain 6 months from now?
___ Worse_____No change_____Somewhat improved__X__Much improved_____Total relief

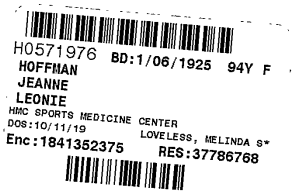
CURRENT FUNCTION:
When your back / neck / joint hurts, you may find it difficult to do some of the things you normally do. This list contains some sentences that people have used to describe themselves when they have back / neck / joint pain. When you read them, you may find that some stand out because they describe you **TODAY**. As you read the list, think of yourself **TODAY**. When you read a sentence that describes you **TODAY**, put an "**X**" next to it. If the sentence does not describe you, then leave the space blank and go on to the next one. Remember, only "**X**" the sentence if you are sure that it describes you **TODAY**.



___ 1) I stay at home most of the time because of my back / neck / joint.
___ 2) I change position frequently to try and get my back / neck / joint comfortable.
___ 3) I walk more slowly than usual because of my back / neck / joint.
___ 4) Because of my back / neck / joint, I am not doing any of the jobs that I usually do around the house.
___ 5) Because of my back / neck / joint, I use a handrail to get up stairs.
___ 6) Because of my back / neck / joint, I lie down to rest more often.
___ 7) Because of my back / neck / joint, I have to hold on to something to get out of an easy chair.
___ 8) Because of my back / neck / joint, I try to get other people to do things for me.
___ 9) I get dressed more slowly than usual because of my back / neck / joint.
___ 10) I only stand for short periods of time because of my back / neck / joint.
___ 11) Because of my back / neck / joint, I try not to bend or kneel down.
___ 12) I find it difficult to get out of a chair because of my back / neck / joint.
___ 13) My back / neck / joint is painful almost all the time.
___ 14) I find it difficult to turn over in bed because of my back / neck / joint pain.
___ 15) My appetite is not very good because of my back / neck / joint pain.
___ 16) I have trouble putting on my socks (or stockings) because of the pain in my back / neck / joint.
___ 17) I only walk short distances because of my back / neck / joint.
___ 18) I sleep less well because of my back / neck / joint.
___ 19) Because of my back / neck / joint pain, I get dressed with help from someone else.
___ 20) I sit down for most of the day because of my back / neck / joint.
___ 21) I avoid heavy jobs around the house because of my back / neck / joint.
___ 22) Because of my back / neck / joint pain, I am more irritable and bad tempered with people than usual.
___ 23) Because of my back / neck / joint, I go up stairs more slowly than usual.
___ 24) I stay in bed most of the time because of my back / neck / joint.

What are some of your **usual** recreational activities that you participated in the **YEAR BEFORE** your current problem?
Place an "X" in front of those you currently cannot perform:

(___) _____ (___) _____
(___) _____ (___) _____
(___) _____ (___) _____

How often do you have to stop your activities and sit down or lie down to control your pain?

___ Never
___ Occasionally
___ Approximately once per day
___ Several times per day
___ I spend almost all day lying or sitting to control my pain

Have you ever received care from a mental health professional?____Yes_____No

If yes, briefly explain: _____

Are you receiving mental health care for your current pain problem?____Yes_____No

If yes, briefly explain: _____

PREVIOUS BACK/NECK/JOINT HISTORY:

Have you had **any** previous back/neck/joint symptoms (other than the current problem) severe enough to seek professional help?____Yes_____No_____Just those mentioned above

If yes, how long ago and briefly explain: _____

_____

Were any of these previous episodes the result of a job injury or motor vehicle accident?____Yes_____No

If yes, please explain: _____

_____

Please list approximate dates off work for more than two weeks due to these **previous** injuries: _____

_____

Were you compensated for any of the above injuries via disability coverage (e.g., workers' compensation) or a legal settlement?____Yes_____No

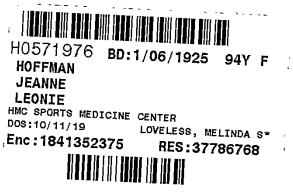
If yes, please explain: _____

_____

Including this current episode, about how many episodes of back/neck/joint pain have you had within the last two years that have been severe enough to see a physician? _____

If you have had **surgery** on your back/neck (including chymopapain), please fill in the following for each operation:

Date	Type of Surgery & Surgeon	Pain After Surgery: *Worse*	*Same*	*Better*	*(MD Use Only)*
_____	_____	____	____	____	_____
_____	_____	____	____	____	_____
_____	_____	____	____	____	_____
_____	_____	____	____	____	_____



SLEEP:

Have you had any of these sleep problems at least half the days of the past month?

- Trouble falling asleep when you first go to bed ____Yes_____No
- Waking up during the night and not easily going back to sleep ____Yes_____No
- Waking up in the morning earlier than planned or desired ____Yes_____No
- Feeling unsatisfied or not rested by your night's sleep ____Yes_____No
- Feeling excessively sleepy during the day (does not include regular naps) ____Yes_____No

How many hours per night do you sleep currently, on average? _____

Did your sleep problems exist prior to your current pain problem?_____Yes_____No_____No sleep problems now

During the time you smoke(d), indicate the average number of cigarettes smoked daily:
___ less than 1 pack per day_____1 pack per day_____1 to 2 packs per day_____more than 2 packs per day
If you've quit smoking, at what age? _____

How often do you have a drink containing alcohol?

___ Never____Monthly or less_____2-4 times a month_____2-3 times a week_____4 or more times a week

How many drinks containing alcohol do you have on a typical day when you are drinking?

____ 1 or 2 ____3 or 4 ____5 or 6 ____7 to 9 ____10 or more

How often do you have six or more drinks on one occasion?

___ Never_____Less than monthly_____Monthly ___Weekly_____Daily or almost daily

Have you ever used alcohol to control your pain?_____Yes_____No

Mood: (Check one box on each line.)

How much time during the **past four weeks...**	All of the time	Most of the time	Some of the time	A little of the time	None of the time
Have you been very nervous?	☐	☐	☐	☐	☐
Have you felt so down in the dumps that nothing could cheer you up?	☐	☐	☐	☐	☐
Have you felt calm and peaceful?	☐	☐	☐	☐	☐
Have you been happy?	☐	☐	☐	☐	☐

Over the **last two weeks**, how often have you been bothered by any of the following problems?	Not at all	Several days	More than half the days	Nearly every day
Little interest or pleasure in doing things	☐	☐	☐	☐
Feeling down, depressed, or hopeless	☐	☐	☐	☐

Education: How much have you completed?

☐ Less than high school ☐ Graduated from high school/GED ☐ Vocational School
☐ Some college ☐ Graduated from college ☐ Post graduate degree

Marital status: What is your current **marital status**?

☐ Never married ☐ Living with significant other ☐ Married
☐ Separated ☐ Divorced ☐ Widowed

Stress: Have you had a stress or change in a significant relationship within the past 12 months?____No____Yes
If yes, explain briefly: _____

Have you ever considered yourself a victim of physical, emotional, or sexual abuse?____No ___Yes
Language: Are you fluent in English?_____Yes _____No Other language: _____

OCCUPATIONAL HISTORY:
Employer: _____ Date of Hire: _____ Usual occupation: _____

Briefly describe your job: _____

How physically demanding is your job?
___ Very heavy (frequently lifting > 50 pounds)
___ Heavy (frequently lifting 25-50 pounds)
___ Moderate (frequently lifting 10-25 pounds)
___Light (frequently lifting < 10 pounds)
___Sedentary (essentially no lifting)

Work status at the **time of onset of this episode** of back / neck / joint pain:
___ Permanent disability (pension, SSDI)
___ Regular: full time
___ Regular: part time
___ Working, modified job (e.g., light duty)
___ Temporary disability (e.g., workers' compensation)
___Retired
___Not currently in workforce/homemaker/student
___On public assistance
___Unemployed, looking for work

Work status **today**:
___ Permanent disability (pension, SSDI)
___ Regular: full time
___ Regular: part time
___ Working, modified job (e.g., light duty)
___ Temporary disability (e.g., workers' compensation)
___Retired
___Not currently in workforce/Homemaker/Student
___On public assistance
___Unemployed, looking for work

How satisfied are you with your job?
___ Very satisfied ___Satisfied ___Dissatisfied ___It is the worst job I've ever had ____N/A

If your back / neck / joint got completely better during the next few weeks, do you think your employer would let you return to the job you had before this episode of back / neck / joint pain?
___ Yes ___Probably ___Doubt it ___Definitely not ___N/A

Is your employer able and willing to offer you job accommodations (e.g., light duty, part-time work, flexible schedule, special equipment) if needed to allow you to work? _____Yes _____No _____N/A

How certain are you that you will be working in 6 months? (Circle one)

0	1	2	3	4	5	6	7	8	9	10	N/A
Not at all certain										Extremely certain	Work not relevant

Are you planning to apply for Social Security Disability (SSDI) or other disability (e.g., workers' compensation)?
____ Yes_____No

Has your employer treated you fairly?____Yes_____No_____N/A
If no, please explain: _____

Has anyone in your family been on disability coverage?____Yes_____No
If yes, what is their relationship to you? _____

____Yes_____No Is a lawyer helping you with a claim or lawsuit related to your current pain or other symptoms?
If yes, explain briefly:_____
_____

Clinical Notes

Progress Notes

Leung, Hoi Yee, OD at 10/10/2019 1130

Chief Complaint

Patient presents with

- Eye Exam

  Pt c/o decreased near vision "everything is fainter". DV seems okay. Seeing another eye doctor in Seattle (name?) that is managing her glaucoma, and using one glaucoma medication BID OU. Pt denes of discomfort, flashes or floaters. Hx to T2DM, last hgba1c 6.5 07/30/2019, current not on any BS medication. Very light sensitive, has been wearing tinted glasses for many years but current pair is not tinted.

All history obtained by interpreter today? NO

History of present illness/ Past relevant history:
Patient presents as **Established patient** to HMC/UWNC Optometry.
Patient reports no eye pain
Pt is wearing glass prescription. Pt is not wearing contact lenses.

Past Ocular Hx:
Hx Ocular disorders: Glacuoma
Hx Ocular surgeries: None
Ocular Meds: Timolol BID OU

Family Ocular History:
family history includes No Known Problems in her father and mother.

Review of System: Reviewed with patient today, system is negative except for those mentioned below

Past Medical History:

Diagnosis	Date
• Allergic rhinitis, cause unspecified	11/20/2006
• Carpal tunnel syndrome *Carpal tunnel release right wrist in 1989*	11/20/2006
• Closed fracture of unspecified intracapsular section of neck of femur *Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.*	5/1/2007
• Diabetes mellitus (HCC)	
• DIAPHRAGMATIC HERNIA *CT of abdomen in 2006*	11/20/2006
• Esophageal reflux	11/20/2006
• Impaired fasting glucose	3/22/2007
• Other convulsions *Petit Mal since 1975 Carbamazepine level 7.6 on Feb 2007 Discontinued based on ER neuro consult in early 2013 No recurrence*	11/20/2006
• PAD (peripheral artery disease) (HCC)	
• Thyroid nodule, uninodular *CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.*	12/13/2012
• Ulcer of left lower extremity, limited to breakdown of skin *Chronic, Multiple sites of lower leg and ankle, with MSSA*	
• Vertebral fracture *Dec 2012. L3 secondary to fall. TLSO brace*	12/13/2012

10/10/2019 - Office Visit in Harborview Medical Center Eyes on James Optometry Clinic (continued)

Clinical Notes (continued)

placed. Follow up imaging in 6 months showed healed

PHYSICAL EXAM

She is oriented x 3
Psychiatric: Her mood is happy with affect that is calm
Constitutional: Appears healthy
Head: Atraumatic **Neurologic**: Face is symmetric **Skin:** No facial rashes
ENT: External ears and nose are normal in appearance.
Respiratory: Normal respiratory effort
Eyes: See Eye Exam &/or encounter notes

Assessment and Plans:
See AVS for additional overview/instructions

1. Type 2 diabetes mellitus without complication, without long-term current use of insulin
Normal to the extent seen. Dilated but unable to get posterior fundus view due to pt light sensitivty, Dr. Toop had similar difficulty in 2014. Pt has outside eye care with "glaucoma doctor at Seattle" although unable to provide me with the name of provider, would defer to her current glaucoma doctor.

2. Primary open angle glaucoma of both eyes, unspecified glaucoma stage
Continue CPM timolol BID OU, f/u with her glaucoma provider.

3. Pseudophakia, both eyes
New spectacle Rx finalized. Specified Bifocal to be tinted due to light sensitivity, and suggested Reading glasses instead of bifocal to help with reading. Encourage to sign for for financial assistance at HMC, and educated regarding our Gift of Sight program.

Thank you for coming in today.
During today's visit we reviewed only your ophthalmology (eye-related) medications.
Please follow up with your primary care provider for any questions regarding other medications.
If your eyes were dilated during today's visit, the average dilation will last 4 to 6 hours and may impact your overall vision during this period. Please use caution during this period.
If you need to schedule or change a follow up appointment, please call 206-744-2020.
Our phone lines are open 7:00am to 8:00pm Monday through Saturdays and 9:00am to 5:30pm on Sundays.

If you have any questions regarding contact lens, please call Eyes on James at 206.897.4774 ext 2

Please follow up with your primary care provider for any questions regarding other medications.
If your eyes were dilated during today's visit, the average dilation will last 4 to 6 hours and may impact your overall vision during this period. Please use caution during this period.
If you need to schedule or change a follow up appointment, please call 206-744-2020.
Our phone lines are open 7:00am to 8:00pm Monday through Saturdays and 9:00am to 5:30pm on Sundays.

If you have any questions regarding contact lens, please call Eyes on James at 206.897.4774 ext 2

For URGENT EYE ISSUES:
Please contact call center 206-744-2020 and **press 8** to speak to **Triage nurse**.
If after hours, please call 206-744-3000 and ask for the triage nurse.

Return if symptoms worsen or fail to improve.

Today's Visit

You saw Hoi Yee Leung, OD on Thursday October 10, 2019. The following issues were addressed: Type 2 diabetes mellitus without complication, without long-term current use of insulin; Primary open angle glaucoma of both eyes, unspecified glaucoma stage; and Pseudophakia, both eyes.

Medication List

Medication List

This report is for documentation purposes only. The patient should not follow medication instructions within. For accurate instructions regarding medications, the patient should instead consult their physician or after visit summary.

Active at the End of Visit

Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Instructions: Take 1 tablet by mouth 2 times a day.
Entered by: Ong, Thuan Duc, MD
Entered on: 6/7/2018
End date: 10/13/2021

acetaminophen 500 MG Oral Tab

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions:
1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 6/12/2024
Action: Patient not taking

Calcium Carbonate 500 MG Oral Chew Tab

Discontinued by: Clark, Trika L, Pharmacy Technician
Discontinued on: 1/9/2025
Reason for discontinuation: Discontinued by patient
Instructions: Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 1/9/2025

Cholecalciferol 1000 units Oral Tab

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/20/2019
End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA
Entered on: 9/4/2019
End date: 3/8/2025
Informant: Patient Reported

atorvastatin 20 MG Oral Tablet

10/10/2019 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Medication List (continued)

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/16/2020
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/4/2019
Start date: 9/4/2019
End date: 9/16/2020
Quantity: 45 tablet
Refill: 3 refills by 9/3/2020

timolol 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 1/13/2020
Instructions: One drop in each eye twice daily. Block tear duct for 1-2 minutes after use.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/4/2019
Start date: 9/4/2019
End date: 1/13/2020
Quantity: 10 mL
Refill: No refills remaining

pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/16/2020
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/4/2019
Start date: 9/4/2019
End date: 9/16/2020
Quantity: 90 tablet
Refill: 6 refills by 9/3/2020

ACETAMINOPHEN-CODEINE 300-30 MG Oral Tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 11/12/2019
Reason for discontinuation: Reorder
Instructions: TAKE ONE TABLET BY MOUTH DAILY AS NEEDED ARTHRITIC PAIN AS NEEDED
Authorized by: Terry, Anne Catherine, ARNP
Ordered on: 9/26/2019
Start date: 9/26/2019
End date: 11/9/2019
Quantity: 30 tablet
Refill: No refills remaining

Cosley, Kristina M, PT at 10/10/2019 0945

PHYSICAL THERAPY PROGRESS NOTE

Certification From*: 09/03/19
Certification To*: 11/02/19

Date of Symptom Onset*: 07/23/19

Start of Care Date*: 09/03/19

VISITS FROM SOC: 5
INTERPRETER STATUS (Not needed, Telephonic, In Person):not needed
Referring Provider: Phelan, E
Attending Physician: Phelan, E
Falls Doctor: Phelan, E
PCP: Neighbor Jr., William E, MD

Diagnosis: (R26.89) Imbalance (primary encounter diagnosis)

(R29.898) Leg weakness, bilateral

(W19.XXXD) Fall, subsequent encounter

PRECAUTIONS: Fall risk

Mechanism of Injury: falls
Was previously living at home with her son, with a h/o DVTs, HTN, venous insufficiency, chronic leg ulcers, osteoporosis who was hospitalized at Harborview Medical Center from 7/25/2019 until 8/5/2019 with pelvic fx, right RF and hemo-pneumothorax secondary to GLF. Was then at SNF at Kline Galland for PT/OT

Pertinent Medical/Surgical History/Current Medications that may affect progress in PT:

Patient Active Problem List

Diagnosis

- Sensorineural hearing loss, unspecified
- DVT, recurrent, lower extremity, chronic (HCC)
- Other and unspecified hyperlipidemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Unspecified vitamin B deficiency
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- Hip joint stiffness
- Leg weakness, bilateral
- Weakness of trunk musculature
- History of recurrent deep vein thrombosis (DVT)
- Thrombocytopenia (HCC)
- Imbalance
- Primary osteoarthritis of both hips
- Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)
- Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer and inflammation, left (HCC)
- Cellulitis of left leg
- Venous ulcer of left leg (HCC)
- Homeless
- Normocytic anemia
- Severe protein-calorie malnutrition (HCC)
- Urge urinary incontinence
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Diabetic ulcer of lower extremity (HCC)
- Housing lack

- Suspected elder abuse
- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer, bilateral (HCC)
- Bilateral leg edema
- Closed displaced fracture of left pubis with routine healing
- Acute blood loss anaemia
- Closed fracture of multiple ribs of left side with routine healing
- Hemopneumothorax
- Fall

SUBJECTIVE:
Patient's Statement: I can walk - walks back to gym with 4 wheeled walker with SBA for safety. Reports compliance with home program

Time in: 0945

OBJECTIVE MEASURES/IMPAIRMENTS:
10/10/2019:
Gait speed 10 meter walk in 14.67 seconds with 4 wheeled walker
Bilateral shoulder flexion AROM = 140 without pain right shoulder

9/26/19:
Able to reach behind in seated to push with right upper extremity to stand
Able to perform AAROM flexion when instructed for right shoulder
Stood 20 minutes consecutive before sitting to rest, then got back up to do more therapy exercises
Min assist to CGA for sit to/from stand

TREATMENT/SKILLED INTERVENTION & EDUCATION:
Intervention 1: 97110 Therapeutic exercise for 20 minutes

Review program: Verbal/tactile/demo cues provided; use of mirror for further feedback/training: Walker/chair for support
-National Institute on Aging program holding support: Standing hip flex/abd/ext AROM, knee flex, ankle Plantarflexion
-after completion of the above exercises, patient had significant posterior lean requiring mod assist to sit down in chair behind her safely

Progression: Verbal/tactile/demo cues provided; use of mirror for further feedback/training
Focus on powering up with chair stands from raised seat

Review recent Progression for her to get started on shoulder exercises:
AAROM right shoulder elevation (they have not yet established Physical Therapy for her shoulder near their home as ordered by ortho) - progress to AROM shoulder flexion

*Intervention 2***:** 97112 Neuromuscular re-education for 25 minutes

Review of short term goals per objective and goals section

Review program: Verbal/tactile/demo cues provided; use of mirror for further feedback/training
Weight shifts/opposite heel lifts with 4 wheeled walker/chair 10 second hold; holding support
Limits of stability 8 points walker/chair

10/10/2019 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

Mechanics for sit to/from stand

Discussed progress with son; son brought osteoporosis book and anatomy and exercise books - discussed appreciation for the books but, again how we do not want to overload Jeane with exercises and we have more to add for balance/fall prevention.
Discussed with son safety and importance of using 4 wheeled walker at all times or holding bars they have placed in home at all times when up and walking; son in agreement

HOME EXERCISE PROGRAM (HEP):
From falls clinic:
Home Safety Checklist
CDC 4 points to prevent falls
How to get up from floor

From Physical Therapy:
Balance exercises at least 2 times per week: 5 reps each
Partial squats with 4 wheeled walker/chair
Weight shifts/opposite heel lifts with 4 wheeled walker/chair 10 second hold
Seated gastroc belt stretch 60 second holds x 2 twice daily
National Institute on Aging dvd
8 points limits of stability walker/chair

verbal instructions and demonstrations were provided for the above exercises
a handout was provided describing the exercises in written and picture format

Assessment / Patient Response to Therapy:
Current Status in Physical Therapy/response to intervention above: Jeane demonstrates increased independence and knowledge of current home program. Today, she ambulated farther than I have seen yet using her 4 wheeled walker. Her right shoulder flexion active range of motion is now equal to her left and she has no right shoulder pain. She was encouraged to continue using her right upper extremity with daily activities. She is making good progress toward goals for gait and static balance; will benefit from continued Physical Therapy focusing on dynamic balance, recovery steps and progressing toward long term goals.

Patient will benefit from progression to program to reach Physical Therapy goals.

Plan for next visit:
Review program
Progression:
Stepping in 6 directions and turning

TREATMENT GOALS
Anticipated Discharge Date 3/2/20

LONG TERM GOALS (Functional Goals) Patient's risk of future falls and risk for falls will be reduced, as demonstrated by:	To be met by Discharge	Current Level of Function / Participation Restrictions 9/3/2019
5 time sit to stand in 15 seconds for		Patient currently

10/10/2019 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

independence in sit to stand transitional movement without the use of arms for rising to stand		performs 0 chair sit to stands UE support
TUG of no more than 22 seconds with assistive device for adequate balance to perform sit to stand, walking and turning below fall risk cut off		Patient currently completes the TUG in 39.27 seconds with 4 wheeled walker
Single leg stance time of 6.5 seconds to allow weight shift for safe stepping up on curb or stair climbing		Patient currently performs single leg stance for 0 seconds
Gait Speed of 1 meters per second to to cross street safely		Patient's current gait speed is 0.63 with 4 wheeled walker assistive device
Functional reach of 7.4 inches for adequate balance to get dressed independently		Patient's current functional reach test is 7 inches
Number of falls is reduced to 0 in 3 consecutive months to decrease risk of injury from falls.		Patient currently reports last fall was 7/23/19 with fractures/injury
Patient reports 2-3 x week x 6 month participation in home based or community based balance training program with moderate challenge to demonstrate sustainability required to decrease fall risk		Patient currently reports some participation in lower extremity strengthening home exercise program.

Short Term Goals	To be met by	MET or UNMET / Date
Patient will demonstrate ability to properly weight shift to right/left lower extremity to progress toward single leg balance in future to reduce fall risk	10/3/19	10/10/2019 met
Patient will shift weight to 8 points limits of stability using ankle strategy to reduce loss of balance/falls during static standing activities	10/3/19	10/10/2019 met
Patient and son will verbalize understanding that current modified 4 wheeled walker is not safe for being pushed on or for walking as it has been adjusted by son	9/3/2019 met	9/3/19 met - as of 10/10/2019, they will be getting a wheelchair for safe transport
Patient will be able to use momentum to assist with powering up for sit to stand to decrease need to use	10/3/19	10/10/2019 met for proper mechanics with bilateral upper extremity support

10/10/2019 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

bilateral upper extremity support to stand		
Patient will be able to step in all directions and turn without loss of balance to reduce fall risk during dynamic stepping daily activities in home/community	11/9/19	
Patient will be able to take appropriate recovery steps forward, lateral, backward to be able to catch self in case of loss of balance to avoid a fall	12/9/19	

PLAN:
Continue per treatment plan of care.
Pain will be addressed at the next plan of care review, and intermittently during daily visits as deemed appropriate by the provider. The focus of daily visits will be on function

Patient's learning needs, abilities, preferences and readiness per Initial POC were considered in this session. Learning verified by teach back.

PHYSICAL THERAPY TREATMENT NOTE

Certification From*: 09/03/19
Certification To*: 11/02/19

Date of Symptom Onset*: 07/23/19

Start of Care Date*: 09/03/19

VISITS FROM SOC: 4
INTERPRETER STATUS (Not needed, Telephonic, In Person):not needed
Referring Provider: Phelan, E
Attending Physician: Phelan, E
Falls Doctor: Phelan, E
PCP: Neighbor Jr., William E, MD
Diagnosis: (R26.89) Imbalance (primary encounter diagnosis)

(R29.898) Leg weakness, bilateral

(W19.XXXD) Fall, subsequent encounter

09/26/2019 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

PRECAUTIONS: Fall risk

Mechanism of Injury: falls
Was previously living at home with her son, with a h/o DVTs, HTN, venous insufficiency, chronic leg ulcers, osteoporosis who was hospitalized at Harborview Medical Center from 7/25/2019 until 8/5/2019 with pelvic fx, right RF and hemo-pneumothorax secondary to GLF. Was then at SNF at Kline Galland for PT/OT

Pertinent Medical/Surgical History/Current Medications that may affect progress in PT:

Patient Active Problem List

Diagnosis

- Sensorineural hearing loss, unspecified
- DVT, recurrent, lower extremity, chronic (HCC)
- Other and unspecified hyperlipidemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Unspecified vitamin B deficiency
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- Hip joint stiffness
- Leg weakness, bilateral
- Weakness of trunk musculature
- History of recurrent deep vein thrombosis (DVT)
- Thrombocytopenia (HCC)
- Imbalance
- Primary osteoarthritis of both hips
- Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)
- Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer and inflammation, left (HCC)
- Cellulitis of left leg
- Venous ulcer of left leg (HCC)
- Homeless
- Normocytic anemia
- Severe protein-calorie malnutrition (HCC)
- Urge urinary incontinence
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Diabetic ulcer of lower extremity (HCC)
- Housing lack
- Suspected elder abuse
- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer, bilateral (HCC)
- Bilateral leg edema
- Closed displaced fracture of left pubis with routine healing
- Acute blood loss anaemia
- Closed fracture of multiple ribs of left side with routine healing

- Hemopneumothorax
- Fall

SUBJECTIVE:
Patient's Statement: I do all of my exercises - a little bit here and a little bit there; I don't sit still. I don't hurry because I will pass out. I allow time in the morning so I do not have to hurry. Per son, she walked onto ferry this morning and off ferry this morning. She states that her wounds in her legs are sometimes dry and sometimes weeping; goes to regular wound care. "let's not talk about my shoulder" states she is trying to move her shoulder. I almost fell backwards but I caught myself.

Check in on her visit with doctor for shoulder assessment - right shoulder: Per MD note 9/19/19:
Assessment and Plan:
1. Acute pain of right shoulder
(S42.291A) Closed fracture of head of right humerus, initial encounter
X ray without fracture though she has an area at the humeral head that may be calcific tendonitis vs fracture.
The exam shows diffuse shoulder pain without bruising but some weakness suggestive of rotator cuff tear.
Plan:
--Warm compresses at this time
--Referral to PT at Swedish on Bainbridge as she will need to be seen there frequently focusing on range of motion to prevent a frozen shoulder
--Referral to Orthopedics. She has metal in her hip preventing an MRI. May need CT arthrogram.
Physical Therapy referral info per 9/19/19 referral:
94 year old female with recent fall and injury of right shoulder one week ago. X ray negative. Concern for tendon injury and prevention of frozen shoulder. Referred for PT to begin soon and arranging Ortho shoulder appointment .
Precautions: None

Time in: 1030

OBJECTIVE MEASURES/IMPAIRMENTS:
Able to reach behind in seated to push with right upper extremity to stand
Able to perform AAROM flexion when instructed for right shoulder
Stood 20 minutes consecutive before sitting to rest, then got back up to do more therapy exercises
Min assist to CGA for sit to/from stand

TREATMENT/SKILLED INTERVENTION & EDUCATION:
Intervention 1: 97110 Therapeutic exercise for 20 minutes

Review program: Verbal/tactile/demo cues provided; use of mirror for further feedback/training: Walker/chair for support
-Partial squats with 4 wheeled walker/chair; holding support
-Standing holding support (progression) gastroc belt stretch 60 second holds - some increase in leg symptoms - can continue belt stretch at home as needed
-National Institute on Aging program holding support: Standing hip flex/abd/ext AROM, knee flex, ankle Plantarflexion

Progression:
AAROM right shoulder elevation (they have not yet established Physical Therapy for her shoulder near their home as ordered by ortho)

Intervention 2: **97112 Neuro Re-Ed for 20 minutes**

Review program: Verbal/tactile/demo cues provided; use of mirror for further feedback/training
Weight shifts/opposite heel lifts with 4 wheeled walker/chair 10 second hold; holding support

Progression: Verbal/tactile/demo cues provided; use of mirror for further feedback/training
Limits of stability 8 points walker/chair

Discussed patient's progress with endurance and knowledge of her current HEP with her son. Also instructed son on her new exercise 8 points limits of stability so he may assist at home as needed

Patient's learning needs, abilities, preferences and readiness per Initial POC were considered in this session. Learning verified by teach back.

HOME EXERCISE PROGRAM (HEP):
From falls clinic:
Home Safety Checklist
CDC 4 points to prevent falls
How to get up from floor

From Physical Therapy:
Balance exercises at least 2 times per week: 5 reps each
Partial squats with 4 wheeled walker/chair
Weight shifts/opposite heel lifts with 4 wheeled walker/chair 10 second hold
Seated gastroc belt stretch 60 second holds x 2 twice daily
National Institute on Aging dvd
8 points limits of stability walker/chair

verbal instructions and demonstrations were provided for the above exercises
a handout was provided describing the exercises in written and picture format

Assessment / Patient Response to Therapy:
Current Status in Physical Therapy Jeane seems familiar with current home program and able to perform today with cueing. Her son is still not sure what frequency she is doing her home program but she assures me that she is doing it throughout the day. Today, she increased her walking on/off the ferry. During course of her visit today, when we were talking about her son helping her to be compliant with her home exercise program, she mentioned that her son can be "domineering". I asked her if she needed my help and she stated that she did not need help; I offered her my support and also support of social work at any time if she needed help or had concerns. She denied any need for help at this time.

Response to Physical Therapy intervention above Standing endurance improved and right upper extremity use improved since last visit. She demonstrated good understanding of progression to further static balance exercises. I gave basic instruction on active assisted range of motion for her right shoulder elevation which she was able to perform in comfortable range of motion.

Patient will benefit from progression to program to reach Physical Therapy goals.

Plan for next visit:
Review program
Progression:

09/26/2019 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

Stepping in 6 directions and turning

PLAN:
Continue per treatment plan of care.
Pain will be addressed at the next plan of care review, and intermittently during daily visits as deemed appropriate by the provider. The focus of daily visits will be on function

Patient's learning needs, abilities, preferences and readiness per Initial POC were considered in this session. Learning verified by teach back.

Cholecalciferol 1000 units Oral Tab

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019

09/23/2019 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

Medication List (continued)

Start date: 8/20/2019 End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA Entered on: 9/4/2019
End date: 3/8/2025 Informant: Patient Reported

atorvastatin 20 MG Oral Tablet

Discontinued by: Neighbor Jr., William E, MD Discontinued on: 9/16/2020
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD Ordered on: 9/4/2019
Start date: 9/4/2019 End date: 9/16/2020
Quantity: 45 tablet Refill: 3 refills by 9/3/2020

timolol 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD Discontinued on: 1/13/2020
Instructions: One drop in each eye twice daily. Block tear duct for 1-2 minutes after use.
Authorized by: Neighbor Jr., William E, MD Ordered on: 9/4/2019
Start date: 9/4/2019 End date: 1/13/2020
Quantity: 10 mL Refill: No refills remaining

pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD Discontinued on: 9/16/2020
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD Ordered on: 9/4/2019
Start date: 9/4/2019 End date: 9/16/2020
Quantity: 90 tablet Refill: 6 refills by 9/3/2020

ACETAMINOPHEN-CODEINE 300-30 MG Oral Tablet

Discontinued by: Neighbor Jr., William E, MD Discontinued on: 11/12/2019
Reason for discontinuation: Reorder
Instructions: TAKE ONE TABLET BY MOUTH DAILY AS NEEDED ARTHRITIC PAIN AS NEEDED
Authorized by: Terry, Anne Catherine, ARNP Ordered on: 9/26/2019
Start date: 9/26/2019 End date: 11/9/2019
Quantity: 30 tablet Refill: No refills remaining

Progress Notes

Null, Margaret K, RN at 9/23/2019 1100

Pt has been in the hospital and rehab unit since her last visit here. All her wounds are looking better. Pt's son attributes this to the xeroform gauze. We told him it is due to the overall care environment. Pt is now back home with her son in an apartment. She will come here every few months and as needed.

Left lateral ankle, left medial ankle, right medial ankle, right pretib,: Clean with water, apply xeroform gauze onto the wounds, cover with gauze or ABD pad. Secure with kling and tape. Change every other day.

Norsworthy, Nilufer Bozdemir, MD at 9/23/2019 1100

PROGRESS NOTE
9/23/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with multiple bilateral lower leg ulcers with mixed vascular disease is seen today for Follow Up Visit

INTERVAL HISTORY: Both side lower leg ulcers are smaller, there are skin islands at wound beds. There is no inflammation with ulcers.
She was in hospital after two falls, hemopneumothorax and also fractured ribs and ramus pubis bone in early July. After a long hospital stay she was discharged to SNF where she rest well, legs were elevated and with better nutritional support. She actually gained some weight. She was recently discharged home to her son's (Louis) care. This is a patient with DM2, CLI with extensive atherosclerotic disease and chronic leg edema with venous hypertension is here with her son Louise, whom she lives with. She is now living in an apartment. Louis is talking about loosing meal support while she was in hospital and trying to improve the quality and amount of food at apartment. She continues to be on pentoxifylline for chronic venous insufficiency with leg ulcers.

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:Denies, fatigue, unexpected weight loss, unexpected weight gain, fever, . Does have intense itch at both lower limbs and intermittent limb pain, mostly with ambulation. She walked with a walker.

Review of patient's allergies indicates:
Allergies

Allergen	Reactions

PROCEDURE
A preprocedure time out was performed confirming the patient's identity, procedure to be performed, and site. A verbal consent was obtained.
Wound/Ulcer: # 10 and 14 / Description: wound bed and edges are covered with stringy fibrinous slough.
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue
Tissue and/or Material Removed: fibrin/slough, non-viable, skin, subcutaneous and viable
Severity: necrosis of muscle
Instruments Used: curette
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~45 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements
#10: Improved: Length 6cm X Width 5.5cm X Depth: 0.3cm
#14: Improved: Length 4.6cm X Width 2.65cm X Depth: 0.3cm
Patient tolerated the procedure well.
The wound looked improved after the debridement

ASSESSMENT: This is a patient with advanced age, venous hypertension and limb ischemia with atherosclerotic disease and DM2 has been treated at our center for extensive bilateral lower limb ulcers. With improved living situations while in hospital and also with advanced wound care dressings and infection control and treatment of infection her ulcers have much improved.
(L97.323) Non-pressure chronic ulcer of left ankle with necrosis of muscle (primary encounter diagnosis)
(L97.223) Non-pressure chronic ulcer of left calf with necrosis of muscle
(I87.313, L97.919, L97.929) Venous hypertension, chronic, with ulcer, bilateral
(I70.442) Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf

PLAN: We will continue current management.

Patient education took place regarding the treatment progress and further measures to address the condition. The patient was given an opportunity to ask questions.
Treatment plan recommended at this time includes the following:
Jeanne was seen today for follow up visit.

Diagnoses and all orders for this visit:

Non-pressure chronic ulcer of left ankle with necrosis of muscle
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Non-pressure chronic ulcer of left calf with necrosis of muscle
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Venous hypertension, chronic, with ulcer, bilateral
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Patient Instructions
Left lateral ankle, left medial ankle, right medial ankle, right pretib,: Clean with water, apply xeroform gauze onto the wounds, cover with gauze or ABD pad. Secure with kling and tape. Change every other day.

Return in about 4 weeks (around 10/21/2019).

09/23/2019 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

Visit Summary
PROGRESS NOTE
9/23/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with multiple bilateral lower leg ulcers with mixed vascular disease is seen today for Follow Up Visit

INTERVAL HISTORY: Both side lower leg ulcers are smaller, there are skin islands at wound beds. There is no inflammation with ulcers.
She was in hospital after two falls, hemopneumothorax and also fractured ribs and ramus pubis bone in early July. After a long hospital stay she was discharged to SNF where she rest well, legs were elevated and with better nutritional support. She actually gained some weight. She was recently discharged home to her son's (Louis) care. This is a patient with DM2, CLI with extensive atherosclerotic disease and chronic leg edema with venous hypertension is here with her son Louise, whom she lives with. She is now living in an apartment. Louis is talking about loosing meal support while she was in hospital and trying to improve the quality and amount of food at apartment. She continues to be on pentoxifylline for chronic venous insufficiency with leg ulcers.

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:Denies, fatigue, unexpected weight loss, unexpected weight gain, fever, . Does have intense itch at both lower limbs and intermittent limb pain, mostly with ambulation. She walked with a walker.

Review of patient's allergies indicates:

Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other
• Nitrofurantoin	Other
Confusion, loss of appetitie, nausea, abdominal pain	
• Nitrofurantoin	Other
confusion	
• Penicillins	Rash
• Sulfa Antibiotics	Rash

Current Outpatient Medications:
• acetaminophen 500 MG Oral Tab, 1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition, Disp: , Rfl:
• ACETAMINOPHEN-CODEINE 300-30 MG Oral Tablet, TAKE ONE TABLET BY MOUTH DAILY AS NEEDED ARTHRITIC PAIN AS NEEDED , Disp: 30 tablet, Rfl: 0
• atorvastatin 20 MG Oral Tablet, Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction, Disp: 45 tablet, Rfl: 3
• Calcium Carbonate 500 MG Oral Chew Tab, Chew and swallow 2 tablets by mouth 3 times a day as needed for indigestion/heartburn., Disp: , Rfl:
• Cholecalciferol 1000 units Oral Tab, Take 2 tablets (2,000 Units) by mouth daily., Disp: , Rfl:
• Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab, Take 1 tablet by mouth 2 times a day., Disp: , Rfl:
• MULTIPLE VITAMIN OR, Take by mouth., Disp: , Rfl:
• pentoxifylline ER 400 MG Oral Tab CR, Take 1 tablet (400 mg) by mouth 3 times a day., Disp: 90 tablet, Rfl: 6
• timolol 0.5 % Ophthalmic Solution, One drop in each eye twice daily. Block tear duct for 1-2 minutes after use., Disp: 10 mL, Rfl: 0

EXAM:
Vital Signs: BP 118/60 | Pulse 60 | Temp 97.4 °F (36.3 °C) (Oral) | Resp 16 | Wt 106 lb (48.1 kg) | BMI 20.03 kg/m² Body mass index is 20.03 kg/m².

PROCEDURE
A preprocedure time out was performed confirming the patient's identity, procedure to be performed, and site. A verbal consent was obtained.
Wound/Ulcer: # 10 and 14 / Description: wound bed and edges are covered with stringy fibrinous slough.
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue
Tissue and/or Material Removed: fibrin/slough, non-viable, skin, subcutaneous and viable
Severity: necrosis of muscle
Instruments Used: curette
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~45 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements
#10: Improved: Length 6cm X Width 5.5cm X Depth: 0.3cm
#14: Improved: Length 4.6cm X Width 2.65cm X Depth: 0.3cm
Patient tolerated the procedure well.
The wound looked improved after the debridement

ASSESSMENT: This is a patient with advanced age, venous hypertension and limb ischemia with atherosclerotic disease and DM2 has been treated at our center for extensive bilateral lower limb ulcers. With improved living situations while in hospital and also with advanced wound care dressings and infection control and treatment of infection her ulcers have much improved.
(L97.323) Non-pressure chronic ulcer of left ankle with necrosis of muscle (primary encounter diagnosis)
(L97.223) Non-pressure chronic ulcer of left calf with necrosis of muscle
(I87.313, L97.919, L97.929) Venous hypertension, chronic, with ulcer, bilateral
(I70.442) Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf

PLAN: We will continue current management.

Patient education took place regarding the treatment progress and further measures to address the condition. The patient was given an opportunity to ask questions.
Treatment plan recommended at this time includes the following:
Jeanne was seen today for follow up visit.

Clinical Notes

Telephone Encounter

Collins V, Marta, RN at 9/23/2019 1045

Per Dr Neighbors request:
"Jean was seen Thursday after a fall 11 days before hand. She has a small non displaced fracture of the humeral head that at this point does not require immobilization though a sling could provide comfort. The pain issue is that she needs to get into PT. She and son live on Bainbridge. There is PT locally which would be best.
Please make sure they are moving ahead with PT on Bainbridge."

Called and LM for Louis to CB and let us know if they were able to connect with PT on Bainbridge? I offered to help with calls or faxing order, etc if needed.
Marta Collins RN

Electronically signed by Collins V, Marta, RN at 9/23/2019 10:54 AM

Collins V, Marta, RN at 9/24/2019 1353

Talked to Louis yesterday afternoon, he said he had not f/u yet on the PT for his Mom and would appreciate any help in getting the process started. The PT clinic close to home is he stated was either affiliated with Swedish or located in the Swedish office complex. I made a couple of calls and found the Kitsap PT office is located w/i that office complex and they do take medicare. Louis was concerned that with his Mom getting PT at HMC for a previous hip problem that they would not authorize for PT at the same time. I brought this up with the person I talked to at the PT clinic and they clarified that the problem wouldn't be getting PT from 2 locations or for 2 separate problems, they money comes from the same pool and there is only so much allocated each year and once it is gone it is gone until the next calender year.

09/23/2019 - Telephone in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

She suggested that since the therapy is is for a shoulder issue we might be better served authorizing OT instead of PT as that comes from a separate pool of money and the tx is essentially the same. There clinic also has OT so the same location would work.
I called Louis today and LM with all of this information as well as the contact information for the clinic I will forward this message to Anne T who is covering for Dr Neighbor to ask if she will change the referral from PT to OT and I will provide the fax and contact info for our referral coordinator.
Marta Collins RN

Electronically signed by Collins V, Marta, RN at 9/24/2019 2:08 PM

Collins V, Marta, RN at 9/24/2019 1418

Louis called back, I reviewed what I researched and he is now saying he thinks it would be better for Jeane to stay at HMC for all of her therapy. They have an appt on Thursday so he asked if we could wait on the referral until he talks to the therapists at harborview to see if they can offer the same kind of OT that they would be getting in Bainbridge. He will call to let us know on Friday if we don't hear from him we can call him back because this is another delay in tx. He was very adament that getting her out of the area they are living is beneficial for mulitple reasons which he explained very carefully to me. I expressed some reservation as it is a long trip in to HMC weekly or biweekly and wouldn't she be more fatigued than if she was getting therapy a block from home. He persisted in his assertion that the care is better, the social aspect is better, the food is better and giving her some place to go and something to do is beneficial.
Marta Collins RN

Electronically signed by Collins V, Marta, RN at 9/24/2019 2:26 PM

Terry, Anne Catherine, ARNP at 9/30/2019 1456

New general referral to OT for chronic right shoulder pain placed now.

09/23/2019 - Telephone in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Collins V, Marta, RN at 10/9/2019 0854

Attempted to reach pts son again but phone went directly to message this time? Left another VM asking the status of the referral for OT?
Marta Collins RN

Electronically signed by Collins V, Marta, RN at 10/9/2019 9:02 AM

Collins V, Marta, RN at 10/9/2019 0856

I realized after checking her encounterto see if she has a f/u scheduled with Dr Neighbor (she does, 10/23) that she has an appt scheduled for her shoulder at HMC Sports Medicine Center on 10/11. I wouldn't have guessed that is where they would see her but I am glad that something is finally arranged. I will forward to ATerry NP and Dr Neighbor and close this encounter now that I see she has a scheduled appt.

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 9/19/2019 1300

Jeanne Leonie Hoffman is a 94 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Shoulder Injury
  right. fell in a hole 11 days ago

11 days ago when being accompanied by her son with her wheeled walker and getting off the Bainbridge area in Seattle where there is construction and disruption of the sidewalk and fell into a shallow depression in the dirt with Jean falling onto her right side. They did not seek medical attention. Since then she has complained of right shoulder pain and has had difficulties moving the shoulder. There's been no radiation of pain into the lower arm and no numbness in the arm or weakness in the hand or forearm.

Of note she was hospitalized this summer for her fracture with hemothorax and pelvic fracture.

She has been taking Tylenol for discomfort.

She was seen for physical therapy at Harborview today for balance issues and recovery from her injuries this summer.

She was instructed to seek care today for evaluation.

Review of Systems:
She has not had any fever chills or night sweats.
She is wearing her hearing aids today which improves communication.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Unspecified vitamin B deficiency [E53.9] 05/01/2007

Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic (HCC) [I82.509] 11/20/2006

Recurrent DVT and phlebitis since 1982
Per Vascular Surgery note 5/9/2006: continue warfarin
3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006

On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006

LS spine. Bilateral talonavicular arthritis since 1994.

Objective:

BP (!) 146/67 | Pulse 67

Estimated body mass index is 20.99 kg/m² as calculated from the following:
Height as of 8/20/19: 5' 1" (1.549 m).
Weight as of 8/20/19: 50.4 kg (111 lb 1.6 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
(!) 146/67	67	---	---	---	1:29 PM	9/19/2019

Last blood pressure recorded in this encounter: **(!) 146/67**
General: Complaining of right shoulder pain
Neck: Full range of motion without tenderness
Right shoulder: Tender without bruising over the lateral aspect of the upper humerus near the shoulder joint. There is no swelling. Palpation of the clavicle and acromion processes without tenderness. There is no step-off.
Motion is limited because of discomfort. Internal and external rotation are weak because of discomfort but resistance is present. There is also resistance to abduction though it is quite painful. Passive range of motion limited due to discomfort.

Lab and other tests: Shoulder X ray shows abnormality humeral head laterally which could be small fracture versus calcific tendonitis.

Assessment and Plan:

1. Acute pain of right shoulder
(S42.291A) Closed fracture of head of right humerus, initial encounter
X ray without fracture though she has an area at the humeral head that may be calcific tendonitis vs fracture. The exam shows diffuse shoulder pain without bruising but some weakness suggestive of rotator cuff tear.
Plan:
--Warm compresses at this time
--Referral to PT at Swedish on Bainbridge as she will need to be seen there frequently focusing on range of motion to

Question	Answer
Relevant signs, symptoms, or diagnosis and clinical question to be answered:	Fell a couple of days ago. Now right shoulder pain in 94 year old with osteoporosis and hx of fx

Indications

Acute pain of right shoulder [M25.511 (ICD-10-CM)]

XR SHOULDER 2+ VW RIGHT Resulted: 09/19/19 1419, Result status: Final result

Order status: Completed
Filed by: Uw Radiology Results Interface, User 09/19/19 1421
Accession number: 12713056
Lab Technician: AJAY CHHABRA HALL HEALTH TECH
Resulted by: Mulcahy, Hyojeong, MD
Performed: 09/19/19 1225 - 09/19/19 1225
Resulting lab: UW RADIOLOGY
Narrative:
EXAMINATION:

09/19/2019 - Office Visit in Husky Health Primary Care Clinic (continued)

Imaging (continued)

XR SHOULDER MIN 2 VIEWS RIGHT, XR HUMERUS MIN 2 VIEWS RIGHT

CLINICAL INDICATION:
Fell a couple of days ago. Now right shoulder pain in 94 year old with osteoporosis and hx of fx

COMPARISON:
No prior images are currently available for comparison.

FINDINGS:
Bones are osteopenic.
There is mild osteoarthritis at acromioclavicular and glenohumeral joints.
Calcification at the acromiohumeral interval is in keeping with calcific rotator cuff tendinosis.

A minimally displaced fracture is noted at the greater tuberosity.

Result Notes

William E Neighbor Jr., MD
9/20/2019 3:41 PM PDT

Jeanne:
The area on her right shoulder x-ray that I thought was consistent with tendon calcification, the radiologist felt was a small nondisplaced fracture. Usually this is treated with a sling for support for a few days before beginning active range of motion. Your injury was over a week ago. At this time a sling might be used for comfort but the most important thing is to begin physical therapy for range of motion. I encouraged you to schedule an appointment with the physical therapist on Bainbridge for which I wrote a referral.

Clinical Notes

Result Encounter Note

Neighbor Jr., William E, MD at 9/19/2019 1235

Jeanne:
The area on her right shoulder x-ray that I thought was consistent with tendon calcification, the radiologist felt was a small nondisplaced fracture. Usually this is treated with a sling for support for a few days before beginning active range of motion. Your injury was over a week ago. At this time a sling might be used for comfort but the most important thing is to begin physical therapy for range of motion. I encouraged you to schedule an appointment with the physical therapist on Bainbridge for which I wrote a referral.

Lab Technician: AJAY CHHABRA HALL HEALTH TECH
Resulted by: Mulcahy, Hyojeong, MD
Performed: 09/19/19 1226 - 09/19/19 1226
Resulting lab: UW RADIOLOGY

Narrative:
EXAMINATION:
XR SHOULDER MIN 2 VIEWS RIGHT, XR HUMERUS MIN 2 VIEWS RIGHT

CLINICAL INDICATION:
Fell a couple of days ago. Now right shoulder pain in 94 year old with osteoporosis and hx of fx

COMPARISON:
No prior images are currently available for comparison.

FINDINGS:
Bones are osteopenic.
There is mild osteoarthritis at acromioclavicular and glenohumeral joints.
Calcification at the acromiohumeral interval is in keeping with calcific rotator cuff tendinosis.

A minimally displaced fracture is noted at the greater tuberosity.

Clinical Notes (continued)

PRECAUTIONS: Fall risk

Mechanism of Injury: falls
Was previously living at home with her son, with a h/o DVTs, HTN, venous insufficiency, chronic leg ulcers, osteoporosis who was hospitalized at Harborview Medical Center from 7/25/2019 until 8/5/2019 with pelvic fx, right RF and hemo-pneumothorax secondary to GLF. Was then at SNF at Kline Galland for PT/OT

Pertinent Medical/Surgical History/Current Medications that may affect progress in PT:

Patient Active Problem List

Diagnosis

- Sensorineural hearing loss, unspecified
- DVT, recurrent, lower extremity, chronic (HCC)
- Other and unspecified hyperlipidemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Unspecified vitamin B deficiency
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- Hip joint stiffness
- Leg weakness, bilateral
- Weakness of trunk musculature
- History of recurrent deep vein thrombosis (DVT)
- Thrombocytopenia (HCC)
- Imbalance
- Primary osteoarthritis of both hips
- Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)
- Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer and inflammation, left (HCC)
- Cellulitis of left leg
- Venous ulcer of left leg (HCC)
- Homeless
- Normocytic anemia
- Severe protein-calorie malnutrition (HCC)
- Urge urinary incontinence
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Diabetic ulcer of lower extremity (HCC)
- Housing lack
- Suspected elder abuse
- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer, bilateral (HCC)
- Bilateral leg edema
- Closed displaced fracture of left pubis with routine healing
- Acute blood loss anaemia
- Closed fracture of multiple ribs of left side with routine healing

- Hemopneumothorax
- Fall

SUBJECTIVE:
Patient's Statement: I think I really hurt my shoulder last week - having right shoulder pani 5-10/10 constant. My son wants me to do my exercises a certain way and that does not work for me. Son reports she has not been tracking her exercises on the tracking form and so he does not know if she is doing them. When asked, patient reports that she feels safe at home

Time in: 1006 - late arrival

OBJECTIVE MEASURES/IMPAIRMENTS:
Able to perform sit to stand, standing in 4 wheeled walker today with CGA/SBA

TREATMENT/SKILLED INTERVENTION & EDUCATION:
Intervention 1: 97110 Therapeutic exercise for 34 minutes

Review program: Verbal/tactile/demo cues provided; use of mirror for further feedback/training
-Partial squats with 4 wheeled walker/chair; holding support
-Weight shifts/opposite heel lifts with 4 wheeled walker/chair 10 second hold; holding support
-Seated gastroc belt stretch 60 second holds x 2 twice daily (verbal review) - reports compliance
-National Institute on Aging program: Standing hip flex/abd/ext AROM, knee flex, ankle Plantarflexion

Discussed with patient and with patient/son, the patient's needs as she verbalized to me around home exercise
-we clarified that her son does not expect her to do the same exercises that he does
-we discussed that her son encourages her to perform exercise (1 at a time) throughout the day to stay active and get her program done; Jeane can do this method or do her program all at once - both options are suitable
-we discussed resting and rest is important; just like rest is important, getting up every hour to stand/walk is also important
-I advised her son to not overload her with exercise suggestions and exercise materials as this may be counterproductive
-I emphasized that we are helping her to be her best self and I want to help her with an exercise program that works best for her; continuing to individualize her program

Patient's learning needs, abilities, preferences and readiness per Initial POC were considered in this session. Learning verified by teach back.

HOME EXERCISE PROGRAM (HEP):
From falls clinic:
Home Safety Checklist
CDC 4 points to prevent falls
How to get up from floor

From Physical Therapy:
Balance exercises at least 2 times per week: 5 reps each
Partial squats with 4 wheeled walker/chair

09/19/2019 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

Weight shifts/opposite heel lifts with 4 wheeled walker/chair 10 second hold
Seated gastroc belt stretch 60 second holds x 2 twice daily
National Institute on Aging dvd

verbal instructions and demonstrations were provided for the above exercises
a handout was provided describing the exercises in written and picture format

Assessment / Patient Response to Therapy:
Current Status in Physical Therapy she and her son are not fully understanding each other around how much exercise and what type of exercise is expected of Jeane. I spent time discussing individually with Jeane and with jeane and her son my Physical Therapy expectations for exercise and how we can best support Jeane with individualized care.

Response to Physical Therapy intervention above Jeane was able to stand and transfer today without physical assist. She demonstrated good motivation and endurance performing above exercises without a rest break seated. She would benefit from having her right shoulder examined by a doctor as it is tender to very light touch and in constant pain since last week; son agreed to take her to have it looked at.

Patient will benefit from progression to program to reach Physical Therapy goals.

Plan for next visit:
Check in on her visit with doctor for shoulder assessment - right shoulder
Review:
National Institute on Aging program as needed
Partial squats with 4 wheeled walker/chair
Weight shifts/opposite heel lifts with 4 wheeled walker/chair 10 second hold
Seated gastroc belt stretch 60 second holds x 2 twice daily
Progression:
Limits of stability 8 points

PLAN:
Continue per treatment plan of care.
Pain will be addressed at the next plan of care review, and intermittently during daily visits as deemed appropriate by the provider. The focus of daily visits will be on function

Patient's learning needs, abilities, preferences and readiness per Initial POC were considered in this session. Learning verified by teach back.

Active at the End of Visit

Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Instructions: Take 1 tablet by mouth 2 times a day.
Entered by: Ong, Thuan Duc, MD
Entered on: 6/7/2018
End date: 10/13/2021

acetaminophen 500 MG Oral Tab

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions:
1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 6/12/2024
Action: Patient not taking

Calcium Carbonate 500 MG Oral Chew Tab

Discontinued by: Clark, Trika L, Pharmacy Technician
Discontinued on: 1/9/2025
Reason for discontinuation: Discontinued by patient
Instructions: Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 1/9/2025

Cholecalciferol 1000 units Oral Tab

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/20/2019
End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA
Entered on: 9/4/2019
End date: 3/8/2025
Informant: Patient Reported

atorvastatin 20 MG Oral Tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/16/2020
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/4/2019
Start date: 9/4/2019
End date: 9/16/2020
Quantity: 45 tablet
Refill: 3 refills by 9/3/2020

timolol 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 1/13/2020

09/18/2019 - Telephone in Northwest Hospital Wound Care & Hyperbaric Center (continued)

Medication List (continued)

Instructions: One drop in each eye twice daily. Block tear duct for 1-2 minutes after use.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/4/2019
Start date: 9/4/2019
End date: 1/13/2020
Quantity: 10 mL
Refill: No refills remaining

pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/16/2020
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/4/2019
Start date: 9/4/2019
End date: 9/16/2020
Quantity: 90 tablet
Refill: 6 refills by 9/3/2020

(W19.XXXD) Fall, subsequent encounter

09/12/2019 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

PRECAUTIONS: Fall risk

Mechanism of Injury: falls
Was previously living at home with her son, with a h/o DVTs, HTN, venous insufficiency, chronic leg ulcers, osteoporosis who was hospitalized at Harborview Medical Center from 7/25/2019 until 8/5/2019 with pelvic fx, right RF and hemo-pneumothorax secondary to GLF. Was then at SNF at Kline Galland for PT/OT

Pertinent Medical/Surgical History/Current Medications that may affect progress in PT:

Patient Active Problem List

Diagnosis

- Sensorineural hearing loss, unspecified
- DVT, recurrent, lower extremity, chronic (HCC)
- Other and unspecified hyperlipidemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Unspecified vitamin B deficiency
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- Hip joint stiffness
- Leg weakness, bilateral
- Weakness of trunk musculature
- History of recurrent deep vein thrombosis (DVT)
- Thrombocytopenia (HCC)
- Imbalance
- Primary osteoarthritis of both hips
- Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)
- Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer and inflammation, left (HCC)
- Cellulitis of left leg
- Venous ulcer of left leg (HCC)
- Homeless
- Normocytic anemia
- Severe protein-calorie malnutrition (HCC)
- Urge urinary incontinence
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Diabetic ulcer of lower extremity (HCC)
- Housing lack
- Suspected elder abuse
- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer, bilateral (HCC)
- Bilateral leg edema
- Closed displaced fracture of left pubis with routine healing
- Acute blood loss anaemia
- Closed fracture of multiple ribs of left side with routine healing

- Hemopneumothorax
- Fall

SUBJECTIVE:
Patient's Statement: fell in sink hole at construction site getting off ferry just now; was being pushed in her 4 wheeled walker by her son but remained sitting in the 4 wheeled walker - did not hit head; denies injury; son denies injury.

Time in: 0830

OBJECTIVE MEASURES/IMPAIRMENTS:
Unable to stand without external support today; was holding eyes closed and stating that she felt like she had experienced some "trauma" with the fall earlier this morning (fall while she remained upright in her 4 wheeled walker sitting)

TREATMENT/SKILLED INTERVENTION & EDUCATION:
Intervention 1: 97110 Therapeutic exercise for 37 minutes

Review program: Verbal/tactile/demo cues provided; use of mirror for further feedback/training
Partial squats with 4 wheeled walker/chair: Verbal review - patient reports compliance
Weight shifts/opposite heel lifts with 4 wheeled walker/chair 10 second hold: UNABLE TODAY
Seated gastroc belt stretch 60 second holds x 2 twice daily

Progression: Verbal/tactile/demo cues provided; use of mirror for further feedback/training: patient watched the dvd exercises many of which she has already been given by her SNF Physical Therapy and has in paper format:
-National lnstitute on Aging program and issue dvd

Discussed ways to help motivate Jeane's participation in home exercises - son does not believe that Jeane is compliant at home as recommended.
-encouraged Jeane to tell me at next visit why exercise is good for her
-discussed with patient's son that trying to give her too many exercises may be counterproductive
-recommended patient only do exercises with son present for safety
-discussed that we will continue to provide support and encouragement for self care/home exercise at each Physical Therapy visit.
-great job with sitting and canning - staying active and doing something she enjoys - discussed that she still needs to be sure she is doing all the types of important exercises including lower extremity strength and balance

Patient's learning needs, abilities, preferences and readiness per Initial POC were considered in this session. Learning verified by teach back.

HOME EXERCISE PROGRAM (HEP):
From falls clinic:
Home Safety Checklist
CDC 4 points to prevent falls
How to get up from floor

From Physical Therapy:
Balance exercises at least 2 times per week: 5 reps each

Partial squats with 4 wheeled walker/chair
Weight shifts/opposite heel lifts with 4 wheeled walker/chair 10 second hold
Seated gastroc belt stretch 60 second holds x 2 twice daily

verbal instructions and demonstrations were provided for the above exercises
a handout was provided describing the exercises in written and picture format

Assessment / Patient Response to Therapy:
Current Status in Physical Therapy Son is questioning her compliance with home program and notes she can have decreased motivation. She does enjoy canning but has been encouraged to practice the recommended exercises for lower extremity strength and balance. She did not feel well enough to stand today for exercise due to "falling in a sink hole" this morning when being pushed by her son in her 4 wheeled walker - she remained upright in the 4 wheeled walker per my understanding and they both deny physical trauma.

Response to Physical Therapy intervention above She and son are agreeable to try the National Institute on Aging dvd program for home exercise; goal is to increase compliance and motivation as well as improve endurance/strength/balance. She is familiar with many of the exercises from previous Physical Therapy home program. We will continue to work on balance and strength to reduce fall risk as patient tolerates and continue providing encouragement for home compliance and motivation. She was unable to stand without min/mod assist by Physical Therapy today attributing it to the "trauma" of her fall earlier this am .

Patient will benefit from progression to program to reach Physical Therapy goals.

Plan for next visit:
Review National Institute on Aging program
Resume program
Partial squats with 4 wheeled walker/chair
Weight shifts/opposite heel lifts with 4 wheeled walker/chair 10 second hold
Seated gastroc belt stretch 60 second holds x 2 twice daily
Progression:
Limits of stability 8 points

PLAN:
Continue per treatment plan of care.
Pain will be addressed at the next plan of care review, and intermittently during daily visits as deemed appropriate by the provider. The focus of daily visits will be on function

Patient’s learning needs, abilities, preferences and readiness per Initial POC were considered in this session.
Learning verified by teach back.

This report is for documentation purposes only. The patient should not follow medication instructions within. For accurate instructions regarding medications, the patient should instead consult their physician or after visit summary.

Active at the End of Visit

Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Instructions: Take 1 tablet by mouth 2 times a day.
Entered by: Ong, Thuan Duc, MD
Entered on: 6/7/2018
End date: 10/13/2021

acetaminophen 500 MG Oral Tab

Discontinued by: Van Hoff, Linda A, ARNP
Discontinued on: 6/12/2024
Reason for discontinuation: Med list cleanup
Instructions:
1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 6/12/2024
Action: Patient not taking

Calcium Carbonate 500 MG Oral Chew Tab

Discontinued by: Clark, Trika L, Pharmacy Technician
Discontinued on: 1/9/2025
Reason for discontinuation: Discontinued by patient
Instructions: Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.
Entered by: Taylor, Zoe Judith Mildred, MD
Entered on: 8/20/2019
Start date: 8/5/2019
End date: 1/9/2025

Cholecalciferol 1000 units Oral Tab

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.

09/04/2019 - Office Visit in Husky Health Primary Care Clinic (continued)

Medication List (continued)

End date: 3/8/2025

MULTIPLE VITAMIN OR

Discontinued by: Barnes, James Irvin, MD
Discontinued on: 3/8/2025
Instructions: Take 1 tablet by mouth daily.
Entered by: Pearson, Terri Jeanne, CMA
Entered on: 9/4/2019
End date: 3/8/2025
Informant: Patient Reported

atorvastatin 20 MG Oral Tablet

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/16/2020
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/4/2019
Start date: 9/4/2019
End date: 9/16/2020
Quantity: 45 tablet
Refill: 3 refills by 9/3/2020

timolol 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 1/13/2020
Instructions: One drop in each eye twice daily. Block tear duct for 1-2 minutes after use.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/4/2019
Start date: 9/4/2019
End date: 1/13/2020
Quantity: 10 mL
Refill: No refills remaining

pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/16/2020
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 9/4/2019
Start date: 9/4/2019
End date: 9/16/2020
Quantity: 90 tablet
Refill: 6 refills by 9/3/2020

Stopped in Visit

None

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 9/4/2019 1120

Jeanne Leonie Hoffman is a 94 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Hospital Follow-up
- Wound Check
  lower legs

Jeanne is in with her son Louis. Jeanne is status post fall with rib fracture and hemopneumothorax at the end of July along with pubic ramus fracture requiring prolonged hospital stay at HMC and subsequent nursing home care at Kline Galland. She is now back at their apartment on Bainbridge. While at the nursing home she had UTI which was treated and resolved. She is amubulating with her walker with much less pain than in the past. Her son is taking her to PT at HMC and arranging for PT closer to where they live on Bainbridge (Swedish in a block away). She has had no further falls. She is wearing her hearing aids consistently. Louis is arranging an eye clinic appointment.

Louis has been performing wound dressing changes for Jeanne's lower legs. He brings her in today to review meds and for dressing change and planning.

Regarding medications, she is taking acetmenophen when needed but no longer taking tylenol with codeine. She was on a course of oxycodone in the hospital and still has a few pills left over but is not taking those. She has been off coumadin since near the beginning of the year due to concerns about risk of falls outweighing benefits. She has not had recurrent DVT. However, it appears she has not recently been taking Pentoxyfyline which she had been on for years. A refill is needed.

One issue to be resolved is whether to obtain bone density study or simply start biphosphonate therapy (she was on in the distant past but this was discontinued). Geriatric medicine consultation note at HMC suggests repeat bone density and then consideration for bisphosphonate therapy.

Review of Systems:
No fever, chills, sweats
Appetite is good
No shortness of breath
No abdominal pain or nausea
Denies current constipation
Denies dysuria, change in urine color or odor.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

• Adult failure to thrive syndrome [R62.7]	10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

• Unspecified vitamin B deficiency [E53.9]	05/01/2007

Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

• Sensorineural hearing loss, unspecified [H90.5]	11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

09/04/2019 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

- DVT, recurrent, lower extremity, chronic (HCC) [I82.509] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

- Fall [W19.XXXA] 09/03/2019
- Closed displaced fracture of left pubis with routine healing [S32.502D] 08/11/2019
- Acute blood loss anaemia [D62] 08/11/2019
- Closed fracture of multiple ribs of left side with routine healing [S22.42XD] 08/11/2019
- Hemopneumothorax [J94.2] 08/11/2019

Substance Use Topics

- Alcohol use: No

Objective:

BP (!) 143/65 | Pulse 62 | Temp 97.4 °F (36.3 °C) (Oral)
Estimated body mass index is 20.99 kg/m² as calculated from the following:
Height as of 8/20/19: 5' 1" (1.549 m).
Weight as of 8/20/19: 50.4 kg (111 lb 1.6 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
(!) 143/65	62	---	---	---	10:55 AM	9/4/2019

Last blood pressure recorded in this encounter: **(!) 143/65**
General: NAD

Wt Readings from Last 8 Encounters:

08/20/19	50.4 kg (111 lb 1.6 oz)
03/28/19	51.7 kg (114 lb)
02/28/19	50.3 kg (111 lb)
01/31/19	46.3 kg (102 lb)
10/08/18	50.8 kg (112 lb)
09/26/18	51.1 kg (112 lb 9.6 oz)
09/24/18	51.3 kg (113 lb)
08/14/18	53.2 kg (117 lb 4 oz)

Nutritional status much improved.

Psych: Orientation intact. Has hearing aids though still cannot hear that well, but interactive and smiling today. Clothing clean and appears less disheveled than in recent visits
Chest Clear
Cor: HR reg
Abd: soft and non tender
Extremities: Dressing removed. Multiple more superficial stasis ulcers than seen in the past. My impression and nurse who has seen her before is that there is marked improvement.

Lab and other tests: Labs from hospital stay reviewed

Assessment and Plan:
(I83.008, L97.801) Venous stasis ulcer of other part of lower leg limited to breakdown of skin, unspecified laterality, unspecified whether varicose veins present (HCC) (primary encounter diagnosis)
(E78.00) Hypercholesterolemia
(H40.9) GLAUCOMA NOS
(Z86.718) History of recurrent deep vein thrombosis (DVT)
(I10) Essential hypertension, benign
(S22.42XD) Closed fracture of multiple ribs of left side with routine healing
(E55.9) Vitamin D deficiency
(D64.9) Normocytic anemia

Plan:
Non prescription medications:
Acetaminophen 500 mg two three times daily for pain. Max 3000 mg daily
Calcium carbonate (Tums) 500 mg as needed for heart burn
Vitamin D 1000 IU daily
Miralax 17 gram once daily as needed for constipation
Multiple vitamin once daily

Prescription medications
Atorvastatin 20 mg one half tablet daily for cholesterol
Timolol eye drop 0.5% 1 ondrop each eye twice daily for gluacoma. Block tear duct for 1-2 minutes
Pentoxifylline 400 mg three times daily

Past prescription medications not to be used at this time:
--Oxycodone or Tylenol with codeine should not be used at this time
--Warfarin (Coumadin) 4 mg once daily not to be used at this time due to risk with falls
--Losartan 25 mg one half tablet daily to be held. Would restart if blood pressure goes above 160

Care:
--Nutrition. Explore option of Meals on Wheels. Important for wound healing to have excellent nutrition
--Sleep. Doing well
--Ambulation. She is using the walking and continuing PT. This can be moved to Swedish which is near where they live.
--Hearing: Continue daily use of hearing aids which is important for falls prevention
--Vision. Schedule visit with eye care as planned
--Bones. I will review the notes from Harborview. I believe the next step is a bone density scan versus start osteoporosis treatment.
--Pain: She is doing well now. Tylenol should be the mainstay and avoid narcotic use
--Wound care. Son has wound care instructions and supplies from nursing home and HMC. He understands the wound care procedure and has observed again today when nurses changed dressings. To his knowledge there is not wound care available in the VM or Swedish clinics on Bainbridge and within the UW system the wound care clinic is at Northwest where they have been before., At this time, I would advise follow up at Northwest where Jeanne has been seen in the past.
Copy of wound care instructions form UW Medicine Post Acute Care Service dated August 29 is scanned to record.

Note: Reviewed Geriatrics note from HMC. Recommendation was bone density study then consider biphosphonates. BMD ordered.

Wound Care Visit - Completed w/ Lee Ling C. RN

S:
Jeanne Leonie Hoffman who is 94 year old presents today for nursing home discharge and wound f/u with Dr. Neighbor.
History of wound: Extensive bilateral lower limb ulcers, hx of bilateral limb ischemia and chronic vascular insufficiency, underlying DM2, complex psychosocial hx.
Pain: Pt reports no pain at this visit. Some itching.
Home treatment: Son is doing wound care at home QOD. Washing with NS or soap/water, applying Amlactin, and covering with xeroform, ABD pad, kerlix, and ace wrap.

O:
Location: Bilateral lower extremities.
Wound bed: Minimal amounts of yellow slough. Pink granulation tissue noted.
Exudate: Minimal amounts of exudate note.
Periwound condition: Mildly erythematous w/ dry, scaling skin.
TDAP status: 9/20/17

A:
Wound Healing Status: Healing steadily, condition much improved from last visit on 7/10/19.
Presence of signs of infection or over-colonization? None at this time.

P:
Legs cleansed extensively w/ NS soaked sterile gauze in attempts to remove yellow slough and dead skin as much as possible.Pt tolerated cleaning well and with no difficulty.
Primary dressing and topical: Covered with vaseline impregnated gauze and ABD pads over affected surface area on lower extremities. ABD pads secured w/ Ace wrap and paper tape.
Debridement Type: Gentle removal of superficial slough and dead skin with sterile gauze and NS. No sharp debridement performed this visit.

Patient's Home Care Instructions:
- Wash hands before and after wound care with soap and water for at least 15 seconds
- Keep dressing dry and clean
- Son will continue home care and dressing changes as he has been doing QOD
- Monitor and report increased redness, drainage, warmth, pain, or fevers (greater than 100.5F)
- Encouraged to increase protein and fluid intake and elevate extremity

09/04/2019 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Pt agrees to plan and verbalizes understanding. No further questions at this time.To call clinic with any further concerns

After Visit Summary (continued)

Your Medication List as of 9/4/19 12:51 PM

ⓘ If you have any questions, ask your nurse or doctor.

acetaminophen 500 MG Tablet	1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
Acidophilus 0.5 MG Tablet	Take 1 tablet by mouth 2 times a day.
atorvastatin 20 MG Tablet	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Calcium Carbonate 500 MG Tablet Chewable	Chew and swallow 2 tablets by mouth 3 times a day as needed for indigestion/heartburn.
Cholecalciferol 1000 units Tablet	Take 2 tablets (2,000 Units) by mouth daily.
MULTIPLE VITAMIN OR	Take by mouth.
pentoxifylline ER 400 MG Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.
CHANGE **timolol** 0.5 % Solution Changed by: William E Neighbor, MD	One drop in each eye twice daily. Block tear duct for 1-2 minutes after use. What changed: **See the new instructions.**

09/04/2019 - Office Visit in Husky Health Primary Care Clinic (continued)

After Visit Summary (continued)

Instructions from William E Neighbor, MD

Assessment and Plan:

Plan:
Non prescription medications:
Acetaminophen 500 mg two three times daily for pain. Max 3000 mg daily
Calcium carbonate (Tums) 500 mg as needed for heart burn
Vitamin D 1000 IU daily
Miralax 17 gram once daily as needed for constipation
Multiple vitamin once daily

Prescription medications
Atorvastatin 20 mg one half tablet daily for cholesterol
Timolol eye drop 0.5% 1 ondrop each eye twice daily for gluacoma. Block tear duct for 1-2 minutes
Pentoxifylline 400 mg three times daily

Past prescription medications not to be used at this time:
--Oxycodone or Tylenol with codeine should not be used at this time
--Warfarin (Coumadin) 4 mg once daily not to be used at this time due to risk with falls
--Losartan 25 mg one half tablet daily to be held. Would restart if blood pressure goes above 160

Care:
--Nutrition. Explore option of Meals on Wheels. Important for wound healing to have excellent nutrition
--Sleep. Doing well
--Ambulation. She is using the walking and continuing PT. This can be moved to Swedish which is near where they live.
--Hearing: Continue daily use of hearing aids which is important for falls prevention
--Vision. Schedule visit with eye care as planned
--Bones. I will review the notes from Harborview. I believe the next step is a bone density scan versus start osteoporosis treatment.
--Pain: She is doing well now. Tylenol should be the mainstay and avoid narcotic use

Messages (continued)

6/5/2024 6:05 AM by Hoffman, Jeanne Leonie

After your visit I reviewed the Geriatrics note from Harborview. Looks like the next step is actually to obtain the bone density study then refer to the osteoporosis clinic. I have ordered the bone density study to be done at Roosevelt.

William E Neighbor, MD

Clinical - Scan on 9/10/2019 11:53 AM: Woundcare

Scan (below)

UW Medicine Post-Acute Care Services

Patient: Jeanne Hoffman
DOB: 01/06/1925
Sex: Female
Allergies: Aspirin, Nitrofurantoin, Penicillin, Sulfanilamide, adhesive bandage

Medications

1. Acetaminophen Tablet 500 MG Give 2 tablet by mouth three times a day for Pain NTE 3gm per daily
2. Atorvastatin Calcium Tablet 10 MG Give 1 tablet by mouth at bedtime for HLD
3. Calcium Carbonate Tablet Chewable 500 MG Give 2 tablet by mouth every 8 hours as needed for Indigestion\/Heartburn
4. Cholecalciferol Tablet 1000 UNIT Give 1 tablet by mouth one time a day for Supplement
5. MiraLax Powder Give 17 gram by mouth one time a day for Constipation
6. MVI with Minerals 1 po daily as dietary supplement Give 1 tablet by mouth one time a day for dietary supplement
7. Timolol Maleate Solution 0.5 % Instill 1 drop in both eyes two times a day for Dry Eyes Tilt head back and pull the lower eyelid downward away from the eye. Make sure the drop makes a full contact with conjunctival sac. Wait 5mins for the next drop. Press tear duct for 1-2 mins after.

Dispense 2 weeks of the above medications unless otherwise indicated

Wound treatment:

BLE Treatment: Cleanse area with soap and water or NS. Gently remove loose/dried exudate as able. Apply no-sting barrier to peri-wound skin and allow 30+sec to dry to protect skin from drainage. Cover wounds with Xeroform, cover with gauze or ABD pads and secure with Kerlix and tape. Change daily and PRN.

Right lower leg: Cleanse wound w/ ns or wound spray, pat dry. Apply Amlactin to intact skin of LE wound dressing. Apply Xeroform, cover wound w/ ABD, Secure drg w/ Kerlix, then Ace Wrap. Change dressing QOD and as needed for soiling, saturation or accidental removal.

Left lower leg: Cleanse wound w/ ns or wound spray, pat dry. Apply Amlactin to intact skin of LE wound dressing. Apply Xeroform, cover wound w/ ABD, Secure drg w/ Kerlix, then Ace Wrap. Change dressing QOD and as needed for soiling, saturation or accidental removal.

Dispense 1 week of wound care supplies

• Allergic rhinitis, cause unspecified	11/20/2006
• Carpal tunnel syndrome *Carpal tunnel release right wrist in 1989*	11/20/2006
• Closed fracture of unspecified intracapsular section of neck of femur (HCC) *Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.*	5/1/2007
• DIAPHRAGMATIC HERNIA *CT of abdomen in 2006*	11/20/2006
• Esophageal reflux	11/20/2006
• Impaired fasting glucose	3/22/2007
• Other convulsions (HCC) *Petit Mal since 1975 Carbamazepine level 7.6 on Feb 2007 Discontinued based on ER neuro consult in early 2013 No recurrence*	11/20/2006
• PAD (peripheral artery disease) (HCC)	
• Thyroid nodule, uninodular *CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.*	12/13/2012
• Ulcer of left lower extremity, limited to breakdown of skin (HCC) *Chronic, Multiple sites of lower leg and ankle, with MSSA*	
• Vertebral fracture *Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed*	12/13/2012

Past Surgical History:

Procedure	Laterality	Date
• TOTAL ABDOMINAL HYSTERECT W/WO RMVL TUBE OVARY		

Previous Therapy: at SNF Physical Therapy/OT

Prior Level of Function: Before onset of the current condition, the patient was able to walk with improved endurance, cook more independently

Home Environment: with son in apartment, ADA apartment; now has a hand rail in hallways, on cabinets, on walls, in bathroom, shower chair, hand holds on both sides of toilet

09/03/2019 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

SUBJECTIVE:
Time In: 1058

Patient's Statement: I don't have any pain, just some soreness. Arrives with son, Louis, today for her appointment who is her primary caregiver and willing to help her with all of her exercises

Last Fall: symptoms/prior falls/location/activity/time of day: 7/23/19:
Location: kitchen at home. Was hold onto the wall, then holding onto the fridge, fell back when the door of fridge opened and caused her to lose her balance.
Time of day: daytime
Type of footwear: sneaker
Wearing glasses, if applicable: yes
Wearing hearing aid, if applicable: yes
Using assistive device: no
No symptoms prior to fall

Patient's Goals for PT: Work on balance

Ambulation Device : Patient ambulates with modified 4 wheeled walker which they use at times as a wheelchair (counseled) - state they will only use it temporarily in community and front wheeled walker at home.

Obstacles in home (pets, rugs, cords): none

Footwear: Outside: sneakers **Inside:** sneakers
Eyeglasses: bifocals
Exercise: before fall just walking, after fall SNF for Physical Therapy /OT
Noc: 2-3 times
Fluid: not enough/not much

OBJECTIVE MEASURES / IMPAIRMENTS:
Pain: 0/10 just a little bit sore

Fall Risk Screen:
TUG: 39.27 seconds (>13.5 sec indicates fall risk) **with 4 wheeled walker**

Gait levels: forward flexed over 4 wheeled walker - holds walker far forward; 4 wheeled walker is not appropriate due to modifications made by patient's son (counseled son)

Posture: Forward head, forward flexed over 4 wheeled walker - holds walker far forward

ROM:
Ankle DF PROM w/knee EXT: Less than neutral bilateral

Neuro Scan:
Motor Score: Key muscles tested from L2 - S2 are within normal limits
Light touch Sensation:Sensation to light touch from L2 - S2 is intact and tested through bandages due to bilateral LE ulcers

Special Tests:

09/03/2019 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

Gait Speed: 10 meter walk: 10 meters in 15.94 seconds = 0.63 meters/second with 4 wheeled walker

Sit to stand support: unable without upper extremity assist

5 times sit to stand: (>15 seconds indicates fall risk): Unable

30 Second Sit-Stand: 0 repetition(s).
A score of less than 8 unassisted stands is predictive of falls

FICSIT-4: (<10 seconds indicates fall risk)
10 Second Standing Balance: eyes open
Narrow Base - 10 seconds
Semi Tandem - 10 seconds eyes open. Patient chose right foot forward
Tandem - 0; + LOB
Single Leg - 0 seconds R/L + LOB

Functional Reach:(<6 inches indicates high fall risk) (>10 inches indicates low fall risk)
Trial 1 7 inches Trial 2 7 inches
Average 7 inches with one hand on 4 wheeled walker

Modified CTSIB:
Firm surface 30 seconds: 30 EO and 0 EC. Patient with mod sway EO and + LOB EC
Foam surface not tested

4-item Modified DGI: 5/12 (<10 indicates fall risk)

Four square Step: Not tested due to reliance on 4 wheeled walker for mobility

TREATMENT & EDUCATION
Primary Learner: Patient and Family
Topics Taught: role of physical therapy, education on diagnosis and prognosis, purpose of interventions, initial HEP instructions, physical therapy goals and use of assistive device
Challenges Impacting this Teaching: Hearing deficit
Desire and Motivation to Learn: Engaging with education, ask questions
Preferred Learning Style: demonstration, written and verbal
Post Education Response: Demonstrates tasks with help and States understanding

Evaluation Code: 97163 for 40 minutes.
Clinical Presentation for Selection of Evaluation Code: Unstable
Clinical Decision Making Complexity for Selection of Eval Code:High

Intervention: 97110 Therapeutic exercise for 15 minutes

Trial chair stands: Still too challenging even with bilateral upper extremity support
Partial squats with 4 wheeled walker/chair
Weight shifts/opposite heel lifts with 4 wheeled walker/chair 10 second hold
Seated gastroc belt stretch 60 second holds x 2 twice daily

Home Exercise Program

09/03/2019 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

From falls clinic:
Home Safety Checklist
CDC 4 points to prevent falls
How to get up from floor

From Physical Therapy:
Balance exercises at least 2 times per week: 5 reps each
Partial squats with 4 wheeled walker/chair
Weight shifts/opposite heel lifts with 4 wheeled walker/chair 10 second hold
Seated gastroc belt stretch 60 second holds x 2 twice daily

verbal instructions and demonstrations were provided for the above exercises
a handout was provided describing the exercises in written and picture format

ASSESSMENT:
Patient presents to Physical Therapy with her son; lives with her son. She was discharged from her skilled nursing facility on 8/30/19 where she was receiving rehab after a ground level fall on 7/23/19 with hospitalization for pelvic and right rib fractures as well as pneumothorax.
Fall risk testing today shows Age > 65 years, History of Falls, Feelings of Unsteadiness, Need for Assist in Home with ADLS, Use of Assistive Device, + Timed up and Go, + Single leg balance test, Static Balance impairment, Dynamic Balance impairment, Gait Deviations, Reduced Gait Speed and Decreased Functional LE strength all indicative of patient's **high fall risk.**

PT is necessary to instruct patient in a evidenced based structured, progressive home based exercise program that specifically targets patient's balance deficits, lower extremity and postural weakness, gait deficits and use of assistive aides to decrease patient's fall risk. This program will include a systematic progression of moderate static and dynamic balance challenge with a plan for 2-3 x week long term participation in home based or community based exercise program to support longer intervention required to benefit fall risk reduction.

Pain is not focus of intervention,but may decrease pain with postural strength and improved mobility.

Factors/barriers that may delay or affect course of care include: pertinent past medical history as listed above including bilateral lower extremity ulcers, fall with injury (mult fractures), diabetes, urge urinary incontinence, osteoporosis, osteoarthritis lumbar spine and hips, chronic leg ulcers , Age and Comorbidities, complications, impairment, the following cultural factors: none, and factors which determine high fall risk per above.

Rehabilitation potential is: Fair

Outcomes Score: CareConnections: Functional Index Score 35/50

FALL RISK: high fall risk based on screening

PLAN:
Therapy Treatment Plan (*Frequency/Duration/Other Follow up*): Patient will be seen for 1 visit per week until plan of care reviewed.

Plan for next visit:
Review program
Progression:

09/03/2019 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

National lnstitute on Aging program and issue dvd
Limits of stability 8 points

To improve impairments and reach functional goals the following interventions will be performed: Patient Education, Therapeutic Exercise (97110), Therapeutic Activities (97530), Neuromuscular Re-education (97112) and Gait Training (97116)

TREATMENT GOALS
Anticipated Discharge Date 3/2/20

LONG TERM GOALS (Functional Goals) **Patient's risk of future falls and risk for falls will be reduced, as demonstrated by:**	**To be met by Discharge**	**Current Level of Function / Participation Restrictions 9/3/2019**
5 time sit to stand in 15 seconds for independence in sit to stand transitional movement without the use of arms for rising to stand		Patient currently performs 0 chair sit to stands UE support
TUG of no more than 22 seconds with assistive device for adequate balance to perform sit to stand, walking and turning below fall risk cut off		Patient currently completes the TUG in 39.27 seconds with 4 wheeled walker
Single leg stance time of 6.5 seconds to allow weight shift for safe stepping up on curb or stair climbing		Patient currently performs single leg stance for 0 seconds
Gait Speed of 1 meters per second to to cross street safely		Patient's current gait speed is 0.63 with 4 wheeled walker assistive device
Functional reach of 7.4 inches for adequate balance to get dressed independently		Patient's current functional reach test is 7 inches
Number of falls is reduced to 0 in 3 consecutive months to decrease risk of injury from falls.		Patient currently reports last fall was 7/23/19 with fractures/injury
Patient reports 2-3 x week x 6 month participation in home based or community based balance training program with moderate challenge to demonstrate sustainability required to decrease fall risk		Patient currently reports some participation in lower extremity strengthening home exercise program.

09/03/2019 - Rehab Therapy in Harborview Medical Center Outpatient Physical Therapy Clinic (continued)

Clinical Notes (continued)

Short Term Goals	To be met by	MET or UNMET / Date
Patient will demonstrate ability to properly weight shift to right/left lower extremity to progress toward single leg balance in future to reduce fall risk	10/3/19	
Patient will shift weight to 8 points limits of stability using ankle strategy to reduce loss of balance/falls during static standing activities	10/3/19	
Patient and son will verbalize understanding that current modified 4 wheeled walker is not safe for being pushed on or for walking as it has been adjusted by son	9/3/2019 met	
Patient will be able to use momentum to assist with powering up for sit to stand to decrease need to use bilateral upper extremity support to stand	10/3/19	

These goals were discussed and patient and family agree with plan

Pain will be addressed at the next plan of care review, and intermittently during daily visits as deemed appropriate by the provider. The focus of daily visits will be on function.

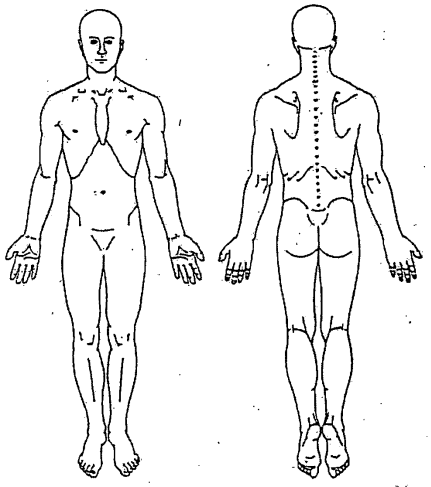
Questionnaire - Scan on 9/13/2019 5:42 PM: H2124



Scan (below)

HARBORVIEW OUTPATIENT PHYSICAL THERAPY QUESTIONNAIRE

HISTORY OF CURRENT CONDITION

1. For what injury/problem were you referred to PT?

2. Please mark areas of pain or abnormal sensation:

3. **When** did symptoms begin? (specific date)__/__/__
   Have you had a similar problem in the past? ☐ Yes ☐ No

4. **How** did this problem start?

5. Onset: ☐ Sudden ☐ Gradual

6. Since onset, symptoms are:
   ☐ Better ☐ Worse ☐ Not changing

7. What makes symptoms **worse**?

   What makes them **better**?

8. Nature of pain/symptoms
   ☐ Sharp ☐ Throbbing ☐ Tingling
   ☐ Dull ☐ Constant ☐ Numbness
   ☐ Aching ☐ Periodic ☐ Other: _____

9. As the day progresses, symptoms:
   ☐ Increase ☐ Decrease ☑ Stay the same
   Symptoms are worst in the:
   ☐ Morning ☑ Afternoon ☐ Night

10. What previous care have you sought for this condition?
    ☑ PT ☐ Chiropractic ☐ Massage ☐ Other
    Was it helpful? ☑ Yes ☐ No

GOALS FOR TREATMENT

11. What activities are you limited from doing because of your current symptoms?
    • Walking with out support device
    •

12. Do you believe that PT will be able to help in achieving these goals? ☑ Yes ☐ No

13. Are you willing/able to participate in a home exercise program? ☐ Yes ☐ No

FALLS/OTHER

1. Have you fallen in the past 12 months? ☑ Yes ☐ No
   If yes, please describe: Landlord Demand 36" walk in home, was crossing 36" Grabed Rete Door it opened
2. Are you worried about falling? ☐ Yes ☑ No

3. Do you have problems with your balance or feel unsteady on your feet? ☑ Yes ☐ No

4. Are you allergic to: ☐ Latex ☐ Beeswax
   If yes, list reaction: _____

WORK HISTORY

1. Occupation: Former Nanny / Canning Food
   ☐ Employed full-time ☑ Work at home Canning Food
   ☐ Employed part-time ☐ Student
   ☐ Unemployed ☑ Retired
   ☐ Seeking employment ☑ Disability

2. Physical activities at work:
   ☐ Sitting ☐ Computer use
   ☐ Standing ☐ Heavy equipment operation
   ☐ Phone use ☐ Driving
   ☐ Repetitive lifting ☐ Other _____
   ☐ Heavy lifting

PARTICIPATION AGREEMENT
6NJB Physical and Hand Therapy Clinic

In order to provide the best service for you and all our clients, we ask that you read and agree to the following:

- Please call 24-hours in advance if you are unable to make your appointment at **206-744-1675.**
  - Leave a message if no one is available to take your call.
- Please call if you will be 15 or more minutes late as the appointment may need to be rescheduled.
- Repeated cancellations or no-shows are disruptive to the optimal delivery of care and may indicate a lack of commitment to your health and wellness. We may discontinue your care if you miss more than one appointment without contacting us or if you repeatedly cancel your appointments.
- Therapists are usually on time for scheduled appointments. If your therapist is running late, we will alert you and do everything possible to make sure you are seen in a timely manner.
- Please silence or set your phone to vibrate while you are waiting in the lobby or seeing your provider.

You and your therapist will regularly assess and review your goals for treatment, your progress, and need for continuing therapy. Your therapy program can be designed to work within the limits of your insurance coverage. The primary reasons therapy is discontinued include:

- Therapy goals have been met
- Continuing progress can be achieved outside of the therapy program
- Patient participation is not sufficient to make significant progress.

Please wear or bring comfortable clothing or shorts if you have a physical therapy appointment.

Thank you for partnering with us to provide the best possible care and service for all our clients.

I have read, understand and agree with the statements above.

Fax:
[ ]1st Fl Nursing Station: 1-206-388-0738
[ ]2nd Fl Nursing Station: 206-760-1725

Date of Admission to SNF: 8/5/2019

Date of Expected Discharge from SNF: 8/30/2019

08/29/2019 - Outside Care Encounter in POST-ACUTE CARE SVC (continued)

Clinical Notes (continued)

Date of Encounter: 8/29/2019

PCP: William E Neighbor, MD
1959 Ne Pacific St Mailstop 354410
Seattle, WA 98195-4410

Consultants during SNF stay:
Physical therapy, Occupational therapy, Speech language therapy, wound care

Problem List:

Patient Active Problem List

Diagnosis

- Sensorineural hearing loss, unspecified
- DVT, recurrent, lower extremity, chronic (HCC)
- Other and unspecified hyperlipidemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Unspecified vitamin B deficiency
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- Hip joint stiffness
- Leg weakness, bilateral
- Weakness of trunk musculature
- History of recurrent deep vein thrombosis (DVT)
- Thrombocytopenia (HCC)
- Imbalance
- Primary osteoarthritis of both hips
- Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)
- Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer and inflammation, left (HCC)
- Cellulitis of left leg
- Venous ulcer of left leg (HCC)
- Homeless
- Normocytic anemia
- Severe protein-calorie malnutrition (HCC)
- Urge urinary incontinence
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Diabetic ulcer of lower extremity (HCC)
- Housing lack
- Suspected elder abuse
- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer, bilateral (HCC)
- Bilateral leg edema
- Closed displaced fracture of left pubis with routine healing
- Acute blood loss anaemia

- Closed fracture of multiple ribs of left side with routine healing
- Hemopneumothorax

Reason for admission to SNF: brief summary of hospitalization leading to admission to SNF
94 year old femalepreviously living at home with her son with a h/o DVTs, HTN, venous insufficiency, chronic leg ulcers, osteoporosis who was hospitalized at Harborview Medical Center from 7/25/2019 until 8/5/2019 with pelvic fx, right RF and hemo-pneumothorax secondary to GLF

She is now at Kline Galland SNF for STR with PT/OT and wound care

Summary of Care at SNF:
(S32.502D) Closed displaced fracture of left pubis with routine healing (primary encounter diagnosis)
(Z74.09) Impaired mobility and activities of daily living
(R26.89) Imbalance
(R29.898) Leg weakness, bilateral
Plan: progressing, mostly SBA assist for most ADLs
- ongoing rehab needed for strength and endurance
- pain well controlled with tylenol; PRN oxycodone Q12 has not been used since 8/9 ==> D/C

(R60.0) Bilateral leg edema
(I83.029, L97.929) Venous ulcer of left leg (HCC) - resolved
Plan: wounds are slow to heal, continue with daily dressing change
- continue to elevate legs. History of recurrent DVT/chronic DVT in legs, was on warfarin now D/C'ed
- continue of ASA
- maybe helpful to get ABI so she can have more compression; she has had many venous duplex studies

(E11.9) Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)
Plan: diet controlled, was on metformin which was D/C'ed in 2011

(D64.9) Anemia, unspecified type
(E43) Severe protein-calorie malnutrition (HCC)
Plan: Great PO intake while at SNF, has gained a little wt. Rec monitor CBC PRN

Treated briefly for UTI:
poor PO intake -> IVF with D5W 1L at 75ml via peripheral IV line
- Cipro 250 mg every 12 hours ×3 days now complete. She is allergic to nitrofurantoin, sulfa and penicillin antibiotics

Physical Exam
Constitutional: She is well-developed, well-nourished, and in no distress.
HENT:
Head: Atraumatic.
Eyes: Conjunctivae are normal.
Cardiovascular: Normal rate.
Pulmonary/Chest: Effort normal.
Abdominal: Soft.
Neurological: She is alert.
Skin: Skin is warm.
Psychiatric: Mood and affect normal.
Vitals reviewed.
BP: 130/56 mmHg 8/29/2019 04:00
Temp:97.2 °F 8/29/2019 04:00
Pulse: 68 bpm 8/29/2019 04:00

08/29/2019 - Outside Care Encounter in POST-ACUTE CARE SVC (continued)

Clinical Notes (continued)

Weight: 106 Lbs 8/22/2019 06:59
Resp: 20 Breaths/min 8/29/2019 04:00

Pertinent Labs/Imaging: SNF laboratory tests NOT done through UW system. Pertinent results highlighted if any, otherwise please contact the facility if needed.

MEDICATIONS at time of SNF Discharge:

1. Acetaminophen Tablet 500 MG Give 2 tablet by mouth three times a day for Pain NTE 3gm per daily
2. Atorvastatin Calcium Tablet 10 MG Give 1 tablet by mouth at bedtime for HLD
3. Calcium Carbonate Tablet Chewable 500 MG Give 2 tablet by mouth every 8 hours as needed for Indigestion\/Heartburn
4. Cholecalciferol Tablet 1000 UNIT Give 1 tablet by mouth one time a day for Supplement
5. MiraLax Powder Give 17 gram by mouth one time a day for Constipation
6. MVI with Minerals 1 po daily as dietary supplement Give 1 tablet by mouth one time a day for dietary supplement
7. Timolol Maleate Solution 0.5 % Instill 1 drop in both eyes two times a day for Dry Eyes Tilt head back and pull the lower eyelid downward away from the eye. Make sure
the drop makes a full contact with conjunctival sac. Wait 5mins for the next
drop. Press tear duct for 1-2 mins after.

Wound treatment:

BLE Treatment: Cleanse area with soap and water or NS. Gently remove loose/dried exudate as able. Apply no-sting barrier to peri-wound skin and allow 30+sec to dry to protect skin from drainage. Cover wounds with Xeroform, cover with gauze or ABD pads and secure with Kerlix and tape. Change daily and PRN.

Right lower leg: Cleanse wound w/ ns or wound spray, pat dry. Apply Amlactin to intact skin of LE wound dressing. Apply Xeroform, cover wound w/ ABD, Secure drg w/ Kerlix, then Ace Wrap. Change dressing QOD and as needed for soiling, saturation or accidental removal.

Left lower leg: Cleanse wound w/ ns or wound spray, pat dry. Apply Amlactin to intact skin of LE wound dressing. Apply Xeroform, cover wound w/ ABD, Secure drg w/ Kerlix, then Ace Wrap. Change dressing QOD and as needed for soiling, saturation or accidental removal.

Follow-up appointments:

08/23/2019 - Outside Care Encounter in POST-ACUTE CARE SVC (continued)

Clinical Notes (continued)

Interval Hx: Patient is seen today for change in functional status. Her UA results are as below; she received 1 g IM Rocephin last evening based on the results. She is noted by family and staff to have acute change in mental status and functional status. She has been in bed for the last 24 hours, limited by mouth intake. Patient is seen today with her son at bedside who relates that this is how she presents when she has a UTI. Relates that her recurrent UTIs are associated with her ongoing issues with urinary incontinence.

Patient Active Problem List

Diagnosis

- Sensorineural hearing loss, unspecified
- DVT, recurrent, lower extremity, chronic (HCC)
- Other and unspecified hyperlipidemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Unspecified vitamin B deficiency
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- Hip joint stiffness
- Leg weakness, bilateral

- Hemopneumothorax

MEDICATIONS

08/23/2019 - Outside Care Encounter in POST-ACUTE CARE SVC (continued)

Clinical Notes (continued)

This patient's medications have been reviewed in the chart and reconciled.
There may have been changes in the medications that are not reflected in this note.
For the most accurate medication list, please call skilled nursing facility and ask for the most recent medication administration record (MAR) to be sent.
Review of patient's allergies indicates:

Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other
• Nitrofurantoin	Other
Confusion, loss of appetitie, nausea, abdominal pain	
• Nitrofurantoin	Other
confusion	
• Penicillins	Rash
• Sulfa Antibiotics	Rash

Review of Systems
Unable to perform ROS: Mental status change

Most recent vitals from SNF chart:
BP: 136/72 mmHg 8/23/2019 10:22
Temp:98 °F 8/23/2019 10:22
Pulse: 76 bpm 8/23/2019 10:22
Weight: 106 Lbs 8/22/2019 06:59
Resp: 20 Breaths/min 8/23/2019 10:22
Pain: 5 8/23/2019 14:01

Physical Exam
Constitutional: She is well-developed, well-nourished, and in no distress.
HENT:
Head: Atraumatic.
Eyes: Conjunctivae are normal.
Cardiovascular: Normal rate.
Pulmonary/Chest: Effort normal.
Abdominal: Soft. Bowel sounds are normal.
Lymphadenopathy:
She has no cervical adenopathy.
Neurological:
Somnolent, opens eyes to her name but then goes quickly back to sleep
Skin: Skin is warm and dry.
Psychiatric: Affect normal.
Vitals reviewed.

DIAGNOSTICS: Reviewed in Care Everywhere/ SNF chart

[ ]2nd Fl Nursing Station: 206-760-1725

Name: Jeanne Leonie Hoffman
DOB: 1/6/1925
LANGUAGE: English

Chief complaint: Follow-Up and Tremor

HPI: 94 year old femalepreviously living at home with her son with a h/o DVTs, HTN, venous insufficiency, chronic leg ulcers, osteoporosis who was hospitalized at Harborview Medical Center from 7/25/2019 until 8/5/2019 with pelvic fx, right RF and hemo-pneumothorax secondary to GLF

She is now at Kline Galland SNF for STR with PT/OT

Interval Hx: patient is seen today for post acute care follow up at Kline
- Pelvic fx: relates some "stiffness" today. Is SBA for most ADLs per rehab team and nursing
- BLE venous insufficiency, chronic leg ulcers: wounds are healed. Trace edema
- nursing relates that patient had episode of tremors "all over" last night. She was warmed with warming blankets, initially also required some O2 for comfort and it has resolved. Pt denies dysuria, fever or recurrent tremors however she relates feeling tried today

Patient Active Problem List

Diagnosis

- Sensorineural hearing loss, unspecified
- DVT, recurrent, lower extremity, chronic (HCC)
- Other and unspecified hyperlipidemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Unspecified vitamin B deficiency
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- Hip joint stiffness
- Leg weakness, bilateral
- Weakness of trunk musculature
- History of recurrent deep vein thrombosis (DVT)
- Thrombocytopenia (HCC)
- Imbalance
- Primary osteoarthritis of both hips
- Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)
- Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer and inflammation, left (HCC)
- Cellulitis of left leg
- Venous ulcer of left leg (HCC)
- Homeless
- Normocytic anemia
- Severe protein-calorie malnutrition (HCC)
- Urge urinary incontinence
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Diabetic ulcer of lower extremity (HCC)
- Housing lack
- Suspected elder abuse

- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer, bilateral (HCC)
- Bilateral leg edema
- Closed displaced fracture of left pubis with routine healing
- Acute blood loss anaemia
- Closed fracture of multiple ribs of left side with routine healing
- Hemopneumothorax

MEDICATIONS

1. Acetaminophen Tablet 500 MG Give 2 tablet by mouth three times a day for Pain NTE 4gm\/daily
2. Atorvastatin Calcium Tablet 10 MG Give 1 tablet by mouth at bedtime for HLD
3. Calcium Carbonate Tablet Chewable 500 MG Give 2 tablet by mouth every 8 hours as needed for Indigestion\/Heartburn
4. Cholecalciferol Tablet 1000 UNIT Give 1 tablet by mouth one time a day for Supplement
5. Dulcolax 10 mg. suppository PR Q 3 days PRN no BM Insert 1 suppository rectally as needed for KGH Bowel Protocol 3 days for no BM
6. Glucagon Emergency Kit 1 MG Inject 1 mg subcutaneously as needed for Low Blood Sugar Inject 1 syringe (1mg) as directed for blood sugar <70 in emergency situations if the pt is unable to take oral sugar (such as juice or glucose tablets).
7. MiraLax Powder Give 17 gram by mouth one time a day for Constipation
8. MVI with Minerals 1 po daily as dietary supplement Give 1 tablet by mouth one time a day for dietary supplement
9. Ondansetron HCl Tablet 4 MG Give 1 tablet by mouth every 8 hours as needed for N\/V
10. oxyCODONE HCl Tablet 5 MG Give 0.5 tablet by mouth every 12 hours as needed for Pain To be given before wound care
11. Senna 8.6 mg; 1 tabs PO QHS\/PRN constipation; Hold for loose stool Give 1 tablet by mouth as needed for KGH Protocol
12. Timolol Maleate Solution 0.5 % Instill 1 drop in both eyes two times a day for Dry Eyes Tilt head back and pull the lower eyelid downward away from the eye. Make sure
the drop makes a full contact with conjunctival sac. Wait 5mins for the next
drop. Press tear duct for 1-2 mins after.

This patient's medications have been reviewed in the chart and reconciled.
There may have been changes in the medications that are not reflected in this note.
For the most accurate medication list, please call skilled nursing facility and ask for the most recent medication administration record (MAR) to be sent.
Review of patient's allergies indicates:

Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other
• Nitrofurantoin	Other
Confusion, loss of appetitie, nausea, abdominal pain	
• Nitrofurantoin	Other
confusion	
• Penicillins	Rash
• Sulfa Antibiotics	Rash

Review of Systems
Constitutional: Positive for malaise/fatigue. Negative for chills, diaphoresis and fever.
Eyes: Negative.

08/21/2019 - Outside Care Encounter in POST-ACUTE CARE SVC (continued)

Clinical Notes (continued)

Respiratory: Negative.
Cardiovascular: Positive for leg swelling. Negative for chest pain, palpitations, orthopnea and claudication.
Gastrointestinal: Negative for abdominal pain.
Genitourinary: Negative.
Musculoskeletal: Negative.
Neurological: Negative. Negative for dizziness.
Psychiatric/Behavioral: The patient does not have insomnia.
All other systems reviewed and are negative.

Most recent vitals from SNF chart:
BP: 125/60 mmHg 8/21/2019 13:08
Temp:98.4 °F 8/21/2019 13:08
Pulse: 70 bpm 8/21/2019 13:08
Weight: 107.4 Lbs 8/15/2019 09:49
Resp: 18 Breaths/min 8/21/2019 13:08
Pain: 0 8/21/2019 13:24

Physical Exam
Constitutional:
Elderly female in bed
HENT:
Head: Atraumatic.
Eyes: Conjunctivae are normal.
Neck: Normal range of motion.
Cardiovascular: Normal rate and regular rhythm.
Pulmonary/Chest: Effort normal and breath sounds normal.
Abdominal: Soft. Bowel sounds are normal. She exhibits no distension. There is no tenderness.
Neurological: She is alert.
Skin: Skin is warm and dry.
Psychiatric: Mood and affect normal.
Nursing note and vitals reviewed.

DIAGNOSTICS: Reviewed in Care Everywhere/ SNF chart

Platelets	507	x10E3/uL	150-450	H	Final

ASSESSMENT / PLAN:
(S32.502D) Closed displaced fracture of left pubis with routine healing (primary encounter diagnosis)
(Z74.09) Impaired mobility and activities of daily living
(R26.89) Imbalance
(R29.898) Leg weakness, bilateral
Plan: progressing, mostly SBA assist for most ADLs
- ongoing rehab needed for strength and endurance
- pain well controlled with tylenol; PRN oxycodone Q12 has not been used since 8/9 ==> D/C

(R60.0) Bilateral leg edema
(I83.029, L97.929) Venous ulcer of left leg (HCC) - resolved
Plan: wounds are slow to heal, continue with daily dressing change
- continue to elevate legs. History of recurrent DVT/chronic DVT in legs, was on warfarin now D/C'ed
- continue of ASA
- maybe helpful to get ABI so she can have more compression; she has had many venous duplex studies

08/21/2019 - Outside Care Encounter in POST-ACUTE CARE SVC (continued)

Clinical Notes (continued)

(E11.9) Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)
Plan: diet controlled, was on metformin which was D/C'ed in 2011

(D64.9) Anemia, unspecified type
(E43) Severe protein-calorie malnutrition (HCC)
Plan: recheck CBC and CMP

(R25.1) Tremor
Plan: resolved but given anemia and malnourishment - recheck CBC and CMP

Post visit addendum:

Was called back to pt room as nursing reports repeat in tremors, pt is alert but feeling "bad and not myself" Continues to denie dysuria, relates "I have pooped and peed today" Denies SOB or chest pain
- temp = 99.6F
- PT reports change in function as she was weak and did not want to participate today which she is usually "up for anything"
If UA shows UTI = would start ceftriaxone 1 gram IM x 1 tonight then start bactrim DS

Plan: change CBC and CMP to STAT order. Given history of UTI - UA STAT with reflex C&S as indicated- results will likely come back to after hours
- pt is to remain on alert monitoring per nursing; call provider with acute changes

Discontinued by: Van Hoff, Linda A, ARNP — Discontinued on: 6/12/2024

Medication List (continued)

Reason for discontinuation: Med list cleanup
Instructions:
1,000 mg = 2 tab, PO, TID, 48 tab, 0 Refills, 08/05/19 11:04:44, Tablet, Print Requisition
Entered by: Taylor, Zoe Judith Mildred, MD — Entered on: 8/20/2019
Start date: 8/5/2019 — End date: 6/12/2024
Action: Patient not taking

Calcium Carbonate 500 MG Oral Chew Tab

Discontinued by: Clark, Trika L, Pharmacy Technician — Discontinued on: 1/9/2025
Reason for discontinuation: Discontinued by patient
Instructions: Chew and swallow 2 tablets (1,000 mg) by mouth 3 times a day as needed for indigestion/heartburn.
Entered by: Taylor, Zoe Judith Mildred, MD — Entered on: 8/20/2019
Start date: 8/5/2019 — End date: 1/9/2025

Cholecalciferol 1000 units Oral Tab

Discontinued by: Barnes, James Irvin, MD — Discontinued on: 3/8/2025
Instructions: Take 2 tablets (2,000 units) by mouth daily.
Entered by: Taylor, Zoe Judith Mildred, MD — Entered on: 8/20/2019
Start date: 8/20/2019 — End date: 3/8/2025

Stopped in Visit

Losartan Potassium 25 MG Oral Tab

Discontinued by: Taylor, Zoe Judith Mildred, MD — Discontinued on: 8/20/2019
Reason for discontinuation: Therapy completed/no longer indicated

acetaminophen-codeine 300-30 MG Oral Tab

Discontinued by: Taylor, Zoe Judith Mildred, MD — Discontinued on: 8/20/2019
Reason for discontinuation: Therapy completed/no longer indicated

Clinical Notes

Progress Notes

Crawford, Carol A, PharmD at 8/20/2019 1030

Osteoporosis review

94 year old pt referred for review/assessment of osteoporosis tx. Pt seen in conjunction with Falls Clinic provider.
Of note, pt was homeless at one time
Last DEXA: not documented
FRAX score: not documented
Hx of fx: pelvic fx 2008 and recently 2/2 to fall. Currently at Kline Galland for rehab
Past Medications used: alendronate for approx 5 years (started 2008 finishing 2013?) Only see medication prescribed 2008-2010-- not listed in provider note in 2012 on .
Labs: SCr: 0.71 Aug 2019 Tot D: 19 in July 2019 Ca: 8.5
Taking Ca/D supplements: son confirms D3 at 2000iu daily, Ca 1g TID (but for heart burn)

Current medications with osteoporosis risk: CBZ
Current meds with fall risk: none

Recommendations:
No DEXA but second pelvic fx (2008 and 8/2019) suggest quite poor BMD. Had a prescribed course of bisphosphonate in past (2008-13)? Only see prescribing per chart note from 2008-2010. Suspecting low compliance given living situation.
Total D on low side but son confirms D3 supplementation.

08/20/2019 - Office Visit in Harborview Senior Care Clinic (continued)

Clinical Notes (continued)

-- Would either start 5 yr course of denosumab 60mg q 6 months or could also consider 2 years of zoledronic acid 5mg yearly (as long as fxs not considered atypical 2/2 bisphosphonate use) given questionable history of use.
-- either option to be started with ortho clearance (typically 3 months s/p hip fx)

Forwarded to falls provider for review.

OUTPATIENT CONSULTATION – INITIAL

Patient Name/DOB: Jeanne Leonie Hoffman 1/6/1925
Medical Record Number: H0571976
Date of Service: 8/20/2019

Clinic PCP: Neighbor Jr., William E, MD

IDENTIFICATION AND REASON FOR VISIT:
This is a 94 year old community dwelling female with h/o the below problem list, referred for comprehensive fall risk assessment by Neighbor Jr., William E, MD. She is accompanied to this appointment by her son.

CHIEF COMPLAINT:
GLF with h/o falls and known osteoporosis

PROBLEM LIST
Patient Active Problem List
Diagnosis

- Sensorineural hearing loss, unspecified
- DVT, recurrent, lower extremity, chronic (HCC)
- Other and unspecified hyperlipidemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Unspecified vitamin B deficiency
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- Hip joint stiffness
- Leg weakness, bilateral
- Weakness of trunk musculature
- History of recurrent deep vein thrombosis (DVT)
- Thrombocytopenia (HCC)
- Imbalance
- Primary osteoarthritis of both hips
- Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)
- Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer and inflammation, left (HCC)
- Cellulitis of left leg
- Venous ulcer of left leg (HCC)
- Homeless
- Normocytic anemia
- Severe protein-calorie malnutrition (HCC)
- Urge urinary incontinence
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Diabetic ulcer of lower extremity (HCC)
- Housing lack
- Suspected elder abuse
- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer, bilateral (HCC)
- Bilateral leg edema
- Closed displaced fracture of left pubis with routine healing
- Acute blood loss anaemia
- Closed fracture of multiple ribs of left side with routine healing
- Hemopneumothorax

- Osteoporosis. Began fosamax Spring 2008. Continued for five years, then stopped.

MEDICATIONS

HISTORY OF THE PRESENT ILLNESS

08/20/2019 - Office Visit in Harborview Falls Clinic (continued)

Clinical Notes (continued)

Jeanne Leonie Hoffman is an 94 year old female who presents for evaluation of recurrent falls.

Was previously living at home with her son, with a h/o DVTs, HTN, venous insufficiency, chronic leg ulcers, osteoporosis who was hospitalized at Harborview Medical Center from 7/25/2019 until 8/5/2019 with pelvic fx, right RF and hemo-pneumothorax secondary to GLF. Was then at SNF at Kline Galland for PT/OT.

Assistive device (walker or cane) use: yes, walker. Both 2 wheeled and 4 wheeled
Indoors: previously no
Outdoors: yes

Description of most recent fall:
Location: kitchen at home. Was hold onto the wall, then holding onto the fridge, fell back when the door of fridge opened and caused her to lose her balance.
Time of day: daytime
Type of footwear: sneaker
Wearing glasses, if applicable: yes
Wearing hearing aid, if applicable: yes
Using assistive device: no
Able to get up without assistance: no
Recalls hitting the ground or lower level: yes
Acute symptoms prior to fall: no
Sleeping med taken within 8 hours prior to fall: no
Alcohol consumed within 8 hours prior to fall: no
Tripping hazards in area of fall: no
Fell on stairs: no
Injury with fall: yes
Injury type, if yes, describe: rib fx, pelvic fx, hemopneumothorax

Modifiable fall risk factors:
Strength and balance exercise 2-3x/week: before the fall just walking, now at SNF doing PT
Vitamin D supplementation: yes
Vision:
Last complete eye exam (date): more than two years ago
Vision changes since last eye exam: yes
Wears bifocals: yes
Hearing:
x Wears a hearing aid
Foot numbness/tingling: no
Foot pain: yes
Other pain: yes
Location(s): ribs sore, pressure in hip; tightness in low back
Quality: see above
Severity (1-10 scale): mild
Interferes with daily activities: no
Footwear:
Indoors: sneakers
Outdoors: sneakers
Nocturia: yes
CNS-active medications: was previously taking codeine sometimes for pain
OTC medications: tylenol
Pets: no
Postural dizziness: no

Daily fluid intake: not enough, not much
Sleep quality: so-so
Urinary incontinence: yes
Vertigo sensation with falls: no
Home/environment:
  Slippery surfaces: no
  Steps to enter: no
  Steps indoors: no
  Staircases without railings: no
  Obstacles in pathways: no
  Poor lighting/illumination: currently not good lighting but setting it up now
  Frequently used objects in hard to reach places: no
  Adaptive equipment: has bars in shower. Has handrailings on cabinets and in hallways.
  Other: none
Behavioral risk factors:
  Inconsistent or incorrect assistive device use: yes
  Hurrying: no
  Climbing up stools or ladders: no
  Other: none

APS Levonne Gibson 360.473.2167
NW Justice Project Samantha Adams 206.707.0838

FUNCTIONAL STATUS
IADLs: Independent in all except doesn't use telephone.
ADLs: Independent except has incontinence and needs an assistive device for walking.

SELF-RATING OF HEALTH
Good

HEALTH LITERACY SCREEN
As per clinic intake form

REVIEW OF SYSTEMS
Review of Systems
Constitutional: Negative for chills, fever and unexpected weight change.
Respiratory: Negative for shortness of breath.
Cardiovascular: Positive for leg swelling. Negative for chest pain.
Gastrointestinal: Negative for constipation and diarrhea.
Genitourinary:
Urinary incontinence
Musculoskeletal: Positive for arthralgias.
Skin: Positive for wound.
Neurological: Negative for dizziness, light-headedness and numbness.
Psychiatric/Behavioral:
Mood: fine!

PHYSICAL EXAM
BP 115/65 | Pulse 98 | Temp 99.5 °F (37.5 °C) (Temporal) | Ht 5' 1" (1.549 m) | Wt 111 lb 1.6 oz (50.4 kg) | SpO2 100% Comment: RA | BMI 20.99 kg/m²
Standing BP 115/65, Lying 114/58
Standing pulse 98, Lying pulse 55
Eyes: Distance visual acuity: OS 20/ 50 , OD 20/ 50, OU 20/ 50
Physical Exam
Constitutional: She is oriented to person, place, and time. She appears well-developed and well-nourished. No distress.
Thin and frail
HENT:
Head: Normocephalic and atraumatic.
Right Ear: External ear normal.
Left Ear: External ear normal.
Nose: Nose normal.
Eyes: Conjunctivae and EOM are normal. Right eye exhibits no discharge. Left eye exhibits no discharge. No scleral icterus.
Neck: Neck supple.
Cardiovascular: Normal rate.
Pulmonary/Chest: Effort normal. No respiratory distress. She has no wheezes.
Abdominal: She exhibits no distension.
Musculoskeletal:
Bilateral lower extremities have good strength at hips, knees, and ankles. No deformity. She does have nonpitting edema bilaterally to shins
Neurological: She is alert and oriented to person, place, and time.
Hearing difficulty
Skin: Skin is warm and dry.
Many wounds on bilateral lower extremities, which are under a wrap today. She has chronic venous stasis dermatitis.

Psychiatric: She has a normal mood and affect. Her behavior is normal. Thought content normal.
Cognitively intact

Strength:
Sit to Stand: Unable to arise from the chair without using arms to push up and remain fully upright for 3 seconds
Five Times Sit to Stand (FTSS) time: Not tested. Able to stand by pushing up on chair with just left arm. Does not push on walker.
Timed Up and Go: not done.
With walker was able to walk steadily at a reasonably fast pace but was having pain in lower back. Initially had some difficulty lifting her R leg but this abated with more walking.
Assistive device used for gait speed assessment: yes, front-wheeled walker
Gait quality:
x reduced stride length
x reduced step height
x used assistive device
Gait with speed changes:
x changes speed substantially and smoothly without imbalance or path deviation
x used assistive device
Tone/abnormal movements: normal tone, no abnormal movements
Sensation: normal
Proprioception: not done
DTRs: not done
Psych: Normal affect. Falls Efficacy Scale International (short form): 11 /28 (7-8 = low concern; 9-13 = moderate concern; 14-28 = high concern about falling while performing daily activities).

Clinical Notes (continued)

ASSESSMENT AND RECOMMENDATIONS

This is a 94 year old community dwelling female with osteoporosis, recent fall with rib and hip fractures and modifiable fall risk factors, the recommendations for which are as below:

Modifiable Fall Risk Factors

Gait, strength and balance abnormalities:
x Referral to outpt PT placed; to begin therapy at time of SNF d/c
x Assistive device use discussed and recommendations provided
x Patient counseled about impaired balance as a contributor to falls and the importance of a balance exercise routine to prevent falls

Home safety risks: Son is in the process of optimizing their home for safety (adding grab bars, railings)
x CDC home safety checklist provided
x Encouraged reduction in environmental hazards as they are doing

Vision risks:
x Handout on vision and falls provided
x Patient counseled about vision issues as a contributor to falls
x Encouraged to schedule an appointment every 1-2 years with an ophthalmologist for routine eye exams

Medication risks: Narcotics increase injury risk
x Brochure on medications and falls provided
x Patient counseled about medications as a contributor to falls
x Recommend stopping narcotics and using scheduled tylenol and non-pharm modalities (e.g., heating pad, Deep Blue Rub) for musculoskeletal pain

Fall-Related Injury Risk Reduction

We discussed the following with regard to reducing the risk of fall-related injuries:

Fracture prevention: known osteoporosis; per son she drinks milk regularly
x Importance of adequate daily calcium (1,200 mg elemental) and vitamin D (>700 IU) discussed
x Wrote order for SNF to increase cholecalciferol dose to 2,000 IU (patient's outpatient dose) from 1,000 IU daily
x Consult requested of pharmacy to counsel on osteoporosis Rx options
x Consider dietician consult to address low body weight

Modification of risky behaviors:
x Reviewed behavior modifications to maximize safety when ambulating: use walker indoors at all times

FOLLOW-UP: In Fall Prevention Clinic in ~3 months to review progress with initial treatment recommendations and troubleshoot any barriers to adherence.

COMPLEXITY OF MEDICAL DECISION-MAKING: High

Patient Instructions

Treatment Recommendations to Reduce Falls and Fall Injuries

You were seen in the Fall Prevention Clinic today.

Your treatment plan is as follows:

- **You were taken off of all narcotic medications. Please do not take any codeine when you get home.**
- **You were taken off blood pressure medicine losartan because you don't need it anymore.**
- **You were referred to PT at Harborview after you leave the rehab facility**
- **See the eye doctor to get updated glasses**
- **Increase vitamin D to 2000 IU daily**

[x] Do your strength and balance exercise at least 3 times per week
[x] See the physical therapist to learn exercises to prevent falls

08/20/2019 - Office Visit in Harborview Falls Clinic (continued)

Patient Instructions (continued)

[x] See the physical therapist for gait training with a walking aid
(cane, walker, trekking pole)
[ ] Join a community based, group exercise program
[x] Have you vision checked
[x] Go through the home safety checklist and make changes as recommended
[ ] Obtain a Lifeline device
[ ] Manage your blood pressure drop
Do first clenches and ankle pumps, rise slowly, do not walk if dizzy,
eat small frequent meals, drink 6-8, 8 ounce glasses of water daily
[x] Make changes to medications as follows: stop narcotic pain medicines. Stop blood pressure medicines.

[x] Wear shoes that fit well, provide support, and have a non-skid sole, even indoors
[x] Use your cane/walker at all times
[x] Take a total of 2000 IU daily of vitamin D

[x] Get your bone density checked with the DEXA scan
[x] Avoid risky behaviors: always use your walker

[x] Other: Talk to you primary doctor about starting an osteoporosis medicine

Electronically signed by Sansted, Zoe Judith Mildred, MD at 8/20/2019 9:45 AM

FALL PREVENTION CLINIC
OUTPATIENT CONSULTATION – INITIAL

Patient Name/DOB: Jeanne Leonie Hoffman 1/6/1925
Medical Record Number: H0571976
Date of Service: 8/20/2019

Clinic PCP: Neighbor Jr., William E, MD

IDENTIFICATION AND REASON FOR VISIT:
This is a 94 year old community dwelling female with h/o the below problem list, referred for comprehensive fall risk assessment by Neighbor Jr., William E, MD. She is accompanied to this appointment by her son.

CHIEF COMPLAINT:
GLF with h/o falls and known osteoporosis

PROBLEM LIST
Patient Active Problem List
Diagnosis
- Sensorineural hearing loss, unspecified
- DVT, recurrent, lower extremity, chronic (HCC)
- Other and unspecified hyperlipidemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Unspecified vitamin B deficiency
- Adult failure to thrive syndrome
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- Hip joint stiffness
- Leg weakness, bilateral

- Weakness of trunk musculature
- History of recurrent deep vein thrombosis (DVT)
- Thrombocytopenia (HCC)
- Imbalance
- Primary osteoarthritis of both hips
- Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)
- Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer and inflammation, left (HCC)
- Cellulitis of left leg
- Venous ulcer of left leg (HCC)
- Homeless
- Normocytic anemia
- Severe protein-calorie malnutrition (HCC)
- Urge urinary incontinence
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Diabetic ulcer of lower extremity (HCC)
- Housing lack
- Suspected elder abuse
- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer, bilateral (HCC)
- Bilateral leg edema
- Closed displaced fracture of left pubis with routine healing
- Acute blood loss anaemia
- Closed fracture of multiple ribs of left side with routine healing
- Hemopneumothorax

- Osteoporosis. Began fosamax Spring 2008. Continued for five years, then stopped.

MEDICATIONS

• Sulfa Antibiotics	Rash

HISTORY OF THE PRESENT ILLNESS
Jeanne Leonie Hoffman is an 94 year old female who presents for evaluation of recurrent falls.

Was previously living at home with her son, with a h/o DVTs, HTN, venous insufficiency, chronic leg ulcers, osteoporosis who was hospitalized at Harborview Medical Center from 7/25/2019 until 8/5/2019 with pelvic fx, right RF and hemo-pneumothorax secondary to GLF. Was then at SNF at Kline Galland for PT/OT.

Assistive device (walker or cane) use: yes, walker. Both 2 wheeled and 4 wheeled
Indoors: previously no
Outdoors: yes

Description of most recent fall:
Location: kitchen at home. Was hold onto the wall, then holding onto the fridge, fell back when the door of fridge opened and caused her to lose her balance.
Time of day: daytime
Type of footwear: sneaker
Wearing glasses, if applicable: yes
Wearing hearing aid, if applicable: yes
Using assistive device: no
Able to get up without assistance: no
Recalls hitting the ground or lower level: yes
Acute symptoms prior to fall: no
Sleeping med taken within 8 hours prior to fall: no
Alcohol consumed within 8 hours prior to fall: no
Tripping hazards in area of fall: no
Fell on stairs: no

Letters (continued)

Injury with fall: yes
Injury type, if yes, describe: rib fx, pelvic fx, hemopneumothorax

Modifiable fall risk factors:
Strength and balance exercise 2-3x/week: before the fall just walking, now at SNF doing PT
Vitamin D supplementation: yes
Vision:
  Last complete eye exam (date): more than two years ago
  Vision changes since last eye exam: yes
  Wears bifocals: yes
Hearing:
  x Wears a hearing aid
Foot numbness/tingling: no
Foot pain: yes
Other pain: yes
  Location(s): ribs sore, pressure in hip; tightness in low back
  Quality: see above
  Severity (1-10 scale): mild
  Interferes with daily activities: no
Footwear:
  Indoors: sneakers
  Outdoors: sneakers
Nocturia: yes
CNS-active medications: was previously taking codeine sometimes for pain
OTC medications: tylenol
Pets: no
Postural dizziness: no
Daily fluid intake: not enough, not much
Sleep quality: so-so
Urinary incontinence: yes
Vertigo sensation with falls: no
Home/environment:
  Slippery surfaces: no
  Steps to enter: no
  Steps indoors: no
  Staircases without railings: no
  Obstacles in pathways: no
  Poor lighting/illumination: currently not good lighting but setting it up now
  Frequently used objects in hard to reach places: no
  Adaptive equipment: has bars in shower. Has handrailings on cabinets and in hallways.
  Other: none
Behavioral risk factors:
  Inconsistent or incorrect assistive device use: yes
  Hurrying: no
  Climbing up stools or ladders: no
  Other: none

REVIEW OF SYSTEMS
Review of Systems
Constitutional: Negative for chills, fever and unexpected weight change.
Respiratory: Negative for shortness of breath.
Cardiovascular: Positive for leg swelling. Negative for chest pain.
Gastrointestinal: Negative for constipation and diarrhea.
Genitourinary:
Urinary incontinence
Musculoskeletal: Positive for arthralgias.
Skin: Positive for wound.
Neurological: Negative for dizziness, light-headedness and numbness.
Psychiatric/Behavioral:
Mood: fine!

PHYSICAL EXAM
BP 115/65 | Pulse 98 | Temp 99.5 °F (37.5 °C) (Temporal) | Ht 5' 1" (1.549 m) | Wt 111 lb 1.6 oz (50.4 kg) | SpO2 100% Comment: RA | BMI 20.99 kg/m²

Standing BP 115/65, Lying 114/58
Standing pulse 98, Lying pulse 55
Eyes: Distance visual acuity: OS 20/ 50 , OD 20/ 50, OU 20/ 50
Physical Exam
Constitutional: She is oriented to person, place, and time. She appears well-developed and well-nourished. No distress.
Thin and frail
HENT:
Head: Normocephalic and atraumatic.
Right Ear: External ear normal.
Left Ear: External ear normal.
Nose: Nose normal.
Eyes: Conjunctivae and EOM are normal. Right eye exhibits no discharge. Left eye exhibits no discharge. No scleral icterus.
Neck: Neck supple.
Cardiovascular: Normal rate.
Pulmonary/Chest: Effort normal. No respiratory distress. She has no wheezes.
Abdominal: She exhibits no distension.
Musculoskeletal:
Bilateral lower extremities have good strength at hips, knees, and ankles. No deformity. She does have nonpitting edema bilaterally to shins
Neurological: She is alert and oriented to person, place, and time.
Hearing difficulty
Skin: Skin is warm and dry.
Many wounds on bilateral lower extremities, which are under a wrap today. She has chronic venous stasis dermatitis.
Psychiatric: She has a normal mood and affect. Her behavior is normal. Thought content normal.
Cognitively intact

Strength:
Sit to Stand: Unable to arise from the chair without using arms to push up and remain fully upright for 3 seconds
Five Times Sit to Stand (FTSS) time: Not tested. Able to stand by pushing up on chair with just left arm. Does not push on walker.
Timed Up and Go: not done.
With walker was able to walk steadily at a reasonably fast pace but was having pain in lower back. Initially had some difficulty lifting her R leg but this abated with more walking.
Assistive device used for gait speed assessment: yes, front-wheeled walker
Gait quality:
x reduced stride length
x reduced step height
x used assistive device
Gait with speed changes:
x changes speed substantially and smoothly without imbalance or path deviation
x used assistive device
Tone/abnormal movements: normal tone, no abnormal movements
Sensation: normal
Proprioception: not done
DTRs: not done
Psych: Normal affect. Falls Efficacy Scale International (short form): 11 /28 (7-8 = low concern; 9-13 = moderate concern; 14-28 = high concern about falling while performing daily activities).

DEXA: none in system; per chart review has h/o L3 vertebral fx and had T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra.

ASSESSMENT AND RECOMMENDATIONS

This is a 94 year old community dwelling female with osteoporosis, recent fall with rib and hip fractures and modifiable fall risk factors, the recommendations for which are as below:

Modifiable Fall Risk Factors

Gait, strength and balance abnormalities:
x Referral to outpt PT placed; to begin therapy at time of SNF d/c
x Assistive device use discussed and recommendations provided
x Patient counseled about impaired balance as a contributor to falls and the importance of a balance exercise routine to prevent falls

Home safety risks: Son is in the process of optimizing their home for safety (adding grab bars, railings)
x CDC home safety checklist provided
x Encouraged reduction in environmental hazards as they are doing

Vision risks:
x Handout on vision and falls provided
x Patient counseled about vision issues as a contributor to falls
x Encouraged to schedule an appointment every 1-2 years with an ophthalmologist for routine eye exams

Medication risks: Narcotics increase injury risk
x Brochure on medications and falls provided
x Patient counseled about medications as a contributor to falls

Letters (continued)

x Recommend stopping narcotics and using scheduled tylenol and non-pharm modalities (e.g., heating pad, Deep Blue Rub) for musculoskeletal pain

Fall-Related Injury Risk Reduction

We discussed the following with regard to reducing the risk of fall-related injuries:

Fracture prevention: known osteoporosis; per son she drinks milk regularly
x Importance of adequate daily calcium (1,200 mg elemental) and vitamin D (>700 IU) discussed
x Wrote order for SNF to increase cholecalciferol dose to 2,000 IU (patient's outpatient dose) from 1,000 IU daily
x Consult requested of pharmacy to counsel on osteoporosis Rx options
x Consider dietician consult to address low body weight

Modification of risky behaviors:
x Reviewed behavior modifications to maximize safety when ambulating: use walker indoors at all times

FOLLOW-UP: In Fall Prevention Clinic in ~3 months to review progress with initial treatment recommendations and troubleshoot any barriers to adherence.

COMPLEXITY OF MEDICAL DECISION-MAKING: High

I saw and evaluated the patient and agree with Dr. Sansted's note.

Problem List Date Reviewed: **7/15/2019**

	Codes	Priority	Class	Noted - Resolved

Instructions from Elizabeth A Phelan, MD

Treatment Recommendations to Reduce Falls and Fall Injuries

You were seen in the Fall Prevention Clinic today.
Your treatment plan is as follows:

- **You were taken off of all narcotic medications. Please do not take any codeine when you get home.**
- **You were taken off blood pressure medicine losartan because you don't need it anymore.**
- **You were referred to PT at Harborview after you leave the rehab facility**
- **See the eye doctor to get updated glasses**
- **Increase vitamin D to 2000 IU daily**

[x] Do your strength and balance exercise at least 3 times per week
[x] See the physical therapist to learn exercises to prevent falls
[x] See the physical therapist for gait training with a walking aid
(cane, walker, trekking pole)
[ ] Join a community based, group exercise program
[x] Have you vision checked
[x] Go through the home safety checklist and make changes as recommended
[ ] Obtain a Lifeline device
[ ] Manage your blood pressure drop
Do first clenches and ankle pumps, rise slowly, do not walk if dizzy,
eat small frequent meals, drink 6-8, 8 ounce glasses of water daily
[x] Make changes to medications as follows: stop narcotic pain medicines. Stop blood pressure medicines.

[x] Wear shoes that fit well, provide support, and have a non-skid sole, even indoors
[x] Use your cane/walker at all times
[x] Take a total of 2000 IU daily of vitamin D

[x] Get your bone density checked with the DEXA scan
[x] Avoid risky behaviors: always use your walker

[x] Other: Talk to you primary doctor about starting an osteoporosis medicine

Short Falls Efficacy Scale- International (Short FES-I)

We would like to ask some questions about how concerned you are about the possibility of falling. Please reply thinking about how you usually do the activity. If you currently don't do the activity, please answer to show whether you think you would be concerned about falling IF you did the activity.
For each of the following activities, please tick the box which is closest to your own opinion to show how concerned you are that you might fall if you did this activity.

		Not at all concerned 1	*Somewhat concerned* 2	*Fairly concerned* 3	*Very concerned* 4
1	Getting dressed or undressed	1 ☑	2 ☐	3 ☐	4 ☐
2	Taking a bath or shower	1 ☑	2 ☐	3 ☐	4 ☐
3	Getting in or out of a chair	1 ☐	2 ☐	3 ☑	4 ☐
4	Going up or down stairs	1 ☐	2 ☐	3 ☑	4 ☐
5	Reaching for something above your head or on the ground	1 ☑	2 ☐	3 ☐	4 ☐
6	Walking up or down a slope	1 ☑	2 ☐	3 ☐	4 ☐
7	Going out to a social event *(e.g. religious service, family gathering or club meeting)*	1 ☑	2 ☐	3 ☐	4 ☐

HMC FALL PREVENTION CLINIC HEALTH HISTORY QUESTIONNAIRE

The following is part of your medical record and will remain confidential.

Physical Activity

These questions ask about exercise or physical activities that you did in the past 7 days.

Instructions:
If you did this activity in the past 7 days:

1. Mark the YES box
2. Think about how many sessions per week you did the activity, and write your response in the space provided.
3. Think about how many minutes per session you did the activity on average and write your response in the space provided.

The first row provides an example of how to complete this.

Activity Name	Did you do this activity in the past 7 days	Number of sessions in the past 7 days	Average minutes per session in the past 7 days
Example: Bicycle outdoors or on a stationary indoor bike	☒ Yes → ☐ No	2 sessions	25
1.Walking for exercise *(such as outdoor on a treadmill, indoor at a mall)*	☒ Yes → ☐ No	Shopping _____ sessions	
2. Swimming laps in a pool	☐ Yes → ☒ No	_____ sessions	
4. Bicycle outdoors or on a stationary indoor bike	☒ Yes → ☐ No	Just started _____ sessions	
4.Strength training *(such as lifting weights, sit-to-stand exercises)*	☒ Yes → ☐ No	Just started _____ sessions	
5. Stretching	☒ Yes → ☐ No	Just started _____ sessions

Scan (below)

Activities of Daily Living - Physical

Directions: complete in black ink only - colors do not scan well. Each entry should note month/day/year; time; problem number

1. Can you eat?
(2) Without help (able to feed yourself completely)
1 With some help (need help with cutting, etc.)
0 Are you completely unable to feed yourself?
- not answered

2. Can you dress and undress yourself?
(2) Without help (able to pick out clothes, dress and undress yourself)
1 With some help
0 Are you completely unable to dress and undress yourself?
- not answered

3. Can you take care of your own appearance (for example, combing your hair and (for men) shaving)?
(2) Without help
1 With some help
0 Are you completely unable to maintain your appearance yourself?
- not answered

4. Can you walk?
2 Without any help (except from a cane)
1 With some help from a person, or with the use of a walker, or crutches, etc.
(0) Are you dependent on someone else to help you?
- not answered

5. Can you get in and out of bed?
(2) Without any help or aids
1 With some help (either from a person or with the aid of some device)
0 Are you dependent on someone else to lift you?
- not answered

6. Can you take a bath or shower?
(2) Without help
1 With some help (need help getting in and out of the tub, or need special attachments on the tub)
0 Are you completely unable to bath yourself?
- not answered

7. Do you ever have trouble getting to the bathroom on time?
(2) No
1 Have a catheter or colostomy
0 Yes
- not answered

If YES, how often do you wet or soil yourself (either day or night)?
1 once or twice a week
(0) three times a week or more
- not answered

8. Is there someone who helps you with such things as shopping, housework, bathing, dressing, and getting around?
(1) Yes — If YES, ask a) who is your major helper Son/CaregiverLiveIn, POA Guardian
2 No — b) who else helps you?
- not answered

LANGUAGE: English

Chief complaint: Follow-Up (post acute care visit)

HPI: 94 year old femalepreviously living at home with her son with a h/o DVTs, HTN, venous insufficiency, chronic leg ulcers, osteoporosis who was hospitalized at Harborview Medical Center from 7/25/2019 until 8/5/2019 with pelvic fx, right RF and hemo-pneumothorax secondary to GLF

08/16/2019 - Outside Care Encounter in POST-ACUTE CARE SVC (continued)

Clinical Notes (continued)

She is now at Kline Galland SNF for STR with PT/OT

Interval Hx: patient is seen today for post acute care follow up at Kline
- Pelvic fx: she denies any issues, "feels great... And the food is really good too!" Denies pain
- BLE venous insufficiency, chronic leg ulcers:

Patient Active Problem List

Diagnosis

- Sensorineural hearing loss, unspecified
- DVT, recurrent, lower extremity, chronic (HCC)
- Other and unspecified hyperlipidemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Unspecified vitamin B deficiency
- Adult failure to thrive syndrome
- Long term current use of anticoagulant therapy
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- Hip joint stiffness
- Leg weakness, bilateral
- Weakness of trunk musculature
- Other physical therapy
- History of recurrent deep vein thrombosis (DVT)
- Thrombocytopenia (HCC)
- Imbalance
- Primary osteoarthritis of both hips
- Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)
- Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer and inflammation, left (HCC)
- Cellulitis of left leg
- Venous ulcer of left leg (HCC)
- Homeless
- Normocytic anemia
- Severe protein-calorie malnutrition (HCC)
- Urge urinary incontinence
- Vitamin D deficiency
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- Diabetic ulcer of lower extremity (HCC)
- Housing lack
- Suspected elder abuse
- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)
- Chronic venous hypertension with ulcer, bilateral (HCC)
- Bilateral leg edema
- Closed displaced fracture of left pubis with routine healing
- Acute blood loss anaemia
- Closed fracture of multiple ribs of left side with routine healing
- Hemopneumothorax

MEDICATIONS

5. Dulcolax 10 mg. suppository PR Q 3 days PRN no BM Insert 1 suppository rectally as needed for KGH Bowel Protocol 3 days for no BM
6. Glucagon Emergency Kit 1 MG Inject 1 mg subcutaneously as needed for Low Blood Sugar Inject 1 syringe (1mg) as directed for blood sugar <70 in emergency situations if the pt is unable to take oral sugar (such as juice or glucose tablets).
7. MiraLax Powder Give 17 gram by mouth one time a day for Constipation
8. MVI with Minerals 1 po daily as dietary supplement Give 1 tablet by mouth one time a day for dietary supplement
9. Ondansetron HCl Tablet 4 MG Give 1 tablet by mouth every 8 hours as needed for N\/V
10. oxyCODONE HCl Tablet 5 MG Give 0.5 tablet by mouth every 12 hours as needed for Pain To be given before wound care
11. Senna 8.6 mg; 1 tabs PO QHS\/PRN constipation; Hold for loose stool Give 1 tablet by mouth as needed for KGH Protocol
12. Timolol Maleate Solution 0.5 % Instill 1 drop in both eyes two times a day for Dry Eyes Tilt head back and pull the lower eyelid downward away from the eye. Make sure
    the drop makes a full contact with conjunctival sac. Wait 5mins for the next
    drop. Press tear duct for 1-2 mins after.

This patient's medications have been reviewed in the chart and reconciled.
There may have been changes in the medications that are not reflected in this note.
For the most accurate medication list, please call skilled nursing facility and ask for the most recent medication administration record (MAR) to be sent.
Review of patient's allergies indicates:

Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other
• Nitrofurantoin	Other
Confusion, loss of appetitie, nausea, abdominal pain	
• Nitrofurantoin	Other
confusion	
• Penicillins	Rash
• Sulfa Antibiotics	Rash

Review of Systems
Constitutional: Negative.
Eyes: Negative.
Respiratory: Negative.
Cardiovascular: Negative.
Gastrointestinal: Negative for abdominal pain.
Genitourinary: Negative.
Musculoskeletal: Negative.
Skin:
Venous statis ulcers
Neurological: Negative. Negative for dizziness.

Psychiatric/Behavioral: The patient does not have insomnia.
All other systems reviewed and are negative.

Most recent vitals from SNF chart:
BP: 111/56 mmHg 8/16/2019 11:50
Temp:98.3 °F 8/16/2019 11:50
Pulse: 62 bpm 8/16/2019 11:50
Weight: 107.4 Lbs 8/15/2019 09:49
Resp: 20 Breaths/min 8/16/2019 11:50
BS: 130 mg/dL 8/12/2019 07:41
Pain: 2 8/16/2019 13:32

Physical Exam
Constitutional: She is well-developed, well-nourished, and in no distress.
HENT:
Head: Atraumatic.
Eyes: Conjunctivae are normal.
Neck: Normal range of motion.
Cardiovascular: Normal rate.
Pulmonary/Chest: Effort normal.
Abdominal: Soft. Bowel sounds are normal. She exhibits no distension. There is no tenderness.
Neurological: She is alert.
Skin: Skin is warm and dry.
RLE wound bed is pink with small amount of serosanguineous drainage noted.
LLE with 20% slough and wound bed is pink with some slough; moderate amount of serosanguineous drainage noted
Psychiatric: Mood and affect normal.
Vitals reviewed.

DIAGNOSTICS: Reviewed in Care Everywhere/ SNF chart

ASSESSMENT / PLAN:
(S32.502D) Closed displaced fracture of left pubis with routine healing (primary encounter diagnosis)
(Z74.09) Impaired mobility and activities of daily living
(R26.89) Imbalance
(R29.898) Leg weakness, bilateral
Plan: progressing, mostly SBA assist for most ADLs
- ongoing rehab needed for strength and endurance
- pain well controlled with PRN oxycodone Q12, consider D/C at next visit

(R60.0) Bilateral leg edema
(I87.8) Venous stasis
Plan: wounds are slow to heal, continue with daily dressing change
- continue to elevate legs. History of recurrent DVT/chronic DVT in legs, was on warfarin now D/C'ed
- continue of ASA
- maybe helpful to get ABI so she can have more compression
- her son has declined to have United Wound Care follow while at Kline

(E11.9) Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)
Plan: diet controlled, was on metformin which was D/C'ed in 2011

08/05/2019 - Outside Care Encounter in POST-ACUTE CARE SVC (continued)

Clinical Notes (continued)

PCP: Neighbor Jr., William E, MD

Reason for visit: **Admission History and Physical**

Chief Complaint: I don't have much pain

History of Present Illness:
94 year old femalepreviously living at home with her son with a h/o DVTs, HTN, venous insufficiency, chronic leg ulcers, osteoporosis who was hospitalized at Harborview Medical Center from 7/25/2019 until 8/5/2019 with pelvic fx, right RF and hemo-pneumothorax secondary to GLF .

She has had falls in the past. She reports poor balance despite PT and uses a walker when she is outside of the house. She also has chronic leg wounds from venous stasis, which have been making it more difficult for her to walk. She has a history of DVTs in the past, but per outpatient notes has been off warfarin recently and her PCP decided not to restart anticoagulation at a recent prior visit.

Patient was admitted to have wish initially struggled with pain management, however her pain control improved. For Her fracture of the Right inferior pubic ramus fracture the patient was treated nonoperatively and continued withWBAT BLE w/ PT/OT

Patient states at this juncture her pain is well controlled, she has some discomfort in her left lower pelvis but it's not severe and intolerable. She has some discomfort but only upon deep inspiration on her right chest wall, she is using her incentive spirometer and points out to me how far she can go. She does not have any shortness of breath or cough.

She described in detail how she fell, she did not use an assistive device and seems to be "furniture cruising "at home

Is aware that overall she is quite weak and unsteady and will need therapy. We discussed also the important role of nutrition and good by mouth intake

PAST MEDICAL HISTORY:
HTN
HLD
Osteoporosis with prior spinal fracture
DVTs
Home Medications
1. atorvastatin (Lipitor 40 mg oral tablet) Dose: 40 mg PO Daily
2. losartan 25 mg oral tablet Dose: 12.5 mg PO Daily
3. pentoxifylline 400 mg oral tablet, exten Dose: 400 mg PO TID
4. timolol ophthalmic (timolol maleate 0.5% Dose: 1 drop(s) EYE-Both BID
5. warfarin 5 mg oral tablet Dose: 5 mg PO QMTuWFSa
6. warfarin 2.5 mg oral tablet Dose: 2.5 mg PO QThSu
7. acetaminophen-codeine (Tylenol with Code Dose: 1 tab PO Daily PRN Pain

Per discharge summary by by Connor PA-C, Kathleen M on Aug-05-2019
DISCHARGE DIAGNOSES:

PMH/Problem List:

Patient Active Problem List

Diagnosis	Date Noted
• Osteoporosis, unspecified [M81.0] T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continued for five years, then stopped	03/04/2008
• Long term current use of anticoagulant therapy [Z79.01] Reason for anticoagulation: Recurrent dvts Duration of anticoagulation: life INR goal: 2.-3 (lower end of this range desired because of age)	01/08/2008
• Adult failure to thrive syndrome [R62.7] Lives in subsidized housing on Bainbridge Bremerton APS at 1-888-833-4925 Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved. Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait 7/30/2014 stable. Doing well. Son now legally can live with her for support.	10/19/2007
• Unspecified vitamin B deficiency [E53.9] Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency	05/01/2007
• Type 2 diabetes mellitus without complication (HCC) [E11.9] Year onset: Dx March 2007 Metformin discontinued 2011 as A1c in target range without it. Diet and weight controlled.	03/27/2007
• Sensorineural hearing loss, unspecified [H90.5] Has bilateral hearing aids. 6/3/2008 hearing worse. Ears clean. Advise follow with audiology.	11/20/2006
• DVT, recurrent, lower extremity, chronic (HCC) [I82.509]	11/20/2006

08/05/2019 - Outside Care Encounter in POST-ACUTE CARE SVC (continued)

Clinical Notes (continued)

Recurrent DVT and phlebitis since 1982
Per Vascular Surgery note 5/9/2006: continue warfarin
3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 . Advise Vit D 800 IU daily.

- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC) [L97.313] 05/26/2019
- Chronic venous hypertension with ulcer, bilateral (HCC) [I87.313, L97.919, L97.929] 05/26/2019
- Bilateral leg edema [R60.0] 05/26/2019
- Suspected elder abuse [T76.91XA] 01/11/2019
- Housing lack [Z59.0] 09/26/2018
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC) [I70.232, I70.242] 09/24/2018
- Diabetic ulcer of lower extremity (HCC) [E11.622, L97.909] 09/24/2018

08/05/2019 - Outside Care Encounter in POST-ACUTE CARE SVC (continued)

Clinical Notes (continued)

• Vitamin D deficiency [E55.9]	07/09/2018
• Venous ulcer of left leg (HCC) [I83.029, L97.929]	06/07/2018
• Homeless [Z59.0]	06/07/2018
• Normocytic anemia [D64.9]	06/07/2018
• Severe protein-calorie malnutrition (HCC) [E43]	06/07/2018
• Urge urinary incontinence [N39.41]	06/07/2018
• Cellulitis of left leg [L03.116]	05/31/2018
• Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC) [L97.323]	05/17/2018
• Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC) [L97.223]	05/17/2018
• Chronic venous hypertension with ulcer and inflammation, left (HCC) [I87.332, L97.929]	05/17/2018
• Primary osteoarthritis of both hips [M16.0]	02/01/2017
• Thrombocytopenia (HCC) [D69.6]	11/02/2016
• Imbalance [R26.89]	11/02/2016
• History of recurrent deep vein thrombosis (DVT) [Z86.718]	06/02/2016
• Other physical therapy [IMO0001]	01/22/2015
• Hip joint stiffness [M25.659]	01/06/2015
• Leg weakness, bilateral [R29.898]	01/06/2015
• Weakness of trunk musculature [M62.81]	01/06/2015
• Pseudophakia, both eyes [Z96.1]	11/08/2014
• Urine incontinence [R32] Uses pads	08/27/2014
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013

ALLERGIES: Review of patient's allergies indicates:

Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other
• Nitrofurantoin *Confusion, loss of appetitie, nausea, abdominal pain*	Other
• Nitrofurantoin *confusion*	Other

[x] I discussed the updates to the plan of care as outlined above with staff. I engaged in direct coordination of care which included records review, documentation updates, medication reconciliation, and coordination and counseling of care with members of the care team. Follow-up will continue with UW Medicine & other consultation services as appropriate.

Today's Visit

You saw Sabine M Von Preyss, MD on Monday August 5, 2019. The following issues were addressed:

- Closed displaced fracture of left pubis with routine healing
- Severe protein-calorie malnutrition
- Venous ulcer of left leg
- History of recurrent deep vein thrombosis (DVT)
- Acute blood loss anaemia
- Vitamin D deficiency
- Closed fracture of multiple ribs of left side with routine healing
- Hemopneumothorax

Nursing Home Visit at:
Caroline Kline Galland Skilled Nursing Facility
7500 Seward Park Ave S
Seattle WA 98118
Tel: (206) 725-8800

Date of service: 8/5/2019
4:11 PM

Date of SNF admission 8/5/2019

PCP: Neighbor Jr., William E, MD

Reason for visit: **Admission History and Physical**

Chief Complaint: I don't have much pain

History of Present Illness:
94 year old femalepreviously living at home with her son with a h/o DVTs, HTN, venous insufficiency, chronic leg ulcers, osteoporosis who was hospitalized at Harborview Medical Center from 7/25/2019 until 8/5/2019 with pelvic fx, right RF and hemo-pneumothorax secondary to GLF .

She has had falls in the past. She reports poor balance despite PT and uses a walker when she is outside of the house. She also has chronic leg wounds from venous stasis, which have been making it more difficult for her to walk. She has a history of DVTs in the past, but per outpatient notes has been off warfarin recently and her PCP decided not to restart anticoagulation at a recent prior visit.

Patient was admitted to have wish initially struggled with pain management, however her pain control improved. For Her fracture of the Right inferior pubic ramus fracture the patient was treated nonoperatively and continued withWBAT BLE w/ PT/OT

Patient states at this juncture her pain is well controlled, she has some discomfort in her left lower pelvis but it's not severe and intolerable. She has some discomfort but only upon deep inspiration on her right chest wall, she is using her incentive spirometer and points out to me how far she can go. She does not have any shortness of breath or cough.

She described in detail how she fell, she did not use an assistive device and seems to be "furniture cruising "at home

Is aware that overall she is quite weak and unsteady and will need therapy. We discussed also the important role of nutrition and good by mouth intake

PAST MEDICAL HISTORY:
HTN
HLD
Osteoporosis with prior spinal fracture
DVTs
Home Medications
1. atorvastatin (Lipitor 40 mg oral tablet) Dose: 40 mg PO Daily
2. losartan 25 mg oral tablet Dose: 12.5 mg PO Daily
3. pentoxifylline 400 mg oral tablet, exten Dose: 400 mg PO TID
4. timolol ophthalmic (timolol maleate 0.5% Dose: 1 drop(s) EYE-Both BID
5. warfarin 5 mg oral tablet Dose: 5 mg PO QMTuWFSa
6. warfarin 2.5 mg oral tablet Dose: 2.5 mg PO QThSu
7. acetaminophen-codeine (Tylenol with Code Dose: 1 tab PO Daily PRN Pain

Per discharge summary by by Connor PA-C, Kathleen M on Aug-05-2019
DISCHARGE DIAGNOSES:
Discharge Diagnoses
Hemothorax
right inferior pubic ramus fracture
Chronic venous stasis

#Fracture of ribs 8, 9 with hemopneumothorax
Small R apical pneumothorax, stable on repeat CXR (7/29)
- repeat CXR 8/1- stable
-pain control
-PT/OT

#Hyperglycemia
Hx of A1C range 6.2-9.2 spring 2019
-low dose SSI

 # Falls
- Referral to falls clinic at DC
- Discus DEXA and Bisphosphonates with PCP after fractures healed

#Recurrent DVTs on warfarin - per outpt PCP notes pt was no longer taking warfarin, it remains held
#HTN - holding home Losartan BPs stable
#HLD - continue Atorvastatin
#Chronic BLE wounds - wound care recs in DC instructions

Prescriptions

Prescribed

GlucaGen HypoKit 1 mg injection: See Instructions, 1 mg do not give more than 1 mg intravenously, 2 mg, 0 Refill(s)
Glucagon Emergency Kit for Low Blood Sugar 1 mg injection: 1 mg, Subcutaneous, Once, Inject one syringe (1mg) as directed for blood sugar < 70 in emergency situations if the patient is unable to take oral sugar (such as juice or glucose tablests)., 1 kit, 0 Refill(s)
MiraLax oral powder for reconstitution: 17 g, PO, Daily, Dissolve in water or juice, 255 g, 0 Refill(s)
Multiple Vitamins with Minerals oral tablet: 1 tab, PO, Daily, 3 tab, 0 Refill(s)
acetaminophen 500 mg oral tablet: 1,000 mg, 2 tab, PO, TID, 48 tab, 0 Refill(s)
atorvastatin 10 mg oral tablet: 10 mg, 1 tab, PO, QPM, 3 tab, 0 Refill(s)
calcium carbonate 500 mg (200 mg elemental calcium) oral tablet, chewable: 1,000 mg, 2 tab, Chew, TID, PRN: Indigestion/Heartburn, 45 tab, 0 Refill(s)
cholecalciferol 1000 intl units oral tablet: 1,000 units, 1 tab, PO, Daily, 3 tab, 0 Refill(s)
glucose 50% intravenous solution: 12.5 g, 25 mL, IV, On Call, PRN: Blood Glucose Abnormal, 75 mL, 0 Refill(s)
glucose 50% intravenous solution: 25 g, 50 mL, IV, On Call, PRN: Blood Glucose

Abnormal, 75 mL, 0 Refill(s)
insulin lispro 100 units/mL injectable solution: LOW Correction-Premeal, Subcutaneous, TID Before Meals, << Sliding Scale Comments >> Blood sugar = Dose 151-199 = 1 unit (2 units if no nutritional insulin given) 200-249 = 2 units 250-299 = 3 units 300-349 = 4 units >349 = recheck blood sugar once now, then give 5 units. << Sliding Scale Comments >>, 3 mL, 0 Refill(s)
ondansetron 4 mg oral tablet: 4 mg, 1 tab, PO, Q8 Hours, PRN: Nausea/Vomiting, 12 tab, 0 Refill(s)
oxyCODONE 5 mg oral tablet: 2.5-5 mg, PO, BID, PRN: Wound Care, 6 tab, 0 Refill(s)
senna 8.6 mg oral tablet: 17.2 mg, 2 tab, PO, BID, 4 tab, 0 Refill(s)
timolol maleate 0.5% ophthalmic solution: 1 drop(s), EYE-Both, BID, 5 mL, 0 Refill(s)

Physical Exam:
130/60, 97.7, P72, RR 20
CONSTITUTIONAL/GENERAL APPEARANCE**:** Delightful, alert, spry cachectic nonagenerian in NAD
MENTAL STATUS/PSYCH: Alert and oriented , no dysthymic mood, no a/v hallucinations
NEURO:alert speech clear and fluent, moving all extremities,No tremor, Normal tone, motor nonfocal
HEENTNormal external eyes / ears, MMM, dentition wnl,
NECK thyroid not enlarged or tender palpable,
RESPIRATORY: No respiratory distress, even and unlabored , breathing comfortably, speaking in full sentences, Clear to ausculation bilaterally , no crackles or wheezes, rhonchi
CARDIOVASCULAR irregular, S1 S2 Normal no murmurs, no pitting leg edema, no JVD
ABDOMEN/GI: non-tender, non-distended, , no masses_ normal BT
GENITOURINARY: no CVAT , no suprapubic tenderness, bladder not palpable,
MUSCULOSKELETAL: No acute joint swelling or deformity
BACK -kyphotic
EXTREMITIES: adequately perfused, no swelling cyanosis, splints
SKIN: _ dry wnl temp and color, no rash ulcer on areas examined, scattered UE bruising

[x] I discussed the updates to the plan of care as outlined above with staff. I engaged in direct coordination of care which included records review, documentation updates, medication reconciliation, and coordination and counseling of care with members of the care team. Follow-up will continue with UW Medicine & other consultation services as appropriate.

Status: Sent
Letter body:

August 5, 2019

Jeane L. Hoffman
321 High School Road NE
Ste D3 PMB 292
Bainbridge Island, WA 98110

RE: Jeane Leonie Hoffman
DOB: 1/6/1925

Dear Jeane L. Hoffman:

The **Fall Prevention Clinic** at Harborview Medical Center received a notification from our inpatient team that you have recently been discharged. Your discharge instructions stated that you should follow up with our clinic in a specific time frame. We are sending this letter to clarify the situation.

The Fall Prevention Clinic is a consultative service. We encourage all patients that have been hospitalized to follow up with their primary care provider shortly after discharge. Often times the inpatient team will submit a referral to us, but we recommend that your primary care provider submit a referral to the Falls Clinic if they feel that you would benefit from our services. This is because some insurance policies require a referral from primary care.

In addition to this, patients should be healed from any injuries that were sustained and should be returned to their baseline ambulatory status prior to seeing our clinic. This way we can offer the most comprehensive evaluation to assist you with any fall related concerns. Since you will be discharging to a Skilled Nursing Facility, they will provide rehabilitative therapies to help you reach baseline status. Please call our clinic to schedule an appointment *after* you have completed your therapies.

Our clinic typically schedules out two to four months for new patient appointments. If your PCP believes that we can be of assistance, they may fax a referral and any relevant medical information to us at 206-744-8527. If you would like to proceed with scheduling or wish to check on the status of available appointments, we may be reached at 206-744-4191.

Sincerely,

HMC Fall Prevention Clinic
Ph. 206-744-4191

Narrative:

EXAMINATION:
XR CHEST 1 VIEW

CLINICAL INDICATION:
reeval CT to water seal

COMPARISONS:
July 26, 2019 at 06:24 chest radiograph

FINDINGS AND IMPRESSION:
Right thoracostomy tube is unchanged in position. New right apical pneumothorax.

07/26/2019 - Orders Only in UW Medicine Radiology (continued)

Imaging (continued)

No other substantial cardiopulmonary changes.
ATTENDING RADIOLOGIST AND PAGER NUMBER

Discharge Medication List

Pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD Ordered on: 12/20/2017
Start date: 12/20/2017 End date: 9/4/2019
Quantity: 270 tablet Refill: 3 refills remaining

Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD Discontinued on: 10/13/2021
Instructions: Take 1 tablet by mouth 2 times a day.
Entered by: Ong, Thuan Duc, MD Entered on: 6/7/2018
End date: 10/13/2021

Losartan Potassium 25 MG Oral Tab

Discontinued by: Taylor, Zoe Judith Mildred, MD Discontinued on: 8/20/2019
Reason for discontinuation: Therapy completed/no longer indicated
Instructions: TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY
Entered by: Neighbor Jr., William E, MD Entered on: 9/26/2018
Start date: 9/26/2018 End date: 8/20/2019
Quantity: 45 tablet

Atorvastatin Calcium 20 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction

07/24/2019 - ED to Hosp-Admission (Discharged) in 6EH ORTHOPEDICS (continued)

Medication List (continued)

Entered by: Neighbor Jr., William E, MD
Entered on: 9/26/2018
Start date: 9/26/2018
End date: 9/4/2019
Quantity: 45 tablet

Warfarin Sodium 4 MG Oral Tab

Discontinued by: Lamont, Danna, ARNP
Discontinued on: 8/16/2019
Reason for discontinuation: Therapy completed/no longer indicated
Instructions: Take 1 tablet (4 mg) by mouth daily.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/16/2019
Start date: 2/16/2019
End date: 8/16/2019
Quantity: 30 tablet
Refill: 2 refills by 2/16/2020

Timolol Maleate 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Instill one drop in each eye twice daily
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/16/2019
Start date: 4/16/2019
End date: 9/4/2019
Quantity: 10 mL
Refill: No refills remaining

acetaminophen-codeine 300-30 MG Oral Tab

Discontinued by: Taylor, Zoe Judith Mildred, MD
Discontinued on: 8/20/2019
Reason for discontinuation: Therapy completed/no longer indicated
Instructions: TAKE ONE TABLET BY MOUTH ONCE DIALY FOR ARTHRITIC PAIN AS NEEDED.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 5/22/2019
Start date: 5/22/2019
End date: 8/20/2019
Quantity: 60 tablet
Refill: No refills remaining

Discharge Medication List

Pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD | Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD | Ordered on: 12/20/2017
Start date: 12/20/2017 | End date: 9/4/2019
Quantity: 270 tablet | Refill: 3 refills remaining

Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD | Discontinued on: 10/13/2021
Instructions: Take 1 tablet by mouth 2 times a day.
Entered by: Ong, Thuan Duc, MD | Entered on: 6/7/2018
End date: 10/13/2021

Losartan Potassium 25 MG Oral Tab

Discontinued by: Taylor, Zoe Judith Mildred, MD | Discontinued on: 8/20/2019
Reason for discontinuation: Therapy completed/no longer indicated
Instructions: TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY
Entered by: Neighbor Jr., William E, MD | Entered on: 9/26/2018
Start date: 9/26/2018 | End date: 8/20/2019
Quantity: 45 tablet

Atorvastatin Calcium 20 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD | Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Entered by: Neighbor Jr., William E, MD | Entered on: 9/26/2018
Start date: 9/26/2018 | End date: 9/4/2019
Quantity: 45 tablet

Warfarin Sodium 4 MG Oral Tab

Discontinued by: Lamont, Danna, ARNP | Discontinued on: 8/16/2019
Reason for discontinuation: Therapy completed/no longer indicated
Instructions: Take 1 tablet (4 mg) by mouth daily.
Authorized by: Neighbor Jr., William E, MD | Ordered on: 2/16/2019

07/24/2019 - ED in U Emergency Department (continued)

Medication List (continued)

Start date: 2/16/2019
End date: 8/16/2019
Quantity: 30 tablet
Refill: 2 refills by 2/16/2020

Timolol Maleate 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Instill one drop in each eye twice daily
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/16/2019
Start date: 4/16/2019
End date: 9/4/2019
Quantity: 10 mL
Refill: No refills remaining

acetaminophen-codeine 300-30 MG Oral Tab

Discontinued by: Taylor, Zoe Judith Mildred, MD
Discontinued on: 8/20/2019
Reason for discontinuation: Therapy completed/no longer indicated
Instructions: TAKE ONE TABLET BY MOUTH ONCE DIALY FOR ARTHRITIC PAIN AS NEEDED.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 5/22/2019
Start date: 5/22/2019
End date: 8/20/2019
Quantity: 60 tablet
Refill: No refills remaining

Consent Form - Scan on 7/25/2019 9:19 PM: U0173

Scan (below)

SPECIAL CONSENT FOR PROCEDURAL TREATMENT 7/25/2019 5:55:25 PM
(DIAGNOSTIC & SURGICAL PROCEDURES & OTHER INVASIVE PROCEDURES)

The law in Washington gives you the right and the responsibility to make decisions about your health care. Health care professionals can give you information and advice. You or your legal representative must be part of the decision-making. This consent form:
- Proves that you had a part in making decisions about your health care.
- Shows that you gave permission for the treatment recommended by your health care professionals.

The words "I", "my", etc., in this form mean the patient, no matter whether the patient or the patient's representative is signing the form. The term "health care professional" may mean the attending physician, but in addition may mean a different doctor (including a resident), nurse practitioner, registered nurse, or physician's assistant, who orders, performs all or part of, or is involved in explaining the procedure.

I give permission to my health care professional(s) who are listed on the back of this form as the performing provider(s), to do the procedure(s) listed on the back of this form, with anesthesia and/or sedation if that is needed. Anesthesia or sedation medicine will be given by the health care professional, anesthesiologist, or other trained health care staff who work under appropriate supervision.

I understand that the attending physician may need to perform other urgent procedures due to an emergency that may occur while I am sedated or otherwise not able to give consent. The attending physician or designee will talk with my legally authorized representative if possible.

I understand that the attending physician may choose assistants, including other health care professionals and residents *(physicians who have finished medical school, but are getting more training)*, to be part of the team performing my procedure. The assistants may suture; harvest grafts; dissect, remove or alter tissue; implant devices; or do other tasks that the attending physician has deemed appropriate. If known, the attending physician has discussed with me whether there will be assistants and whom s/he expects the assistants to be. I understand that during the procedure, the attending physician may need to choose different assistants or have them do different tasks. I understand that for some kinds of medical equipment used during procedures, a representative from the equipment manufacturer may be there, doing things like providing consultation or running checks on the equipment.

I understand the attending physician may participate in care involving overlapping procedures or oversee other urgent medical responsibilities and may not be present in the room at all times. During this time, the skilled team of assistants may perform portions of my procedure which the attending physician has determined they are proficient to perform. If an overlap is anticipated or planned, I will be notified prior to surgery. The attending physician will be present for the key and critical portions of the procedure, and either he/she or a designated attending physician will be available to the procedure team at all times.

The hospital or health care professional will dispose of any removed tissues or parts.

I understand what procedure(s) will be done. I have been told about the risks and benefits. I have been told about other treatment choices and about their risks and benefits, including not having the procedure. I have been told about what results to expect, which includes information about the chances for the expected results. I know that results cannot be guaranteed. I have been told about potential problems that may occur during recuperation.

I understand that there are risks for all kinds of surgery and for "invasive procedures" *(procedures where a blood vessel, body cavity, or other internal tissue is entered with a needle, tube, or similar device)*. These risks, which can be serious, include bleeding, infection, and damage to nearby tissues, vessels, nerves, or organs. They may even result in paralysis, cardiac arrest, brain damage, and/or death.

I have received this added detailed information and/or patient information materials about the procedure(s):

_____

Print added information or title of information materials

I understand whether I will receive either anesthesia or sedation medicine, or both. I have been told about my choices for anesthesia and sedation and about their risks and benefits. I have been told about side effects of the medicine(s) and problems they may cause with recovery.

I understand that anesthesia and sedation medicines used for procedures involve risks. These risks can be serious.

Continued on Reverse

SPECIAL CONSENT FOR PROCEDURAL TREATMENT

U0173

UH0173 REV APR 17

07/24/2019 - ED in U Emergency Department (continued)

Documents (continued)

They may include damage to vital organs such as the brain, heart, lungs, liver, and kidneys. They may even result in paralysis, cardiac arrest, brain damage, and/or death.

I understand that the anesthesia equipment may damage my teeth or cause other dental damage.

I understand that nerve damage may occur from how anesthesia equipment is placed or how my body must be positioned during a procedure.

I understand that I am free to refuse consent to any proposed procedure.

BLOOD: I have been told whether I am having a procedure where blood or blood components *(products)* may need to be used *(also known as transfused)*. **If I am having this kind of procedure**, I have been told about side effects, risks and other choices about transfusion, including **not** getting a transfusion.

I give permission to receive blood and/or blood components if the health care team decides it is needed. I understand that use of blood and blood components involves risks. The risks may include reactions, including allergic reactions, fever, hives, lung injury, and in rare cases, infectious diseases such as hepatitis and HIV/AIDS. I know that the blood bank screens donors and matches blood for transfusions to help lower risks.

OR *(Please initial)*
_____ **I refuse** ***(or partially refuse)*** **permission for blood and blood components.** *(You will be asked to sign another form, Form UH2063)*.

☐ **Interpreter** ***(Print Name)***_____

Giving Consent

By signing below, I confirm that I have read the sections above and that I have had 1) each item explained to me; 2) a chance to ask questions; and 3) all of my questions answered.

FULL NAME OF PROCEDURE(S)	Chest tube, Right-sided

HEALTH CARE PROFESSIONAL'S STATEMENT

I explained the treatment/procedure(s) stated on this form, including the possible risks, complications, alternative treatments *(including non-treatment)* and anticipated results to the patient and/or his/her representative before the patient and/or his/her representative consented.

If only the patient has signed this form, in my clinical opinion, the patient is capable of making his/her own health care decisions. If in my clinical opinion, the *(adult)* patient has questionable ability to make his/her own health care decisions, I discussed the above with the patient and with the patient's legally authorized representative.

SPECIAL CONSENT FOR PROCEDURAL TREATMENT 7/24/2019 5:55:25 PM

(DIAGNOSTIC & SURGICAL PROCEDURES & OTHER INVASIVE PROCEDURES)

The law in Washington gives you the right and the responsibility to make decisions about your health care. Health care professionals can give you information and advice. You or your legal representative must be part of the decision-making. This consent form:
- Proves that you had a part in making decisions about your health care.
- Shows that you gave permission for the treatment recommended by your health care professionals.

The words "I", "my", etc., in this form mean the patient, no matter whether the patient or the patient's representative is signing the form. The term "health care professional" may mean the attending physician, but in addition may mean a different doctor (including a resident), nurse practitioner, registered nurse, or physician's assistant, who orders, performs all or part of, or is involved in explaining the procedure.

I give permission to my health care professional(s) who are listed on the back of this form as the performing provider(s), to do the procedure(s) listed on the back of this form, with anesthesia and/or sedation if that is needed. Anesthesia or sedation medicine will be given by the health care professional, anesthesiologist, or other trained health care staff who work under appropriate supervision.

I understand that the attending physician may need to perform other urgent procedures due to an emergency that may occur while I am sedated or otherwise not able to give consent. The attending physician or designee will talk with my legally authorized representative if possible.

I understand that the attending physician may choose assistants, including other health care professionals and residents *(physicians who have finished medical school, but are getting more training)*, to be part of the team performing my procedure. The assistants may suture; harvest grafts; dissect, remove or alter tissue; implant devices; or do other tasks that the attending physician has deemed appropriate. If known, the attending physician has discussed with me whether there will be assistants and whom s/he expects the assistants to be. I understand that during the procedure, the attending physician may need to choose different assistants or have them do different tasks. I understand that for some kinds of medical equipment used during procedures, a representative from the equipment manufacturer may be there, doing things like providing consultation or running checks on the equipment.

I understand the attending physician may participate in care involving overlapping procedures or oversee other urgent medical responsibilities and may not be present in the room at all times. During this time, the skilled team of assistants may perform portions of my procedure which the attending physician has determined they are proficient to perform. If an overlap is anticipated or planned, I will be notified prior to surgery. The attending physician will be present for the key and critical portions of the procedure, and either he/she or a designated attending physician will be available to the procedure team at all times.

The hospital or health care professional will dispose of any removed tissues or parts.

I understand what procedure(s) will be done. I have been told about the risks and benefits. I have been told about other treatment choices and about their risks and benefits, including not having the procedure. I have been told about what results to expect, which includes information about the chances for the expected results. I know that results cannot be guaranteed. I have been told about potential problems that may occur during recuperation.

I understand that there are risks for all kinds of surgery and for "invasive procedures" *(procedures where a blood vessel, body cavity, or other internal tissue is entered with a needle, tube, or similar device)*. These risks, which can be serious, include bleeding, infection, and damage to nearby tissues, vessels, nerves, or organs. They may even result in paralysis, cardiac arrest, brain damage, and/or death.

I have received this added detailed information and/or patient information materials about the procedure(s):

_____

Print added information or title of information materials

I understand whether I will receive either anesthesia or sedation medicine, or both. I have been told about my choices for anesthesia and sedation and about their risks and benefits. I have been told about side effects of the medicine(s) and problems they may cause with recovery.

I understand that anesthesia and sedation medicines used for procedures involve risks. These risks can be serious.

SPECIAL CONSENT FOR PROCEDURAL TREATMENT

U0173

UH0173 REV APR 17

07/24/2019 - ED in U Emergency Department (continued)

Documents (continued)

They may include damage to vital organs such as the brain, heart, lungs, liver, and kidneys. They may even result in paralysis, cardiac arrest, brain damage, and/or death.

I understand that the anesthesia equipment may damage my teeth or cause other dental damage.

I understand that nerve damage may occur from how anesthesia equipment is placed or how my body must be positioned during a procedure.

I understand that I am free to refuse consent to any proposed procedure.

BLOOD: I have been told whether I am having a procedure where blood or blood components *(products)* may need to be used *(also known as transfused)*. **If I am having this kind of procedure**, I have been told about side effects, risks and other choices about transfusion, including **not** getting a transfusion.

I give permission to receive blood and/or blood components if the health care team decides it is needed. I understand that use of blood and blood components involves risks. The risks may include reactions, including allergic reactions, fever, hives, lung injury, and in rare cases, infectious diseases such as hepatitis and HIV/AIDS. I know that the blood bank screens donors and matches blood for transfusions to help lower risks.

OR *(Please initial)*

_____ **I refuse** ***(or partially refuse)*** **permission for blood and blood components.** *(You will be asked to sign another form, Form UH2063).*

☐ **Interpreter** ***(Print Name)***_____

Giving Consent

By signing below, I confirm that I have read the sections above and that I have had 1) each item explained to me; 2) a chance to ask questions; and 3) all of my questions answered.

FULL NAME OF PROCEDURE(S)	Procedural Sedation
Health Care Professional(s) Performing Procedure	Marie Vrablik, MD

☐ **1.** Court-appointed Guardian ☐ **2.** Durable Healthcare Power of Attorney ☐ **3.** Spouse/registered domestic partner
☐ **4.** Adult Child(ren) ☐ **5.** Parent(s) ☐ **6.** Adult Brother(s)/Sister(s)

FOR MINOR PATIENTS:

☐ **1.** Guardian/legal custodian ☐ **2.** Court-authorized person for child in out-of-home placement ☐ **3.** Parent(s)
☐ **4.** Holder of signed authorization from parent(s) ☐ **5.** Adult representing self to be a relative responsible for the minor's health

WITNESS SIGNATURE *(WITNESS OPTIONAL UNLESS TELEPHONE CONSENT)*	PRINT NAME	☐TELEPHONE MONITORED CONSENT *(No patient signature)*

HEALTH CARE PROFESSIONAL'S STATEMENT

I explained the treatment/procedure(s) stated on this form, including the possible risks, complications, alternative treatments *(including non-treatment)* and anticipated results to the patient and/or his/her representative before the patient and/or his/her representative consented.

If only the patient has signed this form, in my clinical opinion, the patient is capable of making his/her own health care decisions. If in my clinical opinion, the *(adult)* patient has questionable ability to make his/her own health care decisions, I discussed the above with the patient and with the patient's legally authorized representative.

CT CHEST ABDOMEN AND PELVIS W CONTRAST Resulted: 07/24/19 1617, Result status: Final result

Order status: Completed Resulted by: O'Regan, Jeremiah P, MD
Filed by: Uw Radiology Results Interface, User 07/24/19 1619 Performed: 07/24/19 1156 - 07/24/19 1156
Accession number: 12560199 Resulting lab: UW RADIOLOGY
Lab Technician: BRIAN MCKINNEY TECHNOLOGIST, CT
Narrative:

EXAMINATION:
CT CHEST ABDOMEN AND PELVIS W CONTRAST

CLINICAL INDICATION:
GLF. Additional history: 94-year-old female patient with a ground level fall yesterday presented with the back, right side and right hip pain.

TECHNIQUE:
CTB A15 CT Chest Abdomen Pelvis with IV contrast.
Contiguous axial sections were obtained through the chest, abdomen and pelvis with IV contrast only. Multiplanar reformatted images were performed.
Automated exposure control and statistical iterative reconstruction techniques substantially lowered patient radiation dose.

CONTRAST:
Omnipaque 350 mg-ml 88@2.2 ml 07/24/2019 02:03 PM INTRAVENOUS

COMPARISON:
None.

FINDINGS:
CHEST:
Thyroid: Unremarkable.
Thoracic lymph nodes: No lymphadenopathy by size criteria.
Mediastinum and esophagus: Moderate sliding hiatus hernia.

07/24/2019 - Orders Only in UW Medicine Radiology (continued)

Imaging (continued)

Heart and vasculature: Moderate to severe coronary artery disease.
Atherosclerotic changes of the aorta. Aortic wall calcifications.
Lungs: Unremarkable.
Pleura: Right sided hydropneumothorax with no mediastinal shift. Trace left pleural effusion.
Chest wall: Slightly displaced fracture right posterior eighth and ninth rib. No fracture is noted involving right seventh rib at the costovertebral junction.

ABDOMEN:
Liver: Unremarkable.
Gallbladder: Distended with no opaque stones
Bile ducts: Prominent CBD measuring 9 mm (601/54) with associated mild intrahepatic biliary radical dilatation. CBD seen) distally towards the pancreas with no obvious lesions in the periampullary region.
Spleen: Unremarkable.
Pancreas: Unremarkable.
Adrenals: Unremarkable.
Kidneys and Ureters: Bilateral renal cortical hypodense lesions, the small lesions are too small to characterize while the larger lesions are likely cysts.

Abdominal Lymph Nodes and Retroperitoneum: No lymphadenopathy by size criteria.
Vasculature: Moderate aortobiiliac atherosclerotic disease with no aneurysmal dilatation of the aorta.
Bowel: Unremarkable.
Peritoneum and Abdominal Wall: Mild ascites. No abdominal collections. No pneumoperitoneum.

PELVIS:
Pelvic Viscera: Unremarkable.
Bladder: Unremarkable.

BONES:
-Two fracture lines involving the right inferior pubic ramus (3/213-216).
-Severe spondylo-degenerative changes of the spine with scoliotic deformity and mild wedging of L2 and T11 vertebral bodies, age indeterminate.
-Osteopenia. Right hip arthroplasty.

ATTENDING RADIOLOGIST AND PAGER NUMBER
234240 O'REGAN JEREMIAH P MD

Impression:
IMPRESSION:
1. Multiple right-sided rib fractures with right-sided hydropneumothorax.
2. Fracture right inferior pubic ramus. L2 and T11 vertebral body age-indeterminate wedge fracture.
3. Prominent CBD with mild intra-hepatic biliary radicle dilatation. Recommend correlation with liver function tests and further evaluation with MRCP if clinically indicated.

CT HEAD W/O CONTRAST

Resulted: 07/24/19 1757, Result status: Final result

Order status: Completed
Resulted by: Fink III, James Russell, MD
Filed by: Uw Radiology Results Interface, User 07/24/19 1757
Performed: 07/24/19 1156 - 07/24/19 1156
Accession number: 12560198
Resulting lab: UW RADIOLOGY
Lab Technician: BRIAN MCKINNEY TECHNOLOGIST, CT
Narrative:

EXAMINATION:
CT HEAD WO CONT

CLINICAL INDICATION:
GLF, x

TECHNIQUE:
CT Head Routine wo contrast (N-1)
Contiguous axial sections were obtained through the head without contrast.
Patient age specific scan parameters were used for radiation exposure.

COMPARISON:
CT head 3/29/2018.

FINDINGS:
Field-of-view does not contain the anterior mandible.

MASS EFFECT & VENTRICLES: No midline shift. The lateral ventricles are symmetric. The ventricles, sulci and cisterns are normal.
BRAIN: Mild to moderate cerebral volume loss. Few unchanged scattered parenchymal calcifications. Unchanged mild to moderate periventricular white matter hypoattenuation. No acute infarct, hemorrhage or mass lesion is seen.
VASCULAR: Severe vascular calcifications involving of the common carotids and cavernous ICAs.
EXTRA-AXIAL: Extra-axial spaces are normal.
EXTRA-CRANIAL: Skull and facial bones are normal. Sinuses and mastoids are

Lab Technician: BRIAN MCKINNEY TECHNOLOGIST, CT
Narrative:

EXAMINATION:
CT C SPINE WO CONT

CLINICAL INDICATION:
GLF, x

TECHNIQUE:
Cervical Spine wo contrast: routine (N-53)
MDCT scanning was obtained through the cervical spine without contrast.
Coronal and sagittal reformatted images were performed.
Patient age specific scan parameters and iterative reconstruction techniques were used for radiation exposure.

Inferior Extent: T4

COMPARISON:
C-spine CT 12/7/2012

FINDINGS:
ALIGNMENT: Normal alignment.
VERTEBRAE: Vertebral body height and density are normal. No fractures or destructive lesions.
HARDWARE: No hardware present.
DISCS: Normal disc height
SOFT TISSUES: Prevertebral, interspinous, and posterior soft tissues are normal. Multiple tiny hypodense thyroid nodules.

07/24/2019 - Orders Only in UW Medicine Radiology (continued)

Imaging (continued)

AXIAL DISCS AND FORAMINA:
Similar posterior subluxation of the right atlantoaxial articulation (602/91).
Moderate degenerative changes of the cervical spine including multilevel disc height loss, mild facet arthropathy, and fusion of the C4-5 posterior elements. Diffuse osteopenia.

C2-3: No central or foraminal stenosis.
C3-4: No central or foraminal stenosis.
C4-5: No central or foraminal stenosis.
C5-6: No central or foraminal stenosis.
C6-7: No central or foraminal stenosis.
C7-T1: No central or foraminal stenosis.

Right small-to-moderate pneumothorax.

ATTENDING RADIOLOGIST AND PAGER NUMBER
2037627 FINK III JAMES RUSSELL MD
(206)540-1747
Impression:
IMPRESSION:
1. No acute fractures of the cervical spine. Stable degenerative changes. Diffuse osteopenia.

2. Right small to moderate pneumothorax.

The above findings were communicated to Antonia Nemanich M.D. by Thomas Eggert M.D. PGY-3 at 7/24/2019 2:04 PM.

Performed: 07/24/19 1625 - 07/24/19 1625
Accession number: 12561481
Resulting lab: UW RADIOLOGY
Lab Technician: XINGTAO LEE RAD TECH
Narrative:

EXAMINATION:
XR CHEST 1VIEW

CLINICAL INDICATION:
confirm chest tube placement

FINDINGS AND IMPRESSION:
Compared to chest CT done earlier today at 1326 hours, there is persistent right subpulmonic/anterior pneumothorax. There is associated small pleural effusion.
Right chest tube is in an expected position.
Heart size is unchanged.
There are bilateral basilar consolidations, which could represent either atelectasis, aspiration or pneumonia.

Accession number: 12560201
Resulting lab: UW RADIOLOGY
Lab Technician: BRIAN MCKINNEY TECHNOLOGIST, CT
Narrative:
EXAMINATION:
CT T SPINE WO CONT, CT L SPINE WO CONT

CLINICAL INDICATION:
GLF, x

TECHNIQUE:
CT thoracic spine without contrast: routine (N-65) MDCT scanning was obtained through the thoracic spine without contrast. Coronal and sagittal reformatted images were performed. Patient age specific scan parameters and iterative reconstruction techniques were used for radiation exposure. (accession 12560201), CT Lumbar Spine without contrast: routine (N-65) MDCT scanning was obtained through the lumbar spine without contrast. Coronal and sagittal reformatted images were performed. Patient age specific scan parameters and iterative reconstruction techniques were used for radiation exposure. (accession 12560202)

Superior Extent: T1
Inferior Extent: Sacrum

COMPARISON:
MRI thoracic spine 9/17/2018, radiographically lumbar spine 10/22/2014, and other priors

FINDINGS:
ALIGNMENT: Minimal anterolisthesis of L5 on S1. Left convex scoliosis of the

07/24/2019 - Orders Only in UW Medicine Radiology (continued)

Imaging (continued)

lumbar spine with a Cobb angle of approximately 21 degrees.
VERTEBRAE/BONES: Again seen are chronic compression fractures of T12-L3. Cortical irregularity at the posterior aspect of the L1 vertebral body with correlate on MRI dated 9/17/18. Consider repeat MRI if pain persists in this region. No acute vertebral fractures. Diffuse osteopenia.

Partially visualized multiple rib fractures, some of which are chronic:
-Chronic fracture deformities of the right 10-12th posterior ribs.
-Acute mildly displaced fractures of the right posterior 8th and 9th ribs.

Partially visualized right femoral head/neck instrumental fixation.

Minimally displaced right sacral zone 1 fracture (604B/74 and 305B/166) with intra-articular extension into the SI joint.

HARDWARE: No spinal hardware present.
CORD: Visualized throracic cord and conus medularis are normal size.
SOFT TISSUES: Please refer to same day CT chest abdomen and pelvis for extraspinal findings. Paravertebral, interspinous, and posterior soft tissues are normal.

LEVELS: No central stenosis. Mild bony right neural foramen narrowing at L5-S1. ABNORMAL LEVELS: Partial bony fusion of T3-T4. Severe disc space narrowing at L4-L5.

ATTENDING RADIOLOGIST AND PAGER NUMBER
2037627 FINK III JAMES RUSSELL MD
(206)540-1747
Impression:
IMPRESSION:
No acute thoracolumbar spinal fractures or malalignment. Again seen are chronic compression fractures of T12-L3, with posterior cortical irregularity at L1. If patient's back pain persists, consider repeat MRI for further evaluation.

Minimally displaced right sacral zone 1 fracture with intra-articular extension into the SI joint.

Acute displaced fractures of the right posterior eighth and ninth ribs. Chronic fracture deformities of the right 10th-12th posterior ribs. Please refer to same day chest, abdomen, and pelvis CT for further description of rib fractures.

Moderate to severe multilevel degenerative changes of the thoracolumbar spine as detailed above.

The above findings were communicated to Nemanich by Moran at 7/24/2019 3:23 PM.

Imaging (continued)

lumbar spine with a Cobb angle of approximately 21 degrees.
VERTEBRAE/BONES: Again seen are chronic compression fractures of T12-L3. Cortical irregularity at the posterior aspect of the L1 vertebral body with correlate on MRI dated 9/17/18. Consider repeat MRI if pain persists in this region. No acute vertebral fractures. Diffuse osteopenia.

Partially visualized multiple rib fractures, some of which are chronic:
-Chronic fracture deformities of the right 10-12th posterior ribs.
-Acute mildly displaced fractures of the right posterior 8th and 9th ribs.

Partially visualized right femoral head/neck instrumental fixation.

Minimally displaced right sacral zone 1 fracture (604B/74 and 305B/166) with intra-articular extension into the SI joint.

HARDWARE: No spinal hardware present.
CORD: Visualized throracic cord and conus medularis are normal size.
SOFT TISSUES: Please refer to same day CT chest abdomen and pelvis for extraspinal findings. Paravertebral, interspinous, and posterior soft tissues are normal.

LEVELS: No central stenosis. Mild bony right neural foramen narrowing at L5-S1. ABNORMAL LEVELS: Partial bony fusion of T3-T4. Severe disc space narrowing at L4-L5.

Impression:
IMPRESSION:
No acute thoracolumbar spinal fractures or malalignment. Again seen are chronic compression fractures of T12-L3, with posterior cortical irregularity at L1. If patient's back pain persists, consider repeat MRI for further evaluation.

Minimally displaced right sacral zone 1 fracture with intra-articular extension into the SI joint.

Acute displaced fractures of the right posterior eighth and ninth ribs. Chronic fracture deformities of the right 10th-12th posterior ribs. Please refer to same day chest, abdomen, and pelvis CT for further description of rib fractures.

Moderate to severe multilevel degenerative changes of the thoracolumbar spine as detailed above.

The above findings were communicated to Nemanich by Moran at 7/24/2019 3:23 PM.

Active at the End of Visit

Pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/20/2017
Start date: 12/20/2017
End date: 9/4/2019
Quantity: 270 tablet
Refill: 3 refills remaining

Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Instructions: Take 1 tablet by mouth 2 times a day.
Entered by: Ong, Thuan Duc, MD
Entered on: 6/7/2018
End date: 10/13/2021

Losartan Potassium 25 MG Oral Tab

Discontinued by: Taylor, Zoe Judith Mildred, MD
Discontinued on: 8/20/2019
Reason for discontinuation: Therapy completed/no longer indicated
Instructions: TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY
Entered by: Neighbor Jr., William E, MD
Entered on: 9/26/2018
Start date: 9/26/2018
End date: 8/20/2019
Quantity: 45 tablet

Atorvastatin Calcium 20 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Entered by: Neighbor Jr., William E, MD
Entered on: 9/26/2018
Start date: 9/26/2018
End date: 9/4/2019
Quantity: 45 tablet

Warfarin Sodium 4 MG Oral Tab

Discontinued by: Lamont, Danna, ARNP
Discontinued on: 8/16/2019
Reason for discontinuation: Therapy completed/no longer indicated
Instructions: Take 1 tablet (4 mg) by mouth daily.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 2/16/2019
Start date: 2/16/2019
End date: 8/16/2019
Quantity: 30 tablet
Refill: 2 refills by 2/16/2020

Timolol Maleate 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Instill one drop in each eye twice daily
Authorized by: Neighbor Jr., William E, MD
Ordered on: 4/16/2019
Start date: 4/16/2019
End date: 9/4/2019
Quantity: 10 mL
Refill: No refills remaining

Telephone Encounter

Mohova, Elena, CMA at 7/23/2019 1601

Louis called in behalf of patient, stating that pt fell two times in the apartments. First time she fell and hit her L side, she is very sore in L shoulder blade, no bruising, she is sitting on the couch. Second time she fell against the wall cabinet and hit her shoulder. He asked if she needs to be taken to the clinic for the observation. He asked Dr. Neighbor to call him if possible.

Electronically signed by Mohova, Elena, CMA at 7/23/2019 4:06 PM

Neighbor Jr., William E, MD at 7/23/2019 1812

Spoke with son Louis. The fall was a slot slide against a wall and a cabinet without head injury. She has been able to walk after the injury and does not seem to be in pain. Her son is watching her. He will take her to urgent care or ER this evening if she does not continue to improve. They live on Bainbridge.

Null, Margaret K, RN at 7/15/2019 1000

Pt's wounds are stable but chronic. She had a thick layer of slough over them. Pt is now living in an apartment.

Left and right calf and ankle wounds:
Cleanse with water and pat dry,
Apply Silver Alginate, ABD, Wrap Gauze,
Apply Zinc paste to the periwound excoriation,
Tubi-grip- apply in the morning and remove at night.
Change dressing every other day

Maintain a high protein diet (4 Ensures/Glucerna per day)
Please eat high protein, meat based diet
Please stay on bedrest, evaluate legs
Avoid salt in your foods
Elevate legs as much as possible

Electronically signed by Null, Margaret K, RN at 7/15/2019 3:25 PM

Norsworthy, Nilufer Bozdemir, MD at 7/15/2019 1000

PROGRESS NOTE
7/15/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with multiple bilateral lower leg ulcers with mixed vascular disease is seen today for Follow Up Visit

INTERVAL HISTORY: This is a patient with DM2, CLI with extensive atherosclerotic disease and chronic leg edema with venous hypertension is here with her son Louise, whom she lives with. She is now living in an apartment, has a chair to rest and elevate legs, has better organized meals with every day meat included.
Both side lower leg ulcers are smaller, there are skin islands at wound beds. There is no inflammation with ulcers. She was seen at Dr. Neighbor Jr, MD (her PCP) office on 7/10. There was some inflammation at the right calf and given cephalexin 500mg 4 times daily for 5 days. The inflammation has subsided quickly according to son.

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:Denies, fatigue, unexpected weight loss, unexpected weight gain, fever, . Does have intense itch at both lower limbs and intermittent limb pain, mostly with ambulation. She walked with a walker.

Review of patient's allergies indicates:
Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other
• Nitrofurantoin	Other

PROCEDURE
A preprocedure time out was performed confirming the patient's identity, procedure to be performed, and site. A verbal consent was obtained.
Wound/Ulcer: # 10 and 13 / Description: wound beds are covered with extensive amount of stringy fibrinous slough

and edges are rolled-in
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue
Tissue and/or Material Removed: fibrin/slough, non-viable, skin, subcutaneous and viable
Severity: necrosis of muscle
Instruments Used: curette
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~80 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements
#10: Improved: Length 7cm X Width 5cm X Depth: 0.4cm
#13: : Improved: Length 5.5cm X Width 8.5cm X Depth: 0.5cm
Patient tolerated the procedure well.
The wound looked improved after the debridement

ASSESSMENT/PLAN: This is a patient with advanced age, venous hypertension and limb ischemia with atherosclerotic disease and DM2 has been treated at our center for extensive bilateral lower limb ulcers. With improved living situations, advanced wound care dressings and infection control with intermittent debridement and treatment of infection her ulcers have much improved. We will continue current management.
(L97.323) Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC) (primary encounter diagnosis)
(L97.223) Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
(I87.313, L97.919, L97.929) Venous hypertension, chronic, with ulcer, bilateral (HCC)
(I70.232, I70.242) Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
(E11.622, L97.909) Diabetic ulcer of lower extremity (HCC)
Jeanne was seen today for follow up visit.

Diagnoses and all orders for this visit:

Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Venous hypertension, chronic, with ulcer, bilateral (HCC)
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

07/15/2019 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

Clinical Notes (continued)

Diabetic ulcer of lower extremity (HCC)
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Patient Instructions
Left and right calf and ankle wounds:
Cleanse with water and pat dry,
Apply Silver Alginate, ABD, Wrap Gauze,
Apply Zinc paste to the periwound excoriation,
Tubi-grip- apply in the morning and remove at night.
Change dressing every other day

Maintain a high protein diet (4 Ensures/Glucerna per day)
Please eat high protein, meat based diet
Please stay on bedrest, evaluate legs
Avoid salt in your foods
Elevate legs as much as possible

Return in about 1 month (around 8/12/2019).

Visit Summary
Patient denies any changes to allergies or medications since last visit.

Wound Center Orders for Topical Lidocaine Wound Application:

Apply 2% topical gel or 4% topical liquid lidocaine to open wound prior to surgical debridement and assessment, not to exceed 10 ml.

Wound/Ulcer: #9, 10, 12, 13, 14
Anesthetic: lidocaine 4% topical solution

PROGRESS NOTE
7/15/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with multiple bilateral lower leg ulcers with mixed vascular disease is seen today for Follow Up Visit

INTERVAL HISTORY: This is a patient with DM2, CLI with extensive atherosclerotic disease and

chronic leg edema with venous hypertension is here with her son Louise, whom she lives with. She is now living in an apartment, has a chair to rest and elevate legs, has better organized meals with every day meat included.
Both side lower leg ulcers are smaller, there are skin islands at wound beds. There is no inflammation with ulcers.
She was seen at Dr. Neighbor Jr, MD (her PCP) office on 7/10. There was some inflammation at the right calf and given cephalexin 500mg 4 times daily for 5 days. The inflammation has subsided quickly according to son.

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:Denies, fatigue, unexpected weight loss, unexpected weight gain, fever, . Does have intense itch at both lower limbs and intermittent limb pain, mostly with ambulation. She walked with a walker.

Review of patient's allergies indicates:

Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other
• Nitrofurantoin	Other
Confusion, loss of appetitie, nausea, abdominal pain	
• Nitrofurantoin	Other

PROCEDURE
A preprocedure time out was performed confirming the patient's identity, procedure to be performed, and site. A verbal consent was obtained.
Wound/Ulcer: # 10 and 13 / Description: wound beds are covered with extensive amount of stringy fibrinous slough and edges are rolled-in
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue
Tissue and/or Material Removed: fibrin/slough, non-viable, skin, subcutaneous and viable
Severity: necrosis of muscle
Instruments Used: curette
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~80 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements
#10: Improved: Length 7cm X Width 5cm X Depth: 0.4cm
#13: : Improved: Length 5.5cm X Width 8.5cm X Depth: 0.5cm
Patient tolerated the procedure well.
The wound looked improved after the debridement

ASSESSMENT/PLAN: This is a patient with advanced age, venous hypertension and limb ischemia with atherosclerotic disease and DM2 has been treated at our center for extensive bilateral lower limb ulcers. With improved living situations, advanced wound care dressings and infection control with intermittent debridement and treatment of infection her ulcers have much improved. We will continue current management.

Patient Instructions
Left and right calf and ankle wounds:
Cleanse with water and pat dry,
Apply Silver Alginate, ABD, Wrap Gauze,
Apply Zinc paste to the periwound excoriation,
Tubi-grip- apply in the morning and remove at night.
Change dressing every other day

Maintain a high protein diet (4 Ensures/Glucerna per day)
Please eat high protein, meat based diet
Please stay on bedrest, evaluate legs
Avoid salt in your foods
Elevate legs as much as possible

Clinical Notes

Progress Notes

Lo, Edith Y, RN at 7/10/2019 1000

Pt presented to clinic w/ her son Louis for appointment w/ Dr. Neighbor. RN was notified by Terri P. MA for assistance. Per front desk, pt slipped and fell on her way in. Son denies that there was any fall on their way in. He states she was just needing to lean on the wall for support. Pt also denies any fall or injuryl today, although she does endorse losing her balance frequently and needing to grab on to things. Pt assessed and is oriented, stable, and not in any acute distress; she is having difficulty hearing today as she reports leaving her hearing aids at home. Dr. Neighbor notified.

Electronically signed by Lo, Edith Y, RN at 7/10/2019 2:48 PM

Lo, Edith Y, RN at 7/10/2019 1000

Wound Care Visit - Completed w/ Ruth S. RN

S:
Jeanne Leonie Hoffman who is 94 year old presents today for wound f/u with Dr. Neighbor and wound re-dressing.

Clinical Notes (continued)

History of wound: Extensive bilateral lower limb ulcers, hx of bilateral limb ischemia and chronic vascular insufficiency, underlying DM2, complex psychosocial hx
Pain: Moderate pain w/ touch. Wound care was initiated after topical Lidocaine gel applied on sterile gauze and left undisturbed on both extremities for >10 minutes.
Home treatment: Son is doing wound care at home using silver alginate, ABD, wrap gauze, and zinc paste. Tubi-grip on outside. Pt is also receiving wound care and seeing a provider about once a month at Northwest Hospital. Next appointment is in five days on 7/15/19.

O:
Location: Bilateral lower extremities.
Wound Bed: Large percentage of ulceration wound beds covered by yellow slough.
Wound Edges: Rolled.
Exudate: Large amount of exudate noted. Serosanguinous and serious drainage noted, odor present.
Periwound condition: Erythematous w/ dry, scaling skin.
TDAP status: 9/20/17
BP 133/54 | Pulse 74

A:
Wound Healing Status: Extensive bilateral ulcerations w/ yellow slough, w/ some increased swelling and erythema on R lower extremity
Presence of signs of infection or over-colonization? See above; cellulitis on R extremity noted, Cephalexin prescribed this visit by Dr. Neighbor

P:
Legs cleansed extensively w/ NS using sterile gauze in attempts to remove yellow slough and dead skin as much as possible.
Primary dressing and topical: Melgisorb AG on areas of ulceration and ABD pads over affected surface area on lower extremities. ABD pads secured w/ elastic wrap.
Debridement Type: Gentle removal of superficial slough and dead skin with sterile gauze and NS. No sharp debridement performed this visit.

Patient's Home Care Instructions:
- Wash hands before and after wound care with soap and water for at least 15 seconds
- Keep dressing dry and clean
- Son will continue home care and dressing changes as he has been doing
- Monitor and report increased redness, drainage, warmth, pain, or fevers (greater than 100.5F)
- Encouraged to increase protein and fluid intake
- Follow up: Wound care w/ NWH on 7/15/19, and Dr. Neighbor on 8/7/19

Pt agrees to plan and verbalizes understanding. No further questions at this time.To call clinic with any further concerns.

Electronically signed by Lo, Edith Y, RN at 7/11/2019 10:35 AM

Neighbor Jr., William E, MD at 7/10/2019 1000

Jeanne Leonie Hoffman is a 94 year old female here to discuss the following:
Chief Complaint
Patient presents with
- Follow-Up

- Wound Check/Dressing Change
- RNGREATERTHAN60

Jeanne comes in with her son Louise for regular visit. She has an appointment to the Northwest Hospital wound care center for next Monday. She and her son are no longer living in a tent but have housing on Bainbridge. They have moved in. They're still some issues regarding their furniture. They're working with her church.

Her son has been doing regular dressing changes which include zinc oxide. In the last few days they've noticed more redness and swelling particularly of the right lower leg. She has not had fever chills or night sweats. She has been taking Tylenol with Codeine perhaps at a higher dose than prescribed which is to be one per day.

When they arrived in clinic again felt somewhat weak and leaned against the wall. She did not fall based upon her son's observation. He was with her. She was assisted by the nurses. She did not eat much breakfast. She did not bring in her hearing aids today.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

• Long term current use of anticoagulant therapy [Z79.01]	01/08/2008

Reason for anticoagulation: Recurrent dvts
Duration of anticoagulation: life
INR goal: 2.-3 (lower end of this range desired because of age)

• Adult failure to thrive syndrome [R62.7]	10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

• Unspecified vitamin B deficiency [E53.9]	05/01/2007

Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

07/10/2019 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic (HCC) [I82.509] 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed.
  Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC) [L97.313] 05/26/2019

- Alcohol use: No

Objective:

BP 133/54 | Pulse 74
Estimated body mass index is 20.85 kg/m² as calculated from the following:
Height as of 1/10/19: 5' 2" (1.575 m).
Weight as of 3/28/19: 51.7 kg (114 lb).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
133/54	74	---	---	---	9:36 AM	7/10/2019

Last blood pressure recorded in this encounter: 133/54
General: NAD
Difficulty hearing and she does not have her hearing aids today.
Examination of both lower extremities show extensive grade 1-2 skin loss on her lower extremities which is similar to in the past however today she has some diffuse redness superior to the upper wound margin on the right leg and some swelling and redness of the dorsum of the foot.

Lab and other tests:
Her INR one month ago was 1.0 reflecting that she has not been taking Coumadin.

Assessment and Plan:

(L03.115) Cellulitis of right lower extremity (primary encounter diagnosis)
Right lower extremity cellulitis on top of chronic vascular insufficiency. She does have a history of allergy to penicillin which has been a rash. Her son believes she is taking Keflex without difficulty. I do not see that we have prescribed

07/10/2019 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Keflex for her in the past. However given the need for antibiotic coverage and lack of a severe allergic reaction to penicillin and think is safe to use a cephalosporin and so prescribed Keflex 500 mg 4 times daily for short course of 5 days. She has an appointment to the Northwest Hospital wound care center next Monday which is about 5 days from now. Discussed with her son the importance of discontinuing the Keflex should she develop a rash. And then contacting us.

The dressings were replaced by the nurse before she left the clinic.

(Z79.01) Long term current use of anticoagulant therapy
She is currently taking Coumadin. It looks like she has not been taking it since at least December of 2018. She has not had recurrent thrombophlebitis which was the initial reason for her being on Coumadin for many years. I am concerned about the safety of her taking Coumadin if it is not absolutely necessary given the unsteadiness of her gait though she usually uses a walker or wheelchair. We did not have time to discuss this and today but for the present we will not restart Coumadin.

She will followup in one month.
Next wound care appointment is next Monday.

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 6/12/2019 1020

Jeanne Leonie Hoffman is a 94 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Physical

Jeanne was not scheduled for a physical this morning but was brought in by her son for review of medications and for an INR blood test. He reports she is taking all of her medications. There are still living in a tent on Bainbridge Island. Adult Protective Services has been involved. They are moving into an apartment this week. They continued followup for Jeanne with Dr. Norsworthy at Northwest Hospital wound care.

She does have new hearing aids but forgot to put them on today.

Review of Systems:

She has not had any recent fever, chills, sweats.
No shortness of breath or chest discomfort
Appetite has been good. No abdominal pain.
No urinary complaints.

Problem List

Patient Active Problem List

06/12/2019 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

- Long term current use of anticoagulant therapy [Z79.01] 01/08/2008

Reason for anticoagulation: Recurrent dvts
Duration of anticoagulation: life
INR goal: 2.-3 (lower end of this range desired because of age)

- Adult failure to thrive syndrome [R62.7] 10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

- Unspecified vitamin B deficiency [E53.9] 05/01/2007

Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Sensorineural hearing loss, unspecified [H90.5] 11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic (HCC) [I82.509] 11/20/2006

Recurrent DVT and phlebitis since 1982
Per Vascular Surgery note 5/9/2006: continue warfarin
3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia [E78.5] 11/20/2006

On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006

LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006

06/12/2019 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed. Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

- Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC) [L97.313] 05/26/2019
- Chronic venous hypertension with ulcer, bilateral (HCC) [I87.313, L97.919, L97.929] 05/26/2019
- Bilateral leg edema [R60.0] 05/26/2019
- Suspected elder abuse [T76.91XA] 01/11/2019
- Housing lack [Z59.0] 09/26/2018
- Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC) [I70.232, I70.242] 09/24/2018

Objective:
There were no vitals taken for this visit.
Estimated body mass index is 20.85 kg/m² as calculated from the following:
Height as of 1/10/19: 5' 2" (1.575 m).
Weight as of 3/28/19: 51.7 kg (114 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter:
General: NAD

Wt Readings from Last 8 Encounters:

03/28/19	51.7 kg (114 lb)
02/28/19	50.3 kg (111 lb)
01/31/19	46.3 kg (102 lb)
10/08/18	50.8 kg (112 lb)
09/26/18	51.1 kg (112 lb 9.6 oz)
09/24/18	51.3 kg (113 lb)
08/14/18	53.2 kg (117 lb 4 oz)
07/25/18	52.1 kg (114 lb 12 oz)

Her weight today is the same as it was last March
Psych: Oriented and conversant as best as I can tell with her not having her hearing aids
Chest: Clear to auscultation
Cor: Heart rate regular. No murmur
Abd: nontender
Skin: Dressings on her legs are in place. She is followed at Northwest Hospital wound care

Lab and other tests: INR pending
Last INR in February 2019 was 1.0. Results of but communicated to her son and medication refilled. They were to follow up within one month.
Vitamin D, folate and vitamin B12 were normal in January of 2019. Vitamin D was 25.
Hemoglobin A1c at that time was 6.2
Comprehensive panel was essentially normal
CBC showed hemoglobin of 11.2. This is improved from September 2018

Lab Results

Component	Value	Date
HEMOGLOBIN	11.2	01/09/2019
HEMOGLOBIN	9.7	09/18/2018
HEMOGLOBIN	9.6	09/13/2018
HEMOGLOBIN	9.3	09/12/2018
HEMOGLOBIN	9.1	09/11/2018
HEMOGLOBIN	10.1	09/10/2018

Assessment and Plan:
1. Long term current use of anticoagulant therapy
Due for repeat INR

2. Chronic recurrent deep vein thrombosis (DVT) of lower extremity, unspecified laterality (HCC)

06/12/2019 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Due for repeat INR
Continue wound care at Northwest Hospital

3. Essential hypertension, benign
Blood pressure is well controlled. She is currently on a low dose of losartan 25 mg one half tablet daily. This could be discontinued in the future but would want to ensure adequate followup.

4. Vitamin D deficiency
Vitamin D level in the normal range but borderline in January. She is to continue vitamin D supplementation

PROGRESS NOTE
6/10/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with extensive bilateral lower limb ulcers is seen today for Follow Up Visit

INTERVAL HISTORY: This is a 94 yo woman, living with his son in a tent, who has DM2, bilateral limb ischemia and venous hypertension with edema. Since the last visit wounds have not changed much: extensive, covered with slough, very tender but without any sign of infection. The son reports she has been eating at least 3 meals of meat or other protein, she has a comfortable bed she can rest during the day as well and they will have an apartment next week. She denies any fever, chills or leg pain as long as they are not being touched. She denies weight loss.

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:Denies, fatigue, unexpected weight loss, unexpected weight gain, fever, limb pain

Review of patient's allergies indicates:
Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other
• Nitrofurantoin	Other

Confusion, loss of appetitie, nausea, abdominal pain

• Nitrofurantoin *confusion*	Other
• Penicillins	Rash
• Sulfa Antibiotics	Rash

XR TIBIA FIBULA 2 VW LEFT
EXAMINATION:
XR Tibia Fibula 2 Views Left

CLINICAL INDICATION:
worsening wound at left medial ankle

COMPARISON:
Radiographs of the left tibia and fibula dated August 17, 2017.

FINDINGS AND IMPRESSION:
The bones are diffusely demineralized.

No acute fracture or dislocation. No periostitis, focal osteopenia, or osseous erosion to suggest osteomyelitis.

There is soft tissue irregularity/ulceration along the medial distal calf. No definite soft tissue gas. No radiopaque foreign body. Vascular calcifications are present.
ATTENDING RADIOLOGIST AND PAGER NUMBER
505568 REHWALD CHRISTINE MARIE MD

ASSESSMENT/PLAN: This is a patient with extensive leg ulcers, poor living conditions, underlying DM2, limb ischemia and venous hypertension with poor nutritional intake due to the lifestyle. Currently wounds are stable. We made sure the son has enough wound care supply to carry on our instructions for wound dressing. Again emphasized the importance of her having high protein and calori intake with these wounds. We will follow up.
(E11.622, L97.909) Diabetic ulcer of lower extremity (HCC) (primary encounter diagnosis)
(L97.323) Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)
(L97.223) Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
(I87.313, L97.919, L97.929) Venous hypertension, chronic, with ulcer, bilateral (HCC)
(I70.232, I70.242) Atherosclerosis of native artery of both lower extremities with bilateral ulceration of calves (HCC)
(L97.313) Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)
(Z59.0) Homeless
Jeanne was seen today for follow up visit.

06/10/2019 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

Clinical Notes (continued)

Patient Instructions
Left and right calf and ankle wounds:
Cleanse with water and pat dry,
Apply Silver Alginate, ABD, Wrap Gauze,
Apply Zinc paste to the periwound excoriation,
Tubi-grip- apply in the morning and remove at night.
Change dressing every other day

Maintain a high protein diet (4 Ensures/Glucerna per day)
Please eat high protein, meat based diet
Please stay on bedrest, evaluate legs
Avoid salt in your foods
Elevate legs as much as possible

If pain, redness, swelling, increases and fever please go to the ER or Urgent Care

Return in about 1 month (around 7/8/2019) for routine follow-up.

Visit Summary
Patient received supplies from sound health. Patient has UPS mail box so no address change for supplies.
Patients son states they are moving into an apartment next Monday.
Patients son states states is having at least 4 ensures a day.
Patients son states patient is eating meat every day.
Patient states she has about 4 meals a day.
Follow up in 4 weeks with Norsworthy.

Left and right calf and ankle wounds:
Cleanse with water and pat dry,
Apply Silver Alginate, ABD, Wrap Gauze,
Apply Zinc paste to the periwound excoriation,
Tubi-grip- apply in the morning and remove at night.
Change dressing every other day

Maintain a high protein diet (4 Ensures/Glucerna per day)
Please eat high protein, meat based diet
Please stay on bedrest, evaluate legs
Avoid salt in your foods
Elevate legs as much as possible

If pain, redness, swelling, increases and fever please go to the ER or Urgent Care

PROGRESS NOTE
6/10/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with extensive bilateral lower limb ulcers is seen today for Follow Up Visit

INTERVAL HISTORY: This is a 94 yo woman, living with his son in a tent, who has DM2, bilateral limb ischemia and venous hypertension with edema. Since the last visit wounds have not changed much: extensive, covered with slough, very tender but without any sign of infection. The son reports she has been eating at least 3 meals of meat or other protein, she has a comfortable bed she can rest during the day as well and they will have an apartment next week. She denies any fever, chills or leg pain as long as they are not being touched. She denies weight loss.

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:Denies, fatigue, unexpected weight loss, unexpected weight gain, fever, limb pain

Review of patient's allergies indicates:
Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other
• Nitrofurantoin	Other
Confusion, loss of appetitie, nausea, abdominal pain	
• Nitrofurantoin	Other
confusion	
• Penicillins	Rash
• Sulfa Antibiotics	Rash

Current Outpatient Medications:
• acetaminophen-codeine 300-30 MG Oral Tab, TAKE ONE TABLET BY MOUTH ONCE DIALY FOR ARTHRITIC PAIN AS NEEDED., Disp: 60 tablet, Rfl: 0
• Atorvastatin Calcium 20 MG Oral Tab, Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction, Disp: 45 tablet, Rfl: 3
• Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab, Take 1 tablet by mouth 2 times a day., Disp: , Rfl:
• Losartan Potassium 25 MG Oral Tab, TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY, Disp: 45 tablet, Rfl: 2
• Pentoxifylline ER 400 MG Oral Tab CR, Take 1 tablet (400 mg) by mouth 3 times a day., Disp: 270 tablet, Rfl: 3
• Timolol Maleate 0.5 % Ophthalmic Solution, Instill one drop in each eye twice daily, Disp: 10 mL, Rfl: 0
• Warfarin Sodium 4 MG Oral Tab, Take 1 tablet (4 mg) by mouth daily., Disp: 30 tablet, Rfl: 2

XR TIBIA FIBULA 2 VW LEFT
EXAMINATION:
XR Tibia Fibula 2 Views Left

CLINICAL INDICATION:
worsening wound at left medial ankle

COMPARISON:
Radiographs of the left tibia and fibula dated August 17, 2017.

FINDINGS AND IMPRESSION:
The bones are diffusely demineralized.

No acute fracture or dislocation. No periostitis, focal osteopenia, or osseous erosion to suggest osteomyelitis.

There is soft tissue irregularity/ulceration along the medial distal calf. No definite soft tissue gas. No radiopaque foreign body. Vascular calcifications are present.
ATTENDING RADIOLOGIST AND PAGER NUMBER
505568 REHWALD CHRISTINE MARIE MD

ASSESSMENT/PLAN: This is a patient with extensive leg ulcers, poor living conditions, underlying DM2, limb ischemia and venous hypertension with poor nutritional intake due to the lifestyle. Currently wounds are stable. We made sure the son has enough wound care supply to carry on our instructions for wound dressing. Again emphasized the importance of her having high protein and calori intake with these wounds. We will follow up.

Patient Instructions
Left and right calf and ankle wounds:
Cleanse with water and pat dry,
Apply Silver Alginate, ABD, Wrap Gauze,
Apply Zinc paste to the periwound excoriation,
Tubi-grip- apply in the morning and remove at night.
Change dressing every other day

Maintain a high protein diet (4 Ensures/Glucerna per day)
Please eat high protein, meat based diet
Please stay on bedrest, evaluate legs
Avoid salt in your foods
Elevate legs as much as possible

If pain, redness, swelling, increases and fever please go to the ER or Urgent Care

06/10/2019 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

Letters (continued)

Return in about 1 month (around 7/8/2019) for routine follow-up.

Norsworthy, Nilufer Bozdemir, MD at 5/23/2019 1015

PROGRESS NOTE
5/23/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with multiple bilateral lower limb ulcer is seen today for Follow Up Visit

INTERVAL HISTORY: This is a delightful patient presented with her son. Her wounds deteriorated and there are multiple new leg ulcer with pain and excessive slough. She reports she is loosing weight. Son reports she is not eating much. Their food is mostly fruit and vegetable with protein twice weekly. They continue to live in a tent. Son is not available for her during the day time. So she sits all day long legs are at dependent posture.
She has DM2 and mixed vascular disease with venous insufficiency and limb ischemia.
Mrs. Hoffman's case has a challenging sociopsychological and economical aspect: She is living with her son in a tent. Her living conditions and access to food is poor. HHRN declined to care for her as she has no address with unsafe and unkept environment. Her son has been carrying out the wound care, he run out of supply and did not reach us for refills. There is an open APS file for her. Her son is not allowing her to live at a place that she will has better food and care, openly using psychological pressure on her with economical concerns: "people goes to nursing facility for dying", "he would not visit her there if she chooses to go", "she will loose all family photos as he cannot afford to keep them in storage".

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:Denies, fatigue, unexpected weight loss, unexpected weight gain, fever, . Does have, limb pain

Review of patient's allergies indicates:

Allergies

XR TIBIA FIBULA 2 VW LEFT
EXAMINATION:
XR Tibia Fibula 2 Views Left

CLINICAL INDICATION:
worsening wound at left medial ankle

COMPARISON:
Radiographs of the left tibia and fibula dated August 17, 2017.

FINDINGS AND IMPRESSION:
The bones are diffusely demineralized.

No acute fracture or dislocation. No periostitis, focal osteopenia, or osseous erosion to suggest osteomyelitis.

There is soft tissue irregularity/ulceration along the medial distal calf. No definite soft tissue gas. No radiopaque foreign body. Vascular calcifications are present.
ATTENDING RADIOLOGIST AND PAGER NUMBER
505568 REHWALD CHRISTINE MARIE MD

PROCEDURE
A preprocedure time out was performed confirming the patient's identity, procedure to be performed, and site. A verbal consent was obtained.
Wound/Ulcer: # 9 and 10 / Description: Wound bed and edges have large slough and necrotic tissue.
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue
Tissue and/or Material Removed: fibrin/slough, non-viable, skin, subcutaneous and viable
Severity: necrosis of muscle
Instruments Used: curette
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~100 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements
#9: Improved: Length 7cm X Width 6cm X Depth: 0.7cm
#10: Improved: Length 10cm X Width 5.6cm X Depth: 0.5cm
Patient tolerated the procedure well.
The wound looked improved after the debridement

ASSESSMENT/PLAN: This is a 94 yo woman with DM2, both venous and arterial disease is here with her son for worsening leg ulcers. She is loosing weight. Her care is suboptimal with interrupted wound care at home, poor nutritional status, and poor living conditions. Currently there is no sign of infection or inflammation with ulcers. We will continue antimicrobial and absorbant dressings. We ordered more supply for her. She does need better environment, care and higher protein content in her diet. I strongly recommend her to be at an intermediate care facility. She is hesitant to disagree with her son on this change. I recommended her to discuss her options with Dr. Neighbor, MD (her PCP) as well.
(L97.323) Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC) (primary encounter diagnosis)
(L97.313) Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)
(E11.622, L97.909) Diabetic ulcer of lower extremity (HCC)

(I87.313, L97.919, L97.929) Chronic venous hypertension with ulcer, bilateral (HCC)
(R60.0) Bilateral leg edema
Jeanne was seen today for follow up visit.

Patient Instructions
Left and right calf and ankle wounds:
Cleanse with water and pat dry
Apply Silver Alginate, ABD, Wrap Gauze
Apply Zinc paste to the periwound excoriation.
Tubi-grip
Change dressing Every other day

Ordering from SH today
Maintain a high protein diet (4 Ensures/Glucerna per day)
Please eat high protein, meat based diet
Please stay on bedrest
Avoid salt in your foods

Elevate legs as much as possible

05/23/2019 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

Clinical Notes (continued)

Diapers can be used to absorb drainage.

If pain, redness, swelling, increases and fever please go to the ER or Urgent Care

Return in about 2 weeks (around 6/6/2019) for routine follow-up.

PROGRESS NOTE
5/23/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with multiple bilateral lower limb ulcer is seen today for Follow Up Visit

INTERVAL HISTORY: This is a delightful patient presented with her son. Her wounds deteriorated and there are multiple new leg ulcer with pain and excessive slough. She reports she is loosing weight. Son reports she is not eating much. Their food is mostly fruit and vegetable with protein twice weekly. They continue to live in a tent. Son is not available for her during the day time. So she sits all day long legs are at dependent posture.
She has DM2 and mixed vascular disease with venous insufficiency and limb ischemia.
Mrs. Hoffman's case has a challenging sociopsychological and economical aspect: She is living with her son in a tent. Her living conditions and access to food is poor. HHRN declined to care for her as she has no address with unsafe and unkept environment. Her son has been carrying out the wound care, he run out of supply and did not reach us for refills. There is an open APS file for her. Her son is not allowing her to live at a place that she will has better food and care, openly using psychological pressure on her with economical concerns: "people goes to nursing facility for dying", "he would not visit her there if she chooses to go", "she will loose all family photos as he cannot afford to keep them in storage".

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:Denies, fatigue, unexpected weight loss, unexpected weight gain, fever, . Does have, limb pain

Review of patient's allergies indicates:
Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other
• Nitrofurantoin	Other
Confusion, loss of appetitie, nausea, abdominal pain

XR TIBIA FIBULA 2 VW LEFT
EXAMINATION:
XR Tibia Fibula 2 Views Left

CLINICAL INDICATION:
worsening wound at left medial ankle

COMPARISON:
Radiographs of the left tibia and fibula dated August 17, 2017.

FINDINGS AND IMPRESSION:
The bones are diffusely demineralized.

No acute fracture or dislocation. No periostitis, focal osteopenia, or osseous erosion to suggest osteomyelitis.

There is soft tissue irregularity/ulceration along the medial distal calf. No definite soft tissue gas. No radiopaque foreign body. Vascular calcifications are present.
ATTENDING RADIOLOGIST AND PAGER NUMBER

505568 REHWALD CHRISTINE MARIE MD

PROCEDURE
A preprocedure time out was performed confirming the patient's identity, procedure to be performed, and site. A verbal consent was obtained.
Wound/Ulcer: # 9 and 10 / Description: Wound bed and edges have large slough and necrotic tissue.
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue
Tissue and/or Material Removed: fibrin/slough, non-viable, skin, subcutaneous and viable
Severity: necrosis of muscle
Instruments Used: curette
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~100 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements
#9: Improved: Length 7cm X Width 6cm X Depth: 0.7cm
#10: Improved: Length 10cm X Width 5.6cm X Depth: 0.5cm
Patient tolerated the procedure well.
The wound looked improved after the debridement

ASSESSMENT/PLAN: This is a 94 yo woman with DM2, both venous and arterial disease is here with her son for worsening leg ulcers. She is loosing weight. Her care is suboptimal with interrupted wound care at home, poor nutritional status, and poor living conditions. Currently there is no sign of infection or inflammation with ulcers. We will continue antimicrobial and absorbant dressings. We ordered more supply for her. She does need better environment, care and higher protein content in her diet. I strongly recommend her to be at an intermediate care facility. She is hesitant to disagree with her son on this change. I recommended her to discuss her options with Dr. Neighbor, MD (her PCP) as well.
(L97.323) Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC) (primary encounter diagnosis)
(L97.313) Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)
(E11.622, L97.909) Diabetic ulcer of lower extremity (HCC)
(I87.313, L97.919, L97.929) Chronic venous hypertension with ulcer, bilateral (HCC)
(R60.0) Bilateral leg edema
Jeanne was seen today for follow up visit.

Diagnoses and all orders for this visit:

Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)
- NURSING COMMUNICATION

Patient Instructions
Left and right calf and ankle wounds:
Cleanse with water and pat dry
Apply Silver Alginate, ABD, Wrap Gauze
Apply Zinc paste to the periwound excoriation.
Tubi-grip
Change dressing Every other day

Ordering from SH today
Maintain a high protein diet (4 Ensures/Glucerna per day)
Please eat high protein, meat based diet
Please stay on bedrest
Avoid salt in your foods

Elevate legs as much as possible

Diapers can be used to absorb drainage.

If pain, redness, swelling, increases and fever please go to the ER or Urgent Care

Return in about 2 weeks (around 6/6/2019) for routine follow-up.

Nilufer B Norsworthy, MD

Clinical Notes

Telephone Encounter

McKisson, Kimberly A, RN at 5/1/2019 1307

Pt's son called today to say patients left foot has been very swollen with erythema over the last few days. Son reports patient is unable to walk on it because it is so painful. I advised son to take his mom to Urgent care or ER.

Clinical Notes

Progress Notes

McKisson, Kimberly A, RN at 4/25/2019 1000

Wounds are much worse today. Counted 3 new wounds today. Wounds debrided. Patient eating a lot of sweets and not much protein. She is not elevating either. Son reports they ran out of supply's and that's why her wounds are worse. Dressings ordered from SH today. F/U 1 week.

Calf and ankle wounds:
Cleanse with water and pat dry
Apply Silver Alginate, ABD, Wrap Gauze
Apply Zinc paste to the periwound excoriation.
Tubi-grip
Change dressing Every other day

Ordering from SH today
Maintain a high protein diet 2-4 Ensures per day would be helpful
Avoid salt in your foods

Elevate legs as much as possible

Diapers can be used to absorb drainage.

Electronically signed by McKisson, Kimberly A, RN at 4/25/2019 3:15 PM

Norsworthy, Nilufer Bozdemir, MD at 4/25/2019 1000

PROGRESS NOTE
4/25/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with bilateral lower leg ulcers with mixed vascular disease is seen today for No chief complaint on file.

INTERVAL HISTORY: Jeane returned to clinic with her son. Her leg ulcers are worse, extensive in size. There is a new ulcer at the right medial ankle. Ulcers are covered with stringy fibrinous slough. There is increased edema at ankles. There is no sign of infection.
This is a 94 yo woman currently living in a tent with her son. She sits across from a stove all day long legs are dangling. She has poor appetite and loosing weight: over the last 6 months she lost about 20lbs. She usually cooks the food for both and lately she was not cooking much due to fatigue and again poor appetite.When she eats she likes to eat cookies.
They run out of dressing material last month and left dressing in place for longer periods until everything truly soaks up. With that the older wound actually has some better wound bed as the autolytic debridement dissolve the thick fibrinous slough. But other wound edges are macerated. She denies any fever or chills. Except the dressing changes she denies pain withulcers.

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:She has fatigue, weight loss. Denies fever, has intermittent limb pain at both lower legs.

Review of patient's allergies indicates:
Allergies

PROCEDURE
A preprocedure time out was performed confirming the patient's identity, procedure to be performed, and site. A verbal consent was obtained.
Wound/Ulcer: # 9, 10, 12 / Description: base is covered with slough edges are hypertrophic and some areas are detached. There is some necrotic changes at edges with wounds.
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue
Tissue and/or Material Removed: exudate, fibrin/slough, non-viable, skin, subcutaneous and viable
Severity: necrosis of muscle
Instruments Used: curette
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~90 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements
#9: Improved: Length 10.6cm X Width 4.6cm X Depth: 0.4cm
#10: Improved: Length 5.7cm X Width 5cm X Depth: 0.4cm
#12: Improved: Length 5.5cm X Width 2.5cm X Depth: 0.3cm
Patient tolerated the procedure well.
The wound looked improved after the debridement

ASSESSMENT/PLAN: this is a nonagenarian patient with mixed vascular disease, malnutrition, difficult lifestyle. She has large and worsening bilateral limb ulcers. At this point for the wound care standpoint the major barriers are her poor nutritional intake, poor edema control all due to her lifestyle, which is not going to be changing any time soon. I recommend to elevate the limbs at rest. Needs to increase her protein intake. Do not keep salty crackers and snacks at reach. We will follow up and continue current dressing. Supply will be shipped to her given address.
(L97.313) Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC) (primary encounter diagnosis)
(L97.223) Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
(I70.442) Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf (HCC)
(I87.332, L97.929) Chronic venous hypertension with ulcer and inflammation, left (HCC)
Diagnoses and all orders for this visit:

Patient Instructions
Calf and ankle wounds:
Cleanse with water and pat dry
Apply Silver Alginate, ABD, Wrap Gauze
Apply Zinc paste to the periwound excoriation.
Tubi-grip
Change dressing Every other day

Ordering from SH today
Maintain a high protein diet 4 Ensures/Glucerna per day
Avoid salt in your foods

Elevate legs as much as possible

Diapers can be used to absorb drainage.

04/25/2019 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

Clinical Notes (continued)

Return in about 1 month (around 5/23/2019) for routine follow-up.

RE: Jeane Leonie Hoffman
DOB: 1/6/1925

Dear William E Neighbor Jr., MD:

Thank you for referring Jeane Hoffman to me for evaluation. Enclosed is a copy of my clinic note.

If you have questions please feel free to contact me at your convenience; I would be happy to review any concerns you have.

Sincerely,

Visit Summary
PROGRESS NOTE
4/25/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with bilateral lower leg ulcers with mixed vascular disease is seen today for No chief complaint on file.

INTERVAL HISTORY: Jeane returned to clinic with her son. Her leg ulcers are worse, extensive in size. There is a new ulcer at the right medial ankle. Ulcers are covered with stringy fibrinous slough. There is increased edema at ankles. There is no sign of infection.
This is a 94 yo woman currently living in a tent with her son. She sits across from a stove all day long legs are dangling. She has poor appetite and loosing weight: over the last 6 months she lost about 20lbs. She usually cooks the food for both and lately she was not cooking much due to fatigue and again poor appetite.When she eats she likes to eat cookies.
They run out of dressing material last month and left dressing in place for longer periods until everything truly soaks up. With that the older wound actually has some better wound bed as the autolytic debridement dissolve the thick fibrinous slough. But other wound edges are macerated.
She denies any fever or chills. Except the dressing changes she denies pain withulcers.

A 14-category ROS was reviewed with patient:

CONSTITUTIONAL:She has fatigue, weight loss. Denies fever, has intermittent limb pain at both lower legs.

Review of patient's allergies indicates:

Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other
• Nitrofurantoin	Other
Confusion, loss of appetitie, nausea, abdominal pain	
• Nitrofurantoin	Other
confusion	
• Penicillins	Rash
• Sulfa Antibiotics	Rash

Current Outpatient Medications:
• Acetaminophen-Codeine #3 300-30 MG Oral Tab, TAKE ONE TABLET BY MOUTH ONCE DIALY FOR ARTHRITIC PAIN AS NEEDED., Disp: 60 tablet, Rfl: 1
• Atorvastatin Calcium 20 MG Oral Tab, Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction, Disp: 45 tablet, Rfl: 3
• Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab, Take 1 tablet by mouth 2 times a day., Disp: , Rfl:
• Losartan Potassium 25 MG Oral Tab, TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY, Disp: 45 tablet, Rfl: 2
• Pentoxifylline ER 400 MG Oral Tab CR, Take 1 tablet (400 mg) by mouth 3 times a day., Disp: 270 tablet, Rfl: 3
• Timolol Maleate 0.5 % Ophthalmic Solution, Instill one drop in each eye twice daily, Disp: 10 mL, Rfl: 0
• Warfarin Sodium 4 MG Oral Tab, Take 1 tablet (4 mg) by mouth daily., Disp: 30 tablet, Rfl: 2

PROCEDURE
A preprocedure time out was performed confirming the patient's identity, procedure to be performed, and site. A verbal consent was obtained.
Wound/Ulcer: # 9, 10, 12 / Description: base is covered with slough edges are hypertrophic and some areas are detached. There is some necrotic changes at edges with wounds.
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue
Tissue and/or Material Removed: exudate, fibrin/slough, non-viable, skin, subcutaneous and viable
Severity: necrosis of muscle
Instruments Used: curette
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~90 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements
#9: Improved: Length 10.6cm X Width 4.6cm X Depth: 0.4cm
#10: Improved: Length 5.7cm X Width 5cm X Depth: 0.4cm
#12: Improved: Length 5.5cm X Width 2.5cm X Depth: 0.3cm
Patient tolerated the procedure well.
The wound looked improved after the debridement

ASSESSMENT/PLAN: this is a nonagenarian patient with mixed vascular disease, malnutrition, difficult lifestyle. She has large and worsening bilateral limb ulcers. At this point for the wound care standpoint the major barriers are her poor nutritional intake, poor edema control all due to her lifestyle, which is not going to be changing any time soon. I recommend to elevate the limbs at rest. Needs to increase her protein intake. Do not keep salty crackers and snacks at reach. We will follow up and continue current dressing. Supply will be shipped to her given address.
(L97.313) Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC) (primary encounter diagnosis)
(L97.223) Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
(I70.442) Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf (HCC)
(I87.332, L97.929) Chronic venous hypertension with ulcer and inflammation, left (HCC)
Diagnoses and all orders for this visit:

Non-pressure chronic ulcer of right ankle with necrosis of muscle (HCC)
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<

- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Patient Instructions
Calf and ankle wounds:
Cleanse with water and pat dry
Apply Silver Alginate, ABD, Wrap Gauze
Apply Zinc paste to the periwound excoriation.
Tubi-grip
Change dressing Every other day

Ordering from SH today
Maintain a high protein diet 4 Ensures/Glucerna per day
Avoid salt in your foods

Elevate legs as much as possible

Diapers can be used to absorb drainage.

Return in about 1 month (around 5/23/2019) for routine follow-up.

PROGRESS NOTE
3/28/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with left medial calf and ankle ulcers with DM2 and mixed vascular disease is seen today for Follow Up Visit

INTERVAL HISTORY: The ulcer has worsened with satellite ulcers, fibrotic base and larger surface area. Since last visit there are changes in her and her son's life: they continue to live together in a tent. Son is less available to change her dressings and also for preparing food. She ate cheese, chips and canned food like soup which all are high in salt content. She was having larger drainage. She denies any change in the pain level. Legs are more edematous. There is no sign of infection with the wounds.

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:Denies, fatigue, unexpected weight loss, unexpected weight gain, fever, limb pain

Review of patient's allergies indicates:
Allergies

PROCEDURE

03/28/2019 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

Clinical Notes (continued)

A preprocedure time out was performed confirming the patient's identity, procedure to be performed, and site. A verbal consent was obtained.
Wound/Ulcer: # 9 / Description: Wound bed and edges are covered with gray-brown fibrinous slough with no visible granulation tissue
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue
Tissue and/or Material Removed: fibrin/slough, non-viable, skin, subcutaneous and viable
Severity: fat layer exposed
Instruments Used: curette
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided -Total Square cm2 = ~50 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements: Improved: Length 10cm X Width 5cm X Depth: 0.4cm
Patient tolerated the procedure well.
The wound looked improved after the debridement

ASSESSMENT/PLAN: This is a patient, 94 yo, with DM2, with limb ischemia and also chronic venous hypertension with dense edema at limbs is here with her son. She has difficult living conditions: lives in a tent with suboptimal food access. Lately she has been eating more than acceptable amount of salty food including chips, crackers and canned soup. The frequency of dressing change is also not optimal, stays wet with unchanged dressings long times as her son is the only help on dressing changes she has. She chooses this lifestyle over the intermediate care facilities that she can go to.
I strongly urged them to remove all the salty food choices from the reach of our patient. She should decrease salt in diet. Increase protein and calory intake. Dressings needs to be changed every other day. We will follow up.
(L97.223) Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC) (primary encounter diagnosis)
(I87.332, L97.929) Chronic venous hypertension with ulcer and inflammation, left (HCC)
(I70.442) Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf (HCC)
(L97.323) Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)
(E11.622, L97.909) Diabetic ulcer of lower extremity (HCC)
Jeanne was seen today for follow up visit.

Diagnoses and all orders for this visit:

Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Chronic venous hypertension with ulcer and inflammation, left (HCC)
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<
- DBRDMT SUBCUTANEOUS TISSUE EA ADDL 20 SQ CM

Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf (HCC)

Patient Instructions
Left Post Calf, Medial Calf, Medial Ankle:
Cleanse with water and pat dry
Apply Silver Alginate, ABD, Wrap Gauze
Apply Zinc paste to the periwound excoriation.
Tubi-grip
Change dressing Every other day

Ordering from SH today
Maintain a high protein diet
Avoid salt in your foods

Return in about 1 month (around 4/25/2019).

Visit Summary
PROGRESS NOTE
3/28/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with left medial calf and ankle ulcers with DM2 and mixed vascular disease is seen today for Follow Up Visit

INTERVAL HISTORY: The ulcer has worsened with satellite ulcers, fibrotic base and larger surface area. Since last visit there are changes in her and her son's life: they continue to live together in a tent. Son is less available to change her dressings and also for preparing food. She ate cheese, chips and canned food like soup which all are high in salt content. She was having larger drainage. She denies any change in the pain level. Legs are more edematous. There is no sign of infection with the wounds.

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:Denies, fatigue, unexpected weight loss, unexpected weight gain, fever, limb pain

Review of patient's allergies indicates:

Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other
• Nitrofurantoin	Other
Confusion, loss of appetitie, nausea, abdominal pain	
• Nitrofurantoin	Other
confusion	
• Penicillins	Rash
• Sulfa Antibiotics	Rash

Current Outpatient Medications:
• Acetaminophen-Codeine #3 300-30 MG Oral Tab, TAKE ONE TABLET BY MOUTH ONCE DIALY FOR ARTHRITIC PAIN AS NEEDED., Disp: 60 tablet, Rfl: 1
• Atorvastatin Calcium 20 MG Oral Tab, Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction, Disp: 45 tablet, Rfl: 3
• Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab, Take 1 tablet by mouth 2 times a day., Disp: , Rfl:
• Losartan Potassium 25 MG Oral Tab, TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY, Disp: 45 tablet, Rfl: 2
• Pentoxifylline ER 400 MG Oral Tab CR, Take 1 tablet (400 mg) by mouth 3 times a day., Disp: 270 tablet, Rfl: 3
• Timolol Maleate 0.5 % Ophthalmic Solution, INSTILL ONE DROP IN EACH EYE TWICE DAILY., Disp: 5 mL, Rfl: 0
• Warfarin Sodium 4 MG Oral Tab, Take 1 tablet (4 mg) by mouth daily., Disp: 30 tablet, Rfl: 2

Active at the End of Visit

Pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/20/2017
Start date: 12/20/2017
End date: 9/4/2019
Quantity: 270 tablet
Refill: 3 refills remaining

Timolol Maleate 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/16/2019
Reason for discontinuation: Reorder
Instructions: INSTILL ONE DROP IN EACH EYE TWICE DAILY.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/8/2017
Start date: 12/8/2017
End date: 4/12/2019
Quantity: 5 mL
Refill: No refills remaining

Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Instructions: Take 1 tablet by mouth 2 times a day.
Entered by: Ong, Thuan Duc, MD
Entered on: 6/7/2018
End date: 10/13/2021

Losartan Potassium 25 MG Oral Tab

Discontinued by: Taylor, Zoe Judith Mildred, MD
Discontinued on: 8/20/2019
Reason for discontinuation: Therapy completed/no longer indicated
Instructions: TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY
Entered by: Neighbor Jr., William E, MD
Entered on: 9/26/2018
Start date: 9/26/2018
End date: 8/20/2019

Progress Notes

McKisson, Kimberly A, RN at 2/28/2019 1000

Wounds are stable, but slough covered. They were debrided today. Pt and son are still living on BI in tent with wood burning stove. She reports she has been staying warm in the cold weather. Ordering supplies from SH today.

Left Post Calf, Medial Calf, Medial Ankle:

Cleanse with water and pat dry
Apply Silver Alginate, ABD, Wrap Gauze
Tubi-grip
Change dressing 2 times per week

Pt recently received dressings from SH

Electronically signed by McKisson, Kimberly A, RN at 2/28/2019 12:54 PM

Riaz, Tazneem, CMA at 2/28/2019 1000

Patient's dressing completed per physician's order.

Norsworthy, Nilufer Bozdemir, MD at 2/28/2019 1000

PROGRESS NOTE
2/28/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with a left calf ulcer is seen today for Follow Up Visit

INTERVAL HISTORY: This is a patient with DM2, venous hypertension and atherosclerosis with DM2 is here with mixed vascular left calf ulcer. Since the last visit the wound has improved. Smaller. Wound bed has large slough but does not contain any necrotic tissue as it was the case in January. She has minimal pain with the wound. According to the son who is accompanying her she has better living conditions: has a large tent, stove in it. Has comfortable bed. She is eating meat at least two portions daily. She was not complaining of pain at the limb for a while. She is also taking daily walks without pain.

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:Denies, fatigue, unexpected weight loss, unexpected weight gain, fever, limb pain

Review of patient's allergies indicates:
Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other
• Nitrofurantoin	Other
Confusion, loss of appetitie, nausea, abdominal pain	
• Nitrofurantoin	Other
confusion	
• Penicillins	Rash
• Sulfa Antibiotics	Rash

Current Outpatient Medications:
• Acetaminophen-Codeine #3 300-30 MG Oral Tab, TAKE ONE TABLET BY MOUTH ONCE DIALY FOR ARTHRITIC PAIN AS NEEDED., Disp: 60 tablet, Rfl: 1
• Atorvastatin Calcium 20 MG Oral Tab, Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction, Disp: 45 tablet, Rfl: 3
• Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab, Take 1 tablet by mouth 2 times a day., Disp: , Rfl:
• Losartan Potassium 25 MG Oral Tab, TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY, Disp: 45 tablet, Rfl: 2
• Pentoxifylline ER 400 MG Oral Tab CR, Take 1 tablet (400 mg) by mouth 3 times a day., Disp: 270 tablet, Rfl: 3
• Timolol Maleate 0.5 % Ophthalmic Solution, INSTILL ONE DROP IN EACH EYE TWICE DAILY., Disp: 5 mL, Rfl: 0
• Warfarin Sodium 4 MG Oral Tab, Take 1 tablet (4 mg) by mouth daily., Disp: 30 tablet, Rfl: 2

PROCEDURE
A preprocedure time out was performed confirming the patient's identity, procedure to be performed, and site. A verbal consent was obtained.
Wound/Ulcer: # 9 / Description: Wound bed is covered with stringy fibrinous slough, edges are rolled in
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue
Tissue and/or Material Removed: fibrin/slough, non-viable, skin, subcutaneous and viable
Severity: necrosis of muscle
Instruments Used: curette
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~20 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements: Improved: Length 9cm X Width 2.2cm X Depth: 0.4cm
Patient tolerated the procedure well.
The wound looked improved after the debridement

ASSESSMENT/PLAN: This is a patient with mixed vascular limb ulcer at the presence of advanced age and DM2. With current management the wound healing is progressing although slow. Sounds like the living conditions are also better which should positively impact the healing. We will continue current care.
(L97.223) Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC) (primary encounter diagnosis)
(I87.332, L97.929) Chronic venous hypertension with ulcer and inflammation, left (HCC)
(I70.442) Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf (HCC)
(E11.622, L97.909) Diabetic ulcer of lower extremity (HCC)
Jeanne was seen today for follow up visit.

Diagnoses and all orders for this visit:

Non-pressure chronic ulcer of left calf with necrosis of muscle (HCC)
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<

Chronic venous hypertension with ulcer and inflammation, left (HCC)

02/28/2019 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

Clinical Notes (continued)

- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<

Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf (HCC)

- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<

Diabetic ulcer of lower extremity (HCC)

- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<

Patient Instructions

Left Post Calf, Medial Calf, Medial Ankle:
Cleanse with water and pat dry
Apply Silver Alginate, ABD, Wrap Gauze
Tubi-grip
Change dressing 2 times per week

Ordering from SH today
Maintain a high protein diet

Return in about 1 month (around 3/28/2019) for routine follow-up.

Telephone Encounter

Neighbor Jr., William E, MD at 2/11/2019 1613

Spoke with son Louise Friday, Feb 8, 2019
He reports Jean is eating better now.
Reports dressing changes daily and wound improving. Follow up at NW wound care.
They have been in a motel supported by their Church and will be there over the next 3-4 days.

William E Neighbor, MD

2/11/2019
4:44 PM
Spoke with Pastor Dave O'Connell
314.853.2695
Church has put Jeanne and Louis up in hotel end of last week and this week during the cold weather

I put a call into Levonne Gibson at APS 360.473.2167 and will follow up with him tomorrow.
Provided my cell phone number.

William E Neighbor, MD

2/14/2019
Returned call to Glenda Melbuy (?spelling) at APS
Phone 360.890.2425
Her message on my phone yesterday indicated the case is open and being investigated
I communicated some concerns that have been expressed to be about reason for difficulties in finding living situation on Bainbridge and some of the care giver burn out that Louise, her son, may be experiencing that his compromising some of the attention he is able to give her.

Jeanne and Louise:
I wanted to summarize my telephone call from last Friday, 2.8.2019.
--Jean is now eating better
--She is taking her medications
--The Church is helping with temporary housing during the cold weather

The main issue continues to be housing. It is essential that Jean get into adequate housing.

William E Neighbor, MD

Progress Notes

McKisson, Kimberly A, RN at 1/31/2019 1000

Some wounds were healed today. Overall, wounds have improved with less inflammation. Pt is losing wt currently, reports she eats 5 meals per day which her son reportedly cooks. She lives in a shelter with her son. There is a new small superficial ulcer on her left lateral ankle which measures 0.6 x 0.2 x 0.1 cm. It was covered in slough with inflammation of the peri-woud. Covered with silver alginate today, will continue to monitor.F/U 2 weeks.

Left Post Calf, Medial Calf, Medial Ankle:

Cleanse with water and pat dry
Apply Silver Alginate, ABD, Wrap Gauze
Tubi-grip
Change dressing 2 times per week

Pt recently received dressings from SH

PROGRESS NOTE
1/31/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with a lef calf ulcer with mixed vascular disease is seen today for Follow Up Visit

INTERVAL HISTORY: This is a patient with limb ischemia and venous reflux disease is here alone. Her calf ulcer seems improved, smaller and covered with stringy fibrinous slough. At the last visit there was large necrotic tissue that was removed with excisional debridement. Her dressing has been changed by her son. She reports loosing weight. She says she is cooking for herself most of the time. She is currently living in a tent with her son. Last time were concerned with her social status and possible elder abuse situation. Called APS. She denies any visit or action on this subject. Denies any physical or emotional abuse at this point.

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:Denies, fatigue, unexpected weight loss, unexpected weight gain, fever, limb pain

Review of patient's allergies indicates:
Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other

05/31/2018	59 (H)	0 - 20 mm/h	Final

No components found for: HSCRP
No components found for: ALB
No results found for: TTHY

Diagnostics: tibial and fibular xray from 1/7/2019 was negative for any sign of OM.

PROCEDURE
A preprocedure time out was performed confirming the patient's identity, procedure to be performed, and site. A verbal consent was obtained.
Wound/Ulcer: # 9 / Description: wound bed is covered with slough. Edges are sharp and rolled-in.
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue
Tissue and/or Material Removed: fibrin/slough, non-viable, skin, subcutaneous and viable
Severity: fat layer exposed
Instruments Used: curette
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~42 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements: Improved: Length 8.4cm X Width 5cm X Depth: 0.3cm
Patient tolerated the procedure well.
The wound looked improved after the debridement

ASSESSMENT/PLAN: This is a patient with mixed vascular disease and challenging lifestyle with urban nomadism. She is loosing weight with decreased food intake. She prefers to be living with her son rather than at a rehabilitation or other intermediate care facility. At this point we are treating her with moist wound care and very light compression. The wound is slowly improving. We will continue current care. Will follow up.
(L97.222) Non-pressure chronic ulcer of left calf with fat layer exposed (HCC) (primary encounter diagnosis)
(I70.442) Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf (HCC)
(I87.332, L97.929) Chronic venous hypertension with ulcer and inflammation, left (HCC)
Jeanne was seen today for follow up visit.

Diagnoses and all orders for this visit:

Non-pressure chronic ulcer of left calf with fat layer exposed (HCC)

Clinical Notes (continued)

Active at the End of Visit

Pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/20/2017
Start date: 12/20/2017
End date: 9/4/2019
Quantity: 270 tablet
Refill: 3 refills remaining

Timolol Maleate 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/16/2019
Reason for discontinuation: Reorder
Instructions: INSTILL ONE DROP IN EACH EYE TWICE DAILY.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/8/2017
Start date: 12/8/2017
End date: 4/12/2019
Quantity: 5 mL
Refill: No refills remaining

Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Instructions: Take 1 tablet by mouth 2 times a day.
Entered by: Ong, Thuan Duc, MD
Entered on: 6/7/2018
End date: 10/13/2021

Warfarin Sodium 4 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 2/16/2019
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (4 mg) by mouth daily.
Entered by: Neighbor Jr., William E, MD
Entered on: 9/26/2018
Start date: 9/26/2018
End date: 2/14/2019

Losartan Potassium 25 MG Oral Tab

Discontinued by: Taylor, Zoe Judith Mildred, MD
Discontinued on: 8/20/2019
Reason for discontinuation: Therapy completed/no longer indicated
Instructions: TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY

Telephone Encounter

McKisson, Kimberly A, RN at 1/10/2019 1556

Placed a report to Kitsap County Hotline Services (800-562-6078) today regarding Pt care. Left a message that Pt is 94 Y/O with open ulcers and son is caring/living with her. They have been homeless and are currently staying in a shelter on Bainbridge Island. Pt is often cold and tired. Son defends her nutritional intake. Son has interfered with Pt being in safe environments, and pulled her from SNIF's more than once stating they are taking her retirement money. We will continue to F/U with Pt. Incident # 129802.

Narrative:
EXAMINATION:
XR Tibia Fibula 2 Views Left

CLINICAL INDICATION:
worsening wound at left medial ankle

COMPARISON:
Radiographs of the left tibia and fibula dated August 17, 2017.

FINDINGS AND IMPRESSION:

01/10/2019 - Orders Only in NWH Radiology (continued)

Imaging (continued)

The bones are diffusely demineralized.

No acute fracture or dislocation. No periostitis, focal osteopenia, or osseous erosion to suggest osteomyelitis.

There is soft tissue irregularity/ulceration along the medial distal calf. No definite soft tissue gas. No radiopaque foreign body. Vascular calcifications are present.

Clinical Notes

Progress Notes

McKisson, Kimberly A, RN at 1/10/2019 1030

94 y/o woman with mixed vascular disease of the left leg and three subsequent ulcers. The left medial calf ulcer being the worst going to muscle, with black green necrotic looking edges. Wound was debrided in clinic. Pt had been coming here last fall, and just stopped. She is homeless and lives with her son in a shelter on Bainbridge Island.
Pts son has removed her from nursing home care on several occasions because he claims they are taking her retirement money. There is concern for Pts nutrition status, warmth and overall care. Pt seems coherent, but has tremendous difficulty hearing, which puts her at a disadvantage. APS to be notified of this encounter.

WOUND CARE AND HYPERBARIC MEDICINE CENTER NEW PATIENT VISIT

1/10/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with worsening leg ulcers due to mixed vascular disease and poor care and living situation seen today for New Patient Consult

HPI: This is a 94 yo white woman presented with her son Lewis today. She has long standing leg lower leg ulcers with CLI due to diffuse atherosclerotic disease and leg edema with recurrent DVTs and reflux in deep and superficial system. Cannot tolerate compression. s/ Last visit with me was on 10/8/2018. The son Lewis requested less frequent visits as they were living in a homeless shelter in BainBridge Island and commute was too much for her with the promise that the HHRN was regularly visiting her 2x per week. Since last visit I understand that the HHRN did not visit her. Lewis carried on dressings the same way we instructed. I received a call from Harrison Hospital where she was admitted with altered mental status and dehydration and was later diagnosed with medication overdose and adult failure to thrive. APS got involved. Patient was transferred to a skilled nursing facility but Lewis did not think the place was good for her and took her out. Currently she is living at a shelter. When we ask the patient while Lewis is not in the room she reported she is alone most of the time in the shelter. There is not enough food. She has been loosing weight.
The ankle ulcer at the left side has been bothering her more than usual lately. The wound looks completely necrotic tissue with black/green color with inflammation at edges. There is no ascending cellulitis. She denies any fever or chills. She is pretty coherent with good memory and judgement. Denies any recent changes in mental status, malaise. She has severe leg pain with ulcers and ischemia that is not changed at baseline. Dr. Neighbor has been treating the pain with tylenol #3.
She continues to be on coumadin due to recurrent DVTs.

A 14-category ROS was reviewed with patient:
She has fatigue. Denies fever or chills. She has seizure disorder.

Past Medical History:

Diagnosis	Date
• Allergic rhinitis, cause unspecified	11/20/2006
• Carpal tunnel syndrome *Carpal tunnel release right wrist in 1989*	11/20/2006
• Closed fracture of unspecified intracapsular section of neck of femur (HCC) *Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.*	5/1/2007
• DIAPHRAGMATIC HERNIA *CT of abdomen in 2006*	11/20/2006

Diagnostics:
LEA Study (9/8/2018): DBIs 0.23/0.23 which were lower than the assessment in in Feb 2018 (DBIs were ~0.4), with diffuse calcification and stenosis of bilateral femoral and tibial arteries and monophasic inflow to foot and ankle bilateral .
LEV Study (2/2/2018) both deep and superficial venous valvular reflux.

PROCEDURE
A preprocedure time out was performed confirming the patient's identity, procedure to be performed, and site. A verbal consent was obtained.
Wound/Ulcer: # 10 / Description: wound bed is covered with black/green necrotic tissue with malodor and excessive drainage. There is ~2cm inflammation at edges.
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue, muscle
Tissue and/or Material Removed: fibrin/slough, ligament, muscle, non-viable, skin, subcutaneous, viable and fascia
Severity: necrosis of muscle
Instruments Used: curette, scissors and forceps
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~24 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements: Improved: Length 4.6cm X Width 5.2cm X Depth: 0.6cm
Patient tolerated the procedure well.
The wound looked improved after the debridement

ASSESSMENT/PLAN: This is a 94 yo patient with worsening left lower leg ulcers due to: poor wound care, poor nutritional intake and status, difficult living conditions and self care. The ankle ulcer is deep to bone after removing the necrotic tissue. The x-ray of tibia/fibula did not show any sign of bone infection at the wound location.
With the current living situation, lack of care, scarce food intake I am afraid the prognosis of these leg ulcers are poor and they constitute significant risk for life-threatening infection and pain.
I tried to discuss the need for higher level of care for Mrs. Hoffman with the son Lewis. Although available for her he is resistant to allow her to go to a skill nursing care facility. His reasoning is irrational by claiming that they are after her social security money, elderly left alone with poor hygiene, etc in that facility. To my understanding her other son tried to interfere but could not. Lewis says he is also after her money and he is "white supremacist" "a very bad guy". Mrs Hoffman stays quiet to all these claims and pressure to stay in current living situations with Lewis.
At this point I am reporting this case to APS for further investigation and for help to move her to a better care conditions. I also called Dr. Neighbor to report about my visit with Mrs Hoffman. We recommended the below

Clinical Notes (continued)

dressings and will try to get HHRN visits form monitoring and dressing changes in between visits.

(L97.323) Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC) (primary encounter diagnosis)
(I83.029, L97.929) Venous ulcer of left leg (HCC)
(I70.442) Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf (HCC)
Jeanne was seen today for new patient consult.

Diagnoses and all orders for this visit:

Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)
- XR TIBIA FIBULA 2 VW LEFT; Future

Venous ulcer of left leg (HCC)

Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf (HCC)

Other orders
- NURSING COMMUNICATION

Patient Instructions
Left Post Calf, Medial Calf, Medial Ankle:

Cleanse with water and pat dry
Apply Silver Alginate, ABD, Wrap Gauze
Tubi-grip
Change dressing 2 times per week

X-Ray Today

Return in about 1 week (around 1/17/2019) for routine follow-up.

Excluding the time spent performing the procedure, I spent 50 minutes face-to-face with the patient, of which more than 50% was spent counseling and coordinating care regarding adult failure to thrive and suspected elder abuse.

Preferred imaging location: NWH Radiology - Campus (DEP 260456) 206-668-2778

Indications

Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC) [L97.323 (ICD-10-CM)]

XR TIBIA FIBULA 2 VW LEFT
Resulted: 01/10/19 1617, Result status: Final result

Order status: Completed
Resulted by: Rehwald, Christine Marie, MD
Filed by: Uw Radiology Results Interface, User 01/10/19 1618
Performed: 01/10/19 1106 - 01/10/19 1106
Accession number: 12052156
Resulting lab: UW RADIOLOGY
Lab Technician: JESSICA GREER RAD TECH
Narrative:
EXAMINATION:
XR Tibia Fibula 2 Views Left

CLINICAL INDICATION:
worsening wound at left medial ankle

COMPARISON:
Radiographs of the left tibia and fibula dated August 17, 2017.

FINDINGS AND IMPRESSION:
The bones are diffusely demineralized.

No acute fracture or dislocation. No periostitis, focal osteopenia, or osseous erosion to suggest osteomyelitis.

There is soft tissue irregularity/ulceration along the medial distal calf. No definite soft tissue gas. No radiopaque foreign body. Vascular calcifications are present.

Visit Summary
WOUND CARE AND HYPERBARIC MEDICINE CENTER NEW PATIENT VISIT
1/10/2019

ID/CC:
Jeanne Leonie Hoffman is a 94 year old female with worsening leg ulcers due to mixed vascular disease and poor care and living situation seen today for New Patient Consult

HPI: This is a 94 yo white woman presented with her son Lewis today. She has long standing leg lower leg ulcers with CLI due to diffuse atherosclerotic disease and leg edema with recurrent DVTs and reflux in deep and superficial system. Cannot tolerate compression. s/ Last visit with me was on 10/8/2018. The son Lewis requested less frequent visits as they were living in a homeless shelter in BainBridge Island and commute was too much for her with the promise that the HHRN was regularly visiting her 2x per week. Since last visit I understand that the HHRN did not visit her. Lewis carried on dressings the same way we instructed. I received a call from Harrison Hospital where she was admitted with altered mental status and dehydration and was later diagnosed with medication overdose and adult failure to thrive. APS got involved. Patient was transferred to a skilled nursing facility but Lewis did not think the place was good for her and took her out. Currently she is living at a shelter. When we ask the patient while Lewis is not in the room she reported she is alone most of the time in the shelter. There is not enough food. She has been loosing weight.
The ankle ulcer at the left side has been bothering her more than usual lately. The wound looks

completely necrotic tissue with black/green color with inflammation at edges. There is no ascending cellulitis. She denies any fever or chills. She is pretty coherent with good memory and judgement. Denies any recent changes in mental status, malaise. She has severe leg pain with ulcers and ischemia that is not changed at baseline. Dr. Neighbor has been treating the pain with tylenol #3. She continues to be on coumadin due to recurrent DVTs.

A 14-category ROS was reviewed with patient:
She has fatigue. Denies fever or chills. She has seizure disorder.

Past Medical History:

Diagnosis	Date
• Allergic rhinitis, cause unspecified	11/20/2006
• Carpal tunnel syndrome *Carpal tunnel release right wrist in 1989*	11/20/2006
• Closed fracture of unspecified intracapsular section of neck of femur (HCC) *Pinned April 2007. Post op hematocrit 25 Has walker with wheels for use outside of home. Uses cane in home.*	5/1/2007
• DIAPHRAGMATIC HERNIA *CT of abdomen in 2006*	11/20/2006
• Esophageal reflux	11/20/2006
• Impaired fasting glucose	3/22/2007
• Other convulsions (HCC) *Petit Mal since 1975 Carbamazepine level 7.6 on Feb 2007 Discontinued based on ER neuro consult in early 2013 No recurrence*	11/20/2006
• PAD (peripheral artery disease) (HCC)	
• Thyroid nodule, uninodular *CT of spine at HMC sowed left thyroid nodule which needs follow up with US and checking TSH. TSH has been normal on several occassions, the most recent was in fall of 2011. 5/23/2013 thyroid US showed small bilateral thyroid nodules none of concern.*	12/13/2012
• Ulcer of left lower extremity, limited to breakdown of skin (HCC) *Chronic, Multiple sites of lower leg and ankle, with MSSA*	
• Vertebral fracture *Dec 2012. L3 secondary to fall. TLSO brace placed. Follow up imaging in 6 months showed healed*	12/13/2012

No past surgical history on file.
Review of patient's allergies indicates:

Allergies

Social History Narrative

Soc Hx.
1/30/2007 Nancy at Helpline House, 282 Knechtel Ave NE, Bainbridge Island , WA 98110 Voice 842-7624, Fax 842.9867, called last week. See RN telephone. Note. The plan is to call Nancy once I have assessed Mrs. Hoffman's needs when I see her at an upcoming visit.

6/15/2010 Grew up on Bainbridge. Both parents from Paris. Spoke French at home and English in Public. She recalls her first clot was in her legs when she was 30. She also developed clot in her arms later. She states her grandmother had the same problem.

William E Neighbor, MD

EXAM:
Vital Signs: BP 128/60 | Pulse 72 | Temp 97.5 °F (36.4 °C) (Oral) | Resp 16 | Ht 5' 2" (1.575 m) | BMI 20.49 kg/m² Body mass index is 20.49 kg/m².
General: no distress, cooperative, malnourished, pale, alert and oriented x 3, frail and ill looking
Skin: Skin color, texture, turgor normal. No rashes or concerning lesions, lower leg skin is thin and atrophic. Ulcers as below at the left lower leg.
Head: Normocephalic. No masses, lesions, tenderness or abnormalities
Lungs: clear to auscultation
Heart: normal rate, regular rhythm
Abd: exam deferred
Neurological exam reveals Alert and oriented x 3. Speech normal, Muscle tone and strength normal and symmetric, Reflexes normal and symmetric and Sensation grossly normal

Edema: 1+ pitting bilateral
Left Lower:
Left Lower Extremity (LLE)
LLE Calf - Cm w/ Point of Measurement: 29.2 cm

Diagnostics:
LEA Study (9/8/2018): DBIs 0.23/0.23 which were lower than the assessment in in Feb 2018 (DBIs were ~0.4), with diffuse calcification and stenosis of bilateral femoral and tibial arteries and monophasic inflow to foot and ankle bilateral .
LEV Study (2/2/2018) both deep and superficial venous valvular reflux.

PROCEDURE
A preprocedure time out was performed confirming the patient's identity, procedure to be performed, and site. A verbal consent was obtained.
Wound/Ulcer: # 10 / Description: wound bed is covered with black/green necrotic tissue with malodor and excessive drainage. There is ~2cm inflammation at edges.
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue, muscle
Tissue and/or Material Removed: fibrin/slough, ligament, muscle, non-viable, skin, subcutaneous, viable and fascia
Severity: necrosis of muscle
Instruments Used: curette, scissors and forceps
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~24 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements: Improved:
Length 4.6cm X Width 5.2cm X Depth: 0.6cm
Patient tolerated the procedure well.
The wound looked improved after the debridement

ASSESSMENT/PLAN: This is a 94 yo patient with worsening left lower leg ulcers due to: poor wound care, poor nutritional intake and status, difficult living conditions and self care. The ankle ulcer is deep to bone after removing the necrotic tissue. The x-ray of tibia/fibula did not show any sign of bone infection at the wound location.
With the current living situation, lack of care, scarce food intake I am afraid the prognosis of these leg ulcers are poor and they constitute significant risk for life-threatening infection and pain.
I tried to discuss the need for higher level of care for Mrs. Hoffman with the son Lewis. Although available for her he is resistant to allow her to go to a skill nursing care facility. His reasoning is irrational by claiming that they are after her social security money, elderly left alone with poor hygiene, etc in that facility. To my understanding her other son tried to interfere but could not. Lewis says he is also after her money and he is "white supremacist" "a very bad guy". Mrs Hoffman stays quiet to all these claims and pressure to stay in current living situations with Lewis.
At this point I am reporting this case to APS for further investigation and for help to move her to a better care conditions. I also called Dr. Neighbor to report about my visit with Mrs Hoffman. We recommended the below dressings and will try to get HHRN visits form monitoring and dressing changes in between visits.

(L97.323) Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC) (primary encounter diagnosis)
(I83.029, L97.929) Venous ulcer of left leg (HCC)
(I70.442) Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf (HCC)
Jeanne was seen today for new patient consult.

Diagnoses and all orders for this visit:

Non-pressure chronic ulcer of left ankle with necrosis of muscle (HCC)
- XR TIBIA FIBULA 2 VW LEFT; Future

01/10/2019 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

Letters (continued)

Venous ulcer of left leg (HCC)

Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf (HCC)

Other orders

- NURSING COMMUNICATION

Patient Instructions

Left Post Calf, Medial Calf, Medial Ankle:

Cleanse with water and pat dry
Apply Silver Alginate, ABD, Wrap Gauze
Tubi-grip
Change dressing 2 times per week

X-Ray Today

Return in about 1 week (around 1/17/2019) for routine follow-up.

Excluding the time spent performing the procedure, I spent 50 minutes face-to-face with the patient, of which more than 50% was spent counseling and coordinating care regarding adult failure to thrive and suspected elder abuse.

NWH WOUND CARE
DOS:1/10/19 NORSWORTHY, NILUFER*
Enc:1833334267 RES:35455476

I hereby authorize **Dr NILUFER NORSWORTHY, MD** associates or assistants of his/her choice on staff at Northwest Hospital Wound Care Center to provide services for comprehensive wound care management.

Dr NILUFER NORSWORTHY, MD has fully explained to me the nature and purpose of the Northwest Hospital Wound Care Center's approach to wound treatment and healing. I have also been informed of expected benefits and potential complications (from known and unknown causes), as well as, discomforts and risks that may arise. Alternatives to the proposed treatment(s) including no treatment were presented to me. I have been given an opportunity to ask questions, and all my questions have been answered fully and satisfactorily.

I agree to any debridement and any tissue removed may be examined and retained by Northwest Hospital Wound Care Center and its authorized affiliate for medical, scientific or educational purposes and such tissues or parts may be disposed of in accordance with accustomed practice.

I acknowledge that no guarantees or assurances have been made to me concerning the results intended from the wound care and/or other treatment.

I hereby consent that photographs, tape recordings, videotapes and/or movies may be taken of me and/or the named patient by Northwest Hospital Wound Care Center in connection with the medical and other services, which I/the patient am receiving at Northwest Hospital Wound Care Center. I further consent that a history of my/the patient's social and medical problems may be taken by Northwest Hospital Wound Care Center.

I understand that neither myself.the patient nor members of my.the patient's family will be identified by name in connection with any public use of this material.

I grant this consent as a voluntary contribution and I waive any and all rights I/the patient may have to royalties or other compensation in connection with any such use.

I confirm that I have read and fully understand the above and that all blank spaces have been completed prior to my signing. I have crossed out any paragraphs above, which do not pertain to me.

Patient/Relative or Guardian*: X Jeanne Allen

Active at the End of Visit

Pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/20/2017
Start date: 12/20/2017
End date: 9/4/2019
Quantity: 270 tablet
Refill: 3 refills remaining

Timolol Maleate 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/16/2019
Reason for discontinuation: Reorder
Instructions: INSTILL ONE DROP IN EACH EYE TWICE DAILY.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/8/2017
Start date: 12/8/2017
End date: 4/12/2019
Quantity: 5 mL
Refill: No refills remaining

Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Instructions: Take 1 tablet by mouth 2 times a day.
Entered by: Ong, Thuan Duc, MD
Entered on: 6/7/2018
End date: 10/13/2021

Warfarin Sodium 4 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 2/16/2019
Reason for discontinuation: Reorder

01/09/2019 - Office Visit in Husky Health Primary Care Clinic (continued)

Medication List (continued)

Instructions: Take 1 tablet (4 mg) by mouth daily.
Entered by: Neighbor Jr., William E, MD — Entered on: 9/26/2018
Start date: 9/26/2018 — End date: 2/14/2019

Losartan Potassium 25 MG Oral Tab

Discontinued by: Taylor, Zoe Judith Mildred, MD — Discontinued on: 8/20/2019
Reason for discontinuation: Therapy completed/no longer indicated
Instructions: TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY
Entered by: Neighbor Jr., William E, MD — Entered on: 9/26/2018
Start date: 9/26/2018 — End date: 8/20/2019
Quantity: 45 tablet

Atorvastatin Calcium 20 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Entered by: Neighbor Jr., William E, MD — Entered on: 9/26/2018
Start date: 9/26/2018 — End date: 9/4/2019
Quantity: 45 tablet

Acetaminophen-Codeine #3 300-30 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD — Discontinued on: 5/22/2019
Reason for discontinuation: Reorder
Instructions: TAKE ONE TABLET BY MOUTH ONCE DIALY FOR ARTHRITIC PAIN AS NEEDED.
Authorized by: Neighbor Jr., William E, MD — Ordered on: 11/29/2018
Start date: 11/29/2018 — End date: 5/20/2019
Quantity: 60 tablet — Refill: 1 refill remaining

Stopped in Visit

None

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 1/9/2019 1000

Jeanne Leonie Hoffman is a 94 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Lab Test
  INR
- Refill Request
  tylenol 3. can't be refilled until 1/17/19. discuss daily dosage

In for update. Her son Louise brings her in.
Louise is uncertain what meds need refilling at this time. He will let me know.

Awaiting housing decision.
Getting some support from their church on Bainbridge.

Review of Systems:
Louise has not noted any fever, chills sweats in his mother

She is eating
Urination seems to be without problem.

Problem List

Patient Active Problem List

Diagnosis	Date Noted
• Osteoarthritis of lumbar spine [M47.816]	08/30/2013
• Osteoporosis, unspecified [M81.0]	03/04/2008

T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily.
Began fosamax spring 2008. Continued for five years, then stopped

• Long term current use of anticoagulant therapy [Z79.01]	01/08/2008

Reason for anticoagulation: Recurrent dvts
Duration of anticoagulation: life
INR goal: 2.-3 (lower end of this range desired because of age)

• Adult failure to thrive syndrome [R62.7]	10/19/2007

Lives in subsidized housing on Bainbridge
Bremerton APS at 1-888-833-4925
Son Lewis is homeless. Son Douglass Legal Next of Kin not as involved.
Oct 2007 given pre-application for the Seattle Housing Authority's Low Income Public Housing program, with the proviso that there is likely at least a 2 year wait
7/30/2014 stable. Doing well. Son now legally can live with her for support.

• Unspecified vitamin B deficiency [E53.9]	05/01/2007

Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

• Sensorineural hearing loss, unspecified [H90.5]	11/20/2006

Has bilateral hearing aids.
6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

• DVT, recurrent, lower extremity, chronic (HCC) [I82.509]	11/20/2006

Recurrent DVT and phlebitis since 1982
Per Vascular Surgery note 5/9/2006: continue warfarin
3/9/2010 Lower extremity arterial vascular ultrasound studies normal

• Other and unspecified hyperlipidemia [E78.5]	11/20/2006

On lipitor. Tried discontinuing but LDL cholesterol markedly

increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site [M15.9] 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign [I10] 11/20/2006
- Unspecified glaucoma(365.9) [H40.9] 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility [Z00.00] 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.
  Tobacco: no
  Alcohol: no
  Drugs: no
  Sexual practice/contraception: Not active
  Advanced directives: Yes/ 9/21/2016 POLST forms signed.
  Scanned to record.
  Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
  Advise Vit D 800 IU daily.

- Housing lack [Z59.0] 09/26/2018
- Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf (HCC) [I70.442] 09/24/2018
- Diabetic ulcer of lower extremity (HCC) [E11.622, L97.909] 09/24/2018
- Vitamin D deficiency [E55.9] 07/09/2018
- Venous ulcer of left leg (HCC) [I83.029, L97.929] 06/07/2018
- Homeless [Z59.0] 06/07/2018
- Normocytic anemia [D64.9] 06/07/2018
- Severe protein-calorie malnutrition (HCC) [E43] 06/07/2018
- Urge urinary incontinence [N39.41] 06/07/2018
- Cellulitis of left leg [L03.116] 05/31/2018
- Non-pressure chronic ulcer of left ankle with fat layer exposed (HCC) [L97.322] 05/17/2018
- Non-pressure chronic ulcer of left calf with fat layer exposed (HCC) [L97.222] 05/17/2018
- Chronic venous hypertension with ulcer and inflammation, left (HCC) [I87.332, L97.929] 05/17/2018
- Primary osteoarthritis of both hips [M16.0] 02/01/2017
- Thrombocytopenia (HCC) [D69.6] 11/02/2016

01/09/2019 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

- Imbalance [R26.89] 11/02/2016
- History of recurrent deep vein thrombosis (DVT) [Z86.718] 06/02/2016
- Other physical therapy [IMO0001] 01/22/2015
- Hip joint stiffness [M25.659] 01/06/2015
- Leg weakness, bilateral [R29.898] 01/06/2015
- Weakness of trunk musculature [M62.81] 01/06/2015
- Pseudophakia, both eyes [Z96.1] 11/08/2014
- Urine incontinence [R32] 08/27/2014
  Uses pads

- Type 2 diabetes mellitus without complication (HCC) [E11.9] 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

Outpatient Prescriptions Marked as Taking for the 1/9/19 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• Acetaminophen-Codeine #3 300-30 MG Oral Tab	TAKE ONE TABLET BY MOUTH ONCE DIALY FOR ARTHRITIC PAIN AS NEEDED.	60 tablet	1
• Atorvastatin Calcium 20 MG Oral Tab	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	45 tablet	3
• Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab	Take 1 tablet by mouth 2 times a day.		
• Losartan Potassium 25 MG Oral Tab	TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY	45 tablet	2
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	3
• Timolol Maleate 0.5 % Ophthalmic Solution	INSTILL ONE DROP IN EACH EYE TWICE DAILY.	5 mL	0
• Warfarin Sodium 4 MG Oral Tab	Take 1 tablet (4 mg) by mouth daily.		

Social history:

History

• Sexual activity:	No

Social History

Substance Use Topics

- Smoking status: Never Smoker
- Smokeless tobacco: Never Used
- Alcohol use No

Objective:

BP 134/70 | Pulse 67
Estimated body mass index is 20.49 kg/m² as calculated from the following:
Height as of 6/19/18: 5' 2" (1.575 m).
Weight as of 10/8/18: 50.8 kg (112 lb).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
134/70	67	---	---	---	10:08 AM	1/9/2019

Wt Readings from Last 8 Encounters:

01/31/19	46.3 kg (102 lb)
10/08/18	50.8 kg (112 lb)
09/26/18	51.1 kg (112 lb 9.6 oz)
09/24/18	51.3 kg (113 lb)
08/14/18	53.2 kg (117 lb 4 oz)
07/25/18	52.1 kg (114 lb 12 oz)
07/06/18	50.2 kg (110 lb 12 oz)
06/22/18	50.5 kg (111 lb 6 oz)

Last blood pressure recorded in this encounter: 134/70
Jeanne is without hearing aid today which makes communication difficult

Lab and other tests: pending

Assessment and Plan:

(Z79.01) Long term current use of anticoagulant therapy (primary encounter diagnosis)
It is unclear if she has been taking anticogulation. INR ordered.

(H90.5) Sensorineural hearing loss, unspecified
She is wearing her hearing aids. Seems to function satisfactorily when worn.

(I10) Essential hypertension, benign
Blood pressure well controlled and not overly controlled. Due for labs
Plan: CBC with Differential, Comprehensive Metabolic
Panel, Hemoglobin A1c

(Z59.0) Housing lack
In with son. Still living in tent. Awaiting housing decision. Support is coming from local church this winter. APS has been involved in the past.

(E55.9) Vitamin D deficiency
Due for recheck.
Also check Vitamin B12
Plan: Vitamin D (25 Hydroxy)

(E11.9) Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)
Due for A1c. Has been controlled in the past

(E53.9) Unspecified vitamin B deficiency
Due for vitamin b12

(R63.4) Weight loss
She has lost about 10 lbs since she was last seen.
Need to increase caloric intake. Would like her to see nutritionist but main issue is to resolve housing issue.

Office Visit on 01/09/19

Vitamin D (25 Hydroxy) (Final result)

Electronically signed by: **Neighbor Jr., William E, MD on 01/09/19 1057** Status: **Completed**
Ordering user: Neighbor Jr., William E, MD 01/09/19 1057 Authorized by: Neighbor Jr., William E, MD
Ordering mode: Standard
Frequency: Routine 01/09/19 - Class: Normal
Quantity: 1 Lab status: Final result
Diagnoses
Vitamin D deficiency [E55.9]
Scheduling instructions
Vitamin D (25-Hydroxy) is not covered with routine preventative visits. It is only indicated and covered with the following diagnoses: osteoporosis, hypocalcemia or hypercalcemia, chronic kidney disease stage III or greater, hypercalcuria, hyper viataminosis D, parathyroid disorders, malabsorption states, obstructive jaundice, osteomalacia, rickets, and vitamin D deficiency related to the above diagnoses. Medicare patients who do not have an above condition but desire testing must sign an ABN and agree to pay.

AFTER VISIT SUMMARY

Jeanne L. Hoffman MRN: U8170135 1/9/2019 10:00 AM Hall Health Primary Care Center 206-685-1011

Today's Visit

You saw William E Neighbor, MD on Wednesday January 9, 2019. The following issues were addressed:

- Long term current use of anticoagulant therapy
- Sensorineural hearing loss, unspecified
- Essential hypertension, benign
- Housing lack
- Vitamin D deficiency
- Homeless
- Type 2 diabetes mellitus without complication, without long-term current use of insulin
- Unspecified vitamin B deficiency
- Weight loss

Blood Pressure	Pulse
134/70	67

Done Today

Prothrombin Time for Long term current use of anticoagulant therapy
CBC with Differential for Essential hypertension, benign; Housing lack
Comprehensive Metabolic Panel for Essential hypertension, benign; Housing lack
Hemoglobin A1c for Essential hypertension, benign; Housing lack
Vitamin D (25 Hydroxy) for Vitamin D deficiency
FOLATE & VITAMIN B12 for Housing lack

HIPAA PERMITS DISCLOSURE OF POLST TO OTHER HEALTH CARE PROVIDERS AS NECESSARY

Physician Orders for Life-Sustaining Treatment (POLST)

Last Name - First Name - Middle Name or Initial

Date of Birth Last 4 #SSN (optional)

FIRST follow these orders, **THEN** contact physician, nurse practitioner or PA-C. The POLST is a set of medical orders intended to guide medical treatment based on a person's current medical condition and goals. Any section not completed implies full treatment for that section. Completing a POLST form is always voluntary. Everyone shall be treated with dignity and respect.

Medical Conditions/Patient Goals:

Agency Info/Sticker

A Check One

CARDIOPULMONARY RESUSCITATION (CPR): Person has no pulse and is not breathing.

☐ **Attempt Resuscitation/CPR** When not in cardiopulmonary arrest, go to part B.

☑ **Do Not Attempt Resuscitation/DNAR (Allow Natural Death)**
Choosing DNAR will include appropriate comfort measures.

B Check One

MEDICAL INTERVENTIONS: Person has pulse and/or is breathing.

☐ **FULL TREATMENT - primary goal of prolonging life by all medically effective means.**
Includes care described below. Use intubation, advanced airway interventions, mechanical ventilation and cardioversion as indicated. **Transfer** *to hospital if indicated. Includes intensive care.*

☐ **SELECTIVE TREATMENT - goal of treating medical conditions while avoiding burdensome measures.**
Includes care described below. Use medical treatment, IV fluids and cardiac monitor as indicated. Do not intubate. May use less invasive airway support (e.g. CPAP, BiPAP). **Transfer** *to hospital if indicated. Avoid intensive care if possible.*

☑ **COMFORT-FOCUSED TREATMENT - primary goal of maximizing comfort.**
Relieve pain and suffering with medication by any route as needed. Use oxygen, oral suction and manual treatment of airway obstruction as needed for comfort. **Patient prefers no hospital transfer:** *EMS consider contacting medical control to determine if transport is indicated to provide adequate comfort.*

Additional Orders: (e.g. dialysis, etc.) _____

C **SIGNATURES:** The signatures below verify that these orders are consistent with the patient's medical condition, known preferences and best known information. If signed by a surrogate, the patient must be decisionally incapacitated and the person signing is the legal surrogate.

Discussed with:
☐ Patient ☐ Parent of Minor
☐ Guardian with Health Care Authority
☐ Spouse/Other as authorized by RCW 7.70.065
☐ Health Care Agent (DPOAHC)

PRINT — Physician/ARNP/PA-C Name: Dawkins, M. | Phone Number

X Physician/ARNP/PA-C Signature *(mandatory)* | Date *(mandatory)*: 10/26

PRINT — Patient or Legal Surrogate Name | Phone Number

X Patient or Legal Surrogate Signature *(mandatory)*: Jeanne L Hoffman | Date *(mandatory)*

Person has: ☐ Health Care Directive (living will) ☐ Durable Power of Attorney for Health Care

Encourage all advance care planning documents to accompany POLST

SEND ORIGINAL FORM WITH PERSON WHENEVER TRANSFERRED OR DISCHARGED

Revised 8/2017

Photocopies and faxes of signed POLST forms are legal and valid. May make copies for records.
For more information on POLST visit www.wsma.org/polst.

Patient Name (last, first, middle)	Date of Birth	Phone Number
Name of Guardian, Surrogate or other Contact Person	Relationship	Phone Number

D NON-EMERGENCY MEDICAL TREATMENT PREFERENCES

ANTIBIOTICS:

- [x] Use antibiotics for prolongation of life.
- [ ] Do not use antibiotics except when needed for symptom management.

MEDICALLY ASSISTED NUTRITION:
Always offer food and liquids by mouth if feasible.

- [x] No medically assisted nutrition by tube.
- [ ] Trial period of medically assisted nutrition by tube. (Goal: _____)
- [ ] Long-term medically assisted nutrition by tube.

ADDITIONAL ORDERS: (e.g. dialysis, blood products, implanted cardiac devices, etc. Attach additional orders if necessary.)

X Physician/ARNP/PA-C Signature	Date 31 Oct 18
X Patient or Legal Surrogate Signature Jeanne L Hoffman	Date

DIRECTIONS FOR HEALTH CARE PROFESSIONALS

NOTE: A person with capacity may always consent to or refuse medical care or interventions, regardless of information represented on any document, including this one.

Completing POLST

- Completing a POLST form is always voluntary.
- Treatment choices documented on this form should be the result of shared decision-making by an individual or their surrogate and medical provider based on the person's preferences and medical condition.
- POLST must be signed by a physician/ARNP/PA-C and patient, or their surrogate, to be valid. Verbal orders are acceptable with follow-up signature by physician/ARNP/PA-C in accordance with facility/community policy.

Using POLST

Any incomplete section of POLST implies full treatment for that section.

This POLST is valid in all care settings including hospitals until replaced by new physician's orders.

The POLST is a set of medical orders. The most recent POLST replaces all previous orders.

The POLST does not replace an advance directive. An advance directive is encouraged for all competent adults regardless of their health status. An advance directive allows a person to document in detail his/her future health care instructions and/or name a surrogate decision maker to speak on his/her behalf. When available, all documents should be reviewed to ensure consistency, and the forms updated appropriately to resolve any conflicts.

SECTIONS A AND B:

- No defibrillator should be used on a person who has chosen "Do Not Attempt Resuscitation."
- When comfort cannot be achieved in the current setting, the person should be transferred to a setting able to provide comfort (e.g., treatment of a hip fracture).
- An IV medication to enhance comfort may be appropriate for a person who has chosen "Comfort-Focused Treatment."
- Treatment of dehydration is a measure which may prolong life. A person who desires IV fluids should indicate "Selective" or "Full Treatment."

SECTION D:

- Oral fluids and nutrition must always be offered if medically feasible.

Reviewing POLST

This POLST should be reviewed periodically whenever:
(1) The person is transferred from one care setting or care level to another, or
(2) There is a substantial change in the person's health status, or
(3) The person's treatment preferences change.

To void this form, draw line through "Physician Orders" and write "VOID" in large letters. Any changes require a new POLST.

Review of this POLST Form

Swedish Hospital Medicine Discharge Summary

Patient: Mark Allan Horn **Date of Birth: 1/28/1960**

Admission Date: 10/22/2018 **Discharge Date**: 10/29/2018

Primary Care Provider: Magnuson, Chad R, MD

Consultations:
GI

Principal Diagnosis:
Fall
Nausea, vomiting and epigastric pain

Secondary Diagnoses:
Hematemesis likely due to Mallory Weise tear
Acute encephaopathy
HTN
Constipation
QT prolongation
Tobacco use
Chronic incomplete quadriplegia 2/2 neck epidural abscess in 2011
IV drug abuse on chronic methadone treatment
Anxiety
{QM_MCC&CC:14839}

Body mass index is 26.34 kg/m².

Outpatient Followup Issues (including pending test results):
- f/u biopsy results(stomac and duodenal) and H.pylori.

Brief Reason for Admission:
Per HPI,
Mark Allan Horn is a 58 y.o. man with COPD, chronic opiates on methadone, benzo dependence, neurogenic bladder, UTIs, and chronic incomplete quadriplegia secondary to cervical epidural abscess in 2011 just admitted overnight for fevers, n/v, leukocytosis, and small volume

11/26/2018 - Abstract in Hall Health Health Data Service (continued)

Documents (continued)

hematemesis on 10/21. On admission he received IVF, IV PPI, and was able to keep down liquids without further vomiting. He declined further w/u for possible infection, declined repeat CBC, blood cultures. He was noted to have negative u/a, CXR, and respiratory viral panel, with CT abd/pelvis without e/o cause of infection He wanted to return home and was discharged via HopeLink with PCP f/u.

Returns to ED about 4 hours after discharge after falling out of his wheelchair around 2130, unclear if LOC. Pt isn't sure what happened. He thinks he was having another fever with worsening of his baseline tremor (comes/goes but is normal for him) and fell out of his chair. He thinks he hit the front of his head on something with some mild pain there, and has some new pain in his neck after fall with h/o C2-C5 fusion. No new weakness in arms/legs. States that since leaving the hospital took 2 zofran for persistent nausea, no further hematemesis, has some mild diffuse abdominal pain that he attributes to not eating in 3 days. Also notes a bit of worsening dry cough. No sore throat, body aches, new low back pain. He denies pressure sores on his backside or increased spasticity. Here is afebrile, BP initially 200/90 on repeat 160-170/90's, HR 100's. WBC 17.8 with elevated polys, CRP 3.6, procal and lactate wnl, urine dip without LE or nitrite, CT C spine non con negative for malalignment or fracture. Received morphine.

Hospital Course:

 # Nausea, vomiting and epigastric pain
 # Hematemesis likely due to Mallory Weise tear
Pt continued to have intermittent nausea and vomiting with small amount of hematemesis with stable Hb and VS. He developed epigastric pain on 10/26, which was once improved with supportive care, but recurred again with increased severity. Pt was unable to tolerate po intake. Pt underwent EGD 10/29 which showed MWT with no signs of active bleeding at GE junction, streaky antral etyrhema s/p biopsy and severe patch duodenal bulb erosions and erythema s/p biopsy. ***

 # Fall 10/22
pt explained that he was trying to reach out a cell phone charger or a cord and fell forward. Hit forehead. Denied prodrome. CT cerbical spine unremarkable. PT/OT recommend SNF.

 # Confusion after fall
Pt reported visual change and difficult talking. Pt was unable to follow instruction to keep arm straight to keep PIV patent. Head CT w/o contrast 10/23 negative for acute change. Seems now back to baseline.

 # HTN
BP up 200/98 on admission, could have some autonomic dysreflexia with h/o quadreparesis? Not on home BP meds. BP got better after starting BP meds.

 # Constipation: last bm 10/28. Pt is on methadone. Started on scheduled miralax and senna. Monitor. Adjust laxative dose prn.

Goals of Care: ***

Discharge Summaries signed by Sharda, Rohit, MD at 10/29/18 1117 Version 1 of 1

Author: Sharda, Rohit, MD | Service: (none) | Author Type: Physician
Filed: 10/29/18 1117 | Date of Service: 10/29/18 1117 | Status: Signed
Editor: Sharda, Rohit, MD (Physician)

First Hill - Swedish Endoscopy Center

Patient Name: Mark Allan Horn Procedure Date: 10/29/2018 10:24 AM
MRN: 1000772909 Date of Birth: 1/28/1960
Note Status: Finalized Attending MD: ROHIT SHARDA , MD

Procedure Type: Upper GI endoscopy
Indications: Suspected upper gastrointestinal bleeding
Impression:
- M-W tear with no signs of active bleeding at GE junction.
- Streaky antral erythema. Biopsies taken from antrum and body to check for H. Pylori.
- Severe, patchy duodenal bulb erosions and erythema. Biopsied.
- Distal duodenum normal.

Recommendation:
- Source of bleeding likely M-W tear.
- F/u pathology.
- Continue po PPI qam for 4 weeks.
- Advance diet as tolerated.

11/26/2018 - Abstract in Hall Health Health Data Service (continued)

Documents (continued)

- Minimize retching.
- No NSAIDs.
- Return patient to hospital ward for ongoing care.

Findings:
A medium non-bleeding Mallory-Weiss tear with no stigmata of recent bleeding was found.
Striped moderately erythematous mucosa without bleeding was found in the gastric antrum.
Patchy severely erythematous mucosa without active bleeding and with no stigmata of bleeding was found in the duodenal bulb. Biopsies were taken with a cold forceps for histology.

Medicines: See the Anesthesia note for documentation of the administered medications
Complications: No immediate complications.
Estimated Blood Loss:
Estimated blood loss: none.
Procedure:
Pre-Anesthesia Assessment:
- Prior to the procedure, a History and Physical was performed, and patient medications, allergies and sensitivities were reviewed. The patient's tolerance of previous anesthesia was reviewed.
- The risks and benefits of the procedure and the sedation options and risks were discussed with the patient. All questions were answered and informed consent was obtained.
- Patient identification and proposed procedure were verified prior to the procedure by the physician. The procedure was verified in the endoscopy suite.
- Pre-procedure physical examination revealed no contraindications to sedation.
- ASA Grade Assessment: II - A patient with mild systemic disease.
- Immediately prior to administration of medications, the patient was re-assessed for adequacy to receive sedatives.
- Sedation was administered by an anesthesia professional. Deep sedation was attained.
- Prior Anticoagulants: The patient has taken no previous anticoagulant or antiplatelet agents.
After obtaining informed consent, the endoscope was passed under direct vision. Throughout the procedure, the patient's blood pressure, pulse, and oxygen saturations were monitored continuously. The Endoscope was introduced through the mouth, and advanced to the fourth part of duodenum. The upper GI endoscopy was accomplished without difficulty. The patient tolerated the procedure well.

CC: Altered mental status

HPI: 93 yo female admitted to Harrison Hospital on 10/19 with a change in mental status, found to have a LLE cellulitis and dehydration. She was treated with IVF and abx, and her mental status and condition improved. Her urinary tox screen was + for opioids on admission, and the patient was evidently taking Tyl # 3's. She was also found to have malnutrition and a BMI of 17.8, and started on supplements in addition to a pureed diet with thin liquids per the ST recommendation in the hospital.
She is currently living in a tent with her son.
Patient denies chest pain, shortness of breath, nausea, vomiting, diarrhea, light headedness, fever/chills, general malaise, rash.

For further details, refer to the Hospital D/C summary and H & P, Progress notes.

PAST MEDICAL HISTORY:
Type 2 DM "diet controlled"
CAD
HLD
HTN
PVD
Chronic anticoagulation
Chronic venous stasis disease LE's
LLE ulcerations
Anemia unspecified
Hx R ankle fx s/p MVA
Atrial fibrillation
DVT/PE

PAST SURGICAL HISTORY:
R ankle ORIF

SOCIAL HISTORY
Homeless, living in a "luxury" tent on Bainbridge. Has a two sons, on son is estranged (possibly has protection order on this son—stated "he's not supposed to see us for 2 years").

FAMILY HISTORY
+ for blood clotting "on my mother's side"

ALLERGIES: ASA/ PCN/ Sulfa/ Nitrofurantoin

REVIEW OF SYSTEMS: 14 point ROS performed and negative apart from that noted in HPI, A/P and PE.

PHYSICAL EXAM:
Vitals reviewed and stable
CON: NAD

Labs/xray results, follow up: none

Medications: per discharge medication list

Risk for re-admission to hospital: Moderate
Complexity: Moderate

I personally spent over 45 minutes managing this patient's discharge. This included, but not limited to, final examination of the patient, face-to-face discharge instructions and discussion of facility stay, medication review, coordination of continuation of care, and documentation of discharge.

Note Text: Disposition goal is home with son which at this time is what son calls it a Hobbit House which is a tent set-up like an apartment unit. They are waiting to move into a unit in an apartment building which may be available late December 2018 or early January 2019. Given the current Medicaid payor situation where both resident's and the son's income is needed to secure the apartment when it comes available discharge may occur on 11-12-2018 when son comes to visit again. They are getting the tent ready tomorrow, which was planned even prior to Medicaid payor situation. Unfortunately, resident had only 2 days of skilled Medicare days left from her last spell of illness as she did not have the 60-day break between spell of illness. Son is able to manage the wound care for resident.

Occupational Therapy
OT Discharge Summary

Provider: Keiro Northwest
NPI: 1356339667

Dates of Service: 10/29/2018 - 11/9/2018
Occupational Therapy

Identification Information

Patient: HOFFMAN, JEANNE L **DOB:** 1/6/1925
Payer: Medicare Part B
MRN: 4374

D/C Destination: Home
D/C Reason: Discharged per Physician or Case Manager

Patient was seen for 1 day(s) during the 11/9/2018-11/9/2018 progress period.

Skilled Service	11/09
97530 - Therapeutic activitl	18

Objective Progress/Functional Comparison with Goals

Short-Term Goals

STG #1.0 - Met on 11/08/2018

Patient will safely donn/doff slacks with Modified Independence for safety awareness to facilitate increased participation with functional daily living activities.

	Baseline (10/29/2018)	Previous (11/8/2018)	Discharge (11/9/2018)
Slacks / Skirt	MinA - 25% hands on assist required	Modified Independent - 0% Assist but uses AD or requires increased time to perform majority of task; no cues or supervision needed	Met on 11/08/2018

Comments:

STG #2.0 - Met on 11/08/2018

Pt will be mod I for managing socks over distal LEs with use of AE

	Baseline (10/29/2018)	Previous (11/8/2018)	Discharge (11/9/2018)
	dependent		Met on 11/08/2018

Comments:

STG #3.0 - Met on 11/09/2018

Patient will perform functional mobility during ADLs using least restrictive AD with Modified Independence in order to be able to return to prior level of living.

	Baseline (10/29/2018)	Previous (11/8/2018)	Discharge (11/9/2018)
Functional Mobility During ADLs	CGA - hands on assist required; 1 or more cues for majority of task	Supervision: performs majority of task & set up, w/therapist in room/area available for cueing as requested by patient; no physical assist required	Modified Independent - 0% Assist but uses AD or requires increased time to perform majority of task; no cues or supervision needed

Comments:

STG #4.0 - Met on 11/09/2018

Pt will demonstrate understanding of energy conservation techniques with use of hand out.

	Baseline (10/29/2018)	Previous (11/8/2018)	Discharge (11/9/2018)
	no training at this time	fair understanding.	Pt demonstrates ability to initiate rest breaks with 4WW as needed.

MRN: 4374

D/C Destination: Home
D/C Reason: Discharged per Physician or Case Manager

STG #5.0 - Discontinue on 11/09/2018

Pt will demonstrate ability to complete safe floor transfers with mod I in order to safely return to prior environment where pt's bed was on the ground level.

	Baseline (11/8/2018)	Previous (11/8/2018)	Discharge (11/9/2018)
	not yet assessed	not yet assessed	Unable to assess prior to d/c

Comments:

Long-Term Goals

LTG #1.0 - Met on 11/09/2018

Patient will safely perform ADLs, IADLs and functional mobility during daily living tasks with Modified Independence and safe functional mobility using AE and/or AD as needed/trained.

	Baseline (10/29/2018)	Previous (10/29/2018)	Discharge (11/9/2018)
LOA	Min (A)	Min (A)	Mi

Comments:

Summary Since Last Progress Report

Skill Pt and Caregiver Training: Instructed patient and primary caregivers in use of adaptive equipment and safe transfer techniques in order to facilitate improved functional abilities with carryover demonstrated 75% of therapeutic opportunities, requiring the need for further instruction for implementation of instructions/techniques.

Patient Response Progress & Response to Tx: Patient has met LT/ST goals.

Discharge Status and Recommendations

Location DC Location = Patient discharged to home w/support/(A) from others.

Prognosis Prognosis to Maintain CLOF = Excellent

Functional Outcomes Hygiene / Grooming = Modified Independent - 0% Assist but uses AD or requires increased time to perform majority of task; no cues or supervision needed; Bathing = Modified Independent - 0% Assist but uses AD or requires increased time to perform majority of task; no cues or supervision needed; Toileting = Modified Independent - 0% Assist but uses AD or requires increased time to perform majority of task; no cues or supervision needed; UB Dressing = Modified Independent - 0% Assist but uses AD or requires increased time to perform majority of task; no cues or supervision needed; LB Dressing = Modified Independent - 0% Assist but uses AD or requires increased time to perform majority of task; no cues or supervision needed; Functional Mobility During ADLs = Modified Independent - 0% Assist but uses AD or requires increased time to perform majority of task; no cues or supervision needed; Problem Solving = Supervision

Follow-Up Recs: home health services.

Supervision/Assist: CG assist with IADLs.

Recommended Adaptive Equipment = Grab bars

Exercise Program: handouts provided and educated family/caregivers on exercise program to follow at discharge.

Objective Tests/Measures

Tests/Measures Was SLUMS Administered? = No

Clinical Reason = Other (unplanned d/c; no d/c visit completed)

Was Grip Test Administered? = No

Clinical Reason = Other (unplanned d/c; no d/c visit completed)

Was Self Efficacy with Daily Activities Admin? = No

Clinical Reason = Other (unplanned d/c; no d/c visit completed)

Active at the End of Visit

Pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/20/2017
Start date: 12/20/2017
End date: 9/4/2019
Quantity: 270 tablet
Refill: 3 refills remaining

Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 11/29/2018
Reason for discontinuation: Reorder
Instructions: one po once daily for arthritic pain as needed
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/20/2017
Start date: 12/20/2017
End date: 11/28/2018
Action: Patient taking differently
Quantity: 60 tablet
Refill: 2 refills remaining

Timolol Maleate 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/16/2019
Reason for discontinuation: Reorder
Instructions: INSTILL ONE DROP IN EACH EYE TWICE DAILY.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/8/2017
Start date: 12/8/2017
End date: 4/12/2019
Quantity: 5 mL
Refill: No refills remaining

Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Instructions: Take 1 tablet by mouth 2 times a day.
Entered by: Ong, Thuan Duc, MD
Entered on: 6/7/2018
End date: 10/13/2021

Progress Notes

Collins V, Marta, RN at 10/17/2018 1400

Assisted pt to the BR, she is a two person transfer in the bathroom due to limited mobility and WC access. Was able to get a sample but it wasn't possible to get a CC mid-stream sample due to pts immobility.
Pt came in with a walker but the trip was so exhausting she was no longer able to weight bear at the time she was to be discharged. Assisted in obtaining a cab voucher for pt and her son to get the ferry w/o taking any busses, OK'd by Dr Neighbor. We accompanied her to a taxi and assisted with the transfer to the cab.

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 10/17/2018 1200

Jeanne Leonie Hoffman is a 93 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Hip Pain

History:

Jeanne came in with her son today for lab INR and UA as ordered yesterday. She took one dose of nitrofurantoin yesterday and one this morning for urinary tract infection symptoms similar to what she experienced in 2016. Her son brought her in for UA without scheduled visit.

While sitting in chair in waiting room, Jeanne developed right thigh and hip pain was was excruciating. She had had no fall.

Soc hx:
She and her son are still living in a tent on Bainbridge.

Review of Systems:
No fever, chills, sweats. No nausea or vomiting.

Medications
No outpatient prescriptions have been marked as taking for the 10/17/18 encounter (Office Visit) with Neighbor Jr., William E, MD.

Current Facility-Administered Medications for the 10/17/18 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Dose	Route	Frequency	Provider	Last Rate	Last Dose
• acetaminophen 325 mg tablet	650 mg	Oral	Once	Neighbor Jr., William E, MD		

Objective:
There were no vitals taken for this visit.
Estimated body mass index is 20.49 kg/m² as calculated from the following:
Height as of 6/19/18: 5' 2" (1.575 m).
Weight as of 10/8/18: 50.8 kg (112 lb).
Extended Vitals not filed for this encounter.
Last blood pressure recorded in this encounter:
General: Distress due to right hip and thigh pain
Exam showed spasm of the anterolateral thigh muscles that was eventually relieve by warm compresses and acetaminophen.
After relieve of pain she was able to ambulate as normal for her with walker. Int and ext rotation of hip without pain.

Lab and other tests: INR pending. Blood was drawn before I saw her.

Orders Only on 10/17/18
1. Urinalysis with Reflex Culture

Result	Value	Ref Range
Color, URN	Yellow	
Clarity, URN	Cloudy	
Specific Gravity, URN	1.013	1.002 - 1.027 g/mL

Epith Cells_Renal/Trans,URN	<3(NEG)	LESS3 /[HPF]
Comments For Microscopic, URN	None	NONE

10/17/2018 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

Mucus, URN	Present (A)	NOSEEN /[LPF]
1st Extra Urine Gray Top	Additional collection tube	

Culture pending.

Assessment and Plan:
(M25.551) Pain of right hip joint (primary encounter diagnosis)
Due to acute spasm without hx to suggest fracture and with return to normal ambulation.
Expect continued resolution. She did have a similar episode one to two years ago for which she was seen here.

(N30.00) Acute cystitis without hematuria
UA cw acute UTI. Culture pending. She has taken two doses of nitrofurantoin prior to the UA today and culture. Her son understands that should she worsen she is to go to local ER. Goal is to assure no resistant organism given recent hospital stays though the last was one month ago for wound care.

Other: Continues follow up at NW wound care for left lower leg ulcers.
Placement continues to be an issue as she refuses to live anywhere without her son.
INR pending.

Pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/20/2017
Start date: 12/20/2017
End date: 9/4/2019
Quantity: 270 tablet
Refill: 3 refills remaining

Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 11/29/2018
Reason for discontinuation: Reorder
Instructions: one po once daily for arthritic pain as needed
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/20/2017
Start date: 12/20/2017
End date: 11/28/2018
Action: Patient taking differently
Quantity: 60 tablet
Refill: 2 refills remaining

Timolol Maleate 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/16/2019
Reason for discontinuation: Reorder
Instructions: INSTILL ONE DROP IN EACH EYE TWICE DAILY.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/8/2017
Start date: 12/8/2017
End date: 4/12/2019
Quantity: 5 mL
Refill: No refills remaining

Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Instructions: Take 1 tablet by mouth 2 times a day.
Entered by: Ong, Thuan Duc, MD
Entered on: 6/7/2018
End date: 10/13/2021

Warfarin Sodium 4 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 2/16/2019
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (4 mg) by mouth daily.
Entered by: Neighbor Jr., William E, MD
Entered on: 9/26/2018
Start date: 9/26/2018
End date: 2/14/2019

Losartan Potassium 25 MG Oral Tab

Discontinued by: Taylor, Zoe Judith Mildred, MD
Discontinued on: 8/20/2019
Reason for discontinuation: Therapy completed/no longer indicated
Instructions: TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY
Entered by: Neighbor Jr., William E, MD
Entered on: 9/26/2018
Start date: 9/26/2018
End date: 8/20/2019
Quantity: 45 tablet

Clinical Notes

Telephone Encounter

Mohova, Elena, CMA at 10/16/2018 1511

Pt's son call today in behalf of Jeanne stating that she got a bladder infection. He said that they are planning to come to Hall Health tomorrow (Wed, 10/17) morning to get a urinalysis lab test for Jeanne. He also asked for the medication for bladder infection (the one that she usually takes for this) to be sent to Safeway pharmacy at Bainbridge Island. Please advise if pt needs to see you before getting her lab test.

Electronically signed by Mohova, Elena, CMA at 10/16/2018 3:21 PM

Neighbor Jr., William E, MD at 10/16/2018 1538

Called her son.
She has had mild symptoms without fever or chills.
Sent prescription for nitrofurantoin to which she responded in Aug 2016.
If they do come in, I have ordered a UA with reflex culture.

prescription for bladder infection

From	To	Sent and Delivered
William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	10/16/2018 3:34 PM

Last Read in MyChart
Not Read

Jeanne:
I understand you are having some burning with urination or other changes indicating a bladder infection. You last were treated in Aug 2016 at which time the culture showed that all antibiotics would work. You were treated with nitrofurantoin (Macrobid) twice daily for 5-7 days. I wrote the same prescription today and sent it to your Safeway pharmacy.

You can come in tomorrow for a urinalysis, but as long as you are not having fever or chills and otherwise feeling well, I do not think that is essential. However, if you choose to come in I have ordered a urine test with culture.

William E Neighbor, MD

Clinical Notes

Progress Notes

McKisson, Kimberly A, RN at 10/8/2018 1015

Wounds are stable today. There is some new skin formed. Dressings were soaked today. Increase dressing changes to 3 times per week. Slough was debrided today.

Wound Care for:
Left Lateral Calf
Left Medial Ankle
Left Post Calf

Cleanse wounds with water and pat dry
Apply Silver Alginate, ABD Pad, Wrap gauze,
And tape to secure
Change dressing 3 x per week
Apply Zinc Oxide to excoriated skin
Tubi-Grip Daily

Elevate leg as much as possible

10/08/2018 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

Clinical Notes (continued)

Try to eat high calorie, high protein food sources
Supplementation with Boost between meals
Please don't use pools and/or public water facilities
Showers are fine

PROCEDURE
Wound/Ulcer: # 5 / Description: the wound has excessive dark gray bioburden at bed and abnormal edges.
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue
Tissue and/or Material Removed: fibrin/slough, non-viable, skin, subcutaneous and viable
Severity: fat layer exposed
Instruments Used: curette
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~18 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements: Improved: Length 6cm X Width 3cm X Depth: 0.3cm
Patient tolerated the procedure well.
The wound looked improved after the debridement

ASSESSMENT/PLAN: The wounds which are effected by limb ischemia as well as venous hypertension and varicose veins with edema are actually improving well with current management. She continues to be pretty active. Drainage is large which I suspect due to be on her feet too long during day time. We will increase dressing change frequency.
(L97.322) Non-pressure chronic ulcer of left ankle with fat layer exposed (primary encounter diagnosis)
(L97.222) Non-pressure chronic ulcer of left calf with fat layer exposed
(I87.332, L97.929) Chronic venous hypertension with ulcer and inflammation, left
(I70.442) Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf

10/08/2018 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

PROCEDURE
Wound/Ulcer: # 5 / Description: the wound has excessive dark gray bioburden at bed and abnormal edges.
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate

10/08/2018 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

Letters (continued)

Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue
Tissue and/or Material Removed: fibrin/slough, non-viable, skin, subcutaneous and viable
Severity: fat layer exposed
Instruments Used: curette
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~18 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements: Improved:
Length 6cm X Width 3cm X Depth: 0.3cm
Patient tolerated the procedure well.
The wound looked improved after the debridement

ASSESSMENT/PLAN: The wounds which are effected by limb ischemia as well as venous hypertension and varicose veins with edema are actually improving well with current management. She continues to be pretty active. Drainage is large which I suspect due to be on her feet too long during day time. We will increase dressing change frequency.
(L97.322) Non-pressure chronic ulcer of left ankle with fat layer exposed (primary encounter diagnosis)
(L97.222) Non-pressure chronic ulcer of left calf with fat layer exposed
(I87.332, L97.929) Chronic venous hypertension with ulcer and inflammation, left
(I70.442) Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf
Jeanne was seen today for wound care.

Diagnoses and all orders for this visit:

Non-pressure chronic ulcer of left ankle with fat layer exposed
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<

Non-pressure chronic ulcer of left calf with fat layer exposed
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<

Chronic venous hypertension with ulcer and inflammation, left
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<

Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<

Patient Instructions
Wound Care for:
Left Lateral Calf

10/08/2018 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

Letters (continued)

Left Medial Ankle
Left Post Calf

Cleanse wounds with water and pat dry
Apply Silver Alginate, ABD Pad, Wrap gauze,
And tape to secure
Change primary dressing 2 x per week, and exterior dressing 3 x per week
Apply Zinc Oxide to excoriated skin
Tubi-Grip Daily

Elevate leg as much as possible

Try to eat high calorie, high protein food sources
Supplementation with Boost between meals
Please don't use pools and/or public water facilities
Showers are fine

Sound Health Silver Alginate

Return in about 2 weeks (around 10/22/2018) for routine follow-up.

Total time of 25 minutes was spent face to face with the patient, of which >50% was spent counseling and coordinating the patient's care as outlined above.

UW Medicine
NORTHWEST HOSPITAL & MEDICAL CENTER

AFTER VISIT SUMMARY

Jeanne L. Hoffman MRN: U8170135
10/1/2018 10:30 AM Northwest Hospital Wound Care & Hyperbaric Center 206-668-1244

Instructions

Wounds appear to look better. Will continue with current treatment.

Wound Care for:
Left Lateral Calf
Left Medial Ankle
Left Post Calf

Cleanse wounds with water and pat dry
Apply Silver Alginate, ABD Pad, Wrap gauze,
And tape to secure
Change dressing 2 x per week
Apply Zinc Oxide to excoriated skin
Tubi-Grip Daily

Elevate leg as much as possible

Try to eat high calorie, high protein food sources
Supplementation with Boost between meals
Please don't use pools and/or public water facilities
Showers are fine

Return in about 7 days
(around 10/8/2018) for routine follow-up.

What's Next

OCT 8 2018 — Return Patient Appointment with Nilufer B Norsworthy, MD
Monday October 8 10:15 AM
Northwest Hospital Wound Care & Hyperbaric Center
1560 N 115TH STREET, STE 201
SEATTLE WA 98133-8414
206-668-1244

OCT 24 2018 — Return Patient Appointment with William E Neighbor, MD
Wednesday October 24 10:40 AM (Arrive by 10:25 AM)
Hall Health Primary Care Center
4060 NE Stevens Way, Box 354410
Seattle WA 98195-4410
206-685-1011

Today's Visit

You were seen on Monday October 1, 2018. The following issues were addressed:

- Non-pressure chronic ulcer of left ankle with fat layer exposed
- Non-pressure chronic ulcer of left calf with fat layer exposed
- Venous ulcer of left leg
- Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf
- Chronic venous hypertension with ulcer and inflammation, left

Blood Pressure	Temperature
108/56	98.3 °F

Clinical - Scan on 10/8/2018 12:19 PM

Scan (below)

COMPLEX OR PALLIATIVE WOUND MANAGEMENT

	Complex Wound Management Criteria *(can only be assigned after 12 weeks of treatment)*
☐	Nutritional support is required, based on laboratory results and physical examination, and has been offered to patient (or healthcare surrogate), including tube feedings and total parenteral nutrition, and has been declined.
☐	Evaluation by a vascular surgeon has determined that the patient is not a revascularization candidate due to: _____
☐	Patient requires a surgical procedure in order to achieve wound healing: ☐ However, the surgeon has determined that the patient is not a surgical candidate due to medical status. ☐ However, the patient does not wish to undergo the recommended surgical procedure.
☐	Patient has remarkable or complex co–morbidities requiring medications or treatments that extend wound healing times. Examples: • Diabetes mellitus with chronic renal failure or end stage renal disease requiring dialysis • Advanced or poorly controlled rheumatoid arthritis • Diabetes mellitus and end stage chronic obstructive pulmonary disease • Active cancer with current chemo– or radiation therapy
☐	Patient is unable to adhere to an Advanced Wound Management plan. • *Agreement to Receive Wound Care* has been implemented. Patient demonstrates continued inability to adhere to an Advanced Wound Management Plan, the patient has been presented with the option of continuing the Advanced Plan or implementing the Complex Wound Management Plan. • Patient or healthcare surrogate must agree to Complex Wound Management Plan.
☑	The patient has limited personal or cognitive resources, or has no access to appropriate ongoing care providers, such that it is unreasonable to expect a level of compliance with prescribed Advanced Wound Management Plan treatments necessary to achieve desired healing outcomes. (Must be documented in physician progress notes.)
☐	The patient, the patient's family or care provider(s), or primary care physician has requested supportive care rather than Advanced Wound Management. (Must be documented in physician progress notes.)
	Palliative Wound Management Criteria *(can be assigned at any time)*
☐	Patient has a living will that specifies no extraordinary measures and Advanced Wound Management would expose the patient to those extraordinary interventions.
☐	Patient has a terminal condition and Advanced Wound Management would negatively impact the patient's quality of life.

From the Healogics Clinical Practice Guideline W.09.01–Palliative Wound Care

1. Palliative wound care is defined as care of wounds that are not expected to close (heal) due to irreversible wound or patient factors.
2. Patient status may change, thus allowing wounds which were previously considered un–healable to re–enter active therapy.
3. While the goal of palliative wound care may not be wound *closure*, there are several legitimate goals which will likely reduce overall health care costs and improve patient quality of life with a reasonable expenditure of health care resources.
4. Appropriate palliative wound care can be accomplished with visits no more frequent than every 30 days to maintain the wound status.
5. Palliative wound care is not expected to include advanced wound care technologies such as semi–synthetic human skin, HBO, growth factors, or other modalities directed at wound *closure*.
6. Dressing regimens for palliative wound care should be cost effective and chosen if possible to limit the work of caregivers.
7. Debridement may still be required to reduce the risk of infection by reducing devitalized tissue which can serve as a harbor for bacteria. In fact, non–healing wounds may continue to undergo necrosis and thus require periodic debridement to maintain a clean environment.
8. A palliative wound care plan should still employ modalities to control pain, unrelieved pressure, infection, uncontrolled metabolic derangement, and/or nutritional deficiency to prevent deterioration of the wound, development of new wounds, or deterioration in overall patient status.

Active at the End of Visit

Pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/20/2017
Start date: 12/20/2017
End date: 9/4/2019
Quantity: 270 tablet
Refill: 3 refills remaining

Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 11/29/2018
Reason for discontinuation: Reorder
Instructions: one po once daily for arthritic pain as needed
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/20/2017
Start date: 12/20/2017
End date: 11/28/2018
Action: Patient taking differently
Quantity: 60 tablet
Refill: 2 refills remaining

Timolol Maleate 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/16/2019
Reason for discontinuation: Reorder
Instructions: INSTILL ONE DROP IN EACH EYE TWICE DAILY.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/8/2017
Start date: 12/8/2017
End date: 4/12/2019
Quantity: 5 mL
Refill: No refills remaining

Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Instructions: Take 1 tablet by mouth 2 times a day.
Entered by: Ong, Thuan Duc, MD
Entered on: 6/7/2018
End date: 10/13/2021

Warfarin Sodium 4 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 2/16/2019
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (4 mg) by mouth daily.
Entered by: Neighbor Jr., William E, MD
Entered on: 9/26/2018
Start date: 9/26/2018
End date: 2/14/2019

10/01/2018 - Orders Only in Husky Health Primary Care Clinic (continued)

Medication List (continued)

Losartan Potassium 25 MG Oral Tab

Discontinued by: Taylor, Zoe Judith Mildred, MD
Discontinued on: 8/20/2019
Reason for discontinuation: Therapy completed/no longer indicated

Clinical Notes

Progress Notes

Neighbor Jr., William E, MD at 9/26/2018 0920

Jeanne Leonie Hoffman is a 93 year old female here to discuss the following:

Chief Complaint

Patient presents with

- Physical
- Immunization or Injection
  would like flu shot

History:

She has been cared for at NWH Wound Care. Was recently at Parkridge but now released. Next follow up Oct 1 at NWH Wound Care. Needs dressing change today.
Son Louis with her.

She and her son are still living in a tent on Bainbridge. They have food and heat and light. Awaiting placement at Island Terrace. She has continued to assert that she does not want to live apart from her son Louis who is with her today. Their church is involved. Dave O'Connor is the pastor. Do not know if APS still involved.

Medications
Atorvastatin 20 mg one half tab daily

Losartan 25 one half tab daily
Tylenol with codeine one daily
Warfarin dose was changed to 4 mg daiily at Parkridge. She has been on this dose for 90 days. INR pending today.
Pentoxiflylline APO033 one tablet three times daiy

Also given Hydrocodone Acetaminophen 5-325 by Dr. Klafter. However, as she says, making her "loopy".

Review of Systems:
Needs dressing change today
No fever, chills, sweats.
No exacerbation of leg pain

Medications
Outpatient Prescriptions Marked as Taking for the 9/26/18 encounter (Office Visit) with Neighbor Jr., William E, MD

Medication	Sig	Dispense	Refill
• Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab	one po once daily for arthritic pain as needed (Patient taking differently: 1 tablet every 4 hours as needed for pain. one po once daily for arthritic pain as needed)	60 tablet	2
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	3

Objective:
BP 137/69 | Pulse 80 | Wt 51.1 kg (112 lb 9.6 oz) | BMI 20.59 kg/m²
Estimated body mass index is 20.59 kg/m² as calculated from the following:
Height as of 6/19/18: 5' 2" (1.575 m).
Weight as of this encounter: 51.1 kg (112 lb 9.6 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
137/69	80	---	---	---	9:40 AM	9/26/2018

Last blood pressure recorded in this encounter: 137/69
General: NAD
Psych: Oriented. Interactive. Appropriate.
Skin: Left lower leg shows scaling and areas of skin break down. Both son and patient state this is unchanged since last visit to NW or maybe improved.

Lab and other tests: INR pending

Assessment and Plan:
Flut shot
Dressing change
Follow up with church, island crest, and APS
INR pending

Clinical Notes (continued)

(Z79.01) Long term current use of anticoagulant therapy (primary encounter diagnosis)
INR pending. Currently on Warfarin 4 mg daily. Compliant without bleeding. Current dose is 28 mg weekly. Prior dose with 30 mg weekly. She has been on current dose for about 3 months.

(Z71.89) Vaccine counseling
Plan: influenza high dose vaccine trivalent PF (adult
greater than 65yrs) 0.5 mL IM - 90662

(I10) BENIGN HYPERTENSION
Confirmed she is taking low dose Losartan. Blood pressure in range.
Plan: Losartan Potassium 25 MG Oral Tab

(E78.5) HYPERLIPIDEMIA NEC/NOS
Confirmed taking atorvastatin 20 mg one half tablet daily.

(L97.322) Non-pressure chronic ulcer of left ankle with fat layer exposed (HCC)
Wound as above. Nurse dressing change today.
Follow up at NWH wound care Oct 1.

Next visit with me in one month.

Housing issues;
I will contact Island crest, church pastor, and APS

Vaccine Screening Questions

Interpreter: No

1. Are you allergic to Latex? NO

2. Have you had a serious reaction or an allergic reaction to a vaccine? NO

3. Currently have a moderate or severe illness, including fever? NO

4. Ever had a seizure or any neurological problem associated with a vaccine? *(DTaP/TDaP/DTP pertinent)* NO

5. Is patient receiving any live vaccinations today? *(Varicella-Chickenpox, MMR-Measles/Mumps/Rubella, Zoster-Shingles, Flumist, Yellow Fever) NOTE: oral rotavirus is exempt* NO

Clinical Notes (continued)

If **YES** to any of the questions above – Do **NOT** give vaccine. Consult with RN or provider in clinic. (#5 can be YES if all Live vaccine questions are answered NO)

If **NO** to all questions above - Patient may receive vaccine.

6. Do you need to receive the Flu vaccine today? YES - Additional Flu Questions **Flu Vaccine Screening Questions:**

Ever had a serious allergic reaction to eggs? NO

Ever had Guillain-Barre syndrome associated with a vaccine? NO

Less than 6 months old? NO

If **YES** to any of the *Flu* questions above - NO Flu Vaccine to be given. Patient may consult provider as needed.

If **NO** to all questions above - Patient may receive Flu Shot (IM)

If between 6 months and 8 years of age, was flu vaccine received last year? N/A
If **NO** to above question:

- Children who are receiving influenza vaccine for the first time - administer 2 doses of the current influenza vaccine (separated by at least 4 weeks).

All patients are encouraged to wait 15 minutes before leaving after receiving any vaccine.

VIS given 9/26/2018 by Terri J Pearson.

Electronically signed by Pearson, Terri Jeanne, CMA at 9/26/2018 12:15 PM

TRIAGE WOUND CARE/DRESSING CHANGE

SUBJECTIVE:
Jeanne Leonie Hoffman is a 93 year old female presents for wound care of ulcers on L lower leg .
Wound hx: Pt is being seen by the wound care clinic at NW. She is here today to see Dr Neighbor for another issue and I was asked to do wound care.
Tetanus hx: 2017

OBJECTIVE: multiple erythematous, edematous, wounds, the two largest wounds are on the medial lower calf. One wound is 1cm X 2cm X 2-4 mm deep, the other one is 5cm X 4 cm X 1-2 mm deep. Both wounds are covered with eschar, the smaller wound below the ankle is the deepest. The lower leg is tightly edematous and serious fluid is leaking out wherever the leg is dependent mulitple layers of gauze and gauze wrap as well as the final wrap were completely saturated with this fluid, there was a malodorous smell but did not smell like an infected wound, nor did it look infected though the cap refill was slower than normal.

ASSESSMENT: slow healing wound

09/26/2018 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

PLAN: Wound was cleansed with H2O and 4x4's, only the larger wound was tender.
Dr Neighbor in to evaluate and reported much as described in the notes from the wound care clinic.
Pt and her son report the open wounds seem to be a little smaller but the lower leg and foot look worse than previously. They have an appt with the WCC on 10/1.

Applied new dressing with melgisorb Ag, remaing leg was moisturized with either lotion or vasoline. I covered the lower leg with multiple layers of gauze and wrapped with gauze followed by an ace wrap.

Advised pt to keep leg elevated above the heart as much as possible.
Eat plenty of protein and stay active.

Reviewed self care instructions: Monitor for signs of infection (fever, pus at wound site +/- increasing redness).
Follow previous directions given by the WCC at NW.
Patient and her son voiced understanding and agreement with plan.

eGFR, Information (Reference Range: not available)
Calculated GFR in mL/min/1.73 m2 by MDRD equation.
Inaccurate with changing renal function. See

http://depts.washington.edu/labweb/test/bclim/cGFR.html
Procalcitonin <0.05 ng/mL *(0-0.49 ng/mL)*
Procalcitonin Component (Reference Range: not available)
Sepsis diagnosis in adults:
PCT <0.5 ng/mL Low risk for progression to severe systemic bacterial infection. Repeat level in 6-24 hours if infection is strongly suspected.
PCT >=0.5 and <2.0 ng/mL Moderate risk for progression to severe sepsis.
PCT >=2 and <10 ng/mL High risk for progression to severe sepsis.
PCT >=10 ng/mL High likelihood of severe sepsis or septic shock.

PCT concentrations <0.5 ng/mL do not exclude an infection, on account of localized infections (without systemic signs) which can be associated with such low concentrations, or a systemic infection in its initial stages (<6 hours).
Furthermore, increased PCT can occur without infection.
PCT concentrations between 0.5 and 2.0 ng/mL should be interpreted taking into account the patient's history.
It is recommended to retest PCT within 6-24 hours if any concentrations of <2 ng/mL are obtained.

Methadone Qual, URN Negative *(NRN)*
Tricyclic Antidepressants, URN Negative *(NRN)*
Phencyclidine Qual, URN Negative *(NRN)*
Alcohol (Ethyl), URN (Reference Range: not available)
Negative
Quantitative testing for ethanol is by enzymatic method.
Ethanol cutoff limit: 10 mg/dL
Acetaminophen Qualitative, URN Positive A *(NRN)*
Drug Screen Test Info, URN (Reference Range: not available)
These results are presumptive and have not been confirmed as positive by an alternate method.

Results are for medical management only, and should not be used for legal purposes nor for workplace or pre-employment testing.

Qualitative immunochemical testing for amphetamines, barbiturates, benzodiazepines, cocaine metabolites, methadone, opiates, phencyclidine (PCP), cannabinoids, and tricyclic antidepressants.
Positive results indicate immunoreactivity greater than or equal to these calibrators: d-methamphetamine 500 ng/mL, secobarbital 200 ng/mL, lormetazepam 200 ng/mL, benzoylecgonine 150 ng/mL, methadone 150 ng/mL, morphine 300 ng/mL, phencyclidine 25 ng/mL, nortetrahydrocannabinoic acid 50 ng/mL, nortriptyline 1000 ng/mL and acetaminophen 5 mcg/mL.

Quantitative testing for ethanol is by an enzymatic method. Results less than 10 mg/dL are reported as negative.

This test was developed and its performance characteristics determined by the University of Washington Department of Laboratory Medicine in a manner consistent with CLIA requirements. This test has not been cleared or approved by the U.S. FDA.

☑ Allergies, Adverse Reactions, Alerts

This section is representative of the current allergy information, at the time of the CCD generation. In the case of regeneration of the CCD, the allergy information may not reflect the state of known allergies at the time of the CCD's subject visit.

- nitrofurantoin causes CONFUSION, NAUSEA, ABD PAIN. Status:Active.
- aspirin causes Rash. Status:Active.
- adhesive tape causes Rash. Status:Active.
- Penicillins causes Rash. Status:Active.
- Sulfa (Sulfonamide Antibiotics) causes Rash. Status:Active.

09/25/2018 - Abstract in Hall Health Health Data Service (continued)

Documents (continued)

- No Latex Allergy.
- No IV Contrast Allergy.

Medication

It is the responsibility of the patient or patient representative to confirm the list of medications with either the patient's personal care provider or the patient's follow-up care provider to ensure the patient has an appropriate list of medications to take at home.

Preliminary list - medication reconciliation not completed.

Discharge medications

New medications

- acetaminophen 325 mg Tablet, Ordered By: Jesse Abbott Klafter, MD
  Directions: 2 tablet oral every six hours PRN MILD PAIN
  Additional Instructions: ONLY take if NOT taking nprco
- LIDOCAINE 4% PATCH (ASPERCREME LIDOCAINE PATCH) 1 PATCH = 1 PATCH Transdermal DAILY First Dose Now, Clinician Dir:SWITCH TO 4% PER HOSPITAL POLICY PATCH: 12 HOURS ON, 12 HOURS OFF. Buy over the counter.
  Directions: 1 each transdermal daily
  Additional Instructions: SWITCH TO 4% PER HOSPITAL POLICY PATCH: 12 HOURS ON, 12 HOURS OFF
- methocarbamol 500 mg Tablet, Ordered By: Jesse Abbott Klafter, MD
  Directions: 1 tablet oral every six hours PRN Neck pain
- atorvastatin (Lipitor) 10 mg Tablet, Ordered By: Jesse Abbott Klafter, MD
  Directions: 1 tablet oral daily

Continued medications

- cholecalciferol (vitamin D3) 1,000 unit Tablet, Ordered By: Jesse Abbott Klafter, MD
  Directions: 1 tablet oral daily every morning
- timolol maleate 0.5 % Drops, Ordered By: Jesse Abbott Klafter, MD
  Directions: 1 drop ophthalmic, both eyes daily every morning

Changed medications

- HYDROcodone-acetaminophen 5 mg-325 mg Tablet, Ordered By: Jesse Abbott Klafter, MD
  Directions: 1-2 tablet oral every six hours PRN pain
- warfarin (Coumadin) 4 mg Tablet, Ordered By: Jesse Abbott Klafter, MD
  Directions: 1 tablet oral daily every evening
  Additional Instructions: check INR on friday

Stopped medications

- cyanocobalamin (vitamin B-12) 1,000 mcg Tablet
  Directions: 1 tablet oral daily every morning
- pentoxifylline 400 mg Tablet Extended Release
  Directions: 1 tablet oral every eight hours
- lactulose 10 gram/15 mL Solution
  Directions: 30 mL oral twice a day PRN constipation
  Additional Instructions: if no BM in 3 days
- bisacodyl (Dulcolax (bisacodyl)) 10 mg Suppository
  Directions: 1 suppository per rectum daily PRN constipation
  Additional Instructions: if no BM in 4 days

Confidential Report. Dispose of Appropriately!

09/24/2018 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center

Reason for Visit

Chief complaint: Wound Care
Visit diagnoses:

- Non-pressure chronic ulcer of left calf with fat layer exposed (primary)
- Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf
- Chronic venous hypertension with ulcer and inflammation, left
- Adult failure to thrive syndrome
- Diabetic ulcer of lower extremity

Active at the End of Visit

Pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/20/2017
Start date: 12/20/2017
End date: 9/4/2019
Quantity: 270 tablet
Refill: 3 refills remaining

Warfarin Sodium (COUMADIN) 5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 9/26/2018
Reason for discontinuation: Dose adjustment
Instructions: 1 TAB PO ONCE each evening except one half tab on Thursdays and Sundays
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/20/2017
Start date: 12/20/2017
End date: 9/26/2018
Action: Patient taking differently
Quantity: 90 tablet
Refill: 3 refills remaining

Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 11/29/2018
Reason for discontinuation: Reorder
Instructions: one po once daily for arthritic pain as needed
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/20/2017

09/24/2018 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

Medication List (continued)

Start date: 12/20/2017
End date: 11/28/2018
Action: Patient taking differently
Quantity: 60 tablet
Refill: 2 refills remaining

Timolol Maleate 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 4/16/2019
Reason for discontinuation: Reorder
Instructions: INSTILL ONE DROP IN EACH EYE TWICE DAILY.
Authorized by: Neighbor Jr., William E, MD
Ordered on: 12/8/2017
Start date: 12/8/2017
End date: 4/12/2019
Quantity: 5 mL
Refill: No refills remaining

Lactobacillus (ACIDOPHILUS) 0.5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD
Discontinued on: 10/13/2021
Instructions: Take 1 tablet by mouth 2 times a day.
Entered by: Ong, Thuan Duc, MD
Entered on: 6/7/2018
End date: 10/13/2021

Clinical Notes

Progress Notes

McKisson, Kimberly A, RN at 9/24/2018 0830

Pts son reports pt is combative, losing weight, loss of appetite. They are currently staying in a Hobbit house on Bainbridge Island. Mary Jo has been taking care of her wound at Parkridge. Pt left Parkrigde on and was admitted to NWH until 9/18/18.

Wound Care for:
Left Lateral Calf
Left Medial Ankle
Left Post Calf

Cleanse wounds with water and pat dry
Apply Silver Alginate, ABD Pad, Wrap gauze,
And tape to secure
Change dressing 2 x per week
Apply Zinc Oxide to excoriated skin
Tubi-Grip Daily

Elevate leg as much as possible

Try to eat high calorie, high protein food sources
Supplementation with Boost between meals
Please don't use pools and/or public water facilities
Showers are fine

Norsworthy, Nilufer Bozdemir, MD at 9/24/2018 0830

PROGRESS NOTE
9/24/2018

ID/CC:
Jeanne Leonie Hoffman is a 93 year old female with multiple left ankle and calf ulcers with DM2 and mixed vascular disease and adult failure to thrive syndrome is seen today for Wound Care

INTERVAL HISTORY: The wounds are smaller in general but covered with heavy bioburden and slough. There is some skin eruption due to stasis dermatitis. There is no sign of cellulitis.
This is a new patient for me and records are reviewed. One of the main concern today is her ongoing weight loss and poor oral intake due to poor appetite. She was discharged from SNF, Parkridge on 9/11/2018 and returned to hospital in a day due to no oral intake and dehydration. She stayed in hospital for a week and did not want to return to SNF. Currently living in a tent in Bainbridge Island at a homeless community. According to the son he has not been eating but couple bites per day. For the last one week she is visibly fatigued and has disarticulate speech. According to her son she lost at least a size worth of weight with in last month.
She has known PAD with pain at ambulation and on pentoxifylline. Also severe reflux disease with remote history of DVTs.
She had
l. Ultrasound-guided left greater saphenous vein access.
2. Radiofrequency ablation of left greater saphenous vein.
3. Microphlebectomy of varicose veins with six separate stab incisions.
4. Debridement of the lateral ankle ulcer l.2 x 1 cm to fat layer exposed.
5. Debridement of the medial calf ulcer 2.5 x 3 cm to fat layer exposed.
6. Debridement of the medial ankle ulcer 3 x 2.5 cm to fat layer exposed.
7. All debridements were performed sharp excisional debridement.
On 7/26/2018 by Dr. Rollo, MD. She has been tolerating the compression wraps well with pressure 20/30mmHg.

A 14-category ROS was reviewed with patient:
CONSTITUTIONAL:Denies, fatigue, fever, . Does have, weight loss ~10lbs/month, limb pain

Review of patient's allergies indicates:
Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other
• Nitrofurantoin	Other
Confusion, loss of appetitie, nausea, abdominal pain	
• Nitrofurantoin	Other

Diagnostics: last blood tests from 9/18/18 indicating normocytic anemia (9.6/31%) and Cre is down to 0.7 from 0.8

PROCEDURE
Wound/Ulcer: # 4 / Description: wound bed is covered with yellow stringy slough and black/green spots at the wound bed. Edges are rolled in.
Indication for Debridement: abnormal wound edge, abnormal wound base and slough, exudate
Anesthetic: lidocaine 4% topical solution
Type and Level of Debridement:
-Surgical/Excisional: : subcutaneous tissue
Tissue and/or Material Removed: fibrin/slough, non-viable, skin, subcutaneous and viable
Severity: fat layer exposed
Instruments Used: curette
Bleeding: small
Bleeding Controlled with: pressure
Actual Area Debrided
-Total Square cm2 = ~16 cm2
Character of Wound/Ulcer Post-Debridement and Post-Debridement Measurements: Improved: Length 5.2cm X Width 3.1cm X Depth: 0.3cm
Patient tolerated the procedure well.
The wound looked improved after the debridement

ASSESSMENT/PLAN: patient with left limb ulcers with DM2, mixed vascular disease, edema and anemia and protein calori malnutrition with adult failure to thrive. She has challenging lifestyle by living as urban nomad

providing suboptimal living conditions.
For adult failure to thrive recommend working closely with PCP. She should start taking protein/calori supplements as the poor nutrition is a critical barrier for healing.
For wounds we will use silver alginate to continue autolytic debridement. Continue compression wraps.
(L97.222) Non-pressure chronic ulcer of left calf with fat layer exposed (HCC) (primary encounter diagnosis)
(I70.442) Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf (HCC)
(I87.332) Chronic venous hypertension with ulcer and inflammation, left (HCC)
(R62.7) Adult failure to thrive syndrome
(E11.622, L97.909) Diabetic ulcer of lower extremity (HCC)
Jeanne was seen today for wound care.

Diagnoses and all orders for this visit:

Non-pressure chronic ulcer of left calf with fat layer exposed (HCC)
- NURSING COMMUNICATION
- DEBRIDEMENT SUBCUTANEOUS TISSUE 20 SQ CM/<

Atherosclerosis of autologous vein bypass graft of left lower extremity with ulceration of calf (HCC)
- NURSING COMMUNICATION

09/10/2018 - Admission (Discharged) in NWH 4S SURGICAL (continued)

Labs (continued)

Resulting lab: NORTHWEST HOSPITAL LAB

Components

Component	Value	Reference Range	Flag	Lab
Procalcitonin	<0.05	0 - 0.49 ng/mL	—	NWH
Procalcitonin Comment	Sepsis diagnosis in adults:	—	—	NWH

Comment:
PCT <0.5 ng/mL Low risk for progression to severe systemic bacterial infection. Repeat level in 6-24 hours if infection is strongly suspected.
PCT >=0.5 and <2.0 ng/mL Moderate risk for progression to severe sepsis.
PCT >=2 and <10 ng/mL High risk for progression to severe sepsis.
PCT >=10 ng/mL High likelihood of severe sepsis or septic shock.

PCT concentrations <0.5 ng/mL do not exclude an infection, on account of localized infections (without systemic signs) which can be associated with such low concentrations, or a systemic infection in its initial stages (<6 hours). Furthermore, increased PCT can occur without infection. PCT concentrations between 0.5 and 2.0 ng/mL should be interpreted taking into account the patient's history. It is recommended to retest PCT within 6-24 hours if any concentrations of <2 ng/mL are obtained.

Comment:
These results are presumptive and have not been confirmed as positive by an alternate method. Results are for medical management only, and should not be used for legal purposes nor for workplace or pre-employment testing.
Qualitative immunochemical testing for amphetamines, barbiturates, benzodiazepines, cocaine metabolites, methadone, opiates, phencyclidine (PCP), cannabinoids, and tricyclic antidepressants. Positive results indicate immunoreactivity greater than or equal to these calibrators: d-methamphetamine 500 ng/mL, secobarbital 200 ng/mL, lormetazepam 200 ng/mL, benzoylecgonine 150 ng/mL, methadone 150 ng/mL, morphine 300 ng/mL, phencyclidine 25 ng/mL, nortetrahydrocannabinoic acid 50 ng/mL, nortriptyline 1000 ng/mL and acetaminophen 5 mcg/mL. Quantitative testing for ethanol is by an enzymatic method. Results less than 10 mg/dL are reported as negative.
This test was developed and its performance characteristics determined by th
e
University of Washington Department of Laboratory Medicine in a manner consistent with CLIA requirements. This test has not been cleared or approved by the U.S. FDA.

Important Message From Medicare - Scan on 9/18/2018 6:47 PM

Scan (below)

[redacted]

Patient Name:
Patient ID Number:
Physician: Ellingson

Department of Health & Human Services
Centers for Medicare & Medicaid Services
OMB Approval No. 0938–0692

An Important Message From Medicare About Your Rights

As A Hospital Inpatient, You Have The Right To:

- Receive Medicare covered services. This includes medically necessary hospital services and services you may need after you are discharged, if ordered by your doctor. You have a right to know about these services, who will pay for them, and where you can get them.
- Be involved in any decisions about your hospital stay, and know who will pay for it.
- Report any concerns you have about the quality of care you receive to the Quality Improvement Organization (QIO) listed here:

Name of QIO
Livanta, LLC

Telephone Number of QIO
1–877–588–1123

Your Medicare Discharge Rights

Planning For Your Discharge: During your hospital stay, the hospital staff will be working with you to prepare for your safe discharge and arrange for services you may need after you leave the hospital. When you no longer need inpatient hospital care, your doctor or the hospital staff will inform you of your planned discharge date.

If you think you are being discharged too soon:

- You can talk to the hospital staff, your doctor and your managed care plan (if you belong to one) about your concerns.
- You also have the right to an appeal, that is, a review of your case by a Quality Improvement Organization (QIO). The QIO is an outside reviewer hired by Medicare to look at your case to decide whether you are ready to leave the hospital.
  - ❑ **If you want to appeal, you must contact the QIO no later than your planned discharge date and before you leave the hospital.**
  - ❑ If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
- If you do not appeal, but decide to stay in the hospital past your planned discharge date, you may have to pay for any services you receive after that date.
- Step by step instructions for calling the QIO and filing an appeal are on page 2.

To speak with someone at the hospital about this notice, call: Care Management Department at 206–668–1304.

Please sign and date here to show you received this notice and understand your rights. 1340

09/10/2018 - Admission (Discharged) in NWH 4S SURGICAL (continued)

Documents (continued)

Steps To Appeal Your Discharge

- **Step1**: You must contact the QIO no later than your planned discharge date and before you leave the hospital. If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
  - ❑ Here is the contact information for the QIO:

    Name of QIO (in bold)
    Livanta, LLC

    Telephone Number of QIO
    1–877–588–1123
  - ❑ You can file a request for an appeal any day of the week. **Once you speak to someone or leave a message, your appeal has begun.**
  - ❑ Ask the hospital if you need help contacting the QIO.
  - ❑ The name of this hospital is : Northwest Hospital & Medical Center.

Hospital Name	Provider ID Number
Acute NPI: **Geropsych NPI:**	**1700861580** **1497766067**

- **Step 2**: You will receive a detailed notice from the hospital or your Medicare Advantage or other Medicare managed care plan (if you belong to one) that explains the reasons they think you are ready to be discharged.
- **Step 3**: The QIO will ask for your opinion. You or your representative need to be available to speak with the QIO, if requested. You or your representative may give the QIO a written statement, but you are not required to do so.
- **Step 4**: The QIO will review your medical records and other important information about your case.
- **Step 5**: The QIO will notify you of its decision within 1 day after it receives all necessary information.
  - ❑ If the QIO finds that you are not ready to be discharged, Medicare will continue to cover your hospital services.
  - ❑ If the QIO finds you are ready to be discharged, Medicare will continue to cover your services until noon of the day after the QIO notifies you of its decision.

If You Miss The Deadline To Appeal, You Have Other Appeal Rights:

- You can still ask the QIO or your plan (if you belong to one) for a review of your case:
  - ❑ If you have Original Medicare: Call the QIO listed above.
  - ❑ If you belong to a Medicare Advantage Plan or other Medicare managed care plan: Call your plan.
- If you stay in the hospital, the hospital may charge you for any services you receive after your planned discharge date.

For more information, call 1–800–MEDICARE (1–800–633–4227), or TTY: 1–877–486–2048. CMS does not discriminate in its programs and activities. To request this publication in an alternate format, please call: 1–800–MEDICARE or email: AltFormatRequest@cms.hhs.gov.

Additional Information:

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938–0692. The time required to complete this information collection is estimated to average 15 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4–26–05, Baltimore, Maryland 21244–1850.

Hoffman, Jeanne Leonie	William E Neighbor Jr., MD	8/25/2018 12:08 PM

Bill.....

Wanted your opinion and justifications.

Thank You.

RE: Estrogen Test Request

From	To	Sent and Delivered
William E Neighbor Jr., MD	Hoffman, Jeanne Leonie	8/22/2018 12:45 PM

Last Read in MyChart
8/25/2018 12:05 PM by Hoffman, Jeanne Leonie

I do not quite understand the request for an estrogen blood level. Her levels are going to be in the post-menopausal range. There is not evidence in her age group that estrogen supplementation is beneficial on mood, memory or other health. There is risk including blood clots and interaction with coumadin.
If there is a health care provider who is requesting this, please have them contact my medical assistant so I can contact them. Otherwise, I would not order the test.
Medical Assistant at 206-616-9358

William E Neighbor, MD

Estrogen Test Request

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	8/22/2018 5:08 AM

Bill.....

Wounds seem to be healing, after surgery.

However, Estrogen test, to determine level, would provide better recovery opportunity, including improving other aspects toward mental and body maintenance.

08/22/2018 - Patient E-mail in Husky Health Primary Care Clinic (continued)

Messages (continued)

It would not harm, having test results, then discuss a slow increase to min-level.

Age should not be obstacle to improving healthy outlook.

Louis visits: MWF Mornings

Weds would bandage change.

Physical Therapy, has improved: Balance, weigh lifting training/cycling and less reliance on Walker/Cane.

Estrogen maintenance should improve and compliment therapy and mental outlook.

Please schedule Estrogen blood test at Park Ridge Rehab Center.

08/14/2018 - Outside Care Encounter in POST-ACUTE CARE SVC

Reason for Visit

Chief complaint: LTC F/U
Visit diagnoses:

- Peripheral vascular disease, unspecified (primary)
- Venous ulcer of left leg
- Severe protein-calorie malnutrition
- Vitamin D deficiency
- Chronic recurrent deep vein thrombosis (DVT) of lower extremity, unspecified laterality
- Essential hypertension, benign
- Generalized osteoarthrosis, unspecified site
- Unspecified glaucoma(365.9)
- Type 2 diabetes mellitus without complication, without long-term current use of insulin
- Unspecified vitamin B deficiency
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine, unspecified spinal osteoarthritis complication status

Clinical Notes

Progress Notes

Touray, Ibrahima, ARNP at 8/14/2018 2359

University of Washington Post-Acute Care Service

Skilled Nursing Facility:
Park Ridge Care Center (PRCC)
1250 NE 145th St.
Shoreline, WA 98155
Phone: (206) 363-5856
Fax: (206) 365-0568

Patient seen today for: SNF f/u visit

History:
93 year old female with history of severe peripheral vascular disease of both venous and arterial, recurrent DVTs, chronic anticoagulation (coumadin), DM II, OA of both hips, homelessness, admitted at Park Ridge Care Center on 6/4/18 from NWH where she was hospitalized from 5/31/18 to 6/4/18 for worsening stasis ulcers on her left lower extremity and cellulitis.

She as previously followed by the NW wound clinic for her venous stasis multiple ulcers of LLE. During her follow up appointment at the clinic there was concern for worsening cellulitis, hence admitted for further workup. She was started on Cefazolin empirically. Wound culture later grew MSSA and Pseudomonas. She will continue to be closely followed by the wound clinic team at NW.

On hospital admission her INR was 4.9. coumadin was subsequently held for few days and then gradually restarted.

She also received some IV fluid for dehydration.

Hx Interval:
SNF follow up visit with Jeanne today as she continues to be at Park Ridge Care Center for rehabilitation and wound care management. She has been doing well physically, participating in therapy sessions and ambulates using a walker with minimal assistance. For ling distances she is still wheelchair dependent. Her leg wounds gradually improving with wound dressing by the SNF RN and followed by NW wound NP weekly. She states her "leg pain is more of aching/itching but seems to be less as the wound heals". Appetite/intake improving with improving weight as well (117 lbs today), continues to be on nutritional supplement Prostat to facilitate wound healing in addition to her protein cal malnutrition. Her INR today was 2.7 on 6 mg Coumadin, no s/s of active bleeding per nursing staff.

She reports no new concerns today.

ROS:
Leg pain with activity, Norco has been effective
Denies fever, chills, sob, n/v, chest pain, headache, diarrhea or constipation.
Rest of the ROS reviewed and were negative except for as above

PMH:
Patient Active Problem List
Diagnosis

- Sensorineural hearing loss, unspecified
- DVT, recurrent, lower extremity, chronic (HCC)
- Other and unspecified hyperlipidemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Unspecified vitamin B deficiency
- Long term current use of anticoagulant therapy
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- Hip joint stiffness
- Leg weakness, bilateral
- Weakness of trunk musculature
- Other physical therapy
- History of recurrent deep vein thrombosis (DVT)
- Thrombocytopenia (HCC)
- Imbalance
- Primary osteoarthritis of both hips
- Non-pressure chronic ulcer of left ankle with fat layer exposed (HCC)
- Non-pressure chronic ulcer of left calf with fat layer exposed (HCC)
- Peripheral vascular disease, unspecified (HCC)
- Cellulitis of left leg
- Venous ulcer of left leg (HCC)
- Homeless
- Normocytic anemia
- Severe protein-calorie malnutrition (HCC)
- Urge urinary incontinence
- Vitamin D deficiency

SH:
Social History

Social History Narrative

6/15/2010 Grew up on Bainbridge. Both parents from Paris. Spoke French at home and English in Public. She recalls her first clot was in her legs when she was 30. She also developed clot in her arms later. She states her grandmother had the same problem.

William E Neighbor, MD

Habits: denies tobacco, ETOH or drug use
Prior living situation: homeless now
Widowed. She has two sons. She had been living with her son in subsidized housing and apparently the landlord was affected by her son's behavior, as well as her other son's bullying, and eventually evicted them (per SW note the son reports they left "willingly").
Social Support: family
POLST: Full code, Antibiotics ok, Long term medically assisted nutrition by tube
DPOA: Louis (son) 360-649-5702

MEDICATIONS:
Please review the facility Medication Administration Record (MAR) for the most up to date and accurate medication list. Please call the facility to have latest medication administration record faxed.

ALLERGY:
Review of patient's allergies indicates:
Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other
• Nitrofurantoin	Other
Confusion, loss of appetitie, nausea, abdominal pain	
• Nitrofurantoin	Other
confusion	
• Penicillins	Rash
• Sulfa Antibiotics	Rash

Physical Exam:
Pulse 78 | Temp 97.5 °F (36.4 °C) (Tympanic) | Resp 18 | Wt 117 lb 4 oz (53.2 kg) | BMI 21.45 kg/m²
Wt Readings from Last 3 Encounters:
08/14/18 117 lb 4 oz (53.2 kg)
07/25/18 114 lb 12 oz (52.1 kg)
07/06/18 110 lb 12 oz (50.2 kg)

GEN: appears older than stated age, accompanied by self. Appears thin, adequately hydrated, and groomed. Alert and responding appropriately and in no acute distress.
PSYCH: alert and oriented x 3, interactive, speech w/o dysarthria, full affect, focused content, logical process, no hallucinations or psychomotor agitation. Hard of hearing, hearing in left ear.
HEENT: NCAT, moist mucous membranes. Poor dentition. Oropharynx clear. EOMI and PERRLA. Corrective lenses
CV: RRR, NL S1 and S2, G 1/6 murmurs, no r/g, no JVD.

08/14/2018 - Outside Care Encounter in POST-ACUTE CARE SVC (continued)

Clinical Notes (continued)

PULM: normal, unlabored, and regular respiratory effort, CTA B/L.
ABD: normal BT all quadrants, non-tender, non-distended, no masses
MSK: kyphotic, changes in hands consistent w/ OA. MAE
EXT: no c/c/. LLE wrapped with dressing.
NEURO: no focal deficits, Normal tone, motor symmetry
SKIN: dry wnl temp and color, no apparent rash

A/P:
(I73.9) Peripheral vascular disease, unspecified (HCC) (primary encounter diagnosis)
(I83.029) Venous ulcer of left leg (HCC) (I73.9)
Plan: - followed by vascular clinic, s/p venous ablation procedure 7/26/18
- f/u with NW wound NP at SNF weekly and at the clinic as needed
- continue wound care as ordered
- continue supportive care with ADLs
- continue Pentoxifylline 400 mg po q 8 hrs
- Norco 5-325 mg, 2 tabs po prn q 6 hrs for pain

(Z86.718) History of recurrent deep vein thrombosis (DVT)
(Z79.01) Long term current use of anticoagulant therapy
Plan: - continue chronic anticoagulation with Coumadin, current dose 6 mg po daily
- INR has been at therapeutic, 2.7 today

08/14/2018 - Outside Care Encounter in POST-ACUTE CARE SVC (continued)

Clinical Notes (continued)

- INR goal is 2 - 3
- continue to check INR twice a week

(G31.84) Mild cognitive impairment
Plan: - stable without behaviors or resistive to care
- continue supportive care
- monitor for mood/behavioral changes

(I10) Essential hypertension
Plan: - stable, BP remains at goal with SBP generally below 130
- continue to monitor without meds

(E78.5) Other and unspecified hyperlipidemia
Plan: - no longer on statin

(M16.0) Primary osteoarthritis of both hips
(M47.816) Osteoarthritis of lumbar spine, unspecified spinal osteoarthritis complication status
(M62.81) Weakness of trunk musculature
(R29.898) Leg weakness, bilateral
Plan: - PT and OT as scheduled
- supportive care with ADLs
- Norco 5-325 mg, 2 tabs po prn q 6 hrs for pain

(E11.9) Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)
Plan: - diet controlled

(H40.9) Unspecified glaucoma(365.9)
Plan: - stable, continue home regimen
- Timolol 0.5% 1 drop both eyes daily

(E43) Severe protein-calorie malnutrition (HCC)
Plan: - followed by SNF dietician
- continue Prostat 30 cc po daily
- will continue to monitor weight

(E53.9) Unspecified vitamin B deficiency
Plan: - Vitamin B_{12} 1000 mcg po daily

(E55.9) Vitamin D deficiency
Plan: - recent Vit D 25-OH was 24.3 on 6/8/18
- completed 6 weeks course of high dose Vit D
- continue Vitamin D_3 1000 units po daily

07/25/2018 - Outside Care Encounter in POST-ACUTE CARE SVC

Reason for Visit

Chief complaint: LTC F/U
Visit diagnoses:

- Peripheral vascular disease, unspecified (primary)
- Venous ulcer of left leg
- Non-pressure chronic ulcer of left calf with fat layer exposed
- Non-pressure chronic ulcer of left ankle with fat layer exposed
- Chronic recurrent deep vein thrombosis (DVT) of lower extremity, unspecified laterality
- Long term current use of anticoagulant therapy
- Type 2 diabetes mellitus without complication, without long-term current use of insulin
- Severe protein-calorie malnutrition
- Vitamin D deficiency
- Sensorineural hearing loss, unspecified
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Unspecified vitamin B deficiency
- Osteoarthritis of lumbar spine, unspecified spinal osteoarthritis complication status
- Generalized osteoarthrosis, unspecified site
- Osteoporosis, unspecified
- Primary osteoarthritis of both hips
- History of recurrent deep vein thrombosis (DVT)
- Leg weakness, bilateral

Clinical Notes

Progress Notes

Touray, Ibrahima, ARNP at 7/25/2018 2359

University of Washington Post-Acute Care Service

Skilled Nursing Facility:
Park Ridge Care Center (PRCC)
1250 NE 145th St.
Shoreline, WA 98155
Phone: (206) 363-5856
Fax: (206) 365-0568

Patient seen today for: SNF f/u visit

History:
93 year old female with history of severe peripheral vascular disease of both venous and arterial, recurrent DVTs, chronic anticoagulation (coumadin), DM II, OA of both hips, homelessness, admitted at Park Ridge Care Center on 6/4/18 from NWH where she was hospitalized from 5/31/18 to 6/4/18 for worsening stasis ulcers on her left lower extremity and cellulitis.

She as previously followed by the NW wound clinic for her venous stasis multiple ulcers of LLE. During her follow up appointment at the clinic there was concern for worsening cellulitis, hence admitted for further workup. She was started on Cefazolin empirically. Wound culture later grew MSSA and Pseudomonas. She will continue to be closely followed by the wound clinic team at NW.

On hospital admission her INR was 4.9. coumadin was subsequently held for few days and then gradually restarted. She also received some IV fluid for dehydration.

Hx Interval:
I'm following up with Jeanne today for a routine SNF visit as she continues to be at Park ridge for rehabilitation and wound care. Now she is more active and ambulating more with a walker inside the facility. Her leg wound is still there with routine dressing change by the wound nurse. She stated it hurts sometimes but she thinks the pain has decreased since SNF admission. She is taking Norco pain management as needed. She is scheduled to have surgery tomorrow at NWH, venous ablation procedure.

Her INR has been stable for the past month, maintained on 5 mg Coumadin daily for DVT management, no sign and symptoms of bleeding. Appetite remains fair, weight has been gradually increasing since SNF admission, current weight is 114.5 pounds. She remains continent of bowel and bladder.

She has no new concerns today.

ROS:
Leg pain with activity
Denies fever, chills, sob, n/v, chest pain, headache, diarrhea or constipation.
Rest of the ROS reviewed and were negative except for as above

PMH:
Patient Active Problem List
Diagnosis

- Sensorineural hearing loss, unspecified
- DVT, recurrent, lower extremity, chronic (HCC)
- Other and unspecified hyperlipidemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Unspecified vitamin B deficiency
- Long term current use of anticoagulant therapy
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- Hip joint stiffness
- Leg weakness, bilateral
- Weakness of trunk musculature
- Other physical therapy
- History of recurrent deep vein thrombosis (DVT)
- Thrombocytopenia (HCC)
- Imbalance
- Primary osteoarthritis of both hips
- Non-pressure chronic ulcer of left ankle with fat layer exposed (HCC)
- Non-pressure chronic ulcer of left calf with fat layer exposed (HCC)
- Peripheral vascular disease, unspecified (HCC)
- Cellulitis of left leg
- Venous ulcer of left leg (HCC)
- Homeless

- Normocytic anemia
- Severe protein-calorie malnutrition (HCC)
- Urge urinary incontinence
- Vitamin D deficiency

SH:
Social History

Social History Narrative

6/15/2010 Grew up on Bainbridge. Both parents from Paris. Spoke French at home and English in Public. She recalls her first clot was in her legs when she was 30. She also developed clot in her arms later. She states her grandmother had the same problem.

William E Neighbor, MD

Habits: denies tobacco, ETOH or drug use
Prior living situation: homeless now
Widowed. She has two sons. She had been living with her son in subsidized housing and apparently the landlord was affected by her son's behavior, as well as her other son's bullying, and eventually evicted them (per SW note the son reports they left "willingly").
Social Support: family
POLST: Full code, Antibiotics ok, Long term medically assisted nutrition by tube
DPOA: Louis (son) 360-649-5702

MEDICATIONS:
Please review the facility Medication Administration Record (MAR) for the most up to date and accurate medication list. Please call the facility to have latest medication administration record faxed.

ALLERGY:
Review of patient's allergies indicates:
Allergies

Allergen	Reactions
Adhesives	
Aspirin	Other
Nitrofurantoin	Other
Confusion, loss of appetitie, nausea, abdominal pain	
Nitrofurantoin	Other
confusion	
Penicillins	Rash
Sulfa Antibiotics	Rash

Physical Exam:
BP 128/64 | Pulse 64 | Temp 98.8 °F (37.1 °C) (Tympanic) | Resp 18 | Wt 114 lb 12 oz (52.1 kg) | BMI 20.99 kg/m²
Wt Readings from Last 3 Encounters:
07/25/18 114 lb 12 oz (52.1 kg)
07/06/18 110 lb 12 oz (50.2 kg)
06/22/18 111 lb 6 oz (50.5 kg)

GEN: appears older than stated age, accompanied by self. Appears thin, adequately hydrated, and groomed. Alert and responding appropriately and in no acute distress.

07/25/2018 - Outside Care Encounter in POST-ACUTE CARE SVC (continued)

Clinical Notes (continued)

PSYCH: alert and oriented x 3, interactive, speech w/o dysarthria, full affect, focused content, logical process, no hallucinations or psychomotor agitation. Hard of hearing, hearing in left ear.
HEENT: NCAT, moist mucous membranes. Poor dentition. Oropharynx clear. EOMI and PERRLA. Corrective lenses
CV: RRR, NL S1 and S2, G 1/6 murmurs, no r/g, no JVD.
PULM: normal, unlabored, and regular respiratory effort, CTA B/L.
ABD: normal BT all quadrants, non-tender, non-distended, no masses
MSK: kyphotic, changes in hands consistent w/ OA. MAE
EXT: no c/c/. LLE wrapped with dressing.
NEURO: no focal deficits, Normal tone, motor symmetry
SKIN: dry wnl temp and color, no apparent rash
Labs: nursing home labs not done through UW system, please check with the facility.

A/P:
(I73.9) Peripheral vascular disease, unspecified (HCC) (primary encounter diagnosis)
(I83.029) Venous ulcer of left leg (HCC) (I73.9)
Plan: - followed by vascular clinic, planned venous ablation procedure tomorrow
- f/u with NW wound NP at SNF weekly and at the clinic as needed
- continue wound care as ordered
- continue supportive care with ADLs
- continue Pentoxifylline 400 mg po q 8 hrs
- Norco 5-325 mg, 2 tabs po prn q 6 hrs for pain

(Z86.718) History of recurrent deep vein thrombosis (DVT)
(Z79.01) Long term current use of anticoagulant therapy
Plan: - continue chronic anticoagulation with Coumadin, current dose 5 mg po daily
- INR has been at therapeutic for the past month
- INR goal is 2 - 3
- continue to check INR twice a week

(G31.84) Mild cognitive impairment
Plan: - stable without behaviors or resistive to care
- continue supportive care
- monitor for mood/behavioral changes

(I10) Essential hypertension
Plan: - stable, BP remains at goal without meds
- continue to monitor

(E78.5) Other and unspecified hyperlipidemia
Plan: - no longer on statin

(M16.0) Primary osteoarthritis of both hips
(M47.816) Osteoarthritis of lumbar spine, unspecified spinal osteoarthritis complication status
(M62.81) Weakness of trunk musculature
(R29.898) Leg weakness, bilateral
Plan: - PT and OT as scheduled
- supportive care with ADLs
- Norco 5-325 mg, 2 tabs po prn q 6 hrs for pain

(E11.9) Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)
Plan: - diet controlled

(H40.9) Unspecified glaucoma(365.9)

07/25/2018 - Outside Care Encounter in POST-ACUTE CARE SVC (continued)

Clinical Notes (continued)

Plan: - stable, continue home regimen
- Timolol 0.5% 1 drop both eyes daily

(E43) Severe protein-calorie malnutrition (HCC)
Plan: - weight is gradually trending up. Appetite has been somewhat fairly good.
- will continue to monitor
- followed by SNF dietician
- Prostat 30 cc po daily

(E53.9) Unspecified vitamin B deficiency
Plan: - Vitamin B_{12} 1000 mcg po daily

(E55.9) Vitamin D deficiency
Plan: - recent Vit D 25-OH was 24.3 on 6/8/18
- continue Vitamin D_3 50,000 units po week x 6 weeks (thru 7/28/18)
- continue Vitamin D_3 1000 units po daily

Ibrahima Touray, ARNP

Today's Visit

You saw Ibrahima Touray, ARNP on Wednesday July 25, 2018. The following issues were addressed:

- Peripheral vascular disease, unspecified (HCC)
- Venous ulcer of left leg (HCC)
- Non-pressure chronic ulcer of left calf with fat layer exposed (HCC)
- Non-pressure chronic ulcer of left ankle with fat layer exposed (HCC)
- Chronic recurrent deep vein thrombosis (DVT) of lower extremity, unspecified laterality (HCC)
- Long term current use of anticoagulant therapy
- Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)
- Severe protein-calorie malnutrition (HCC)
- Vitamin D deficiency
- Sensorineural hearing loss, unspecified
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Unspecified vitamin B deficiency
- Osteoarthritis of lumbar spine, unspecified spinal osteoarthritis complication status
- Generalized osteoarthrosis, unspecified site
- Osteoporosis, unspecified
- Primary osteoarthritis of both hips
- History of recurrent deep vein thrombosis (DVT)
- Leg weakness, bilateral

Blood Pressure 128/64	BMI 20.99
Weight 114 lb 12 oz	Temperature (Tympanic) 98.8 °F

Telephone Encounter

Renz, Mary-Jo, ARNP at 7/24/2018 1630

I'm wondering if she has been scheduled for there venous ablation procedure yet. I am seeing her weekly at Parkridge Care Center where her 4 wounds are gradually healing with compression. Her son is not forthcoming with information so will need to know her surgery date when you know it.

Niland, Su K at 7/13/2018 1347

12:25 Pt's son Louis LM regarding scheduling with Dr Rollo asap. He stated Pt has a limited time in the re hab. He didn't leave a phone number saying he prefers email. louisalloin@USA.com. He is listed as Pt's POA in reg..

Electronically signed by Niland, Su K at 7/13/2018 1:50 PM

Ferguson, Kimberley A at 7/16/2018 0915

Hi,

I have scheduled Jeanne on 7/26 at Northwest Hospital. She will need to arrive at 9am at the North Totem Pole entrance. She is to have nothing to eat or drink after midnight and needs to shower the night before and morning of surgery with an antibacterial soap. She will need a ride home after surgery. Also, the pre-admit nurses will need to speak to someone to do an assessment prior to surgery.

Thanks,

Kimberley Ferguson
Clinic Supervisor
Vascular/ Endovascular Services

Electronically signed by Ferguson, Kimberley A at 7/16/2018 9:15 AM

Ferguson, Kimberley A at 7/23/2018 1535

Left another message asking the patient to please confirm they will be present for the surgery.

Electronically signed by Ferguson, Kimberley A at 7/23/2018 3:36 PM

Ferguson, Kimberley A at 7/23/2018 1547

I contacted the nursing home she is at. I found out by accident. They will hold her coumadin today. They did not know she was scheduled for surgery. Please let me know that this okay to proceed.

Clinical Notes

Progress Notes

Touray, Ibrahima, ARNP at 7/6/2018 2359

University of Washington Post-Acute Care Service

Skilled Nursing Facility:
Park Ridge Care Center (PRCC)
1250 NE 145th St.
Shoreline, WA 98155
Phone: (206) 363-5856
Fax: (206) 365-0568

Patient seen today for: Leg pain, SNF f/u visit

History:
93 year old female with history of severe peripheral vascular disease of both venous and arterial, recurrent DVTs, chronic anticoagulation (coumadin), DM II, OA of both hips, homelessness, admitted at Park Ridge Care Center on 6/4/18 from NWH where she was hospitalized from 5/31/18 to 6/4/18 for worsening stasis ulcers on her left lower extremity and cellulitis.

She as previously followed by the NW wound clinic for her venous stasis multiple ulcers of LLE. During her follow up

appointment at the clinic there was concern for worsening cellulitis, hence admitted for further workup. She was started on Cefazolin empirically. Wound culture later grew MSSA and Pseudomonas. She will continue to be closely followed by the wound clinic team at NW.

On hospital admission her INR was 4.9. coumadin was subsequently held for few days and then gradually restarted. She also received some IV fluid for dehydration.

Hx Interval:
Jeanne is complaining of leg pain, more like cramps to the calf, more on the right leg than the left. She has no wounds on the right leg. She has stasis ulcer wounds on the left leg which is wrapped with dressing. She states that the cramp-like pain comes and goes, worse in the morning after long rest in bed. She has history of chronic/recurrent DVTs and is currently on chronic anticoagulation coumadin with therapeutic INR for the past month. Pain could also be related to her poor vascular circulation. Her electrolytes are stable and no active clot noted on RLE by duplex.

She is otherwise walking on both legs with one person assist using a walker. Per nursing notes her wounds are gradually healing with current treatment plan. She has no sign of active infection. Appetite fairly stable, remains continent of bowel and bladder. She remains calm and cooperative with care and treatments.

ROS:
Denies fever, chills, sob, n/v, chest pain, headache, diarrhea or constipation.
Rest of the ROS reviewed and were negative except for as above

PMH:
Patient Active Problem List
Diagnosis

- Sensorineural hearing loss, unspecified
- DVT, recurrent, lower extremity, chronic (HCC)
- Other and unspecified hyperlipidemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Unspecified vitamin B deficiency
- Long term current use of anticoagulant therapy
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- Hip joint stiffness
- Leg weakness, bilateral
- Weakness of trunk musculature
- Other physical therapy
- History of recurrent deep vein thrombosis (DVT)
- Thrombocytopenia (HCC)
- Imbalance
- Primary osteoarthritis of both hips
- Non-pressure chronic ulcer of left ankle with fat layer exposed (HCC)
- Non-pressure chronic ulcer of left calf with fat layer exposed (HCC)
- Peripheral vascular disease, unspecified (HCC)
- Cellulitis of left leg
- Venous ulcer of left leg (HCC)
- Homeless

- Normocytic anemia
- Severe protein-calorie malnutrition (HCC)
- Urge urinary incontinence
- Vitamin D deficiency

SH:
Social History

Social History Narrative

6/15/2010 Grew up on Bainbridge. Both parents from Paris. Spoke French at home and English in Public. She recalls her first clot was in her legs when she was 30. She also developed clot in her arms later. She states her grandmother had the same problem.

William E Neighbor, MD

Habits: denies tobacco, ETOH or drug use
Prior living situation: homeless now
Widowed. She has two sons. She had been living with her son in subsidized housing and apparently the landlord was affected by her son's behavior, as well as her other son's bullying, and eventually evicted them (per SW note the son reports they left "willingly").
Social Support: family
POLST: Full code, Antibiotics ok, Long term medically assisted nutrition by tube
DPOA: Louis (son) 360-649-5702

MEDICATIONS:
Please review the facility Medication Administration Record (MAR) for the most up to date and accurate medication list. Please call the facility to have latest medication administration record faxed.

PULM: normal, unlabored, and regular respiratory effort, CTA B/L.
ABD: normal BT all quadrants, non-tender, non-distended, no masses
MSK: kyphotic, changes in hands consistent w/ OA. MAE
EXT: no c/c/. LLE in xeroform wrap. RLE calf tenderness with deep palpation
NEURO: no focal deficits, Normal tone, motor symmetry
SKIN: dry wnl temp and color, no apparent rash
Labs: nursing home labs not done through UW system, please check with the facility.
- CBC, CMP unremarkable
- INR at goal
- RLE duplex free of active clot

A/P:
(M79.604, M79.605) Leg pain, bilateral (primary encounter diagnosis)
Peripheral vascular disease, unspecified (HCC)
(I83.029) Venous ulcer of left leg (HCC) (I73.9)
Plan:
- pain likely related to her poor circulation
- Norco 5-325 mg tab, 1 - 2 tabs po prn q 4 hrs for pain
- continue wound care as ordered
- she will followed by vascular clinic
- f/u with NW wound NP at SNF weekly and at the clinic as needed
- continue supportive care with ADLs
- continue Pentoxifylline 400 mg po q 8 hrs

(Z86.718) History of recurrent deep vein thrombosis (DVT)
(Z79.01) Long term current use of anticoagulant therapy
Plan:
- continue chronic anticoagulation with Coumadin
- INR has been at therapeutic
- INR goal is 2 - 3
- continue to check INR twice a week

(G31.84) Mild cognitive impairment
Plan:
- stable without behaviors or resistive to care
- continue supportive care
- monitor for mood/behavioral changes

(I10) Essential hypertension
Plan:
- stable, no longer on meds
- continue to monitor

(D64.9) Normocytic anemia
Plan:
- stable

(E78.5) Other and unspecified hyperlipidemia
Plan:
- no longer on statin

(M16.0) Primary osteoarthritis of both hips
(M47.816) Osteoarthritis of lumbar spine, unspecified spinal osteoarthritis complication status
(M62.81) Weakness of trunk musculature
(R29.898) Leg weakness, bilateral

07/06/2018 - Outside Care Encounter in POST-ACUTE CARE SVC (continued)

Clinical Notes (continued)

Plan: - PT and OT as scheduled
- supportive care with ADLs
- Norco 5-325 mg tab, 1 - 2 tabs po prn q 4 hrs for pain

(E11.9) Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)
Plan: - diet controlled

(H40.9) Unspecified glaucoma(365.9)
Plan: - stable, continue home regimen
- Timolol 0.5% 1 drop both eyes BID

(E43) Severe protein-calorie malnutrition (HCC)
Plan: - weight is gradually trending up. Appetite has been somewhat fairly good.

Clinical Notes

Progress Notes

Touray, Ibrahima, ARNP at 6/22/2018 2359

University of Washington Post-Acute Care Service

Skilled Nursing Facility:
Park Ridge Care Center (PRCC)
1250 NE 145th St.
Shoreline, WA 98155
Phone: (206) 363-5856
Fax: (206) 365-0568

Patient seen today for: SNF f/u visit

History:
93 year old female with history of severe peripheral vascular disease of both venous and arterial, recurrent DVTs, chronic anticoagulation (coumadin), DM II, OA of both hips, homelessness, admitted at Park Ridge Care Center on 6/4/18 from NWH where she was hospitalized from 5/31/18 to 6/4/18 for worsening stasis ulcers on her left lower extremity and cellulitis.

She as previously followed by the NW wound clinic for her venous stasis multiple ulcers of LLE. During her follow up appointment at the clinic there was concern for worsening cellulitis, hence admitted for further workup. She was started on Cefazolin empirically. Wound culture later grew MSSA and Pseudomonas. She will continue to be closely followed by the wound clinic team at NW.

On admission her INR was 4.9. coumadin was subsequently held for few days and then gradually restarted. She also

received some IV fluid for dehydration.

Hx Interval:
Today, she states that she is doing much better and think she is gradually improving. She is not complaining of any worsening pain to the legs. She states current pain level is 4/10 and is actually better than last week. She is getting Norco as needed with good effects. She is was seen by NW wound clinic three days ago and her left leg wounds were debrided. She is participating in therapy sessions, requires one person assist with ADLs, ambulates with FWW with assist. Appetite is good consuming 75 to 100% of her meals. She remains calm and cooperative with care and treatments.

ROS:
Denies fever, chills, sob, n/v, chest pain, headache, diarrhea or constipation.
Rest of the ROS reviewed and were negative except for as above

PMH:
Patient Active Problem List
Diagnosis

- Sensorineural hearing loss, unspecified
- DVT, recurrent, lower extremity, chronic (HCC)
- Other and unspecified hyperlipidemia
- Generalized osteoarthrosis, unspecified site
- Essential hypertension, benign
- Unspecified glaucoma(365.9)
- Routine general medical examination at a health care facility
- Type 2 diabetes mellitus without complication (HCC)
- Unspecified vitamin B deficiency
- Long term current use of anticoagulant therapy
- Osteoporosis, unspecified
- Osteoarthritis of lumbar spine
- Urine incontinence
- Pseudophakia, both eyes
- Hip joint stiffness
- Leg weakness, bilateral
- Weakness of trunk musculature
- Other physical therapy
- History of recurrent deep vein thrombosis (DVT)
- Thrombocytopenia (HCC)
- Imbalance
- Primary osteoarthritis of both hips
- Non-pressure chronic ulcer of left ankle with fat layer exposed (HCC)
- Non-pressure chronic ulcer of left calf with fat layer exposed (HCC)
- Peripheral vascular disease, unspecified (HCC)
- Cellulitis of left leg
- Venous ulcer of left leg (HCC)
- Homeless
- Normocytic anemia
- Severe protein-calorie malnutrition (HCC)
- Urge urinary incontinence

SH:
Social History

Social History Narrative

6/15/2010 Grew up on Bainbridge. Both parents from Paris. Spoke French at home and English in Public. She recalls her first clot was in her legs when she was 30. She also developed clot in her arms later. She states her grandmother had the same problem.

William E Neighbor, MD

Habits: denies tobacco, ETOH or drug use
Prior living situation: homeless now
Widowed. She has two sons. She had been living with her son in subsidized housing and apparently the landlord was affected by her son's behavior, as well as her other son's bullying, and eventually evicted them (per SW note the son reports they left "willingly").
Social Support: family
POLST: Full code, Antibiotics ok, Long term medically assisted nutrition by tube
DPOA: Louis (son) 360-649-5702

MEDICATIONS:
Please review the facility Medication Administration Record (MAR) for the most up to date and accurate medication list. Please call the facility to have latest medication administration record faxed.

Clinical Notes (continued)

SKIN: dry wnl temp and color, no apparent rash
Labs: nursing home labs not done through UW system, please check with the facility.

A/P:
(I83.029) Venous ulcer of left leg (HCC) (primary encounter diagnosis)
Plan: - continue wound care as ordered
- f/u with NW wound NP at SNF weekly and at the clinic as needed
- Norco 5-325 mg tab, 1 - 2 tabs po prn q 4 hrs for pain

(I73.9) Peripheral vascular disease, unspecified (HCC)
Plan: - continue supportive care
- continue Pentoxifylline 400 mg po q 8 hrs

(L03.116) Cellulitis of left leg
Plan: - completed ABO and resolved

(Z86.718) History of recurrent deep vein thrombosis (DVT)
(Z79.01) Long term current use of anticoagulant therapy
Plan: - continue chronic anticoagulation with Coumadin
- INR goal is 2 - 3
- INR yesterday = 3.1 on 5.5 mg, dose reduced the dose to 4.5 mg
- continue to check INR twice a week

(G31.84) Mild cognitive impairment
Plan: - continue supportive care
- monitor for mood/behavioral changes

(I10) Essential hypertension
Plan: - stable, since her ARB (Losartan) was stopped couple of weeks ago due to hyperkalemia
- continue to monitor

(E87.5) Hyperkalemia
Plan: - stable since her ARB was stopped couple of weeks ago

(D64.9) Normocytic anemia
Plan: - stable

(E78.5) Other and unspecified hyperlipidemia
Plan: - no longer on statin

(M16.0) Primary osteoarthritis of both hips
(M47.816) Osteoarthritis of lumbar spine, unspecified spinal osteoarthritis complication status
(M62.81) Weakness of trunk musculature
(R29.898) Leg weakness, bilateral
Plan: - PT and OT as scheduled
- supportive care with ADLs
- Norco 5-325 mg tab, 1 - 2 tabs po prn q 4 hrs for pain

(E11.9) Type 2 diabetes mellitus without complication, without long-term current use of insulin (HCC)
Plan: - diet controlled

(H40.9) Unspecified glaucoma(365.9)
Plan: - stable, continue home regimen

06/22/2018 - Outside Care Encounter in POST-ACUTE CARE SVC (continued)

Clinical Notes (continued)

- Timolol 0.5% 1 drop both eyes BID

(E43) Severe protein-calorie malnutrition (HCC)
Plan: - weight is gradually trending up. Appetite has been good.
- will continue to monitor
- followed by dietician

(E53.9) Unspecified vitamin B deficiency
Plan: - Vitamin B_{12} 1000 mcg po daily

(E55.9) Vitamin D deficiency
Plan: - recent Vit D 25-OH was 24.3 on 6/8/18
- Vitamin D_3 50,000 units po week x 6 weeks (thru 7/28/18)
- continue Vitamin D_3 1000 units po daily

Clinical Notes

Progress Notes

Ohlsson, Anna, MD at 6/19/2018 1530

UW Vascular Surgery at Northwest Hospital

Provider: John Rollo, MD
Visit Date: 6/19/2018
CHIEF COMPLAINT: ER FOLLOW UP (Insufficient flow)

REFERRING PROVIDER:
Dr. No ref. provider found

HPI:
Jeanne Leonie Hoffman is a 93 year old female with chronic left leg wounds who was recently hospitalized for LLE cellulitis. She has completed her antibiotics and follows up regarding her venous and arterial disease. Ms. Hoffman has had recurrent left leg ulcers over several years s/p skin grafting in the past. Over the past year, she has had recurrence and worsening of her leg ulcers with a new ulcer on her posterior calf. She states she is having her leg wrapped twice a week and has been having some debridements. She continues to live out of a tent with her son. She has had intermittent severe swelling bilaterally, worse in her left leg, which has improved with ace wrapping.

REVIEW OF SYSTEMS:
A complete review of systems was completed and is negative unless stated in the HPI.

PHYSICAL EXAM:
BP 146/66 | Pulse 62 | Ht 5' 2" (1.575 m) | Wt 110 lb (49.9 kg) | BMI 20.12 kg/m²
Constitutional: Well-developed and well-nourished female, in no obvious distress.
Mental Status: She is awake, alert, and oriented with intact memory, language, and fund of knowledge.
Neurological: normal
Musculoskeletal / Motor: normal. intact no deficits 5/5 strength
HEENT: Normal
Chest: Normal
Cardiovascular: Cardiac examination is normal with regular rate and rhythm.
Abdomen: The abdomen is benign.
Skin RLE: No ulcers or lesions.
RLE Pulse exam: Palpable femoral and DP pulse
Skin LLE: 3 venous ulcers along the distal lower leg, ~5cm x3cm wide on posterior calf, 2x2cm on medial ankle, and 1x1cm on lateral ankle

LLE Pulse exam: palpable DP pulse and femoral pulse

IMAGING RESULTS / LAB RESULTS:

Venous duplex demonstrating bilateral GSV reflux
Arterial duplex: Right ABI 1.45, TBI 0.49 and Left TBI 0.35. The right popliteal artery is 20-49% stenosis with distal occlusion of PT. Three vessel runoff bilaterally. Left SFA and popliteal stenosis of 20-49%.

CURRENT MEDICATIONS:

Social History Narrative

Soc Hx.
1/30/2007 Nancy at Helpline House, 282 Knechtel Ave NE, Bainbridge Island , WA 98110 Voice 842-7624, Fax 842.9867, called last week. See RN telephone. Note. The plan is to call Nancy once I have assessed Mrs. Hoffman's needs when I see her at an upcoming visit.

6/15/2010 Grew up on Bainbridge. Both parents from Paris. Spoke French at home and English in Public. She recalls her first clot was in her legs when she was 30. She also developed clot in her arms later. She states her grandmother had the same problem.

William E Neighbor, MD

I personally reviewed and confirmed the ROS, past medical history, past surgical history, family history and social history in the record with the patient today.

IMPRESSION / ASSESSMENT:

		ICD-10-CM	ICD-9-CM	
1.	**Venous ulcer of left leg (HCC)**	**I83.029**	**454.0**	**REFERRAL TO WOUND CARE**

Jeanne Leonie Hoffman is a 93 year old female with chronic left leg wounds who was recently hospitalized for LLE cellulitis who presents for follow up of her venous ulcers. Ms. Hoffman's ulcers are in an area where she has notable venous reflux on her duplex which is suggestive that it is playing a significant role in her nonhealing wounds. We recommend proceeding with RFA and possible microphlebectomies to help improve her venous disease and help heal her ulcers. Additionally we believe she would benefit from weekly visits for debridement at the wound care clinic and will refer her there. We discussed the risks and benefits of RFA and microphlebectomies including bleeding, DVT, and need for repeat intervention in the future. She understands and agrees with the plan.

-LLE RFA and microphlebectomies
-refer to wound care for weekly debridements and compression wraps

I saw and evaluated the patient with the resident on the date of service and agree with the note as written above. Assessment: LLE venous insufficiency and severe non-healing venous stasis ulcers. Plan: RFA and phlebectomy

The risks benefits and alternatives of endovenous saphenous vein ablation, sclerotherapy and micro-phlebectomy were discussed at length with the patient and She agrees to proceed with the operation. The risks discussed include bleeding, nerve damage, numbness, pain, failure, bruising, recurrent varicose veins, permanent staining, DVT and pulmonary embolism. All questions and concerns were addressed.

John Rollo MD
UW Vascular Surgery

06/19/2018 - Office Visit in UW Medicine Northwest Surgical Services and Hernia Center (continued)

Clinical Notes (continued)

Prior EMR records reviewed as available and clinically relevant. All questions answered. Follow up instructions were discussed with the patient. The patient fully understands and is in agreement with the plan.

Clinical Notes

Progress Notes

Ong, Thuan Duc, MD at 6/7/2018 2025

University of Washington Post Acute Care Service

Skilled Nursing Facility (SNF):
Park Ridge Care Center (PRCC)
1250 NE 145th St.
Shoreline, WA 98155
Phone: (206) 363-5856
Fax: (206) 365-0568

ADMIT HISTORY AND PHYSICAL

Date of Admission to SNF: 6/4/18

Date of Encounter: 6/7/2018

Reason for admission to PRCC: s/p hospitalization for worsening stasis ulcers, now admitted to SNF for rehab and wound care.

Primary care provider: Neighbor Jr., William E, MD

Interval History:
ID/CC: 93 year old female with with severe peripheral vascular disease both venous and arterial who came in with worsening stasis ulcers on her left lower extremity and cellulitis admitted to NWH from 5/31/18 to 6/4/18.

Her son, Louis, is present for this visit,

Venous stasis ulcers: LLE, multiple, has known PVD as well, using Xeroform with leg wraps but not pressure wraps. She appreciates the care she is receiving here.

Homelessness: pt and son were forced out of their apartment and have been living in a tent for several weeks. When asked what here plans are when her wounds heal up, she states "I am going back to my tent".

Low grade fever: noted last night, 99F, normalized today, stat labs drawn one day prior and noted K+ elevated to 5.6, and H/H went from 11.7/35.5 to 9.8/30 in a single day. Her prior H/H appear to be in the range of 9/30. She denies any localizing sx.

Comprehensive functional assessment:
ADLS: independent prior Hygiene, Dressing, Feeding, Transferring, Toileting, Ambulation
IADLS: requires assistance w/Telephone, Shopping, Food, Housekeeping, Laundry, Transport, Meds, Finances
Memory: no concerns
Swallow: no concerns
Falls/Balance: no recent falls
Assistive devices: walks w/ 4WW
Incontinence: positive for urge UI
Mood: "good"

ROS:
Complete ROS is negative, except for hard of hearing

PMH/Problem List:
Patient Active Problem List

Diagnosis	Date Noted
• Osteoporosis, unspecified T spine X ray 3/4/2008 showed ostepenia and compression wedging of vertebra. Summer 2008 Vit D 25 total 20.5. Advised Vitamin D 800 IU daily. Began fosamax spring 2008. Continued for five years, then stopped	03/04/2008
• Long term current use of anticoagulant therapy	01/08/2008

06/07/2018 - Outside Care Encounter in POST-ACUTE CARE SVC (continued)

Clinical Notes (continued)

Reason for anticoagulation: Recurrent dvts
Duration of anticoagulation: life
INR goal: 2.-3 (lower end of this range desired because of age)

- Unspecified vitamin B deficiency 05/01/2007
  Vitamin B12 217 in February 2007; however methylmalonic acid and homocysteine levels normal ruling out diagnosis of B12 deficiency

- Type 2 diabetes mellitus without complication (HCC) 03/27/2007
  Year onset: Dx March 2007
  Metformin discontinued 2011 as A1c in target range without it.
  Diet and weight controlled.

- Sensorineural hearing loss, unspecified 11/20/2006
  Has bilateral hearing aids.
  6/3/2008 hearing worse. Ears clean. Advise follow with audiology.

- DVT, recurrent, lower extremity, chronic (HCC) 11/20/2006
  Recurrent DVT and phlebitis since 1982
  Per Vascular Surgery note 5/9/2006: continue warfarin
  3/9/2010 Lower extremity arterial vascular ultrasound studies normal

- Other and unspecified hyperlipidemia 11/20/2006
  On lipitor. Tried discontinuing but LDL cholesterol markedly increase. Now low dose effective.

- Generalized osteoarthrosis, unspecified site 11/20/2006
  LS spine. Bilateral talonavicular arthritis since 1994.

- Essential hypertension, benign 11/20/2006
- Unspecified glaucoma(365.9) 11/20/2006
  4/1/2014 refilled timolol but do not seen recent eye clinic visit.
  Patient to be seen in eye clinic.
  William E Neighbor JR, MD

- Routine general medical examination at a health care facility 11/20/2006
  Td/Tdap (q 10 yr): See immmunizations
  Pneumococcal (65 yoa and high risk x1): See imms
  Blood pressure: Dx hypertension
  Cholesterol: dx hyperlipidemia
  Mammogram (q 1 yr begin at age 40-50 yrs): neg spring 2011
  Pap smear (q2-3 yrs to age 65)--82 years old
  Colorectal cancer screening: Sig to 30 cm in May 2001.
  Previoiusly had refused studies. Heme neg 2008. 4/29/2010 heme x 3 neg.

Tobacco: no
Alcohol: no
Drugs: no
Sexual practice/contraception: Not active
Advanced directives: Yes/ 9/21/2016 POLST forms signed.
Scanned to record.
Advised osteoporosis prevention in 2005. Vit D 25 20 on 4/3/2008 .
Advise Vit D 800 IU daily.

• Venous ulcer of left leg (HCC)	06/07/2018
• Homeless	06/07/2018
• Normocytic anemia	06/07/2018
• Cellulitis of left leg	05/31/2018
• Non-pressure chronic ulcer of left ankle with fat layer exposed (HCC)	05/17/2018
• Non-pressure chronic ulcer of left calf with fat layer exposed (HCC)	05/17/2018
• Peripheral vascular disease, unspecified (HCC)	05/17/2018
• Primary osteoarthritis of both hips	02/01/2017
• Thrombocytopenia (HCC)	11/02/2016
• Imbalance	11/02/2016

• Other physical therapy	01/22/2015
• Hip joint stiffness	01/06/2015
• Leg weakness, bilateral	01/06/2015
• Weakness of trunk musculature	01/06/2015
• Pseudophakia, both eyes	11/08/2014
• Urine incontinence Uses pads	08/27/2014
• Osteoarthritis of lumbar spine	08/30/2013

ALLERGIES: Review of patient's allergies indicates:

Allergies

Allergen	Reactions
• Adhesives	
• Aspirin	Other
• Nitrofurantoin *Confusion, loss of appetitie, nausea, abdominal pain*	Other
• Nitrofurantoin *confusion*	Other
• Penicillins	Rash
• Sulfa Antibiotics	Rash

Medication orders reviewed in MAR: X
Current nursing home medications reviewed on the medical record.
Please review the facility Medication Administration Record (MAR) for the most up to date and accurate medication list.
To obtain current medication list please call the facility and ask for medication administration record to be faxed.

Family History:
Parents died of old age

Social History:
Habits: NONE
Prior living situation: homeless now
Widowed. She has two sons. She had been living with her son in subsidized housing and apparently the landlord was affected by her son's behavior, as well as her other son's bullying, and eventually evicted them a couple of months ago (per SW note the son reports they left "willingly".
Social Support: son, Louis, 360-649-5702
POLST completed, in summary - FULL
DPOA: son, Louis

Physical Exam:
BP 118/55 | Pulse 70 | Temp 98.1 °F (36.7 °C) | Resp 20 | Wt 110 lb 2 oz (50 kg) | BMI 20.81 kg/m²
Wt Readings from Last 3 Encounters:
06/07/18 110 lb 2 oz (50 kg)
05/31/18 112 lb (50.8 kg)
05/17/18 109 lb 6.4 oz (49.6 kg)

GEN: appears older stated age, accompanied by son . Appears nourished, adequately hydrated, and groomed. Alert and responding appropriately and in no acute distress, HOH
PSYCH: alert and oriented x3, interactive, speech w/o dysarthria, full affect, focused content, logical process, no hallucinations or psychomotor agitation
HEENT: NCAT, NL external ears, hearing aid in L ear, Poor dentition, moist mucous membranes, oropharynx clear. EOMI and anicteric, corrective lens, R facial droop
CV: RRR, NL S1 and S2, G 1/6 sys murmurs, no r/g, no JVD.
PULM: normal, unlabored, and regular respiratory effort, CTA B/L.
ABD: normal BT all quadrants, non-tender, non-distended, no masses
MSK: kyphotic, changes in hands consistent w/ OA.
EXT: no c/c, LLE in Xeroform wrap, 1+ edema,
NEURO: MAE, no tremors, no focal deficits, normal tone, motor symmetry. AD8=2
SKIN: dry wnl temp and color, no apparent rash

Labs/Imaging: Reviewed in chart:

Upcoming Appointments:
Future Appointments

Date	Time	Provider	Department	Center
6/19/2018	3:30 PM	Rollo, Johnathon Curtis, MD	NWSSH	NWH SSHC

Assessment/Plan:
(I83.029) Venous ulcer of left leg (HCC) (primary encounter diagnosis)
Plan: wound care

(I73.9) Peripheral vascular disease, unspecified (HCC)
Plan: supportive care, cont w/ pentoxifylline

(Z86.718) History of recurrent deep vein thrombosis (DVT)
Plan: appears to be recurrent

(Z79.01) Long term current use of anticoagulant therapy

06/07/2018 - Outside Care Encounter in POST-ACUTE CARE SVC (continued)

Clinical Notes (continued)

Plan: INR 2.1 now, LMWH stopped, cont w/ coumadin

(G31.84) Mild cognitive impairment
Plan: AD8 score was a 2, will have SLP assess

(Z59.0) Homeless
Plan: see below.

(E87.5) Hyperkalemia
Plan: odd, that it would change over the span of a day, she reports she has had this issue previously
-Kayexlate 15g x1
-stop ARB

(I10) Essential hypertension
Plan: SBP in the 110s, ok to liberalize, stop ARB

(D64.9) Normocytic anemia
Plan: stable

(E78.5) Dyslipidaemia
Plan: stop statin

POLST: FULL

Disposition: she has the capacity to elect to move out w/ her son at any time, though would benefit from a roof over her head. SNF SW working on establishing housing.

The patient's risk is moderate.
Problem category: is new, Moderate problem.
The medical decision making is High.

This report is for documentation purposes only. The patient should not follow medication instructions within. For accurate instructions regarding medications, the patient should instead consult their physician or after visit summary.

Prior To Admission

None

Discharge Medication List

Unclassified (OTHER MEDS, SEE COMMENTS,)

Discontinued by: Ong, Thuan Duc, MD | Discontinued on: 6/7/2018
Instructions: Vitamin B12 500 mcg once daily over the counter
Entered by: Neighbor Jr., William E, MD | Entered on: 2/21/2014
Start date: 2/21/2014 | End date: 6/7/2018

Pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD | Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD | Ordered on: 12/20/2017
Start date: 12/20/2017 | End date: 9/4/2019
Quantity: 270 tablet | Refill: 3 refills remaining

Atorvastatin Calcium 20 MG Oral Tab

Discontinued by: Ong, Thuan Duc, MD | Discontinued on: 6/7/2018
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD | Ordered on: 12/20/2017
Start date: 12/20/2017 | End date: 6/7/2018
Quantity: 45 tablet | Refill: 3 refills remaining

Warfarin Sodium (COUMADIN) 5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD | Discontinued on: 9/26/2018
Reason for discontinuation: Dose adjustment
Instructions: 1 TAB PO ONCE each evening except one half tab on Thursdays and Sundays
Authorized by: Neighbor Jr., William E, MD | Ordered on: 12/20/2017
Start date: 12/20/2017 | End date: 9/26/2018
Action: Patient taking differently | Quantity: 90 tablet
Refill: 3 refills remaining

Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD | Discontinued on: 11/29/2018
Reason for discontinuation: Reorder
Instructions: one po once daily for arthritic pain as needed

05/31/2018 - Admission (Discharged) in NWH MED SURG EXTENDED (continued)

Medication List (continued)

Authorized by: Neighbor Jr., William E, MD
Start date: 12/20/2017
Action: Patient taking differently
Refill: 2 refills remaining
Ordered on: 12/20/2017
End date: 11/28/2018
Quantity: 60 tablet

Losartan Potassium 25 MG Oral Tab

Discontinued by: Ong, Thuan Duc, MD
Instructions: TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY
Authorized by: Neighbor Jr., William E, MD
Start date: 12/8/2017
Quantity: 45 tablet
Discontinued on: 6/7/2018
Ordered on: 12/8/2017
End date: 6/7/2018
Refill: 2 refills remaining

Timolol Maleate 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Reason for discontinuation: Reorder
Instructions: INSTILL ONE DROP IN EACH EYE TWICE DAILY.
Authorized by: Neighbor Jr., William E, MD
Start date: 12/8/2017
Quantity: 5 mL
Discontinued on: 4/16/2019
Ordered on: 12/8/2017
End date: 4/12/2019
Refill: No refills remaining

Doxycycline Hyclate 100 MG Oral Tab

Discontinued by: Ong, Thuan Duc, MD
Instructions: Take 100 mg by mouth 2 times a day.
Entered by: Wilcox, Monica, PSS/PSR
End date: 6/7/2018
Discontinued on: 6/7/2018
Entered on: 4/30/2018

LEVOFLOXACIN OR

Discontinued by: Ong, Thuan Duc, MD
Entered by: Wilcox, Monica, PSS/PSR
End date: 6/7/2018
Discontinued on: 6/7/2018
Entered on: 4/30/2018

Clinical Notes

Progress Notes

Luu, Paul, MD at 5/31/2018 0930

Chief Complain: @REASONFORVISIT@
She complains of significant pain over the left calf and ankle. She is still homeless. Per son, she is not elevating her left leg.

Visiting diagnosis: **1. Non-pressure chronic ulcer of left calf with fat layer exposed (HCC)**
- NURSING COMMUNICATION
- WOUND CULTURE W/GRAM ORDER

Clinical Notes (continued)

2. Non-pressure chronic ulcer of left ankle with fat layer exposed (HCC)
- NURSING COMMUNICATION
- WOUND CULTURE W/GRAM ORDER

3. Cellulitis of left leg
- WOUND CULTURE W/GRAM ORDER

Exam: Left calf is red with multiple petechiae circumferentially. Skin of calf and ankle is excoriated or macerated. All four wounds (two over calf and two over ankle) are covered with fibrin but no foul odor. The left calf and ankle are warm to touch. No sign of ischemia of foot and toe. Foot and toes are warm to touch with brisk capillary refill. Calf has pain with at rest during exam without touching.

No short of breath, no chest pain. (She is crying during examination)

Lab: None

Final diagnosis: Left calf and ankle cellulitis. Uncontrollable pain of left lower extremity

Treatment plan: Direct admit to Northwest hospital for treatment of cellulitis. Consult in-patient team to rule out coumadin drug reaction, DVT, etc.

Follow up: Direct admit to hospital from wound care center.

Paul Luu, MD

Electronically signed by Luu, Paul, MD at 5/31/2018 12:28 PM

Null, Margaret K, RN at 5/31/2018 0930

Pt presented today with worsening left calf and ankle wounds. She has copious drainage causing excoriation on the entire calf. She reports pain of 10-20 and appears to be in pain. Her son reports he thinks the increased drainage is related to her coumadin. We are concerned she may have cellulitis that is uncontrolled. Her son states he is unable to get her to comply with leg elevation at home. She is still homeless and is living in a tent with her son. Dr.Luu and I discussed with the pt and her son our recommendation to be hospitalized and eventually transfer to Rehab facility. They both agreed with the plan. Dr.Luu will admit today. We coordinated with the admitting dept to find a placement for her. Pt taken to admitting via escort and wheelchair.

Luu, Paul, MD at 5/17/2018 1000

05/17/2018 - Office Visit in Northwest Hospital Wound Care & Hyperbaric Center (continued)

Clinical Notes (continued)

Chief Complain: Multiple open wounds over left leg

Visiting diagnosis: **1. Non-pressure chronic ulcer of left ankle with fat layer exposed (HCC)**
- NURSING COMMUNICATION

2. Non-pressure chronic ulcer of left calf with fat layer exposed (HCC)
- NURSING COMMUNICATION

3. Peripheral vascular disease, unspecified (HCC)
- NURSING COMMUNICATION

Exam: All four wounds (two on calf and two on ankle of left leg) are covered with significant of fibrin. After debridement, both calf wounds bled well, ankle wounds have mild bleeding. All wounds have healthy base with red granulation tissues. No foul odor no celllulitis.

Lab: none

Final diagnosis: Multiple ulcers of left lower extremity

Treatment plan: Using a sharp curette, all four wounds were debrided including subcutaneous tissue, until positive bleeding. Total wound area (all four wounds) prior debridement was 37.34 cm^2. The post debridement of all four wounds is the same (37.34 cm^2). The wound bed depth of all four wounds is approximately 0.2 cm.
The son will continue to do dressing change daily or at least 3x/week with Medihoney.
She is still homeless at the present!

Follow up: Return in about 2 weeks (around 5/31/2018).

Paul Luu, MD

Addendum: The total area of debrided wound was 37.34 cm^2.

Paul Luu,M.D.

Clinical Notes

Telephone Encounter

Null, Margaret K, RN at 5/3/2018 1504

Dr. Neighbor called to report he saw her in his office. He reports the wounds had a darker edge to them. No signs of infection. She has some petechiae on her foot. He may order a venous doppler. I will reach out to the family and try to get her in within 1-2 weeks.

Electronically signed by Null, Margaret K, RN at 5/3/2018 3:18 PM

Clinical Notes

Progress Notes

Silue, Ruth Ann, RN at 5/3/2018 1400

Wound care done per orders from NW wound clinic: wounds were cleansed with normal saline; applied Medihoney foam; covered with vaseline guaze and wrapped with plain guaze. Used elastic mesh to cover the dressing and keep in place.
Ruth Silue, RN

Electronically signed by Silue, Ruth Ann, RN at 5/3/2018 4:17 PM

Neighbor Jr., William E, MD at 5/3/2018 1400

Jeanne Leonie Hoffman is a 93 year old female here to discuss the following:
Chief Complaint

Clinical Notes (continued)

Patient presents with
- Wound Check/Dressing Change
- RN30

History:
Brought in by her son this afternoon as they happened to be at UW dentistry. Jeanne is without her hearing aids as new ones are to arrive next week. She is continuing to receive wound care a NW wound care. She was seen for debridement last week and has follow up in three weeks.

In the last couple of days she has noted some black discoloration around the edges of one wound that was debrided and some pinpoint red spots of foot.

She has had no fever or chills.

She continues to be homeless and living with her son in tent on Bainbridge. They have had a court hearing recently and hope to have housing soon. Adult protective services involved as documented in prior encounter.

New dressing supplies were ordered for them by NW wound care but are only coming today and tomorrow.

Review of Systems:
No fever, chills, sweats, or discharge other than serous fluid.

Medications
No outpatient prescriptions have been marked as taking for the 5/3/18 encounter (Office Visit) with Neighbor Jr., William E, MD.

Objective:
BP 122/78 | Pulse 76 | Temp 97.7 °F (36.5 °C) (Oral)
Estimated body mass index is 22.52 kg/m² as calculated from the following:
Height as of 7/29/15: 5' 1" (1.549 m).
Weight as of 2/28/18: 54.1 kg (119 lb 3.2 oz).

Orthostatic Vitals

BP	Pulse	Position	Site	Cuff Size	Time	Date
122/78	76	---	---	---	1:50 PM	5/3/2018

Last blood pressure recorded in this encounter: 122/78
General: Complaining of pain in the areas of the wound but no throbbing pain in the food
MSK and skin: Left lower leg shows three areas of skin breakdown: Left anterior lateral leg measuring 9 cm in legnth by 4 cm in width with 1-2 mm of blackened skin edge and red fleshing somewhat bloody tissue exposed in wound. There is some serous fluid but no other discharge. There is no surrounding induration, redness, or tenderness to suggest infection. Dorsolateral left foot shows much smaller area of skin breakdown that is 3 cm by 1.5 cm. Posterior lower leg area that is 4 cm x 2 cm with similar appearance. Foot is warm with good capillary refill. There are a few petechia in the forefoot dorsum. No increased warm over skin of lower leg in any area.

Patient is afebrile.

Lab and other tests: none

Assessment and Plan:
(L98.491) Skin ulcer, limited to breakdown of skin (HCC) (primary encounter diagnosis)

05/03/2018 - Office Visit in Husky Health Primary Care Clinic (continued)

Clinical Notes (continued)

(I87.2) Venous insufficiency

Three skin ulcerations that are larger than when I last saw her several weeks ago. She is receiving continuing care at NW Wound Care by Dr. Liu and nurse Margie. I spoke with Margie by phone at telephone 206-668-1244. Jeanne was seen there one week ago. Confirmed that extensive debridement completed which accounts for the beefy red appearance of the wounds. Her follow up is not for three weeks but they will move the appointment up to next week. They will call Louis her son who is with her today. I do not believe there is cellulitis present today.

Plan:
--Wound was redressed following the instructions that Margie had given to Jeanne and Louis. Medihoney with Vaseline gauze applied to each wound, topped with 4x4 and the then held in place with gauze wrap.
--Re dress the wound on their own with the wound supplies which they have on order and some of which have arrived.
--INR pending today. If adequate then doubt clot, but if not adequate then would be concerned petechiae could be indication of DVT or SVT clot.
--Instructed to watch for signs of infection.
--I do feel that Jeanne would benefit from short term stay in continuing care facility but she has been resistant to this. She should follow up here or at Northwest within the next week.

Result Notes

Older Notes

Notes recorded by Neighbor Jr., William E, MD on 5/3/2018 at 7:11 PM PDT
Jeanne and Louis
Jeannes INR is higher than it was two weeks ago being 4.6. This may account from some of the bleeding for the leg ulcerations. It argues against any risk of blood clot.

Her usual dose of coumadin is: 5 mg once each evening except a half tab on Thursdays and Sundays. I know that you stated you are compliant with taking the medicine as directed. I believe that given your living situation you may be eating less green leafy

05/03/2018 - Orders Only in Husky Health Primary Care Clinic (continued)

Labs (continued)

vegetables, broccoli, etc which are sources of vitamin K that balances against the coumadin. So, without eating those vegetables, you need less coumadin.

We first need to correct the INR by having you not take coumadin this evening and tomorrow evening.

Then I would change your prescribed dose to 5 mg once each evening except a hafl tablet on Sundays, Tuesday, and Thursday.

Clinical Notes

Telephone Encounter

Null, Margaret K, RN at 5/2/2018 1622

DSHS Worker called to follow up on patients wound care management. She saw the patient at her tent home earlier this week with the son present. She wanted to check if the patient was receiving adequate care for her wounds. I assured her that the son is doing a good job with her dressing change. She is coming in regularly for her visits to Dr Luu. The wounds are stable. Pt is not ready to go into higher care.

Letters

Letter by Neighbor Jr., William E, MD on 4/19/2018

Status: Sent
Letter body:

April 19, 2018

To: Bainbridge Muncipal Court

RE: Jeanne Leonie Hoffman
DOB: 1/6/1925

To whom it may concern:

I am the primary care provider for Jeanne Hoffman whom I have seen for over 20 years at the University of Washington Medical Center. Jeanne, who is now 93 years of age, has multiple medical issues including slow to heal ulcers of her left lower leg, pain from osteoarthritis, marked hearing impairment, and vein issues in her lower extremities. These require office visits every one to two months. She has received excellent support from her son Louis who has lived with her providing emotional support and care at home as a devoted son.

I understand Jeanne was evicted from her apartment for various reasons. I agree with Dr. Luu that it would be optimal Jeanne live in an apartment independently with her son Louis as primary care giver. Jeanne is a fiercely independent individual who has lived all of her life on Bainbridge Island. I do not think that she would do well without her son for support or in a senor care environment at this time.

Sincerely,

William E. Neighbor, Jr. MD

RE: Hyperbaric Oxygen Therapy for Wound Healing

From	To	Sent and Delivered
Rosanne Asplin	Hoffman, Jeanne Leonie	4/17/2018 10:02 AM

Last Read in MyChart
5/5/2018 3:22 PM by Hoffman, Jeanne Leonie

Hello,

We received your eCare message for Dr. Luu at the NWH Wound Care clinic. We are sorry but that specialty clinic does not use eCare and therefore we are unable to forward your message to them. Please contact them directly so that they may assist you by calling 206-368-1244.

Thank you for using UW Medicine eCare,
Your eCare Support Team

Hyperbaric Oxygen Therapy for Wound Healing

From	To	Sent
Hoffman, Jeanne Leonie	P Mychart Error Pool (supporting Paul Luu, MD)	4/16/2018 12:59 PM

This type of therapy has a proven wound healing.
Jean could benefit from this treatment.

Clinical Notes

Telephone Encounter

Neighbor Jr., William E, MD at 4/9/2018 1706

Update on Jeanne situation and son Louis:
--Paperwork filed with Adult Protective Services last week
--I arranged a motel room for them on Bainbridge Island when I found that they were now living in a tent. The motel room is one they are familiar with at the Quality Inn on Bainbridge. They have been there Friday, Sat, Sun, and will be there tonight. I have a call into her son Louis is see if it needs extension. His cell is 360-649-5702
--On Friday, at Louis request I spoke with their church Pastor Dave O'Connell cell 314-853-2695. His church is small with no building so they have not been able to help Jeanne and Louis as much as they would like.
--Today, 4/9/2018, I spoke with Levon Gibson at Washington State DSHS Adult Protective Services. 360-473-2167 to follow up on the housing situation, their current motel accommodations, next steps.
--I called Louis this latter afternoon and left a message for him to return my call so can determine if temporary accommodations need to be extent for Jeanne which I expect they do.
--Also put another call to Pastor O'Connell.

Homeless Health Care

From	To	Sent
Hoffman, Jeanne Leonie	P Hh Pct Clinical Staff Pool (supporting William E Neighbor Jr., MD)	4/9/2018 7:48 AM

Thank You for the the assistance on Friday Evening.
It was well received.

Louis for Jean:

Jean is doing better with rest.
NWH wound bandages, were hastily applied, once changed, provided relief from irritation.

Island Situation....

Douglas Hoffman, Ron Peltier and Julies Combs Hate group are causing our homelessness. It over my participation in 1970's Stonewall Movement and my publicly coming out as a Gay Man.
I have provided you the facts, over the years of health care.

Dave O'Connell, is not providing necessary support, Rather going along with those advocating hatred, to divide Jean's only care-giving family member (Me).

Jean homelessness encampment has all the amenities of Apt-2 and it is her wishes to stand-by me, as a resolution toward island relocation to AD-West Reality/Island Terrace 2 bedroom.

Today...Monday April 9, 2018 at 10am will file a protection order against Douglas Hoffman April 1, 2018 Attack/other attacks. This will be our 3rd attempt for protection. Douglas is no long part of family, will never be accepted, do to his overt hatred of LGBTQ Americans.

Jean and I will lose all our household belongs, by May 15th. This means ALL including records.....we will be in the same position as WWII 1930 Jews.

Jean does not want to be placed in Wyatt House (Death House) or be banished from Island. The issues, must be resolved on the Island, where it legally started.....moving or running away, will not stop the hatred....it must be stopped here and now.

BIPD Chief Hamner, has been advised, as well as Judaical Misconduct Commission, WSP and other agencies.

Please STAND WITH US.....

Cell is now taking call..... it was on "Do Not Disturb".
Public becoming more aware.

RE: Jeanne Leonie Hoffman
DOB: 1/6/1925

Dear Mr Levon Gibson:

In response to your request for medical information on the above individual dated 4.4.2018

1. Date of last appointment: 2.28.2018

2. Current list of diagnoses and medications:
History recurrent DVTS of lower extremity
Peripheral vascular disease with ulceration of left lower leg
Generalized oseoarthritis
Hypertension
Long term anticoagulation
Type 2 diabetes diet controlled
Imbalance
Hearing impairment requiring hearing aids

Medications:

Outpatient Medications Prior to Visit

Medication	Sig	Dispense	Refill
• Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab	one po once daily for arthritic pain as needed	60 tablet	2
• Atorvastatin Calcium 20 MG Oral Tab	Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction	45 tablet	3

04/04/2018 - Letter (Out) in Husky Health Primary Care Clinic (continued)

Letters (continued)

• Losartan Potassium 25 MG Oral Tab	TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY	45 tablet	2
• Pentoxifylline ER 400 MG Oral Tab CR	Take 1 tablet (400 mg) by mouth 3 times a day.	270 tablet	3
• Timolol Maleate 0.5 % Ophthalmic Solution	INSTILL ONE DROP IN EACH EYE TWICE DAILY.	5 mL	0
• Unclassified (OTHER MEDS, SEE COMMENTS,)	Vitamin B12 500 mcg once daily over the counter		
• Warfarin Sodium (COUMADIN) 5 MG Oral Tab	1 TAB PO ONCE each evening except one half tab on Thursdays and Sundays	90 tablet	3

No facility-administered medications prior to visit.

3. Does the above individual have a functional, mental, or physical inability to care for herself? Yes, physical. Due to her arthritis and hearing impairment, she has difficulty caring for herself. In the past she has been assisted by her son Louis Hoffman.

4. Has the above individual been compliant with medical treatments and medications? Yes, but this has required the assistance of her son in remember to take medications.

5. Do you have any concerns regarding the above individual's ability to care for herself? Yes. Bathing and dressing are difficult because of arthritis and balance issues.

6. Do you have any concerns about the care being provided to the vulnerable adult by any individual. No. Her son Louis Hoffman has gotten along with her well and has been very supportive.

7. Has the above individual had any cognitive screening, ger-psych evaluation or competency evaluation. None recently.

8. Does the patient have any limitations in their ability to make decision and understand the impact consequences of those decisions. No. Mrs. Hoffman is very bright with minimal cognitive impairment based on extensive conversations with her in the office.

Sincerely,

Electronically signed by
William E Neighbor, MD

Discharge Medication List

Unclassified (OTHER MEDS, SEE COMMENTS,)

Discontinued by: Ong, Thuan Duc, MD | Discontinued on: 6/7/2018
Instructions: Vitamin B12 500 mcg once daily over the counter
Entered by: Neighbor Jr., William E, MD | Entered on: 2/21/2014
Start date: 2/21/2014 | End date: 6/7/2018

Pentoxifylline ER 400 MG Oral Tab CR

Discontinued by: Neighbor Jr., William E, MD | Discontinued on: 9/4/2019
Reason for discontinuation: Reorder
Instructions: Take 1 tablet (400 mg) by mouth 3 times a day.
Authorized by: Neighbor Jr., William E, MD | Ordered on: 12/20/2017
Start date: 12/20/2017 | End date: 9/4/2019
Quantity: 270 tablet | Refill: 3 refills remaining

Atorvastatin Calcium 20 MG Oral Tab

Discontinued by: Ong, Thuan Duc, MD | Discontinued on: 6/7/2018
Instructions: Take 0.5 tablets (10 mg) by mouth daily. For cholesterol reduction
Authorized by: Neighbor Jr., William E, MD | Ordered on: 12/20/2017
Start date: 12/20/2017 | End date: 6/7/2018
Quantity: 45 tablet | Refill: 3 refills remaining

Warfarin Sodium (COUMADIN) 5 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD | Discontinued on: 9/26/2018
Reason for discontinuation: Dose adjustment
Instructions: 1 TAB PO ONCE each evening except one half tab on Thursdays and Sundays
Authorized by: Neighbor Jr., William E, MD | Ordered on: 12/20/2017
Start date: 12/20/2017 | End date: 9/26/2018
Action: Patient taking differently | Quantity: 90 tablet
Refill: 3 refills remaining

Acetaminophen-Codeine #3 (TYLENOL WITH CODEINE #3) 300-30 MG Oral Tab

Discontinued by: Neighbor Jr., William E, MD | Discontinued on: 11/29/2018
Reason for discontinuation: Reorder
Instructions: one po once daily for arthritic pain as needed

03/29/2018 - Admission (Discharged) in NWH EMERGENCY DEPT (continued)

Medication List (continued)

Authorized by: Neighbor Jr., William E, MD
Start date: 12/20/2017
Action: Patient taking differently
Refill: 2 refills remaining

Ordered on: 12/20/2017
End date: 11/28/2018
Quantity: 60 tablet

Losartan Potassium 25 MG Oral Tab

Discontinued by: Ong, Thuan Duc, MD
Instructions: TAKE 1/2 TABLET BY MOUTH ONE TIME DAILY
Authorized by: Neighbor Jr., William E, MD
Start date: 12/8/2017
Quantity: 45 tablet

Discontinued on: 6/7/2018
Ordered on: 12/8/2017
End date: 6/7/2018
Refill: 2 refills remaining

Timolol Maleate 0.5 % Ophthalmic Solution

Discontinued by: Neighbor Jr., William E, MD
Reason for discontinuation: Reorder
Instructions: INSTILL ONE DROP IN EACH EYE TWICE DAILY.
Authorized by: Neighbor Jr., William E, MD
Start date: 12/8/2017
Quantity: 5 mL

Discontinued on: 4/16/2019
Ordered on: 12/8/2017
End date: 4/12/2019
Refill: No refills remaining

EKG 12-LEAD Resulted: 03/30/18 1526, Result status: Final result

Order status: Completed
Filed by: Uw Muse Results Interface, User 03/30/18 1526
Resulting lab: UWM EKG

Resulted by: Pungoti, Chetan, MD
Collected by: 03/29/18 1346

Components

Component	Value	Reference Range	Flag	Lab
Ventricular Rate	71	BPM	—	79
Atrial Rate	71	BPM	—	79
P-R Interval	188	ms	—	79
QRS Duration	122	ms	—	79
Q-T Interval	426	ms	—	79
QTC Calculation	462	ms	—	79
P Axis	36	degrees	—	79
R Axis	-31	degrees	—	79
T Axis	8	degrees	—	79
Diagnosis	--	—	—	79

Result:
Normal sinus rhythm
Left axis deviation
Right bundle branch block
Abnormal ECG
No previous ECGs available
Confirmed by Pungoti, Chetan (5012) on 3/30/2018 3:26:05 PM
