2-eH and P Plotkin, MD, Elizabeth 5/31/2018 CUSTDM10\W0TA_STM_BackgroundJ 9/9/2020 4:40:24 AM -04:00

Patient Name: HOFFMAN, JEANNE LEONIE **MR#:** U8170135
Date of Admission: 05/31/2018 **Acct#:** 1827191558
Date of Discharge:
Dictating Physician: Plotkin, MD, Elizabeth

DATE OF SERVICE: 05/31/2018

IDENTIFYING INFORMATION:
Patient is a 93-year-old woman admitted via the Wound Care Clinic by Dr. Paul Luu for management of left lower extremity cellulitis and venous insufficiency ulcers.

HISTORY OF PRESENT ILLNESS:
The patient is a vibrant 93-year-old who has suffered with very difficult problems with venous insufficiency in her left lower extremity, chronic ulcerations, as well as arterial insufficiency with peripheral vascular disease. She has been followed at the Wound Care Clinic because of these vascular ulcers. The patient, unfortunately, was evicted with her son (circumstances unclear) and has
been living in a tent for the past couple of months and, therefore, has not had optimal access to hygiene and leg elevation. Over the past couple of days, she has had increasing pain in her left lower extremity to the point where it is quite intolerable. Her skin has become much more excoriated again which has happened in the past. She was seen at the Wound Care Clinic and Dr. Luu was quite alarmed that she had cellulitis and wanted her admitted for further treatment as well as local wound care. The patient's pain is improved with her leg up in bed at this time. She has not had any notable fever or chills that she can report. She has been attempting usual wound care, but again has not been in optimal circumstances. She has no other specific complaints currently.

PAST MEDICAL HISTORY:
1. Chronic lower extremity ulcerations of left leg for many years.
2. History of venous insufficiency, left leg greater than right.
3. History of arterial insufficiency.
4. History of bilateral lower extremity DVT about 30 years ago, on chronic longstanding warfarin.
5. History of poor balance.
6. Possible peripheral neuropathy.
7. History of right lower extremity fracture.

CURRENT MEDICATIONS:
1. Atorvastatin 10 mg a day.
2. Losartan 12.5 mg a day.
3. Pentoxifylline extended release 400 mg 3 times daily.

4. Warfarin 2.5 mg on Thursdays and Sundays, and 5 mg the other days of the week.
5. Timolol eye drops 0.5%, 1 drop both eyes twice a day.

ALLERGIES:
1. ADHESIVE TAPE
2. PENICILLIN.
3. SULFA.

SOCIAL HISTORY:
The patient was married. She has two sons. She is now widowed. She had been living with her son in subsidized housing and apparently the landlord was affected by her son's behavior, as well as her other son's bullying, and eventually evicted them a couple of months ago (per SW note the son reports they left "willingly". She is quite self-sufficient. Does her own canning of vegetables and fruits. She and her son walk to the Safeway every day to beg for money.

HABITS:
Cigarettes: None. Alcohol: None. Recreational drugs: None.

FAMILY HISTORY:
Mother died of old age at 94. Father died of an infection.

REVIEW OF SYSTEMS:
Complete review of systems is done and is negative except as above.

PHYSICAL EXAM:
VITAL SIGNS: Temperature 36.6, pulse 72, blood pressure 129/67, respiratory rate 16, O2 sat 99% on room air.
GENERAL: The patient is an elderly woman who looks younger than her stated age and is somewhat disheveled.
HEENT: Sclerae anicteric. Oropharynx shows poor dentition.
NECK: Without adenopathy.
CHEST: Clear to auscultation and percussion.

CARDIAC: Regular rate and rhythm. No murmur or gallop.
ABDOMEN: Positive bowel sounds. Soft, nontender. No hepatosplenomegaly or masses.
EXTREMITIES: Right lower extremity shows no edema. There is venous insufficiency, discoloration, and skin appears to be intact. Left lower extremity is wrapped currently in a dressing from below the knee to mid foot.

The areas of skin I can see on the foot are somewhat excoriated as well as those on the upper leg that are visible just below the upper bandage. I have not unwrapped the leg, but there are apparently four venous ulcers present as well as erythema from below the knee to the foot. No obvious edema.
NEUROLOGIC: Patient is alert and oriented x3. Cranial nerves intact. She is able to move all four extremities.

LABS:
Hematocrit 35, white count 5.4, platelets normal. INR is elevated at 4.9. Electrolytes within normal limits. BUN 13, creatinine 0.76, glucose 158, AST 44, ALT 35, bilirubin normal. C-reactive protein is 4.3.

No imaging done today.

IMPRESSION AND PLAN:
1. Left lower extremity venous ulcerations with localized cellulitis and poor access to appropriate skin care. The patient is admitted and started on IV antibiotics with cefazolin. Cellulitis appears to be fairly mild and her white count is normal as well as her CRP. At this time, we will also get acute Wound Care consult for management of skin appropriately. Patient will be able to be in bed with legs elevated which also should help with her pain and seems to have done so, so far. We will co-manage with Dr. Luu currently in the hospital. Most likely, patient will need skilled nursing facility transfer for further wound care at the time of discharge.
2. Coagulopathy. The patient has a history of deep venous thrombosis and is on chronic warfarin. Her INR is elevated. We will hold warfarin for now and ask Pharmacy to help manage to keep INR between 2 and 3.
3. Chronic venous insufficiency as well as arterial insufficiency. The patient will continue on pentoxifylline.
4. Elevated transaminases. This is of unclear etiology. She has not shown this in the past. We will image her liver with an ultrasound for completeness.
5. Homelessness. This certainly is a problem for this patient for appropriate wound care. As mentioned, I suspect she may need skilled nursing facility for ongoing wound care after discharge.
6. Hypertension. Blood pressure is well controlled. Continue low-dose losartan.
7. VTE prophylaxis. Patient is therapeutically anticoagulated.
8. Code status. I began a discussion with the patient about this. At the moment, she wants FULL RESUSCITATION; however, if the case is "hopeless," she would want to be left to die peacefully. For this moment, we will make her FULL RESUSCITATION.

2-eH and P Luu, MD, Paul 5/31/2018 CUSTDM10\W0TA_STM_BackgroundJ 9/9/2020 4:44:02 AM -04:00

Patient Name: HOFFMAN, JEANNE LEONIE **MR#:** U8170135
Date of Admission: 05/31/2018 **Acct#:** 1826819003
Date of Discharge: 20180531
Dictating Physician: Luu, MD, Paul

DATE OF SERVICE: 05/31/2018

HISTORY OF PRESENT ILLNESS:
This is a direct admit for a 93-year-old Caucasian female who had been treated for multiple wounds over the left lower extremity at the Wound Care Center. The patient was seen at the Wound Care Center today and she was found to have a significant amount of skin excoriate with a copious amount of drainage together with uncontrolled pain of the left lower extremity. Therefore, the patient was advised to be admitted to the hospital for treating cellulitis, complicated by peripheral vascular disease together with uncontrollable pain. According to the son, the patient began to feel severe leg pain for the last 2-3 days. He also mentioned that the patient did not elevate the leg at home very well. Currently, her living situation is not adequate to take care of her left lower extremity wounds. The patient is homeless and she lives in a tent with her son. Both take shower and cook at a church near the tents. Otherwise, the son does not know whether the patient had a fever at home. At the present time, the patient complains of severe left leg pain, specifically the calf and ankle at rest without any motion. Typically, the patient has a very high tolerance for pain and at this time she complains of pain associated with tearing in her eyes. The patient denies any recent fever or any lower extremity trauma, blunt trauma. Her son also mentioned that she used her walker with a homeless sign to beg for money.

PAST MEDICAL HISTORY:
Significant for:

1. History of remote deep venous thrombosis with the patient on chronic anticoagulation with Coumadin.
2. History of peripheral vascular disease.
3. History of multiple bouts of local left leg infection. The last hospital admission was on February 1, 2018, for left calf cellulitis.

ALLERGIES:
1. PENICILLIN, which caused a rash and the last time she took was approximately 35 years ago. At that time, the patient also took SULFA, which also caused a rash.
2. Allergic to TAPE.
3. It is questionable that she is very sensitive to side effects of

Patient Name: HOFFMAN, JEANNE LEONIE **MR#:** U8170135

Date of Discharge: 20180531
Dictating Physician: Luu, MD, Paul

NARCOTIC PAIN MEDICATION.

MEDICATIONS:
Please see the nursing sheet for complete list.

SOCIAL HISTORY:
The patient is currently homeless and living in a tent with her son, who is the primary caregiver for the patient. Otherwise, she has no history of tobacco abuse.

PHYSICAL EXAMINATION:
GENERAL: This is a well-developed, thin, crying female in no acute respiratory distress.
VITAL SIGNS: Today at the Wound Care Center showed the blood pressure was 140/62, pulse 88, respiration rate 16. The temperature was 97.7. She weighed 112 pounds.
HEENT: Throat grossly normal. The patient definitely is hard of hearing and she is wearing a hearing aid on the left side.
CHEST: Clear to auscultation.
CARDIAC: Regular rhythm.
ABDOMEN: Soft.
EXTREMITIES: Focal examination of the left lower extremity showed that the patient has severe left calf and ankle skin excoriated or macerated with multiple petechiae. There is a copious amount of serous fluid drainage circumferentially along her leg. Otherwise, the left calf and ankle are moderately edematous and the skin from the calf to the toe is moderately red. Without palpation, the patient definitely has rest pain. Upon slight compression on the leg, the patient has significant amount of pain. Nevertheless, there is no sign that the patient has a compartment syndrome. On the left leg, the patient had a total of four ulcers; two ulcers over the ankle and two ulcers over the calf. The dimension of the ulcer, the larger one is approximately 6.4 cm in length by 3.5 cm in width and approximately 0.3 cm deep. This wound is located on the left lateral calf. There is another left posterior left calf ulcer with dimension 6.8 cm x 3.4 cm and approximately 0.2 cm deep. There is a left medial ankle wound with the dimension 3.8 cm x 4.2 cm with 0.2 cm deep. There is also a left anterolateral ankle ulcer with dimension 1.4 cm in length by 1.4 cm in width and approximately 0.3 cm deep. All ulcers are covered with fibrin exudate. (In the past, these wounds had a significant amount
of calcification, especially over the calf wounds and the calcified materials had been removed. There was no foul odor and there was no purulent discharge at this wound site.

2-eH and P Luu, MD, Paul 5/31/2018 CUSTDM10\W0TA_STM_BackgroundJ 9/9/2020 4:44:02 AM -04:00

Patient Name: HOFFMAN, JEANNE LEONIE **MR#:** U8170135
Date of Admission: 05/31/2018 **Acct#:** 1826819003
Date of Discharge: 20180531
Dictating Physician: Luu, MD, Paul

LABORATORY:
None at the present time. She had vascular study in the past which shoed moderate PAD (but adequate distal arterial perfusion) and positive for venous incompetence or insufficiency.

ASSESSMENT AND PLAN:
This is a 93-year-old female, homeless, with a history of peripheral vascular disease who has severe left leg rest pain associated with cellulitis. I strongly recommend the patient to be admitted to the hospital for treating her cellulitis and together with wound care to prevent further deterioration of the four wounds of her left leg. Unfortunately, the patient is homeless at the present time which would complicate the treatment of wounds. The patient is currently on Coumadin with the presence of petechiae. Blood work will be drawn to check PT and IRN level. We will keep the patient in the hospital to treat her cellulitis and then
subsequently the patient will be transferred to a skilled nursing facility. I discussed the plan of treatment with the patient and she agreed to be admitted to the skilled nursing facility in the future and to the hospital today. While the patient
is in the hospital, her wounds will be treated and followed by the wound care nurse. I will also ask the inpatient team to help to treat her medical problems. Otherwise, a swab culture of the serous fluid drainage will be sent for culture and sensitivity. The patient would be then started empirically on Ancef 1 g IV Q8 hours.

AFFIX PRODUCT LABELS

pt she did not receive any med - drug sply

PROCEDURE NOTE/FINDINGS*

Multiple L lower extremity ulcers - pt L knee pain from fall 2 > 1 weeks ago. Pain is better now

She had her day in court → Ruling in her favor

→ next step → she will meet with DHS for housing situation -

POST PROCEDURE/OPERATIVE DIAGNOSIS*:

☐ **Same as Pre-Procedure/Operative Diagnosis**

Re. All four wounds of L calf + ankle → covering with significant time →

ASSESSMENT

wound many ulcers → debrided all fibrin + subcutaneous tissues → Calf ulcer (1 x 2) bled moderately, ankle ulcers (x2) had some

slough cellulitis - L knee skin: slightly yellow in SQ hematoma resolving

PLAN OF CARE

☐ **Refer to *Physician Orders* dated:** ☐ **See dictated note date:**

+ Continue medihoney dressing x 2 weeks
+ Order new dressing supplies
+ Educate pt as much as possible
+ Pineapple juice for benefit

DISCHARGE

☐ **Refer to *Patient or Caregiver Education and Encounter Discharge* form for Patient Education dated:**

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☒ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☒ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☐ Yes ☒ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed: ☒ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☒ N/A

Has compression in place as prescribed: ☐ Yes ☐ No ☒ N/A Has offloading in place as prescribed: ☐ Yes ☐ No ☒ N/A

Blood glucose under control: ☐ Yes ☐ No ☒ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear ☒ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☐ R ☐ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☒ **Yes** ☐ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES:

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: MaryMueller RN for APR 26 2018 Time: 850

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non–wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☒ Yes ☐ No Location of pain: (L) ankle / calf

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 10 **Duration of Pain:** ☐ Constant ☒ Intermittent

Character of Pain: ☐ Aching ☒ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy
☐ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☒ Medication ☐ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S
☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☒ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management Ø

Modification to Pain Management Ø

UW Medicine
NORTHWEST HOSPITAL & MEDICAL CENTER

April 19, 2018

From: Paul Luu, M.D.
Northwest Hospital Wound Care Center
1560 No 115th Street, Suite 201
Seattle, WA 98133

To Bainbridge Municipal Court

Re: Hoffman, Jeanne Leonie
DOB: 04/19/1918

To whom it may concern:

I have been treated Mrs. Hoffman at the wound care center for over one year. She has multiple wounds over the left lower extremity. These wounds need to have dressing change at least every other day.

I was informed that she was evicted from her apartment due to various reasons. She is currently living in a tent with her son who is the primary care giver for her and her wounds.

I strongly believe that it would be best that she should be living in an apartment independently with her son as a primary care giver. Her son will continue to care for the leg wounds. I concern that living in a tent will cause the leg wounds to deteriorate or to be infected. This can lead to leg amputation.

Please feel free to contact me for any questions.

Sincerely yours.

Paul Luu, M.D.

DATE: APR 19 2018 TIME: 0900 | Type of Service: ☐ Initial Visit ☐ Follow-up Visit ☐ Nurse-only Visit ☐ Other:

This section may be completed by the Nurse/MA/CNA or HBO Tech.

Patient Arrived: ☑ Ambulatory ☐ Cane ☐ Crutches ☑ Walker ☐ Wheelchair ☐ Stretcher ☐ Other:

Transfer Assistance: ☐ Hoyer Lift ☐ Manual ☐ Transfer Board ☐ Stretcher ☑ None ☐ Other:

Height: _____ inches | Weight: _____ lbs.

Source: ☐ Stated/Not Measured ☐ Measured ☑ Not measured | Source: ☐ Stated ☐ Measured

Accompanied by: son - Wills

Patient Identification Verified: ☑ Yes Secondary Verification Process: ☐ Yes DOB

Patient requires Transmission-Based Precautions? ☐ Yes ☐ No If yes, ☐ Airborne ☐ Droplet ☐ Contact

Vital Signs ☐ **HBO Visit** *(If this is an HBO Visit, skip this section as vital signs are captured on the HBO Treatment Record.)*

Temperature: 97.9 Pulse: 72 Respirations: 20 Blood pressure (mmHg): 120/70

If ordered by physician: Capillary Blood Glucose: _____ mg/dL *(Hospital's blood glucose reference range: _____ mg/dL)*

History Since Last Visit ☐ N/A *(If this is Patient's Initial Visit, check N/A and skip this section.)*

Added or deleted any medications: ☐ Yes ☑ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Any new allergies or adverse reactions: ☐ Yes ☑ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☑ Yes ☐ No 2 days ago in knee
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☑ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☐ Yes ☑ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed: ☐ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☐ N/A

Has compression in place as prescribed: ☐ Yes ☐ No ☐ N/A Has offloading in place as prescribed: ☐ Yes ☐ No ☐ N/A

Blood glucose under control: ☐ Yes ☐ No ☐ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear. ☑ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☐ R ☐ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☑ **Yes** ☐ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES: I hurt all over but on knee

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: Jeanne Hoffman RN BSN Date: APR 19 2018 Time: 905

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non-wound related chronic pain referred to primary care provider for management plan primary knee now

With Dressing Changes: ☐ Yes ☐ No Location of pain: Walking from fall unable to give quantify

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 10 **Duration of Pain:** ☐ Constant ☑ Intermittent

Character of Pain: ☑ Aching ☐ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy
☐ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☐ Medication ☑ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S
☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☑ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management

Modification to Pain Management

√ | **ORDERS** *NOTE: Only those items checked (√) will be carried out.*

Apply to Wound(s) ____ minutes before procedure: ☐ Lidocaine 2% Topical Gel ☐ Lidocaine 2% Topical Liquid ☒ Lidocaine 4% Topical Solution

☐ **Admit to Wound Care Center®** ☐ Lidocaine 5% Topical Ointment ☐ Lidocaine Injectable ____% ☐ Other: _____

Diagnosis: _____

▲ Laboratory
- ☐ Albumin
- ☐ Basic Metabolic Profile
- ☐ Blood Cultures
- ☐ BUN
- ☐ Capillary Blood Glucose
- ☐ CBC with Differential
- ☐ Complete Metabolic Profile
- ☐ Creatinine Protein
- ☐ Hemoglobin A1c
- ☐ Hypercoagulable Panel
- ☐ Pre-Albumin
- ☐ PT/PTT
- ☐ Sedimentation Rate
- ☐ Transferrin
- ☐ Total Lymphocyte Count
- ☐ Urinalysis
- ☐ Other: _____

- ☐ Tissue or Bone Culture & Sensitivity ☐ Anaerobic ☐ Aerobic ☐ Fungal ☐ Swab
  Site: _____
  Diagnosis: _____
- ☐ Tissue or Bone Biopsy for Pathology ☐ Histopathology
  Site: _____
  Diagnosis: _____

▲ Cardiopulmonary
- ☐ EKG ☐ Echocardiogram
- ☐ Pulmonary Function Test
- ☐ Other: _____
- Diagnosis: _____

▲ Vascular Studies
- ☐ Transcutaneous $PtcO_2$
  - ☐ Right ☐ Left Lower Extremity
  - ☐ With ☐ Without O_2 challenge
  - ☐ With ☐ Without Leg Elevation
- ☐ Ankle Brachial Index
- ☐ Toe Brachial Index
- ☐ Arterial Segmental Pressures/Pulse Volume ☐ Right Leg ☐ Left Leg ☐ Both
- ☐ Venous Duplex Ultrasound ☐ Right Leg ☐ Left Leg ☐ Both
- ☐ Other: _____
- Diagnosis: _____

▲ Radiology
- ☐ Chest X-Ray PA & Lateral
- ☐ X-Ray of: _____
- ☐ Triple Phase Bone Scan
- ☐ Computed Tomography of: _____
- ☐ Magnetic Resonance Imaging of: _____ ☐ *Contrast* ☐ *No Contrast*
- ☐ Wound Ultrasound
- ☐ Other: _____
- Diagnosis: _____

☐ **Other:** _____

Consultation: ☐ Nutrition ☐ Vascular ☐ Orthotist/Pedorthotist ☐ Infectious Disease ☐ Plastic Surgery ☐ Other: _____

Cleanse Wound(s) with: ☐ Normal Saline ☐ Other _____

WOUND # (s)	LOCATION	DRESSING TYPE	FREQUENCY
		☐ Alginate ☐ Absorbative Silver ☐ Collagen ☐ Collagenase ☐ Cellulose Collagen ☐ Film ☐ Foam ☐ Hydrating Silver ☐ Hydrocolloid ☐ Hydrogel ☐ Iodine Dressing ☐ Iodosorb/flex ☐ Multidex ☐ Silver Cellulose Collagen ☐ Tubigrip ☐ Other: _____ Antibiotic(s):	☐ Daily ☐ 2 Times Per Week ☐ Every Other Day ☐ 3 Times Per Week ☐ Do Not Change Dressing ☐ Other: _____
1	(R) Dorsal	Santyl, saline dampen gauze, gauze, Kling	☐ Daily ☐ 2 Times Per Week ☐ Every Other Day ☐ 3 Times Per Week ☐ Do Not Change Dressing ☐ Other: _____
2	(R) Lateral Ankle		
3	(L) Medial Ankle		☐ Daily ☐ 2 Times Per Week ☒ Every Other Day ☐ 3 Times Per Week ☐ Do Not Change Dressing ☐ Other: _____
4	(L) Posterior Calf		

☐ **Apply Negative Pressure Wound Therapy (NPWT) to:** _____ using ☐ White Foam ☐ Black Foam ☐ Silver Foam ☐ Other: _____
with setting of _____ mmHg ☐ Continuous ☐ Intermittent _____ minutes on _____ minutes off. Change dressing ☐ 2 Times Per Week ☐ 3 Times Per Week

☐ **Apply Multilayer Wrap:** ☐ Right ☐ Left ☐ Standard ☐ Reduced **Type:** _____ ☐ Apply Unna's Boot ☐ Other: _____
☐ Compression Stockings: ☐ Right ☐ Left ☐ 20-30 mmHg ☐ 30-40 mmHg _____ mmHg ☐ Apply in morning and remove at bedtime.

Leg Elevation: ☐ Elevate legs to the level of the heart or above for 30 minutes _____ times per day.
☐ Compression Pump Type: _____ ☐ Right ☐ Left ☐ Both legs _____ mmHg _____ Minutes _____ Times a Day

Off-Loading / Immobilization: ☐ **Total Contact Cast** ☐ Right ☐ Left Lower Extremity ☐ **Air Cast** ☐ Right ☐ Left Lower Extremity
☐ **Multipodus Splint** ☐ Right ☐ Left Lower Extremity ☐ **Darco Shoe** ☐ Right ☐ Left

Assistive Devices: ☐ **Total Non-Weight Bearing to:** _____ ☐ Wheelchair ☐ Walker ☐ Cane ☐ Crutches ☐ Wedge Shoe

Pressure Reduction: ☐ Wheelchair Cushion ☐ Mattress Overlay ☐ Specialty Bed ☐ Other:

General: ☐ Stop / decrease smoking ☐ Multi-vitamin ☐ Exercise ☐ Follow Nutritious Diet ☐ Other:

You are scheduled for: (Test) _____ At (Location) _____ on (Date) _____ at (Time) 1000AM

Follow Up in 1 Week(s) with Dr. Luu On (Day) 4/19/18 (Date) _____ at (Time) _____

Nurse Visit in ____ days for a: ☐ Dressing Change ☐ NPWT Change ☐ Compression Wrap Change ☐ Total Contact Cast Change

AFFIX PRODUCT LABELS

PROCEDURE NOTE/FINDINGS*

She is currently "homeless" lives in a tent was known at a church, use to eat at church a Hartford.

Denies pain at rest 0/10

PE: - D calf: no edema. Pulses and Brad

POST PROCEDURE/OPERATIVE DIAGNOSIS*:

☐ **Same as Pre-Procedure/Operative Diagnosis**

four wounds → all covered with very thick fibrin.

ASSESSMENT

→ one curette → external debrided including subcutaneous tissue → two scaly ulcers → keep wet and the two small ulcers → not bleeding much

0 cellulitis 0 purulent odor

PLAN OF CARE

☐ **Refer to *Physician Orders* dated:** ☐ **See dictated note date:**

Plan: Discussed Tx w/ wound; pain to heal (complicated by living situation)
→ consider to refer to palliative program
→ offloading → wounds will not heal but need to be monitored
I will ask a RN to help her to get home.

DISCHARGE

☐ **Refer to *Patient or Caregiver Education and Encounter Discharge* form for Patient Education dated:**

Encounter Number: 1825657595
Facility: UW Medical Center-Northwest
Encounter Type: Outpatient
Admit Date Time: 2018-04-12 09:17:00
Discharge Date Time: 2018-04-12 10:22:00

DATE: APR 12 2018 TIME: 925A | Type of Service: ☐ Initial Visit ☑ Follow-up Visit ☐ Nurse-only Visit ☐ Other:

This section may be completed by the Nurse/MA/CNA or HBO Tech.

Patient Arrived: ☑ Ambulatory ☐ Cane ☐ Crutches ☑ Walker ☐ Wheelchair ☐ Stretcher ☐ Other:

Transfer Assistance: ☐ Hoyer Lift ☐ Manual ☐ Transfer Board ☐ Stretcher ☑ None ☐ Other:

Height: _____ inches
Source: ☐ Stated/Not Measured ☐ Measured ☑ Not measured

Weight: 110.4 lbs.
Source: ☐ Stated ☒ Measured

Accompanied by: son

Patient Identification Verified: ☑ Yes Secondary Verification Process: ☑ Yes DOB

Patient requires Transmission-Based Precautions? ☐ Yes ☒ No If yes, ☐ Airborne ☐ Droplet ☐ Contact

Vital Signs ☐ **HBO Visit** *(If this is an HBO Visit, skip this section as vital signs are captured on the HBO Treatment Record.)*

Temperature: 97.0 Pulse: 60 Respirations: 16 Blood pressure (mmHg): 116/58
If ordered by physician: Capillary Blood Glucose: _____ mg/dL *(Hospital's blood glucose reference range: _____ mg/dL)*

History Since Last Visit ☐ N/A *(If this is Patient's Initial Visit, check N/A and skip this section.)*

Added or deleted any medications: ☐ Yes ☑ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Any new allergies or adverse reactions: ☐ Yes ☐ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☑ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☐ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☐ Yes ☑ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed: ☑ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☑ N/A

Has compression in place as prescribed: ☐ Yes ☐ No ☒ N/A Has offloading in place as prescribed: ☐ Yes ☐ No ☑ N/A

Blood glucose under control: ☐ Yes ☐ No ☒ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear. ☑ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☐ R ☐ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☐ **Yes** ☑ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES:

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: Jeanne Hoffman RN Date: APR 12 2018 Time: 930

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non-wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☐ Yes ☐ No Location of pain: Sometime big pain sometimes little all around legs

Current Pain Level: ☐ Insensate (0) 1 2 3 4 5 6 7 8 9 10 **Duration of Pain:** ☐ Constant ☐ Intermittent

Character of Pain: ☑ Aching ☐ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy
☑ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☐ Medication ☑ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S
☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☑ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management

Modification to Pain Management Dressing changes

DATE APR 0 6 2018 TIME 1350 | Type of Service: ☐ Initial Visit ☐ Follow–up Visit ☐ Nurse–only Visit ☐ Other:

This section may be completed by the Nurse/MA/CNA or HBO Tech.

Patient Arrived: ☐ Ambulatory ☐ Cane ☐ Crutches ☐ Walker ☐ Wheelchair ☐ Stretcher ☐ Other:

Transfer Assistance: ☐ Hoyer Lift ☐ Manual ☐ Transfer Board ☐ Stretcher ☐ None ☐ Other:

Height: _____inches | Weight: _____lbs. unable

Source: ☐ Stated/Not Measured ☐ Measured ☐ Not measured | Source: ☐ Stated ☐ Measured

Accompanied by: Son in waiting room

Patient Identification Verified: ☐ Yes | Secondary Verification Process: ☐ Yes DOB

Patient requires Transmission–Based Precautions? ☐ Yes ☐ No If yes, ☐ Airborne ☐ Droplet ☐ Contact

Vital Signs ☐ **HBO Visit** *(If this is an HBO Visit, skip this section as vital signs are captured on the HBO Treatment Record.)*

Temperature: 98.4 Pulse: 76 Respirations: 16 Blood pressure (mmHg): 130/90

If ordered by physician: Capillary Blood Glucose: _____ mg/dL *(Hospital's blood glucose reference range: _____ mg/dL)*

History Since Last Visit ☐ N/A *(If this is Patient's Initial Visit, check N/A and skip this section.)*

Added or deleted any medications: ☐ Yes ☐ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Any new allergies or adverse reactions: ☐ Yes ☐ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☐ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☐ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☐ Yes ☐ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed: ☐ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☐ N/A

Has compression in place as prescribed: ☐ Yes ☐ No ☐ N/A Has offloading in place as prescribed: ☐ Yes ☐ No ☐ N/A

Blood glucose under control: ☐ Yes ☐ No ☐ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear. ☐ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☐ R ☐ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☐ Yes ☐ No ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES:

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: [signature] TG Date: APR 0 6 2018 Time: 1350

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non–wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☐ Yes ☐ No Location of pain:

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 10 **Duration of Pain:** ☐ Constant ☐ Intermittent

Character of Pain: ☐ Aching ☐ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy ☐ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☐ Medication ☐ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S ☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☐ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management

Modification to Pain Management

CARE AGREEMENT

This form contains facts you should know about your health care at UW Medicine and from Children's University Medical Group, University of Washington Dentists and Oral Surgeons, and Seattle Cancer Care Alliance. If there is any part of this form that is unclear you can ask questions about it. At the bottom of the form there is a place for you to sign your name so that we know you have read this form (or had it read to you) and agree to receive health care from us.

UW Medicine includes:

- Harborview Medical Center and Clinics
- Northwest Hospital & Medical Center and Clinics
- University of Washington Medical Center and Clinics
- Airlift Northwest
- UW Medicine Neighborhood Clinics
- UW Physicians Sports Medicine Clinic
- Hall Health Primary Care Center
- Summit Cardiology
- UW Physicians

Your health care team consists of medical doctors, doctors in training (residents and fellows), nurses, other health care professionals, and students of the health sciences. They will work together to diagnose and treat you. You will have an attending physician. This is the doctor who has primary responsibility for your care.

Photographs, videotapes, or other images of you may be used to keep a record of your care and treatment (including surgery). These images may become part of your medical record. Part of your care may take place through telemedicine technology, which may mean 1) live video between your care team members (*in which you also may be involved*), or 2) "remote" review by your care team of the images described above.

SIGNATURE

By signing below, it shows that you have read this document and agree to receive health care from UW Medicine. If there is any part of this form that is unclear, be sure to ask questions about it.

Financial Agreement & Consent for Disclosure

By signing below, I agree:

1. That Harborview Medical Center and Clinics (HMC), Northwest Hospital & Medical Center and Clinics (NWH), University of Washington Medical Center and Clinics (UWMC), Valley Medical Center and Clinics (VMC), UW Medicine Neighborhood Clinics (UWNC), UW Medicine Sports Medicine Clinic (UW Sports Med), Hall Health Primary Care Center (HHPCC), and University of Washington Physicians (UWP) (collectively known as "UW Medicine"), University of Washington School of Dentistry (SOD), Children's University Medical Group (CUMG) and Seattle Cancer Care Alliance (SCCA) may share any financial information I provide to facilitate payment.
2. To pay UW Medicine, SOD, CUMG and/or SCCA for balances remaining after insurance benefits are paid, unless prohibited by law or contract.
3. To notify UW Medicine, SOD, CUMG and/or SCCA of changes to my insurance coverage and/or address.
4. That UW Medicine, SOD, CUMG and/or SCCA may impose reasonable interest, late charges, costs and/or reasonable attorney's fees should my account become delinquent.
5. To notify UW Medicine, SOD, CUMG, and/or SCCA if I am not able to pay my balance due within 30 days of receipt.
6. To apply to other financial programs that I may qualify for as requested by UW Medicine, SOD, CUMG and/or SCCA, should I be unable to pay my account.
7. That any lawsuit for collection of my account may be brought in King County, Washington.
8. To receiving information related to treatment, payment or health care operations, including receiving autodialed and prerecorded message calls and/or text messages, at any number I have provided or, if not current, to any number I am reasonably found to be associated with.
9. That UW Medicine may, at its discretion, disclose to appropriate parties my medical records or information from my records for treatment, payment and health care operation purposes.

By signing this page, I acknowledge that I have read and agreed to the terms on both sides of this form.

FINANCIAL AGREEMENT & CONSENT FOR DISCLOSURE
© UH1865 (03/2016) File Under: Consent

Financial Agreement & Consent for Disclosure

I understand that:

- Each UW Medicine entity, SOD, CUMG, and/or SCCA bill separately for their services.
- Patients who receive outpatient services at UWMC or HMC sites generally receive two bills: one bill from the physician or other provider (for the costs of the professional services) and one bill from the hospital (for the facility costs, i.e. building, equipment, supplies, staff time). Each of these bills may incur a co–payment or co–insurance responsibility, depending on my insurance coverage. The exact amount of the co–insurance or co–payment will depend upon the actual services provided and the coverage provisions of any insurance I have. Sometimes patients will pay more for certain outpatient services and procedures at hospital–based outpatient locations. The amount will depend on my insurance. I may review my insurance benefits or contact my insurer to learn what my policy will pay and what out–of–pocket expenses I may need to pay. At my request, clinic staff will provide me with an estimate of the billed charges for outpatient services I am likely to receive.
- UW Medicine requests and, if I provide it, will use my Social Security Number to facilitate access to any potential federal or state health care benefits, to verify my identity, or to facilitate discharge planning. Providing my Social Security Number is voluntary except when applying for state and federal health care benefits.
- My Consumer Credit Report information may be accessed for the following reasons: to make determination of available financial assistance, assistance in managing the payment process, or if I report that my identity has been stolen.

Statement to Permit Payment of Medicare or Insurance Benefits to Provider

I request payment of authorized Medicare or insurance benefits for any services furnished to me by UW Medicine, SOD, CUMG, and/or SCCA. I authorize any holder of medical and other information about me to release to Medicare [and its agents] or other insurance providers any information needed to determine these benefits for related services.

CT Head WO Cont

Referring Provider:
Ou, Stephen Se-Liung, MD
Emergency Services Northwest
Emergency Department A-150 1550 N 115th St
Seattle, WA 98133

EXAMINATION:
CT of the head without contrast

CLINICAL INFORMATION:
Headache

COMPARISON STUDY:
None

TECHNIQUE:
Images were obtained helically through the head without intravenous contrast. Multiplanar reconstruction was performed. Radiation dose reduction techniques were utilized including automated exposure control, adjustment of the mA and/or kV according to patient size, and/or use of iterative reconstruction technique.

FINDINGS:
The ventricles and sulci are within normal limits. There is no evidence of mass lesion, intracranial hemorrhage or acute infarction. No prior major segment stroke is identified. The ventricles and sulci are well-preserved.

The orbits are clear. The visualized paranasal and mastoid sinuses are clear. No acute bony abnormality is seen.

IMPRESSION:
1. No acute intracranial abnormality.

Above relayed to Stephen Se-Liung Ou, MD at the time of dictation.

DIAGNOSIS (16:25 ACIC)

FINAL: PRIMARY: dizziness, resolved, ADDITIONAL: chronic left lower extremity ulcerations, stress reaction.

DOCTOR NOTES (16:19 ACIC)

TEXT: ASSESSMENT:

Patient is elderly c general weakness, Onset while rushing onto the area, had not had breakfast, felt better after eating, consistent with not eating this morning, feeling better now. also concern for increased stress, homelessness. We will have social work consult. Differential for dizziness in the elderly is broad and includes electrolyte abnormality, acidosis, dehydration, hypoglycemia, occult infection such as pneumonia or UTI. Differential also includes myocardial ischemia or dysrhythmia, hypothyroidism, anemia, adverse medication reaction. No abdominal pain or tenderness to suggest abdominal sepsis. No meningismus to suggest meningitis. No dyspnea, cough, hypoxemia or sputum to suggest pneumonia, pulmonary embolism, or pulmonary edema. No recent change in medications. No h/o recent head injury to suggest ICH sughas SDH as a cause. CBC to evaluate WBC as marker of infection, anemia, thrombocytopenia. Renal panel to assess for electrolyte abnormality, acidosis, renal insufficiency. hepatic enzymes to evaluate for inflammation. EKG and cardiac markers to evaluate for ischemia or dysrhythmia. coags given anticoagulation with Coumadin. UA to evaluate for UTI.

ED COURSE:

Labs with normal WBC, mild anemia, no thrombocytopenia. Normal electrolytes (except elevated glucose at 153), and normal renal function. Normal hepatic enzymes. Normal coags. UA no e/o of infection. INR 1.8.

EKG no acute dysrhythmia or ischemia. Normal cardiac enzymes.

CT head negative. obtained an initial complaint of headache but during my evaluation patient did not complain of headache.

CXR no pneumonia, cardiomegaly, pulmonary edema.

Patient was observed in the ED and remained stable. Vitals stable. No new symptoms on recheck. No dysrhythmia noted on telemetry. patient's symptoms resolved. No recurrent symptoms. New dressing applied to left lower extremity chronic ulcerations. No evidence of infection. patient was seen and evaluated by social worker.

Patient c general weakness, dizziness, chronic lower extremity wounds, symptoms resolved, will be discharged home with her son. instructions for stress reaction provided. PMD followup tomorrow or Monday for recheck. to return for new or worsening symptoms. Followup per social worker. Patient expressed understanding and agreed c that plan.

DISPOSITION

PATIENT: Disposition: Discharge Routine, Condition: 1−STABLE. (16:25 ACIC)
Patient left the department. (16:40 JDAV)

PRESCRIPTION

No recorded prescriptions

HPI WEAKNESS (16:17 ACIC)

CHIEF COMPLAINT: Patient presents for the evaluation of Patient presents for the evaluation of weakness. *HISTORIAN:* History obtained from patient, History obtained from family, History

obtained from son. *TIME COURSE:* Onset of symptoms reported as sudden, Onset was this morning, Complaint is resolved. *CIRCUMSTANCES:* Standing up. *QUALITY:* generalized weakness. *ASSOCIATED WITH:* Denies constitutional, Denies vision changes, Denies CV, Denies respiratory, Oral Intake, Denies nausea, Denies vomiting, Denies stool changes, Denies headache, Denies mental status change, Denies speech changes, Denies focal weakness, Denies paresthesias, Denies gait changes, Denies endocrine, Denies psychiatric. *SEVERITY:* Onset severity was severe, Present severity is mild. *EXACERBATED BY:* Patient's condition exacerbated by movement/walking. *RELIEVED BY:* Patient's condition relieved by sitting down, eating. *NOTES:* patient is hard of hearing, or history currently provided by his son. Patient came to Seattle on a ferry from Bainbridge Island this morning. He notes that they were rushing, had not eaten breakfast and when they were boarding she became dizzy and disoriented, seem like she might be losing her balance. He sat her down, but her crackers and she seemed to get better. He brought her to Northwest for wound care appointment, chronic wounds left lower extremity, had been doing quite well. They were unable to change her dressing in the wound care clinic. He noted that her face is red, the veins in her forehead seem to be standing Elmore, a few capillary seem broken, and a few red spots on her forehead, eyes weeping so he brought her to the emergency department for evaluation. Both the patient and the son attributed her symptoms to stress. States that there currently in the transition to being homeless. He requests assistance from the social worker. His mom seems to be a lot better and is patient is feeling normal. The patient only complains of hearing noises in her ears like this sounded a ferry engine, son thinks that her hearing is not working so he is going to have those evaluated.

PAST MEDICAL HISTORY

MEDICAL HISTORY: 1. PVD
2. h/o DVT and venous insufficiency. (14:36 JDAV)

SURGICAL HISTORY: Patient's previous surgical history is not relevant to the case. (16:19 ACIC)

PSYCHIATRIC HISTORY: No previous psychiatric history. (14:36 JDAV)

SOCIAL HISTORY: Denies smoking, Denies consumption of alcohol, Lives with son. (14:36 JDAV)

FAMILY HISTORY: Family history is not contributory to this case. (16:19 ACIC)

NOTES: Nursing records reviewed, Agree with nursing records, Old chart reviewed, Medication list reviewed, I agree with the nursing record except where documented differently by myself. (16:19 ACIC)

CURRENT MEDICATIONS (16:34)

acetaminophen−codeine:
Patient Dose: 0.25 tablet oral twice a day.PRN: pain 300 mg−30 mg,., by Interface.

atorvastatin:
Patient Dose: 0.5 tablet oral daily.20 mg,., by Interface.

losartan:
Patient Dose: 0.5 tablet oral daily.25 mg,., by Interface.

pentoxifylline:
Patient Dose: 1 tablet oral three times a day.400 mg,., by Interface.

Biozyme−C:
Patient Dose: Unknown.Entered brand: collagenase clostridium histo. −− Entered as: Santyl 250 unit/gram,., by Interface.

timolol maleate:
Patient Dose: 1 drop ophthalmic, both eye twice a day.Entered brand: timolol maleate −− 0.5 %,., by Interface.

warfarin:
Patient Dose: 1 tablet bedtime, per pt Every Monday, Tuesda.5 mg, , Last dose taken on 1/31/18., by Interface.

NORTHWEST HOSPITAL & MEDICAL CENTER COMPLETE CHART

KNOWN ALLERGIES

adhesive tape: Reaction: Rash
Penicillins: Reaction: Rash
Sulfa (Sulfonamide Antibiotics): Reaction: Rash

ROS (16:19 ACIC)

CONSTITUTIONAL: Historian reports weakness, No fever.
EYES: No vision changes, No eye pain, No eye redness.
ENT: No sore throat, No epistaxis, chronic hard of hearing.
CARDIOVASCULAR: No chest pain, No dyspnea on exertion, No edema, No syncope.
RESPIRATORY: No Cough, No SOB.
GI: No abdominal pain, No nausea, No diarrhea, No vomiting.
GENITOURINARY FEMALE: No dysuria, No urinary frequency, No hematuria.
MUSCULOSKELETAL: No myalgias, No neck pain, No back pain.
SKIN: No skin changes, No rash, No skin lesions, No cellulitis.
NEUROLOGIC: Historian reports dizziness, No gait changes, No headache, No focal weakness, No sensory changes, No speech changes.
PSYCHIATRIC: Negative psychiatric review of systems.
NOTES: All systems were reviewed and are negative except as described above.

VITAL SIGNS

VITAL SIGNS: BP: 145/82, Pulse: 72, Resp: 20, Temp: 36.5, Pain: 10, O2 sat: 97 on (RA), Time: 3/29/2018 13:37. (13:37 ECOR)
BP: 136/62, Pulse: 72, Resp: 18, O2 sat: 99 on (ra), Time: 3/29/2018 14:01. (14:01 JDAV)

PHYSICAL EXAM (16:19 ACIC)

CONSTITUTIONAL: Vital signs reviewed, Patient has normal pulse, Patient has normal blood pressure, Patient has normal respiratory rate, Well appearing, Patient appears comfortable, There is no acute distress, Patient is not febrile. elderly, thin, in no apparent distress.
HEAD: Atraumatic, Normocephalic.
EYES: Eyes are normal to inspection, Pupils equal, round and reactive to light, No discharge from eyes, Extraocular muscles intact, Sclera are normal, Conjunctiva are normal.
ENT: Mouth normal to inspection, very hard of hearing.
NECK: Normal ROM, No jugular venous distention, Cervical spine nontender.
RESPIRATORY CHEST: Breath sounds normal, No respiratory distress.
CARDIOVASCULAR: RRR, No murmurs, No rub.
ABDOMEN: Abdomen is nontender, No masses, Bowel sounds normal, No stoma.
BACK: There is no CVA Tenderness, There is no tenderness to palpation, Normal inspection.
UPPER EXTREMITY: Inspection normal, Normal range of motion.
LOWER EXTREMITY: Normal range of motion, well−healing ulcerations anterior and posterior left lower leg, 4 in total, no erythema or soft tissue swelling.
NEURO: No focal motor deficits, No focal sensory deficits, No cerebellar deficits, Speech normal, Gait normal, Memory normal.
SKIN: Skin is warm, Skin is dry, Skin is normal color, Skin exam normal except as noted.
PSYCHIATRIC: Oriented X 3.

EKG INTERPRETATION (16:20 ACIC)

12 LEAD EKG INTERPRETATION: 12 lead EKG interpreted by ED Physician, No previous EKG available, Rate 71, beats per minute, RATE is, normal, Rhythm is, Normal Sinus, AXIS is, left, BLOCKS, RBBB (Complete), No acute ST changes.
MONITOR STRIP: Interpreted by ED Physician, At: 1530, Cardiac Monitor Strip interpretation is Normal Sinus, No ST changes noted, Rate is normal, Rate 72, beats per minute.

RESULTS
RADIOLOGY: CT HEAD WITHOUT IV CONTRAST Thu Mar 29, 2018 14:32,

Exam Performed at: Northwest Hospital
EXAMINATION:
CT of the head without contrast

CLINICAL INFORMATION:

Headache

COMPARISON STUDY:
None

TECHNIQUE:
Images were obtained helically through the head without intravenous contrast. Multiplanar reconstruction was performed. Radiation dose reduction techniques were utilized including automated exposure control, adjustment of the mA and/or kV according to patient size, and/or use of iterative reconstruction technique.

FINDINGS:
The ventricles and sulci are within normal limits. There is no evidence of mass lesion, intracranial hemorrhage or acute infarction. No prior major segment stroke is identified. The ventricles and sulci are well−preserved.

The orbits are clear. The visualized paranasal and mastoid sinuses are clear. No acute bony abnormality is seen.

IMPRESSION:
1. No acute intracranial abnormality.

Above relayed to Stephen Se−Liung Ou, MD at the time of dictation.

DATE: MAR 01 2018 TIME: 1000 Type of Service: ☐ Initial Visit ☒ Follow–up Visit ☐ Nurse–only Visit ☐ Other:

This section may be completed by the Nurse/MA/CNA or HBO Tech.

Patient Arrived: ☒ Ambulatory ☐ Cane ☐ Crutches ☒ Walker ☐ Wheelchair ☐ Stretcher ☐ Other:

Transfer Assistance: ☐ Hoyer Lift ☐ Manual ☐ Transfer Board ☐ Stretcher ☒ None ☐ Other:

Height: _____ inches
Source: ☐ Stated/Not Measured ☐ Measured ☒ Not measured

Weight: 117.8 lbs.
Source: ☐ Stated ☐ Measured

Accompanied by: SGM

Patient Identification Verified: ☒ Yes Secondary Verification Process: ☒ Yes DOB

Patient requires Transmission–Based Precautions? ☐ Yes ☒ No If yes, ☐ Airborne ☐ Droplet ☐ Contact

Vital Signs ☐ **HBO Visit** *(If this is an HBO Visit, skip this section as vital signs are captured on the HBO Treatment Record.)*

Temperature: 96.8 Pulse: 69 Respirations: 16 Blood pressure (mmHg): 146/76
If ordered by physician: Capillary Blood Glucose: _____ mg/dL *(Hospital's blood glucose reference range: _____ mg/dL)*

History Since Last Visit ☐ N/A *(If this is Patient's Initial Visit, check N/A and skip this section.)*

Added or deleted any medications: ☐ Yes ☒ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Any new allergies or adverse reactions: ☐ Yes ☒ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☒ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☒ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☐ Yes ☒ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed: ☒ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☐ N/A

Has compression in place as prescribed: ☒ Yes ☐ No ☐ N/A Has offloading in place as prescribed: ☐ Yes ☐ No ☒ N/A

Blood glucose under control: ☐ Yes ☐ No ☐ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear: ☐ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☐ R ☐ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☒ **Yes** ☐ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES:

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: Margaret Ann Date: MAR 01 2018 Time: 1000

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non–wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☒ Yes ☐ No Location of pain: (L) Foot

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 10 **Duration of Pain:** ☐ Constant ☐ Intermittent

Character of Pain: ☐ Aching ☐ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy ☐ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☐ Medication ☐ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S ☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☐ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management

Modification to Pain Management

DATE / TIME
DISCIPLINE

Wound Care Center – Infectious Disease Follow-up

Date: 3/1/18

Diagnosis/Organism: Cellulitis 2/e MSSA ± PAD + chronic LLE ulcers.

Interim History: Stopped doxy. Stopped bleach baths. Has been cleaning legs ± denture brush. ϕP/C. ϕN/V/D.

PE: well, frail, elderly woman, NAD ϕ cough. ϕ new rales A+O x 3. walking ± walker. LLE ± woody edema, stable LE ulcers ± clean bases ↓erythema, ϕpurulence. leg non-tender.

~~Current antibiotics and dates:~~ Doxy ended 2/8

~~Pertinent labs/imaging:~~ ABIs reviewed

Plan:

93 F ± PAD, chronic LE wounds prior cellulitis. Skin improved ± cessation of bleach baths. Discussed ↓c dicing "brushing" skin as well and using gentle cloths. cont to follow off abx. cont tx for PAD and excellent wound care.

Time: 13 min face-face 75% counseling.

Follow-up: PRN

Provider: Cohen

AFFIX PRODUCT LABELS

PROCEDURE NOTE/FINDINGS*

Patient is more energetic today.
We stopped any meds to clear @ calf
Debrided
RTC @ calf/foot: calf cellulitis resolved!!!

POST PROCEDURE/OPERATIVE DIAGNOSIS*:

☐ **Same as Pre-Procedure/Operative Diagnosis**

RLE wound: (1) at calf, post calf, ankle (medial/lat)
→ covered with dressing of choice

ASSESSMENT

→ Use curette → excisional debrided including subcutaneous tissues → ~~a bit~~ > scant
→ R bleeding
→ indurated & calcified

Dr Gilmore (ID) will see patient today

PLAN OF CARE

☐ **Refer to *Physician Orders* dated:** ☐ **See dictated note date:**

Continue daily ointment to wound daily
Monitor serially.

RTC 2 weeks

DISCHARGE

☐ **Refer to *Patient or Caregiver Education and Encounter Discharge* form for Patient Education dated:**

DATE: **TIME:** 1050 Type of Service: ☐ Initial Visit ☒ Follow–up Visit ☐ Nurse–only Visit ☐ Other:

This section may be completed by the Nurse/MA/CNA or HBO Tech.

Patient Arrived: ☐ Ambulatory ☐ Cane ☐ Crutches ☒ Walker ☐ Wheelchair ☐ Stretcher ☐ Other:

Transfer Assistance: ☐ Hoyer Lift ☐ Manual ☐ Transfer Board ☐ Stretcher ☒ None ☐ Other:

Height: _____inches
Source: ☐ Stated/Not Measured ☐ Measured ☒ Not measured

Weight: 115 lbs.
Source: ☐ Stated ☒ Measured

Accompanied by: SO W

Patient Identification Verified: ☒ Yes Secondary Verification Process: ☒ Yes

Patient requires Transmission–Based Precautions? ☐ Yes ☒ No If yes, ☐ Airborne ☐ Droplet ☐ Contact

Vital Signs ☐ **HBO Visit** *(If this is an HBO Visit, skip this section as vital signs are captured on the HBO Treatment Record.)*

Temperature: 96.9 Pulse: 68 Respirations: 16 Blood pressure (mmHg): 132/62
If ordered by physician: Capillary Blood Glucose: _____ mg/dL *(Hospital's blood glucose reference range: _____ mg/dL)*

History Since Last Visit ☐ N/A *(If this is Patient's Initial Visit, check N/A and skip this section.)*

Added or deleted any medications: ☒ Yes ☐ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Any new allergies or adverse reactions: ☐ Yes ☒ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☒ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☒ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☒ Yes ☐ No
(If Yes, refer to Nurse for documentation on Patient Summary.) NW Hospital 2/1/18 –

Has dressing in place as prescribed: ☒ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☒ N/A

Has compression in place as prescribed: ☐ Yes ☐ No ☒ N/A Has offloading in place as prescribed: ☐ Yes ☐ No ☒ N/A

Blood glucose under control: ☐ Yes ☐ No ☒ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear. ☒ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☐ R ☐ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☐ **Yes** ☒ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES: Doxycycline 100 mg BID

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: [signature] Date: FEB 08 2018 Time: 1050

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non–wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☐ Yes ☐ No Location of pain:

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 10 **Duration of Pain:** ☐ Constant ☐ Intermittent

Character of Pain: ☐ Aching ☐ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy ☐ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☐ Medication ☐ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S ☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☐ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management

Modification to Pain Management

DATE / TIME / DISCIPLINE

Wound Care Center – Infectious Disease Follow-up

Date: 2/8/18

Diagnosis/Organism: Cellulitis 2/2 MSSA + enterobacter ± PAD + LLE ulcers.

Interim History: Taking doxy, ↓complications. ↓F/C, ↓n/v/d. ↓pain in leg. Son using bleach baths + leg. ↓drainage.

PE: well, elderly woman in NAD. PERRLA, EOMI, OP Clear. ↓LAD Breathing comfortably. A+Ox3. Speech fluent. LLE ± ongoing chronic wounds, ↓drainage. erythematous ± petechiae. ↓warm, ↓ tenderness

Current antibiotics and dates: Doxy

Pertinent labs/imaging: Arterial duplex: unreliable 2/2 calcifications. Mild insuff at rest, moderate LLE arterial insuff at rest.

Plan:
93F ± peripheral arterial disease, chronic LE wounds c/b cellulitis.

Cellulitis improving, ok to d/c doxy. Erythema 2/2 bleach baths + PAD. will need to follow closely off abt.

PAD- will need to f/u ± Dr. Rollo re need for compression. cont excellent wound care per Dr. Luu.

Follow-up: 1 wk.

Provider: Cohen

Do you have a history of pain?	No Reported Problems		

Current Function

Functional Impairment	No	**Assistive device used (prior to admit)?**	Yes
Assistive Devices Used (describe)	walker	**Comm Barrier Hearing (list)**	HOH - Left, HOH - Right, Uses Hearing Aid(s)
Comm Barrier Sight (list)	Wears Glasses/ Contacts	**Fall in Last Month**	No
Fall in Last 2-6 Months	No		

Nutrition

Home Diet	Regular/Unrestricted	**Unintended Weight Loss >= 10 pounds**	No
Eating < 50% for More than 5 days Prior to Admit	No		

Educational Assessment

Ed Learning Barriers	Hearing	**Readiness to Learn**	Receptive

Admission History

Assessment Sts	Complete	**Collected DTime**	02/01/2018 18:59
Collected By	Kyoung Lee, RN		

Vaccine Assessment

Influenza Season?	Yes	**Influenza Vaccine Contraindicated**	Previously immunized since 7/1/17

VTE Assessment

PCDs Applied	No, see contraindications below	**PCDs Contraindicated**	Any local conditions with compromised wound healing

Clinical Note:

Neutrophils 3.87 THOU/uL *(1.80-7.00 THOU/uL)*
Lymphocytes 1.28 THOU/uL *(1.00-4.80 THOU/uL)*
Monocytes 0.69 THOU/uL *(0.00-0.80 THOU/uL)*
Eosinophils 0.27 THOU/uL *(0.00-0.50 THOU/uL)*
Basophils 0.05 THOU/uL *(0.00-0.20 THOU/uL)*
Immature Granulocytes 0.01 THOU/uL *(0.00-0.05 THOU/uL)*

Chemistry from 2/1/2018 1:15 PM

Sodium 143 mEq/L *(135-145 mEq/L)*
Potassium 4.2 mEq/L *(3.6-5.2 mEq/L)*
Chloride 108 mEq/L *(98-108 mEq/L)*
Carbon Dioxide, Total 26 mEq/L *(22-32 mEq/L)*
Anion Gap 9 *(4-12)*
Glucose 117 mg/dL *(62-125 mg/dL)*
Urea Nitrogen 24 mg/dL H *(8-21 mg/dL)*
Creatinine 1.08 mg/dL H *(0.38-1.02 mg/dL)*
Protein (Total) 7.0 g/dL *(6.0-8.2 g/dL)*
Albumin 3.9 g/dL *(3.5-5.2 g/dL)*
Bilirubin (Total) 0.4 mg/dL *(0.2-1.3 mg/dL)*
AST (GOT) 15 U/L *(9-38 U/L)*
ALT (GPT) 10 U/L *(7-33 U/L)*
Alkaline Phosphatase (Total) 55 U/L *(49-199 U/L)*
eGFR, Calc, European American 47 mL/min/1.73_m2 L *(>59- mL/min/1.73_m2)*
eGFR, Calc, African American 57 mL/min/1.73_m2 L *(>59- mL/min/1.73_m2)*
eGFR, Information (Reference Range: not available)
Calculated GFR in mL/min/1.73 m2 by MDRD equation.
Inaccurate with changing renal function. See

http://depts.washington.edu/labweb/test/bclim/cGFR.html
Calcium 9.1 mg/dL *(8.9-10.2 mg/dL)*

Chemistry from 2/2/2018 5:15 AM

Sodium 145 mEq/L *(135-145 mEq/L)*
Potassium 4.0 mEq/L *(3.6-5.2 mEq/L)*
Chloride 113 mEq/L H *(98-108 mEq/L)*
Carbon Dioxide, Total 23 mEq/L *(22-32 mEq/L)*
Anion Gap 9 *(4-12)*
Glucose 104 mg/dL *(62-125 mg/dL)*
Urea Nitrogen 19 mg/dL *(8-21 mg/dL)*
Creatinine 0.96 mg/dL *(0.38-1.02 mg/dL)*
eGFR, Calc, European American 54 mL/min/1.73_m2 L *(>59- mL/min/1.73_m2)*
eGFR, Calc, African American >60 mL/min/1.73_m2 *(>59- mL/min/1.73_m2)*
eGFR, Information (Reference Range: not available)
Calculated GFR in mL/min/1.73 m2 by MDRD equation.
Inaccurate with changing renal function. See

http://depts.washington.edu/labweb/test/bclim/cGFR.html
Calcium 8.6 mg/dL L *(8.9-10.2 mg/dL)*

Coagulation from 2/1/2018 1:15 PM

Prothrombin Time Patient (NWH) 30.3 s H *(8.9-12.1 s)*
Prothrombin INR 3.0 H *(0.8-1.3)*

Coagulation from 2/2/2018 5:15 AM

Prothrombin Time Patient (NWH) 27.4 s H *(8.9-12.1 s)*
Prothrombin INR 2.7 H *(0.8-1.3)*

Coagulation from 2/3/2018 5:08 AM

Prothrombin Time Patient (NWH) 22.7 s H *(8.9-12.1 s)*
Prothrombin INR 2.3 H *(0.8-1.3)*

Coagulation from 2/4/2018 5:10 AM

Prothrombin Time Patient (NWH) 17.2 s H *(8.9-12.1 s)*
Prothrombin INR 1.7 H *(0.8-1.3)*

Cardiac from 2/1/2018 1:15 PM

C_Reactive Protein 1.9 mg/L *(0.0-10.0 mg/L)*

Problems

Encounter Diagnosis
- Acute Pain Status:Active.
- Fall Risk Status:Active.

Encounters

Encounter Diagnosis
- Acute Pain Status:Active.
- Fall Risk Status:Active.

Plan of Care

Treatment Plan from 2/3/2018 2:41 PM:

- Primary Care Provider : Wound Care
- When : within 5-7 days
- Referral : Home health,Physical therapy,Wound care
- Additional Referral : RN

Treatment Plan from 2/4/2018 7:25 AM:

- Primary Care Provider : Wound Care
- When : within 5-7 days
- Referral : Home health,Physical therapy,Wound care
- Additional Referral : RN

Treatment Plan from 2/4/2018 7:50 AM:

- Primary Care Provider : Wound Care
- When : within 5-7 days
- Referral : Home health,Physical therapy,Wound care
- Additional Referral : RN. patient needs every other day dressing change, INR check and physical therapy to help with mobility

Treatment Plan from 2/4/2018 8:16 AM:

- Additional Follow Up Appointment : Northwest Hospital Wound Care Center
- Follow Up Phone : 206.668.1244
- When : Within 5-7 Days
- Lab When : INR on 2/5 or 2/6 By visiting nurse
- Referral : Home health,Physical therapy,Wound care
- Additional Referral : RN. patient needs every other day dressing change, INR check and physical therapy to help with mobility

Treatment Plan from 2/4/2018 8:35 AM:

- Additional Follow Up Appointment : Northwest Hospital Wound Care Center
- Follow Up Phone : 206.668.1244
- When : Within 5-7 Days
- Lab When : INR on 2/5 or 2/6 By visiting nurse
- Referral : Home health,Physical therapy,Wound care
- Additional Referral : RN. patient needs every other day dressing change, INR check and physical therapy to help with mobility

Allergies, Adverse Reactions, Alerts

This section is representative of the current allergy information, at the time of the CCD generation. In the case of regeneration of the CCD, the allergy information may not reflect the state of known allergies at the time of the CCD's subject visit.

- adhesive tape causes Rash.
- Penicillins causes Rash.
- Sulfa (Sulfonamide Antibiotics) causes Rash.
- No Latex Allergy.
- No IV Contrast Allergy.

Medication

It is the responsibility of the patient or patient representative to confirm the list of medications with either the patient's personal care provider or the patient's follow-up care provider to ensure the patient has an appropriate list of medications to take at home.

Preliminary list - medication reconciliation not completed.

Discharge medications

New medications

- doxycycline monohydrate 100 mg Tablet, Ordered By: Amie E Macnab, MD
  Directions: 1 tablet oral twice a day

Continued medications

- acetaminophen-codeine 300 mg-30 mg Tablet, Ordered By: Amie E Macnab, MD
  Directions: 0.25 tablet oral twice a day PRN pain
- atorvastatin 20 mg Tablet, Ordered By: Amie E Macnab, MD
  Directions: 0.5 tablet oral daily
- losartan 25 mg Tablet, Ordered By: Amie E Macnab, MD
  Directions: 0.5 tablet oral daily
- pentoxifylline 400 mg Tablet Extended Release, Ordered By: Amie E Macnab, MD
  Directions: 1 tablet oral three times a day
- timolol maleate 0.5 % Drops, Ordered By: Amie E Macnab, MD
  Directions: 1 drop ophthalmic, both eyes twice a day
- warfarin 5 mg Tablet, Ordered By: Amie E Macnab, MD
  Directions: 1 tablet oral Every Monday, Tuesday, Wednesday, Friday, Saturday
  Additional Instructions: Last dose taken on 1/31/18 @ bedtime, per pt
- warfarin 5 mg Tablet, Ordered By: Amie E Macnab, MD
  Directions: 0.5 tablet oral Every Thursday and Sunday

Stopped medications

- levofloxacin 500 mg Tablet
  Directions: 1 tablet oral daily
  Additional Instructions: started on 1/25/18 for 10 days, per pt

Clinical Notes Report

Generated from 02/01/2018 00:00 to 03/03/2018 23:59

Collected Date/Time: 02/04/18 08:46 **Collected By:** Lydia N Jones, RN

Note: ADT Time: 08:45
Transported From: Room 418
Transported To: Home
Transportation Method: Cabulance
Accompanied By: Self and transport driver
Condition on Arrival: Stable
SBAR Report Provided to: Discharge instruction and Doxycycline script given to patient, verbalized understanding
Location of Personal Belongings: All belongings sent home with patient
Belongings List Completed: Yes
Items in Hospital Safe or Pharmacy Returned to Patient:
Comments:

Collected Date/Time: 02/04/18 08:28 **Collected By:** Suzanne H Lee, Pharm D

Note: Warfarin dosing per pharmacy at INR 2-3 for 93 yr old female patient with history of bilateral lower extremity DVT.

INR = 2.3 (2.7).

Possible D-D interaction with Warfarin:
Doxycycline, APAP, losartan, pentoxifylline

Home warfarin dose: 5 mg daily except 2.5 mg q thur and Sun.

Diet: Soft, Meals: 100%/75%/50%

A/P: INR trended down to subtherapeutic from 2.3 to 1.7 in a day. Will cont warfarin dose 5mg for today anticipating INR rise to goal range tomorrow. INR/PT in am. Consider resuming home warfarin dosing regimen when INR rise to therapeutic range. Continue to monitor and make adjustment accordingly.

Collected Date/Time: 02/04/18 02:55 **Collected By:** Rinah Raguine, RN

Note: APAP for pain to LLE, dressing change done, noted small drainage from old wound dressing. Tolerated wound dressing change. No adverse reactions noted from Doxycycline therapy. Will continue to monitor.

Collected Date/Time: 02/03/18 18:01 **Collected By:** Lydia N Jones, RN

Note: Plan of Care Reviewed: :
A+O x3. HOH, wears bilat hearing aids. Left lower leg cellulitis dressing C/D/I. Will start PO ABO tonight. Denied pain. Can be impulsive at times, bed alarm on while in bed. Up with assist and walker. PT eval today, patient is safe to go home. No lines, pending discharge. Cabulance will pick up patient to go home tomorrow at 09:00, Dr. Macnab is aware of discharge planning.

Collected Date/Time: 02/03/18 18:00 **Collected By:** Lydia N Jones, RN

Clinical Notes Report

Generated from 02/01/2018 00:00 to 03/03/2018 23:59

Collected Date/Time: 02/03/18 18:00 **Collected By:** Lydia N Jones, RN

Note: Outcome Name: Control of Acute Pain
Outcome Status: Met
Denied pain throughout the shift.

Collected Date/Time: 02/03/18 18:00 **Collected By:** Lydia N Jones, RN

Note: Outcome Name: Identified Safe Discharge Plan
Outcome Status: Met
Patient had physical therapy eval today; patient is safe to discharge home with her son (POA).

Collected Date/Time: 02/03/18 10:40 **Collected By:** Suzanne H Lee, Pharm D

Note: Warfarin dosing per pharmacy at INR 2-3 for 93 yr old female patient with history of bilateral lower extremity DVT.

INR = 2.3 (2.7).

Possible D-D interaction with Warfarin:
Cefepime, APAP, losartan, pentoxifylline

Home warfarin dose: 5 mg daily except 2.5 mg q thur and Sun.

Diet: Soft, Meals: 100%/75%/50%

A/P: INR trended down and remained therpaeutic. Will resume home dose of warfarin 5 mg for today. INR/PT in am. Continue to monitor and make adjustment accordingly.

Collected Date/Time: 02/02/18 21:40 **Collected By:** Erica Sanchez, RN

Note: A&Ox3. Pt is very HOH without her hearing aids. Pt reports no pain at this time. Pt was in chair and wanted to go back to bed. Pt tried to get up herself during NOC, kept insisiting that she can do it herself. Reminded the pt that she need's to use her call light to ask for help from staff.
Showed pt where the call light was. Set the bed alarm on when pt went back to bed. Pt resting now.

Collected Date/Time: 02/02/18 18:48 **Collected By:** Lauren Baughn, RN

Note: Plan of Care Reviewed: :
Pt a/o x 3, pleasant, cooperative, calls for help. Left leg erythemetous, skin taut and open wounds with scant serous drainage. Left leg elevated, wound care assessed wounds and silver alginate Maxorb with ABD and Kerlix dressing applied. Left leg pain managed with Tylenol PRN. Pt reports slight numbness LLE, able to wiggle toes. Pt up in chair most of shift. Pt's gait appears unsteady, contact guard assist, uses FWW and then grabs furniture, physical therapy to evaluate. Pt voiding without difficulty, eating and drinking fluids, IV saline locked. Had BM today. Will continue to monitor.

Collected Date/Time: 02/02/18 12:41 **Collected By:** Erh Chi Huang, Pharm D

Clinical Notes Report

Generated from 02/01/2018 00:00 to 03/03/2018 23:59

Collected Date/Time: 02/02/18 12:41 **Collected By:** Erh Chi Huang, Pharm D

Note: Warfarin dosing per pharmacy at INR 2-3 for 93 yr old female patient with history of bilateral lower extremity DVT.

INR = 2.7 today.

Possible D-D interaction with Warfarin:
Cefepime- Major interaction
Acetaminophen - Moderate interaction

Home warfarin dose: 5 mg daily except 2.5 mg q thur and Sun.

Diet: General, Meals: 100%/-/-

A/P: INR trended down to be within upper normal range. Will restart warfarin at a lower dose at 2.5 mg today. INR/PT in am. Continue to monitor.

Collected Date/Time: 02/02/18 05:17 **Collected By:** Crystal M Gallegos, RN

Note: Plan of Care Reviewed: :
Pain well controlled with tylenol. Patient very unsteady when transfering, initiated high risk fall precautions. Bed alarm on for safety, patient calling appropriately. Left leg wounds open to air with clean paper pads beneath wound per MD reccomendation pending wound care consult wound care orders. Patient slept comfortably durring the night.

Collected Date/Time: 02/02/18 02:11 **Collected By:** Cayce E Stromgren, Pharm D

Note: Warfarin management per pharmacist:
Indication: H/O Bilateral DVTs
INR goal: 2-3
LFTs wnl, albumin 3.9
H/H/: 10.9/35 plt 201
Home regimen: warfarin 5 mg po daily except 2.5 mg on thursday and sunday.
Potential drug-drug interactions: cefepime initiated for LE cellulitis.

INR borderline supratherapeutic 3.0 today, last dose taken 1/31.
Hold warfarin dose today in anticipation INR inc with initiation of cefepime.
Check PT/INR in am and resume warfarin if below 3.0.

Care Management Progress Note

Progress Note	MSW rec'd call from doctor who would like to discharge patient and then presented several barriers - PT needs to see patient before discharge and assess; patient needs to be referred for home health care; and patient lives on Bainbridge Island and has no money for transport. Worked on plan: Called Paula with Kindred at Home who accepted patient; PT was able to work with patient and was cleared; yellow cab taxi voucher to ferry terminal in Seattle and talked with James of Taxis and Tours in Bainbridge Isle who will take patient home even though she has no money as a kindness and it's not a far ride to her apt complex. However, there is still no money for the ferry. MSW called Tri-Med and will call in the morning early to		arrange transport and the hospital will have to be billed. Called House (Alieu) to convey issue - and he approved since that is only thing holding back discharge. Called Tri-Med cabulance and arranged for 9:00 AM for either the 9:40 or 10:30 ferry. Tri-Med will bill care management dept $193.00. Completed priority boarding ferry form. Informed unit secretary Roman and pt.'s RN Lydia who will call Dr. MacNab.

Allergies, Adverse Reactions, Alerts

This section is representative of the current allergy information, at the time of the CCD generation. In the case of regeneration of the CCD, the allergy information may not reflect the state of known allergies at the time of the CCD's subject visit.

- adhesive tape causes Rash.
- Penicillins causes Rash.
- Sulfa (Sulfonamide Antibiotics) causes Rash.
- No Latex Allergy.
- No IV Contrast Allergy.

Medication

It is the responsibility of the patient or patient representative to confirm the list of medications with either the patient's personal care provider or the patient's follow-up care provider to ensure the patient has an appropriate list of medications to take at home.

Preliminary list - medication reconciliation not completed.

Discharge medications

New medications

- doxycycline monohydrate 100 mg Tablet, Ordered By: Amie E Macnab, MD
  Directions: 1 tablet oral twice a day

Continued medications

- acetaminophen-codeine 300 mg-30 mg Tablet, Ordered By: Amie E Macnab, MD
  Directions: 0.25 tablet oral twice a day PRN pain
- atorvastatin 20 mg Tablet, Ordered By: Amie E Macnab, MD
  Directions: 0.5 tablet oral daily
- losartan 25 mg Tablet, Ordered By: Amie E Macnab, MD
  Directions: 0.5 tablet oral daily
- pentoxifylline 400 mg Tablet Extended Release, Ordered By: Amie E Macnab, MD
  Directions: 1 tablet oral three times a day
- timolol maleate 0.5 % Drops, Ordered By: Amie E Macnab, MD
  Directions: 1 drop ophthalmic, both eyes twice a day
- warfarin 5 mg Tablet, Ordered By: Amie E Macnab, MD
  Directions: 1 tablet oral Every Monday, Tuesday, Wednesday, Friday, Saturday
  Additional Instructions: Last dose taken on 1/31/18 @ bedtime, per pt
- warfarin 5 mg Tablet, Ordered By: Amie E Macnab, MD
  Directions: 0.5 tablet oral Every Thursday and Sunday

Stopped medications

- levofloxacin 500 mg Tablet
  Directions: 1 tablet oral daily
  Additional Instructions: started on 1/25/18 for 10 days, per pt

1-eDisch Sum Macnab, MD, Amie 2/4/2018 CUSTDM10\W0TA_STM_BackgroundJ 9/8/2020 8:57:54 PM -04:00

Patient Name: HOFFMAN, JEANNE LEONIE
MR#: U8170135
Date of Admission: 02/01/2018
Acct#: 1823773755
Date of Discharge: 20180204
Dictating Physician: Macnab, MD, Amie

DATE OF SERVICE: 02/04/2018

DISCHARGE DIAGNOSIS:
Cellulitis of left lower extremity in the setting of chronic lower extremity ulcers and peripheral vascular disease.

CONSULTANTS:
1. Dr. Seth Cohen, Infectious Disease.
2. Wound care.

IMAGING:
1. On 02/02/2018, lower extremity arterial Dopplers. In the right lower extremity ABIs are unreliable due to calcification. Mild arterial insufficiency at rest. Popliteal artery distal and tibial peroneal trunk with 20% to 49% stenosis. The posterior tibial artery distal suspected occlusion. Anterior tibial artery mid 20% to 49% stenosis. In the left lower extremity ABIs not obtained due to patient's inability to tolerate blood pressure cuff. Moderate arterial insufficiency at rest. Diffuse calcification throughout the femoral and popliteal arteries. Superficial femoral artery proximal with 20% to 49% stenosis, in the mid region 20% to 49% stenosis, in the distal region 20% to 49% stenosis. The posterior tibial artery with heavy calcification throughout the distal segment. Anterior tibial artery proximal 20% to 49% stenosis. See report for further details and this is based on a preliminary report.
2. Lower extremity Dopplers show in the left lower extremity in the common femoral vein proximal to distal there is chronic nonocclusive deep venous fibrotic changes. In the femoral vein proximal to mid there is chronic nonocclusive deep venous fibrotic changes. See report for further details. This is a preliminary report.

ADMISSION:
See dictated H and P for further details. Briefly, patient is a 93-year-old woman with history of chronic lower extremity wounds on the left leg which have been ongoing for about a year. She has chronic pain in this leg. Patient developed worsening pain and erythema earlier this month and wound cultures performed at the Wound Care Clinic grew MSSA and Enterobacter. She did not have any improvement with Levaquin for which she had been taking for 8 days so came to the emergency department due to worsening pain.

1-eDisch Sum Macnab, MD, Amie 2/4/2018 CUSTDM10\W0TA_STM_BackgroundJ 9/8/2020 8:57:54 PM -04:00

Patient Name: HOFFMAN, JEANNE LEONIE **MR#:** U8170135
Date of Admission: 02/01/2018 **Acct#:** 1823773755
Date of Discharge: 20180204
Dictating Physician: Macnab, MD, Amie

HOSPITAL COURSE BY PROBLEM:
1. Cellulitis of the lower leg in the setting of chronic lower extremity wounds and peripheral vascular disease. The patient has been afebrile. Her white count has been normal. Her CRP was normal. ID was consulted. She was given cefepime IV for 2 days and then switched to oral doxycycline which she will continue until she follows up with Wound Care Clinic. She was continued on Trental. She was also seen by the Wound Care Clinic and had arterial and venous Dopplers performed with plan to follow up in Wound Care Clinic later this week. At time of discharge, patient's pain is significantly improved.
2. Dysmobility. Patient reported holding on to furniture at home to ambulate at baseline. She was seen by PT who felt that she could be discharged back to her previous home environment but recommend home health PT which has been arranged.
3. Chronic anticoagulation due to history of DVT. She has been continued on her warfarin. On day of discharge, her INR has decreased to 1.7. This is in setting of initially holding her warfarin due to it being supratherapeutic and also while taking doxycycline. Patient has been instructed to continue on 5 mg at night and home health nurse will check her INR either tomorrow or the following day.

DISPOSITION:
Patient will discharge home where she lives with her son.

FOLLOWUP INSTRUCTIONS:
Patient will follow up with the Wound Care Clinic later this week and has home health arranged for PT, wound care and INR checks.

DISCHARGE MEDICATIONS:
The patient is to continue her previous home medications including:

1. Acetaminophen/codeine 300/30 mg tablet quarter to 1 tablet twice a day as needed for pain.

2. Atorvastatin 10 mg daily.
3. Losartan 12.5 mg daily.
4. Pentoxifylline 400 mg extended release, 3 times a day.
5. Timolol 0.5% drop ophthalmic both eyes twice a day.
6. Warfarin has been changed to 5 mg daily with followup INR with wound care home nurse.
7. The patient has been given a prescription for doxycycline 100 mg twice a day to take until she follows up with Wound Care Clinic. She has

been given a prescription for 7 days.

PHYSICAL EXAMINATION:
VITAL SIGNS: On day of discharge, temperature 36.1, pulse 59, respiratory rate 18, blood pressure 114/52, satting 97% on room air.
GENERAL: Patient is awake, conversant, in no acute distress. She has no increased work of breathing and she is ambulatory with a walker. Yesterday when I examined her leg she had decreased erythema and tenderness. The patient's discharge was delayed until this morning due to transportation issues with her living on Bainbridge Island.

CODE STATUS:
FULL CODE.

PACIFIC VASCULAR

Lower Extremity Venous Reflux Exam

UW Medicine NORTHWEST HOSPITAL & MEDICAL CENTER CARDIAC & VASCULAR IMAGING CENTER

Patient Name:	**JEANNE L HOFFMAN**	Date of Exam:	**02/02/2018 03:08 PM**
PVI #:	**10114841-50197618-40226773**	DOB, Age, Gender:	**1/6/1925 93 Female**
MRN / Acct#:	**U8170135-1823773755**	Patient Type:	**Inpatient**
Referring Clinician:	**TERESA L. GEGAX MARTINEZ, ARNP**	Exam Location:	**Northwest Hospital Medical Center**
Cc:		Technologist:	**Julie T. Harrold, RVT**

NON UW EPIC ORDER

Clinical Indication:

Patient is referred for chronic venous ulcers of the left lower extremity. Patient reports of over a year history of painful non-healing ulcers on her left calf and foot. At the time of the exam there is erythema noted throughout the left calf. Patient reports of prior bilateral lower extremity vein stripping years ago. Risk factors include: history of deep vein thrombosis, pregnancies (2) and limb trauma/surgery.

Interpretation:

Side	Vein	Maximum Reflux (sec)	Maximum Diameter (mm)
Right	Great saphenous		0
	Small saphenous		0
Left	Great saphenous	2.5	8
	Small saphenous	0.21	2.1

Technically challenging and limited exam due to tenderness in the left calf.
Right Lower Extremity:
Superficial venous reflux/valvular incompetence (0.5 seconds or greater):
**Superficial tributary D and superficial tributary E
Deep venous reflux/valvular incompetence:
**Common femoral vein distal and femoral vein mid
Great saphenous vein is not positively identified
Small saphenous vein is not positively identified
The remainder of the veins are patent and without evidence of thrombosis
Left Lower Extremity:
Common femoral vein proximal to distal: chronic non-occlusive deep venous fibrotic changes
Femoral vein proximal to mid: chronic non-occlusive deep venous fibrotic changes
Superficial venous reflux/valvular incompetence (0.5 seconds or greater):
**Great saphenous at saphenofemoral junction, below the saphenofemoral junction, mid thigh, and distal thigh
**Great saphenous proximal calf
Patient could not tolerate compressions in the calf, unable to evaluate for reflux in the mid to distal great saphenous vein and small saphenous vein
**Superficial tributary D
Deep venous reflux/valvular incompetence:
**Common femoral vein distal, femoral vein mid, and popliteal vein mid
The remainder of the veins are patent and without evidence of thrombosis

Summary/Conclusion:

There are findings on this exam that may correlate with the referring indication:

1. **There is evidence of deep venous valvular insufficiency in the bilateral common femoral, main femoral and left popliteal veins.**
2. **There is also evidence of superficial venous valvular insufficiency in the left great saphenous and bilateral tributary veins as detailed on the accompanying table.**

PVI #	**10114841-50197618-40226773**	DOB, Age, Gender:	**1/6/1925 93 Female**

Study Findings: All veins examined by duplex ultrasound (bilateral, femoral, popliteal and calf veins, and great and small saphenous veins) display B-mode images (full compressibility with no intraluminal echoes), normal luminal color filling, and spectral Doppler waveforms, velocities, and valve closure times that are within normal limits unless otherwise noted.

All current labs have been reviewed by myself as of 2/3/2018 13:23.

Assessment and Plan

1) Cellulitis, Peripheral Vascular Disease, Chronic Ulcer of Lower Extremity, Clinical Status Improving, afebrile, WBC nl. CRP normal. + improved pain and erythema in left lower leg. Chronic ulcers over left leg with history of MSSA and enterobacter from cultures from earlier this month, Plan

- follow up in wound care clinic later this week
- ID consulting
- change cefepime to doxycycline.

eProgress Note General Medical Adult (Progress Note) Amie E Macnab, MD 2/3/2018 CUSTDM10\W0TA_STM_BackgroundJ 9/8/2020 8:55:01 PM -04:00

An Important Message From Medicare About Your Rights

As A Hospital Inpatient, You Have The Right To:

- Receive Medicare covered services. This includes medically necessary hospital services and services you may need after you are discharged, if ordered by your doctor. You have a right to know about these services, who will pay for them, and where you can get them.
- Be involved in any decisions about your hospital stay, and know who will pay for it.
- Report any concerns you have about the quality of care you receive to the Quality Improvement Organization (QIO) listed here:

Name of QIO
Livanta, LLC
Telephone Number of QIO
1–877–588–1123

Your Medicare Discharge Rights

Planning For Your Discharge: During your hospital stay, the hospital staff will be working with you to prepare for your safe discharge and arrange for services you may need after you leave the hospital. When you no longer need inpatient hospital care, your doctor or the hospital staff will inform you of your planned discharge date.

If you think you are being discharged too soon:

- You can talk to the hospital staff, your doctor and your managed care plan (if you belong to one) about your concerns.
- You also have the right to an appeal, that is, a review of your case by a Quality Improvement Organization (QIO). The QIO is an outside reviewer hired by Medicare to look at your case to decide whether you are ready to leave the hospital.
  - ❑ **If you want to appeal, you must contact the QIO no later than your planned discharge date and before you leave the hospital.**
  - ❑ If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
- If you do not appeal, but decide to stay in the hospital past your planned discharge date, you may have to pay for any services you receive after that date.
- Step by step instructions for calling the QIO and filing an appeal are on page 2.

To speak with someone at the hospital about this notice, call: Care Management Department at 206–668–1304.

Please sign and date here to show you received this notice and understand your rights.

Steps to Appeal Your Discharge

- **Step1**: You must contact the QIO no later than your planned discharge date and before you leave the hospital. If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
  - ❑ Here is the contact information for the QIO:

    Name of QIO (in bold)
    Livanta, LLC

    Telephone Number of QIO
    1-877-588-1123
  - ❑ You can file a request for an appeal any day of the week. **Once you speak to someone or leave a message, your appeal has begun.**
  - ❑ Ask the hospital if you need help contacting the QIO.
  - ❑ The name of this hospital is : Northwest Hospital & Medical Center.

Hospital Name	Provider ID Number
Acute NPI:	**1700861580**
Geropsych NPI:	**1497766067**

- **Step 2**: You will receive a detailed notice from the hospital or your Medicare Advantage or other Medicare managed care plan (if you belong to one) that explains the reasons they think you are ready to be discharged.
- **Step 3**: The QIO will ask for your opinion. You or your representative need to be available to speak with the QIO, if requested. You or your representative may give the QIO a written statement, but you are not required to do so.
- **Step 4**: The QIO will review your medical records and other important information about your case.
- **Step 5**: The QIO will notify you of its decision within 1 day after it receives all necessary information.
  - ❑ If the QIO finds that you are not ready to be discharged, Medicare will continue to cover your hospital services.
  - ❑ If the QIO finds you are ready to be discharged, Medicare will continue to cover your services until noon of the day after the QIO notifies you of its decision.

If You Miss The Deadline To Appeal, You Have Other Appeal Rights:

- You can still ask the QIO or your plan (if you belong to one) for a review of your case:
  - ❑ If you have Original Medicare: Call the QIO listed above.
  - ❑ If you belong to a Medicare Advantage Plan or other Medicare managed care plan: Call your plan.
- If you stay in the hospital, the hospital may charge you for any services you receive after your planned discharge date.

NWH INPATIENT WOUND CONSULTATION

DATE OF SERVICE: 2/2/18

ID/CC: 93F admitted from wound care center for LLE cellulitis and non healing vascular leg ulcers. Dr Macnab requests wound consultation for this issue.

HPI: The patient, Jeanne, has been attending the wound care center for nearly 10 months, followed by Dr Raghu and more recently Dr. Luu of plastic surgery. She has known mixed vascular disease, studies roughly a year old in mindscape, patient doesn't believe she has a vascular surgeon involved at present. She has been on Levaquin for left leg cellulitis for a week and due to lack of improvement she was admitted for further evaluation and care. There has been discussion about skin grafting the wounds, stalled by development of cellulitis. Wound culture 1/11 grew Enterobacter and coag + staph. XR 8/17/17 was negative for bony abnormality. She lives on Bainbridge Island with her caring son and comes to clinic intermittently for evaluation. No recent compression has been used for concern of arterial supply. Coordinated todays wound care evaluation with Dr. Cohen, ID. WBC normal since admit at 6, no fevers.

ROS: denies fevers, chills. Endorses longstanding leg edema, weeping wounds which saturate dressing and clothes. Redness of the leg was new

PFSH: as above lives locally with son. No current tobacco, ETOH other drug use

PMH/Medications/Allergies: reviewed in EMR therefore not retyped here

O:

VSS, afebrile
Gen: alert conversant elderly female sitting up in bedside chair NAD
Ext: 2+ LLE edema, trace RLE edema feet are symmetrically warm with non palpable pedal pulses
Skin: extensive scarring LLE. L Medial malleolus 3.5x2.0x0.2 cm ulcer, posterior-lateral calf 6x3.5x0.2 cm ulceration, lateral malleolus 3x0.8x0.2 cm ulceration all wound beds with mixed yellow fibrinous debris, some pink granulation. No deep structure exposed, no purulence. Mild erythema and stasis dermatitis to knee level, patient reports improving.

A:
Improving left lower extremity cellulitis, mixed PVD (venous and arterial), full thickness left medial and lateral malleolus and posterior calf all with fat layer exposed.

P:
Local care: silver alginate ABD, roll gauze QOD & PRN. Leg elevation
Requested repeat vascular studies, LEA and venous reflux study. Will arrange for outpatient vascular consult at wound clinic for review as I do think she would really benefit from compression of some sort if at all possible +/- vascular intervention if indicated. Think this would be helpful to coordinate prior to grafting attempts.
Appreciate ID input on antibiotic management. Anticipate she will be able to discharge home soon in the coming days with joint WCC, ID follow up.

Lower Extremity Arterial Exam

Aortoiliac and Lower Extremity Duplex and Physiologic Testing

UW Medicine NORTHWEST HOSPITAL & MEDICAL CENTER CARDIAC & VASCULAR IMAGING CENTER

Patient Name:	**JEANNE L HOFFMAN**	Date of Exam:	**02/02/2018 01:57 PM**
PVI #:	**10114841-50197620-40226776**	DOB, Age, Gender:	**1/6/1925 93 Female**
MRN / Acct#:	**U8170135-1823773755**	Patient Type:	**Inpatient**
Referring Clinician:	**TERESA L. GEGAX MARTINEZ, ARNP**	Exam Location:	**Northwest Hospital Medical Center**
Cc:		Technologist:	**Julie T. Harrold, RVT**

NON UW EPIC ORDER

Clinical Indication:

Patient is referred for non-healing venous leg ulcers. Patient has three ulcers on her left distal calf and foot which she has had for over a year. The leg is tender to the touch with erythema noted throughout the calf.

Interpretation: Ankle brachial indices: Right - [1.54], Left - [n/a], Digit brachial indices: Right - [0.49], Left - [0.35]

Technically challenging and limited exam due to left leg tenderness.

Abdominal Aorta:
Limited visualization of the abdominal aorta due to overlying bowel gas

Right Lower Extremity:
Ankle/brachial indices are felt to be unreliable secondary to medial calcification.
Based on waveform analysis there is: mild arterial insufficiency at rest
Common iliac artery: non-visualized due to overlying bowel gas
Diffuse calcification throughout the femoral and popliteal arteries
Popliteal artery distal and tibioperoneal trunk artery: 20-49% stenosis
Posterior tibial artery distal: suspected occlusion; heavy calcification noting retrograde flow in the mid segment
Anterior tibial artery mid: 20-49% stenosis
Three vessel runoff
Digit brachial index is abnormal suggestive of small vessel disease
No other significant abnormalities identified

Left Lower Extremity:
Ankle brachial indices were not obtained due to patient inability to tolerate blood pressure cuffs
Based on waveform analysis there is moderate arterial insufficiency at rest
Common iliac artery: non-visualized due to overlying bowel gas
Diffuse calcification throughout the femoral and popliteal arteries
Superficial femoral artery proximal: 20-49% stenosis and 20-49% stenosis
Superficial femoral artery mid: stenosis and 20-49% stenosis
Superficial femoral artery distal: 20-49% stenosis
Posterior tibial artery: heavy calcification throughout the distal segment, unable to rule out areas of segmental occlusion
Anterior tibial artery proximal: 20-49% stenosis
Digit brachial index is abnormal suggestive of small vessel disease
Three vessel runoff
No other significant abnormalities identified

Summary/Conclusion: Unreliable ABI due to medial calcifications. Mild right lower extremity arterial insufficiency at rest. Moderate left lower extremity arterial insufficiency at rest. Multifocal low grade stenosis throughout the left lower extremity.

3-eConsultation Cohen, MD, Seth 2/2/2018 CUSTDM10\W0TA_STM_BackgroundJ 9/8/2020 9:01:05 PM -04:00

Patient Name: HOFFMAN, JEANNE LEONIE **MR#:** U8170135
Date of Admission: 02/01/2018 **Acct#:** 1823773755
Date of Discharge:
Dictating Physician: Cohen, MD, Seth

DATE OF SERVICE: 02/02/2018

REQUESTING PHYSICIAN:
Dr. Macnab.

CHIEF COMPLAINT:
Chronic lower extremity wounds with concern for superinfection.

HISTORY OF PRESENT ILLNESS:
The patient is a 93-year-old woman with chronic lower extremity wounds followed in Wound Care Clinic with a history of venous insufficiency, remote history of lower extremity DVT and a remote history of skin grafting, who was admitted from Wound Care Clinic for concerns for left lower extremity cellulitis not responding to antibiotics. In early May 2017, she was treated with Keflex and doxycycline for cellulitis. She had arterial insufficiency diagnosed by Doppler at that time. The studies are not available in Soarian to review. She had been seeing Dr. Luu in Wound Care Clinic and due to worsening pain and erythema on January 11, a skin swab was obtained, which grew MSSA and Enterobacter. She was started on levofloxacin, which she has been taking faithfully. However, due to possibly increased pain and non-resolving erythema, she was sent to the emergency department. She was started on cefepime. She otherwise has no complaints. Denies fevers or chills. Has minimal pain at baseline and has not had night sweats. Her son helps her with her wound care.

PAST MEDICAL HISTORY:
Chronic lower extremity ulcerations for at least a year, history venous insufficiency, bilateral lower extremity DVT 30 years ago, now on Coumadin, peripheral neuropathy.

REVIEW OF SYSTEMS:
A full review of systems was obtained and was negative, except as mentioned in the HPI.

SOCIAL HISTORY:
She lives with her son. Does not smoke or drink. Uses a walker for ambulation.

FAMILY HISTORY:

Patient Name: HOFFMAN, JEANNE LEONIE **MR#:** U8170135
Date of Admission: 02/01/2018 **Acct#:** 1823773755
Date of Discharge:
Dictating Physician: Cohen, MD, Seth

No history of recurrent or severe infections.

ALLERGIES:
1. PENICILLIN taken at least 35 years ago caused hives.
2. SULFA taken at the same time also reportedly caused hives.
3. She has a TAPE allergy as well as reporting being sensitive to NARCOTIC PAIN MEDICATIONS.

MEDICATIONS:
1. Atorvastatin.
2. Cefepime 2 g q.24.
3. Losartan.
4. Pentoxifylline.
5. Timolol.
6. Coumadin.

PHYSICAL EXAMINATION:
VITAL SIGNS: Temperature 36.8, pulse is 80, respirations 18, blood pressure 126/65, satting at 98% on room air.
GENERAL: She is a well-appearing, elderly woman in no apparent distress. She is hard of hearing. She is deaf in her right ear and has limited hearing in her left. Oropharynx is clear. There is no thrush. Mucous membranes are dry. Her pupils are equal, with full extraocular movements. She has no cervical or supraclavicular lymphadenopathy.
HEART: Regular rate and rhythm without murmurs, rubs, or gallops.
LUNGS: Clear to auscultation bilaterally.
ABDOMEN: Soft, nontender, nondistended with normoactive bowel tones. She is alert and oriented x3 with fluent speech, following commands. Normal mood and affect.
SKIN EXAM: Left leg has faint erythema below the knee. There is 1+ edema, which is painful to palpation. She has several ulcerations on her lateral leg, medial ankle and foot with evidence of prior skin graft. There is no exudate. The erythema does improve somewhat with elevation. Her skin is dry, but

otherwise the wounds appear well cared for and quite chronic.

LABORATORIES:
White count of 6.17, hemoglobin 9.6, platelets 194. INR 2.7. Creatinine 0.96. CRP 1.9.

IMAGING:
Personally reviewed. Tib-fib films show soft tissue abnormalities. No bony

findings suspicious for osteomyelitis.

ASSESSMENT AND PLAN:
This is a 93-year-old woman with arterial and venous insufficiency, here with nonhealing ulcers and secondary cellulitis that has not responded to levofloxacin. Cultures previously grew enterobacter and methicillin-sensitive Staphylococcus aureus. The role of enterobacter in this setting is unclear. She is highly likely to be colonized given the chronicity of her chronic wounds. It is not clear if treatment directed at this will improve her cellulitis, which at this time is quite mild. Suspect that a significant component of her erythema is due to vascular insufficiency, though it does seem reasonable to continue her antibiotics as she is likely slower to respond than many patients. I would have expected her levofloxacin to be quite active in this setting. Given her age, she is at risk for side effects of the levofloxacin and on discharge she could be sent home on doxycycline. She will need close following of her INR due to interactions with doxycycline and Coumadin and her Coumadin will need to be adjusted accordingly. Anticipate continuing cefepime for now. I will follow up with her next week in Wound Care Clinic to determine a total duration of her antibiotics. For her arterial insufficiency, she can continue to Trental and will need updated vascular studies. She will likely benefit from compression, depending on the severity of her arterial insufficiency.

Thank you very much for this consultation. Case was discussed with the primary team as well as with Wound Care.

DATE OF SERVICE: 02/01/2018

CHIEF COMPLAINT:
The patient is a 93-year-old woman who came to the emergency department due to increased left lower extremity pain in the setting of chronic wounds.

HISTORY OF PRESENT ILLNESS:
The patient is a 93-year-old woman with history of chronic lower extremity wound on the left leg which has been ongoing for about a year. She has chronic pain in her leg for which she takes a quarter tablet of Tylenol with codeine and aspirin on a routine basis. The patient developed worsening pain and erythema and back on
January 11th had wound cultures performed at the Wound Care Clinic that grew MSSA and Enterobacter. She has been reportedly taking Levaquin for the last 8 days, but has not had any improvement in her leg symptoms. She says that a week ago the erythema was worse, but today the pain has increased. The patient denies any fevers or chills. No shortness of breath, chest pain, nausea, vomiting, diarrhea, or constipation. The patient says the pain is severe but is able to ambulate. In the emergency department, she was given cefepime and admitted for further treatment.

PAST MEDICAL HISTORY:
1. Chronic lower extremity ulcerations of her legs have been going on for the last year at least.
2. History of venous insufficiency.
3. Bilateral lower extremity DVT about 30 years ago and has since been on warfarin.
4. History of poor balance.
5. Chronic peripheral neuropathy.
6. History of right lower extremity fracture.

SOCIAL HISTORY:
She uses a walker for ambulation. Her son lives with her. She does not smoke or drink.

FAMILY HISTORY:
The patient denies known family history. Says mother died of old age.

REVIEW OF SYSTEMS:
See above HPI. Otherwise, complete review of systems is negative.

Patient Name: HOFFMAN, JEANNE LEONIE **MR#:** U8170135
Date of Admission: 02/01/2018 **Acct#:** 1823773755
Date of Discharge:
Dictating Physician: Macnab, MD, Amie

ALLERGIES:
1. TAPE causes rash.
2. PENICILLIN causes rash.
3. SULFA causes rash.
4. The patient also says she is very sensitive to NARCOTIC PAIN MEDICATIONS.

HOME MEDICATIONS:
1. Acetaminophen/codeine 300/30 mg quarter of a tablet twice a day as needed for pain.
2. Atorvastatin 10 mg daily.
3. Levofloxacin 500 mg daily started on 01/25.
4. Losartan 12.5 mg daily.
5. Pentoxifylline 400 mg 3 times a day.
6. Timolol 0.5% eye drops both eyes twice a day.
7. Warfarin 5 mg Monday, Tuesday, Wednesday, Friday and 2.5 mg Thursday and Sunday.

PHYSICAL EXAMINATION:
VITAL SIGNS: Temperature 36.8, pulse 87, respiratory rate 24, blood pressure 148/94, satting 100% on room air.
GENERAL: Patient is awake, conversant, appears to be in pain.
HEENT: Pupils equal. Oral mucous membranes moist.
NECK: Supple. No lymphadenopathy.
LUNGS: Clear to auscultation bilaterally.
CV: Regular rate and rhythm with no murmurs.
ABDOMEN: Soft, nontender.
EXTREMITIES: Her left lower leg is diffusely erythematous to below her knee. It is moderately edematous and tender to palpation. She has 3 ulcerations, 1 around her medial ankle, 1 on her lateral lower leg, and 1 on her foot. They are dry with no drainage. The patient also has tenderness to palpation over her right ankle as well with 1+ pitting edema with no significant erythema

noted on her right lower leg. She has dopplerable pulses in her bilateral dorsalis pedis.
SKIN: See extremity exam.
NEURO: Patient is awake, answering questions appropriately. Moving all 4 extremities though decreased movement in her left lower leg due to pain. The patient reports chronic neuropathy that is unchanged.

LABORATORY DATA:
White count is 6.7, hematocrit 35, platelets 201, INR 3. Chem 7 notable for a

BUN of 24, creatinine 1.08. LFTs within normal limits. CRP 1.9.

ASSESSMENT/PLAN:
1. Cellulitis in the setting of chronic wounds of the left lower leg. The patient did not have any improvement of her symptoms while on Levaquin. She is afebrile with a normal white count though has significant pain in her left leg. Will change antibiotics to cefepime. Will order request Infectious Disease consult and wound care. We will continue her Trental.
2. History of anticoagulation due to history of deep venous thrombosis. INR is therapeutic. We will continue warfarin.
3. Code status: The patient says she defers her code status to her son who will be here tomorrow, so for now will be FULL CODE.

Discharge Date Time: 2018-02-01 13:29:00

DATE: FEB 0 1 2017 TIME: 1140 | Type of Service: ☐ Initial Visit ☒ Follow–up Visit ☐ Nurse–only Visit ☐ Other:

This section may be completed by the Nurse/MA/CNA or HBO Tech.

Patient Arrived: ☒ Ambulatory ☐ Cane ☐ Crutches ☐ Walker ☐ Wheelchair ☐ Stretcher ☐ Other:

Transfer Assistance: ☐ Hoyer Lift ☐ Manual ☐ Transfer Board ☐ Stretcher ☒ None ☐ Other:

Height: _____inches
Source: ☐ Stated/Not Measured ☐ Measured ☒ Not measured

Weight: _____lbs.
Source: ☐ Stated ☐ Measured

Accompanied by: Son

Patient Identification Verified: ☒ Yes Secondary Verification Process: ☒ Yes DOB

Patient requires Transmission–Based Precautions? ☐ Yes ☒ No If yes, ☐ Airborne ☐ Droplet ☐ Contact

Vital Signs ☐ **HBO Visit** *(If this is an HBO Visit, skip this section as vital signs are captured on the HBO Treatment Record.)*

Temperature: 98.4 Pulse: 64 Respirations: 16 Blood pressure (mmHg): 110/60
If ordered by physician: Capillary Blood Glucose: _____ mg/dL *(Hospital's blood glucose reference range: _____ mg/dL)*

History Since Last Visit ☐ N/A *(If this is Patient's Initial Visit, check N/A and skip this section.)*

Added or deleted any medications: ☐ Yes ☒ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Any new allergies or adverse reactions: ☐ Yes ☒ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☒ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☒ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☐ Yes ☒ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed: ☒ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☒ N/A

Has compression in place as prescribed: ☐ Yes ☐ No ☒ N/A Has offloading in place as prescribed: ☐ Yes ☐ No ☒ N/A

Blood glucose under control: ☐ Yes ☐ No ☒ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear. ☐ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☒ R ☒ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☒ **Yes** ☐ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES:

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: K McKinnon RN BSN Date: 2/1/18 Time: 1140

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non–wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☒ Yes ☐ No Location of pain: L hip

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 10 **Duration of Pain:** ☐ Constant ☒ Intermittent

Character of Pain: ☐ Aching ☒ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy
☐ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☐ Medication ☒ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S
☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☒ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management

Modification to Pain Management

Patient Information for Inclusion in the UW Medicine Inpatient Facility Directory

Please Read this Statement Carefully

I understand that I have a choice as to whether or not to be included in the UW Medicine entity's facility directory. My decision is indicated by marking a box and signing this form.

☒ **YES, please include me in the Inpatient Facility Directory.** The hospital has informed me that my name, location, and general health condition will be included in its inpatient facility directory. This information will be made available to people who ask for me by name such as my relatives, friends, and fellow employees.

- Harborview Medical Center
- Northwest Hospital and Medical Center
- University of Washington Medical Center / Seattle Cancer Care Alliance
- Valley Medical Center

If I have provided my religious affiliation to UW Medicine in the past or if I provide my religious affiliation to UW Medicine now, I authorize its disclosure to clergy of my religious affiliation. Disclosure of my religious affiliation may result in a visit from a clergy member of my affiliation while I am being treated at UW Medicine.

If you have provided your religious affiliation to UW Medicine in the past and do not want a visit from a clergy member of your affiliation, please inform the registration staff.

☐ **NO, please do not include me in the Inpatient Facility Directory.** I do not want my name, location and general health condition included in the UW Medicine entity's Inpatient Facility Directory. **If this is my choice, I understand it is my responsibility to notify family and friends of my location and phone number if I wish them to contact me. I also understand that by choosing not to be in the directory, UW Medicine will be unable to deliver items *(for example, flowers and gifts)* addressed to me.**

For Staff Use Only

☐ **ADMIN OPT-OUT:** Please provide reason for Administrative Opt-Out

☐ Crime Victim ☐ Employee ☐ Incarcerated Patient
☐ Involuntary Commitment ☐ Unable to Interview Patient ☐ Media Interest

By signing below, it shows that you have read this document. If there is any part of this form that is unclear, be sure to ask questions about it.

Date	Signature (Patient or Person Authorized to Give Authorization)
2/1/18	Jeanne L Hoffman

IF SIGNED BY PERSON OTHER THAN PATIENT, CHECK RELATIONSHIP TO PATIENT:

☐ 1. Guardian ☐ 2. Durable Power of Attorney for Health Care ☐ 3. Spouse/registered domestic partner
☐ 4. Adult Child(ren) ☐ 5. Parent(s) ☐ 6. Adult Brother(s)/Sister(s)

FOR MINOR PATIENTS:

☐ 1. Guardian/legal custodian ☐ 2. Court-authorized person for child in out-of-home placement ☐ 3. Parent(s)
☐ 4. Holder of signed authorization from parent(s) ☐ 5. Adult representing self to be a relative responsible for the minor's health

NORTHWEST HOSPITAL & MEDICAL CENTER — Partners with the Community for Wellness

Our mission is to raise the long–term health status of our community by providing personalized, quality care with compassion, dignity, and respect.

	WHAT TO LOOK FOR?	WHAT TO DO?
HEART FAILURE 	**Call your primary care provider for any of the symptoms below:** • Shortness of breath that gets worse or wakes you from sleep • Weight gain above 2lb per day or 3lb per week • Swollen/puffy feet, ankles or legs • Dizziness or light–headedness with standing • Feeling exhausted during routine activity	• Don't smoke! • Take medications on time, to control blood pressure, choles–terol and glucose • Check weight daily • Pace yourself. Slow down or stop when you need to rest • Participate in activities that you can do comfortably and build exercise into your daily routine • Avoid stress • Eat heart healthy diet: reduce salt, fat, cholesterol, and increase fiber • Limit alcohol intake • Follow up regularly with your primary care provider as directed
STROKE "Brain Attack!"	**Call 911 if you have:** • Sudden numbness or weakness of face, arm or leg • Sudden confusion, trouble speaking or understanding • Sudden change in vision in one or both eyes • Sudden difficulty with walking • Sudden dizziness, loss of balance or coordination • Sudden severe headache with un–known cause	**Know the 2 types of stroke** • Ischemic stroke – blocked artery • Hemorrhagic – ruptured artery **How to prevent stroke** • Don't smoke! • Control blood pressure • Take medications as directed • Manage diabetes • Eat a heart healthy diet: reduce salt, fat, cholesterol, and • increase fiber • Incorporate physical activity into your daily routine • Limit alcohol intake • Maintain healthy weight
QUIT SMOKING	**Did you know?** • Tobacco is the number 1 killer in America today • Second hand smoke is just as harmful to your health • 1/2 million Americans die from smok–ing related disease each year	• Get ready to quit and pick a date to stop smoking • Get support and encouragement from family, friends and co–workers • Do things differently to avoid triggers that make you want to smoke • Consider medication and use it correctly • Be prepared for relapse, it may take several attempts • Join a support group or telephone a quit–line

Department of Health & Human Services
Centers for Medicare & Medicaid Services
OMB Approval No. 0938–0692

An Important Message From Medicare About Your Rights

As A Hospital Inpatient, You Have The Right To:

- Receive Medicare covered services. This includes medically necessary hospital services and services you may need after you are discharged, if ordered by your doctor. You have a right to know about these services, who will pay for them, and where you can get them.
- Be involved in any decisions about your hospital stay, and know who will pay for it.
- Report any concerns you have about the quality of care you receive to the Quality Improvement Organization (QIO) listed here:

Name of QIO
Livanta, LLC

Telephone Number of QIO
1–877–588–1123

Your Medicare Discharge Rights

Planning For Your Discharge: During your hospital stay, the hospital staff will be working with you to prepare for your safe discharge and arrange for services you may need after you leave the hospital. When you no longer need inpatient hospital care, your doctor or the hospital staff will inform you of your planned discharge date.

If you think you are being discharged too soon:

- You can talk to the hospital staff, your doctor and your managed care plan (if you belong to one) about your concerns.
- You also have the right to an appeal, that is, a review of your case by a Quality Improvement Organization (QIO). The QIO is an outside reviewer hired by Medicare to look at your case to decide whether you are ready to leave the hospital.
  - ❑ **If you want to appeal, you must contact the QIO no later than your planned discharge date and before you leave the hospital.**
  - ❑ If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
- If you do not appeal, but decide to stay in the hospital past your planned discharge date, you may have to pay for any services you receive after that date.
- Step by step instructions for calling the QIO and filing an appeal are on page 2.

To speak with someone at the hospital about this notice, call: Care Management Department at 206–668–1304.

Please sign and date here to show you received this notice and understand your rights.

MEDICARE IMPORTANT MESSAGE

M–1195 (07/2017) File Under: Admitting Financial

Steps To Appeal Your Discharge

- **Step** [redacted]ou must contact [redacted]QIO no later tha[redacted]ur planned disch[redacted] date and before [redacted] leave the hospital. If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
  - ❑ Here is the contact information for the QIO:

    Name of QIO (in bold)
    Livanta, LLC

    Telephone Number of QIO
    1–877–588–1123
  - ❑ You can file a request for an appeal any day of the week. **Once you speak to someone or leave a message, your appeal has begun.**
  - ❑ Ask the hospital if you need help contacting the QIO.
  - ❑ The name of this hospital is : Northwest Hospital & Medical Center.

Hospital Name	Provider ID Number
Acute NPI:	**1700861580**
Geropsych NPI:	**1497766067**

- **Step 2**: You will receive a detailed notice from the hospital or your Medicare Advantage or other Medicare managed care plan (if you belong to one) that explains the reasons they think you are ready to be discharged.
- **Step 3**: The QIO will ask for your opinion. You or your representative need to be available to speak with the QIO, if requested. You or your representative may give the QIO a written statement, but you are not required to do so.
- **Step 4**: The QIO will review your medical records and other important information about your case.
- **Step 5**: The QIO will notify you of its decision within 1 day after it receives all necessary information.
  - ❑ If the QIO finds that you are not ready to be discharged, Medicare will continue to cover your hospital services.
  - ❑ If the QIO finds you are ready to be discharged, Medicare will continue to cover your services until noon of the day after the QIO notifies you of its decision.

If You Miss The Deadline To Appeal, You Have Other Appeal Rights:

- You can still ask the QIO or your plan (if you belong to one) for a review of your case:
  - ❑ If you have Original Medicare: Call the QIO listed above.
  - ❑ If you belong to a Medicare Advantage Plan or other Medicare managed care plan: Call your plan.
- If you stay in the hospital, the hospital may charge you for any services you receive after your planned discharge date.

For more information, call 1–800–MEDICARE (1–800–633–4227), or TTY: 1–877–486–2048. CMS does not discriminate in its programs and activities. To request this publication in an alternate format, please call: 1–800–MEDICARE or email: AltFormatRequest@cms.hhs.gov.

Additional Information:

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938–0692. The time required to complete this information collection is estimated to average 15 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4–26–05, Baltimore, Maryland 21244–1850.

PATIENT BELONGINGS INVENTORY– ADMITTING STAFF

© UH0951A (07/15) File Under: Admitting Financial

PATIENT PROPERTY NOTICE, WAIVER AND ASSUMPTION OF RISK

Northwest Hospital (NWH) staff respects and promotes the rights of all patients. Patients should expect that efforts are taken to promote a safe and secure environment. NWH will make reasonable efforts to safeguard the personal property of patients; however, property is generally the responsibility of patients and their families, and NWH cannot guarantee the security of personal property. To minimize potential harm to personal property including lost, misplaced, stolen or damaged items, the following practices will be observed:

NWH has two choices for storing personal property of patients during hospitalization:	1	One choice is placing items in the NWH "Valuables and Property Storage System". This choice involves NWH placing small valuables (examples: watch, jewelry, dentures, glasses) in a secure locked safe in the Admitting Department. This "Valuables and Property Storage System" utilizes a witnessed (2 person) property check–in process. It is generally for nonessential items and access to this may be limited by hours of operation.
	2	Another choice for storing property is in the patient's room. The patient is generally responsible for these items and these items are generally accessible to the patient. NWH will provide limited unsecured storage spaces for patient storage of personal property in the hospital room during hospitalization.

- Patients are strongly encouraged to leave and/or send all nonessential belongings and valuables home.
- Prohibited items are firearms and other dangerous weapons, illegal drugs, marijuana, drug paraphernalia, and alcohol.
- Biohazards or severely damaged clothing are generally discarded immediately unless required for forensic evidence. (Biohazards means: clothing or other items are contaminated in the judgment of medical staff and presents a health risk.)
- NWH will dispose of unclaimed patient belongings as allowed by law after proper notice and time period for retrieval of items. When patient belongings are not claimed after 30 days, items are disposed of as allowed by law.
- Further information about NWH's property policies and procedures will be provided as needed or requested to the patient or patient's authorized representative.

Patient's Personal Property Liability Agreement

I, the undersigned, have read or have been informed about the above policy. I/patient understand that I/patient am responsible for all property brought to Northwest Hospital. I/patient understand that the hospital recommends all nonessential items be left at home or be sent home with family or friends.

I/patient understand that the hospital provides a "Valuable and Property Storage System" for important personal property and that access to this area may be limited by hours of operation.

I/patient agree to hold the hospital and its employees harmless from liability for my/patient's property if it is lost, misplaced, stolen or damaged when such property is not placed in the "Valuable and Property Storage System" or otherwise under the direct control of the hospital. I/patient further acknowledge the potential harm to property maintained by the hospital due to circumstances beyond the hospital's control (e.g., fire, earthquake) and hereby release the hospital from any liability in such circumstances.

Washington State Department of Transportation

WSDOT Ferries Division
Medical Preferential Load Program
Attending Physician/Hospital/Clinic Form
DO NOT GIVE THIS FORM TO THE PATIENT

Required Information

Ferry Route	Sailing Time		Beginning Date of Travel
Seattle -> Bainbridge	0945	☒ AM ☐ PM	2/4/18
			Ending Date of Travel 2/4/18

Check the box below which best applies to your patient's need for ferry service.

One Day Travel	Multi Day Travel
☒ One Way (Good only on Date Above)	☐ Days # _____
☐ Round Trip (Good only on Date Above)	**Rules:** Up to 90 days maximum. A new form is required every 90 days.

WSDOT Ferries Division takes its responsibilities seriously regarding the Medical Preferential Load Program. In accordance with state law (Washington Administrative Code [WAC] 468-300-700 (d) *"Where a vehicle occupant states that an extended wait would cause **detrimental health risks** to a vehicle occupant, that vehicle will be allowed preferential loading whenever the afflicted occupant has provided a medical form (DOT Form 675-062) **certified by a physician** that such preferential loading is required. However, when that vehicle occupant has not submitted the proper medical form, preferential loading will be permissible based upon appropriate terminal staff determination."*

Medical Appointments, such as but not limited to, general scheduled appointments, routine exams, immunizations, dentist appointments, etc., DO NOT QUALIFY. Medical Preferential Loading provides exemption from the standard "first come first served" policy. For example, even when sailings are on overload and there are long wait times at the terminal, the person with Medical Preferential status will sail on the very next sailing. **This assures space on the vessel but does not entitle the user to first on/ first off positioning.** We ask that all health care professionals please consider the intent of the program before granting these requests. If there are any questions or concerns regarding these requests, please call our **Information Agents at 1-888-808-7977**.

Washington State Ferry Terminal Fax Numbers: Check the appropriate box for each departure terminal and fax a copy of this request to each terminal. These fax numbers are confidential information provided for the sole use of physicians/hospitals/clinics. **DO NOT GIVE THIS FORM TO THE PATIENT.**

ADDENDUM TO ORDERS FOR HOME HEALTH CARE

Date of Face–to–Face Encounter: 2/3/18

This Face–to–Face Encounter was in whole, or in part, for the following medical condition(s) which is the primary reason for home health care:

Medical Condition(s): lower extremity allerlitis, chronic lower extremity wounds

I certify that, based on my findings, the following services are medically necessary for home health services:

- ☒ Nursing
- ☒ Physical Therapy
- ☐ Speech Therapy
- ☐ OT
- ☒ wound care
- ☐ _____

My clinical findings that support the need for the above services are:

Pt needs every other day dressing Kis, INR check and PT to help & mobility.

I certify that this patient is homebound (i.e., absences from home require considerable and taxing effort and are for medical reasons or religious services and are infrequent or of short duration) because:

poor balance & mobility, pain from peripheral vascular disease & allerlitis.

The Center for Medicare and Medicaid Services (CMS) requires the hospitalist/attending signing the Face–to–Face Encounter documentation to identify the community physician in the discharge plan for home health care. **(The provider who will be assuming ongoing management of the Home Health Plan of Care.)**

CARE AGREEMENT

This form contains facts you should know about your health care at UW Medicine and from Children's University Medical Group, University of Washington Dentists and Oral Surgeons, and Seattle Cancer Care Alliance. If there is any part of this form that is unclear you can ask questions about it. At the bottom of the form there is a place for you to sign your name so that we know you have read this form (or had it read to you) and agree to receive health care from us.

UW Medicine includes:

- Harborview Medical Center and Clinics
- Northwest Hospital & Medical Center and Clinics
- University of Washington Medical Center and Clinics
- Airlift Northwest
- UW Medicine Neighborhood Clinics
- UW Physicians Sports Medicine Clinic
- Hall Health Primary Care Center
- Summit Cardiology
- UW Physicians

Your health care team consists of medical doctors, doctors in training (residents and fellows), nurses, other health care professionals, and students of the health sciences. They will work together to diagnose and treat you. You will have an attending physician. This is the doctor who has primary responsibility for your care.

Photographs, videotapes, or other images of you may be used to keep a record of your care and treatment (including surgery). These images may become part of your medical record. Part of your care may take place through telemedicine technology, which may mean 1) live video between your care team members (*in which you also may be involved*), or 2) "remote" review by your care team of the images described above.

SIGNATURE

By signing below, it shows that you have read this document and agree to receive health care from UW Medicine. If there is any part of this form that is unclear, be sure to ask questions about it.

CARE AGREEMENT

© UH0051 (08/2017) File Under: Care Agreement

Financial Agreement & Consent for Disclosure

By signing below, I agree:

1. That Harborview Medical Center and Clinics (HMC), Northwest Hospital & Medical Center and Clinics (NWH), University of Washington Medical Center and Clinics (UWMC), Valley Medical Center and Clinics (VMC), UW Medicine Neighborhood Clinics (UWNC), UW Medicine Sports Medicine Clinic (UW Sports Med), Hall Health Primary Care Center (HHPCC), and University of Washington Physicians (UWP) (collectively known as "UW Medicine"), University of Washington School of Dentistry (SOD), Children's University Medical Group (CUMG) and Seattle Cancer Care Alliance (SCCA) may share any financial information I provide to facilitate payment.
2. To pay UW Medicine, SOD, CUMG and/or SCCA for balances remaining after insurance benefits are paid, unless prohibited by law or contract.
3. To notify UW Medicine, SOD, CUMG and/or SCCA of changes to my insurance coverage and/or address.
4. That UW Medicine, SOD, CUMG and/or SCCA may impose reasonable interest, late charges, costs and/or reasonable attorney's fees should my account become delinquent.
5. To notify UW Medicine, SOD, CUMG, and/or SCCA if I am not able to pay my balance due within 30 days of receipt.
6. To apply to other financial programs that I may qualify for as requested by UW Medicine, SOD, CUMG and/or SCCA, should I be unable to pay my account.
7. That any lawsuit for collection of my account may be brought in King County, Washington.
8. To receiving information related to treatment, payment or health care operations, including receiving autodialed and prerecorded message calls and/or text messages, at any number I have provided or, if not current, to any number I am reasonably found to be associated with.
9. That UW Medicine may, at its discretion, disclose to appropriate parties my medical records or information from my records for treatment, payment and health care operation purposes.

By signing this page, I acknowledge that I have read and agreed to the terms on both sides of this form.

FINANCIAL AGREEMENT & CONSENT FOR DISCLOSURE
© UH1865 (03/2016) File Under: Consent

Financial Agreement & Consent for Disclosure

I understand that:

- Each UW Medicine entity, SOD, CUMG, and/or SCCA bill separately for their services.
- Patients who receive outpatient services at UWMC or HMC sites generally receive two bills: one bill from the physician or other provider (for the costs of the professional services) and one bill from the hospital (for the facility costs, i.e. building, equipment, supplies, staff time). Each of these bills may incur a co–payment or co–insurance responsibility, depending on my insurance coverage. The exact amount of the co–insurance or co–payment will depend upon the actual services provided and the coverage provisions of any insurance I have. Sometimes patients will pay more for certain outpatient services and procedures at hospital–based outpatient locations. The amount will depend on my insurance. I may review my insurance benefits or contact my insurer to learn what my policy will pay and what out–of–pocket expenses I may need to pay. At my request, clinic staff will provide me with an estimate of the billed charges for outpatient services I am likely to receive.
- UW Medicine requests and, if I provide it, will use my Social Security Number to facilitate access to any potential federal or state health care benefits, to verify my identity, or to facilitate discharge planning. Providing my Social Security Number is voluntary except when applying for state and federal health care benefits.
- My Consumer Credit Report information may be accessed for the following reasons: to make determination of available financial assistance, assistance in managing the payment process, or if I report that my identity has been stolen.

Statement to Permit Payment of Medicare or Insurance Benefits to Provider

I request payment of authorized Medicare or insurance benefits for any services furnished to me by UW Medicine, SOD, CUMG, and/or SCCA. I authorize any holder of medical and other information about me to release to Medicare [and its agents] or other insurance providers any information needed to determine these benefits for related services.

Notice of Privacy Practices Acknowledgment

The Joint Notice of Privacy Practices brochure describes how medical information about you may be used and disclosed, how you can get access to this information and who to contact if you have questions, concerns or complaints.

We have a responsibility to protect the privacy of your information, provide a Notice of Privacy Practices and follow the information practices that are described in this notice. If you have any questions, please contact: UW Medicine Compliance **855–211–6193** *(toll free).*

Please do not write comments on this form, refer to the "Your Individual Rights About Patient Health Information."

We may change our policies at any time. Any significant policy change will be posted.

You may request a copy of this notice from UW Medicine Compliance 855–211–6193 or at www.uwmedicine.org/nopp.

By signing below, I agree that I have received the Joint Notice of Privacy Practices.

SIGNATURE *(PATIENT OR PERSON AUTHORIZED TO GIVE AUTHORIZATION)*	DATE

Primary RN: Middleton,RN, Kent

DIAGNOSIS (15:17 MSPR)

FINAL: PRIMARY: Cellulitis of left lower limb.

DOCTOR NOTES (Fri Feb 02, 2018 14:05 MSPR)

TEXT: 93yo F sent from the wound care center for a cellulitis from superinfected ulcers not responding to outpatient abx.
Labs ordered and reviewed: no leukocytosis, CRP not elevated, INR at upper end of goal at 3.0.
Do not suspect DVT given pt has been on Coumadin throughout and exam seems more localized like a cellulitis than a DVT.
Case d/w Dr. MacNabb of hospital medicine. After consultation w/ ID will begin treatment w/ Cefepime and admit for further care. Pt given a dose of IV cefepime in the ED.

DATA REVIEWED: Lab data reviewed, Old records reviewed, Discussed with consultants.

DISPOSITION

PATIENT: Disposition Type: Inpatient, Disposition: Admit to Med/Surg, Condition: 1−STABLE. (15:17 MSPR)
Patient left the department. (17:26 KHMI)

PRESCRIPTION

No recorded prescriptions

HPI CELLULITIS (Fri Feb 02, 2018 13:59 MSPR)

CHIEF COMPLAINT: Patient presents for the evaluation of erythema, cellulitis, of the left, lower leg, Ulcerated. *HISTORIAN:* History obtained from patient, History obtained from family. *TIME COURSE:* Onset of symptoms reported as gradual, Onset was months prior to arrival, Patient currently has symptoms. *LOCATION:* LLE. *ASSOCIATED WITH:* Pain, Warmth. *SEVERITY:* Onset severity was mild, Present severity is moderate. *MECHANISM:* Possible source is venous stasis. *EXACERBATED BY:* Patient's condition exacerbated by nothing. *RELIEVED BY:* Patient's condition relieved by nothing. *NOTES:* Pt is a 93yo F who has a h/o arterial and venous insufficiency to her BLE. She has chronic ulcer of her LLE that she has been receiving wound care for. A few weeks ago she developed some erythema concerning for superinfection. She was started on levoquin PO after a wound culture from the wound care center grew MSSA and Enterobacter. After being on the levoquin for 8 days she has no improvement and endorses worsening pain so was sent from the Wound Care Center to the ED for evaluation. Denies any fevers.

PAST MEDICAL HISTORY

MEDICAL HISTORY: 1. PVD. (Thu Feb 01, 2018 12:39 ECOR)
1. PVD
2. h/o DVT and venous insufficiency. (Fri Feb 02, 2018 14:01 MSPR)

PSYCHIATRIC HISTORY: No previous psychiatric history. (Thu Feb 01, 2018 12:39 ECOR)

SOCIAL HISTORY: Denies smoking, Denies consumption of alcohol, son (doug hoffman) has been abusive to her − not to be allowed to see her. (Thu Feb 01, 2018 12:39 ECOR)
Denies alcohol abuse, Denies tobacco abuse, Denies drug abuse, Denies smoking, Denies consumption of alcohol, Lives with son. (Fri Feb 02, 2018 14:02 MSPR)

Page 1 of 2

PATIENT PROPERTY NOTICE, WAIVER AND ASSUMPTION OF RISK

Northwest Hospital (NWH) staff respects and promotes the rights of all patients. Patients should expect that efforts are taken to promote a safe and secure environment. NWH will make reasonable efforts to safeguard the personal property of patients; however, property is generally the responsibility of patients and their families, and NWH cannot guarantee the security of personal property. To minimize potential harm to personal property including lost, misplaced, stolen or damaged items, the following practices will be observed:

NWH has two choices for storing personal property of patients during hospitalization:	1	One choice is placing items in the NWH "Valuables and Property Storage System". This choice involves NWH placing small valuables (examples: watch, jewelry, dentures, glasses) in a secure locked safe in the Admitting Department. This "Valuables and Property Storage System" utilizes a witnessed (2 person) property check–in process. It is generally for nonessential items and access to this may be limited by hours of operation.
	2	Another choice for storing property is in the patient's room. The patient is generally responsible for these items and these items are generally accessible to the patient. NWH will provide limited unsecured storage spaces for patient storage of personal property in the hospital room during hospitalization.

- Patients are strongly encouraged to leave and/or send all nonessential belongings and valuables home.
- Prohibited items are firearms and other dangerous weapons, illegal drugs, marijuana, drug paraphernalia, and alcohol.
- Biohazards or severely damaged clothing are generally discarded immediately unless required for forensic evidence. (Biohazards means: clothing or other items are contaminated in the judgment of medical staff and presents a health risk.)
- NWH will dispose of unclaimed patient belongings as allowed by law after proper notice and time period for retrieval of items. When patient belongings are not claimed after 30 days, items are disposed of as allowed by law.
- Further information about NWH's property policies and procedures will be provided as needed or requested to the patient or patient's authorized representative.

Patient's Personal Property Liability Agreement

I, the undersigned, have read or have been informed about the above policy. I/patient understand that I/patient am responsible for all property brought to Northwest Hospital. I/patient understand that the hospital recommends all nonessential items be left at home or be sent home with family or friends.

I/patient understand that the hospital provides a "Valuable and Property Storage System" for important personal property and that access to this area may be limited by hours of operation.

I/patient agree to hold the hospital and its employees harmless from liability for my/patient's property if it is lost, misplaced, stolen or damaged when such property is not placed in the "Valuable and Property Storage System" or otherwise under the direct control of the hospital. I/patient further acknowledge the potential harm to property maintained by the hospital due to circumstances beyond the hospital's control (e.g., fire, earthquake) and hereby release the hospital from any liability in such circumstances.

OMB Approval No. 0938–0692

An Important Message From Medicare About Your Rights

As A Hospital Inpatient, You Have The Right To:

- Receive Medicare covered services. This includes medically necessary hospital services and services you may need after you are discharged, if ordered by your doctor. You have a right to know about these services, who will pay for them, and where you can get them.
- Be involved in any decisions about your hospital stay, and know who will pay for it.
- Report any concerns you have about the quality of care you receive to the Quality Improvement Organization (QIO) listed here:

Name of QIO
Livanta, LLC
Telephone Number of QIO
1–877–588–1123

Your Medicare Discharge Rights

Planning For Your Discharge: During your hospital stay, the hospital staff will be working with you to prepare for your safe discharge and arrange for services you may need after you leave the hospital. When you no longer need inpatient hospital care, your doctor or the hospital staff will inform you of your planned discharge date.

If you think you are being discharged too soon:

- You can talk to the hospital staff, your doctor and your managed care plan (if you belong to one) about your concerns.
- You also have the right to an appeal, that is, a review of your case by a Quality Improvement Organization (QIO). The QIO is an outside reviewer hired by Medicare to look at your case to decide whether you are ready to leave the hospital.
  - ❑ **If you want to appeal, you must contact the QIO no later than your planned discharge date and before you leave the hospital.**
  - ❑ If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
- If you do not appeal, but decide to stay in the hospital past your planned discharge date, you may have to pay for any services you receive after that date.
- Step by step instructions for calling the QIO and filing an appeal are on page 2.

To speak with someone at the hospital about this notice, call: Care Management Department at 206–668–1304.

Please sign and date here to show you received this notice and understand your rights.

MEDICARE IMPORTANT MESSAGE

M–1195 (07/2017) File Under: Admitting Financial

Steps To Appeal Your Discharge

- **Step1**: You must contact the QIO no later than your planned discharge date and before you leave the hospital. If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).

  ❑ Here is the contact information for the QIO:

  Name of QIO (in bold)
  Livanta, LLC

  Telephone Number of QIO
  1-877-588-1123

  ❑ You can file a request for an appeal any day of the week. **Once you speak to someone or leave a message, your appeal has begun.**

  ❑ Ask the hospital if you need help contacting the QIO.

  ❑ The name of this hospital is : Northwest Hospital & Medical Center.

Hospital Name	Provider ID Number
Acute NPI: **Geropsych NPI:**	**1700861580** **1497766067**

- **Step 2**: You will receive a detailed notice from the hospital or your Medicare Advantage or other Medicare managed care plan (if you belong to one) that explains the reasons they think you are ready to be discharged.
- **Step 3**: The QIO will ask for your opinion. You or your representative need to be available to speak with the QIO, if requested. You or your representative may give the QIO a written statement, but you are not required to do so.
- **Step 4**: The QIO will review your medical records and other important information about your case.
- **Step 5**: The QIO will notify you of its decision within 1 day after it receives all necessary information.
  - ❑ If the QIO finds that you are not ready to be discharged, Medicare will continue to cover your hospital services.
  - ❑ If the QIO finds you are ready to be discharged, Medicare will continue to cover your services until noon of the day after the QIO notifies you of its decision.

If You Miss The Deadline To Appeal, You Have Other Appeal Rights:

- You can still ask the QIO or your plan (if you belong to one) for a review of your case:
  - ❑ If you have Original Medicare: Call the QIO listed above.
  - ❑ If you belong to a Medicare Advantage Plan or other Medicare managed care plan: Call your plan.
- If you stay in the hospital, the hospital may charge you for any services you receive after your planned discharge date.

For more information, call 1-800-MEDICARE (1-800-633-4227), or TTY: 1-877-486-2048. CMS does not discriminate in its programs and activities. To request this publication in an alternate format, please call: 1-800-MEDICARE or email: AltFormatRequest@cms.hhs.gov.

Additional Information:

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-0692. The time required to complete this information collection is estimated to average 15 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21244-1850.

2-eH and P Macnab, MD, Amie 2/1/2018 CUSTDM10\W0TA_STM_BackgroundJ 9/8/2020 8:50:03 PM -04:00

Patient Name: HOFFMAN, JEANNE LEONIE **MR#:** U8170135
Date of Admission: 02/01/2018 **Acct#:** 1823773755
Date of Discharge:
Dictating Physician: Macnab, MD, Amie

DATE OF SERVICE: 02/01/2018

CHIEF COMPLAINT:
The patient is a 93-year-old woman who came to the emergency department due to increased left lower extremity pain in the setting of chronic wounds.

HISTORY OF PRESENT ILLNESS:
The patient is a 93-year-old woman with history of chronic lower extremity wound on the left leg which has been ongoing for about a year. She has chronic pain in her leg for which she takes a quarter tablet of Tylenol with codeine and aspirin on a routine basis. The patient developed worsening pain and erythema and back on
January 11th had wound cultures performed at the Wound Care Clinic that grew MSSA and Enterobacter. She has been reportedly taking Levaquin for the last 8 days, but has not had any improvement in her leg symptoms. She says that a week ago the erythema was worse, but today the pain has increased. The patient denies any fevers or chills. No shortness of breath, chest pain, nausea, vomiting, diarrhea, or constipation. The patient says the pain is severe but is able to ambulate. In the emergency department, she was given cefepime and admitted for further treatment.

PAST MEDICAL HISTORY:
1. Chronic lower extremity ulcerations of her legs have been going on for the last year at least.
2. History of venous insufficiency.
3. Bilateral lower extremity DVT about 30 years ago and has since been on warfarin.
4. History of poor balance.
5. Chronic peripheral neuropathy.
6. History of right lower extremity fracture.

SOCIAL HISTORY:
She uses a walker for ambulation. Her son lives with her. She does not smoke or drink.

FAMILY HISTORY:
The patient denies known family history. Says mother died of old age.

REVIEW OF SYSTEMS:

Patient Name: HOFFMAN, JEANNE LEONIE **MR#:** U8170135
Date of Admission: 02/01/2018 **Acct#:** 1823773755
Date of Discharge:
Dictating Physician: Macnab, MD, Amie

See above HPI. Otherwise, complete review of systems is negative.

ALLERGIES:
1. TAPE causes rash.
2. PENICILLIN causes rash.
3. SULFA causes rash.
4. The patient also says she is very sensitive to NARCOTIC PAIN MEDICATIONS.

HOME MEDICATIONS:
1. Acetaminophen/codeine 300/30 mg quarter of a tablet twice a day as needed for pain.
2. Atorvastatin 10 mg daily.
3. Levofloxacin 500 mg daily started on 01/25.
4. Losartan 12.5 mg daily.
5. Pentoxifylline 400 mg 3 times a day.
6. Timolol 0.5% eye drops both eyes twice a day.
7. Warfarin 5 mg Monday, Tuesday, Wednesday, Friday and 2.5 mg Thursday and Sunday.

PHYSICAL EXAMINATION:
VITAL SIGNS: Temperature 36.8, pulse 87, respiratory rate 24, blood pressure 148/94, satting 100% on room air.
GENERAL: Patient is awake, conversant, appears to be in pain.
HEENT: Pupils equal. Oral mucous membranes moist.
NECK: Supple. No lymphadenopathy.
LUNGS: Clear to auscultation bilaterally.
CV: Regular rate and rhythm with no murmurs.
ABDOMEN: Soft, nontender.
EXTREMITIES: Her left lower leg is diffusely erythematous to below her knee. It is moderately edematous and tender to palpation. She has 3 ulcerations, 1 around her medial ankle, 1 on her lateral lower leg, and 1 on her foot. They are dry with no drainage. The patient also has tenderness to palpation over her right ankle as well with 1+ pitting edema with no significant erythema

noted on her right lower leg. She has dopplerable pulses in her bilateral dorsalis pedis.
SKIN: See extremity exam.
NEURO: Patient is awake, answering questions appropriately. Moving all 4 extremities though decreased movement in her left lower leg due to pain. The patient reports chronic neuropathy that is unchanged.

Dictating Physician: Macnab, MD, Amie

LABORATORY DATA:
White count is 6.7, hematocrit 35, platelets 201, INR 3. Chem 7 notable for a BUN of 24, creatinine l.08. LFTs within normal limits. CRP l.9.

ASSESSMENT/PLAN:
1. Cellulitis in the setting of chronic wounds of the left lower leg. The patient did not have any improvement of her symptoms while on Levaquin. She is afebrile with a normal white count though has significant pain in her left leg. Will change antibiotics to cefepime. Will order request Infectious Disease consult and wound care. We will continue her Trental.
2. History of anticoagulation due to history of deep venous thrombosis. INR is therapeutic. We will continue warfarin.
3. Code status: The patient says she defers her code status to her son who will be here tomorrow, so for now will be FULL CODE.

DATE: JAN 29 2018 **TIME:** 10 00 | Type of Service: ☐ Initial Visit ☑ Follow–up Visit ☐ Nurse–only Visit ☐ Other:

This section may be completed by the Nurse/MA/CNA or HBO Tech.

Patient Arrived: ☐ Ambulatory ☐ Cane ☐ Crutches ☑ Walker ☐ Wheelchair ☐ Stretcher ☐ Other:

Transfer Assistance: ☐ Hoyer Lift ☐ Manual ☐ Transfer Board ☐ Stretcher ☐ None ☐ Other:

Height: _____inches | Weight: _____lbs.

Source: ☐ Stated/Not Measured ☐ Measured ☐ Not measured | Source: ☐ Stated ☐ Measured

Accompanied by: Self

Patient Identification Verified: ☑ Yes Secondary Verification Process: ☑ Yes

Patient requires Transmission–Based Precautions? ☐ Yes ☑ No If yes, ☐ Airborne ☐ Droplet ☐ Contact

Vital Signs ☐ **HBO Visit** *(If this is an HBO Visit, skip this section as vital signs are captured on the HBO Treatment Record.)*

Temperature: 98.0 Pulse: 80 Respirations: 12 Blood pressure (mmHg): _____

If ordered by physician: Capillary Blood Glucose: _____ mg/dL *(Hospital's blood glucose reference range: _____ mg/dL)*

History Since Last Visit ☐ N/A *(If this is Patient's Initial Visit, check N/A and skip this section.)*

Added or deleted any medications: ☐ Yes ☑ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Any new allergies or adverse reactions: ☐ Yes ☑ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☑ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☑ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☐ Yes ☑ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed: ☑ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☑ N/A

Has compression in place as prescribed: ☐ Yes ☑ No ☐ N/A Has offloading in place as prescribed: ☐ Yes ☑ No ☐ N/A

Blood glucose under control: ☐ Yes ☐ No ☑ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear. ☐ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☑ R ☑ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☐ **Yes** ☑ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES:

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: [signature] Date: JAN 29 2018 Time: 1000

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non–wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☐ Yes ☐ No Location of pain:

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 10 **Duration of Pain:** ☐ Constant ☐ Intermittent

Character of Pain: ☐ Aching ☐ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy ☐ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☐ Medication ☐ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S ☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☐ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management

Modification to Pain Management

DATE: JAN 25 2018 **TIME:** 1032 | Type of Service: ☐ Initial Visit ☑ Follow–up Visit ☐ Nurse–only Visit ☐ Other:

This section may be completed by the Nurse/MA/CNA or HBO Tech.

Patient Arrived: ☐ Ambulatory ☐ Cane ☐ Crutches ☑ Walker ☐ Wheelchair ☐ Stretcher ☐ Other:

Transfer Assistance: ☐ Hoyer Lift ☑ Manual ☐ Transfer Board ☐ Stretcher ☐ None ☐ Other:

Height: _____ inches
Source: ☐ Stated/Not Measured ☐ Measured ☑ Not measured

Weight: 121.6 lbs.
Source: ☐ Stated ☑ Measured

Accompanied by: SOL

Patient Identification Verified: ☑ Yes Secondary Verification Process: ☑ Yes

Patient requires Transmission–Based Precautions? ☐ Yes ☐ No If yes, ☐ Airborne ☐ Droplet ☐ Contact

Vital Signs ☐ **HBO Visit** *(If this is an HBO Visit, skip this section as vital signs are captured on the HBO Treatment Record.)*

Temperature: 98.0 Pulse: 92 Respirations: 20 Blood pressure (mmHg): 140 / 60

If ordered by physician: Capillary Blood Glucose: _____ mg/dL *(Hospital's blood glucose reference range: _____ mg/dL)*

History Since Last Visit ☐ N/A *(If this is Patient's Initial Visit, check N/A and skip this section.)*

Added or deleted any medications: ☐ Yes ☑ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Any new allergies or adverse reactions: ☐ Yes ☑ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☑ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☑ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☐ Yes ☑ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed: ☑ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☐ N/A

Has compression in place as prescribed: ☐ Yes ☐ No ☑ N/A Has offloading in place as prescribed: ☐ Yes ☐ No ☐ N/A

Blood glucose under control: ☐ Yes ☐ No ☑ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear. ☑ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☐ R ☐ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☑ **Yes** ☐ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES:

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: _____ Date JAN 25 2018 Time: 1040

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non–wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☐ Yes ☐ No Location of pain: very tender - no

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 10 **Duration of Pain:** ☐ Constant ☐ Intermittent

Character of Pain: ☐ Aching ☐ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy ☐ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☑ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☐ Medication ☐ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S ☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☑ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management

Modification to Pain Management

*Referring Provider Signature (Required)

TEST(S) ORDERED – PLEASE CHECK APPROPRIATE BOX(ES)

CEREBROVASCULAR EVALUATIONS:
- ❑ Carotid/Vertebral Duplex + Transcranial Doppler (TCD) - *Complete*
- ❑ Carotid/Vertebral Duplex + TCD prn* - *Conditional*
  (*prn = >50% pre-cerebral stenosis; TIA/CVA symptoms)
- ❑ Carotid/Vertebral Duplex Only - *Abbreviated*
- ❑ Transcranial Doppler Only (TCD)
- ❑ TCD Emboli Monitoring Study
  Specify: ❑ Anterior circulation ❑ Posterior circulation
- ❑ Temporal Arteritis Duplex
- ❑ Head Turn Study
- ❑ TCD Right to Left Bubble Study (PFO) – IV access needed

ARTERIAL EVALUATIONS:
- ❑ Lower Extremity ✳
  Physiologic Testing (ABI's and/or DBI's, treadmill)
  Duplex: Aortoiliac & femoropopliteal prn
  (prn=Abnormal ABI; treadmill not performed)
  If applicable: ❑ Bypass Graft ❑ Stent Specify location: _____
- ❑ Upper Extremity
- ❑ Pseudoaneurysm Evaluation
  Specify: ❑ Right ❑ Left
- ❑ Thoracic Outlet
- ❑ Radial Artery Mapping
- ❑ Raynaud's Phenomenon
  Specify: ❑ Hands ❑ Feet

ABDOMINAL VASCULAR DUPLEX EVALUATIONS: ✳
- ❑ Abdominal Aortic Aneurysm
  Specify Indication:
  ❑ Follow-up/Known ❑ Endograft ❑ Symptomatic ❑ Other
  ❑ Medicare Screening (Age 65-75 + family hx AAA &/or male smoker)
- ❑ Renal Artery ❑ Celiac/Mesenteric Arteries
- ❑ Hepato-Portal ❑ Renal/Liver Transplant
- ❑ Aorta/Iliac Arteries ❑ Inferior Vena Cava/Iliac Veins

VENOUS EVALUATIONS:
Assessment for Venous Thrombosis (DVT)
- ❑ Lower Extremity + Iliocaval, Bilateral - *Complete*
- ❑ Lower Extremity - *Conditional* ❑ Bilateral ❑ Right ❑ Left
  (Conditional = bilateral & iliocaval duplex only if DVT or acute SVT in symptomatic leg, abnormal waveforms in CFV, DVT risk factors, or clinical concern for PE)
- ❑ Lower Extremity Only - *Abbreviated* ❑ Bilateral ❑ Right ❑ Left
- ❑ Upper Extremity Duplex ❑ Bilateral ❑ Right ❑ Left

Specialized Venous Evaluations
- ❑ Lower Extremity Reflux - To test for venous insufficiency
  Specify: ❑ Right ❑ Left
- ❑ Pelvic Congestion Syndrome ✳ **(NEW EXAM)**
  (Duplex of the Iliocaval, Ovarian and Uterine Veins)
- ❑ Post-Ablation Lower Extremity Duplex Specify: ❑ Right ❑ Left
- ❑ Vein Mapping Duplex Specify: ❑ Right ❑ Left ❑ Upper ❑ Lower

DIALYSIS VASCULAR ACCESS SITE EVALUATIONS:
- ❑ Dialysis Access Site Evaluation
- ❑ Pre-op Dialysis Access Site
  Specify: ❑ Right ❑ Left

Other Request/Info:

✳ *No Food or Drink 8 hours prior to Test (Fasting) for Lower Extremity Arterial & All Abdominal Vascular Exams (exception for diabetics)*

TEST:	PRO-THROMBIN, NWH	PRO-THROMBIN INR
UNITS:	s	
LO-HI:	8.9-12.1	0.8-1.3
01/11/18 1118	17.1* {NW}	1.7* {NW}

********** WOUND CULTURES **********

01/11/18 1040 Tissue C/S w/Gram
ACC. NO.: H10011 TRANSPORT TIME: 9.6 Final 01/14/2018
Specimen Description: Tissue Left lateral Calf
Special Requests: Includes Anaerobic screen

Gram Smear: 1. No polymorphonuclear cells or organisms seen

Culture: 1. 3+ Enterobacter cloacae : This bacterial species is known to produce a chromosomal AmpC inducible beta-lactamase. Penicillin or third-generation cephalosporin monotherapy for serious infections may result in the emergence of high-level resistance. : Multi-Drug Resistant Organism - For inpatients, isolate using contact precautions per institutional policy. Contact Infection Control if you have any questions.
2. 2+ Staphylococcus aureus, coagulase positive

ANTIBIOTIC	Org #1 MSMIC ECLO	Org #2 MSMIC SAUR
Tetracycline	SN	SN
Ceftriaxone	SN	
Vancomycin		SN

SN = Susceptible INT = Intermediate R = Resistant
SYNS = Synergy with a Beta Lactam or Glycopeptide Antibiotic is likely provided the organism is susceptible to that agent.
SYNR = Synergy with a Beta Lactam or Glycopeptide Antibiotic is not likely.

{NW} Testing performed by Northwest Hospital Lab 1550 N 115th St Suite A200, Seattle WA 98133

*Referring Provider Signature (Required)

TEST(S) ORDERED – PLEASE CHECK APPROPRIATE BOX(ES)

CEREBROVASCULAR EVALUATIONS:

- ❑ Carotid/Vertebral Duplex + Transcranial Doppler (TCD) - *Complete*
- ❑ Carotid/Vertebral Duplex + TCD prn* - *Conditional*
  (*prn = >50% pre-cerebral stenosis; TIA/CVA symptoms)
- ❑ Carotid/Vertebral Duplex Only - *Abbreviated*
- ❑ Transcranial Doppler Only (TCD)
- ❑ TCD Emboli Monitoring Study
  Specify: ❑ Anterior circulation ❑ Posterior circulation
- ❑ Temporal Arteritis Duplex
- ❑ Head Turn Study
- ❑ TCD Right to Left Bubble Study (PFO) – IV access needed

ARTERIAL EVALUATIONS:

- ☒ Lower Extremity ✳
  Physiologic Testing (ABI's and/or DBI's, treadmill)
  Duplex: Aortoiliac & femoropopliteal prn
  (prn=Abnormal ABI; treadmill not performed)
  If applicable: ❑ Bypass Graft ❑ Stent Specify location: _____
- ❑ Upper Extremity
- ❑ Pseudoaneurysm Evaluation
  Specify: ❑ Right ❑ Left
- ❑ Thoracic Outlet
- ❑ Radial Artery Mapping
- ❑ Raynaud's Phenomenon
  Specify: ❑ Hands ❑ Feet

ABDOMINAL VASCULAR DUPLEX EVALUATIONS: ✳

- ❑ Abdominal Aortic Aneurysm
  Specify Indication:
  ❑ Follow-up/Known ❑ Endograft ❑ Symptomatic ❑ Other
  ❑ Medicare Screening (Age 65-75 + family hx AAA &/or male smoker)
- ❑ Renal Artery ❑ Celiac/Mesenteric Arteries
- ❑ Hepato-Portal ❑ Renal/Liver Transplant
- ❑ Aorta/Iliac Arteries ❑ Inferior Vena Cava/Iliac Veins

VENOUS EVALUATIONS:

Assessment for Venous Thrombosis (DVT)

- ❑ Lower Extremity + Iliocaval, Bilateral - *Complete*
- ❑ Lower Extremity - *Conditional* ❑ Bilateral ❑ Right ❑ Left
  (Conditional = bilateral & iliocaval duplex only if DVT or acute SVT in symptomatic leg, abnormal waveforms in CFV, DVT risk factors, or clinical concern for PE)
- ❑ Lower Extremity Only - *Abbreviated* ❑ Bilateral ❑ Right ❑ Left
- ❑ Upper Extremity Duplex ❑ Bilateral ❑ Right ❑ Left

Specialized Venous Evaluations

- ❑ Lower Extremity Reflux - To test for venous insufficiency
  Specify: ❑ Right ❑ Left
- ❑ Pelvic Congestion Syndrome ✳ **(NEW EXAM)**
  (Duplex of the Iliocaval, Ovarian and Uterine Veins)
- ❑ Post-Ablation Lower Extremity Duplex Specify: ❑ Right ❑ Left
- ❑ Vein Mapping Duplex Specify: ❑ Right ❑ Left ❑ Upper ❑ Lower

DIALYSIS VASCULAR ACCESS SITE EVALUATIONS:

- ❑ Dialysis Access Site Evaluation
- ❑ Pre-op Dialysis Access Site
  Specify: ❑ Right ❑ Left

Other Request/Info: _____

✳ No Food or Drink 8 hours prior to Test (Fasting) for Lower Extremity Arterial & All Abdominal Vascular Exams (exception for diabetics)

Revised 10/23/2015

DATE: 1/11/18 **TIME:** 1015 | Type of Service: ☐ Initial Visit ☒ Follow–up Visit ☐ Nurse–only Visit ☐ Other:

This section may be completed by the Nurse/MA/CNA or HBO Tech.

Patient Arrived: ☒ Ambulatory ☐ Cane ☐ Crutches ☑ Walker ☐ Wheelchair ☐ Stretcher ☐ Other:

Transfer Assistance: ☐ Hoyer Lift ☐ Manual ☐ Transfer Board ☐ Stretcher ☑ None ☐ Other:

Height: _____ inches
Source: ☐ Stated/Not Measured ☐ Measured ☒ Not measured

Weight: _____ lbs.
Source: ☐ Stated ☐ Measured

Accompanied by: son

Patient Identification Verified: ☑ Yes Secondary Verification Process: ☒ Yes DOB

Patient requires Transmission–Based Precautions? ☐ Yes ☒ No If yes, ☐ Airborne ☐ Droplet ☐ Contact

Vital Signs ☐ **HBO Visit** *(If this is an HBO Visit, skip this section as vital signs are captured on the HBO Treatment Record.)*

Temperature: 97.8 Pulse: 84 Respirations: 20 Blood pressure (mmHg): 138/80
If ordered by physician: Capillary Blood Glucose: _____ mg/dL *(Hospital's blood glucose reference range: _____ mg/dL)*

History Since Last Visit ☐ N/A *(If this is Patient's Initial Visit, check N/A and skip this section.)*

Added or deleted any medications: ☐ Yes ☑ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Any new allergies or adverse reactions: ☐ Yes ☑ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☑ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☑ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☐ Yes ☑ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed: ☑ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☒ N/A

Has compression in place as prescribed: ☐ Yes ☐ No ☒ N/A Has offloading in place as prescribed: ☐ Yes ☐ No ☒ N/A

Blood glucose under control: ☐ Yes ☐ No ☒ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear. ☒ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☐ R ☐ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☐ **Yes** ☒ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES:

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: Margaret RN Date: 1/11/18 Time: 1015

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non–wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☐ Yes ☑ No Location of pain:

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 10 **Duration of Pain:** ☐ Constant ☐ Intermittent

Character of Pain: ☐ Aching ☐ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy ☐ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☐ Medication ☐ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S ☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☐ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management

Modification to Pain Management

AFFIX PRODUCT LABELS

PROCEDURE NOTE/FINDINGS*

Patients does not feel well - c/o pain of R hip → down to R leg/calf - c/o increase pain of R calf post 2 (& blistering at home (on Post) - ? trauma (?)
Referred

RE: R leg - R subcut hemorrhage/bruising of R calf.

POST PROCEDURE/OPERATIVE DIAGNOSIS*:

☐ **Same as Pre-Procedure/Operative Diagnosis**

(R) ingrowth exam → pt has hx of chronic thrombosis of R (hip)

ASSESSMENT

R leg: all pulses present → ? superficial thrombophlebitis
R calf pain, multiple
R multifocal tender superficial cords c
R posterior calf
R instep ant R calf tender + firm but no cords

PLAN OF CARE

☐ **Refer to *Physician Orders* dated:** ☐ **See dictated note date:**

Rx: Rec'd pt to ER for R leg swelling & pain. R leg is only one pulses could not
calf pain present.

Rx: Debrided all R leg wounds (SQ level) → sent R tissue for C&S
Advised to continue dopplers since last test 2 years ago
Dressings → compression stockings

DISCHARGE

☐ **Refer to *Patient or Caregiver Education and Encounter Discharge* form for Patient Education dated:**

pt to ER

END OF REPORT

Performing Lab info see: http://depts.washington.edu/labweb/AboutLM/Accred/

DATE: DEC 21 2017 **TIME:** 1024 Type of Service: ☐ Initial Visit ☒ Follow–up Visit ☐ Nurse–only Visit ☐ Other:

This section may be completed by the Nurse/MA/CNA or HBO Tech.

Patient Arrived: ☒ Ambulatory ☐ Cane ☐ Crutches ☒ Walker ☐ Wheelchair ☐ Stretcher ☐ Other:

Transfer Assistance: ☐ Hoyer Lift ☐ Manual ☐ Transfer Board ☐ Stretcher ☒ None ☐ Other:

Height: _____ inches
Source: ☐ Stated/Not Measured ☐ Measured ☒ Not measured

Weight: 118 lbs.
Source: ☐ Stated ☐ Measured

Accompanied by: Son

Patient Identification Verified: ☒ Yes Secondary Verification Process: ☒ Yes DO

Patient requires Transmission–Based Precautions? ☐ Yes ☒ No If yes, ☐ Airborne ☐ Droplet ☐ Contact

Vital Signs ☐ **HBO Visit** *(If this is an HBO Visit, skip this section as vital signs are captured on the HBO Treatment Record.)*

Temperature: 97.3 Pulse: 52 Respirations: 16 Blood pressure (mmHg): 115/20
If ordered by physician: Capillary Blood Glucose: _____ mg/dL *(Hospital's blood glucose reference range: _____ mg/dL)*

History Since Last Visit ☐ N/A *(If this is Patient's Initial Visit, check N/A and skip this section.)*

Added or deleted any medications: ☐ Yes ☒ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Any new allergies or adverse reactions: ☐ Yes ☒ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☒ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☒ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☐ Yes ☒ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed: ☒ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☒ N/A

Has compression in place as prescribed: ☐ Yes ☐ No ☒ N/A Has offloading in place as prescribed: ☐ Yes ☐ No ☒ N/A

Blood glucose under control: ☐ Yes ☐ No ☒ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear. ☐ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☐ R ☐ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☐ **Yes** ☒ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES:

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: [signature] Date: DEC 21 2017 Time: 1030

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non–wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☐ Yes ☒ No Location of pain:

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 10 **Duration of Pain:** ☐ Constant ☐ Intermittent

Character of Pain: ☐ Aching ☐ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy ☐ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☐ Medication ☐ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S ☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☐ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management

Modification to Pain Management

NURSE'S NOTES:

All wounds look healthier. DR Lee discussed c pt if she wants to do a skin graft. pt agreeable we need to discuss c PCP her coumadin and see if she can hold it. I left a msg for DR neighbor.

AFFIX PRODUCT LABELS

PROCEDURE NOTE/FINDINGS*

No complaints. Per son, RN is using Q-tip to brush to clean wound area.
@ face
R/F All three wounds L @ calf/ankle are covered with thick fibrin mat tissue

POST PROCEDURE/OPERATIVE DIAGNOSIS*:

☐ **Same as Pre–Procedure/Operative Diagnosis** are all lower heads, P debridement @ pad granulation tissue, @ foot ulcer

ASSESSMENT

@ peripheral venous insufficiency

Wound care → excisional debrided including subcutaneous tissue all three wounds

PLAN OF CARE

☐ **Refer to *Physician Orders* dated:** ☐ **See dictated note date:**

Dressing
Start to use Dermagran B. dress daily with
prn T-11 weekly

DISCHARGE

☐ **Refer to *Patient or Caregiver Education and Encounter Discharge* form for Patient Education dated:**

Provider Orders / Patient Instructions

√ | **ORDERS** *NOTE: Only those items checked (√) will be carried*

Apply to Wound(s) ____ minutes before procedure: ☐ Lidocaine 2% Topical Gel ☐ Lidocaine 2% Topical Liquid ☐ Lidocaine 4% Topical Solution
☐ **Admit to Wound Care Center®** ☐ Lidocaine 5% Topical Ointment ☐ Lidocaine Injectable ____% ☐ Other: _____
Diagnosis: _____

▲ Laboratory
☐ Albumin
☐ Basic Metabolic Profile
☐ Blood Cultures
☐ BUN
☐ Capillary Blood Glucose
☐ CBC with Differential
☐ Complete Metabolic Profile
☐ Creatinine Protein
☐ Hemoglobin A1c
☐ Hypercoagulable Panel
☐ Pre-Albumin
☐ PT/PTT
☐ Sedimentation Rate
☐ Transferrin
☐ Total Lymphocyte Count
☐ Urinalysis
☐ Other: _____

☐ Tissue or Bone Culture & Sensitivity
☐ Anaerobic ☐ Aerobic
☐ Fungal ☐ Swab
Site: _____
Diagnosis: _____

☐ Tissue or Bone Biopsy for Pathology
☐ Histopathology
Site: _____
Diagnosis: _____

▲ Cardiopulmonary
☐ EKG ☐ Echocardiogram
☐ Pulmonary Function Test
☐ Other: _____
Diagnosis: _____

▲ Vascular Studies
☐ Transcutaneous $PtcO_2$
☐ Right ☐ Left Lower Extremity
☐ With ☐ Without O_2 challenge
☐ With ☐ Without Leg Elevation
☐ Ankle Brachial Index
☐ Toe Brachial Index
☐ Arterial Segmental Pressures/Pulse Volume
☐ Right Leg ☐ Left Leg ☐ Both
☐ Venous Duplex Ultrasound
☐ Right Leg ☐ Left Leg ☐ Both
☐ Other: _____
Diagnosis: _____

▲ Radiology
☐ Chest X-Ray PA & Lateral
☐ X-Ray of: _____
☐ Triple Phase Bone Scan
☐ Computed Tomography of:
_____
☐ Magnetic Resonance Imaging of:
_____
☐ *Contrast* ☐ *No Contrast*
☐ Wound Ultrasound
☐ Other: _____
Diagnosis: _____

☐ **Other:** order supplies

Consultation: ☐ Nutrition ☐ Vascular ☐ Orthotist/Pedorthotist ☐ Infectious Disease ☐ Plastic Surgery ☐ Other: _____

Cleanse Wound(s) with: ☐ Normal Saline ☐ Other _____

WOUND # (s)	LOCATION	DRESSING TYPE	FREQUENCY
		☐ Alginate ☐ Absorbative Silver ☐ Collagen ☐ Collagenase ☐ Cellulose Collagen ☐ Film ☐ Foam ☐ Hydrating Silver ☐ Hydrocolloid ☐ Hydrogel ☐ Iodine Dressing ☐ Iodosorb/flex ☐ Multidex ☐ Silver Cellulose Collagen ☐ Tubigrip ☐ Other: Antibiotic(s):	☐ Daily ☐ 2 Times Per Week ☐ Every Other Day ☐ 3 Times Per Week ☐ Do Not Change Dressing ☐ Other:
1	(L) lat calf	Medihoney, Vaseline gauze, Xeroform	☐ Daily ☐ 2 Times Per Week ☐ Every Other Day ☐ 3 Times Per Week ☐ Do Not Change Dressing ☐ Other:
2	(L) lat ankle		
3	(L) med ankle		☐ Daily ☐ 2 Times Per Week ☒ Every Other Day ☐ 3 Times Per Week ☐ Do Not Change Dressing ☐ Other:

☐ **Apply Negative Pressure Wound Therapy (NPWT) to:** _____ using ☐ White Foam ☐ Black Foam ☐ Silver Foam ☐ Other: _____
with setting of _____ mmHg ☐ Continuous ☐ Intermittent _____ minutes on _____ minutes off. Change dressing ☐ 2 Times Per Week ☐ 3 Times Per Week

☐ **Apply Multilayer Wrap:** ☐ Right ☐ Left ☐ Standard ☐ Reduced **Type:** _____ ☐ Apply Unna's Boot ☐ Other: _____
☐ Compression Stockings: ☐ Right ☐ Left ☐ 20-30 mmHg ☐ 30-40 mmHg _____ mmHg ☐ Apply in morning and remove at bedtime.
Leg Elevation: ☐ Elevate legs to the level of the heart or above for 30 minutes _____ times per day.

AFFIX PRODUCT LABELS

PROCEDURE NOTE/FINDINGS*

Patient recently returned to Seattle p a long travel trip.
Denies f/sore. ⊖ fever

Rt ABI wounds are covered with foot

POST PROCEDURE/OPERATIVE DIAGNOSIS*:

❑ Same as Pre-Procedure/Operative Diagnosis

Jmin x hours dark black color

ASSESSMENT

Use curette → excisional debrided fxcy
to bone x subcutaneous tissues!
The Lat ⓓ Lat - calf → very rubbery

PLAN OF CARE

❑ Refer to *Physician Orders* dated:

❑ See dictated note date:

⊖ cellulitis ⊖ pain edema

Rt: wounds are cleaned → debrided/dressed
continue to drain ↓ medihoney → moist
gauze → x 1/week

Rt 1/week

DISCHARGE

❑ Refer to *Patient or Caregiver Education and Encounter Discharge* form for Patient Education dated:

Physician or Physician Extender Signature: _____ Date: 12/7/17 Time: 11:00

Physician or Physician Extender Printed Name*: _____ Date: 12/7/17 Time: 11:00

Assignment of Benefits (AOB)

I request that payment of my insurance benefits be made to Sound Health Medical Supply for any supplies or services furnished to be by Sound Health Medical Supply. I am responsible for any balance due that is not covered by my insurance. I understand any product received in my home, opened or unopened, cannot be returned. I authorize any holder of medical information about me to release to Sound Health Medical Supply any information needed to determine benefits payable for these supplies or services. Further, I authorize Sound Health Medical Supply to forward my medical records to the medical professionals in my care and/or make copies of said records. I acknowledge that I have received the policies and procedures and HIPPA information from Sound Health.

Provider Orders / Patient Instructions

√ **ORDERS** *NOTE: Only those items checked (√) will be carried out.* **Date:** 10

Apply to Wound(s) ____ minutes before procedure: ☒ Lidocaine 2% Topical Gel ☐ Lidocaine 2% Topical Liquid ☐ Lidocaine 4% Topical Solution

☐ **Admit to Wound Care Center®** ☐ Lidocaine 5% Topical Ointment ☐ Lidocaine Injectable ____% ☐ Other: _____

Diagnosis: _____

▲ Laboratory
- ☐ Albumin
- ☐ Basic Metabolic Profile
- ☐ Blood Cultures
- ☐ BUN
- ☐ Capillary Blood Glucose
- ☐ CBC with Differential
- ☐ Complete Metabolic Profile
- ☐ Creatinine Protein
- ☐ Hemoglobin A1c
- ☐ Hypercoagulable Panel
- ☐ Pre-Albumin
- ☐ PT/PTT
- ☐ Sedimentation Rate
- ☐ Transferrin
- ☐ Total Lymphocyte Count
- ☐ Urinalysis
- ☐ Other: _____

☐ Tissue or Bone Culture & Sensitivity ☐ Anaerobic ☐ Aerobic ☐ Fungal ☐ Swab
Site: _____
Diagnosis: _____

☐ Tissue or Bone Biopsy for Pathology ☐ Histopathology
Site: _____
Diagnosis: _____

▲ Cardiopulmonary
- ☐ EKG ☐ Echocardiogram
- ☐ Pulmonary Function Test
- ☐ Other: _____

Diagnosis: _____

▲ Vascular Studies
- ☐ Transcutaneous $PtcO_2$
  - ☐ Right ☐ Left Lower Extremity
  - ☐ With ☐ Without O_2 challenge
  - ☐ With ☐ Without Leg Elevation
- ☐ Ankle Brachial Index
- ☐ Toe Brachial Index
- ☐ Arterial Segmental Pressures/Pulse Volume ☐ Right Leg ☐ Left Leg ☐ Both
- ☐ Venous Duplex Ultrasound ☐ Right Leg ☐ Left Leg ☐ Both
- ☐ Other: _____

Diagnosis: _____

▲ Radiology
- ☐ Chest X-Ray PA & Lateral
- ☐ X-Ray of: _____
- ☐ Triple Phase Bone Scan
- ☐ Computed Tomography of: _____
- ☐ Magnetic Resonance Imaging of: _____ ☐ *Contrast* ☐ *No Contrast*
- ☐ Wound Ultrasound
- ☐ Other: _____

Diagnosis: _____

☐ **Other:** _____

Consultation: ☐ Nutrition ☐ Vascular ☐ Orthotist/Pedorthotist ☐ Infectious Disease ☐ Plastic Surgery ☐ Other: _____

Cleanse Wound(s) with: ☐ Normal Saline ☐ Other _____

WOUND # (s)	LOCATION	DRESSING TYPE	FREQUENCY
		☐ Alginate ☐ Absorbable Silver ☐ Collagen ☐ Collagenase ☐ Cellulose Collagen ☐ Film ☐ Foam ☐ Hydrating Silver ☐ Hydrocolloid ☐ Hydrogel ☐ Iodine Dressing ☐ Iodosorb/flex ☐ Multidex ☐ Silver Cellulose Collagen ☐ Tubigrip ☐ Other: Antibiotic(s):	☐ Daily ☐ 2 Times Per Week ☐ Every Other Day ☐ 3 Times Per Week ☐ Do Not Change Dressing ☐ Other:
1	Dlat calf	Medihoney Vaseline gauze 4x4 pkg, Kling	☐ Daily ☐ 2 Times Per Week ☒ Every Other Day ☐ 3 Times Per Week ☐ Do Not Change Dressing ☐ Other:
2	Dlat ankle		☐ Daily ☐ 2 Times Per Week ☒ Every Other Day ☐ 3 Times Per Week ☐ Do Not Change Dressing ☐ Other:
3	Dmed ankle		☐ Daily ☐ 2 Times Per Week ☒ Every Other Day ☐ 3 Times Per Week ☐ Do Not Change Dressing ☐ Other:

☐ **Apply Negative Pressure Wound Therapy (NPWT)** to: _____ using ☐ White Foam ☐ Black Foam ☐ Silver Foam ☐ Other: _____
with setting of _____ mmHg ☐ Continuous ☐ Intermittent _____ minutes on _____ minutes off. Change dressing ☐ 2 Times Per Week ☐ 3 Times Per Week

☐ **Apply Multilayer Wrap:** ☐ Right ☐ Left ☐ Standard ☐ Reduced **Type:** _____ ☐ Apply Unna's Boot ☐ Other: _____
☐ Compression Stockings: ☐ Right ☐ Left ☐ 20-30 mmHg ☐ 30-40 mmHg _____ mmHg ☐ Apply in morning and remove at bedtime.

Leg Elevation: ☒ Elevate legs to the level of the heart or above for 30 minutes ☒ times per day.
☐ Compression Pump Type: _____ ☐ Right ☐ Left ☐ Both legs _____ mmHg _____ Minutes _____ Times a Day

Off-Loading / Immobilization: ☐ **Total Contact Cast** ☐ Right ☐ Left Lower Extremity ☐ **Air Cast** ☐ Right ☐ Left Lower Extremity
☐ **Multipodus Splint** ☐ Right ☐ Left Lower Extremity ☐ **Darco Shoe** ☐ Right ☐ Left

Assistive Devices: ☐ **Total Non-Weight Bearing to:** _____ ☐ Wheelchair ☐ Walker ☐ Cane ☐ Crutches ☐ Wedge Shoe

Pressure Reduction: ☐ Wheelchair Cushion ☐ Mattress Overlay ☐ Specialty Bed ☐ Other:

General: ☐ Stop / decrease smoking ☐ Multi-vitamin ☐ Exercise ☐ Follow Nutritious Diet ☐ Other:

You are scheduled for: (Test) _____ At (Location) _____ on (Date) _____ at (Time) _____

Follow Up in ____ Week(s) with Dr. Luu On (Day) 12/7/17 (Date) 10:15 at (Time) _____

Nurse Visit in: ____ days for ☐ Dressing Change ☐ NPWT Change ☐ Compression Wrap Change ☐ Total Contact Cast Change

DATE: OCT 05 2017 **TIME:** 1050 | Type of Service: ☐ Initial Visit ☒ Follow-up Visit ☐ Nurse-only Visit ☐ Other:

This section may be completed by the Nurse/MA/CNA or HBO Tech.

Patient Arrived: ☒ Ambulatory ☐ Cane ☐ Crutches ☒ Walker ☐ Wheelchair ☐ Stretcher ☐ Other:

Transfer Assistance: ☐ Hoyer Lift ☐ Manual ☐ Transfer Board ☐ Stretcher ☒ None ☐ Other:

Height: _____ inches
Source: ☐ Stated/Not Measured ☐ Measured ☒ Not measured

Weight: 110 lbs.
Source: ☒ Stated ☐ Measured

Accompanied by: son

Patient Identification Verified: ☒ Yes Secondary Verification Process: ☒ Yes DOB

Patient requires Transmission-Based Precautions? ☐ Yes ☒ No If yes, ☐ Airborne ☐ Droplet ☐ Contact

Vital Signs ☐ **HBO Visit** *(If this is an HBO Visit, skip this section as vital signs are captured on the HBO Treatment Record.)*

Temperature: 97.9 Pulse: 60 Respirations: 16 Blood pressure (mmHg): 120/60
If ordered by physician: Capillary Blood Glucose: _____ mg/dL *(Hospital's blood glucose reference range: _____ mg/dL)*

History Since Last Visit ☐ N/A *(If this is Patient's Initial Visit, check N/A and skip this section.)*

Added or deleted any medications: ☐ Yes ☒ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Any new allergies or adverse reactions: ☐ Yes ☒ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☒ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☒ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☒ Yes ☐ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed: ☒ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☒ N/A

Has compression in place as prescribed: ☐ Yes ☐ No ☒ N/A Has offloading in place as prescribed: ☐ Yes ☐ No ☒ N/A

Blood glucose under control: ☐ Yes ☐ No ☒ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear. ☒ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☐ R ☐ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☐ **Yes** ☒ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES: Hospitalized @ wake - took some medication → made her confused

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: Margaret A Ray, RN Date: OCT 05 2017 Time: 1050

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non-wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☐ Yes ☒ No Location of pain:

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 10 **Duration of Pain:** ☐ Constant ☐ Intermittent

Character of Pain: ☐ Aching ☐ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy ☐ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☐ Medication ☐ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S ☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☐ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management

Modification to Pain Management

Medication List:

It is important to know what medicines you are taking.

Update your list if your medicines or dosages change.

Keep a list of your medicines with you. A good place to put your list is in your wallet or purse.

Give all your health care providers a list of all the medicines you take including any vitamins, supplements, or medicines you bought without a prescription.

If a medication is not on this list, contact your provider to discuss whether it should be discontinued.

MEDICATIONS TO BE TAKEN AT HOME:

Medication	AM	Noon	PM	Bed	Comments
atorvastatin (Lipitor 40 mg oral tablet) 40 mg by Mouth Daily					Lowers cholesterol
losartan 25 mg oral tablet 12.5 mg by Mouth daily					Treats high blood pressure
pentoxifylline 400 mg oral tablet, extended release 400 mg by Mouth three times daily					For the liver
timolol ophthalmic (timolol maleate 0.5% ophthalmic solution) 1 drop(s) Each EYE twice daily					For eye health
warfarin 5 mg oral tablet 5 mg by Mouth Monday, Tuesday, Wednesday, Friday, Saturday					Prevents blood clots
warfarin 2.5 mg oral tablet 2.5 mg by Mouth Thursday and Sunday					Prevents blood clots
acetaminophen-codeine (Tylenol with Codeine #3 300 mg-30 mg oral tablet) 1 tablet(s) by Mouth daily as needed Pain					Treats pain

Patient at risk for:	Falls

Discharge Orders Form finalized by Kappel MD, Justin Daniel on 09/28/17 13:01:45

Your Discharge Education:
FALL PREVENTION

Fall Prevention

Falls often occur due to slipping, tripping or losing your balance. Here are ways to reduce your risk of falling again.

- Was there anything that caused your fall that can be fixed, removed or replaced?
- Make your home safe by keeping walkways clear of objects you may trip over.
- Use non-slip pads under rugs.
- Do not walk in poorly lit areas.
- Do not stand on chairs or wobbly ladders.
- Use caution when reaching overhead or looking upward. This position can cause a loss of balance.
- Be sure your shoes fit properly, have non-slip bottoms and are in good condition.
- Be cautious when going up and down stairs, curbs, and when walking on uneven sidewalks.
- If your balance is poor, consider using a cane or walker.
- If your fall was related to alcohol use, stop or limit alcohol intake.
- If your fall was related to use of sleeping medicines, talk to your doctor about this. You may need to reduce your dosage at bedtime if you awaken during the night to go to the bathroom.
- To reduce the need for nighttime bathroom trips:
- Avoid drinking fluids for several hours before going to bed
- Empty your bladder before going to bed
- Men can keep a urinal at the bedside
- Stay as active as you can. Balance, flexibility, strength, and endurance all come from exercise. They all play a role in preventing falls. Ask your heathcare provider which types of activity are right for you.

- If your fall was related to use of sleeping medicines, talk to your doctor about this. You may need to reduce your dosage at bedtime if you awaken during the night to go to the bathroom.
- To reduce the need for nighttime bathroom trips:
- Avoid drinking fluids for several hours before going to bed
- Empty your bladder before going to bed
- Men can keep a urinal at the bedside
- Stay as active as you can. Balance, flexibility, strength, and endurance all come from exercise. They all play a role in preventing falls. Ask your heathcare provider which types of activity are right for you.

Additional Information/Special Instructions
If you experience chest pain or difficulty breathing - CALL 911

Quit Smoking
Quitting smoking or other tobacco use is the most important thing a person can do for their health. If you or a family member smokes, call the National Tobacco Quitline toll-free at 1-800-QUIT-NOW (1-800-784-8669) & talk to your primary care provider (PCP).

Weight Monitoring
If you have heart failure, check your weight daily. Call if your weight gain is 2-3 pounds in one day or 4-5 pounds in the past 5 days.

Diet and Activity
Follow the diet and activity instructions as given to you by your care team.

Nursing Shift Summary - UWMC 6 NE 0700-1

Discharge Summary

DATE OF ADMISSION: 09/27/2017

DATE OF DISCHARGE: 09/29/2017

PCP: William Neighbor

DISCHARGE DIAGNOSIS:
Altered consciousness
Social disarray

CONSULTS COMPLETED:
Consulting services in CORES:
Wound/Ostomy
Family Medicine

OPERATIONS/PROCEDURES:
None

PRINCIPAL DIAGNOSTIC STUDIES/RESULTS:
9/28/17:
CT Head:
IMPRESSION:
No acute infarct, hemorrhage or mass effect.

CXR
FINDINGS AND IMPRESSION:
Cardiac and mediastinal contours are normal.

Findings suggestive of underlying obstructive lung disease. Otherwise the lungs are clear.

No pneumothorax or pleural effusion.

REASON FOR ADMISSION:
Per admission HPI by Dr. Hyde on 9/28/17:
"Jeanne is a 92-year-old female with history of DVTs on Coumadin, venous stasis, and chronic leg ulcers presenting to the hospital because of altered mental status. History is gathered from the patient, ER physician, and an excellent note written by the emergency room social worker. Jeanne was in her usual state of health until today, when she and her son Lewis were evicted from their home on Bainbridge Island. She states that the stress of the event made her "lose it." Apparently Jeanne started acting in a bizarre manner, threatening to the burn the house down, and stating that she would "get them for this." Her son grew concerned that she may have overdosed on medications, so he called 911. Jeanne tells this interviewer that she suspects someone is trying to kill her. When asked about the eviction today, she states that she had her son were kicked out of the house because he is gay.

Upon presentation to the emergency room, Jeanne was in no acute distress. Her vital signs were within normal limits. Workup in the emergency room for altered mental status including labs and head imaging was unremarkable. The emergency room social

worker attempted to reach the patient's son (and DPOA) Lewis and was unable to get in touch with him. She was able to get in touch with Jeanne's other son who shed light on a fairly complex family dynamic. He states that the rest of the family has been very concerned about Lewis neglecting his mother. Multiple APS reports have been filed but nothing has come of them. With respect to this hospitalization, the family medicine service was called for admission due to failure to thrive, concern for elder abuse, and unsafe discharge from the emergency room."

HOSPITAL COURSE:
Jeanne is a 92 yo F with history of DVTs on warfarin, venous stasis, and chronic leg ulcers presenting with AMS, admitted for possibly psych issues including concerns for paranoia and threats to burn down her apartment. After discussion with her son, Lewis, these appear to be valid concerns as the owner and neighbors in their apartment building are part of an anti-gay hate group and have been trying to get themvicted, with ongoing legal proceedings but no eviction eminent. Patient endorsed not actually planning to burn down the building. Her mental status cleared soon after admission, and is likely attributable to taking an extra tylenol with codeine. She was counseled on just taking tylenol without codeine for her pain in the future.

She was otherwise continued on her regular home medication regimen.

CONDITION:
Fair

DISCHARGE PHYSICAL EXAM:
Temperature: 37.2 Pulse: 71 Blood Pressure: 128 / 57 Respirations: 16 Height: 160cm Weight: 52kg BMI: 20.3kg/m2 Oxygen Saturation: 99% (Room air)
GENERAL: Elderly, thin woman, in NAD, hard of hearing
HEENT: NC/AT, MMM, anicteric sclerae, edentulous
CV: RRR, no m/r/g appreciated
RESP: normal respiratory effort, CTAB
ABDOMEN: soft, non-tender, non-distended
EXT: LLE with venous stasis ulcerations with granulated borders, no surrounding erythema or purulent drainage, no eripheral edema
NEURO: Alert and oriented, MAE spontaneously
PSYCH: Delightful, appropriate

DISPOSITION:
[x] Home [_] Skilled Nursing Facility [_] Other: _

CLINICAL FOLLOW-UP, INCLUDING APPOINTMENTS:
NWH Wound Care at 10/05/2017 10:15

DIAGNOSTIC STUDIES RECOMMENDED:
continue outpatient INR monitoing

PENDING RESULTS: *(as of this summary)*
Opioid Confirmation, URN

THERAPEUTIC RECOMMENDATIONS:
Caution with taking tylenol with codeine - please just take tylenol alone.

DISCHARGE MEDICATIONS:
1. atorvastatin (Lipitor 40 mg oral tablet) Dose: 40 mg PO Daily
2. losartan 25 mg oral tablet Dose: 12.5 mg PO Daily
3. pentoxifylline 400 mg oral tablet, extended release Dose: 400 mg PO TID
4. timolol ophthalmic (timolol maleate 0.5% ophthalmic solution) Dose: 1 drop(s) EYE-Both BID
5. warfarin 5 mg oral tablet Dose: 5 mg PO QMTuWFSa
6. warfarin 2.5 mg oral tablet Dose: 2.5 mg PO QThSu
7. acetaminophen-codeine (Tylenol with Codeine #3 300 mg-30 mg oral tablet) Dose: 1 tab PO Daily PRN Pain

CODE STATUS:
- DNR ORDER EXPIRED

Inpatient Anticoagulation Monitoring - Warfarin

Patient: Jeanne Hoffman

Indication: history of recurrent DVTs

Home dosing regimen: warfarin 2.5 mg on Thurs/Sun and 5 mg on M/Tu/W/F/Sat

Outpatient anticoagulation provider: PCP (Dr. William Neighbor at Hall Health Primary Care)

INR goal: 2-3 (per PCP note, closer to 2.0 given age)

Current INR and Warfarin Dosing:

Date	INR	Warfarin	HCT	PLT	SCr	VitK	Comment
09/20/17	2.1						*outpatient INR check
**********							
09/28/17	1.9	5 mg (21:14)	35	241	0.97		_
09/29/17		1.6					_

Vitamin K administered: none

Factors potentially influencing INR:
-Patient endorses increased vegetable intake recently; increased Vitamin K intake may reduce INR

Assessment:
Ms. Jeanne Hoffman is a 92 year old female with a history of DVTs, who has been managed on warfarin for years. She was admitted to the hospital with altered mental status and failure to thrive. INR upon admission was slightly subtherapeutic at 1.9. Patient and son deny any missed doses of warfarin except for last night's dose.

Plan:
1. Pt discharged on home dose of warfarin 2.5 mg Th/Sun and 5 mg M/Tu/W/F/Sat.
2. Per discussion, MD will arrange for anticoagulation follow-up with her PCP, Dr. Neighbor early next week.

EMERGENCY ROOM SOCIAL WORKER NOTE (0300 Hours):

PP: Per triage, pt from Bainbridge and received an eviction notice today. Son left her alone. Pt has decreased level of consciousness. Want to take revenge on others she stated "got to do it tonight". Repeating words. Failure to thrive, per son. EDMD requested SW assistance with obtaining collateral and disposition planning.

HPI: 92 year old Caucasian female BIB Bainbridge Island Ambulance Association after her son called 911 requesting transfer to UWMC for psychiatric evaluation, per report. On transport, patient was agitated, confused, oriented to person, and monitored for failure to thrive. Per ambulance report, son reported that he was concerned that his mother had an accidental overdose due to her bizarre behavior. He also was concerned that she had stopped taking her medications today. Son reported to ambulance that his mother stated, they want me dead and that she needed to set the house on fire. He also reported that she was being evicted from her apartment. Per EDMD, patient does not have any remarkable medical findings and patient is being considered for admission due to failure to thrive.

Per chart, patient has two sons that live in the Bainbridge Island area. Louis Hoffman is her DPOA and they live together. Louis has a physical impairment and is unable to complete all of his mother's caretaking needs. It appears there have been three previous APS referrals for concern of neglect/abuse in the home. Patient's other son is Douglas Hoffman. Per chart, the brothers have a history of a tenuous relationship.

Writer attempted to obtain collateral from Louis Hoffman (206-855-0815), whom patient resides with, and left a VM. Writer obtained collateral from Douglas Hoffman (206-842-8360), where he reported that he and the rest of his mother's family have not had contact with his mother in almost three years due to the brother not allowing contact. Douglas reports that Louis is emotionally abusive and controlling of his mother. He reports that his mother's brother passed away 6 months ago and she is unaware due to the family's inability to contact her. He reports that he has made several APS referrals and that "they haven't done anything" and "I'm not very happy with social services in Bremerton". He reports he has friends in the police department who keep him updated on his mother's condition. He reports that he would be happy to help support his mother financially and emotionally if his brother wasn't involved. He reported that when he tries to visit his mom, Louis will call the police reporting that he has someone trespassing on his property that is "gay bashing". He reports he set up a bank account to help support his mother and his brother "cleaned out the bank account". Douglas reports that he is interested in coming to visit his mother in the hospital, with her permission.

IMPRESSION: 92 year old Caucasian female BIB Bainbridge Island Ambulance Association after her son called 911 requesting transfer to UWMC for psychiatric evaluation, per report. It is unclear whether the patient received eviction paperwork today or was evicted from her home. The patient resides in the home with her adult son, Louis, who is physically impaired and her legal DPOA. Writer has been unable to connect with Louis. Per collateral from son Douglas, there is concern for possible neglect and emotional abuse by her son, Louis. Per chart, her sons have had a difficult relationship for many years. Patient would benefit from hospitalization for further evaluation and to create safe disposition moving forward.

PLAN: EDMD admitting patient to hospital for failure to thrive. EDSW available, PRN.

HOSPITAL DAY: 0

CHIEF CONCERN: *(Required for all billing levels)*
This is a 92 year old female who presents with FTT and social disarray.

PCP: William Neighbor, Hall Health

HISTORY OF PRESENT ILLNESS:
Jeanne is a 92-year-old female with history of DVTs on Coumadin, venous stasis, and chronic leg ulcers presenting to the hospital because of altered mental status. History is gathered from the patient, ER physician, and an excellent note written by the emergency room social worker. Jeanne was in her usual state of health until today, when she and her son Lewis were evicted from their home on Bainbridge Island. She states that the stress of the event made her "lose it." Apparently Jeanne started acting in a bizarre manner, threatening to the burn the house down, and stating that she would "get them for this." Her son grew concerned that she may have overdosed on medications, so he called 911. Jeanne tells this interviewer that she suspects someone is trying to kill her. When asked about the eviction today, she states that she had her son were kicked out of the house because he is gay.

Upon presentation to the emergency room, Jeanne was in no acute distress. Her vital signs were within normal limits. Workup in the emergency room for altered mental status including labs and head imaging was unremarkable. The emergency room social worker attempted to reach the patient's son (and DPOA) Lewis and was unable to get in touch with him. She was able to get in touch with Jeanne's other son who shed light on a fairly complex family dynamic. He states that the rest of the family has been very concerned about Lewis neglecting his mother. Multiple APS reports have been filed but nothing has come of them. With respect to this hospitalization, the family medicine service was called for admission due to failure to thrive, concern for elder abuse, and unsafe discharge from the emergency room.

PROBLEM LIST:
Supratherapeutic INR

PAST MEDICAL HISTORY:
Recurrent bilateral lower extremity DVTs - on warfarin
Hyperlipidemia
Hypertension
Venous insufficiency
Chronic leg ulcers status post skin graft
Osteoporosis

MEDICATIONS PRIOR TO ADMISSION:
Documentation of home medications had not been completed in ORCA when this note was written.

ALLERGIES:
nitrofurantoin
penicillin
aspirin
sulfa drugs
Adhesive Bandage

HABITS:

Tobacco Use: None Alcohol Use: None Drug Use: None

SOCIAL HISTORY:
Lives with her son Lewis on Bainbridge Island. Was evicted from their home today. Concern for elder abuse. Multiple APS reports have been filed.

DAY TEAM ADDENDUM

S:
Feeling well this AM, back to normal. Said that something "rose up" inside her. Said that her neighbors are always watching her and hassling her and her son. Feels that it is a little unsafe but says that her son Lewis takes good care of her and that she feels safe with him.

No other pain anywhere. States that her LE ulcers are her main medical problem.

O:
VSS

General: Thin elderly woman, NAD
HEENT: PERRL
Card: RRR, slight systolic murmur RUSB
Resp: LCTAB
Neuro: A+O x 3, MAE, no focal deficits
Ext: Significant LE venous stasis ulcerations to the LLE. largest is 3x5cm along the lateral aspect. 2 smaller ulcers over the medial and latteral maleolli. No signs of superimposed infection. Absent DP pulse on left, very faint on right. Able to winggle toes, fine touch sensation grossly intact. Slow cap refill.

A/P:
Jeanne is a 92 yo F with history of DVTs on warfarin, venous stasis, and chronic leg ulcers presenting with AMS, admitted for possibly psych issues but after discussion with son, seems like there are no concerns.

#Psychiatric issues NOS: Patient was initially threatening to burn down her old apartment, saying people in their building were out to get them. Also possible concern about eviction. However after discussion with DPOA and son Lewis, appears that these are actually valid concerns. Lewis is homosexual and the owner of their current apartment along with some people in their building are part of an anti-gay hate group and they have been trying to spy on them and provoke them into getting evicted. Currently there are some legal proceedings ongoing but there is no eviction eminent. After discussion patient, while still endorsing wanting to burn down the building, acknowledged that that was not something she would actually do. Per son patient is at baseline and son is willing to take her home. Patient was mildly altered yesterday however and son believes that patient took an extra dose of her thyroid medication

-no concern for active psych issues

#Dispo: Patient has two sons Lewis and Donald. Lewis is DPOA and patient is living with Lewis. There is some familial conflict between the two sons. There are conflicting viewpoints and stories. That being said, patient is currently living with Lewis and there is no concern for abuse or neglect at this point.
-home tomorrow

DVTs on anticoagulation: Warfarin slightly subtherapeutic on presentation.
- Will give 5mg tonight rather than 2.5mg as per home regimen, then return to home regimen
Home warfarin regimen:
- Warfarin 5 mg Monday Tuesday Wednesday Friday and Saturday
- Warfarin 2.5 mg Thursday and Sunday
- Appreciate pharmacy assistance in adjusting dose as necessary

Chronic leg ulcers: No signs of infection on admission.
-wound consult

Hyperlipidemia
-Continue atorvastatin 20 mg daily

#Hypertension
-continue losartan 12.5 mg daily

FEN/GI: general diet
L/T/D: PIV
VTE prophylaxis:
  Risk Level: Average
  Treatment(s) ordered: Lovenox SQ
Contacts: Son Lewis
Code status: DNR/DNI
Discharge plan: tomorrow

DISCHARGE/TRANSFER:

Transfer details:

Patient meets clinical criteria for transfer.

Vital Signs Data

9/28/2017 4:40	Temperature - C	36.9 degC
	Temperature Source	Temporal Artery
	Heart Rate	68 bpm
	Respiratory Rate	16 br/min
	SBP - Noninvasive	114 mmHg
	DBP - Noninvasive	**58 mmHg Low**
	MAP - Noninvasive	75 mmHg
	BP Method	Automatic
	BP Extremity	LEFT, Arm, Upper
	Vital Sign Reason	Routine .

Oxygenation Data

9/28/2017 4:40	SpO2	100 %
	O2 Delivery Device	Room air
	SpO2 Activity	Resting .

Condition at transfer Stable.

Patient transfered to 6NE.

Report given to Louie, RN.

Patient transfered via wheelchair.

Transferred by Transport, PCT ..

UWMC huddle complete and findings discussed with Primary Provider. Patient ready for transfer.

IMPORTANT EMERGENCY DEPARTMENT COMMUNICATION AFTER YOUR VISIT:
If you have questions about your ED visit, please call:
University of Washington Medical Center ED: 206-598-2000

You may receive a phone call from us in the next few days to ensure that you are improving. Please be sure that we have an accurate phone number and address for you.

To assist us with continuing to improve the quality of the Emergency Care we provide, we would like your input. In the coming weeks, you may receive a survey in the mail about our processes. Please complete this and return it to us. Our goal is to provide you with excellent medical care. If we have not reached this goal, please let us know how we can improve our services.

University of Washington Medical Center would like to thank you for allowing us to assist you with your healthcare needs.

It is important to see your doctor or primary care provider. Emergency Care may be incomplete without proper follow-up. For help scheduling your UW Medicine or Harborview Clinic doctor appointment, call the Patient Contact Center at 206.520.5000 or toll free at 877.520.5000.

If you become worse in any way, it is important that you call your doctor, or return to the Emergency Department. Please remember to take these instructions to your next doctor's appointment.

Social Work Brief Note

Discharge Recommendations:

As of 9/28/2017. Anticipate discharge when medically ready to: d/c home with family pending if they are able to find a living situation prior to discharge..

Assessment

Current Function and Progress: Pt agreeable for OT evaluation and treatment. Presented HOH and with pleasant affect. Performed ADLs, transfers, and mobility with stand by assistance at most. Pt has a strong upper body and depends on them greatly to safety navigate through the room and perform self care activities. With the appropriate environment such as grab bars, pt is able to perform her activities with supervision assist at the most.

At this time, pt is limited by mild balance deficits resulting in fall risk.

Plan:
[] fall prevention strategies

Help From Another Person Eating Meals: 4
Help From Another Person Taking Care of Personal Grooming: 3
Help From Another Person To Put On Take/Off Upper Body Clothing: 4
Help From Another Person To Put On Take/Off Lower Body Clothing: 4
Help From Another Person Toileting: 3
Help From Another Person Bathing: 3

LEGEND: 1-Unable 2-A Lot 3-A Little 4-None. AMPAC 6: 21.

OCCUPATIONAL THERAPY NOTE:
Observation-Medicare Plan of Care:
Initial Certification from 9/28/2017 to 10/28/2017.
Start of care date 9/28/2017 .
Referring physician / practitioner: Hyde, Nicola MD.
Visits from start of care date: 1 .

PERTINENT PATIENT INFORMATION:
Diagnosis:

Abuse / Failure to Thrive:

Altered Mental Status:

.

Relevant Past Medical and Therapy History:

Recurrent bilateral lower extremity DVTs - on warfarin
Hyperlipidemia
Hypertension
Venous insufficiency
Chronic leg ulcers status post skin graft
Osteoporosis

.

Has patient fallen or had any near falls in the past 3 months:
No.
Interpreter needed:
No.

Occupational Profile

Prior functional status: independent with ADLs, independent with IADLs Does not drive d/t hx of epilepsy, independent with mobility "as far as I want".

Home Environment

Family/caregiver able to provide: 24 hour supervision, physical assistance.
recently evicted from home. .

EVALUATION:

Musculoskeletal

Bilateral upper extremities range of motion and strength are within functional limits but were not formally tested.
Bilateral lower extremities range of motion and strength are within functional limits but were not formally tested.

Sensation

No deficits per patient report UE: no upper extremity sensory deficits noted, LE: no lower extremity sensory deficits noted.

Functional Mobility

Bed mobility: Supine to sit patient is independent, Sit to supine patient is independent.
Sitting balance: Edge of Bed patient is independent.
Standing: patient needs stand by assist, Assistive device Front wheeled walker.
Chair transfer: Sit to stand patient is independent.
Toilet transfer: patient needs stand by assist, using grab bars, Pt performs 100% of activity.
Functional Mobility Level of assistance: patient needs stand by assist, Assistive device Front wheeled walker.

Self Care

Basic Activities of Daily Living Grooming: supervision, patient's position while grooming standing, Lower body dressing: patient is independent.

Cognition

Behavior: alert, cooperative.
Command following: pt consistently follows verbal commands, pt consistently follows gestural commands.
Orientation: Patient is oriented to person, place, date, situation.
Communication: normal.

TREATMENT PROVIDED:

Patient Caregiver Report:

agreeable for OT session.

Cultural Preferences:

goes by: Jeanne.

Two patient identifiers checked: Yes.

Pain

No pain, per patient report.

Time Spent:

Session: Start Time: 1024, End Time: 1100, Duration: 26 minutes.

OT Evaluation-Low Complexity

15 minutes.

Patient agreeable for evaluation. Skilled interview to obtain past level of functioning, home environment, social support, barriers to recovery, goal for rehab, and current level of functioning. .

Self-care/ADL Management for 11 minutes

Pt received in bed at start of session, agreeable for OT eval and treat. See evaluation section for further details regarding self care and mobility..

FALL RISK AWARENESS: Educated and trained to use call light, pt reports self stubborness and is reluctant to ask for help despite comphrensive discussion on importance of asking for assistance..

TEACHING METHOD: [x] Verbalization

[ ] Motivation
[ ]

TEACHING OUTCOME:
[x] Verbalized good understanding
[x] Demonstrated good understanding
[ ] Requires more reinforcement

.

PLAN/RECOMMENDATIONS:

Goals **Self Care:**

1. Patient will be supervision with functional transfers including chair/shower/toilet transfers with use of DME PRN
2. Patient will be independent with bathing with use of DME PRN

Therapeutic Activity:

- Patient will be knowledgeable on at least two fall prevention techniques through re:verbalization and demonstration.

.

Goals to be completed by 10/3/2017. G Code Reporting: 9/28/2017
Current Status G8987 CI.
Projected Status: G8988 CH.
On 9/28/2017
The patient is currently performing at 10 % impaired, limited or restricted, for goal number 2 , using clinical judgement.

Patient/family goals: return to previous level of activity, discharge home.

Plan:

Patient will be seen: 2-3 days a week.
Treatment plan: fall prevention training, ADL training, functional mobility training, therapeutic activities, therapeutic exercise.

Daily Recommendations for nursing staff:

SBA with walker..

Discharge Recommendations:

As of 9/28/2017.

Anticipate discharge when medically ready to: d/c home with family pending if they are able to find a living situation prior to discharge..

Occupational Therapy Evaluation Note -6N

REPORT SUMMARY:

Anticipated discharge destination
Home.

As of 9/28/2017 if the patient were to discharge today
I would recommend Home with son per prior situation.

Recommended mode of transportation at discharge
Personal ride.

Recommended Consults:
Social work. Social Services involved related to home issues although did not see or hear any indication of this throughout my visit today prior to or after son arriving.

PHYSICAL THERAPY NOTE:
Note type: Initial evaluation.

PERTINENT PATIENT INFORMATION:
Diagnosis: **CHIEF CONCERN:** *(Required for all billing levels)*
This is a 92 year old female who presents with FTT and social disarray.

.
Past Medical History: **PAST MEDICAL HISTORY:**
Recurrent bilateral lower extremity DVTs - on warfarin
Hyperlipidemia
Hypertension
Venous insufficiency
Chronic leg ulcers status post skin graft
Osteoporosis

.
Interpreter needed: No.
Has patient fallen in the past year: Yes, Unsure details at this time.
Prior functional status: independent.
Reason for referral: PT to evaluate and treat for safety.

HOME ENVIRONMENT:
Lives in apartment.
Stairs: 1 flight used optionally inside stairs, 3 used optionally outside stairs, single rail.
Lives with Son who is able to be caregiver for patient.
Family/caregiver able to provide 24 hour supervision, physical assistance.
Avocational: Patient likes to be active, traveling.

Mobility equipment owned: 4-wheeled walker.

EVALUATION:
Behavior:
Alert and oriented x 4.
Patient very pleasant and cooperative today throughout visit.
Able to follow directions well, seems to be thinking clearly, accurate with history other than a little cloudy related to events of yesterday bringing her here..
Mobility:

See Current Level of Function in Treatment Provided Section for Evaluation specifics
.

EQUIPMENT:

Patient has appropriate equipment for d/c safely

TREATMENT PROVIDED:

Time spent:
Session 1:
Start Time: 1100 to 1150.
Duration: 50 minutes.
Current Level of Function as of 9/28/2017,
Bed Mobility:
Rolling: independent
Scooting: Independent

Transfers:
Supine to sit: Independent
Sit to stand: Independent with walker for support
Bed to chair: Supervised to independent with walker for support, patient states she does better with her walker
Gait: Patient able to ambulate with FWW today with just CGA to SBA, she has flexed trunk and is a little impulsive at times which is baseline for her with distance to 400 feet without difficulty, no sob, no dizziness. She does have occasional path deviation although did not have any loss of balance, no difficulty with distractions or obstacles in path.

Stairs: No stairs needed for access to patient's home although does have adequate strength to go up and down steps with railing

Balance: No recent loss of balance. No dizziness. 10 meter walk test today at gait speed of .92 meters/second using fww for suppport without loss of balance indicative of decreased risk of falling, limited community ambulator.

Outcome Measures: Refer to outcome measures section for specifics.

Safety: Patient able to demonstrate overall good safety awareness today throughout visit with transfers and gait, she verbalizes understanding of importance of using walker, of taking time with all mobility for safety. She states her son is there to help her most of the time as well which has been beneficial to her..
Precautions
Fall Risk.
Two Patient Identifiers Checked Yes.

Patient/Caregiver Report:
Feeling much better, clearer today. Patient able to state that she found out that she must have taken some medication that made her very confused.
Cultural preferences
Jeanne although states you can call me whatever you want.

Individuals present during session:
Patient's son only at the end of treatment today, spoke briefly with Nursing as well as Social Services

Pain
No evidence or complaints of pain
Location:
Just the normal aches and pains from being 92.

Behavior
Alert and oriented x 4
Very pleasant and cooperative, no bizarre or inappropriate type remarks throughout visit today

Patient very positive when talking about her son that lives with her, that he is a big help to her and is able to take good care of her inspite his own limitations.
Command following:
Following commands.
Safety/Precautions:
Patient following all precautions safely.

Physical Therapy Evaluation Level 1:
Evaluation Minutes: 20

Comorbidities/Personal Factors that will affect progression towards goals: (0)

Functional Limitations / Body System Impairments: (1-2)

Therapeutic Functional Activity/Bed Mobility:
for 30 minutes
Working with patient today on safety throughout, transfer training, gait training, use of walker appropriately, importance of increased activity in and out of home to maintain or further improve strength.

Discussed with patients son that she should just be encouraged to be up and moving around more throughout the day using her walker for support

Outcome Measures

10 meter walk

Self selected speed number .92 meters/second.

AMPAC 6: 23

- How much difficulty does the patient currently have with:
  - 1) Turning over in the bed (including adjusting bedclothes, sheets, and blankets)?:
  - 2) Sitting down on and standing up from a chair with arms (eg. w/c, bedside commode)?:
  - 3) Moving from lying in bed to siting on the side of bed?:
- How much help from another person does the patient need currently:
  - 4) Moving to and from a bed to chair (including a w/c)?:
  - 5) To walk in hospital room?:
  - 6) Climbing 3-5 steps with a railing?:

ASSESSMENT AND PLAN:

Assessment of current status/needs:

Patient admitted to the hospital due to AMS, bizarre type behaviors and statements. That seems to have cleared at this time, she is oriented x 4, she is cooperative throughout visit. She states she lives at home with her son and that they take care of each other. Patient did not voice any concerns throughout session today related to mobility or any additional needs for in the home. She is planning on returning home with her son as soon as today possibly and states she is not needing any additional care at this time. Patient happy when son arrived stating she might get to go home

Patient is currently requiring just supervision to CGA 0 to 5% assist today with cues at times for safety/technique/posture throughout transfers in room to sitting, standing and chair as well as with gait in room and halls up to 400 feet today. She has flexed trunk noted which she states is normal for her. She did not have any significant difficulty throughout visit today although working with her on improving posture, position in walker. Patient able to ambulate at speed of .92 meters/second today which is indicative of reduced fall risk, limited community ambulator. Ampac 6 clicks score also indicative of functional mobility, decreased fall risk, return home. Anticipate that patient is at baseline functionally at this time, has needed equipment at home for safety, no ongoing PT intervention indicated at this time

.

DAILY RECOMMENDATIONS:

Device: walker, gait belt

.

Ambulation activity status: walk with RN.
Ambulation level of assistance: supervision.
Ambulation device: walker, gait belt.

GOALS:

d/c home
Patient/family goals: discharge home, goals were established with patient/family.
Goals reviewed and unchanged.

DISCHARGE RECOMMENDATIONS:
Anticipated discharge destination
Home.
As of 9/28/2017 if the patient were to discharge today
I would recommend Home with son per prior situation.
Recommended mode of transportation at discharge
Personal ride.
Recommended Consults:
Social work.
Social Services involved related to home issues although did not see or hear any indication of this throughout my visit today prior to or after son arriving.

Physical Therapy Evaluation 6NE

Inpatient Anticoagulation Monitoring - Warfarin

Patient: Jeanne Hoffman

Indication: history of recurrent DVTs

Home dosing regimen: warfarin 2.5 mg on Thurs/Sun and 5 mg on M/Tu/W/F/Sat

Outpatient anticoagulation provider: PCP (Dr. William Neighbor at Hall Health Primary Care)

INR goal: 2-3 (per PCP note, closer to 2.0 given age)

Current INR and Warfarin Dosing:

Date	INR	Warfarin	HCT	PLT	SCr	VitK	Comment
09/20/17	2.1						*outpatient INR check
09/28/17	1.9		35	241	0.97		
	1.8						

Vitamin K administered: none

Scheduled Medications
Atorvastatin 20mg tab Dose: 20 mg = 1 tab PO QDay
Warfarin 2.5mg tab Dose: 2.5 mg = 1 tab PO QThSu
Warfarin 5mg tab Dose: 5 mg = 1 tab PO Once
Warfarin 5mg tab Dose: 5 mg = 1 tab PO QMTuWFSa

Infusions
No Infusion Medications Found.

PRN Medications
Acetaminophen 325mg tab Dose: 650 mg = 2 tab PO Q4 Hours PRN

Factors potentially influencing INR:
-Patient endorses increased vegetable intake recently; increased Vitamin K intake may reduce INR

Assessment:
Ms. Jeanne Hoffman is a 92 year old female with a history of DVTs, who has been managed on warfarin for years. She was admitted to the hospital with altered mental status and failure to thrive. INR upon admission was slightly subtherapeutic at 1.9. Patient and son deny any missed doses of warfarin except for last night's dose.

Plan:
1. Recommend dosing on higher end of home dose today: warfarin 5 mg PO x1 tonight. Then can likely resume patient's home dose of warfarin 2.5 mg Th/Sun and 5 mg M/Tu/W/F/Sat.
2. Monitor daily INR/PT, Hct, Hb, and Plts while inpatient.
3. Monitor daily for s/sx of bleeding and/or thrombosis.
4. Upon discharge, patient should have anticoagulation follow-up with her PCP, Dr. Neighbor.

Inpatient Anticoagulation Monitoring - W

MSW continues to follow for discharge and care coordination, please see ED MSW note from earlier in the day for more details. MSW received a call from the patient's son/DPOA Louis (360-649-5702) stating he was on his way to UWMC to provide DPOA paperwork and visit with the patient. MSW asked Louis to bring a copy of DPOA paperwork so it could be scanned into ORCA, which was agreeable and done (206-520-3251). This writer met with the patient and Louis at bedside to discuss events that led up to the patient's admission. Louis stated he lives with the patient in Bremerton and is her full-time caregiver; the patient lives in Section 8 housing and has been informed she will need to move. It is unclear how long ago the patient was told she must move but Louis thinks its been roughly 2 years that they have been fighting with the landlord. This writer asked if he and the patient were evicted from the property as mentioned in the MD and SW notes; Louis shared they are NOT evicted, just unhappy where they live and in the process of working with Kitsap Housing Authority on obtaining a new rental property. Louis stated he was concerned his brother would come to UWMC and "cause a ruckus", which would in turn exacerbate the patient's medical condition. Louis and the patient stated they were agreeable to have the team share medical information with Douglas but wanted to be sure he was not left alone with the patient, which this writer shared with the Charge RN and team on the floor. Patient was cleared by PT for home without follow up services and she feels safe discharging back to her home under the care of Louis. No additional SW needs identified at this time but MSW to remain available as needed for discharge planning and/or care coordination. RN updated.

.

PLAN:

Patient is expected to be medically stable for discharge home tomorrow; she will be transported home and cared for by her son/caregiver/DPOA Louis.

MSW faxed DPOA (HC and F) paperwork to medical records to ensure her paperwork is added to ORCA for future visits.

ED Triage Form

VISIT INFORMATION:

Chief Complaint:
Altered mental status

History of Present Illness:
The patient is a 92-year-old woman with history of DVT on warfarin and a seizure disorder, who was brought in by AMR after her son was concerned due to her abnormal behavior. Per report by AMR, the patient and her son were evicted from their home today. The patient subsequently began acting very erratic and making statements such as "I'm going to burn this house down" and claiming to see things and people who weren't there. Her son called 911 and requested that his mother be transported to UW for evaluation. No one accompanied the patient to the ED.
The patient had been staring into space repetitively stating, "I'm going to do it. I'm going to burn the house down." However, when approached to take a history from her, she was for the most part quite logical. She states that she is in emotional turmoil because she and he son were evicted. She believes the eviction to be because her son is gay. She has lives with her son for some time and he is her primary careiver. The patient says that she does not know why she is in the ER, as she feels well. She denies any SI or HI, but does endorse "seeing things and hearing things" which she is not able to describe. She says that "seeing things" has become worse today than usual. She says only that these are "things that aren't there" but is not able to elaborate.
She does not know where her son is.

PMH:
Lower extremity DVT, on warfarin
Seizure disorder
Osteoarthritis
Chronic ulcers of her left lower extremity

Medications:
The patient does not know her medications by heart other than warfarin. Per chart review:

1. atorvastatin (Lipitor 40 mg oral tablet) Dose: 40 mg PO Daily
2. carbamazepine (Tegretol 200 mg oral tablet) Dose: 200 mg PO TID
3. cephalexin (Keflex 500 mg oral capsule) Dose: 500 mg PO QID for 7 day(s)
4. docusate sodium 250 mg oral capsule Dose: 250 mg PO BID
5. doxycycline monohydrate 100 mg oral tablet Dose: 100 mg PO BID for 7 day(s)
6. ferrous sulfate 325 mg oral tablet Dose: 325 mg PO Daily
7. hydrochlorothiazide 25 mg oral tablet Dose: 25 mg PO Daily
8. metformin 500 mg oral tablet Dose: 500 mg PO BID
9. ranitidine 75 mg oral tablet Dose: 75 mg PO BID for 14 day(s) prn
10. warfarin 10 mg oral tablet Dose: 10 mg PO QMWFSu
11. warfarin 10 mg oral tablet Dose: 5 mg PO QTuThSa
12. methocarbamol 500 mg oral tablet Dose: 500 mg PO Q6 Hours PRN Muscle Spasm
13. oxycodone 5 mg oral tablet Dose: 5 mg PO Q4 Hours as needed for pain

Allergies:
nitrofurantoin
penicillin
aspirin

sulfa drugs
Adhesive Bandage

Social history:
Tobacco: denies
Alcohol: denies
Drugs: denies

Recently evicted from home she shared with her son Louis.

ROS:
10/14 review of systems completed. Systems reviewed are negative except as stated above in HPI. Systems reviewed: Constitutional, HENT, Eyes, Resp, CV, GI, GU, MSK, skin, heme/lymph

Physical exam:
Vitals *(Most recent and 24 hour range.)*

Date	Result	Last	MIN	-	MAX
09/27/17 22:42	Temp C:	36.6	36.6	-	36.6
09/27/17 22:42	HR:	71	71	-	71
09/27/17 22:42	RR:	16	16	-	16
09/27/17 22:42	SBP Non-Inv:	136	136	-	136
09/27/17 22:42	DBP Non-Inv:	72	72	-	72

General: Frail-appearing elderly woman in no acute distress, resting comfortably on the exam bed
Head: Atraumatic, normocephalic
Eyes: Pupils 3mm and equal, round, reactive to light. Extra-ocular movements intact. Conjuctiva and sclera appear normal.
Mouth and Throat: Moist mucous membranes. No erythema or exudates of posterior pharynx. Uvula midline. Good dentition.
Neck: Supple, no lymphadenopathy. No stridor.
Cardiovascular: Regular rate and rhythm without murmurs, rubs, or gallops. Pulses 2+ and equal in upper and lower extremities bilaterally. No JVD. No lower extremity edema.
Respiratory: Lungs clear to auscultation bilaterally without crackles or wheezes. Good air movement.
GI: Normal bowel sounds. Abdomen soft, non-distended, non-tender to palpation. No rebound or guarding. No masses or organomegaly appreciated.
GU: No CVA tenderness b/l
MSK: Normal ROM of all extremities. No edema, no gross deformities.
Skin: Chronic ulcerations of LLE, covered with clean dressings. No surrounding erythema, no purulent drainage. Skin otherwise warm, well-perfused, without lesion or rashes
Neurological: Alert and oriented to person, time, and event, but initially does not know where she is. Moving all extremities freely. No focal deficits. CN II-XII grossly intact.
Psych: Cooperative, makes good eye contact. Does not appear to be responding to internal stimuli.

CT Head (09/28/2017 00:29)
~EXAMINATION:
CT HEAD WO CONT
CLINICAL INDICATION:
Altered mental status, visual hallucinations
TECHNIQUE:
CT Head Routine wo contrast (N-1)
Contiguous axial sections were obtained through the head without contrast.
Patient age specific scan parameters were used for radiation exposure
COMPARISON:
7/15/2015
FINDINGS:
MASS EFFECT & VENTRICLES: No shift. The lateral ventricles are symmetric. The ventricles, sulci and cisterns are normal.
BRAIN: Moderate global parenchymal volume loss. Unchanged calcification of bilateral basal ganglia and focal calcification the left posterior periventricular white matter. Scattered foci of hypodensities in the periventricular and subcortical white matter, likely chronic microvascular ischemic disease. No acute large infarct or intraparenchymal hemorrhage.
VASCULAR: Atherosclerosis of the cavernous carotids and vertebral arteries

EXTRA-AXIAL: Extra-axial spaces are normal.
EXTRA-CRANIAL: Bilateral lens replacements. Scalp is normal. Sinuses are clear. Mastoids are clear
IMPRESSION:
No acute infarct, hemorrhage or mass effect.
Preliminary results and a final report will be available for review by 10am the following morning Monday through Friday or after 3pm Saturday/Sunday and holidays.
Unless a final report appears below, an attending Radiologist has not reviewed the images.

ED COURSE & MEDICAL DECISION MAKING:

The patient is a 92-year-old woman with PMH of DVT on warfarin and a seizure disorder who presented with reported altered mental status. On presentation, VS were normal and remained stable throughout the ED course. Physical exam was unremarkable as above.

Initial DDX includes bizarre behavior due to traumatic event, new-onset psychosis, intoxication, occult infection, hypoglycemia, hypothyroidism.

Labs were drawn and reviewed which were unremarkable and nearly all within normal limits.
A head CT was ordered which was negative for any acute pathology.

Social work was involved, and the patient's sons were attempted to be contacted for collateral information. Social work was able to reach one son, named Douglas, who unfortunately is not the son whom the patient was living with. Douglas says he is unable to help due to a "family feud," and will only get involved if his brother Louis is not. Unfortunately, Louis is the patient's DPOA and was not answering his phone.
Social work also uncovered that there have been multiple APS referrals made regarding the patient and her son, suspecting neglect of the patient. Due to the difficulty of sorting these issues out in the middle of the night, and the fact that the patient no longer has housing, and may not be safe with her son who is her DPOA, we decided that the patient needs to be admitted for an inpatient social work/placement team to assist.

The patient was admitted to family medicine for further evaluation and management.

ED CONSULTS:
Family medicine

DISPOSITION/PLAN:
Final disposition:
Admit to med/surg bed.

IMPRESSION/DIAGNOSIS:
Failure to thrive
Ulcers of LLE

ATTENDING STATEMENT:
I was the supervising attending involved in this patient's Emergency Department care. I have personally obtained a history and evaluated this patient and discussed with the resident or fellow the history, physical exam, diagnostic studies, and treatment plan. I agree with his or her documentation and where necessary, for either clarification or accuracy, I have added directly to the above note or provided additional comments below.

A laboratory evaluation was ordered and I have personally reviewed all of these findings.
A radiographic evaluation was ordered and I have personally reviewed all of these findings.

No e/o infection of the patient's chronic LE wounds/ulcers. Workup otherwise unremarkable for question of delirium/AMS, though patient admittedly reporting becoming "crazy" because of current psychosocial stressors. Currently feels in an improved state emotionally, and she is denying any SI, HI or CAVH. ED course and medical decision making as otherwise mentioned above.

The patient remained clinically stable and was observed without further significant events or interventions required for the remainder of the ED course, as I am aware and understand it.

LegalDescription (abbreviated): Power of Attorney
Addl'. legal is on page 2 Assessor's Property Tax Parcel/Account#

1. **DESIGNATION OF ATTORNEY-IN-FACT AS HEALTH CARE AGENT**
I, Jean Leonie Caillet Allain Hoffman, 245 High School Rd NW-Apt 2, Bainbridge Island, WA-98110 (Insert name, and address), do hereby designate and appoint Louis Charles Hoffman Allain, 245 High School Rd, NW-2 Bainbridge Is WA-98110 (Insert name, address, and telephone of designated health care agent), as my attorney-in-fact (agent), to make health care decisions for me as authorized in this document. For the purposes of this document, "health care decision" means consent, refusal of consent, or withdrawal of consent to any care, treatment, non-treatment, as provided in Chapter 7.70 RCW, service, or procedure to maintain, diagnose, or treat an individual's physical condition.
2. **CREATION OF DURABLE POWER OF ATTORNEY FOR HEALTH CARE**
By this document I intend to create a durable power of attorney for health care. This power of attorney shall not be affected by my disability or incompetence and shall continue in full force and effect until revoked or terminated as set forth in paragraph 9.
3. **GENERAL STATEMENT OF AUTHORITY GRANTED**
Subject to any limitations in this document, I hereby grant to my agent full power and authority to make health care decisions for me to the same extent that I could make such decisions for myself if I had the capacity to do so. In exercising this authority, my agent shall make health care decisions that are consistent with my desires as stated in this document or otherwise made known to my agent, including, but not limited to, my desires concerning obtaining or refusing or withdrawing life-prolonging care, treatment, services and procedures. Provided, however, my agent may not consent, without court approval, to any procedure referred to in R.C.W. 11.92.040(3) that requires court approval before a guardian may consent to such.
4. **STATEMENT OF DESIRES, SPECIAL PROVISIONS, AND LIMITATIONS**
In exercising the authority under this durable power of attorney for health care, my agent shall act consistently with my desires and is subject to the special provisions and limitations stated in any living will which I have executed.
5. **INSPECTION AND DISCLOSURE OF INFORMATION RELATING TO MY PHYSICAL OR MENTAL HEALTH**
Subject to any limitations in this document, my agent has the power and authority to do all of the following:
   a. Request, review, and receive any information, verbal or written, regarding my physical or mental health, including, but not limited to, medical and hospital records.
   b. Execute on my behalf any releases or other documents that may be required in order to obtain this information.
   c. Consent to the disclosure of this information.
   d. Consent to the donation of any of my organs for medical purposes.

Durable Power Of Attorney for Health Care

6. SIGNING DOCUMENTS, WAIVERS AND RELEASES

Where necessary to implement the health care decisions that my agent is authorized by this document to make, my agent has the power and authority to execute on my behalf all of the following:

a. Documents titled or purporting to be a "Refusal to Permit Treatment" and "Leaving Hospital Against Medical Advice".

b. Any necessary waiver or release from liability required by a hospital or physician.

c. Any documents pursuant to the power of substitution in the premises, which I hereby, grant to my agent subject to my choice of alternates below.

7. DESIGNATION OF ALTERNATE AGENTS

If the person designated as my agent in paragraph 1 is not available or becomes ineligible to act as my agent to make a health care decision for me or loses the mental capacity to make health care decisions for me, or if I revoke that person's appointment or authority to act as my agent to make health care decisions for me, then I designate and appoint the following persons to serve as my agent to make health care decisions for me as authorized in this document, such persons to serve in the order listed below:

a. First Alternate Agent: None At This Time.
(Insert name, address and telephone number of first alternate agent)

b. Second Alternate Agent: None At this time
(Insert name, address and telephone number of second alternate agent)

8. PRIOR DESIGNATIONS REVOKED

I revoke any prior durable power of attorney for health care.

9. TERMINATION

This power of attorney may be terminated by written notice, court approval of revocation, recording a notice with the County Auditor/Recorder, and shall be automatically revoked upon my death but only upon actual notice or knowledge of such by my agent.

10. APPLICABLE LAW

The laws of the State of Washington of the United States of America shall govern this power of attorney.

Dated 5/28/13 Jeanne J Hoffman

State of Washington,
County of Kitsap
ss.

INDIVIDUAL ACKNOWLEDGEMENT

I certify that I know or have satisfactory evidence that Jeanne Hoffman is the person who appeared before me, and said person acknowledged that she signed this instrument and acknowledged it to be her free and voluntary act for the uses and purposes mentioned in the instrument.

Financial Agreement & Consent for Disclosure

By signing below, I agree:

1. That Harborview Medical Center and Clinics (HMC), Northwest Hospital & Medical Center and Clinics (NWH), University of Washington Medical Center and Clinics (UWMC), Valley Medical Center and Clinics (VMC), UW Medicine Neighborhood Clinics (UWNC), UW Medicine Sports Medicine Clinic (UW Sports Med), Hall Health Primary Care Center (HHPCC), and University of Washington Physicians (UWP) (collectively known as "UW Medicine"), University of Washington School of Dentistry (SOD), Children's University Medical Group (CUMG) and Seattle Cancer Care Alliance (SCCA) may share any financial information I provide to facilitate payment.
2. To pay UW Medicine, SOD, CUMG and/or SCCA for balances remaining after insurance benefits are paid, unless prohibited by law or contract.
3. To notify UW Medicine, SOD, CUMG and/or SCCA of changes to my insurance coverage and/or address.
4. That UW Medicine, SOD, CUMG and/or SCCA may impose reasonable interest, late charges, costs and/or reasonable attorney's fees should my account become delinquent.
5. To notify UW Medicine, SOD, CUMG, and/or SCCA if I am not able to pay my balance due within 30 days of receipt.
6. To apply to other financial programs that I may qualify for as requested by UW Medicine, SOD, CUMG and/or SCCA, should I be unable to pay my account.
7. That any lawsuit for collection of my account may be brought in King County, Washington.
8. To receiving information related to treatment, payment or health care operations, including receiving autodialed and prerecorded message calls and/or text messages, at any number I have provided or, if not current, to any number I am reasonably found to be associated with.
9. That UW Medicine may, at its discretion, disclose to appropriate parties my medical records or information from my records for treatment, payment and health care operation purposes.

By signing this page, I acknowledge that I have read and agreed to the terms on both sides of this form.

FINANCIAL AGREEMENT & CONSENT FOR DISCLOSURE

U1865

UH1865 REV MAR 16

WHITE – MEDICAL RECORD
CANARY – PATIENT

Financial Agreement & Consent for Disclosure

I understand that:

- Each UW Medicine entity, SOD, CUMG, and/or SCCA bill separately for their services.
- Patients who receive outpatient services at UWMC or HMC sites generally receive two bills: one bill from the physician or other provider (for the costs of the professional services) and one bill from the hospital (for the facility costs, i.e. building, equipment, supplies, staff time). Each of these bills may incur a co-payment or co-insurance responsibility, depending on my insurance coverage. The exact amount of the co-insurance or co-payment will depend upon the actual services provided and the coverage provisions of any insurance I have. Sometimes patients will pay more for certain outpatient services and procedures at hospital-based outpatient locations. The amount will depend on my insurance. I may review my insurance benefits or contact my insurer to learn what my policy will pay and what out-of-pocket expenses I may need to pay. At my request, clinic staff will provide me with an estimate of the billed charges for outpatient services I am likely to receive.
- UW Medicine requests and, if I provide it, will use my Social Security Number to facilitate access to any potential federal or state health care benefits, to verify my identity, or to facilitate discharge planning. Providing my Social Security Number is voluntary except when applying for state and federal health care benefits.
- My Consumer Credit Report information may be accessed for the following reasons: to make determination of available financial assistance, assistance in managing the payment process, or if I report that my identity has been stolen.

Statement to Permit Payment of Medicare or Insurance Benefits to Provider

I request payment of authorized Medicare or insurance benefits for any services furnished to me by UW Medicine, SOD, CUMG, and/or SCCA. I authorize any holder of medical and other information about me to release to Medicare [and its agents] or other insurance providers any information needed to determine these benefits for related services.

CARE AGREEMENT

9/2017 10:05:40 AM UWIF

This form contains facts you should know about your health care at UW Medicine and from Children's University Medical Group, University of Washington Dentists and Oral Surgeons, and Seattle Cancer Care Alliance. If there is any part of this form that is unclear you can ask questions about it. At the bottom of the form there is a place for you to sign your name so that we know you have read this form (or had it read to you) and agree to receive health care from us.

UW Medicine includes:

- Harborview Medical Center and Clinics
- Northwest Hospital & Medical Center and Clinics
- University of Washington Medical Center and Clinics
- Airlift Northwest
- UW Medicine Neighborhood Clinics
- UW Physicians Sports Medicine Clinic
- Hall Health Primary Care Center,
- Summit Cardiology, and
- UW Physicians

Your health care team consists of medical doctors, doctors in training (residents and fellows), nurses, other health care professionals, and students of the health sciences. They will work together to diagnose and treat you. You will have an attending physician. This is the doctor who has primary responsibility for your care.

Photographs, videotapes, or other images of you may be used to keep a record of your care and treatment (including surgery). These images may become part of your medical record. Part of your care may take place through telemedicine technology, which may mean 1) live video between your care team members *(in which you also may be involved)*, or 2)"remote" review by your care team of the images described above.

SIGNATURE

By signing below, it shows that you have read this document and agree to receive health care from UW Medicine. If there is any part of this form that is unclear, be sure to ask questions about it.

Patient Information for Inclusion in the UW Medicine Inpatient Facility Directory

Please Read this Statement Carefully

I understand that I have a choice as to whether or not to be included in the UW Medicine entity's facility directory. My decision is indicated by marking a box and signing this form.

☑ **YES, please include me in the Inpatient Facility Directory.** The hospital has informed me that my name, location and general health condition will be included in its hospital facility directory. This information will be made available to people who ask for me by name such as my relatives, friends and fellow employees

- Harborview Medical Center
- Northwest Hospital and Medical Center
- University of Washington Medical Center / Seattle Cancer Care Alliance
- Valley Medical Center

If I have provided my religious affiliation to UW Medicine in the past or if I provide my religious affiliation to UW Medicine now, I authorize its disclosure to clergy of my religious affiliation. Disclosure of my religious affiliation may result in a visit from a clergy member of my affiliation while I am being treated at UW Medicine.

If you have provided your religious affiliation to UW Medicine in the past and do not want a visit from a clergy member of your affiliation, please inform the registration staff.

☐ **NO, please do not include me in the Inpatient Facility Directory.** I do not want my name, location and general health condition included in the UW Medicine entity's Inpatient Facility Directory. **If this is my choice, I understand it is my responsibility to notify family and friends of my location and phone number if I wish them to contact me. I also understand that by choosing not to be in the directory, UW Medicine will be unable to deliver items *(for example, flowers and gifts)* addressed to me.**

For Staff Use Only

☐ **ADMIN OPT-OUT:** Please provide reason for Administrative Opt-Out

☐ Crime Victim ☐ Employee ☐ Incarcerated Patient
☐ Involuntary Commitment ☐ Unable to Interview Patient ☐ Media Interest

By signing below, it shows that you have read this document. If there is any part of this form that is unclear, be sure to ask questions about it.

Date	Signature (Patient or Person Authorized to Give Authorization)
9/29/17	Jeanne E Hoffman

IF SIGNED BY PERSON OTHER THAN PATIENT, CHECK RELATIONSHIP TO PATIENT:

☐ 1. Guardian ☐ 2. Durable Power of Attorney for Health Care ☐ 3. Spouse/registered domestic partner
☐ 4. Adult Child(ren) ☐ 5. Parent(s) ☐ 6. Adult Brother(s)/Sister(s)

FOR MINOR PATIENTS:

☐ 1. Guardian/legal custodian ☐ 2. Court-authorized person for child in out-of-home placement ☐ 3. Parent(s)
☐ 4. Holder of signed authorization from parent(s) ☐ 5. Adult representing self to be a relative responsible for the minor's health

LegalDescription (abbreviated): Power of Attorney
Addl'. legal is on page 0 Assessor's Property Tax Parcel/Account#

1. **DESIGNATION OF ATTORNEY-IN-FACT AS HEALTH CARE AGENT**
I, Jean Leonie Caillet Allain Hoffman, 245 High School Rd NW-Apt 2, Bainbridge Island, WA-98110 (Insert name, and address), do hereby designate and appoint Louis Charles Hoffmann Allain, 245 High School Rd, NW-2 Bainbridge Is WA-98110 (Insert name, address, and telephone of designated health care agent), as my attorney-in-fact (agent), to make health care decisions for me as authorized in this document. For the purposes of this document, "health care decision" means consent, refusal of consent, or withdrawal of consent to any care, treatment, non-treatment, as provided in Chapter 7.70 RCW, service, or procedure to maintain, diagnose, or treat an individual's physical condition.
2. **CREATION OF DURABLE POWER OF ATTORNEY FOR HEALTH CARE**
By this document I intend to create a durable power of attorney for health care. This power of attorney shall not be affected by my disability or incompetence and shall continue in full force and effect until revoked or terminated as set forth in paragraph 9.
3. **GENERAL STATEMENT OF AUTHORITY GRANTED**
Subject to any limitations in this document, I hereby grant to my agent full power and authority to make health care decisions for me to the same extent that I could make such decisions for myself if I had the capacity to do so. In exercising this authority, my agent shall make health care decisions that are consistent with my desires as stated in this document or otherwise made known to my agent, including, but not limited to, my desires concerning obtaining or refusing or withdrawing life-prolonging care, treatment, services and procedures. Provided, however, my agent may not consent, without court approval, to any procedure referred to in R.C.W. 11.92.040(3) that requires court approval before a guardian may consent to such.
4. **STATEMENT OF DESIRES, SPECIAL PROVISIONS, AND LIMITATIONS**
In exercising the authority under this durable power of attorney for health care, my agent shall act consistently with my desires and is subject to the special provisions and limitations stated in any living will which I have executed.
5. **INSPECTION AND DISCLOSURE OF INFORMATION RELATING TO MY PHYSICAL OR MENTAL HEALTH**
Subject to any limitations in this document, my agent has the power and authority to do all of the following:
   a. Request, review, and receive any information, verbal or written, regarding my physical or mental health, including, but not limited to, medical and hospital records.
   b. Execute on my behalf any releases or other documents that may be required in order to obtain this information.
   c. Consent to the disclosure of this information.
   d. Consent to the donation of any of my organs for medical purposes.

Durable Power Of Attorney for Health Care

6. SIGNING DOCUMENTS, WAIVERS AND RELEASES

Where necessary to implement the health care decisions that my agent is authorized by this document to make, my agent has the power and authority to execute on my behalf all of the following:

a. Documents titled or purporting to be a "Refusal to Permit Treatment" and "Leaving Hospital Against Medical Advice".

b. Any necessary waiver or release from liability required by a hospital or physician.

c. Any documents pursuant to the power of substitution in the premises, which I hereby, grant to my agent subject to my choice of alternates below.

7. DESIGNATION OF ALTERNATE AGENTS

If the person designated as my agent in paragraph 1 is not available or becomes ineligible to act as my agent to make a health care decision for me or loses the mental capacity to make health care decisions for me, or if I revoke that person's appointment or authority to act as my agent to make health care decisions for me, then I designate and appoint the following persons to serve as my agent to make health care decisions for me as authorized in this document, such persons to serve in the order listed below:

a. First Alternate Agent: None At this Time
(Insert name, address and telephone number of first alternate agent)

b. Second Alternate Agent: None At this Time
(Insert name, address and telephone number of second alternate agent)

8. PRIOR DESIGNATIONS REVOKED

I revoke any prior durable power of attorney for health care.

9. TERMINATION

This power of attorney may be terminated by written notice, court approval of revocation, recording a notice with the County Auditor/Recorder, and shall be automatically revoked upon my death but only upon actual notice or knowledge of such by my agent.

10. APPLICABLE LAW

The laws of the State of Washington of the United States of America shall govern this power of attorney.

Dated 5/23/13 J.L.H. Jeanne F Hoffman

State of Washington,)
) ss.
County of Kitsap)

INDIVIDUAL ACKNOWLEDGEMENT

I certify that I know or have satisfactory evidence that Jeanne Hoffman is the person who appeared before me, and said person acknowledged that she signed this instrument and acknowledged it to be her free and voluntary act for the uses and purposes mentioned in the instrument.

AN IMPORTANT MESSAGE FROM MEDICARE ABOUT YOUR RIGHTS

DEPARTMENT OF HEALTH & HUMAN SERVICES
Centers for Medicare & Medicaid Services
OMB Approval No. 0938-0692

AS A HOSPITAL INPATIENT, YOU HAVE THE RIGHT TO:

- Receive Medicare covered services. This includes medically necessary hospital services and services you may need after you are discharged, if ordered by your doctor. You have a right to know about these services, which will pay for them, and where you can get them.
- Be involved in any decisions about your hospital stay, and know who will pay for it.
- Report any concerns you have about the quality of care you receive to the Quality Improvement Organization listed here: Livanta LLC, 1-877-588-1123

YOUR MEDICARE DISCHARGE RIGHTS

Planning For Your Discharge: During your hospital stay hospital staff will be working with you to prepare for your safe discharge and arrange for services you may need after you leave the hospital. When you no longer need inpatient hospital care, your doctor or the hospital staff will inform you of your planned discharge date.

If you think you are being discharged too soon:

- You can talk to the hospital staff, your doctor and your managed care plan *(if you belong to one)* about your concerns.
- You also have the right to an appeal, that is, a review of your case by a Quality Improvement Organization (QIO). The QIO is an outside reviewer hired by Medicare to look at your case to decide whether you are ready to leave the hospital.
    - **If you want to appeal, you must contact the QIO no later than your planned discharge date and before you leave the hospital.**
    - If you do this, you will not have to pay for the services you receive during the appeal *(except for charges like copays and deductibles)*.
- If you do not appeal, but decide to stay in the hospital past your planned discharge date, you may have to pay for any services you receive after that date.

Step by step instructions for calling the QIO and filing an appeal are on page 2.

To speak with someone at the hospital about this notice, call 206 598 4310
Please sign and date here to show you received this notice and understand your rights.

STEPS TO APPEAL YOUR DISCHARGE

- **STEP 1**: You must contact the QIO no later than your planned discharge date and before you leave the hospital. If you do this, you will not have to pay for the services you receive during the appeal *(except for charges like copays and deductibles)*.
    - Here is the contact information for the QIO:
      Livanta LLC 1-877-588-1123
      Fax Appeals 1- 855-694-2929
      Fax *(all other review types)* **1-844-420-6672**

You can file a request for an appeal any day of the week.
Once you speak to someone or leave a message, your appeal has begun.

- Ask the hospital if you need help contacting the QIO.
- The name of this hospital is:

☐ HMC: Medicare Provider Number ☐ 50-0064 *(acute care)* ☐ 50-S064 *(psych)* ☐ 50-T064 *(rehab)*
☐ UWMC: Medicare Provider Number ☐ 50-0008 *(acute care)* ☐ 50-S008 *(psych)* ☐ 50-T008 *(rehab)*

- **STEP 2**: You will receive a detailed notice from the hospital or your Medicare Advantage or other Medicare managed care plan (if you belong to one) that explains the reasons they think you are ready to be discharged.
- **STEP 3**: The QIO will ask for your opinion. You or your representative need to be available to speak with the QIO, if requested. You or your representative may give the QIO a written statement, but you are not required to do so.
- **STEP 4**: The QIO will review your medical records and other important information about your case.
- **STEP 5**: The QIO will notify you of its decision within 1 day after it receives all necessary information.
    - If the QIO finds that you are not ready to be discharged, Medicare will continue to cover your hospital services.
    - If the QIO finds you are ready to be discharged, Medicare will continue to cover your services until noon of the day after the QIO notifies you of its decision.

IF YOU MISS THE DEADLINE TO APPEAL, YOU HAVE OTHER APPEAL RIGHTS:

- You can still ask the QIO or your plan *(if you belong to one)* for a review of your case:
    - If you have Original Medicare: Call the QIO listed above.
    - If you belong to a Medicare Advantage Plan or other Medicare managed care plan: Call your plan.
- If you stay in the hospital, the hospital may charge you for any services you receive after your planned discharge date.

For more information, call 1-800-MEDICARE (1-800-633-4227), or TTY: 1-877-486-2048.

DATE: SEP 2 1 2017 TIME: 1010 | Type of Service: ☐ Initial Visit ☒ Follow-up Visit ☐ Nurse-only Visit ☐ Other:

This section may be completed by the Nurse/MA/CNA or HBO Tech.

Patient Arrived: ☒ Ambulatory ☐ Cane ☐ Crutches ☒ Walker ☒ Wheelchair ☐ Stretcher ☐ Other:

Transfer Assistance: ☐ Hoyer Lift ☐ Manual ☐ Transfer Board ☐ Stretcher ☒ None ☐ Other:

Height: _____ inches | Weight: _____ lbs.

Source: ☐ Stated/Not Measured ☐ Measured ☒ Not measured | Source: ☐ Stated ☐ Measured

Accompanied by: SON

Patient Identification Verified: ☒ Yes | Secondary Verification Process: ☒ Yes DOB

Patient requires Transmission-Based Precautions? ☐ Yes ☒ No If yes, ☐ Airborne ☐ Droplet ☐ Contact

Vital Signs ☐ **HBO Visit** *(If this is an HBO Visit, skip this section as vital signs are captured on the HBO Treatment Record.)*

Temperature: 96 Pulse: 60 Respirations: 14 Blood pressure (mmHg): 110/44

If ordered by physician: Capillary Blood Glucose: _____ mg/dL *(Hospital's blood glucose reference range: _____ mg/dL)*

History Since Last Visit ☐ N/A *(If this is Patient's Initial Visit, check N/A and skip this section.)*

Added or deleted any medications: ☐ Yes ☒ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Any new allergies or adverse reactions: ☐ Yes ☒ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☒ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☒ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☐ Yes ☒ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed ☒ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☒ N/A

Has compression in place as prescribed: ☐ Yes ☐ No ☒ N/A Has offloading in place as prescribed: ☐ Yes ☐ No ☒ N/A

Blood glucose under control: ☐ Yes ☐ No ☒ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear. ☒ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☐ R ☐ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☐ **Yes** ☒ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES:

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: Margaret RN SEP 2 1 2017 Time: 1010

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non-wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☐ Yes ☒ No Location of pain:

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 10 **Duration of Pain:** ☐ Constant ☐ Intermittent

Character of Pain: ☐ Aching ☐ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy ☐ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☐ Medication ☐ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S ☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☐ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management

Modification to Pain Management

AFFIX PRODUCT LABELS

PROCEDURE NOTE/FINDINGS*

Patient has multiple ② calf/ankle ulcers (3 new)
per hosp → no dressing was done x ~ 7 days → pt
make excuses for not doing dressing

Dx:
R ② calf ulcer at dressing sites of ② calf

POST PROCEDURE/OPERATIVE DIAGNOSIS*:

☐ **Same as Pre-Procedure/Operative Diagnosis**

→ Significant tissue loss w/ multiple ulcers of R lower leg

ASSESSMENT

Wound: → the 3 ulcers are ② at calf/ankle w/ dark moist w/ cellulitis

Wounds are debrided → fresh tags → bleeding well
→ slower of granulation tissue

PLAN OF CARE

☐ **Refer to *Physician Orders* dated:** ☐ **See dictated note date:**

- Patient must do dressing at least 3x/week
- Continue same dressing

PCP aware.

DISCHARGE

☐ **Refer to *Patient or Caregiver Education and Encounter Discharge* form for Patient Education dated:**

AFFIX PRODUCT LABELS

PROCEDURE NOTE/FINDINGS*

two wounds on R ankle (lat - med)
One wound (large) on lateral R ankle
Patient is using bath brush to clean wounds
No problem at home

POST PROCEDURE/OPERATIVE DIAGNOSIS*:

☐ **Same as Pre-Procedure/Operative Diagnosis**

RE R lat. calf wound → significant tricky fibrin

ASSESSMENT

→ Debrided including SQ & tissue → good granulation tissues at base

lat - med R ankle wounds → very tricky fibrin built up → debrided including SQ tissue

PLAN OF CARE

☐ **Refer to *Physician Orders* dated:** → clean ☐ **See dictated note date:**

Dry wells. Bens & Medihoney at least 3X/week

RC 2 weeks

Assignment of Benefits (AOB)

I request that payment of my insurance benefits be made to Sound Health Medical Supply for any supplies or services furnished to be by Sound Health Medical Supply. I am responsible for any balance due that is not covered by my insurance. I understand any product received in my home, opened or unopened, cannot be returned. I authorize any holder of medical information about me to release to Sound Health Medical Supply any information needed to determine benefits payable for these supplies or services. Further, I authorize Sound Health Medical Supply to forward my medical records to the medical professionals in my care and/or make copies of said records. I acknowledge that I have received the policies and procedures and HIPPA information from Sound Health.

DATE: AUG 24 2017 **TIME:** | Type of Service: ☐ Initial Visit ☑ Follow-up Visit ☐ Nurse-only Visit ☐ Other:

This section may be completed by the Nurse/MA/CNA or HBO Tech.

Patient Arrived: ☑ Ambulatory ☐ Cane ☐ Crutches ☑ Walker ☐ Wheelchair ☐ Stretcher ☐ Other:

Transfer Assistance: ☐ Hoyer Lift ☐ Manual ☐ Transfer Board ☐ Stretcher ☑ None ☐ Other:

Height: 175 ~~inches~~ cm | Weight: 115.6 lbs.

Source: ☐ Stated ☑ Not Measured ☐ Measured ☐ Not measured | Source: ☐ Stated ☑ Measured

Accompanied by: Family - son

Patient Identification Verified: ☑ Yes Secondary Verification Process: ☑ Yes (DOB)

Patient requires Transmission-Based Precautions? ☐ Yes ☑ No If yes, ☐ Airborne ☐ Droplet ☐ Contact

Vital Signs ☐ **HBO Visit** *(If this is an HBO Visit, skip this section as vital signs are captured on the HBO Treatment Record.)*

Temperature: 96.9 °F. Pulse: 76 Respirations: 20 Blood pressure (mmHg): 130/66

If ordered by physician: Capillary Blood Glucose: ____ mg/dL *(Hospital's blood glucose reference range: ____ mg/dL)*

History Since Last Visit ☐ N/A *(If this is Patient's Initial Visit, check N/A and skip this section.)*

Added or deleted any medications: ☐ Yes ☑ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Any new allergies or adverse reactions: ☐ Yes ☑ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☑ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☑ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☐ Yes ☑ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed: ☑ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☑ N/A

Has compression in place as prescribed: ☐ Yes ☐ No ☑ N/A Has offloading in place as prescribed: ☐ Yes ☐ No ☑ N/A

Blood glucose under control: ☐ Yes ☐ No ☑ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear. ☑ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☑ R ☑ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☑ **Yes** ☐ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES:

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: [signature], RN Date: AUG 24 2017 Time: 1015

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non-wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☑ Yes ☐ No Location of pain: wound areas

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 (10) **Duration of Pain:** ☑ Constant ☐ Intermittent

Character of Pain: ☐ *Aching* ☑ *Burning* ☐ *Cramping* ☐ *Difficult to Pinpoint* ☐ *Dull* ☐ *Easy to Pinpoint* ☐ *Exhausting* ☐ *Heavy* ☐ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☑ Medication ☐ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S ☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☐ Adequate ☑ Inadequate

Patient's Stated Goals for Pain Management ↑ rest.

Modification to Pain Management

Any new allergies or adverse reactions: ☐ Yes ☒ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☒ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☒ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☐ Yes ☒ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed: ☒ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☒ N/A

Has compression in place as prescribed: ☐ Yes ☐ No ☒ N/A Has offloading in place as prescribed: ☐ Yes ☐ No ☒ N/A

Blood glucose under control: ☐ Yes ☐ No ☒ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear. ☒ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☐ R ☐ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☒ **Yes** ☐ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES:

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: _____ Date: AUG 17 2017 Time: 1025

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non-wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☒ Yes ☐ No Location of pain: @ LL

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 10 **Duration of Pain:** ☒ Constant ☐ Intermittent

Character of Pain: ☐ Aching ☐ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy ☐ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☐ Tiring ☒ Other Tears come out of my face

Pain Management and Medication: ☒ Medication ☐ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S ☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☐ Adequate ☒ Inadequate

Patient's Stated Goals for Pain Management To not cry

Modification to Pain Management we are trying to establish Etiology

NURSE'S NOTES:

OR Lee removed large areas of calcified tissue within the (2) calf wounds we sent a piece of tissue for biopsy we ordered an xray. When pt was heavily sedated she Cooperated pt. we got her to a chair. checked her VS which were stable pt given a cup of juice and sense she had not eaten yet today. Pt left ambulatory c walker within 10min

HOFFMAN, JEANNE LEONIE
CASE #: SN-17-03434
MRN: U8170135
Sex: F, DOB: 1/6/1925
Collected Date: 8/17/2017
Received Date: 8/17/2017
ASN/CSN: 1818721272

FINAL DIAGNOSIS:

A) Left lat calf, procedure not specified:
- Granulation tissue associated with fibrin, necroinflammatory debris, and underlying fibrous stroma with focal dystrophic calcifications, consistent with sampling of a chronic ulcer bed.
- Negative for neoplasm.
- Multiple levels examined.

COMMENT:
If there is clinical suspicion of a more significant lesion or process, additional sampling is recommended if clinically indicated. A Von Kossa stain highlights focal calcium deposits with appropriately staining controls, supporting the above diagnosis.

CLINICAL DATA:
Left lateral calf ulcer present x 6 months. Calcified tissue present. 40-year history of wounds on this calf. Rule out malignancy. ICD 10 L97.322, L97.222.

GROSS DESCRIPTION:
A) Received in formalin labeled “Hoffman, Jeanne Leonie; A. left lateral calf” is a 0.8 x 0.4 x 0.3 cm shave of slightly ragged tan possible skin. The resection margin is inked blue. It is bisected and submitted entirely in A1. (CXH/pwt)

Oname Burlingame MD, PhD
Pathologist
Electronically signed 08/18/2017

In compliance with CMS regulations, the pathologist's signature on this report indicates that the case has been personally reviewed, and the diagnosis made or confirmed by, the Attending Pathologist. Microscopic examination was used to arrive at the diagnosis unless indicated otherwise. Testing Location: Northwest Hospital and Medical Center, 1550 N 115th, , Seattle, WA 98133 Ph: 206-668-1779 Fax: 206-668-1163.

HOFFMAN, JEANNE LEONIE

DOB: 01/06/1925
MRN: U8170135

Study Date: 08/17/2017 12:05
Accession #: 8418341 **Pt Type:** O
Account #: 1818914496
Pt. Location:

XR Tibia Fibula 2 Views Left

Referring Provider:
Luu, Paul, MD
1560 N 115TH ST
SUITE 201
SEATTLE, WA 98133

EXAMINATION:
Left tibia-fibula, 2 views

CLINICAL INFORMATION:
Chronic open wound nonhealing ulcer, fat layer exposed, left calf.

COMPARISON STUDY:
None

FINDINGS:
The bones are diffusely osteoporotic appearing.
Alignment is within normal limits.
There is no focal osseous lesion or lytic/destructive process. No definite periosteal reaction. On the frontal view, prominent soft tissue cutaneous erosive process with some lucent tracking of gas in the fascial planes of the lateral soft tissues overlying the distal 3rd of the fibula but no definite underlying bony abnormality is seen. The ankle joint and knee joint as visualized are unremarkable. There is some soft tissue cutaneous or subcutaneous calcification at the level of the midcalf especially laterally, nonspecific but perhaps related to chronic induration from venous insufficiency.

IMPRESSION:
Soft tissue abnormalities as described above. No bony findings suspicious for osteomyelitis.

Dictated and verified by: Gregory Allen, MD Via Radiology 08/17/2017 13:26

Assignment of Benefits (AOB)

I request that payment of my insurance benefits be made to Sound Health Medical Supply for any supplies or services furnished to be by Sound Health Medical Supply. I am responsible for any balance due that is not covered by my insurance. I understand any product received in my home, opened or unopened, cannot be returned. I authorize any holder of medical information about me to release to Sound Health Medical Supply any information needed to determine benefits payable for these supplies or services. Further, I authorize Sound Health Medical Supply to forward my medical records to the medical professionals in my care and/or make copies of said records. I acknowledge that I have received the policies and procedures and HIPPA information from Sound Health.

DATE: AUG 10 2017 **TIME:** 1015 | Type of Service: ☐ Initial Visit ☑ Follow-up Visit ☐ Nurse-only Visit ☐ Other:

This section may be completed by the Nurse/MA/CNA or HBO Tech.

Patient Arrived: ☑ Ambulatory ☐ Cane ☐ Crutches ☐ Walker ☐ Wheelchair ☐ Stretcher ☐ Other:

Transfer Assistance: ☐ Hoyer Lift ☐ Manual ☐ Transfer Board ☐ Stretcher ☑ None ☐ Other:

Height: _____ inches | Weight: 117.4 lbs.

Source: ☐ Stated/Not Measured ☐ Measured ☑ Not measured | Source: ☐ Stated ☒ Measured

Accompanied by: son

Patient Identification Verified: ☑ Yes Secondary Verification Process: ☑ Yes DOB

Patient requires Transmission-Based Precautions? ☐ Yes ☑ No If yes, ☐ Airborne ☐ Droplet ☐ Contact

Vital Signs ☐ **HBO Visit** *(If this is an HBO Visit, skip this section as vital signs are captured on the HBO Treatment Record.)*

Temperature: 97.6 Pulse: 60 Respirations: 16 Blood pressure (mmHg): 140/80

If ordered by physician: Capillary Blood Glucose: _____ mg/dL *(Hospital's blood glucose reference range: _____ mg/dL)*

History Since Last Visit ☐ N/A *(If this is Patient's Initial Visit, check N/A and skip this section.)*

Added or deleted any medications: ☐ Yes ☑ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Any new allergies or adverse reactions: ☐ Yes ☑ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☑ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☑ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☐ Yes ☑ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed: ☑ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☑ N/A

Has compression in place as prescribed: ☐ Yes ☐ No ☑ N/A Has offloading in place as prescribed: ☐ Yes ☐ No ☑ N/A

Blood glucose under control: ☐ Yes ☑ No ☐ N/A Comments:

FOOTWEAR in place on this visit - Check R (right) or L (left) to signify the type of footwear. ☑ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☐ R ☐ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☑ **Yes** ☐ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES:

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: _____ Date: AUG 10 2017 Time: 1015

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non-wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☐ Yes ☐ No Location of pain: leg pain

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 10 **Duration of Pain:** ☐ Constant ☐ Intermittent

Character of Pain: ☐ Aching ☐ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy ☑ Sharp ☑ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☑ Tiring ☐ Other

Pain Management and Medication: ☐ Medication ☑ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S ☐ Leg Drop or Elevation ☐ Other: Ibuprofen, TCH3

Is Current Pain Management Adequate?: ☑ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management 7

Modification to Pain Management

AFFIX PRODUCT LABELS

PROCEDURE NOTE/FINDINGS*

Patient dx pain at R medial distal calf wound
→ did not let her son to bandage to remove fibrin
Ø fever
Rx R medial distal calf wound: fibrin with
Ø calcified tissue at posterior calf

POST PROCEDURE/OPERATIVE DIAGNOSIS*

☐ Same as Pre-Procedure/Operative Diagnosis

→ after debrided c curette including subcutaneous tissue → R more healthy granulation tissue

ASSESSMENT

two wounds → covered with fibrin
→ debrided → scanty bleed
Ø dry eschar Ø cellulitis

PLAN OF CARE

☐ Refer to *Physician Orders* dated: ☐ See dictated note date:

Saline, big wound - irrigated
Dress all wound with Medihoney 3-4 x/week
Next week → will remove calcified tissue under local anesthesia

RTC 1 week

DISCHARGE

☐ Refer to *Patient or Caregiver Education and Encounter Discharge* form for Patient Education dated:

DATE: AUG 03 2017 TIME: 1100 | Type of Service: ☐ Initial Visit ☒ Follow-up Visit ☐ Nurse-only Visit ☐ Other:

This section may be completed by the Nurse/MA/CNA or HBO Tech.

Patient Arrived: ☐ Ambulatory ☐ Cane ☐ Crutches ☒ Walker ☐ Wheelchair ☐ Stretcher ☐ Other:

Transfer Assistance: ☐ Hoyer Lift ☐ Manual ☐ Transfer Board ☐ Stretcher ☒ None ☐ Other:

Height: _____ inches
Source: ☐ Stated/Not Measured ☐ Measured ☒ Not measured

Weight: 118 lbs.
Source: ☐ Stated ☑ Measured

Accompanied by: Son

Patient Identification Verified: ☒ Yes Secondary Verification Process: ☒ Yes DOB

Patient requires Transmission-Based Precautions? ☐ Yes ☒ No If yes, ☐ Airborne ☐ Droplet ☐ Contact

Vital Signs ☐ **HBO Visit** *(If this is an HBO Visit, skip this section as vital signs are captured on the HBO Treatment Record.)*

Temperature: 97.6 Pulse: 72 Respirations: 16 Blood pressure (mmHg): 116/58

If ordered by physician: Capillary Blood Glucose: _____ mg/dL *(Hospital's blood glucose reference range: _____ mg/dL)*

History Since Last Visit ☐ N/A *(If this is Patient's Initial Visit, check N/A and skip this section.)*

Added or deleted any medications: ☐ Yes ☑ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Any new allergies or adverse reactions: ☐ Yes ☑ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☑ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☑ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☐ Yes ☑ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed: ☑ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☑ N/A

Has compression in place as prescribed: ☐ Yes ☐ No ☑ N/A Has offloading in place as prescribed: ☐ Yes ☐ No ☑ N/A

Blood glucose under control: ☐ Yes ☐ No ☑ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear. ☑ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☐ R ☐ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☑ **Yes** ☐ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES:

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: _____ Date: AUG 03 2017 Time: 1100

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non-wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☑ Yes ☐ No Location of pain: Wound bed

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 (10) **Duration of Pain:** ☒ Constant ☐ Intermittent

Character of Pain: ☐ Aching ☐ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy
☑ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☐ Medication ☑ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S
☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☐ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management ø

Modification to Pain Management

AFFIX PRODUCT LABELS

PROCEDURE NOTE/FINDINGS*

Sara has difficult time to do dress at home → (?) secondary to pain

RE: ① lateral distal calf wound: ⊖ Friable fibrin ⊖ Still moderate necrotic tissue & slough c foul odor

POST-PROCEDURE/OPERATIVE DIAGNOSIS*:

☐ Same as Pre-Procedure/Operative Diagnosis

① lat calf wound ⊖ Friable fibrin

ASSESSMENT

① medial ankle → ⊖ Friable fibrin

② ovian cellulitis

Use #15 blade → removed some necrotic tissue → a lot of pain

PLAN OF CARE

☐ Refer to *Physician Orders* dated: ☐ See dictated note date:

WC cellulitis & debrided fibrin. Build up of two wounds Dress wound c Santyl to necrotic tissue & Aquaphor to dried area. Encourage him to use paste mouth to stimulate wound

Prescription for Keflex #3 (460)

RC cellulitis

DISCHARGE

☐ Refer to *Patient or Caregiver Education and Encounter Discharge* form for Patient Education dated:

JUL 20 2017

DATE: **TIME:** 1050 Type of Service: ☐ Initial Visit ☑ Follow-up Visit ☐ Nurse-only Visit ☐ Other:

This section may be completed by the Nurse/MA/CNA or HBO Tech.

Patient Arrived: ☐ Ambulatory ☐ Cane ☐ Crutches ☑ Walker ☐ Wheelchair ☐ Stretcher ☐ Other:

Transfer Assistance: ☐ Hoyer Lift ☐ Manual ☐ Transfer Board ☐ Stretcher ☑ None ☐ Other:

Height: _____ inches
Source: ☐ Stated/Not Measured ☐ Measured ☑ Not measured

Weight: 120.6 lbs.
Source: ☐ Stated ☑ Measured

Accompanied by: son

Patient Identification Verified: ☑ Yes Secondary Verification Process: ☑ Yes DOB

Patient requires Transmission-Based Precautions? ☐ Yes ☑ No If yes, ☐ Airborne ☐ Droplet ☐ Contact

Vital Signs ☐ **HBO Visit** *(If this is an HBO Visit, skip this section as vital signs are captured on the HBO Treatment Record.)*

Temperature: 97.7 Pulse: 72 Respirations: 16 Blood pressure (mmHg): 164/80

If ordered by physician: Capillary Blood Glucose: _____ mg/dL *(Hospital's blood glucose reference range: _____ mg/dL)*

History Since Last Visit ☐ N/A *(If this is Patient's Initial Visit, check N/A and skip this section.)*

Added or deleted any medications: ☐ Yes ☑ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Any new allergies or adverse reactions: ☐ Yes ☑ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☑ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☑ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☐ Yes ☒ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed: ☒ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☑ N/A

Has compression in place as prescribed: ☐ Yes ☐ No ☒ N/A Has offloading in place as prescribed: ☐ Yes ☐ No ☒ N/A

Blood glucose under control: ☐ Yes ☐ No ☒ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear ☑ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☐ R ☐ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☑ **Yes** ☐ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES:

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: Date: JUL 20 2017 Time: 1050

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non-wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☑ Yes ☐ No Location of pain: L ankle / calf

Current Pain Level: ☐ Insensate 0 1 2 3 4 (5) 6 7 8 9 10 **Duration of Pain:** ☐ Constant ☒ Intermittent

Character of Pain: ☐ Aching ☐ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy ☐ Sharp ☒ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☑ Medication ☐ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S ☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☑ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management Ø

Modification to Pain Management Ø

AFFIX PRODUCT LABELS

PROCEDURE NOTE/FINDINGS*

Two ulcer of ① ankle
One large ulcer of lateral distal calf → ② calcified tissues → like bone
All ulcers → covered with black film

POST-PROCEDURE/OPERATIVE DIAGNOSIS*:

☐ Same as Pre–Procedure/Operative Diagnosis

ASSESSMENT

under local anesthesia → ulcer scaped + biopsy
→ allowed the calcified material of calf wound → as much as possible
Use #11 blade → debrided all dead

PLAN OF CARE

☐ Refer to *Physician Orders* dated:

☐ See dictated note date:

- Dress all wound c alginate + collagen
- Monitor for bleeding

pt tolerated

DISCHARGE

☐ Refer to *Patient or Caregiver Education and Encounter Discharge* form for Patient Education dated:

Physician or Physician Extender Signature: _____ Date: JUL 20 2017 Time: 12⁰⁰

Other Footwear: _____ ☐ R ☐ L

Pain present now? ☐ **Yes** ☒ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES:

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: _____ Date: JUL 05 2017 Time: 1010

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non-wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☐ Yes ☐ No Location of pain:

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 10 **Duration of Pain:** ☐ Constant ☐ Intermittent

Character of Pain: ☐ Aching ☐ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy ☐ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☐ Medication ☐ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S ☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☐ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management

Modification to Pain Management

CHIEF COMPLAINT

Diabetic foot ulcers
R & L foot

☐ Refer to *Physician Progress Note* dated: _____ *(If billing an E&M on same date of a procedure.)*

SUBJECTIVE FINDINGS

wants Santyl.

OBJECTIVE FINDINGS

① Dist-calf ulcer - calloused base
- some granulation on medial aspect, not to medial wall

PRE-PROCEDURE/OPERATIVE DIAGNOSIS*

WOUND/ULCER DEBRIDEMENT

☑ Refer to *Nursing Wound/Ulcer Assessment* for wound/ulcer details–I have reviewed and concur:

DATE: JUN 21 2017 TIME: 1020 Type of Service: ☐ Initial Visit ☒ Follow-up Visit ☐ Nurse-only Visit ☐ Other:

This section may be completed by the Nurse/MA/CNA or HBO Tech.

Patient Arrived: ☐ Ambulatory ☐ Cane ☐ Crutches ☒ Walker ☐ Wheelchair ☐ Stretcher ☐ Other:

Transfer Assistance: ☐ Hoyer Lift ☐ Manual ☐ Transfer Board ☐ Stretcher ☒ None ☐ Other:

Height: _____ inches
Source: ☐ Stated/Not Measured ☐ Measured ☒ Not measured

Weight: _____ lbs. unable.
Source: ☐ Stated ☐ Measured

Accompanied by: son

Patient Identification Verified: ☒ Yes Secondary Verification Process: ☒ Yes DOB

Patient requires Transmission-Based Precautions? ☐ Yes ☒ No If yes, ☐ Airborne ☐ Droplet ☐ Contact

Vital Signs ☐ **HBO Visit** *(If this is an HBO Visit, skip this section as vital signs are captured on the HBO Treatment Record.)*

Temperature: 97.9 Pulse: 60 Respirations: 16 Blood pressure (mmHg): 110/60

If ordered by physician: Capillary Blood Glucose: _____ mg/dL *(Hospital's blood glucose reference range: _____ mg/dL)*

History Since Last Visit ☐ N/A *(If this is Patient's Initial Visit, check N/A and skip this section.)*

Added or deleted any medications: ☐ Yes ☒ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Any new allergies or adverse reactions: ☐ Yes ☒ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☒ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☒ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☐ Yes ☒ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed: ☒ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☒ N/A

Has compression in place as prescribed: ☐ Yes ☐ No ☒ N/A Has offloading in place as prescribed: ☐ Yes ☐ No ☒ N/A

Blood glucose under control: ☐ Yes ☐ No ☒ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear. ☐ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☒ R ☒ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☐ **Yes** ☒ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES:

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: _____ Date: JUN 21 2017 Time: 1020

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non-wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☐ Yes ☒ No Location of pain:

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 10 **Duration of Pain:** ☐ Constant ☐ Intermittent

Character of Pain: ☐ Aching ☐ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy
☐ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☐ Medication ☐ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S
☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☐ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management

Modification to Pain Management

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☒ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☒ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☐ Yes ☒ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed: ☒ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☒ N/A

Has compression in place as prescribed: ☐ Yes ☐ No ☐ N/A Has offloading in place as prescribed: ☒ Yes ☐ No ☒ N/A

Blood glucose under control: ☐ Yes ☐ No ☒ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear. ☒ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☒ R ☒ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☒ **Yes** ☐ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES:

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: _____ Date: JUN 07 2017 Time: 1015

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non-wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☒ Yes ☐ No Location of pain: (L) Lower leg

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 10 **Duration of Pain:** ☐ Constant ☐ Intermittent

Character of Pain: ☐ Aching ☐ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy
☐ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☒ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☒ Medication ☐ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S
☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☐ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management

Modification to Pain Management

© 2012–2014 by Healogics, Inc. All Rights Reserved.

Patient: Ms. Jeanne Hoffman - U8170135

Patient:
Ms. Jeanne Hoffman - U8170135

SCCA Universal Screening Questionnaire:

Patient did not complete the Universal Screening Questionnaire.

SCCA Universal Screening - Overview:

The Seattle Cancer Care Alliance (SCCA) Universal Screening Questionnaire was created to comply with the Commission on Cancer (CoC) standard to screen all patients for psychosocial distress. We also know from patients' feedback that these services have been extremely helpful, particularly when introduced early on in their treatment.

The patient did not complete the questionnaire prior to the initial appointment at SCCA. It contained the following scales or questions:

- Functional Assessment of Cancer Therapy - General (FACT-G) scale
- 2 questions (GAD-2) from the Generalized Anxiety Disorder-7 questionnaire (GAD-7)
- 2 questions (PHQ-2) from the Patient Health questionnaire-9 (PHQ-9)
- 10 additional questions to screen for the need for chaplaincy, nutrition, social work, physical therapy, child-life specialist, and palliative care services
- Malnutrition Screening Tool (MST)

If you feel that the patient will benefit from completing this questionnaire, please contact Petr Horak at (206) 288-7175, or UniversalScreening@seattlecca.org.

If you have a question about Universal Screening at SCCA, please contact Elizabeth Loggers, M.D., Ph.D., Medical Director, Supportive Care, at (206) 667-7442 or eloggers@seattlecca.org.

Assignment of Benefits (AOB)

I request that payment of my insurance benefits be made to Sound Health Medical Supply for any supplies or services furnished to be by Sound Health Medical Supply. I am responsible for any balance due that is not covered by my insurance. I understand any product received in my home, opened or unopened, cannot be returned. I authorize any holder of medical information about me to release to Sound Health Medical Supply any information needed to determine benefits payable for these supplies or services. Further, I authorize Sound Health Medical Supply to forward my medical records to the medical professionals in my care and/or make copies of said records. I acknowledge that I have received the policies and procedures and HIPPA information from Sound Health.

Height: 175 cm inches | Weight: 127 lbs.

Source: ☐ Stated/Not Measured ☐ Measured ☐ Not measured | Source: ☐ Stated ☐ Measured

Accompanied by: SON

Patient Identification Verified: ☒ Yes Secondary Verification Process: ☒ Yes DOB

Patient requires Transmission-Based Precautions? ☐ Yes ☒ No If yes, ☐ Airborne ☐ Droplet ☐ Contact

Vital Signs ☐ **HBO Visit** *(If this is an HBO Visit, skip this section as vital signs are captured on the HBO Treatment Record.)*

Temperature: 98.2 Pulse: 76 Respirations: 16 Blood pressure (mmHg): 138/64

If ordered by physician: Capillary Blood Glucose: _____ mg/dL *(Hospital's blood glucose reference range: _____ mg/dL)*

History Since Last Visit ☒ N/A *(If this is Patient's Initial Visit, check N/A and skip this section.)*

Added or deleted any medications: ☐ Yes ☐ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Any new allergies or adverse reactions: ☐ Yes ☐ No *(If Yes, refer to Nurse for documentation on Medication Reconciliation)*

Had a fall or experienced change in activities of daily living that may increase risk of falls: ☐ Yes ☐ No
(If Yes, refer to Nurse who will rescreen for Falls Risk and initiate interventions per Nursing Plan of Care.)

Does the Patient display any signs or symptoms of abuse and/or neglect OR does patient feel unsafe in his/her environment since last visit? ☐ Yes ☐ No *(If Yes, notify Nurse, physician and hospital Social Services and document in Notes section below.)*

Hospitalized OR had any operative or other invasive procedures since last visit: ☐ Yes ☐ No
(If Yes, refer to Nurse for documentation on Patient Summary.)

Has dressing in place as prescribed: ☐ Yes ☐ No ☐ N/A Compliant with no smoking: ☐ Yes ☐ No ☐ N/A

Has compression in place as prescribed: ☐ Yes ☐ No ☐ N/A Has offloading in place as prescribed: ☐ Yes ☐ No ☐ N/A

Blood glucose under control: ☐ Yes ☐ No ☐ N/A Comments:

FOOTWEAR in place on this visit – Check R (right) or L (left) to signify the type of footwear. ☐ Footwear not applicable

Felt/Foam ☐ R ☐ L Regular Shoe ☐ R ☐ L Total Contact Cast ☐ R ☐ L Multipodus Splint/Boot ☐ R ☐ L Slipper ☐ R ☐ L
Wedge Shoe ☐ R ☐ L Removable Cast Walker/ Walking Boot ☐ R ☐ L Surgical Shoe with pressure relief insole ☐ R ☐ L
Other Footwear: _____ ☐ R ☐ L

Pain present now? ☐ **Yes** ☐ **No** ***(If Yes, refer to Nurse who will complete the Pain Assessment below.)***

NOTES:

Clinician (e.g., Nurse, MA, CNA, HBO Tech) Signature: Marjorie RN Tay Date: MAY 17 2017 Time: 1410

PAIN ASSESSMENT

This section is completed by the nurse if patient reports pain and a pain assessment has not otherwise been documented. If patient is receiving daily treatments, completion is required once a week or with a reported change in pain level.

☐ Non-wound related chronic pain referred to primary care provider for management plan

With Dressing Changes: ☐ Yes ☐ No Location of pain:

Current Pain Level: ☐ Insensate 0 1 2 3 4 5 6 7 8 9 10 **Duration of Pain:** ☐ Constant ☐ Intermittent

Character of Pain: ☐ Aching ☐ Burning ☐ Cramping ☐ Difficult to Pinpoint ☐ Dull ☐ Easy to Pinpoint ☐ Exhausting ☐ Heavy
☐ Sharp ☐ Shooting ☐ Splitting ☐ Stabbing ☐ Tender ☐ Throbbing ☐ Tiring ☐ Other

Pain Management and Medication: ☐ Medication ☐ Rest ☐ Activity ☐ Heat Application ☐ Cold Application ☐ Massage ☐ T.E.N.S
☐ Leg Drop or Elevation ☐ Other:

Is Current Pain Management Adequate?: ☐ Adequate ☐ Inadequate

Patient's Stated Goals for Pain Management

Modification to Pain Management

DATE: MAY 17 2017 **TIME:** 1430

NUTRITION RISK SCREEN: *Circle the number in the "Yes" column for those that apply to the patient.*	**Yes**
Total nutritional score at the bottom. Patient assessed initially and at least every three months. ***(Nurse to frame these statements as questions to patient)***	
I have an illness or condition that made me change the kind and/or amount of food I eat	2
I eat fewer than two meals per day	3
I eat few fruits and vegetables, or milk products	2
I have three or more drinks of beer, liquor or wine almost every day	2
I have tooth or mouth problems that make it hard for me to eat	2
I don't always have enough money to buy the food I need	4
I eat alone most of the time	1
I take three or more different prescribed or over-the-counter drugs a day	1
Without wanting to, I have lost or gained 10 pounds in the last six months	2
I am not always physically able to shop, cook and/or feed myself	2
This tool was developed and distributed by the Nutritional Screening Initiative, a project of: American Academy of Family Physicians, The American Dietetic Association, National Council on the Aging, Inc. (2004); Retrieved online July 2013. **Total**	0

Circle the risk level below and following appropriate interventions for risk level. Interventions documented in care plan.

0–2=Good	**3–5=Moderate Risk**	**6 or higher=High Risk**
No interventions needed	• Provide education on nutrition • Provide education on nutrition blood sugars and impact on wound healings, as applicable	• Provide education on nutrition • Provide education on elevated blood sugars and impact on wound healing, as applicable • Obtain physician order for referral of patient for further nutrition evaluation

ABUSE/SUICIDE RISK SCREEN: *Check the appropriate answer for each question. (Nurse to ask patient these questions 1–4 when patient is alone.)*

1. Has anyone close to you tried to hurt or harm you recently?	☒ Yes	☐ No
2. Do you feel uncomfortable with anyone in your family?	☐ Yes	☒ No
3. Has anyone forced you do things that you didn't want to do?	☒ Yes	☐ No
4. Do you have any thoughts of harming yourself?	☐ Yes	☒ No
5. Patient displays signs or symptoms of abuse and/or neglect.	☐ Yes	☒ No

If yes to any of the above questions, explain: Housing Kitsap Housing Authority has made the living environment feel unsafe. - son has hired a lawyer.

If yes to any of the above questions, you also must:

☐ Notify the Wound Care Physician Date _____ and Time _____ Notified
☐ Make a referral to Social Services Date _____ and Time _____ Notified

FALL RISK SCREEN: *Circle the appropriate score for each question. Total the score at the bottom of this section.*	
1. History of falling–immediate or within 3 months	25
2. Secondary diagnosis	15
3. Ambulatory aid None/bed rest/wheelchair/nurse Crutches/cane/walker Furniture	0 15 30
4. IV Access/Saline Lock	20
5. Gait/Transferring Normal/bed rest/immobile Weak Impaired	0 10 20
6. Mental status Oriented to own ability Overestimates or forgets limitations	0 15
National Center for Patient Safety (2009); Retrieved online July 2012: http://www.patientsafety.gov/CogAids/FallPrevention/index.html#page=page-1 **Total:**	15

Fall Risk Scale and Risk Level
(Interventions are documented in the care plan)

0–24 – Low Risk	25–50 – Medium Risk	51 and higher – High Risk

NWH WOUND CARE
DOS:5/17/17 RAGHU, PREMA KUMARI
Enc:1816189282 RES:30522839

I hereby authorize **DR PREMA RAGHU, MD** associates or assistants of his/her choice on staff at Northwest Hospital Wound Care Center to provide services for comprehensive wound care management.

DR PREMA RAGHU, MD has fully explained to me the nature and purpose of the Northwest Hospital Wound Care Center's approach to wound treatment and healing. I have also been informed of expected benefits and potential complications (from known and unknown causes), as well as, discomforts and risks that may arise. Alternatives to the proposed treatment(s) including no treatment were presented to me. I have been given an opportunity to ask questions, and all my questions have been answered fully and satisfactorily.

I agree to any debridement and any tissue removed may be examined and retained by Northwest Hospital Wound Care Center and its authorized affiliate for medical, scientific or educational purposes and such tissues or parts may be disposed of in accordance with accustomed practice.

I acknowledge that no guarantees or assurances have been made to me concerning the results intended from the wound care and/or other treatment.

I hereby consent that photographs, tape recordings, videotapes and/or movies may be taken of me and/or the named patient by Northwest Hospital Wound Care Center in connection with the medical and other services, which I/the patient am receiving at Northwest Hospital Wound Care Center. I further consent that a history of my/the patient's social and medical problems may be taken by Northwest Hospital Wound Care Center.

I understand that neither myself.the patient nor members of my.the patient's family will be identified by name in connection with any public use of this material.

I grant this consent as a voluntary contribution and I waive any and all rights I/the patient may have to royalties or other compensation in connection with any such use.

I confirm that I have read and fully understand the above and that all blank spaces have been completed prior to my signing. I have crossed out any paragraphs above, which do not pertain to me.

3-eConsultation Raghu, MD, Prema 5/17/2017 CUSTDM10\W0TA_STM_BackgroundJ 9/8/2020 6:21:34 AM -04:00

Patient Name: HOFFMAN, JEANNE LEONIE
MR#: U8170135
Date of Admission: 05/17/2017
Acct#: 1816189282
Date of Discharge: 20170517
Dictating Physician: Raghu, MD, Prema

DATE OF SERVICE: 05/17/2017

PLACE OF SERVICE:
Northwest Hospital Wound Care Center.

REASON FOR CONSULTATION:
The patient has wounds on her left lower extremity.

HISTORY OF PRESENT ILLNESS:
The patient is a 92-year-old, Caucasian lady, who lives in Bainbridge Island, came to Wound Care Center with her son. She has history of varicose veins and ulcers in her leg. She had ulcers in her left leg that required skin grafting 20 years ago. At this time, she has had wounds for the last three months and they have been using more recently Medihoney and she was treated sometime in April with Keflex and doxycycline for cellulitis. She also has had some recent venous and arterial Doppler studies. She has monophasic waves and significant distal arterial insufficiency. She does have nighttime pain in her leg as well.

She is basically here for further management of her wounds.

REVIEW OF SYSTEMS:
Significant for some middle ear problems. She does not have history of diabetes or thyroid disorder. No history of heart disease. She denied any chest pain or shortness of breath. She had no GI or GU complaints. She does walk with a walker.

ALLERGIES:
No known allergies were mentioned.

CURRENT MEDICATIONS:
She is on:

1. Tylenol as needed.
2. Atorvastatin 20 mg per day.
3. Losartan 25 mg half tablet once a day.
4. Pentoxifylline extended release 400 mg 1 tablet 2 times a day.
5. Timolol eye drops.

Patient Name: HOFFMAN, JEANNE LEONIE **MR#:** U8170135
Date of Admission: 05/17/2017 **Acct#:** 1816189282
Date of Discharge: 20170517
Dictating Physician: Raghu, MD, Prema

6. Vitamin B12 supplements.
7. Coumadin as directed.

PAST MEDICAL HISTORY:
Significant for a history of DVT in both legs. She is on Coumadin. She has history of hyperlipidemia, venous insufficiency, chronic leg ulcers in the left lower extremity in the past, requiring skin graft.

SOCIAL HISTORY:
She does not smoke or drink alcohol. Currently, lives in a facility, which is having financial difficulty.

FAMILY HISTORY:
Nothing of importance.

PHYSICAL EXAMINATION:
GENERAL: She appeared to be of her stated age. She was in no acute distress.
VITALS: She was afebrile, pulse 76 per minute, respirations 16 per minute, blood pressure 138/64 mmHg.
HEENT: PERRLA.
NECK: Supple. She had no lymphadenopathy or thyromegaly.
LUNGS: Clear.
CARDIAC: Normal.
ABDOMEN: Normal.
EXTREMITIES: Left lower extremity revealed three wounds. Left lateral calf wound measured 2.5 x 2.0 x 0.3 cm. Left lateral ankle wound measured 2.0 x 0.9 x 0.3 cm. Left medial ankle wound measured 0.7 x 1.4 x 0.3 cm. All these wounds were covered with thick slough. There was no evidence of acute infection. There was 1 to 2+ edema. She has chronic stasis changes.

ASSESSMENT AND PLAN:
Left lower extremity ulcers, history of venous insufficiency, chronic stasis dermatitis, history of deep venous thrombosis, PAD
We have advised the patient to continue using the Medihoney on a every other day basis and to check back with us in a week. We need to work on cleaning up the base of the wounds before we can heal them. She will not be a candidate for any compression because of her arterial insufficiency. We have just told her to keep her leg elevated as much as possible. She will continue her Coumadin as directed.

We thank you for the referral. We will keep you informed as to her progress.

HPI:
92-year-old woman with past medical history of chronic venous stasis ulcers and previous skin grafting as well as DVT anticoagulate on warfarin who presents with acute on chronic wounds. Patient has had 3 lesions on the left lower extremity for several months but over the past week there's been spreading erythema up the leg. denies drainage. No fevers or chills. Patient has a biting sensation on her leg that is causing her pain. No pain with range of motion of the ankle or knee. She is still able to walk. She was seen today by her primary care doctor who referred her to the emergency department for possible IV antibiotics. She lives on bainbridge Island in the care of her son but they're currently going through financial stresses and are in the process of being evicted.

PMH/PSH:
Chronic venous stasis ulcers
DVT
Diabetes
Home Medications:
1. atorvastatin (Lipitor 40 mg oral tablet) Dose: 40 mg PO Daily
2. carbamazepine (Tegretol 200 mg oral tablet) Dose: 200 mg PO TID
3. docusate sodium 250 mg oral capsule Dose: 250 mg PO BID
4. ferrous sulfate 325 mg oral tablet Dose: 325 mg PO Daily
5. hydrochlorothiazide 25 mg oral tablet Dose: 25 mg PO Daily
6. metformin 500 mg oral tablet Dose: 500 mg PO BID
7. ranitidine 75 mg oral tablet Dose: 75 mg PO BID for 14 day(s) prn
8. warfarin 10 mg oral tablet Dose: 10 mg PO QMWFSu
9. warfarin 10 mg oral tablet Dose: 5 mg PO QTuThSa
10. methocarbamol 500 mg oral tablet Dose: 500 mg PO Q6 Hours PRN Muscle Spasm
11. oxycodone 5 mg oral tablet Dose: 5 mg PO Q4 Hours as needed for pain
Allergies:
nitrofurantoin
penicillin
aspirin
sulfa drugs
Adhesive Bandage

Social History:
Denies tobacco and illicits

ROS:
10/14 review of systems (general, heme, derm, HEENT, neuro, cardiac, GI, GU, MSK, and pulmonary) was performed and negative, except as mentioned in HPI.

Physical Exam:
Vitals:
Temperature: 36.4 Pulse: 62 Blood Pressure: 122 / 64 Respirations: 16 Oxygen Saturation: 99%

Physical Exam:

General: pleasant, elderly woman sitting up in bed.

HEENT: Head atraumatic. No scleral icterus, no conj injection.

Mouth: Mucus membranes moist, no obvious lesions, no erythema of posterior pharynx

Neck: Supple, no rigidity

Pulm: Adequate air movement. No adventitious sounds.

Cardiac: Regular rate and rhythm. No JVD.

Abdomen: Soft, non-distended, non-tender

Extremities: No pedal edema. There are 3 well-appearing, chronic appearing ulcers with feveron the lower ankle. One of the medial malleolus and to import him and he to the lateral malleolus. There is surrounding venous stasis changes as well as some erythema spreading proximally to about the mid calf. No pain with range of motion of the ankle. No pain with range of motion of the left knee.

Neuro: A&Ox4. Moves all extremities.

History:
Comment:From ORCA:
Assisting Radiologist(s):

Assessment/Plan/MDM:
92-year-old woman with past medical history of DVT and chronic ulcers on her lower extremity presents with concern for cellulitis. My differential diagnosis includes cellulitis, necrotizing soft tissue infection, ostial myelitis, septic joint, dvt. Patient has no pain with range of motion of the ankle or knee joint and low suspicion for septic joint. X-rays did not demonstrate tracking air or evidence of osteo-myelitis and I have a lower suspicion for deep space infection based on physical exam. fully anticoagulated and warfarin failure unlikely. Most likely this represents cellulitis. Discussed with patient and it seems reasonable to trial oral antibiotics at this point with an understanding on the part of the patient and her son that should the redness progress, they should return to the ER. They received a dose of Keflex and doxycycline in the emergency department and are prescribed a seven-day course of Keflex and doxycycline. She will follow-up with Dr. Neighbors in 2 days for recheck of her INR. Discharge in stable condition.

Diagnosis:
cellulitis
Disposition:
home/self care
Patrick Bender, MD

Follow-up Instructions:

With:	Address:	When:
Please see Dr. Neighbors on Thursday for a repeat INR check and wound eval.		

IMPORTANT EMERGENCY DEPARTMENT COMMUNICATION AFTER YOUR VISIT:
If you have questions about your ED visit, please call:
University of Washington Medical Center ED: 206-598-2000

You may receive a phone call from us in the next few days to ensure that you are improving. Please be sure that we have an accurate phone number and address for you.

To assist us with continuing to improve the quality of the Emergency Care we provide, we would like your input. In the coming weeks, you may receive a survey in the mail about our processes. Please complete this and return it to us. Our goal is to provide you with excellent medical care. If we have not reached this goal, please let us know how we can improve our services.

University of Washington Medical Center would like to thank you for allowing us to assist you with your healthcare needs.

It is important to see your doctor or primary care provider. Emergency Care may be incomplete without proper follow-up. For help scheduling your UW Medicine or Harborview Clinic doctor appointment, call the Patient Contact Center at 206.520.5000 or toll free at 877.520.5000.

If you become worse in any way, it is important that you call your doctor, or return to the Emergency Department. Please remember to take these instructions to your next doctor's appointment.

Patient and Family Education

Cellulitis

What you should know:

Cellulitis is a skin infection caused by bacteria.

Instructions:

Medicines:

Antibiotics: This medicine is given to kill the bacteria that caused your cellulitis. This may be given as a pill or ointment.
Pain medicine: You may be given medicine to take away or decrease pain. Do not wait until the pain is severe before you take your medicine.
Take your medicine as directed. Call your primary healthcare provider if you think your medicine is not helping or if you have side effects. Tell him if you are allergic to any medicine. Keep a list of the medicines, vitamins, and herbs you take. Include the amounts, and when and why you take them. Bring the list or the pill bottles to follow-up visits. Carry your medicine list with you in case of an emergency.

Follow up with your primary healthcare provider as directed: Write down your questions so you remember to ask them during your visits.

Elevate your arm or leg: Raise the wound area above the level of your heart as much as possible. This will help decrease swelling and pain. Use pillows, blankets, or rolled towels to prop your arm or leg.

Wear pressure stockings: Compression stockings are tight stockings that help increase your circulation and decrease swelling in your legs. Wear them as directed.

Self-care:

Do not share personal items: Do not share items such as towels, clothing, and razors.
Clean exercise equipment: Clean the exercise equipment you use with germ-killing cleaner before and after you use it.
Clean your wound: Wash it regularly with soap and water. Watch carefully for signs of infection.
Take care of your skin: Use lotion to prevent dry, cracked skin.
Wash your hands often: This will help prevent the spread of germs.

Contact your primary healthcare provider if:

Your fever or pain does not go away or gets worse.
Your wound does not get smaller after 2 days of antibiotics.
Your skin is flaking or peeling off.
You have questions or concerns about your condition or care.

Return to the emergency department if:

Your wound gets larger and more painful.
You have a thin, gray-brown discharge coming from your infected skin area.

You feel a crackling under your skin when you touch it.
You have purple dots or bumps on your skin, or you see bleeding under your skin.
You have new swelling and pain in your legs.
You have sudden trouble breathing or chest pain.
The red, warm, swollen area gets larger.
You see red streaks coming from the infected area.
You feel weak and dizzy.

Financ... Agreement & Consent for D...closure

By signing below, I agree:

1. That Harborview Medical Center and Clinics (HMC), Northwest Hospital & Medical Center and Clinics (NWH), University of Washington Medical Center and Clinics (UWMC), Valley Medical Center and Clinics (VMC), UW Medicine Neighborhood Clinics (UWNC), UW Medicine Sports Medicine Clinic (UW Sports Med), Hall Health Primary Care Center (HHPCC), and University of Washington Physicians (UWP) (collectively known as "UW Medicine"), University of Washington School of Dentistry (SOD), Children's University Medical Group (CUMG) and Seattle Cancer Care Alliance (SCCA) may share any financial information I provide to facilitate payment.
2. To pay UW Medicine, SOD, CUMG and/or SCCA for balances remaining after insurance benefits are paid, unless prohibited by law or contract.
3. To notify UW Medicine, SOD, CUMG and/or SCCA of changes to my insurance coverage and/or address.
4. That UW Medicine, SOD, CUMG and/or SCCA may impose reasonable interest, late charges, costs and/or reasonable attorney's fees should my account become delinquent.
5. To notify UW Medicine, SOD, CUMG, and/or SCCA if I am not able to pay my balance due within 30 days of receipt.
6. To apply to other financial programs that I may qualify for as requested by UW Medicine, SOD, CUMG and/or SCCA, should I be unable to pay my account.
7. That any lawsuit for collection of my account may be brought in King County, Washington.
8. To receiving information related to treatment, payment or health care operations, including receiving autodialed and prerecorded message calls and/or text messages, at any number I have provided or, if not current, to any number I am reasonably found to be associated with.
9. That UW Medicine may, at its discretion, disclose to appropriate parties my medical records or information from my records for treatment, payment and health care operation purposes.

By signing this page, I acknowledge that I have read and agreed to the terms on both sides of this form.

FINANCIAL AGREEMENT & CONSENT FOR DISCLOSURE

U1865

UH1865 REV MAR 16

WHITE – MEDICAL RECORD
CANARY – PATIENT

Financial Agreement & Consent for Disclosure

I understand that:

- Each UW Medicine entity, SOD, CUMG, and/or SCCA bill separately for their services.
- Patients who receive outpatient services at UWMC or HMC sites generally receive two bills: one bill from the physician or other provider (for the costs of the professional services) and one bill from the hospital (for the facility costs, i.e. building, equipment, supplies, staff time). Each of these bills may incur a co-payment or co-insurance responsibility, depending on my insurance coverage. The exact amount of the co-insurance or co-payment will depend upon the actual services provided and the coverage provisions of any insurance I have. Sometimes patients will pay more for certain outpatient services and procedures at hospital-based outpatient locations. The amount will depend on my insurance. I may review my insurance benefits or contact my insurer to learn what my policy will pay and what out-of-pocket expenses I may need to pay. At my request, clinic staff will provide me with an estimate of the billed charges for outpatient services I am likely to receive.
- UW Medicine requests and, if I provide it, will use my Social Security Number to facilitate access to any potential federal or state health care benefits, to verify my identity, or to facilitate discharge planning. Providing my Social Security Number is voluntary except when applying for state and federal health care benefits.
- My Consumer Credit Report information may be accessed for the following reasons: to make determination of available financial assistance, assistance in managing the payment process, or if I report that my identity has been stolen.

Statement to Permit Payment of Medicare or Insurance Benefits to Provider

I request payment of authorized Medicare or insurance benefits for any services furnished to me by UW Medicine, SOD, CUMG, and/or SCCA. I authorize any holder of medical and other information about me to release to Medicare [and its agents] or other insurance providers any information needed to determine these benefits for related services.

CARE AGREEMENT

This form contains facts you should know about your health care at UW Medicine and from Children's University Medical Group, University of Washington Dentists and Oral Surgeons, and Seattle Cancer Care Alliance. If there is any part of this form that is unclear you can ask questions about it. At the bottom of the form there is a place for you to sign your name so that we know you have read this form (or had it read to you) and agree to receive health care from us.

UW Medicine includes:

- Harborview Medical Center and Clinics
- Northwest Hospital & Medical Center and Clinics
- University of Washington Medical Center and Clinics
- Airlift Northwest
- UW Medicine Neighborhood Clinics
- UW Physicians Sports Medicine Clinic
- Hall Health Primary Care Center,
- Summit Cardiology, and
- UW Physicians

Your health care team consists of medical doctors, doctors in training (residents and fellows), nurses, other health care professionals, and students of the health sciences. They will work together to diagnose and treat you. You will have an attending physician. This is the doctor who has primary responsibility for your care.

Photographs, videotapes, or other images of you may be used to keep a record of your care and treatment (including surgery). These images may become part of your medical record.

SIGNATURE

By signing below, it shows that you have read this document and agree to receive health care from UW Medicine. If there is any part of this form that is unclear, be sure to ask questions about it.

IMPORTANT EMERGENCY DEPARTMENT COMMUNICATION AFTER YOUR VISIT:
If you have questions about your ED visit, please call:
University of Washington Medical Center ED: 206-598-2000

You may receive a phone call from us in the next few days to ensure that you are improving. Please be sure that we have an accurate phone number and address for you.

To assist us with continuing to improve the quality of the Emergency Care we provide, we would like your input. In the coming weeks, you may receive a survey in the mail about our processes. Please complete this and return it to us. Our goal is to provide you with excellent medical care. If we have not reached this goal, please let us know how we can improve our services.

University of Washington Medical Center would like to thank you for allowing us to assist you with your healthcare needs.

It is important to see your doctor or primary care provider. Emergency Care may be incomplete without proper follow-up. For help scheduling your UW Medicine or Harborview Clinic doctor appointment, call the Patient Contact Center at 206.520.5000 or toll free at 877.520.5000.

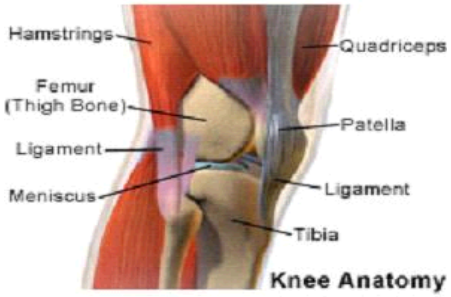
If you become worse in any way, it is important that you call your doctor, or return to the Emergency Department. Please remember to take these instructions to your next doctor's appointment.

Patient and Family Education

Knee Sprain

What you should know

A knee sprain is caused by a stretched or torn ligament. Ligaments are strong tissues that connect one bone to another.



Instructions

Medicines

Nonsteroidal anti-inflammatory (NSAID) medicine may decrease swelling and pain or fever. This medicine can be bought with or without a doctor's order. This medicine can cause stomach bleeding or kidney problems in certain people. If you take blood thinner medicine, always ask your primary healthcare provider if NSAIDs are safe for you. Always read the medicine label and follow the directions on it before using this medicine.
Take your medicine as directed. Call your primary healthcare provider if you think your medicine is not helping or if you have side effects. Tell him if you are allergic to any medicine. Keep a list of the medicines, vitamins, and herbs you take. Include the amounts, and when and why you take them. Bring the list or the pill bottles to follow-up visits. Carry your medicine list with you in case of an emergency.

Care for your knee

Rest: Limit movement as your injury heals. This will help decrease the risk of more damage to your knee. You may need crutches to take weight off your injured knee. Use crutches as directed.
Ice: Ice your knee to help decrease swelling and pain. Use an ice pack or put ice in a plastic bag and cover it with a towel. Put the ice on your knee for 15 to 20 minutes, 3 to 4 times each day. Do this for 2 to 3 days.
Heat: Use heat after you have used ice for 2 to 3 days. Apply a hot pack, heating pad, or soak in a

hot tub. Do this for 15 to 20 minutes, 3 to 4 times each day.
Support: Support your knee by wrapping it with tape or an elastic bandage. You may need a brace for more support. This will help decrease swelling and movement so your knee can heal.
Elevate: Use pillows to raise your knee above the level of your heart as often as you can. This will help decrease swelling.

Physical therapy: You may need to see a physical therapist to teach you special exercises. These exercises help improve movement and decrease pain. Physical therapy can also help improve strength and decrease your risk for loss of function.

Prevent another injury

Warm up and stretch before you exercise.
Do not exercise when you are tired or in pain.
Wear shoes that fit well and run on flat surfaces to prevent falls.
Wear equipment to protect yourself when you play sports.

Follow up with your primary healthcare provider as directed: Write down your questions so you remember to ask them during your visits.

Contact your primary healthcare provider if:

You have new or increased swelling, bruising, or pain in your knee.
The skin on your lower leg or foot is turning white or blue and feels cool when you touch it.
You have questions about your injury or treatment.

Harborview Medical Center – UW Medical Center

ID/CC:
U8170135 90 year old female CC: right knee pain s/p fall last week

HISTORY OF PRESENT ILLNESS:
90 year female reports she got dizziness and briefly fainted at the ferry stop on 7/6/15. She landed on her right knee and sustained an abrasion. Her LOC was brief and she was wearing a very heavy coat in hot weather. Her son was with her and she recovered quickly. She contacted her PCP. She has since had right knee medial joint line tenderness. She continues to ambulate with her walker without difficulty. She has been using acetaminophen for pain management. Denies fever, joint swelling, or the inability to ambulate. No bruising or paraesthesia. She lives in her home with her son on Bainbridge Island. She continues with her daily activities and denies any other syncopal episodes or dizziness. Her son is in the dental clinic today and she thought she would have her knee checked.

RADIOLOGICAL STUDIES:
Radiology Results
CT Head (07/15/2015 11:30)
~EXAMINATION:
CT HEAD WO CONT
CLINICAL INDICATION:
syncope on coumadin, syncope on coumadin
TECHNIQUE:
CT Head Routine wo contrast (N-1)
Non-contrast axial 5 mm contiguous sections were obtained through the head.
Patient age specific scan parameters were used for radiation exposure.
COMPARISON:
CT head without contrast dated 2/22/2013
FINDINGS:
No acute intracranial abnormalities. No hemorrhage, mass, mass effect or midline shift. No loss of gray-white differentiation to indicate stroke.
Periventricular white matter hypodensities which are nonspecific but which likely represent chronic microvascular ischemic disease. Stable basal ganglia calcifications and calcification within the left periventricular white matter.
Prominence of the ventricles and sulci, likely age-related. Lateral ventricles are symmetric. Basal cisterns are patent.
Calcification of the bilateral intracranial internal carotid and vertebral arteries.
Bowing of the bony nasal septum. Paranasal sinuses and mastoid air cells are well aerated. Status post bilateral lens replacement. Dentures and bilateral hearing aids are noted.
IMPRESSION:
No acute intracranial abnormalities. No hemorrhage as clinically questioned.
ATTENDING RADIOLOGIST AND PAGER NUMBER

XR Knee (07/15/2015 10:27)
~EXAMINATION:
XR KNEE 4 MIN VIEWS RIGHT
CLINICAL INDICATION:
fall 7/6 with continued pain, medial joint line
COMPARISON:
Same day tibia-fibula radiographs; knee radiographs 5/2/2007
FINDINGS:
No fractures or dislocations. No joint effusion or soft tissue abnormalities.
There is mild osteoarthritis, worse in the medial and patellofemoral compartments. There is an enthesophyte at the quadriceps tendon insertion.

There are vascular calcifications.
ATTENDING RADIOLOGIST AND PAGER NUMBER

.

EKG:
EKG
Rhythm: normal sinus rhythm, Other: ECG consistent with previous ecgs, no acute changes.

PROCEDURES/DIAGNOSTIC STUDIES:
ECG secondary to recent syncopal episode
Head CT secondary to anticoagulation treatment and syncopal episode
X-ray right knee to further evaluate for fracture

ED COURSE & MEDICAL DECISION MAKING:
Pt stable and non toxic appearing. Pleasant. Care discussed with Scott R4 resident and Dr. Morris attending MD. Xray ordered of right knee to further evaluate for fracture secondary to trauma and pain. Head CT and

ecg, labs ordered secondary to isolated syncopal episode. Pt. has not had further syncopal episodes. She remains independent in her home and continues with competency with her ADL's. Her PT/INR is therapuetic and labs otherwise unchanged from previous evaluation. Her knee xray in negative for fracture. She is visualized ambulating with her walker without difficulty in the ED. Her head CT was negative for acute changes and was completed secondary to her isolated syncopal episode. Her differentials also include right knee sprain of medial collateral ligament, acl, meniscus injury. She will follow up with PCP if her pain does not improve and consider PT evaluation. Her son returns and both are agreeable to discharge home with continued monitoring of symptoms.

ARNP/PA STATEMENT:
This case was discussed with the attending, Morris.

DISPOSITION/PLAN:
Final disposition:
Discharge private residence, self care.
Theraputic plan:
Strict return precautions were given.
Follow-up:
PCP.

IMPRESSION/DIAGNOSIS:
Acute right knee sprain, medial collateral ligament
Isolated syncopal episode, resolved.

ATTENDING STATEMENT:
I was the supervising attending involved in this patient's Emergency Department care. I have personally obtained a history and evaluated this patient and discussed the history, physical exam, diagnostic studies, and treatment plan with the ARNP/PA. I agree with their documentation and where necessary for either clarification or accuracy, I have added directly to the above note or provided additional comments below. Patient with transient lightheadedness and fall in the setting of heat exhaustion due to wearing a heavy coat and activity on a very hot day. Mild knee injury but no fracture dislocation. Patient able to ambulate without difficulty. We'll continue outpatient workup when necessary.

ED NOTE

CARE AGREEMENT

This form contains facts you should know about your health care at UW Medicine and from Children's University Medical Group, University of Washington Dentists and Oral Surgeons, and Seattle Cancer Care Alliance. If there is any part of this form that is unclear you can ask questions about it. At the bottom of the form there is a place for you to sign your name so that we know you have read this form (or had it read to you) and agree to receive health care from us.

UW Medicine includes:

- Harborview Medical Center and Clinics
- Northwest Hospital & Medical Center and Clinics
- University of Washington Medical Center and Clinics
- Airlift Northwest
- UW Medicine Neighborhood Clinics
- UW Physicians Sports Medicine Clinic
- Hall Health Primary Care Center,
- Summit Cardiology, and
- UW Physicians

Your health care team consists of medical doctors, doctors in training (residents and fellows), nurses, other health care professionals, and students of the health sciences. They will work together to diagnose and treat you. You will have an attending physician. This is the doctor who has primary responsibility for your care.

Photographs, videotapes, or other images of you may be used to keep a record of your care and treatment (including surgery). These images may become part of your medical record.

SIGNATURE

By signing below, it shows that you have read this document and agree to receive health care from UW Medicine. If there is any part of this form that is unclear, be sure to ask questions about it.

Financial Agreement & Consent for Disclosure

By signing below, I agree:

1. That Harborview Medical Center and Clinics (HMC), Northwest Hospital &Medical Center and Clinics (NWH), University of Washington Medical Center and Clinics (UWMC), Valley Medical Center and Clinics (VMC), UW Medicine Neighborhood Clinics (UWNC), UW Medicine Sports Medicine Clinic (UW Sports Med), , Hall Health Primary Care Center (HHPCC), and University of Washington Physicians (UWP) (collectively known as "UW Medicine"), University of Washington School of Dentistry (SOD), Children's University Medical Group (CUMG) and Seattle Cancer Care Alliance (SCCA) may share any financial information I provide to facilitate payment.
2. To pay UW Medicine, SOD, CUMG and/or SCCA for balances remaining after insurance benefits are paid, unless prohibited by law or contract.
3. To notify UW Medicine, SOD, CUMG and/or SCCA of changes to my insurance coverage and/or address.
4. That UW Medicine, SOD, CUMG and/or SCCA may impose reasonable interest, late charges, costs and/or reasonable attorney's fees should my account become delinquent.
5. To notify UW Medicine, SOD, CUMG, and/or SCCA if I am not able to pay my balance due within 30 days of receipt.
6. To apply to other financial programs that I may qualify for as requested by UW Medicine, SOD, CUMG and/or SCCA, should I be unable to pay my account.
7. That any lawsuit for collection of my account may be brought in King County, Washington.
8. To receiving information related to treatment, payment or health care operations, including receiving autodialed and prerecorded message calls and/or text messages, at any number I have provided or, if not current, to any number I am reasonably found to be associated with.
9. That UW Medicine may, at its discretion, disclose to appropriate parties my medical records or information from my records for treatment, payment and health care operation purposes.

I understand that:

- **Each UW Medicine entity, SOD, CUMG, and/or SCCA bill separately for their services.**
- **Patients who receive outpatient services at UWMC or HMC sites generally receive two bills: one bill from the physician or other provider (for the costs of the professional services) and one bill from the hospital (for the facility costs, i.e. building, equipment, supplies, staff time). Each of these bills may incur a co-payment or co-insurance responsibility, depending on my insurance coverage. The exact amount of the co-insurance or co-payment will depend upon the actual services provided and the coverage provisions of any insurance I have. At my request, clinic staff will provide me with an estimate of the billed charges for outpatient services I am likely to receive.**
- **UW Medicine requests and, if I provide it, will use my Social Security Number to facilitate access to any potential federal or state health care benefits, to verify my identity, or to facilitate discharge planning. Providing my Social Security Number is voluntary except when applying for state and federal health care benefits.**
- My Consumer Credit Report information may be accessed for the following reasons: to make determination of available financial assistance, assistance in managing the payment process, or if I report that my identity has been stolen.

Statement to Permit Payment of Medicare or Insurance Benefits to Provider

I request payment of authorized Medicare or insurance benefits for any services furnished to me by UW Medicine, SOD, CUMG, and/or SCCA. I authorize any holder of medical and other information about me to release to Medicare [and its agents] or other insurance providers any information needed to determine these benefits for related services.

INITIAL PSYCHIATRY CONSULTATION SERVICE NOTE

Chief Concern: 88 year-old woman presenting with several "nonresponsive" episodes

HPI/Symptoms: Ms. Hoffman is an 88 year-old woman with no previous psychiatric history presenting by AMR to the UWED today after becoming "unresponsive" at home. She reports that she was at home lying in bed and then "became a mummy. I couldn't move, I couldn't talk." Her son called 911 and the medics arrived and she was taken to the UW ED. She was awake but nonverbal for the first several hours in the ED, but then became more talkative. She had a CT scan that was negative and her labs were within normal limits apart for an elevated INR. She then had two more unresponsive episodes, witnessed by ED staff. The episodes last approximately 20 min-1 hour and they occur when she is lying in the hospital bed and then becomes unresponsive with her eyes closed and not moving her body. Per ED staff, her eyelids would flutter but she would not arouse, even to a strong pinch of her skin. A video of an episode shows her unresponsive to having her named called and when a physician would raise her arm and let it go above her head, the arm would stop an inch above her head, rather than falling into her face.

Neurology was consulted and determined that these episodes were not consistent with subclincal seizures and they suspected conversion disorder. Per the patient and her son, Lou, there has been significant increased stress in the home due to family conflict. The patient has two sons, one. Lou, who lives with her and another, Douglas. The patient reports that recently Lou and Douglas have become upset with eachother. Lou reports there has been increased conflict between him and Douglas, particularly about how Douglas treats their mother. Lou he feels Douglas has been verbally abusive towards the patient telling her "why don't you just die?" and that he has previously been physically abusive to her, most recently 2-3 months ago where he pushed her in a forceful manner. Chart Review shows that a physician in Dec 2007 had significant concerns that one of Ms. Hoffman's sons was abusing her. His note does not indicate which son he felt was abusive. At that time he was planning to have APS follow-up. Lou reports that he has tried to call APS this week but has not gotten ahold of anyone. Lou also reports that he has gotten the police involved and is planning to file a restraining order for him and his mother against Douglas this week.

Lou mentioned concerns for his mother's mental health, stating that she has seemed depressed recently, but notes that she appears in good spirits right now. Lou believes that her unresponsive episodes are secondary to increased stress and he states that he will try to reduce stress in her life. He feels comfortable taking her home tonight, even if she was to have another episode at home.

When we speak with Ms. Hoffman alone, she is wide awake, fully oriented and alert with good attention. She denies any symptoms of depression. She acknowledges that there are some stress at home between her sons but is adamant that it is not affecting her, "I just stay out of it!" She is cheerful and talkative. She tells us how much she enjoys "gabbing" with her friends and denies any loss of interest in activities she used to enjoy. However, she notes that she has had some back problems earlier this winter and has not been able to go on walks like she used to, which she misses. She denies any changes in appetite, sleep, concentration. She denies feelings of guilt, she denies SI, she denies HI, denies AVH. She denies any history of mania, she denies any paranoia. She denies any anxiety or that she is an anxious person at baseline. She denies any substance abuse, "alcohol is poison!"

She reports that she feels safe to go home, that she feels that she and her son, Lou, care for eachother well. She is unsure what is causing the unresponsive episode, "I think they just come with old age." She notes that she would like to see her son, Douglas, more often but she's not allowed to see him at this time. She denied being physically

abused by her sons.

Past Psych Hx:
Inpatient:none
Outpatient:none
Medication Trials:none
Suicide Attempts:none
Drug/Etoh:some alcohol use in the past, none now, no tobacco use

Social History:
Housing: lives with son, Lou, on bainbridge island
Financial: reports that she gets $800 a month from the government
Legal Problems: pt appears to believes that a judge has said her son, Douglas, is not allowed to see her. Lou reports that a restraining order is not in place but one will be soon.

Family History: no family hx of mental illness that patient can recall

Medical History: hx of DVT
HTN
DM
HY

metformin 500 mg PO BID (metformin 500 mg oral tablet)
ranitidine 75 mg PO BID : (prn)(ranitidine 75 mg oral tablet)
warfarin 5 mg PO QTuThSa (warfarin 10 mg oral tablet)
warfarin 10 mg PO QMWFSu (warfarin 10 mg oral tablet)

Mental Status Examination
Appearance: elderly woman, sitting in bed, no acute distress, smiling frequently, wearing sunglasses ("these are my regular glasses! my eyes are sensitive)

Behavior/Activity: cooperative, good eye contact
Speech: fluent, loud at times (has poor hearing). normal rate and rhythm
Thought Form: tangential at times, linear and organized
Thought Content: no hallucinations, no delusions
Mood: "I'm alright!"
Affect: bright, full range,
Suicidal Ideation: denies
Orientation: fully oriented
Memory: good long term memory, good shortterm memory
Judgment/Insight: fair/fair
Attention/Concentration:good

Radiology Results.
XR Chest (02/22/2013 11:45)
~Indication:
Altered mental status.

Bedside Chest; 02/22/13, 1138:
There is mild basal consolidation, atelectasis versus aspiration.
Heart size is normal.
ATTENDING RADIOLOGIST AND PAGER NUMBER
007259 Godwin II J David MD
(206)344-9980
Indication:

CT Head (02/22/2013 11:32)
~Examination:
CT HEAD WO CONT
Indication:
Altered mental status
Comparison:
CT brain June 20, 2012
Technique:
Non-contrast axial 5 mm contiguous sections were obtained through the head.
Patient age specific scan parameters were used for radiation exposure.
Findings:
Mild cerebral volume loss is noted. Mild amount of deep white matter and periventricular low-attenuation foci likely result of chronic small-vessel ischemic disease. 5 mm focus of calcification in the left periventricular white matter posteriorly, 2/17, unchanged compared to the prior examination.
No acute territorial infarct. No intracranial hemorrhage. No extra-axial fluid collection. Basal cisterns are patent. No intracranial mass effect.
Orbits, paranasal sinuses, mastoid air cells are normal.
No depressed calvarial fractures.
Impression:
1. No acute infarct, hemorrhage, or mass.
2. Mild cerebral volume loss and likely chronic small vessel ischemic disease.

EKG
My interpretation: NSE at 64. Flipped T-wavs in v1-2. partial RBBB. No ST segment changes.

.

Assessment/Medical Decision Making *(number of possible diagnoses considered) note problems, management options, dangerousness/risks including risk factors.*

(completed by Dr. Lin 2/23) Ms. Hoffman is a 88 y/o F without a prior psychiatric history who was admitted after having an episode of "unresponsiveness" and then proceeded to have several more of these 20 minute episodes throughout her ED stay. Psych is being consulted with the question of conversion disorder, after negative medical and neurologic workup. Patient denies any past psychiatric history, present psychiatric symptoms, and affectively appears bright, engaging, and cognitively intact during interview. She stated she had no idea what these episodes were except that things happen with old age. She did mention being more stressed in the last three days, 2/2 significant conflict between her two sons (including restraining order); however was unable to state how that affected her stating "I stay out of it". She clearly denied any harm to herself from her sons, or that she was scared of returning home. However, prior provider notes (see 12/19/07) had voiced concern about possibility of one of her sons harming her, and her son Louis has several inflammatory emails about the other son (see EPIC notes), and voiced concern that his brother had pushed his mother. Given this information, we felt it was prudent to recommend SW contact Adult Protective Services. At this given time, patient has no significant psychiatric issues (ie. Depression, paranoia) that would warrant treatment, although would clearly benefit from decreased stress.

Dx: I: r/o conversion disorder. Adjustment disorder. II: deferred III: see PMH IV: severe

Plan: 1. No psychiatric medications indicated.

2. Appreciate SW assistance in contacting APS, and helping son Louis navigate resources available (home nursing? CM?)

3. We discussed with Louis decreasing stress around his mother

4. Pt clinically safe to self and others

5. Louis stated he will f/u with PCP at closest available date

University of Washington Medical Center would like to thank you for allowing us to assist you with your healthcare needs.

It is important to see your doctor or primary care provider. Emergency Care may be incomplete without proper follow-up. If you become worse in any way, it is important that you call your doctor, or return to the Emergency Department. Please remember to take these instructions to your next doctor's appointment.

116587en

WE DO NOT THINK YOU HAVE HAD A SEIZURE, BUT HERE ARE SOME PRECAUTIONS

IF YOU ARE ALONE:
If you feel a seizure coming on, the best thing to do is to lie down on a bed or on the floor with something soft under your head. Lie on your side, not on your back. This will prevent falling and permit drainage of fluid from the mouth to prevent choking. Be sure that you are clear of any objects that might injure you during the seizure. Call for help (911) if there is time.

IF SOMEONE IS WITH YOU:
If someone is with you before the seizure, they should help you get in a safe position and call for help (911). They should not try to force anything in your mouth once the seizure has begun. Doing this may cause injury to your teeth or jaw.

After a seizure, you may be drowsy or confused. The person should remain with you until you are fully awake again. They should not offer anything to eat or drink during that time. Call 911 or go to the emergency department for further evaluation.

FOLLOW UP with your doctor as directed by our staff. Additional tests (brain wave tests or brain scans) may be ordered to help determine the cause of your seizure.

GET PROMPT MEDICAL ATTENTION if any of the following occur:

- Another seizure
- Fever over 100.4ºF (38.0ºC)
- Unusual irritability, drowsiness or confusion
- Worsening headache or neck pain

Indication:

CT Head (02/22/2013 11:32)
~Examination:
CT HEAD WO CONT
Indication:
Altered mental status
Comparison:
CT brain June 20, 2012
Technique:
Non-contrast axial 5 mm contiguous sections were obtained through the head.
Patient age specific scan parameters were used for radiation exposure.
Findings:
Mild cerebral volume loss is noted. Mild amount of deep white matter and periventricular low-attenuation foci likely result of chronic small-vessel ischemic disease. 5 mm focus of calcification in the left periventricular white matter posteriorly, 2/17, unchanged compared to the prior examination. No acute territorial infarct. No intracranial hemorrhage. No extra-axial fluid

collection. Basal cisterns are patent. No intracranial mass effect.
Orbits, paranasal sinuses, mastoid air cells are normal.
No depressed calvarial fractures.
Impression:
1. No acute infarct, hemorrhage, or mass.
2. Mild cerebral volume loss and likely chronic small vessel ischemic disease.

ED Course & Medical Decision Making
88 y/o F with pmhx by chart of DVT on warfarin, HTN, DM, HL presents with being unresponsive after a family arguement. Labs, CXR, CTH wnl aside from INR of 5.6Responsive to painful stimuli and answering yes/no questions on arrival. The patient had 3 hour long periods of return to normal mental status followed by one hour of the same unresponsiveness. It was eventually clarified with the son that she has a seizure d/o that is brought on by stress. Due to concern for subclinical seizures neuro was consulted who did not believe there to be any seizure activity and was likely conversion disorder. Psych also consulted who does not have any additional medication recommendations at this time, though recommended to try to decrease stress at home. D/c'ed in the care of her son with soon PCP f/u. No neuro f/u required. Told not to take warfarin for 2 days due to elevated INR without e/o beeding.

ED Consults
SW
Neurology
Psychiatry

Disposition/Plan
Final disposition
Discharge self care.

Impression/Diagnosis

Altered Mental Status
Supratherapeutic INR

Attending Statement
Pt signed out to me by Dr. O'Keefe with plan for neurology evaluation and disposition. Neuro evaluation c/w our impression that findings are unlikely to be organic in nature. ED work-up has been negative and given rapid cyclining of episodes with volitional movements (moving arm away from head when dropped) are suggestive that this was not a seizure. Pt then had another episode prior to discharge which led to asking psychiatry to evaluate the patient. After a thorough discussion with psych and SW, decision made to discharge the patient, who had now returned to baseline, with her son. Both patient and son are comfortable with this and I have a low suspicion for acute medical etiology. Pt lives on Bainbridge-will dc but allow patient to sleep in ED overnight. Plan to take Ferry home in the morning.

Herbert Duber MD, MPH
Attending Physician
Division of Emergency Medicine
Attending Statement
A laboratory evaluation was ordered and I have personally reviewed all of these findings.
A radiology evaluation was ordered and I have personally reviewed all of these findings.
A ECG evaluation was ordered and I have personally reviewed all of these findings.
I was the supervising attending involved in this patient's ED care. I obtained a history and performed a directed physical examination. I have also checked for prior Mindscape notes regarding this patient's care at the UWMC. I have reviewed and discussed this patient's history, physical exam findings, ED workup, working diagnosis, ED care and disposition plans with the resident. Where necessary for either clarification or accuracy, I have added to the above note. I now concur with documentation as presented. All procedures were supervised by me and I was present for the critical portions.

88yoF p/w episodes of unresponsiveness after fight between her 2 sons this morning. On initial exam, pt would shake her head to some questions, however would not open her eyes. There was no incontinence or tonic clonic movements, and she ultimately would awaken from these episodes and have normal mental status and normal neuro exam. Full evaluation including head CT, CXR, labs, tox screens, and UA was notable only for supratherapeutic INR. Her episodes do not seem consistent with any type of stroke pattern, and I do not feel this is the case. She does not appear to have any infectious cause or toxic-metabolic processes. However she does not have a psych history. Social work involved who felt pt was safe to return home, unfortunately just prior to discharge she had another episode, and her son then reported that she did have a seizure history. Neuro was consulted for the possibility of non-convulsive seizures. Signed out to Dr. Duber pending neuro evaluation..

ED NOTE

Emergency Room Brief Social Work Note (1415 Hours):

PP: Pt is an 88 y/o Caucasian female who was brought to the UWED by ambulance from her home on Bainbridge Island due to an unexplained "catatonic state".

HPI: Pt is an 88 y/o Caucasian female who was brought to the UWED by ambulance from her home on Bainbridge Island due to an unexplained "catatonic state". Pt is hard of hearing and so, most information was gathered via her son, who was present throughout the interaction. Pt resides at home with her adult son, who has DPOA for Pt. Pt has no in-home supports beyond her son, which is limited due to his physical impairment.

Pt was medically cleared and no physiological cause for the "catatonic state" could be explained: labs and CT were normal. EDSW was requested to evaluate for possible psych etiology which could account for this presentation. Pt's son reports that any time there is stress between her and/or her two sons, she has a different reaction. He reported that after one such stressful event, Pt had a significant fall and after another incident, she had a heart attack. When Pt was asked about what support would be helpful to her so that she would not have to return to the ED for this reason, Pt stated, "I need someone to come clean my shelves". When asked about the cause for today's episode Pt was unable to give a response: "I don't know what happened. I just passed out I guess." Pt's son reported that his mother has been feeling more depressed lately, possibly in relation to the current family dynamics. Pt's son said that they had already contacted Aging and Disability Services and had submitted a request for services, approximately one month ago but had not heard a response from them. They both meet with a Dr. Neighbors and Pt's son stated that they were attempting to address their mental health care needs with him.

Pt and Pt's son felt she was safe to return to her home with the plan created during our meeting to attempt to obtain increased supports. Prior to D/C Pt once again became nonresponsive and Neurology was called to consult. Pt's son then reported that Pt had been on seizure medications but had stopped taking them about a month ago. Pt had not disclosed this previously despite having been asked about it directly. He reported that she had been taking carbamazepine but it was discontinued approximately one month ago. After Pt came to, she described these states as being similar to a dream, describing the sounds and colors she saw while she was nonresponsive. Pt was informed that she was going to be seen by Neurology to test for any further issues as these could be subclinical seizures. Neurology consulted and will be seeing Pt.

IMPRESSION: Pt's presentation to the ED may be due to a stress induced reaction, relating to the current family conflict in which she is currently participating. There is no prior Hx of this sort of Bx, either in prior medical records or per Pt and Pt's son report. Per my observation Pt's son is projecting his difficulty with his brother upon his mother. Pt's mother denied that she was experiencing any particular difficulty with her son who was not present. Pt remained aware of the fact that she had "drifted off" but was unclear why it was happening.

PLAN: Pt's son will contact DSHS and Aging and Disability Services on Monday, 2/25/13 to check on the status of Pt's case. Pt to be D/C'd to home with her son and will continue to follow-up with PCP, Dr. Neighbor. Pt and Pt's son will seek mental health supports to deal with family stress. Pt was referred to Neurology for further testing, as just prior to D/C, Pt once again became nonresponsive, with no physical explanation. Any further follow-up will be conducted by the oncoming EDSW.

Addendum by Delfeld, John on February 23, 2013 06:06

This EDSW contributed to case discussion and care coordination for the patient. Per EDMD and Psychiatry request, this EDSW referred the patient to APS in Kitsap County via faxed written report for investigation of abuse and/or neglect. EDSW also provdided a cab voucher for the patient and her son Louis to travel to the Bainbridge Island ferry this morning. Louis Hoffman stated that they would take a cab home once back on Bainbridge Island.

NEUROLOGY EMERGENCY DEPARTMENT CONSULTATION

ATTENDING OF RECORD
Leo Wang, MD

DATE OF SERVICE
02/22/2013

CHIEF COMPLAINT
Intermittent episodes of unresponsiveness.

HISTORY OF PRESENT ILLNESS
This is a very pleasant, 88-year-old, right-handed woman with a past medical history significant for possible seizure disorder and depression, who came to the ED today after being found unresponsive in her bed this morning. When she arrived in the ED, she was noted to have periods of unresponsiveness, followed by increasing levels of consciousness, and finally back to her baseline. This happened 2 or 3 times in total. When she was unresponsive, she was noted to withdraw to painful stimulus, but not respond to questions or commands. During these times she would forcefully resist attempts to open her eyes. There were no associated abnormal movements or incontinence during these periods. These events would last between 10 and 20 minutes, at which time she would then begin to answer yes/no questions, but still not reach a full level of consciousness for another 10 or 20 minutes. The patient also endorses hallucinations with these events, seeing a variety of bright colors. Unfortunately her son, Doug, is reported by her other brother, Louis, who is at bedside, to be prone to verbally attack both the patient and the brother. Louis believes that these attacks are only verbal when directed towards Ms. Hoffman, and have not included any physical attacks. However, Louis does report that his brother, Doug, has assaulted him physically in the past. Louis relates that, after one of these verbal attacks, Ms. Hoffman will become depressed for 2 or 3 days. During this time, she will suffer more frequent falls than is usual for her. Louis has not noticed any periods of decreased responsiveness for many years now, prior to today. He does note that, in the 1970s and 1980s, that she would fall to the ground and shake all 4 extremities when in high stress situations, for example, when she was being yelled at. He notes that her consciousness was preserved during these events. About 1 month ago or so, her son, Doug, yelled at her, which Louis believed caused her to fall and break her back (she sustained a L3 fracture). She was admitted to UWMC for an L3 fracture at that time. She was taking carbamazepine prior to this, but at the time of the fracture it was stopped as she was on a significant amount of oxycodone, and there was some concern that there might be polypharmacy or drug/drug interactions. Louis notes that, over the past month while she has been off the carbamazepine, she has seemed much sharper than usual, and has not had any periods of decreased responsiveness until today. When questioned, she denies any sick symptoms and claims that she is not depressed. She denies any head trauma, and is unsure why she is having these periods of decreased responsiveness today.

PAST MEDICAL HISTORY
1. DVT.
2. Possible history of seizure.
3. Osteoarthritis.

4. Osteoporosis.
5. Hypertension.
6. Hysterectomy with appendectomy.
7. L3 fracture.

FAMILY HISTORY
Mother died at 90. Father died of pneumonia.

PRIMARY CARE PHYSICIAN
Dr. Neighbor

SOCIAL HISTORY
Denies alcohol, tobacco, or IVDU, is retired. She lives on Bainbridge Island. Contacts: Son, name of Louis, contact number 206-855-0815.

REVIEW OF SYSTEMS
A 14-point review of systems was conducted and is negative, except as noted in HPI and the following pertinent positives: Easy bruising, depression, seizure, tremor.

PHYSICAL EXAMINATION
VITAL SIGNS: Blood pressure 129/62, heart rate 80, respirations 16.
GENERAL: No acute distress, pleasant.
HEENT: Nonicteric funduscopy, unable to visualize fundi bilaterally due to nondilated exam. Patient refuses attempts to shine a light in her eye.
NECK: Supple.
CHEST: Clear to auscultation bilaterally without wheezes, crackles, or rubs.

HEART: Regular rate and rhythm without murmurs, gallops, or rubs.
ABDOMEN: Positive bowel sounds.
INTEGUMENT: Decreased hair on lower extremities. Left shin with hyperpigmented skin.
NEUROLOGIC:
COGNITION: Alert and oriented times 3. Cannot spell "world" backwards or perform serial sevens. Patient with 2/3 immediate recall. Speech is fluent and nondysarthric.
CRANIAL NERVE EXAMINATION: Visual fields intact to confrontation bilaterally. Patient declines ocular exam, saying that she prefers not to have a light shined in her eyes. EOMI. Facial sensation is intact bilaterally. Face is symmetric in appearance bilaterally. Palate elevation is symmetric bilaterally. Shoulder shrug is symmetric bilaterally. Tongue is midline and of normal bulk.
SENSORY: Globally intact to light touch, pinprick, vibratory sensation, and temperature.
MOTOR: Bulk and tone are within normal limits globally. Strength is 5/5 at the biceps, triceps, deltoid, quadriceps, hip flexors, plantarflexion and dorsiflexion at the ankle.
REFLEXES: 2+ at the biceps bilaterally, 0 at the bilateral quadriceps and Achilles. Toes are equivocal to plantar stimulation bilaterally.
INTEGRATIVE: Coordination is within normal limits on finger-to-nose. The patient is able to ambulate with 1-person assist while leaning against a wall for several steps and then returns to the bed. Unable to assess Romberg.
MOVEMENTS: No abnormal movements noted.

LABORATORY STUDIES
CBC is within normal limits. Chem-7 is notable for a sodium of 146, chloride of 112, and glucose of 144. Coags are notable for an INR of 5.6 with a PTT of 43. Troponins are within normal limits.

STUDIES
CT of the head, 2/22/2013: No acute process. Specifically, no infarct, hemorrhage, or mass. There is a chronic 5 mm focus of calcification in the left periventricular white matter posteriorly, unchanged from previous.

ASSESSMENT AND PLAN
This is a very pleasant, 88-year-old, right-handed woman, presenting with transient episodes of decreased responsiveness. I was able to observe one of these episodes towards the end of my exam. During this time, she was unresponsive to sternal rub or commands. She was unresponsive to mild painful stimuli, but when more aggressive pain was applied to her ear, she turned her head away and said, "No, no, no." Her pupils were reactive at this time as well. I believe these transient alterations in level of consciousness are nonepileptic in nature. They are occurring in the setting of significant psychosocial stressors, as evidenced by her son, Doug's, aggressive verbal behavior. The episodes themselves are not consistent with seizure as there is no incontinence, she has no abnormal movements noted, and her pupils are reactive bilaterally, with a decreased level of consciousness, and she does withdraw to pain. The fact that she has had at least 3 of these episodes in the last several hours, and quickly returns to baseline, also speaks against seizures as, if she was having this many seizures, it is likely that she would have a prolonged postictal period, especially given her advanced age. I feel these episodes likely represent nonepileptiform events. It is not clear to me why she was previously on carbamazepine. The events that took place 20 or 30 years ago, in which she moved all her extremities in a shaking type manner with preserved consciousness, in the setting of significant stress, also speak to a possible diagnosis of nonepileptic event. Her

elevated INR is concerning. However, her normal head CT is reassuring against any CNS hemorrhage that may be responsible for any transient alterations in consciousness.

1. No further neurological workup is needed.
2. Recommend that she avoid contact with her son, Doug, as he seems to be a bad influence on her overall health.
3. Recommend following up with primary care physician, Dr. Neighbor, for further consideration of whether she needs to be on antiepileptic therapy. I do not have her complete history available to me. I wonder if she does, indeed, carry a diagnosis of epilepsy, though the events of today suggest that she more likely has nonepileptic events, which does not preclude seizures.
4. Please call the Neurology consult team with questions.

AN IMPORTANT MESSAGE FROM MEDICARE ABOUT YOUR RIGHTS

DEPARTMENT OF HEALTH & HUMAN SERVICES
Centers for Medicare & Medicaid Services
OMB Approval No. 0938-0692

AS A HOSPITAL INPATIENT, YOU HAVE THE RIGHT TO:

- Receive Medicare covered services. This includes medically necessary hospital services and services you may need after you are discharged, if ordered by your doctor. You have a right to know about these services, who will pay for them, and where you can get them.
- Be involved in any decisions about your hospital stay, and know who will pay for it.
- Report any concerns you have about the quality of care you receive to the Quality Improvement Organization (QIO) listed here Qualis Health at 1-877-290-4346.

YOUR MEDICARE DISCHARGE RIGHTS

Planning For Your Discharge: During your hospital stay, the hospital staff will be working with you to prepare for your safe discharge and arrange for services you may need after you leave the hospital. When you no longer need inpatient hospital care, your doctor or the hospital staff will inform you of your planned discharge date.

If you think you are being discharged too soon:

- You can talk to the hospital staff, your doctor and your managed care plan (if you belong to one) about your concerns.
- You also have the right to an appeal, that is, a review of your case by a Quality Improvement Organization (QIO). The QIO is an outside reviewer hired by Medicare to look at your case to decide whether you are ready to leave the hospital.
    - **If you want to appeal, you must contact the QIO no later than your planned discharge date and before you leave the hospital.**
    - If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
- If you do not appeal, but decide to stay in the hospital past your planned discharge date, you may have to pay for any services you receive after that date.
- **Step by step instructions for calling the QIO and filing an appeal are on page 2.**

To speak with someone at the hospital about this notice, call_____

Please sign and date here to show you received this notice and understand your rights.

Signature of Patient or Representative

PINK – PATIENT

STEPS TO APPEAL YOUR DISCHARGE

- **STEP 1**: You must contact the QIO no later than your planned discharge date and before you leave the hospital. If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
  - Here is the contact information for the QIO:
    Qualis Health
    1-877-290-4346
  - You can file a request for an appeal any day of the week. **Once you speak to someone or leave a message, your appeal has begun.**
  - Ask the hospital if you need help contacting the QIO.
  - The name of this hospital is:

☐ HMC: Medicare Provider Number: ☐ 50-0064 (acute care) ☐ 50-S064 (psych) ☐ 50-T064 (rehab)
☐ UWMC:Medicare Provider Number: ☐ 50-0008 (acute care) ☐ 50-S008 (psych) ☐ 50-T008 (rehab)

- **STEP 2**: You will receive a detailed notice from the hospital or your Medicare Advantage or other Medicare managed care plan (if you belong to one) that explains the reasons they think you are ready to be discharged.
- **STEP 3**: The QIO will ask for your opinion. You or your representative need to be available to speak with the QIO, if requested. You or your representative may give the QIO a written statement, but you are not required to do so.
- **STEP 4**: The QIO will review your medical records and other important information about your case.
- **STEP 5**: The QIO will notify you of its decision within 1 day after it receives all necessary information.
  - If the QIO finds that you are not ready to be discharged, Medicare will continue to cover your hospital services.
  - If the QIO finds you are ready to be discharged, Medicare will continue to cover your services until noon of the day after the QIO notifies you of its decision.

IF YOU MISS THE DEADLINE TO APPEAL, YOU HAVE OTHER APPEAL RIGHTS:

- You can still ask the QIO or your plan (if you belong to one) for a review of your case:
  - If you have Original Medicare: Call the QIO listed above.
  - If you belong to a Medicare Advantage Plan or other Medicare managed care plan: Call your plan.
- If you stay in the hospital, the hospital may charge you for any services you receive after your planned discharge date.

For more information, call 1-800-MEDICARE (1-800-633-4227), or TTY: 1-877-486-2048.

Patient Information for UW Medicine Inpatient Facility Directory

Inclusion in the Inpatient Facility Directory
Please Read this Statement Carefully

I understand that I have a choice as to whether or not to be included in the UW Medicine entity's facility directory. My decision is indicated by marking a box and signing this form.

☑ **YES, please include me in the Inpatient Facility Directory**

- Harborview Medical Center
- Northwest Hospital and Medical Center
- University of Washington Medical Center / Seattle Cancer Care Alliance
- Valley Medical Center

has informed me that that my name, location, and general health condition will be included in its inpatient facility directory. This information will be made available to people who ask for me by name such as my relatives, friends, and fellow employees.

If I have provided my religious affiliation to UW Medicine in the past or if I provide my religious affiliation to UW Medicine now, I authorize its disclosure to clergy of my religious affiliation. Disclosure of my religious affiliation may result in a visit from a clergy member of my affiliation while I am being treated at UW Medicine.

If you have provided your religious affiliation to UW Medicine in the past and do not want a visit from a clergy member of your affiliation, please inform the registration staff.

☐ **NO, please do not include me in the Inpatient Facility Directory**

I do not want my name, location and general health condition included in the UW Medicine entity's Inpatient Facility Directory. **If this is my choice, I understand it is my responsibility to notify family and friends of my location and phone number if I wish them to contact me. I also understand that by choosing not to be in the directory, UW Medicine will be unable to deliver items (for example, flowers and gifts) addressed to me.**

CARE AGREEMENT

This form contains facts you should know about your health care at UW Medicine and from Children's University Medical Group, University of Washington Dentists and Oral Surgeons, and Seattle Cancer Care Alliance. If there is any part of this form that is unclear you can ask questions about it. At the bottom of the form there is a place for you to sign your name so that we know you have read this form (or had it read to you) and agree to receive health care from us.

UW Medicine includes:

- Harborview Medical Center and Clinics
- Northwest Hospital & Medical Center and Clinics
- University of Washington Medical Center and Clinics
- Airlift Northwest
- UW Medicine Neighborhood Clinics
- UW Physicians Sports Medicine Clinic
- Hall Health Primary Care Center,
- Summit Cardiology, and
- UW Physicians

Your health care team consists of medical doctors, doctors in training (residents and fellows), nurses, other health care professionals, and students of the health sciences. They will work together to diagnose and treat you. You will have an attending physician. This is the doctor who has primary responsibility for your care.

Photographs, videotapes, or other images of you may be used to keep a record of your care and treatment (including surgery). These images may become part of your medical record.

SIGNATURE

By signing below, it shows that you have read this document and agree to receive health care from UW Medicine. If there is any part of this form that is unclear, be sure to ask questions about it.

Financial Agreement & Consent for Disclosure

By signing below, I agree:

1. That Harborview Medical Center and Clinics (HMC), Northwest Hospital &Medical Center and Clinics (NWH), University of Washington Medical Center and Clinics (UWMC), Valley Medical Center and Clinics (VMC), UW Medicine Neighborhood Clinics (UWNC), UW Medicine Sports Medicine Clinic (UW Sports Med), , Hall Health Primary Care Center (HHPCC), and University of Washington Physicians (UWP) (collectively known as "UW Medicine"), University of Washington School of Dentistry (SOD), Children's University Medical Group (CUMG) and Seattle Cancer Care Alliance (SCCA) may share any financial information I provide to facilitate payment.
2. To pay UW Medicine, SOD, CUMG and/or SCCA for balances remaining after insurance benefits are paid, unless prohibited by law or contract.
3. To notify UW Medicine, SOD, CUMG and/or SCCA of changes to my insurance coverage and/or address.
4. That UW Medicine, SOD, CUMG and/or SCCA may impose reasonable interest, late charges, costs and/or reasonable attorney's fees should my account become delinquent.
5. To notify UW Medicine, SOD, CUMG, and/or SCCA if I am not able to pay my balance due within 30 days of receipt.
6. To apply to other financial programs that I may qualify for as requested by UW Medicine, SOD, CUMG and/or SCCA, should I be unable to pay my account.
7. That any lawsuit for collection of my account may be brought in King County, Washington.
8. To receiving information related to treatment, payment or health care operations, including receiving autodialed and prerecorded message calls and/or text messages, at any number I have provided or, if not current, to any number I am reasonably found to be associated with.
9. That UW Medicine may, at its discretion, disclose to appropriate parties my medical records or information from my records for treatment, payment and health care operation purposes.

I understand that:

- Each UW Medicine entity, SOD, CUMG, and/or SCCA each bill separately for their services.
- Patients who receive outpatient services at UWMC or HMC sites generally receive two bills: one bill from the physician or other provider (for the costs of the professional services) and one bill from the hospital (for the facility costs, i.e. building, equipment, supplies, staff time). Each of these bills may incur a co-payment or co-insurance responsibility, depending on my insurance coverage. The exact amount of the co-insurance or co-payment will depend upon the actual services provided and the coverage provisions of any insurance I have. At my request, clinic staff will provide me with an estimate of the billed charges for outpatient services I am likely to receive.
- UW Medicine requests and, if I provide it, will use my Social Security Number to facilitate access to any potential federal or state health care benefits, to verify my identity, or to facilitate discharge planning. Providing my Social Security Number is voluntary except when applying for state and federal health care benefits.
- My Consumer Credit Report information may be accessed for the following reasons: to make determination of available financial assistance, assistance in managing the payment process, or if I report that my identity has been stolen.

Statement to Permit Payment of Medicare or Insurance Benefits to Provider

I request payment of authorized Medicare or insurance benefits for any services furnished to me by UW Medicine, SOD, CUMG, and/or SCCA. I authorize any holder of medical and other information about me to release to Medicare [and its agents] or other insurance providers any information needed to determine these benefits for related services.

Patient Information for UW Medicine Inpatient Facility Directory

Inclusion in the Inpatient Facility Directory
Please Read this Statement Carefully

I understand that I have a choice as to whether or not to be included in the UW Medicine entity's facility directory. My decision is indicated by marking a box and signing this form.

☐ **YES, please include me in the Inpatient Facility Directory**

- Harborview Medical Center
- Northwest Hospital and Medical Center
- University of Washington Medical Center / Seattle Cancer Care Alliance
- Valley Medical Center

has informed me that that my name, location, and general health condition will be included in its inpatient facility directory. This information will be made available to people who ask for me by name such as my relatives, friends, and fellow employees.

If I have provided my religious affiliation to UW Medicine in the past or if I provide my religious affiliation to UW Medicine now, I authorize its disclosure to clergy of my religious affiliation. Disclosure of my religious affiliation may result in a visit from a clergy member of my affiliation while I am being treated at UW Medicine.

If you have provided your religious affiliation to UW Medicine in the past and do not want a visit from a clergy member of your affiliation, please inform the registration staff.

☒ **NO, please do not include me in the Inpatient Facility Directory**

I do not want my name, location and general health condition included in the UW Medicine entity's Inpatient Facility Directory. **If this is my choice, I understand it is my responsibility to notify family and friends of my location and phone number if I wish them to contact me. I also understand that by choosing not to be in the directory, UW Medicine will be unable to deliver items (for example, flowers and gifts) addressed to me.**

I hereby acknowledge services rendered to me or my dependents. I authorize use of this original or a copy and permit payment for same via assignment of medical insurance benefits to Bainbridge Island Ambulance or its agents for this or any services provided to me by Bainbridge Island Ambulance. I authorize any holder of medical information or documentation about me to release to the Health Care Finance Adminstration and its agents or any other insurance agencies as well as to Bainbridge Island Ambulance any information or documentation needed to determine benefits payable for this service or any services provided to me by Bainbridge Island Ambulance now or in the future.

X _____ / DATE _____

Medicare will only pay for services that it determines to be "reasonable and necessary" under section 1862 (A)(1) of the Medicare law. If Medicare determines that a particular service is "not reasonable and necessary" under Medicare program standards, Medicare will deny payment for that service. In your case, Medicare may deny payment for the ambulance services about to be rendered because it may not be medically necessary for you to be transported by ambulance. I have been notified by Bainbridge Island Ambulance that, in my case, Medicare may deny payment for the ambulance service referenced above. If Medicare denies payment, I agree to be personally responsible for payment.

Dear Family Member,

Thank you for the Cards and interest to visit me.

I can no longer accept un-annouced drop-in and drop-in visits that have no purpose or prior communication to foster further interests in family affairs or interactions in subject of interest between us and other family members.

I request that you email me: jeanhoffman@usa.com or jeanalloin@usa.com.

Thereby providing Subject Communication and reason for your request to visit me. Please provide a "DATE & TIME" and DURATION of visit.

In the past, all your visits had no meaning, no comradery and lacked Subject of interests between me & Family. Each time you visited me, you promoted white Supremacy, Hatred Communication toward my family members and intolerance toward family unification. Including your distrust/mental behavior that is of Concern. Your have objected to family interactional photography and block family genology Communication. You have prevented all family reunions and divide family to family Comradery.

I no longer want 10min visit, 10min Holiday visits/etc.

I want to open Email Communication, that is prolific and meaningful Communication to develop Subject interest.

Louis my son is my power of attorney, medical caretaker and represents all my interest, schedules appointments and has my best interest. Thus you must open a viable dialog with him. This includes any Spouse to have a meaningful & respectful

behavior toward my family member choice Caregiver.

I no longer will tolerate behavior that berates, dehumanize, promotes hatre.

you and your spouse and family member must stop activities, communication of white supremacy and threads will not be tolerated. If you are unable to have respect and unable to communicate healthy dialog or unable to say good thoughts toward me — then do not visit —

I suggest that you join anger management or PHAG inorder to stop your aggressive and behavior to agitate. Including taking an educational course in Mental Health, aging and family Social Development, including firm understanding of geneology.

For Past 30+ years you and your family have practiced anti-family unity and white supremacy has been your justification to divide healthy family relations and deny existance of family heritage

I, Jean Leonie Callier Alloin Hoffman, hereby ~~by~~ direct you to open a positive dialog with Louis Charles Hoffman Alloin, as he is my representitive in all matters and has been given power of attorney to speak for me and speak on my behalf, as he has my best interest. If you refuse, then I have directed Louis to bar you from all visit. until all agreement can be attained.

Sincerly, Jean Leonie Callier Alloin Hoffman

Witness 12/28/12 10:05am
Louis Charles Hoffman Alloin

Date 12/28/12 10 am Jeanne L Hoffman

cc: Meigh Lowe, MD. Louis Alloin. Brooke & Chase Hill Hoffman

NEUROSURGERY CLINIC NOTE:

HISTORY:
This 88-year-old woman who had a witnessed fall on or about December 6, 2012, and was brought to the emergency room with a question of a new fracture along the superior endplate of L3. She is demineralized and had also noted abnormalities at L4-5 and 5-1. She was placed in a TLSO and arrives today in the TLSO, completely well. However, she tells me she has not really been wearing it at home.

RADIOGRAPHS:
Follow up imaging is perfectly stable, and I conclude that the fracture is almost certainly old.

PHYSICAL EXAMINATION:
She is neurologically well.

PLAN:
Will take her out of the TLSO and return to the capable care of Dr. William Neighbor. Follow up in the Neurosurgery Clinic p.r.n.

UW Medicine physicians included in this note can be reached by calling 206-744-3000. This note and other patient records are available online through U-Link. To enroll, go to uwmedicine.org/u-link or call 206-598-5693.

Nursing Progress Note - HMC

Discharge Summary

Date of Admission: 12/06/2012

Date of Discharge: 12/10/2012

PCP: William Neighbor

Discharge Diagnosis:
Compression fracture

Consults Completed:
Neurosurgery/spine

Operations/Procedures:
None (TLSO fitting)

Principal Diagnostic Studies/Results:
CT Lumbar Spine 12/6/2012
1. Age indeterminate although likely chronic mild compression deformity of the superior endplate of the L3 vertebral body. Chronic mild anterior wedge compression deformity of T12 and mild superior endplate compression deformity of the L2 vertebral body unchanged dating back to 2008.
2. Multilevel degenerative scoliosis and spondylosis of the lumbar spine with resultant moderate central (greatest at L3-4) and moderate to severe neural foraminal narrowing at multiple levels (L3-4, L4-5, L5-S1) of the lumbar spine as described above.

CT Lumbar Spine 12/7/2012
Mild appearing T12 compression deformity again noted. Also, a mild chronic appearing L1 superior endplate compression deformity is similar to the prior recent examination. Multiple bilateral mildly displaced rib fracture are present having the appearance of subacute to chronic fractures. No new fracture demonstrated. Diffuse osteopenia is present. Multi-level degenerative changes are visualized. Bony alignment is otherwise normal.
Dependent pulmonary opacity is present may represent atelectasis although nonspecific. Calcified arterial vessels are present. Hiatal hernia noted. Left thyroid nodule dictated separately needs follow-up ultrasound.

CT Cervical Spine 12/7/2012
Marked degenerative changes are present.
Anterior grade 1 C5-C6 spondylolisthesis without fracture demonstrated which appears degenerative in etiology.
Slightly exaggerated lordosis. No fracture detected. Indeterminate left thyroid nodule should be further evaluated with ultrasound.
No apical pneumothorax is detected.

CT Head 12/7/2012
Lacunar infarcts in the right basal ganglia and left centrum semiovale. No acute cortical infarction. No hemorrhage or focal mass lesion.

CXR 12/7/2012
The bilateral upper lungs are obscured by an overlying halo harness but no pneumothorax seen. Cardiac and mediastinal contours are normal. Interstitial coarse markings centrally. The lungs and pleural spaces are otherwise clear. Left 7th posterior rib fracture indeterminate aged and not seen on the recent CT T spine.

Reason for Admission:

From Dr. Thomas' admission note 12/7/2012:
The patient is a very functional 87y/o female with fairly benign PMH except for DVT for which she is on warfarin, who presents transferred from UW for admission following fall x 1 week ago. A week ago the patient fell in her kitchen when she tripped, landing on her buttocks. She saw her PCP for a scheduled visit today, who referred her to the ED for further evaluation. Xray and CT imaging of the lumbar spine revealed an L3 compression fracture of undeterminate age. Neurosurgery saw her in the ED, and recommended a TLSO brace, and discharge, with repeat imaging 6 months following. She was thought able to discharge home, when it was noted that her INR >6. Considering her high degree of fall risk in brace, and that she lives alone with son who can only abulate with a walker, it was thought prudent to admit her until INR was again therapeautic.

She was transferred to HMC ED and UW was at capacity. In HMC ER she had a head CT performed, which showed no acute intracranial processes. C Spine CT scan demonstrated no cerival fracture.

It is unclear why the pt's INR is so high.

Hospital Course:

Supratherapeutic INR. Admit INR of 6.2. Coumadin was held two days with INR improving to 2.7, then wafarin 5 mg given and 2.2 the day of discharge. Reviewing her coumadin regimen, she had some reported variability in how much she took (sometimes took an extra half pill, others a half) that may explain the change. It was unclear if she was taking 4x/week 10 mg and 3x/week 5mg as reported on admission, vs. 10 mg daily. At discharge we had her take the former regimen, with close follow-up with Dr. Neighbor

Compression fracture: acuity of these findings unclear on imaging. Neurosurgery saw her in the ED and recommended TLSO brace. The fit appeared appropriate on follow-up with prosthetics. There was some variability in follow-up recommendations - 6 months per the neurosurgery note.

Condition:

Good - pain controlled, hard of hearing at baseline, ambulating with assistance, lungs clear

Disposition:

Home

Clinical Follow-up, including appointments:
Dr. Neighbor in 5 days (Friday 12/14/2012)
Orthopedics in 6 months scheduled for UWMC Roosevelt
No scheduled f/u for fit w/ prosthetic, call 206-598-4026 if changes needed.

Diagnostic Studies Recommended:
Follow-up INR at time of follow-up with Dr. Neighbor

Pending Results (as of this summary):
None

Therapeutic Recommendations:
Per PT note: Currently needs the SBA/CGA of one person to mobilize safely OOB, and will need assist x 1 to don/doff TLSO. If pt's son (or someone else) able to provide this level of assist, then pt can d/c home. Otherwise will need SNF with lower intensity therapies upon d/c.

She should wear TLSO brace when out of bed, or if HOB > 30 degrees.

Discharge Medications:
atorvastatin (Lipitor 40 mg oral tablet) Dose: 40 mg by mouth Daily
carbamazepine (Tegretol 200 mg oral tablet) Dose: 200 mg by mouth Three times daily
docusate sodium 250 mg oral capsule Dose: 250 mg by mouth Twice daily
ferrous sulfate 325 mg oral tablet Dose: 325 mg by mouth Daily
hydrochlorothiazide 25 mg oral tablet Dose: 25 mg by mouth Daily
metformin 500 mg oral tablet Dose: 500 mg by mouth Twice daily
methocarbamol 500 mg oral tablet Dose: 500 mg by mouth Every 6 hours as needed Muscle Spasm
oxycodone 5 mg oral tablet Dose: 5 mg by mouth Every 4 hours as needed for pain
ranitidine 75 mg oral tablet Dose: 75 mg by mouth Twice daily for 14 day(s) prn
warfarin 10 mg oral tablet Dose: 10 mg by mouth Monday, Wednesday, Friday and Sunday
warfarin 10 mg oral tablet Dose: 5 mg by mouth Tuesday, Thursday and Saturday

UW Medicine physicians mentioned in this note can be reached by calling MedCon at 800-326-5300. This note and other patient records are available online through U-Link. To enroll, go to uwmedicine.org/u-link or call 206-598-5693.

ASSESSMENT:
Pt is 87 year old female that is medically ready to discharge home..
.
INTERVENTION:
SW met with the team and discussed the discharge plan. Pt does not qualify for Home Health services PT/OT or RN. Concerned about the patient's safety at home, SW completed an Adult Protective Service referral for the patient. SW provided the pt's information, phone number, and family information for APS.

SW will arrange for a Tri-Med CABulance when the pt is medically ready to discharge. SW will arrange for her and the pt's son to be transported. SW will arrange once the RN has decided on a time.

(15:30)
SW arranged for a Hopelink CABulance (pt has Medicaid pending per Epic) and arranged it for 15:00.
.
PLAN OR OUTCOME:
SW will continue to provide assistance with discharge planning as needed..
.

Quality Measures
Internal SW Data: K12, K28.

Nursing Progress Note - HMC

Pt was seen in her room on 3E for routine f/u of TLSO fit 12/7/12.

Pt was sitting up in bed with device in place. Pt reports no discomfort at this time. Fit appears to be appropriate but was tightened slightly to decrease the chance of migration when sitting up further and provide proper support. Pt understands the need for device to be tight and reported increased comfort with the tightness. All the pt's and family's questions were answered regarding fit of the device.

ASSESSMENT:
Pt. is an 87 y.o. Caucasion female who was admitted w/ a spine fx. s/p a fall at home. SW working w/ pt. this weekend on dispo planning and assessment. Continuing today.
.
.
INTERVENTION:
Met w/ pt.'s son Doug, and his dtr. Karen, along w/ pt.. Pt. had a sort of hearing aid today and much better able to participate. She has a hard time keeping this on, and providers may need to hold it. Explained that PT recommending SB and CG when pt. gets up to go to the BR. RN able to come and demonstrate brace care, recommends that this is much better done by two people. Doug says that he would be willing to come every morning to asst. w/ brace care and would do his best not to argue w/ his brother Louis. He also says that he will use his dtr.'s lower to the ground car (as opposed to pick up truck), to transport pt. home. SW discussed HH PT/OT and bath aide. Pt. says she'd be okay w/ this.
Spoke w/ pt.'s son Louis on the phone. He states that he is DPOA for pt., will bring in ppwk. tomorrow. SW explained pt.'s needs, pt.'s need to have two people to help her w/ brace care each morning, brother's plan for discharge transport, plan for HH. He says he think pt. would be more comfortable in cabulance, as his dtr.'s car is too small for himself and pt.. Other than this, Louis is agreeable w/ discharge plan. He will be at HMC in the a.m. between 9 and 10.

Of note, both Louis and Don spend a great deal of time criticizing each other's character. Louis says that Don is verbally abusive, that he snaps and gets mad and yells at pt. and that this makes her depressed. Louis says that Don is schizophrenic. SW did not notice any usual schizophrenic sx.s in Don's presentation, he was engaged and alert. Don claims Louis has a criminal background. Don says that Louis did not let him know of pt.'s hosp., that he did not find out till yesterday. Given the animosity between them, SW should keep each informed -- pt. has given her verbal permission for this -- so all are on the same page, as much as possible.

Talked to Dr. Fletcher about discharge plan: for pt. to take cabulance home, for brothers to be in agreement w/ brace care (both have been shown how to do it), for HH PT OT and bath aide to be set up, and for APS report to be made w/ reports that son Don verbally abusive of pt.. .
.
PLAN OR OUTCOME:
Leave sign-off for floor SW..

MEDICINE INPATIENT PROGRESS NOTE

Hospital Day: 0

IDENTIFICATION/CHIEF CONCERN
supratherapeutic INR in setting of fall 1 week ago with lumbar fracture

INTERVAL HISTORY
-- INR 2.7 today
-- discussed needs after discharge with sons Louis by phone and Doug at bedside. See SW note today for full discussion. They each seemed open to providing for Ms. Hoffman's home needs, although details need to be worked on
-- Back pain controlled, denies chest pain, dyspnea, or other concerns.

PE
NAD, sitting up in bed with hearing aid device on ear
RRR without m/r/g across center opening of brace
Lung CTA bilaterally above brace
Abdomen exam limited with brace
Ext without edema

Assessment/Plan
L3 anterior compression fx: TLSO brace placed
-- will need to verify able to manage at home (HH referral tomorrow)
-- pain control adequate w/ oxycodone 5 q3; change to prn
-- stop morphine to enable transition to oral regimen for home
-- continue bowel regimen (docusate, prn senna)

INR elevation: unclear etiology; improved now in range w/ holding coumadin for 2 doses, to 2.7
-- warfarin 5mg po qday today
-- f/u w/ PCP tomorrow for arrange monitoring hereafter

DM: glucose in good range on metformin
HTN: in control on home HCTZ
FEN: continue low sodium diet
DVT px: therapeutic warfarin
Full code

Disposition: Seems like home may be viable for discharge, to be confirmed with HH tomorrow. Medically ready for DC when arrangements can be made

Nursing Progress Note - HMC

Report Summary
Pt at or near baseline, but TLSO provides a small barrier to her independence. Currently needs the SBA/CGA of one person to mobilize safely OOB, and will need assist x 1 to don/doff TLSO. If pt's son (or someone else) able to provide this level of assist, then pt can d/c home. Otherwise will need SNF with lower intensity therapies upon d/c.Barriers: orthotic/brace, hearing deficit.Patient's potential for improvement: good.
Discharge Recommendations:
Home with 24 hr supervision and intermittent assist for mobility and brace management.

Physical Therapy Note
Note type: Initial evaluation.
Time spent:
Session 1: Start Time: 0950, End Time: 1025, Duration: 35 minutes.
Two patient identifiers checked? Yes.

Pertinent Patient Information
Diagnosis: 87 yo F admitted 12/6 s/p mechanical fall approximately one week ago. She has been ambulating with the assitance of her walkers but notes increased pain and spasms in her lower back. Xray and CT imaging of the lumbar spine revealed an L3 compression fracture of undeterminate age. Neurosurgery saw her in the ED, and recommended a TLSO brace..
Past Medical History: h/o DVT
Osteoporosis
OA of hands
HL
HTN
DM 2
Femur fx.
Precautions
TLSO >30 deg.
Activity: OOB as tolerated.
Prior functional status: independent, used 4WW to ambulate in- and outdoors.
Individuals present during session: pt and PT only.

Home Environment
Lives in single level home, on Bainbridge Island. One STE, which pt reports is difficult for her. She has fallen there at times.
Lives with her son, who pt reports does the cleaning and other assistance to her. But he uses a walker (?).
Family/caregiver able to provide unclear. Need to determine if pt's son can provide necessary LOA needed.
Equipment owned: 4-wheeled walker.

Pain
Description
Location: spine, minimal pain w/ mvmt.

Behavior
Alert and oriented x 4.
Alertness: eyes open.
Command following: following commands.
Safety/Precautions: Patient following all precautions safely.

Musculoskeletal
Posture
Brace: TLSO.
Range of Motion
Date: 12/8/2012.
Left upper extremity: WNL.
Right upper extremity: WNL (initially pt not able to lift R shldr >45 deg,, but after assist, able to demonstrate full ROM. "Just needed to loosen up.").
Left lower extremity: WNL.
Right lower extremity: WNL.
Strength
12/8/2012.
.
5/5 strength throughout to select MMT

Sensation

Intact sensation throughout

Cardiopulmonary
Oxygen requirements
Room air.

Mobility
Bed Mobility Assessment
Supine to sit: surface flat bed, patient requires contact guard assistance, Pt performs 75% of activity, using bed rail.
Transfers
Sit to stand: using a front wheel walker, CGA, Pt performs 100% of activity.
Ambulation
Distance: x ~150 ft.
Device utilized: front wheel walker.
Level of assist: with contact guard assist, progressing to SBA. No LOB noted, but pt needed cues for upright posture.

Balance
Static sitting: the patient requires modified independence, Pt performs 100% of activity, surface: bed, lower

extremity support: bilateral lower extremities.
Static standing: surface: firm, device: front wheel walker, the patient needs stand by assistance, Pt performs 100% of activity.

Equipment

pt has own 4WW. loaner FWW in room

Treatment Provided
Physical Therapy Evaluation:.

Patient Education
Topics: Home exercise program (simple AROM ex (2)).

Assessment
Pt at or near baseline, but TLSO provides a small barrier to her independence. Currently needs the SBA/CGA of one person to mobilize safely OOB, and will need assist x 1 to don/doff TLSO. If pt's son (or someone else) able to provide this level of assist, then pt can d/c home. Otherwise will need SNF with lower intensity therapies upon d/c.
Barriers: orthotic/brace, hearing deficit.
Patient's potential for improvement: good.

Daily Recommendations
Encourage bed exercises including UE elevation and deep breathing.
Activity transfer status: out of bed for all meals.
Transfers level of assistance: one person assist.
Device: none.
Ambulation activity status: ambulate in room, ambulate in hallways.
Ambulation level of assistance: with family assist, one person assist.
Ambulation device: walker.

Plan/Recommendations
Plan
  Patient will be seen: 2-3x/wk, if doesn't d/c this weekend.
Discharge Recommendations:
  Home with 24 hr supervision and intermittent assist for mobility and brace management.

Lives in single level home, on Bainbridge Island. One STE, which pt reports is difficult for her. She has fallen there at times.
Lives with her son, who pt reports does the cleaning and other assistance to her. But he uses a walker (?).
Family/caregiver able to provide unclear. Need to determine if pt's son can provide necessary LOA needed.
Equipment owned: 4-wheeled walker.

Pain

Pt having intermittent bouts of muscle spasms in her back which increase pain to 8-9/10

Musculoskeletal
Strength
.
Pt with active, against gravity movement of all extremities

Functional Mobility
Bed mobility:
.
Pt up ambulating with PT upon OT arrival
Sitting balance:
Chair patient is independent.
Chair transfer:
Sit to stand patient needs contact guard, assistive device Front wheeled walker.
Toilet transfer: patient needs contact guard, using grab bars.
Standing: patient needs stand by assist, assistive device Front wheeled walker.
Functional Ambulation
Ambulation to sink patient needs contact guard, assistive device Front wheeled walker.
Ambulation to bathroom patient needs contact guard, assistive device Front wheeled walker.

Self Care
Basic Activities of Daily Living
Upper body dressing: Pt will be dependent for brace care.
Lower body dressing: patient needs minimal assistance.
Toileting: patient is independent.

Cognition
Behavior: alert, cooperative.
Command following: pt consistently follows verbal commands.
Orientation: Patient is oriented to person, place, situation.

Equipment

Pt reports she has grab bars in bathroom around toilet and in tub. Pt plans to sponge bathe at home

Treatment Provided
OTHER
OT evaluation

Patient Education
Topics: Role of OT, recommendation for assistance at home.
Teaching method: verbal, demonstration.

Primary Learner patient.
Patient challenges to learning: decreased activity tolerance, pain.
Patient teaching outcome: discussion w/pt shows understanding.

Assessment
At this time, pt requires contact guard assistance for functional mobility and min assist for lower body ADL secondary to decreased balance and endurance. Pt will be dependent for brace care. Anticipate if pt's family able to provide the appropriate level of assistance at home, pt would be appropriate to return home with 24hr assistance, if not pt would require a facility that could provide 24hr assistance and on-going therapy.

Daily Recommendations
Activity status
Activity: to bathroom w/ contact guard assist.
Device: front wheeled walker.

Plan/Recommendations
Plan
Treatment plan: no further plans for acute OT treatment.
Discharge Recommendations: Home with 24 hr supervision and intermittent assist for mobility, lower body ADL, and brace management.

Visit Information

Unit:
Service:
Reason for Admission No Reason for Admission found.
Current Attending *(REG):*
Admit Date:

General Information
SOCIAL WORKER: Pt. is an 87 y.o. Caucasion female who was admitted w/ a spine fx. s/p a fall at home. W/e SW asked to see her re: dispo planning, also possible verbal abuse by son Doug..
CURRENT SITUATION:
Pt. is extremely hard of hearing, you need to speak a few inches from her ear or face. She is also pretty chatty, so it is difficult to have a full conversation..
LANGUAGE: English.
INTERPRETER: No.
INFORMATION OBTAINED FROM: patient, medical personnel, medical record.

Social History
LIVING SITUATION / ADDRESS PRIOR TO ADMIT:
Pt. lives in an apt. w/ her son Louis. Her son Douglas lives 4 - 5 miles away on Bainbridge. Pt. states tht she fell b/c of a crack in the lino in her apt.. Says she's asked the landlord to fix it several times..
PHYSICAL AND COGNITIVE FUNCTIONING PRIOR TO ADMIT:
Per chart, pt. getting along pretty well w/ asst. of 4WW prior to fall..
FAMILY HISTORY:
Pt.'s spouse died in '73. She states that he was a "gigolo," and that the marriage was painful for her. She has just the two boys. She says the sons do argue w/ each other. Louis is gay, and Doug is not happy about this. Doug is married.
SW did seem to be able to get pt. to pay close attention when SW asked her whether the boys yelled at her, scared her, threatened her, or hit her. She denies abuse, but says that all sometimes argue, but "that's what families do." .
PATIENT / FAMILY COPING AND ADJUSTMENT:
Pt. not adjusting to care issues -- that she is likely to need more than Louis can provide. .

Health Care Decision Making
LEGAL NEXT OF KIN:
Two sons.
CONTACT IN FOLLOWING ORDER FOR LEGAL NEXT OF KIN DECISION MAKING:
1 : Louis Hoffman , son , 206-855-0815 .
1 : Douglas Hoffman , son , 842-8360 .

Substance Use History
TOBACCO: None.
ALCOHOL:
None..
DRUGS:
None..

Providers/Community Agencies
PCP: Dr. Neighbor.

Income/Insurance Coverage
MEDICAL COVERAGE HISTORY:
Medicare: Yes, TYPE: A, B.

Social Work Summary
ASSESSMENT:
Pt. is an 87 y.o. Caucasion female who was admitted w/ a spine fx. s/p a fall at home. W/e SW asked to see her re: dispo planning, also possible verbal abuse by son Doug.
.
INTERVENTION:
Met w/ pt., tried to talk about dispo planning, and about who will be able to help her at home. She says that both sons could asst. w/ brace care. She dismisses SW's statements that PT recommending much more CG and SBA than before. She talks about Louis and her taking the bus to the ferry, walking up the ferry ramp. Mentioned cabulance to her and she did not seem interested. Suggested that we cont. to talk about it.
Also talked to pt. about any verbal/physical abuse, pl. see family section for more.

RN said she had gotten a call from pt.'s son Doug expressing doubts about Louis being able to take care of pt. at home. Dr. Fletcher has placed call to Louis. SW should f/u w/ family re: dispo planning tomorrow..
PLAN OR OUTCOME:
Cont. to work w/ pt. on dispo plan..

MEDICINE INPATIENT PROGRESS NOTE

Hospital Day: 0

IDENTIFICATION/CHIEF CONCERN
supratherapeutic INR in setting of fall 1 week ago with lumbar fracture

INTERVAL HISTORY
-- INR 4.0
-- PT/OT evaluated needs with brace. Will need help w/ brace management, some with ADLs
-- attempted to discuss with son, unable to reach him.

PE
NAD, sitting up in chair with brace, poor hearing
RRR withotu m/r/g around brace
Lung CTA bilaterally above brace
Abdomen exam limited with brace
Ext without edema

Assessment/Plan
L3 burst fx: TLSO brac placed
-- will need placement w/ management of brace available.
-- pain control adequate w/ oxycodoen 5 q3, morphine 1 - 2mg IV q2 prn (3 dose last 24 hrs)
-- continue bowel regimen

INR elevation: unclear etiology.
-- Holding coumading
-- INR imrpoved to 4 today

DM: glucose in good range on metformin
HTN: in control on home HCTZ
FEN: continue low sodium diet
DVT px: therapeutic warfarin
Full code

Disposition: need to discuss with son Louis, who lives with her, what able to manage at home - he requires walker, but does take care of home needs. I've not been able to reach him after trying several times the # listed. SW assistance appreciated. From what I can tell discussing with Ms. Hoffman, she does not express concerns about abuse, and we do not have corroborating evidence to date. I will discuss as well w/ Loius. I talked with son Doug as well.

Spine Clinic in 6 weeks for follow up. Wear brace until revisit.

University of Washington Medical Center would like to thank you for allowing us to assist you with your healthcare needs.

It is important to see your doctor or primary care provider. Emergency Care may be incomplete without proper follow-up. If you become worse in any way, it is important that you call your doctor, or return to the Emergency Department. Please remember to take these instructions to your next doctor's appointment.

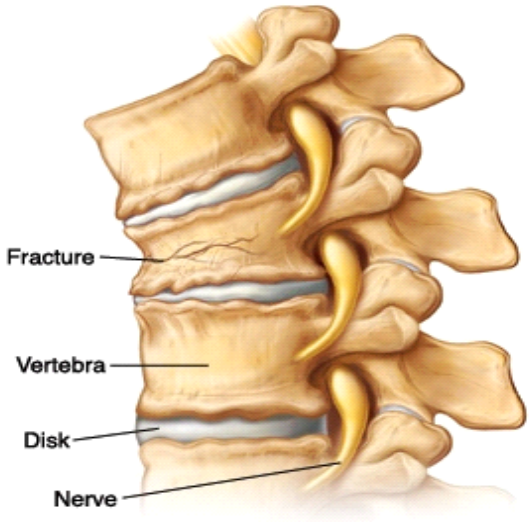
VERTEBRAL COMPRESSION FRACTURE



You have a compression fracture of one of the bones in your spine. This fracture usually occurs in older persons with osteoporosis (thinning of the bones). It may occur after a ground level fall, a car accident, or even with a very minor force (bending forward, getting up from a seated position, coughing or sneezing).

It may also occur in young healthy persons after a severe trauma (car accident or fall from a height). This is a stable fracture and does not cause any injury to the spinal cord or nerves. This injury will take 4-6 weeks to heal and can be treated at home with bed rest and pain medicine.

XRays often detect compression fractures, but a CT is sometimes ordered to determine if the fracture is displaced, and to determine if fracture fragments are affecting your spinal cord.

Pain medicine and anti-inflammatory medicine (such as ibuprofen) can be used for a short term, but long-term use increases the risk of side effects. These include GI bleeding and narcotic dependence. If pain medicine is needed for more than 1-2 months, you should talk to your doctor about surgical treatment to re-align the compressed bones.

Bed rest is fine during the first week, as needed for pain, but it is best to get out of bed as soon as

possible. This avoids the risk of blood clots forming in the legs and weakening of your muscles from prolonged bed rest.

A back brace (called TSLO) or abdominal binder may be prescribed to reduce pain by limiting motion at the fracture site. If you have osteoporosis, talk to your doctor about using calcium and Vitamin D supplements to prevent further bone loss. An exercise program (such as Pilates) to strengthen spine strength is a very important part of the treatment plan and should begin once the pain comes under control.

HOME CARE:

You may need to stay in bed the first few days. But, as soon as possible, begin sitting or walking to avoid problems with prolonged bed rest (muscle weakness, worsening back stiffness and pain, blood clots in the legs).

When in bed, try to find a position of comfort. A firm mattress is best. Try lying flat on your back with pillows under your knees. You can also try lying on your side with your knees bent up towards your chest and a pillow between your knees.

Avoid prolonged sitting. This puts more stress on the lower back than standing or walking.

During the first two days after injury, apply an ICE PACK to the painful area for 20 minutes every 2-4 hours. This will reduce swelling and pain. HEAT (hot shower, hot bath or heating pad) works well for muscle spasm. You can start with ice, then switch to heat after two days. Some patients feel best alternating ice and heat treatments. Use the one method that feels the best to you.

Take pain medicine as directed. Call your doctor if your pain is not well controlled. A dose change or stronger medicine may be needed.

Be aware of safe lifting methods and do not lift anything over 15 pounds until all the pain is gone.

FOLLOW UP with your doctor in one week, or as advised by our staff, to be sure the bone is healing properly.

[NOTE: A radiologist will review any X-rays or CTs that were taken. We will notify you of any new findings that may affect your care.]

GET PROMPT MEDICAL ATTENTION if any of the following occur:

Pain becomes worse or spreads to your arms or legs

Weakness or numbness in one or both legs

Loss of control over bowels or bladder, or numbness in the groin area

ID/CC
High INR

History of Present Illness
Pt transferred from OSH for INR of > 6. Pt had a mechanical fall at home few days ago, with back pain immediately afterward, rested on couch at home, son visited today and was concerned so took her to UWMC, where was diagnosed with L-spine compression fx. INR was checked (pt on lifelong Coumadin for DVT) and found to be supratherapeutic. No medicine beds at UW, so transferred here. Pt denies CP, HA, didn't hit head, no N/V, no focal weakness/numbness. Has back pain.

Radiological Studies
Radiology Results.
XR Chest (12/07/2012 01:56)
FINDINGS:
The bilateral upper lungs are obscured by an overlying medical device but no pneumothorax seen.
Cardiac and mediastinal contours are normal. Interstitial coarse markings centrally likely due to during. The lungs and pleural spaces are otherwise clear. Left 7th posterior rib fracture indeterminate aged and not seen on the recent CT T spine.

CT Cervical Spine (12/07/2012 01:55)
FINDINGS:
Marked degenerative changes are present.
Anterior grade 1 C5-C6 spondylolisthesis without fracture demonstrated may be posttraumatic or degenerative in etiology.
Exaggerated lordosis. No fracture detected. Indeterminate left thyroid nodule should be further evaluated with ultrasound.
No apical pneumothorax is detected.

CT Head (12/07/2012 01:55)
Preliminary findings:
No acute intracranial abnormalities. No definite fracture visualized.
Scattered BG lacunar infarcts.

CT Thoracic Spine (12/07/2012 01:55)
FINDINGS AND
IMPRESSION:
Mild appearing T12 compression deformity again noted. Also, a mild chronic appearing L1 superior endplate compression deformity is similar to the prior recent examination. Multiple bilateral mildly displaced rib fracture are present having the appearance of subacute to chronic fractures. No new fracture demonstrated. Diffuse osteopenia is present. Multi-level degenerative changes are visualized.

Bony alignment is otherwise normal.
Dependent pulmonary opacity is present may represent atelectasis although nonspecific. Calcified arterial vessels are present. Hiatal hernia noted.
Left thyroid nodule dictated separately needs follow-up ultrasound.

XR Lumbar Spine (12/06/2012 17:11)
Findings:
Interval placement of TLSO brace seen on the lateral projection. Generalized bony demineralization is again noted. Alignment of the lumbar spine is unchanged with mild left convexity degenerative scoliosis and prominent marginal osteophyte formation again seen at multiple levels of the lumbar spine. Mild compression deformity superior endplate of the L2 and L3 vertebral body is again noted. Mild wedge type compression deformity of the T12 vertebral body is again noted and appears unchanged. Degenerative osteoarthrosis of bilateral hip joints is seen.

CT Lumbar Spine (12/06/2012 12:41)
Impression:
1. Age indeterminate although likely chronic mild compression deformity of the superior endplate of the L3 vertebral body. Chronic mild anterior wedge compression deformity of T12 and mild superior endplate compression deformity of the L2 vertebral body unchanged dating back to 2008.
2. Multilevel degenerative scoliosis and spondylosis of the lumbar spine with resultant moderate central (greatest at L3-4) and moderate to severe neural foraminal narrowing at multiple levels (L3-4, L4-5, L5-S1) of the lumbar spine as described above.
Critical Results
Communication
A critical finding was noted on 12/06/2012 1:26 PM.

XR Lumbar Spine (12/06/2012 11:13)
Findings:
Alignment demonstrates convex left curvature centered at L3. There is a suggestion of retrolisthesis of L3 on L4, and evaluation is complicated by obliquity.
There are compression deformities of multiple vertebral bodies. Wedging of T12, L1, and L2 is similar to the 2008 thoracic spine radiograph, consistent with remote injuries.
Mild anterior wedging (approximately 20 percent) of L3 is consistent with compression injury of indeterminate age.
There is also mild height loss of the L5 vertebral body which is poorly visualized due to scoliosis and of indeterminate age.
There is disc space loss at multiple levels, worst at L4-5.
Findings discussed with Teresa Erskine at 11:30 on December 6, 2012

XR Pelvis (12/06/2012 11:13)

Findings:
No acute fracture. As before, the patient has undergone right hip dynamic hip screw placement for intertrochanteric fracture. No periprosthetic fracture. Hardware is intact and in unchanged position. There is mild bilateral hip joint osteoarthritis. There is advanced disc height loss in the imaged portion of the lower lumbar spine.

ED Course & Medical Decision Making
Pt had been accepted by Medicine here for admission. Given spinal fracture, I completed imaging of her C and T spine; also CT'd head given her c/o photosensitivity and high INR with recent fall. No additional injuries identified. Pt comfortable in her ED. All fx appear to be chronic/subacute based on reads. No e/o bleeding, therefore aggressive reversal not indicated.

Disposition/Plan
Final disposition
Admit to med/surg bed.

Impression/Diagnosis
Subacute multilevel spinal compression fractures
Supratherapeutic INR

ED Note

Hospital Day: 0

ID & Chief Concern/Problem *(required for all billing levels)*
_ supratherapeutic INR in setting of fall 1 week ago with lumbar fracture

History of Present Illness
_ The patient is a very functional 87y/o female with fairly benign PMH except for DVT for which she is on warfarin, who presents transferred from UW for admission following fall x 1 week ago. A week ago the patient fell in her kitchen when she tripped, landing on her buttocks. She saw her PCP for a scheduled visit today, who referred her to the ED for further evaluation. Xray and CT imaging of the lumbar spine revealed an L3 compression fracture of undeterminate age. Neurosurgery saw her in the ED, and recommended a TLSO brace, and discharge, with repeat imaging 6 months following. She was thought able to discharge home, when it was noted that her INR >6. Considering her high degree of fall risk in brace, and that she lives alone with son who can only abulate with a walker, it was thought prudent to admit her until INR was again therapeautic.

She was transferred to HMC ED and UW was at capacity. In HMC ER she had a head CT performed, which showed no acute intracranial processes. C Spine CT scan demonstrated no cerival fracture.

It is unclear why the pt's INR is so high.

Problems / Assessment / Plan

_Pt is a very pleasant 87y/o woman with evidence of L3-5 compression fractures of spine after fall, admitted for management of supratherapeutic INR

- Spine trauma - indeterminate whether these findings are new or old, there seems little radiographic evidence for acuity as per NS note. Concern regarding patient's saftey at home and ability to care for self in this condition. Historically, as per note dating back to 2007 a similar question was raised at the time. Considering all of this, I think she would benefit from inpatietnmanagment for pain control and SW involvement to determine discharge safety.
  - continue TLSO brace
  - will speak with NS in the morning to ask them to stop by to see if there are any further recs besides consulation note from UW ED visit
  - pain control with oxycodone 5mg po q3 hours standing with Morphine 1-2mg IV for breakthrough pain
  - docusate and senna for bowel regimen as we are dosing narcotics

- INR - unclear why she ws supratherapeutic, or when the DVT occurred that the warfarin is treating. Will contact pcp today to get answers in regards to perspectie length of treatment
  - for now, INR in downtrending, will hold this evening's dose while confirming dose and length of treatment

- Diabetes - continue Metformin

- HTN - continue HCTZ, monitor electrolytes

- FEN - 2gram sodium diet, pt will need assistance with feedings, gentle fluid hydration as her mobility is limited with 1/2NS at 75cc/hr

- DVT proph -systemic AC

- DIspo - as per social work. Pt is full code.

Follow-up Instructions:

Harborview Medical Center would like to thank you for allowing us to assist you with your healthcare needs.

It is important to see your doctor or primary care provider. Emergency Care may be incomplete without

proper follow-up. If you become worse in any way, it is important that you call your doctor, or return to the Emergency Department. Please remember to take these instructions to your next doctor's appointment.

Assessment

Assessment pt is a/o x 3 to 4, very HOH, has hearing aids on night stand but prefers not to wear them, MAEs, CMS intact. VSs, afebrile. Satting high 90's on RA, no cough noted except whenever pt drinks liquids-pt stated she has been choking on any type of liquids for a while at home-notified MD. pt has good appetite, 1:1 feeding as pt is on Jewitt brace and is not able to see food items on tray, on stool softners, no BM thus far. Foley in place draining clear yellow urine. pt currently is wearing Jewitt brace but is supposed to wear TLSO when HOB>30 degrees or OOB, Orhtotics has been in measuring size, until TLSO is avail, pt should not be mobilized per Dr. Yoon. pt is gettingscheduled oxycodone for pain, pt reported she has no pain if lying still, but severe low back spasm whenever repositioning is done. MD is aware. PT/OT pending post TLSO. Con to monitor progress..

87 y/o female s/p L3-L5 ant. compression fx's. Provided pt with a bivalved TLSO in pts room with son present. Log rolled pt, did not sit her upright. Pt is terribly hard of hearing and son is care giver. Discussed donning, doffing, hygiene with pt and her son. Log rolled pt into stockinette T-shirt, donned TLSO. Provided 2nd set of lining pads for bathing. Plan f/u Monday.

Occupational Therapy Note - HMC

ASSESSMENT:
87 y.o. admitted with spine fx after sustaining a fall. Per UDF, there was an incidental finding of supratherapeutic INR..
.
INTERVENTION:
UDF reports that pt. lives with her son (Louis), who also uses a FWW, and pt. currently is a fall risk. Louis is STB pt's caregiver, and there is concern that pt's other son, Doug, visits the pt. at home and is verbally abusive, which is very upsetting to the patient. UDF reports that pt's PCP, Dr Neighbor, knows the pt. very well and they have been talking about what to do about Doug and his tx of the patient. Another concern is that the pt. and Louis may overestimate her mobility and they expect that the pt. will just get on the metro bus and go home. PT/OT consults are pending.

D/t late hour, SW referred to weekend SW for safety assessment, clarification of whether an APS report is indicated, and clarification of discharge plan. She is currently OBS status and cannot access her Medicare for SNF placement..
.
PLAN OR OUTCOME:
Clarify whether APS referral is indicated and work with pt. to develop a safe discharge plan..
.

Social Work Progress Note

Transfer Accept Note

This patient was admitted by Dr. Thomas and I have discussed the clinically relevant issues related to the care of this patient with that provider. Please refer to the initial inpatient notes for further details.

I, Dr. Yoon, have accepted this patient onto my service, HMS 2 and will take over as the primary inpatient provider.

CC/ID: 87yF with h/o multiple DVTs since age 30, admitted s/p fall with L3 compression fracture and supratherapeutic INR. transferred from UW ED to here since UW was full.

Interval Events:
- Repeat INR 5.1, down from 6.0
- patient reports lower back muscle spasms. denies other symptoms like dyspnea, chest pain, bleeding anywhere
- reviewed patient's PCP records -- she is on coumadin for h/o multiple DVTs since age 30, records mention a left iliac DVT, LUE DVT, also prior duplex with L femoral vein wall thickening suggesting prior DVT there.
- patient was actually placed in a Jewitt brace at UW, instead of a TLSO as the notes say. I spoke with neurosurgery consult here who say that patient needs full TLSO instead
- patient reports she has been taking coumadin 10mg a qday at home

Plan: Continue plan as outlined in the prior notes.

Changes or additions to that plan are as follows:
- ordered TLSO brace, also PT/OT for after patient is fitted with brace
- start methocarbamol prn, in addition to prn opiates
- holding coumadin, restart when INR < 3. pharmacy recommends starting coumadin 10 alternating with 5.
- ordered TLSO brace for patient
- patient will need f/u in Neurosurgery Resident Clinic in 6 weeks. Until then she should keep the TLSO brace on whenever HOB > 30 degrees or OOB.
- dispo pending PT/OT evals. patient wants to go home, says that her adult son can take care of her, but he himself is disabled and needs to use a walker to get around. i'm thinking pt will need SNF placement.

Discharge Plan

Unmet Discharge Milestones: 87y/o woman with evidence of L3-5 compression fractures of spine after fall, admitted for management of supratherapeutic INR.

Target Discharge Date/Destination:

Home if cleared by PT/OT. Not eligible for SNFplacement under Medicare at this time dt OBS status. Pt lives w/son Louis on Bainbridge..

Contacts & Other Relevant info:

Medicare

Fills meds @ Safeway on Bainbridge

Transport TBD: usually takes city bus w/son to appts

Has been followed by PCP Dr William Neighbor @ UW Hall Health x30yrs.

Pt lives on Bainbridge w/son Louis who is DPOA (206-855-0815) & caregiver. At baseline, pt uses a walker & gets around on the bus w/Louis. Louis also uses a walker, but is able to cook & provide assistance for pt. If pt discharges to home, Louis states he can assist w/TLSO care. Pt has 3STE her home.

SW notified that son Louis states that they are trying to keep son Douglas out of the picture since he has been verbally threatening at times - Louis is addressing this w/pt's PCP, no referral has been made to APS.

ID/CC
U8170135 87 yo female CC: Lumbar and right hip pain

History of Present Illness
87 yo female reports lumbar and right hip pain s/p mechanical fall approximately one week ago. She tripped in her kitchen over some new linoleum that had been placed. She slipped and fell on her buttocks. She has been caring for herself in her home. She has been ambulating with the assitance of her walkers but notes increased pain and spasms in her lower back. Denies loss of bowel or bladder function. Denies numbness or radiculopathy.

She did not seek medical care at the time of injury. She was scheduled to see her PCP today and was instructed to go to the ED. She lives on Bainbridge Island in her home independently with her son.

Pelvis stable.
Spine: vertebral tenderness:, paraspinal tenderness: right side right paraspinous tenderness
.
Able to ambulate, experiences spasms during ambulation. Flexion/extension and abduction/adduction intact. Bilateral lower extremity strength equal, sensation intact to light and deep touch.
.

Neurologic:
No focal deficits.
Alert and oriented to person, place, and time.
Cranial nerves II - XII intact.
Strength testing reveals full, symmetric strength in both upper and lower extremities.
Grossly normal sensation present and equal in all 4 extremities.
Reflexes normal and symmetric.
Normal gait.
Skin:
No rash, bruises or ulcers.
Psychiatric:
Appropriate.
Normal mood.

Radiological Studies
Radiology Results.
CT Lumbar Spine (12/06/2012 12:41)
~Examination:
CT L SPINE WO CONT
Indication:
compression fx l3-l5, pain
Comparison:
Lumbar spine plain films obtained earlier the same day; prior lumbar spine plain films of 04/05/2005. Thoracic spine plain films of 02/25/2008.
Technique:
Non-contrast axial 0.625 mm spiral sections were obtained through the lumbar spine from the T12 through S1. Sagittal and coronal reformatted images were performed. Patient age specific scan parameters were used for radiation exposure.
Findings:
Note is made of a moderate hiatal hernia. Diffuse moderate to severe calcific atherosclerotic vascular disease of the abdominal aorta and iliofemoral vasculature is noted. Generalized bony demineralization is seen. Mild left convexity scoliosis of the lumbar spine is identified which appears slightly progressed compared with prior examination of 2005. There is mild straightening of the normal lumbar lordosis.
Mild anterior wedge/central compression deformity involving the T12 vertebral body and mild compression deformity of the superior endplate of the L2 vertebral body are again noted and appear unchanged dating back to 2008. Age indeterminate mild compression deformity involving the superior endplate of the L3 vertebral body is noted. The L4 and L5 vertebral bodies are within normal limits for size. No posterior bony retropulsion is identified. No fracture of the the middle or posterior column is noted. No paraspinous hematoma is identified.
Multilevel degenerative loss of intervertebral disc space is noted with associated vacuum disc phenomenon. Marginal osteophyte formation is seen along

the right lateral aspect of the vertebral bodies at L2, L3, and L4.
Mild-to-moderate multilevel facet joint hypertrophy is also seen.
At T12-L1 there is no significant central canal or neural foraminal narrowing.
At L1-2 there is a mild broad-based disc bulge along facet joint hypertrophy and ligamentum flavum thickening resulting in mild central and mild bilateral neural foraminal narrowing.
At L2-3 there is a mild broad-based disc bulge, eccentrically greater on the right along with facet joint hypertrophy and ligamentum flavum thickening resulting in moderate narrowing of the right lateral recess and right neural foramen.
At L3-4 there is broad-based disk bulge, asymmetrically greater on the right volume left lamina flavum thickening and facet hypertrophy result in moderate right lateral recess/central canal narrowing and moderate to severe right neural foraminal narrowing.
At L4-5 there is severe degenerative loss of intervertebral disk material with associated endplate bony sclerosis and moderate to severe facet joint hypertrophy and ligamentum flavum thickening. constellation of findings results in mild to moderate trefoil tight central spinal stenosis, and moderate to severe bilateral neural foraminal narrowing.
At L5-S1 there is a broad-based disc bulge along with moderate facet joint hypertrophy resulting in moderate central canal and moderate to severe bilateral neural foraminal narrowing.
Impression:
1. Age indeterminate although likely chronic mild compression deformity of the superior endplate of the L3 vertebral body. Chronic mild anterior wedge compression deformity of T12 and mild superior endplate compression deformity of the L2 vertebral body unchanged dating back to 2008.
2. Multilevel degenerative scoliosis and spondylosis of the lumbar spine with resultant moderate central (greatest at L3-4) and moderate to severe neural foraminal narrowing at multiple levels (L3-4, L4-5, L5-S1) of the lumbar spine as described above.
Critical Results
Communication
A critical finding was noted on 12/06/2012 1:26 PM.
Findings were communicated by Culbertson, Scott D, MD to Erskine, Teresa Myers, ARNP on 12/06/2012 1:26 PM.

XR Lumbar Spine (12/06/2012 11:13)
~Examination:
XR L SPINE 2-3 VIEWS
Indication:
fall, pain
Comparison:
Thoracic spine radiographs on February 25, 2008
Findings:
Alignment demonstrates convex left curvature centered at L3. There is a suggestion of retrolisthesis of L3 on L4, and evaluation is complicated by obliquity.
There are compression deformities of multiple vertebral bodies. Wedging of T12, L1, and L2 is similar to the 2008 thoracic spine radiograph, consistent with remote injuries.
Mild anterior wedging (approximately 20 percent) of L3 is consistent with compression injury of indeterminate age.
There is also mild height loss of the L5 vertebral body which is poorly visualized due to scoliosis and of indeterminate age.
There is disc space loss at multiple levels, worst at L4-5.
Findings discussed with Teresa Erskine at 11:30 on December 6, 2012

ED Course & Medical Decision Making
xray and CT ordered to evaluate L3-L5 compression fractures. Neurosurgery evaluated pt. and recommended TLSO. TLSO placed and post brace xrays ordered. Ed attending Heiner consulted. Care turned over to Sandy Walker, ARNP for discharge and completion of care. Pt in stable and satisfactory condition. TLSO brace applied.

Neuro surgery resident evaluated her follow-up x-ray, and stated the patient could be discharged. However, Ms. Hoffman's current INR is 6.2, with her fall risk and elevated INR the patient needs to be admitted. She is unable to be admitted here at the UWMC due to no available bed, she will be transfered to HMC through the ED, admitting physician is Dr. Thomas. Ms. Hoffman is in stable condition at the time of transfer.

ED Consults
ED attending Dr. Heiner
Neurosurgery on call for spine

Disposition/Plan
Final disposition
Discharge private residence, self care.
Theraputic plan:
RX: Oxycodone, Docusate, Ranitidine

.
Strict return precautions were given.
Follow-up:
HMC Spine Clinic in 6 weeks. Referral sent.
.

Impression/Diagnosis
L3-L5 Compression fractures

Attending Statement

I have personally examined this patient and discussed the history, clinical exam, diagnositic studies, and treatment plan with the midlevel provider. I concur with the documentation as presented, and where necessary for the purpose of clarification or accuracy, I have added to or modified the above note directly or with additional comments below.

Well appearing s/p mechanical fall with apparent isolated injury, NV intact, evaluated by NS in the ED. Given concern for worsening fall risk in light of supertheraputic INR indicated for thrombotic disease will pursue admission for observation, managment of INR and consideration for PT/OT prior to d/c home.

Patient was seen at the UWMC Emergency Department for fitting of a Jewett brace per order. Patient was log rolled for application of the size medium/short Otto Bock Jewett style brace. Patient and care giver were instructed on the use and care of the brace both verbally and in written form. Patient will keep in place at all times until instructed by the medical staff prior to discharge. Plan to follow as needed for any fit or function concerns 206-598-4026.

NEUROSURGERY EMERGENCY DEPARTMENT CONSULT NOTE

IDENTIFYING INFORMATION AND REASON FOR CONSULT
Ms. Hoffman is an 87-year-old woman presenting with low back pain and right hip pain after a mechanical ground level fall one week ago. Neurosurgery has been consulted for an age-indeterminate L3 compression fracture.

HISTORY OF PRESENT ILLNESS
Approximately one week ago, Ms. Hoffman tripped over some linoleum in her kitchen. She fell back and slid against the walls, eventually landing on her bottom. She was able to get herself up, but since then has had ongoing low back pain and right hip pain. She was scheduled to see her primary care physician anyway today so she did not seek any medical attention until now. However, when seen by her primary care physician, she was advised to come to the Emergency Department for evaluation instead. Therefore she presents today for her ongoing back pain. Her workup so far in the Emergency Department has included a x-ray of the lumbar spine and a CT of the lumbar spine. These images show an L3 compression fracture of indeterminate age and Neurosurgery Spine has been consulted for evaluation.

REVIEW OF SYSTEMS
Ms. Hoffman reports low back pain primarily when she ambulates. If she is not moving around she does not experience pain. She denies any fevers, chills, or bladder or bowel issues. However, although she has been voiding normally she does not remember when her last bowel movement was. She states that she was stooling normally until she started taking codeine for the back pain, and since then has not had a bowel movement. She does not know the exact day, but thinks it has been a few days. The remainder of the review of systems was negative, including headache, lightheadedness or dizziness, nausea, vomiting, change in appetite, numbness, weakness, tingling, burning, or other concerning symptoms.

PAST MEDICAL AND SURGICAL
1. Osteoarthritis.
2. Osteoporosis.
3. Hypertension.
4. History of DVT.
5. Status post abdominal hysterectomy with appendectomy.

MEDICATIONS
1. Calcium.
2. Vitamin D.
3. Atorvastatin.
4. Hydrochlorothiazide.
5. Losartan.
6. Timolol eye drops.
7. Codeine recently for pain.
8. Aspirin recently for pain.

9. Warfarin.

ALLERGIES
PENICILLINS and SULFA DRUGS.

SOCIAL HISTORY
Ms. Hoffman lives with her son on Bainbridge Island. She is a relatively active woman and recently came back from a bus tour around the country. She normally ambulates with a rolling seated walker, and is still able to do so; however, has been limited by pain.

FAMILY HISTORY
Noncontributory to this particular encounter.

PHYSICAL EXAMINATION
VITAL SIGNS: Temperature 36.5, heart rate 69, blood pressure 128/79, respirations 12, O2 saturation 98% on room air. Pain 5/10.
GENERAL APPEARANCE: An elderly thin woman in no apparent distress, lying comfortably on the stretcher. However, she grimaces in pain with certain exaggerated movements.
HEENT: Normocephalic, atraumatic. Sunglasses in place as she is sensitive to light. Pupils are equally round and reactive to light. Extraocular movements intact. No facial asymmetry. Tongue midline. Full range of motion of the neck in all directions without significant discomfort.
BACK: No obvious traumatic deformities or recent lesions. No palpable step-off. Tenderness in the lumbar area in the right paraspinous region with palpable muscle spasm. There is no point tenderness over the spine itself.
RECTAL: Perineal sensation intact. Normal tone. Voluntary control present.
NEUROLOGIC: GCS 15. Awake, alert, and oriented times four. Cranial nerves II to XII intact bilaterally except for VIII, which cannot assessed as the patient is hard of hearing at baseline even with her hearing aids in place. Sensation intact to light touch throughout. Strength 5/5 in bilateral upper extremities, 5/5 in bilateral lower extremities including hip flexors, knee flexors, knee extensors, dorsiflexors, plantar flexors, EHL. Deep tendon reflexes 2+ of the biceps, triceps, and brachioradialis tendons, 1+ deep tendon reflexes at patellar and Achilles tendons bilaterally. No Hoffmann's, downgoing toes. Notable for a very slight left-sided pronator drift.

LABORATORY DATA
None to review. Postvoid residual is measured at 22 mL by bladder scan.

IMAGING STUDIES
X-ray of the lumbar spine as well as a CT of the lumbar spine demonstrate significant degenerative disk disease and arthritic changes of the spine including multiple compression fractures consistent with osteoporosis. In comparison to a CT done in 2005, several of these compression fractures are present and appear chronic in nature. However, there is a compression fracture, a 1.1 type at L3 with approximately 15% to 20% height loss compared to the adjacent levels. There is no definitive evidence of an acute injury; specifically there is no obvious paraspinal swelling.

ASSESSMENT AND PLAN
Ms. Hoffman has a clinical picture concerning for an acute compression fracture, and does have a compression fracture at L3 which cannot be clearly determined to be chronic versus acute. My plan is to arrange for a TLSO brace to be fitted and then to have Ms. Hoffman have upright x-rays of her lumbar spine and AP and lateral views. Assuming that she is stable in her brace without any further height loss, she can be discharged from the ED today. We will have her followup in the Neurosurgery Residents Clinic at Harborview in six months with repeat uprights of her lumbar spine.

Thank you very much for consulting Neurosurgery regarding the care of this patient.

This case was discussed with Dr. Rohan Ramakrishna, Chief Resident of Neurosurgery, and he is in agreement with the above-stated plan. This has also been discussed with Dr. Fangyi Zhang, spine attending at Harborview, as there is no available spine attending here today.

Addendum:
Labs have now been drawn, and INR is 6.2. ED is requesting admission given her fall risk; however 1. Neurosurgery does not have a spine attending available tonight and 2. our service is not equipped to deal with her hematologic issues. I have recommended either admission to a medical service or transfer to HMC under Dr. Zhang's care if a spine attending is needed. The medicine service is capped, however, and both UWMC and HMC are at capacity, so Ms. Hoffman will most likely be transferred to NW Hospital.

Narrative 2694813

☐ Special Study

87 Year old female who had ground level fall and then laid on her sofa for a week before asking to be seen for the pain. She was found to have 3 compression FX in her back and her INR levels are very high. She is being TX to the trauma center for further care. She has a great deal of pain esp. on any movement or TX but she strongly refuses to take any pain medicine. She has no other obv. injuries.

Find the pt. A+O 4/4, Skin warm and dry with good color, breathing normally on RA. She has a back brace on. She is in care of the ED staff. There are no other obv. injuries.

Assist the pt. to the gurney, V/S, P.E. TX routine with no changes en route. The pt. went to ED GREEN bed 5 and report was given to staff.

Narrative 2694450

☐ Special Study

87 Y/O F pt complaining of extreme Lower Back pain s/p a fall from a week ago. Pt sts she was walking, caught part of the floorboards with her toe and fell down, sliding against the wall. She crawled to her couch and was able to bring herself up and sat on it. She did not want to go to the hospital then, but the back pain has increased since then. She had an appointment today at 10 at the clinic, but the pain was too bad on the ferry. Pt sts hx of seizures and blood clotting, as well deep vein thrombosis. Pt sts the pain "grips and then she cannon move until it releases." Pt sts the pain is 5/10 normally, but a 10/10 when it grips her. Per Fire: pt is poly med for HTN and blood thinners.

Pt found in wheelchair at terminal, ICO SFD
Neuro - A/Ox4 GCS 4/5/6, very hard of hearing
Skin - Warm/Dry/Normal
HEENT - No pain on palp
Chest - No pain on palp, equal chest rise/fall
Abdomen - No pain on palp, non-tender and soft x4 quadrants
Extremities - No pain on palp, good cms all 4 extremities.

Lower back pain

Pt stood and sat on gurney, refusing assistance from anyone. Pt vitals and exam done en route to UWMC, transported without incident. Pt transferred to room 13.

AN IMPORTANT MESSAGE FROM MEDICARE ABOUT YOUR RIGHTS

DEPARTMENT OF HEALTH & HUMAN SERVICES
Centers for Medicare & Medicaid Services
OMB Approval No. 0938-0692

AS A HOSPITAL INPATIENT, YOU HAVE THE RIGHT TO:

- Receive Medicare covered services. This includes medically necessary hospital services and services you may need after you are discharged, if ordered by your doctor. You have a right to know about these services, who will pay for them, and where you can get them.
- Be involved in any decisions about your hospital stay, and know who will pay for it.
- Report any concerns you have about the quality of care you receive to the Quality Improvement Organization (QIO) listed here Qualis Health at 1-877-290-4346.

YOUR MEDICARE DISCHARGE RIGHTS

Planning For Your Discharge: During your hospital stay, the hospital staff will be working with you to prepare for your safe discharge and arrange for services you may need after you leave the hospital. When you no longer need inpatient hospital care, your doctor or the hospital staff will inform you of your planned discharge date.

If you think you are being discharged too soon:

- You can talk to the hospital staff, your doctor and your managed care plan (if you belong to one) about your concerns.
- You also have the right to an appeal, that is, a review of your case by a Quality Improvement Organization (QIO). The QIO is an outside reviewer hired by Medicare to look at your case to decide whether you are ready to leave the hospital.
    - **If you want to appeal, you must contact the QIO no later than your planned discharge date and before you leave the hospital.**
    - If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
- If you do not appeal, but decide to stay in the hospital past your planned discharge date, you may have to pay for any services you receive after that date.
- **Step by step instructions for calling the QIO and filing an appeal are on page 2.**

To speak with someone at the hospital about this notice, call (206) 598-4310

Please sign and date here to show you received this notice and understand your rights.

12/07/2012 09:25 16

STEPS TO APPEAL YOUR DISCHARGE

- **STEP 1**: You must contact the QIO no later than your planned discharge date and before you leave the hospital. If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
  - Here is the contact information for the QIO:
    Qualis Health
    1-877-290-4346
  - You can file a request for an appeal any day of the week. **Once you speak to someone or leave a message, your appeal has begun.**
  - Ask the hospital if you need help contacting the QIO.
  - The name of this hospital is:

☐ HMC: Medicare Provider Number: ☐ 50-0064 (acute care) ☐ 50-S064 (psych) ☐ 50-T064 (rehab)
☐ UWMC:Medicare Provider Number: ☐ 50-0008 (acute care) ☐ 50-S008 (psych) ☐ 50-T008 (rehab)

- **STEP 2**: You will receive a detailed notice from the hospital or your Medicare Advantage or other Medicare managed care plan (if you belong to one) that explains the reasons they think you are ready to be discharged.
- **STEP 3**: The QIO will ask for your opinion. You or your representative need to be available to speak with the QIO, if requested. You or your representative may give the QIO a written statement, but you are not required to do so.
- **STEP 4**: The QIO will review your medical records and other important information about your case.
- **STEP 5**: The QIO will notify you of its decision within 1 day after it receives all necessary information.
  - If the QIO finds that you are not ready to be discharged, Medicare will continue to cover your hospital services.
  - If the QIO finds you are ready to be discharged, Medicare will continue to cover your services until noon of the day after the QIO notifies you of its decision.

IF YOU MISS THE DEADLINE TO APPEAL, YOU HAVE OTHER APPEAL RIGHTS:

- You can still ask the QIO or your plan (if you belong to one) for a review of your case:
  - If you have Original Medicare: Call the QIO listed above.
  - If you belong to a Medicare Advantage Plan or other Medicare managed care plan: Call your plan.
- If you stay in the hospital, the hospital may charge you for any services you receive after your planned discharge date.

For more information, call 1-800-MEDICARE (1-800-633-4227), or TTY: 1-877-486-2048.

CARE AGREEMENT

This form contains facts you should know about your health care at UW Medicine and from Children's University Medical Group, University of Washington Dentists and Oral Surgeons, and Seattle Cancer Care Alliance. If there is any part of this form that is unclear you can ask questions about it. At the bottom of the form there is a place for you to sign your name so that we know you have read this form (or had it read to you) and agree to receive health care from us.

UW Medicine includes:

- Harborview Medical Center and Clinics
- Northwest Hospital & Medical Center and Clinics
- University of Washington Medical Center and Clinics
- Airlift Northwest
- UW Medicine Neighborhood Clinics
- UW Physicians Sports Medicine Clinic
- Hall Health Primary Care Center,
- Summit Cardiology, and
- UW Physicians

Your health care team consists of medical doctors, doctors in training (residents and fellows), nurses, other health care professionals, and students of the health sciences. They will work together to diagnose and treat you. You will have an attending physician. This is the doctor who has primary responsibility for your care.

Photographs, videotapes, or other images of you may be used to keep a record of your care and treatment (including surgery). These images may become part of your medical record.

SIGNATURE

By signing below, it shows that you have read this document and agree to receive health care from UW Medicine. If there is any part of this form that is unclear, be sure to ask questions about it.

Patient Information for UW Medicine Inpatient Facility Directory

Inclusion in the Inpatient Facility Directory
Please Read this Statement Carefully

I understand that I have a choice as to whether or not to be included in the UW Medicine entity's facility directory. My decision is indicated by marking a box and signing this form.

☒ **YES, please include me in the Inpatient Facility Directory**

- Harborview Medical Center
- Northwest Hospital and Medical Center
- University of Washington Medical Center / Seattle Cancer Care Alliance
- Valley Medical Center

has informed me that that my name, location, and general health condition will be included in its inpatient facility directory. This information will be made available to people who ask for me by name such as my relatives, friends, and fellow employees.

If I have provided my religious affiliation to UW Medicine in the past or if I provide my religious affiliation to UW Medicine now, I authorize its disclosure to clergy of my religious affiliation. Disclosure of my religious affiliation may result in a visit from a clergy member of my affiliation while I am being treated at UW Medicine.

If you have provided your religious affiliation to UW Medicine in the past and do not want a visit from a clergy member of your affiliation, please inform the registration staff.

☐ **NO, please do not include me in the Inpatient Facility Directory**

I do not want my name, location and general health condition included in the UW Medicine entity's Inpatient Facility Directory. **If this is my choice, I understand it is my responsibility to notify family and friends of my location and phone number if I wish them to contact me. I also understand that by choosing not to be in the directory, UW Medicine will be unable to deliver items (for example, flowers and gifts) addressed to me.**

Financial Agreement & Consent for Disclosure

By signing below, I agree:

1. That Harborview Medical Center and Clinics (HMC), Northwest Hospital &Medical Center and Clinics (NWH), University of Washington Medical Center and Clinics (UWMC), Valley Medical Center and Clinics (VMC), UW Medicine Neighborhood Clinics (UWNC), UW Medicine Sports Medicine Clinic (UW Sports Med), , Hall Health Primary Care Center (HHPCC), and University of Washington Physicians (UWP) (collectively known as "UW Medicine"), University of Washington School of Dentistry (SOD), Children's University Medical Group (CUMG) and Seattle Cancer Care Alliance (SCCA) may share any financial information I provide to facilitate payment.
2. To pay UW Medicine, SOD, CUMG and/or SCCA for balances remaining after insurance benefits are paid, unless prohibited by law or contract.
3. To notify UW Medicine, SOD, CUMG and/or SCCA of changes to my insurance coverage and/or address.
4. That UW Medicine, SOD, CUMG and/or SCCA may impose reasonable interest, late charges, costs and/or reasonable attorney's fees should my account become delinquent.
5. To notify UW Medicine, SOD, CUMG, and/or SCCA if I am not able to pay my balance due within 30 days of receipt.
6. To apply to other financial programs that I may qualify for as requested by UW Medicine, SOD, CUMG and/or SCCA, should I be unable to pay my account.
7. That any lawsuit for collection of my account may be brought in King County, Washington.
8. To receiving information related to treatment, payment or health care operations, including receiving autodialed and prerecorded message calls and/or text messages, at any number I have provided or, if not current, to any number I am reasonably found to be associated with.
9. That UW Medicine may, at its discretion, disclose to appropriate parties my medical records or information from my records for treatment, payment and health care operation purposes.

I understand that:

- Each UW Medicine entity, SOD, CUMG, and/or SCCA each bill separately for their services.
- Patients who receive outpatient services at UWMC or HMC sites generally receive two bills: one bill from the physician or other provider (for the costs of the professional services) and one bill from the hospital (for the facility costs, i.e. building, equipment, supplies, staff time). Each of these bills may incur a co-payment or co-insurance responsibility, depending on my insurance coverage. The exact amount of the co-insurance or co-payment will depend upon the actual services provided and the coverage provisions of any insurance I have. At my request, clinic staff will provide me with an estimate of the billed charges for outpatient services I am likely to receive.
- UW Medicine requests and, if I provide it, will use my Social Security Number to facilitate access to any potential federal or state health care benefits, to verify my identity, or to facilitate discharge planning. Providing my Social Security Number is voluntary except when applying for state and federal health care benefits.
- My Consumer Credit Report information may be accessed for the following reasons: to make determination of available financial assistance, assistance in managing the payment process, or if I report that my identity has been stolen.

Statement to Permit Payment of Medicare or Insurance Benefits to Provider

I request payment of authorized Medicare or insurance benefits for any services furnished to me by UW Medicine, SOD, CUMG, and/or SCCA. I authorize any holder of medical and other information about me to release to Medicare [and its agents] or other insurance providers any information needed to determine these benefits for related services.

AN IMPORTANT MESSAGE FROM MEDICARE ABOUT YOUR RIGHTS

DEPARTMENT OF HEALTH & HUMAN SERVICES
Centers for Medicare & Medicaid Services
OMB Approval No. 0938-0692

AS A HOSPITAL INPATIENT, YOU HAVE THE RIGHT TO:

- Receive Medicare covered services. This includes medically necessary hospital services and services you may need after you are discharged, if ordered by your doctor. You have a right to know about these services, who will pay for them, and where you can get them.
- Be involved in any decisions about your hospital stay, and know who will pay for it.
- Report any concerns you have about the quality of care you receive to the Quality Improvement Organization (QIO) listed here Qualis Health at 1-877-290-4346.

YOUR MEDICARE DISCHARGE RIGHTS

Planning For Your Discharge: During your hospital stay, the hospital staff will be working with you to prepare for your safe discharge and arrange for services you may need after you leave the hospital. When you no longer need inpatient hospital care, your doctor or the hospital staff will inform you of your planned discharge date.

If you think you are being discharged too soon:

- You can talk to the hospital staff, your doctor and your managed care plan (if you belong to one) about your concerns.
- You also have the right to an appeal, that is, a review of your case by a Quality Improvement Organization (QIO). The QIO is an outside reviewer hired by Medicare to look at your case to decide whether you are ready to leave the hospital.
  - **If you want to appeal, you must contact the QIO no later than your planned discharge date and before you leave the hospital.**
  - If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
- If you do not appeal, but decide to stay in the hospital past your planned discharge date, you may have to pay for any services you receive after that date.
- **Step by step instructions for calling the QIO and filing an appeal are on page 2.**

To speak with someone at the hospital about this notice, call 2067449535

Please sign and date here to show you received this notice and understand your rights.

STEPS TO APPEAL YOUR DISCHARGE

- **STEP 1**: You must contact the QIO no later than your planned discharge date and before you leave the hospital. If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
  - Here is the contact information for the QIO:
    Qualis Health
    1-877-290-4346
  - You can file a request for an appeal any day of the week. **Once you speak to someone or leave a message, your appeal has begun.**
  - Ask the hospital if you need help contacting the QIO.
  - The name of this hospital is:
    ☒ HMC: Medicare Provider Number: ☒ 50-0064 (acute care) ☐ 50-S064 (psych) ☐ 50-T064 (rehab)
    ☐ UWMC:Medicare Provider Number: ☐ 50-0008 (acute care) ☐ 50-S008 (psych) ☐ 50-T008 (rehab)
- **STEP 2**: You will receive a detailed notice from the hospital or your Medicare Advantage or other Medicare managed care plan (if you belong to one) that explains the reasons they think you are ready to be discharged.
- **STEP 3**: The QIO will ask for your opinion. You or your representative need to be available to speak with the QIO, if requested. You or your representative may give the QIO a written statement, but you are not required to do so.
- **STEP 4**: The QIO will review your medical records and other important information about your case.
- **STEP 5**: The QIO will notify you of its decision within 1 day after it receives all necessary information.
  - If the QIO finds that you are not ready to be discharged, Medicare will continue to cover your hospital services.
  - If the QIO finds you are ready to be discharged, Medicare will continue to cover your services until noon of the day after the QIO notifies you of its decision.

IF YOU MISS THE DEADLINE TO APPEAL, YOU HAVE OTHER APPEAL RIGHTS:

- You can still ask the QIO or your plan (if you belong to one) for a review of your case:
  - If you have Original Medicare: Call the QIO listed above.
  - If you belong to a Medicare Advantage Plan or other Medicare managed care plan: Call your plan.
- If you stay in the hospital, the hospital may charge you for any services you receive after your planned discharge date.

For more information, call 1-800-MEDICARE (1-800-633-4227), or TTY: 1-877-486-2048.

CERTIFICATION FOR PATIENT TRANSFER

THIS HOSPITAL IS REQUIRED BY FEDERAL LAW TO PROVIDE ANY PERSON PRESENTING FOR MEDICAL TREATMENT WITH A MEDICAL SCREENING EXAMINATION TO DETERMINE WHETHER AN EMERGENCY MEDICAL CONDITION EXISTS AND TO PROVIDE NECESSARY STABILIZING CARE WITHIN ITS CAPABILITIES FOR EMERGENCY MEDICAL CONDITIONS WITHOUT REGARD TO A PATIENT'S MEANS OR ABILITY TO PAY.

PHYSICIAN

① REASON FOR TRANSFER

- [x] For services not available here (e.g. pediatric, OB, hyperbaric, court-ordered, lack of capacity, etc)
- [ ] Patient or family request
- [ ] Other (specify): _____

② RECEIVING FACILITY ACCEPTANCE

Facility has been contacted, has capability to care for patient, and has agreed to accept and provide care to patient.

Name of Facility: HMC
Location within facility: ED
M.D. Accepting care: Dr Thomas
Receiving facility called by:

- [ ] HMC staff: _____
- [x] UWMC staff: _____
- [ ] County Designated Mental Health Professional

③ RISKS OF TRANSFER

In addition to risks present in all transfers, such as traffic delay, accidents, deterioration or worsening of condition en route, pain or discomfort during transport, specific risks for this patient include:

Pt is a fall risk and has an INR of 6.2. Pt has a T3-5 compression fx TLSO Brace in place

Risks of refusal of transfer include worsening of condition if patient remains here; failure to obtain necessary services; (other) _____

④ BENEFITS OF TRANSFER

- [ ] Receipt of services not available here
- [ ] Other medical benefits (specify): Hosp full unable to admit.

⑤ MODE/SUPPORT/TREATMENT DURING TRANSFER

- [x] Basic Life Support (agency:_____)
- [ ] Advanced Life Support (circle one: Medic One; AMR, other:_____)
- [ ] Other (specify:_____)

SUPPORT/TREATMENT DURING TRANSFER

- [ ] Restraints (new order/continue CTU order)
- [x] IV _____ [ ] Cardiac monitor
- [ ] O_2 [ ] Pulse Oximeter
- [ ] Other (specify:_____)

⑥ PATIENT CONDITION

The patient has been examined and any emergency medical condition identified has been treated within the capabilities of the hospital.

(check one box)

- [x] A. No material deterioration of this patient's condition is likely to result from, or occur during transfer.

OR

- [ ] B. The patient may be at risk for deterioration from or during transport.

Based upon my examination of the patient and the information available to me at the time of transfer, I certify that the benefits from transfer and reasonably anticipated care at the receiving facility outweigh any increased risks of transfer for this patient.

Financial Agreement & Consent for Disclosure

By signing below, I agree:

1. That Harborview Medical Center and Clinics (HMC), Northwest Hospital &Medical Center and Clinics (NWH), University of Washington Medical Center and Clinics (UWMC), Valley Medical Center and Clinics (VMC), UW Medicine Neighborhood Clinics (UWNC), UW Medicine Sports Medicine Clinic (UW Sports Med), , Hall Health Primary Care Center (HHPCC), and University of Washington Physicians (UWP) (collectively known as "UW Medicine"), University of Washington School of Dentistry (SOD), Children's University Medical Group (CUMG) and Seattle Cancer Care Alliance (SCCA) may share any financial information I provide to facilitate payment.
2. To pay UW Medicine, SOD, CUMG and/or SCCA for balances remaining after insurance benefits are paid, unless prohibited by law or contract.
3. To notify UW Medicine, SOD, CUMG and/or SCCA of changes to my insurance coverage and/or address.
4. That UW Medicine, SOD, CUMG and/or SCCA may impose reasonable interest, late charges, costs and/or reasonable attorney's fees should my account become delinquent.
5. To notify UW Medicine, SOD, CUMG, and/or SCCA if I am not able to pay my balance due within 30 days of receipt.
6. To apply to other financial programs that I may qualify for as requested by UW Medicine, SOD, CUMG and/or SCCA, should I be unable to pay my account.
7. That any lawsuit for collection of my account may be brought in King County, Washington.
8. To receiving information related to treatment, payment or health care operations, including receiving autodialed and prerecorded message calls and/or text messages, at any number I have provided or, if not current, to any number I am reasonably found to be associated with.
9. That UW Medicine may, at its discretion, disclose to appropriate parties my medical records or information from my records for treatment, payment and health care operation purposes.

I understand that:

- Each UW Medicine entity, SOD, CUMG, and/or SCCA each bill separately for their services.
- Patients who receive outpatient services at UWMC or HMC sites generally receive two bills: one bill from the physician or other provider (for the costs of the professional services) and one bill from the hospital (for the facility costs, i.e. building, equipment, supplies, staff time). Each of these bills may incur a co-payment or co-insurance responsibility, depending on my insurance coverage. The exact amount of the co-insurance or co-payment will depend upon the actual services provided and the coverage provisions of any insurance I have. At my request, clinic staff will provide me with an estimate of the billed charges for outpatient services I am likely to receive.
- UW Medicine requests and, if I provide it, will use my Social Security Number to facilitate access to any potential federal or state health care benefits, to verify my identity, or to facilitate discharge planning. Providing my Social Security Number is voluntary except when applying for state and federal health care benefits.
- My Consumer Credit Report information may be accessed for the following reasons: to make determination of available financial assistance, assistance in managing the payment process, or if I report that my identity has been stolen.

Statement to Permit Payment of Medicare or Insurance Benefits to Provider

I request payment of authorized Medicare or insurance benefits for any services furnished to me by UW Medicine, SOD, CUMG, and/or SCCA. I authorize any holder of medical and other information about me to release to Medicare [and its agents] or other insurance providers any information needed to determine these benefits for related services. unable to obtain

AN IMPORTANT MESSAGE FROM MEDICARE ABOUT YOUR RIGHTS

DEPARTMENT OF HEALTH & HUMAN SERVICES
Centers for Medicare & Medicaid Services
OMB Approval No. 0938-0692

AS A HOSPITAL INPATIENT, YOU HAVE THE RIGHT TO:

- Receive Medicare covered services. This includes medically necessary hospital services and services you may need after you are discharged, if ordered by your doctor. You have a right to know about these services, who will pay for them, and where you can get them.
- Be involved in any decisions about your hospital stay, and know who will pay for it.
- Report any concerns you have about the quality of care you receive to the Quality Improvement Organization (QIO) listed here Qualis Health at 1-877-290-4346.

YOUR MEDICARE DISCHARGE RIGHTS

Planning For Your Discharge: During your hospital stay, the hospital staff will be working with you to prepare for your safe discharge and arrange for services you may need after you leave the hospital. When you no longer need inpatient hospital care, your doctor or the hospital staff will inform you of your planned discharge date.

If you think you are being discharged too soon:

- You can talk to the hospital staff, your doctor and your managed care plan (if you belong to one) about your concerns.
- You also have the right to an appeal, that is, a review of your case by a Quality Improvement Organization (QIO). The QIO is an outside reviewer hired by Medicare to look at your case to decide whether you are ready to leave the hospital.
    - **If you want to appeal, you must contact the QIO no later than your planned discharge date and before you leave the hospital.**
    - If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
- If you do not appeal, but decide to stay in the hospital past your planned discharge date, you may have to pay for any services you receive after that date.
- **Step by step instructions for calling the QIO and filing an appeal are on page 2.**

To speak with someone at the hospital about this notice, call 2067449535

Please sign and date here to show you received this notice and understand your rights.

STEPS TO APPEAL YOUR DISCHARGE

- **STEP 1**: You must contact the QIO no later than your planned discharge date and before you leave the hospital. If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
  - Here is the contact information for the QIO:
    Qualis Health
    1-877-290-4346
  - You can file a request for an appeal any day of the week. **Once you speak to someone or leave a message, your appeal has begun.**
  - Ask the hospital if you need help contacting the QIO.
  - The name of this hospital is:

☐ HMC: Medicare Provider Number: ☐ 50-0064 (acute care) ☐ 50-S064 (psych) ☐ 50-T064 (rehab)
☑ UWMC:Medicare Provider Number: ☐ 50-0008 (acute care) ☐ 50-S008 (psych) ☐ 50-T008 (rehab)

- **STEP 2**: You will receive a detailed notice from the hospital or your Medicare Advantage or other Medicare managed care plan (if you belong to one) that explains the reasons they think you are ready to be discharged.
- **STEP 3**: The QIO will ask for your opinion. You or your representative need to be available to speak with the QIO, if requested. You or your representative may give the QIO a written statement, but you are not required to do so.
- **STEP 4**: The QIO will review your medical records and other important information about your case.
- **STEP 5**: The QIO will notify you of its decision within 1 day after it receives all necessary information.
  - If the QIO finds that you are not ready to be discharged, Medicare will continue to cover your hospital services.
  - If the QIO finds you are ready to be discharged, Medicare will continue to cover your services until noon of the day after the QIO notifies you of its decision.

IF YOU MISS THE DEADLINE TO APPEAL, YOU HAVE OTHER APPEAL RIGHTS:

- You can still ask the QIO or your plan (if you belong to one) for a review of your case:
  - If you have Original Medicare: Call the QIO listed above.
  - If you belong to a Medicare Advantage Plan or other Medicare managed care plan: Call your plan.
- If you stay in the hospital, the hospital may charge you for any services you receive after your planned discharge date.

For more information, call 1-800-MEDICARE (1-800-633-4227), or TTY: 1-877-486-2048.

PATIENT PROPERTY NOTICE, WAIVER AND ASSUMPTION OF RISK

Harborview Medical Center (HMC) staff respects and promotes the rights of all patients. Patients should expect that efforts are taken to promote a safe and secure environment. HMC will make reasonable efforts to safeguard the personal property of patients, however property is generally the responsibility of patients and their families and HMC cannot guarantee the security of personal property. To minimize potential harm to personal property including loss, misplaced, stolen or damaged items, the following practices will be observed:

HMC has two choices for storing personal property of patients during hospitalization:	1	**One choice is placing items in the HMC "Valuables and Property Storage System". This choice involves HMC placing valuables (examples: watch, jewelry, dentures, glasses) or property into a secure area. This "Valuables and Property Storage System" utilizes a witnessed (2 person) property check-in process. It is generally for nonessential items and access to this may be limited by hours of operation.**
	2	**Another choice for storing property is in the patient's room. The patient is generally responsible for these items and these items are generally accessible to the patient. HMC will provide limited locked storage spaces for patient storage of personal property in the hospital room during hospitalization.**

- Patients are strongly encouraged to leave and/or send all nonessential belongings and valuables home.
- Biohazards or severely damaged clothing are generally discarded immediately unless required for forensic evidence. (Biohazards means: clothing or other items are contaminated in the judgment of medical staff and presents a health risk.)
- HMC will dispose of unclaimed patient belongings as allowed by law after proper notice and time period for retrieval of items. When patient belongings are not claimed after 30 days, notice will be given and if such property remains unclaimed for an additional 60 days then it shall be disposed of as allowed by law.
- Further information about HMC's property policies and procedures will be provided as needed or requested to the patient or patient's authorized representative.

Patient's Personal Property Liability Agreement

I, the undersigned, have read or have been informed about the above policy. I/patient understand that I/patient am responsible for all property brought to Harborview Medical Center. I/patient understand that the hospital recommends all nonessential items be left at home or be sent home with family or friends.

I/patient understand that the hospital provides a "Valuable and Property Storage System" for important personal property and that access to this area may be limited by hours of operation.

I/patient agree to hold the hospital and it's employees harmless from liability for my/patient's property if it is lost, misplaced, stolen or damaged when such property is not placed in the "Valuable and Property Storage System" or otherwise under the direct control of the hospital. I/patient further acknowledge the potential harm to property maintained by the hospital due to circumstances beyond the hospital's control (e.g. fire, earthquake) and hereby release the hospital from any liability in such circumstances.

Patient Information for UW Medicine Inpatient Facility Directory

Inclusion in the Inpatient Facility Directory
Please Read this Statement Carefully

I understand that I have a choice as to whether or not to be included in the UW Medicine entity's facility directory. My decision is indicated by marking a box and signing this form.

☑ **YES, please include me in the Inpatient Facility Directory**

- Harborview Medical Center
- Northwest Hospital and Medical Center
- University of Washington Medical Center / Seattle Cancer Care Alliance
- Valley Medical Center

has informed me that that my name, location, and general health condition will be included in its inpatient facility directory. This information will be made available to people who ask for me by name such as my relatives, friends, and fellow employees.

If I have provided my religious affiliation to UW Medicine in the past or if I provide my religious affiliation to UW Medicine now, I authorize its disclosure to clergy of my religious affiliation. Disclosure of my religious affiliation may result in a visit from a clergy member of my affiliation while I am being treated at UW Medicine.

If you have provided your religious affiliation to UW Medicine in the past and do not want a visit from a clergy member of your affiliation, please inform the registration staff.

☐ **NO, please do not include me in the Inpatient Facility Directory**

I do not want my name, location and general health condition included in the UW Medicine entity's Inpatient Facility Directory. **If this is my choice, I understand it is my responsibility to notify family and friends of my location and phone number if I wish them to contact me. I also understand that by choosing not to be in the directory, UW Medicine will be unable to deliver items (for example, flowers and gifts) addressed to me.**

Financial Agreement & Consent for Disclosure

By signing below, I agree:

1. That Harborview Medical Center and Clinics (HMC), Northwest Hospital &Medical Center and Clinics (NWH), University of Washington Medical Center and Clinics (UWMC), Valley Medical Center and Clinics (VMC), UW Medicine Neighborhood Clinics (UWNC), UW Medicine Sports Medicine Clinic (UW Sports Med), , Hall Health Primary Care Center (HHPCC), and University of Washington Physicians (UWP) (collectively known as "UW Medicine"), University of Washington School of Dentistry (SOD), Children's University Medical Group (CUMG) and Seattle Cancer Care Alliance (SCCA) may share any financial information I provide to facilitate payment.
2. To pay UW Medicine, SOD, CUMG and/or SCCA for balances remaining after insurance benefits are paid, unless prohibited by law or contract.
3. To notify UW Medicine, SOD, CUMG and/or SCCA of changes to my insurance coverage and/or address.
4. That UW Medicine, SOD, CUMG and/or SCCA may impose reasonable interest, late charges, costs and/or reasonable attorney's fees should my account become delinquent.
5. To notify UW Medicine, SOD, CUMG, and/or SCCA if I am not able to pay my balance due within 30 days of receipt.
6. To apply to other financial programs that I may qualify for as requested by UW Medicine, SOD, CUMG and/or SCCA, should I be unable to pay my account.
7. That any lawsuit for collection of my account may be brought in King County, Washington.
8. To receiving information related to treatment, payment or health care operations, including receiving autodialed and prerecorded message calls and/or text messages, at any number I have provided or, if not current, to any number I am reasonably found to be associated with.
9. That UW Medicine may, at its discretion, disclose to appropriate parties my medical records or information from my records for treatment, payment and health care operation purposes.

I understand that:

- Each UW Medicine entity, SOD, CUMG, and/or SCCA each bill separately for their services.
- Patients who receive outpatient services at UWMC or HMC sites generally receive two bills: one bill from the physician or other provider (for the costs of the professional services) and one bill from the hospital (for the facility costs, i.e. building, equipment, supplies, staff time). Each of these bills may incur a co-payment or co-insurance responsibility, depending on my insurance coverage. The exact amount of the co-insurance or co-payment will depend upon the actual services provided and the coverage provisions of any insurance I have. At my request, clinic staff will provide me with an estimate of the billed charges for outpatient services I am likely to receive.
- UW Medicine requests and, if I provide it, will use my Social Security Number to facilitate access to any potential federal or state health care benefits, to verify my identity, or to facilitate discharge planning. Providing my Social Security Number is voluntary except when applying for state and federal health care benefits.
- My Consumer Credit Report information may be accessed for the following reasons: to make determination of available financial assistance, assistance in managing the payment process, or if I report that my identity has been stolen.

Statement to Permit Payment of Medicare or Insurance Benefits to Provider

I request payment of authorized Medicare or insurance benefits for any services furnished to me by UW Medicine, SOD, CUMG, and/or SCCA. I authorize any holder of medical and other information about me to release to Medicare [and its agents] or other insurance providers any information needed to determine these benefits for related services.

CARE AGREEMENT

This form contains facts you should know about your health care at UW Medicine and from Children's University Medical Group, University of Washington Dentists and Oral Surgeons, and Seattle Cancer Care Alliance. If there is any part of this form that is unclear you can ask questions about it. At the bottom of the form there is a place for you to sign your name so that we know you have read this form (or had it read to you) and agree to receive health care from us.

UW Medicine includes:

- Harborview Medical Center and Clinics
- Northwest Hospital & Medical Center and Clinics
- University of Washington Medical Center and Clinics
- Airlift Northwest
- UW Medicine Neighborhood Clinics
- UW Physicians Sports Medicine Clinic
- Hall Health Primary Care Center,
- Summit Cardiology, and
- UW Physicians

Your health care team consists of medical doctors, doctors in training (residents and fellows), nurses, other health care professionals, and students of the health sciences. They will work together to diagnose and treat you. You will have an attending physician. This is the doctor who has primary responsibility for your care.

Photographs, videotapes, or other images of you may be used to keep a record of your care and treatment (including surgery). These images may become part of your medical record.

SIGNATURE

By signing below, it shows that you have read this document and agree to receive health care from UW Medicine. If there is any part of this form that is unclear, be sure to ask questions about it.

HARBORVIEW MEDICAL CENTER
UW Medicine

12/7/2012 10:35 AM

This letter serves as notification of a billing change for services provided to you at Harborview Medical Center.

Per Medicare Condition of Participation regulations, Harborview Medical Center reviews all Medicare admissions to determine if the services provided qualify for Inpatient Billing, per Medicare guidelines. When the inpatient admission does not meet these guidelines, we must bill the services to Medicare Part B insurance rather than to Medicare Part A insurance.

Based on our review, we have determined the care you received would have been more appropriately delivered in an outpatient/observation setting rather than an Inpatient status. Thus, we will be billing your Medicare Part B insurance for these services to ensure compliance with Medicare regulations.

This letter is to inform you of the change in status and its impact on you. This hospital stay is covered under Medicare Part B. You will be responsible for all deductibles and co-pays incurred.

If you have any questions or concerns regarding your billing status please contact our Utilization Management Department at 744-9535.

Thank you,

Patient Access Services Department

I acknowledge receipt of a copy of this Medicare Notice of Status Change Letter.

STEPS TO APPEAL YOUR DISCHARGE

- **STEP 1**: You must contact the QIO no later than your planned discharge date and before you leave the hospital. If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
  - Here is the contact information for the QIO:
    Qualis Health
    1-877-290-4346
  - You can file a request for an appeal any day of the week. **Once you speak to someone or leave a message, your appeal has begun.**
  - Ask the hospital if you need help contacting the QIO.
  - The name of this hospital is:

☒ HMC: Medicare Provider Number: ☒ 50-0064 (acute care) ☐ 50-S064 (psych) ☐ 50-T064 (rehab)
☐ UWMC:Medicare Provider Number: ☐ 50-0008 (acute care) ☐ 50-S008 (psych) ☐ 50-T008 (rehab)

- **STEP 2**: You will receive a detailed notice from the hospital or your Medicare Advantage or other Medicare managed care plan (if you belong to one) that explains the reasons they think you are ready to be discharged.
- **STEP 3**: The QIO will ask for your opinion. You or your representative need to be available to speak with the QIO, if requested. You or your representative may give the QIO a written statement, but you are not required to do so.
- **STEP 4**: The QIO will review your medical records and other important information about your case.
- **STEP 5**: The QIO will notify you of its decision within 1 day after it receives all necessary information.
  - If the QIO finds that you are not ready to be discharged, Medicare will continue to cover your hospital services.
  - If the QIO finds you are ready to be discharged, Medicare will continue to cover your services until noon of the day after the QIO notifies you of its decision.

IF YOU MISS THE DEADLINE TO APPEAL, YOU HAVE OTHER APPEAL RIGHTS:

- You can still ask the QIO or your plan (if you belong to one) for a review of your case:
  - If you have Original Medicare: Call the QIO listed above.
  - If you belong to a Medicare Advantage Plan or other Medicare managed care plan: Call your plan.
- If you stay in the hospital, the hospital may charge you for any services you receive after your planned discharge date.

For more information, call 1-800-MEDICARE (1-800-633-4227), or TTY: 1-877-486-2048.

PATIENT AND FAMILY EDUCATION

Body jacket (TLSO Thoracic Lumbar Sacral Orthotic)

Care Instructions

Your doctor has ordered you to wear the Body Jacket (TLSO - Thoracic Lumbar Sacral Orthotic brace). *It is very important that you do not remove your brace.* The brace will keep your back in proper position while it heals.

If you have any questions, please call our UW Medicine Prosthetic & Orthotic Services at **206-598-4026** or page them at 206-416-1172.
Please call if you have skin irritation or redness that doesn't go away in 15 minutes or if the brace doesn't meet at the sides.

General Information

Some of your movements will be restricted while wearing the brace.

- *It is important that you do not reach sideways and twist your body.*
- You will learn to bend at the hips and knees instead of your waist. If you brace "rides" upward while you are sitting, it is best to lie down on your back and re-tighten the strips. If the brace does not fit well, contact the Orthotic Clinic for adjustments.
- You should wear a snugly fitting undershirt under the Body Jacket. Sleeveless tank top shirts are easiest to put on. The undershirt protects your skin from being rubbed by the Body Jacket and absorbs sweat. Women may wear a bra if you like. It is best to wear one with a front clasp. Change your undershirt and bra daily.
- A large shirt is the easiest to wear over the Body Jacket. Wear your undershorts or underpants on top of the Body Jacket. It will make it easier to go to the toilet without taking off the Body Jacket.
- You will need to inspect the skin for areas of redness or sores when taking a bath or if there is a spot that is rubbing or pinching you. Any marks on your skin should go away within 15 to 20 minutes. A wrinkle in your undershirt may cause rubbing.

Bathing & Skin Care

When you are at home, you should shower or bathe with the Body Jacket on. After you shower or wash, you will need to change your undershirt and dry the Body Jacket.

You will need a second person to help you.

- Lie down in bed. Make your body straight.

- *The person helping you will* loosen the Velcro straps at your sides.
- Remove the front piece of the Body Jacket.
- Help you to logroll (turn in one piece) to one side using the back of the Body Jacket. To do this, you should bend your knees. Your assistant will reach under your knees with one hand and behind your shoulder with the other and slowly roll you to one side. *Keep your body as straight as possible.*
- Remove the back of the Body Jacket.

- Pull up the back of the undershirt as much as possible.
- Wash and dry the back.

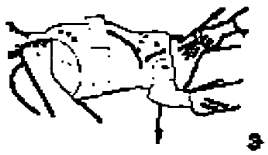
- Logroll onto your back. *Keep your body as straight as possible.*
- Remove the undershirt. *Do not twist or turn.*
- Wash and dry the front.

- Put new undershirt on. Do not try to pull it down yet. *Do not twist or turn.*
- Dry off Body Jacket with towel or hair dryer set on "cool."

- Logroll (turn in one piece) to one side. *Keep your body as straight as possible.*
- Pull undershirt down in back. Do not leave any wrinkles.
- Place back half of Body Jacket on back. Be sure waistline of Body Jacket is just above pelvic bone (between your lower ribs and your hip)

12/11/201220:48 6

- Log roll on to your back having your assistant holding Body Jacket against your body. Be sure the back of the Body Jacket is centered on your body.
- Pull down undershirt in front. ***Do not leave any wrinkles.***



- Place front half of Body Jacket on front. Be sure waistline of Body Jacket is just above pelvic bone. Waistline of front and back of Body Jacket should meet
- The sides of the jacket should meet - if there is a gap, call the orthotist.
- Replace and tighten the lower Velcro strap on one side of Body Jacket. The front side of the Body Jacket should overlap the back. Be careful not to pinch the skin between the two pieces.
- Replace and tighten the upper Velcro strap on the same side.

- To replace the other straps pull undershirt on the un-Velcroed side diagonally, and down (toward the opposite foot). Replace and tighten the lower Velcro strap. Pull up and diagonally on undershirt (same side).
  Replace and tighten upper Velcro strap.

To Clean Inside of Body Jacket
Once a week use a soft cloth and wipe inside of Body Jacket with rubbing alcohol.

My Rights:

I understand that unless revoked, this authorization is valid for 90 days from the date of signing. I understand that I may revoke this authorization in writing at any time except to the extent disclosure has already been made in accordance with this document.

I understand that I do not have to sign an authorization as a condition for receiving treatment or health care benefits (treatment, payment or enrollment). However, I do have to sign an authorization form to take part in a research study or to receive health care when the purpose is to create health care information for a third party.

Unless specifically excluded, this authorization includes release of specially protected information requiring my explicit authorization for release. This includes referral, diagnosis and treatment information related to: (check the accompanying box(s) below to **EXCLUDE** the information from authorization):

☐ **substance abuse** ☐ **mental health conditions** ☐ **sexually transmitted diseases** ☐ **HIV/AIDS**

I understand that once health care information is disclosed, the person or organization that receives it, may re-disclose it, and that it may no longer be protected by privacy laws.

Can't Really Release Records from here yet until Hall Health's name appears on the auth form.

IMPORTANT WARNING: This facsimile is a confidential communication and is transmitted for the exclusive use of the person or entity to which it is addressed. If you are not the intended recipient you are hereby notified that any disclosure, copying or distribution of this information is STRICTLY prohibited. If you have received this facsimile communication in error, please notify us immediately by telephone and mail the communication to us at our address printed in the top left-hand corner of this form or destroy this facsimile.

To the extent that Protected Health Information (PHI) is enclosed, please be advised that it is being faxed to you after appropriate authorization from the individual or under circumstances that do not require authorization. It has been disclosed to you from a designated record set whose confidentiality is protected by state and federal law. You, the recipient, are expected to maintain this information in a safe, secure and confidential manner. In addition, federal regulations (42 CFR part 2) prohibit any further disclosure of drug and alcohol abuse treatment information except with specific written consent of the person to whom the information pertains or the parent or legal guardian of a minor child to whom it pertains, unless otherwise permitted by federal law. A general authorization for the release of information is NOT sufficient for this purpose. State law (RCW 70.24.105) prohibits any further disclosure of this sexually transmitted disease information, including HIV/AIDS, without specific written consent of the person to whom the information pertains, or the parent or legal guardian of a minor child to whom it pertains, unless otherwise permitted by state law. A general authorization to release information is NOT sufficient for this purpose.

Mammography Screening

What is the REASON you are having a breast imaging exam?
(please select one)

- [x] This is a routine (screening) exam. I am not having breast problems.
- [ ] I am having breast problems: _____
- [ ] This is additional exam requested from a recent study.
- [ ] This is a short interval follow-up request from my last exam *(1-11 months ago)*.
- [ ] I have breast implants, but I am not having any problems.
- [ ] This is a review of an outside study.
- [ ] I am going to have breast reduction.
- [ ] I am going to have radiation therapy.
- [ ] This is an additional exam requested from my current screening exam.
- [ ] I have a history of benign breast disease.
- [ ] I have a personal history of breast cancer with breast conservation therapy.

Check all of the following RISK FACTORS that are true for you:

- [x] No one in my family has had breast cancer
- [ ] My aunt, grandmother, or cousin had breast cancer
- [ ] My mother or sister had breast cancer after their periods stopped
- [ ] My mother or sister had breast cancer while they were still having their periods
- [ ] I do not know my family breast cancer history
- [ ] I have had breast cancer [ ] I have had endometrial cancer
- [ ] I have had a previous breast biopsy that showed a high risk lesion
- [x] I have been through menopause
- [ ] I have never had children [ ] I had my first child after age 30

What TYPE of exam are you having? ❑ Mammog ❑ Breast CT

Referring Physician: _____ ❑ **None, I am self-referred.**

Indicate your referring physician type: ❑ Obstetrical-gynecologist ❑ Family practice ❑ Internist ❑ Surgeon ☒ Other physician

What is the REASON you are having a breast imaging exam (please select one)?

- ☒ This is a routine (screening) exam. I am not having any breast problems.
- ❑ This is an additional exam requested from a recent study.
- ❑ This is a short interval follow-up requested from my last exam (1-11 months ago).
- ❑ I have breast implants, but I am not having any problems.
- ❑ This is a review of an outside study.
- ❑ I am going to have breast reduction.
- ❑ I am going to have radiation therapy.
- ❑ This is an additional exam requested from my current screening exam.
- ❑ I have a history of benign breast disease.
- ❑ I have a personal history of breast cancer with breast conservation therapy.
- ❑ I am having the following **PROBLEM(S)**: (Circle **L** for Left or **R** for Right)

L	R	A new lump that can be felt	L	R	Other lump or thickening
L	R	Bloody discharge	L	R	Nipple problem
L	R	Non-bloody discharge	L	R	Pain in the breast
L	R	Difficult physical examination	L	R	Cancer elsewhere
L	R	Implant problem	L	R	Large nodes under my arm
L	R	Skin thickening or retraction found during my clinical breast examination			

Previous Mammograms? ☒ Yes ❑ No
When? _____
Where? _____

Do you have IMPLANTS? ❑ Yes ❑ No
(If Yes, circle **L** for Left or **R** for Right)

L	R	I don't know the specific type
L	R	Silicone gel implant
L	R	Saline implant
L	R	Combination implant
L	R	Pre-pectoral implant
L	R	Retro-pectoral implant

Check all of the following RISK FACTORS that are true for you:

- ☒ No one in my family has had breast cancer.
- ❑ My aunt, grandmother, or cousin had breast cancer.
- ❑ My mother or sister had breast cancer after their periods had stopped.
- ❑ My mother or sister had breast cancer while they were still having their periods.
- ❑ I do not know my family breast cancer history.
- ❑ I have had breast cancer.
- ❑ I have had endometrial cancer.
- ❑ I have had ovarian cancer.
- ❑ I have had a previous breast biopsy that showed a high risk lesion.
- ☒ I have been through menopause.
- ❑ I have never had children.
- ❑ I had my first child after age 30.

Previous PROCEDURES? ☒ Yes ❑ No
(If Yes, circle **L** for Left or **R** for Right)

U2548

UH2548 REV JAN 08

PROGRESS – BLUE

TC received from Dr. Jeremy Bauer from UW Sports Medicine Clinic who is working w/ Dr. Wahl's pt who is s/p eights months of ORIF of R hip fx. Dr. Bauer reports his concern that Mrs. Hoffman is being abused by her son and asking for direction on reporting this alledged abuse. SW suggested to MD to call DSHS's Adult Protective Service line at 1-866-END-HARM and requested that he make the referral himself since SW did not meet with the pt. Dr. Bauer states having already contacted APS and was instructed to leave a message w/ his referral and has since done so. Dr. Bauer reports that he will soon transfer from UWMC to another rotation shortly and uncertain who can be available to APS and their investigation. SW offered to MD to be a contact person until the next MD is available and gave him my contact information for any ongoing or future needs.

PLAN: SW availalble to MD, APS and to pt for concerns in regards to alleged abuse by pt's son.

Ortho Social Work: Concerns of abuse

IDENTIFICATION:
Ms. Hoffman is again in the clinic with her son to discuss her hip fracture. I had a discussion with her son outside the room while she was changing clothes. He was concerned that after I stopped him from putting 5-pound weights on both her ankles to try and continue her strengthening, her rehabilitation has stopped at a standstill. He feels that he needs to be there to push her physically to gain as much motion and flexibility in the hip as possible. He has been concerned because on two occasion she has fallen at her home, both times, by the patient's report (which is somewhat unreliable and disjointed in its history), related to unsafe conditions in her own the home. She describes living in a low-income housing complex where there are multiple "crazy people" and "elderly people" and feels that she is being watched and stalked by multiple people in her housing development. In addition, her son describes that she is being watched by people, including changes that are frequently coming to her door. She describes at least one argument that she had with her son over clothes. At first Jeanne was reluctant to divulge the details of this argument; however, she said that she became quite upset and at one point fell during the argument,
sustaining a fall to her hip. She was seen and evaluated with x-rays, which were apparently read as being normal. Jeanne declines having any significant pain in her hip. She says she does just fine if she is left to her own devices to move slowly and surely as she does using a cane at home and a walker hewn out.

PHYSICAL EXAMINATION:
MUSCULOSKELETAL: Today she clearly does walk in an ambling gait pattern using the walker. She has reasonably good function of her hip. She appears only mildly disheveled, but at times during our discussion is somewhat confused and her thinking and thought process appears to be somewhat non directed at times and rambling.

RADIOGRAPHS:
X-rays of her hip were obtained today since she had a history of recent fall. AP and lateral views of the pelvis and both hips show no interval change in her hardware placement and a well-healed intratrochanteric fracture.

IMPRESSION AND PLAN:
Regarding her hip, I think she is healed. I continue to have concerns that her son may, in fact, be a somewhat detrimental presence in her rehabilitation and life. At times both of these individuals (the patient and her son) appear to be somewhat perseverative and difficult to reason with. In addition, I have some concerns that her falls, one witnessed by her son, may have more complicity on her son's part than she is willing to admit in his presence. While I do think she is, for the most part safe, as her son is not living with her, it certainly sounds like either from her son and/or other people at this housing development or perhaps because of some mild dementia, she may be having some difficulty living independently. For this reason, we have spoken with Tracy Hirai, social worker here at University of Washington, as well as to the Bremerton Office of Elderly Abuse just to be sure that

these issues could be checked. Her son's and her intuition that she would be better served in Seattle or in elderly housing may be absolutely appropriate and, in fact, there may be no abuse whatsoever; however, I want to be sure that she is in a safe setting. We will leave it for Ms. Hirai to continue to work up and evaluate this situation.

SURGERY CLINIC NOTE

SUBJECTIVE:
This patient returns in follow-up having sustained multiple episodes of DVT and having post thrombotic syndrome in both legs. She has recently sustained a right hip fracture which appears to be fully healed. She has been very good at managing her anticoagulation and also the ulcerations in her leg. Currently she is wearing medium weight JOBST compression stockings on both legs and has not had a recent recurrence of ulceration. She comes today for renewal of her prescription.

PHYSICAL EXAMINATION:
GENERAL: The patient appears quite well. VITAL SIGNS: Blood pressure is 141/70, pulse 77, temperature 36.1 degrees centigrade, weight 141 pounds, O2 saturation 98%. EXTREMITIES: Examination of the legs reveals that the skin is intact. No evidence of ulceration. Good pulses present in the feet. Stasis dermatitis obvious above the malleoli.

IMPRESSION:
The patient is doing good job maintaining the skin in her feet despite the post thrombotic syndrome.

PLAN:
I have given her a new prescription for knee-high 40 mmHg compression stockings. Follow up here as needed.

ATTENDING PHYSICIAN:
Christopher J. Wahl, MD

SUBJECTIVE:
Ms. Hoffman and her son present today 4 months status post right ORIF of a intertrochanteric hip fracture on April 2, 2007. She denies any pain in her hip, pelvis or groin. There is no sense of catching or grinding. Her sleep is not disturbed and she can comfortably sleep on the affected side. She is using a cane to walk to her mailbox and garbage. Ms. Hoffman just received a 4-wheeled walker which she is using for longer distances. She does note some mild soreness when walking up or down hills. Her son says she is using the walker only for rehabilitative purposes and that he prefer she use the cane. He has her wearing 5 pound weights around her ankles which he repeatedly tells me he has "tested out" on himself so that she will gain more strength in her legs. He tried to put 10 pound weight on her, but it was too much weight. He says that she is able to lift the leg higher now when she walks and has made "major gains".

OBJECTIVE:
Gait is bilaterally antalgic and requires assistance with planned steps. She has appropriate balance and is able to use a step stool to get on the exam table. Ms. Hoffman is wearing old and worn Doc-Marten like shoes with orthotics. She is wearing bilateral knee-high compression stockings. She is able to perform a straight-leg raise in 2 planes actively and agaist light resistance.

RADIOGRAPHIC IMAGES:
Two views of the hip were obtained today. The hardware is intact. The fracture interval has bony callous. There is osteoarthritis.

ASSESSMENT:
4 months status post right ORIF of a intertrochanteric hip fracture on April 2, 2007

PLAN:
I spoke at length with Ms. Hoffman's son that I do not approve of making her walk around with ankle weights. This strongly increases her risk of falling, especially at the age of 83. The weights are preventing her from natural plantar- and dorsiflexion and making her walk with a flat foot stance. He did not seem to understand this and kept saying she has made great gains since he started making her wear the ankle weights. I reassured Ms. Hoffman that she is doing well in that she can participate in her activities of daily living and her hip is not limiting her. We would like to see her back in the clinic in four monthss or sooner if any questions or concerns arise.

SLS
DD:08/17/07

UW Sports Medicine Clinic

SUBJECTIVE
Jeanne returns for another evaluation of her hip now 12 weeks status post AMBI plating for dynamic compression screw placement. She has no complaints of pain at all in her hip. She is using a walker and getting around perfectly well. She can even walk 2-3 miles at times, when she goes to the store. She has no real complaints except for some mild pain in her knee, which she had before we had gotten x-rays, which really showed no major deformity.

She is living with her son who really has gotten her on a fairly aggressive exercise program. He is forcing her to get on steps with a stool, got her doing muscle strengthening in all planes, and working hard to encourage her not to use the walker.

IMPRESSION
She is doing reasonably well.

PLAN
I have had a careful discussion with her son that he really needs not to push her too hard while agree with working on her strength and her abilities I think that discouraging her from using a walker, if she thinks she needs to it to be safe, is not a good idea and certainly anything above ground level, like a step stool, is a poor idea. We have had a discussion about him not continuing to do this. I have also written them a prescription for physical therapy and I would like them to monitor a physical therapy session with the son present to see what kind of things she should be working on. I will see her back in about one to two months.

-ORTHO SPORTS MED CLINIC

SUBJECTIVE
Jeanne Hoffman is a delightful 82-year-old female returned today after a hip fracture. She had had an unstable type intratrochanteric fracture which was fixed with an AMBI plate. At four weeks she is already walking with the use of a walker and has no real complaints except for some numbness at the superior patellar pouch and occasional knee pain.

Please see patient intake questionnaire for a complete detailed past medical, surgical, family and social history, medications, allergies and vital signs as well as 14-system review dated 05-02-07.

PHYSICAL EXAMINATION
On physical examination she can flex well and easily to 90˚. She can extend fully. She has some numbness over the plect super patellar region of her knee but not medially nor laterally. She has good muscle strength.

RADIOGRAPHIC STUDIES
X-rays of her hip and an AP and frog leg as well as her knee an AP and laterals were taken here today. I viewed the x-rays and my interpretation is as follows: The hip shows good placement of hardware which has not moved. There are no signs of cut out. She is already showing signs of fracture callus. There is no collapse.

Regarding her knee, her AP and lateral views of the knee show no signs of new fractures. There is some minimal age related osteoarthritis but nothing impressive here.

IMPRESSION
She is doing great at four weeks.

PLAN
We will look forward to seeing her back in another four weeks at which point I expect she will be off the walker and probably on a cane.

-ORTHO SPORTS MED CLINIC

EMERGENCY DEPARTMENT NOTE

TIME SEEN:
Approximately 12:30 AM

CHIEF COMPLAINT:
"Numbness in the left foot."

HISTORY OF PRESENT ILLNESS:
Mrs. Hoffman is an 82-year-old woman who is referred into our Emergency Department by the personnel at a skilled nursing facility. Mrs. Hoffman is there for rehabilitation following a prosthetic hip insertion on March 31. She was discharged on April 4 to participate in rehab therapy following a hip fracture and prosthetic hip operation. History is primarily from the EMS notes who were called to transport her from the nursing facility. Apparently Mrs. Hoffman had complained of some numbness and abnormal sensations in her left lower leg and foot. Apparently according to the handwritten note evaluation by the staff at her nursing facility, they could not detect a pulse in her left foot and consequently referred her in for further evaluation.

REVIEW OF SYSTEMS:
Relative to chief complaint: Mrs. Hoffman is extremely hard of hearing, and communication back and forth was less than optimal. As best I can determine, she has felt like her left foot and lower leg "felt funny and a little numb." Pain has not been a component of her complaints.

PHYSICAL EXAMINATION:
EXTREMITIES: Problem-oriented exam confirmed that she indeed had a large hip replacement operation site on her right hip. In fact, the skin staples are still in place and the wound looks appropriately healing. No signs of infection exist. On the left leg, however, examination concentrated on her chief complaint of numbness and the nursing facility observation of no pulse. The lower extremities bilaterally appear to be chronically indurated with 1+ peripheral pitting edema. There is postinflammatory hemosiderin pigmentation in the affected leg on the left side much greater than the right. The dorsalis pedis pulse is present and brisk bilaterally. Capillary refill is intact in both feet. posterior tibiablis pulse cannot be palpated in either foot, and the only asymmetric abnormality appeared to be some bruising and possible ecchymoses/petechiae formation on the second and third toes on the left. To blunt stimulation and sharp stimulation of the left lower extremity she appeared to be perceiving the stimulations. More subtle sharp-dull discriminations could not be performed due to the communications problems. On the left foot there is good capillary refill. She has good strength on both flexion and extension, and the color status and
circulation appear to be normal and consistent with her right leg.

MEDICAL DECISION MAKING:
Because of Mrs. Hoffman's high risk for peripheral vascular disease including the risk factor of recent prolonged bed rest and prolonged orthopedic operation following general anesthesia, she is definitely at risk for deep venous thrombosis (DVT) and peripheral vascular problems. The original complaint from

the nursing facility that she had lost her pulse on the left lower extremity is not true at this time. A good bounding dorsalis pedis pulse is present to both palpation and ultrasound stethoscope on the left and the right. I think it appropriate, however, given her risk factors that we hold her in the Emergency Department until a vascular duplex study, both arterial and venous, can be performed later this morning.

FINAL DIAGNOSIS:
Possible venous system pathology in a high-risk patient.

PLAN:
At the time of this dictation, a peripheral venous duplex study including both arterial and venous components has been requested and is awaiting scheduling in the Vascular Laboratory. Responsibility for the patient is being transferred to Dr. Tom Martin, the succeeding attending. He will evaluate and respond to the duplex study results. At this time it is my opinion that if no acute pathology is identified on the Vascular Laboratory studies, she can be discharged back to the skilled nursing facility from whence she came.

DISCHARGE SUMMARY

DATE OF ADMISSION: 3/31/2007

DATE OF DISCHARGE: 4/4/2007

ADMITTING ON ADMISSION: Sumam Abraham, MD

ATTENDING ON DISCHARGE: Lili Church, MD

RELEVANT DIAGNOSES
1. Right intertrochanteric hip fracture.
2. Chronic left upper extremity deep venous thrombosis.
3. Diabetes mellitus type 2.

PROCEDURES
X-ray right femur and pelvis 3/30/2007. Comminuted intertrochanteric right femur fracture with 1 cm of lateral displacement of the shaft and 1 cm medial displacement of lesser trochanter fragment with minimal angulation.

Head CT without contrast 3/30/2007. No intracranial hemorrhage, microvascular ischemic disease, volume loss stable from prior exam.

Left upper extremity 3/31/2007. Evidence of chronic occlusion collateralization left external iliac vein, evidence of chronic wall thickening right main thigh femoral vein, no significant change from previous exam in 2005. No evidence of acute DVT in right or left lower extremities.

OPERATION
Open reduction and internal fixation right hip 4/2/2007 performed without complications by Dr. Christopher Wahl, Orthopedics. Please see his note in MINDscape for full details.

ADMISSION HISTORY
82-year-old female had a fall from standing and landed on right hip. She says she just fell, no loss of consciousness, no seizures, no history of head injury during fall. Found with right leg in awkward position but alert and oriented and brought in by AMR.

PAST MEDICAL HISTORY
1. Diabetes times two.
2. History of petit mal seizure.
3. GERD.
4. Recurrent DVTs.
5. Hyperlipidemia.
6. Carpal tunnel.
7. Cataracts.
8. Allergic rhinitis.
9. Osteoarthritis.

10. Hypertension.
11. Diaphragmatic hernia.
12. Glaucoma.

PAST SURGICAL HISTORY
1. Appendectomy.
2. Hysterectomy.
3. Right ankle surgery.
4. "Ulcer" surgery.

PAST SOCIAL HISTORY
No substances. Lives in Bainbridge Island independently.

ALLERGIES
PENICILLIN AND SULFA.

MEDICATIONS
1. Tegretol 200 mg tid.
2. Lipitor 40 mg qhs.
3. Timolol 0.5 mg 1 drop each eye bid.
4. Warfarin 5 mg Monday, Tuesday and Saturday, 10 mg otherwise q day.
5. Pentoxifillin 400 mg tid.
6. Hydrochlorothiazide 12.5 mg q day.
7. Ranitidine 150 mg bid.

ADMISSION PHYSICAL EXAM
VITAL SIGNS: Temperature 37.2, heart rate 93, blood pressure 125/63, respiratory rate 20. GENERAL: Pleasant in no acute distress. HEENT: Eyes normal. ENT normal. NECK: Supple. CV: Regular rate and rhythm, 2/6 systolic ejection murmur. LUNGS: See tab. ABDOMEN: Soft, nontender, nondistended. EXTREMITIES: Bruising right hip with mildly tender to palpation. Normal distal sensation of right leg. 2+ distal pulses.

LABORATORY DATA
Labs on admission, CBC, chem 7, LFTs and troponin were all normal. EKG showed a right bundle branch block consistent with baseline.

HOSPITAL COURSE BY SYSTEMS
1. Hip fracture. Orthopedics was consulted in the ER and recommended surgical reduction. The patient was admitted to Family Medicine Service due to history of recurrent DVTs and anticoagulation. After acute thrombosis was ruled out, Orthopedics took the patient to the OR for successful internal fixation without side effects or complications. She tolerated the procedure well and returned to her baseline postoperatively. She has minimal hip pain but is weightbearing as tolerated with Physical Therapy this morning. Her wound looks clean with clean dressings on it. She is to continue to have physical therapy and occupational therapy at Messenger House and recommendations are for weightbearing as tolerated. We are recommending a wound check q day for three more days and then prn thereafter.

2. Recurrent DVTs. INR was 2 on admission and with one dose of vitamin K came down to 1.2 on 4/1. During this time, she was maintained on a heparin drip for her recurrent DVTs. Lower extremity duplex showed chronic occlusion, but no acute changes as above. Her heparin was held intraoperatively but restarted 12 hours after procedure and she experienced no evidence of bleeding or wound dehiscence. On day of discharge, she was given one shot of Lovenox 70 mg subq times one and will continue to have Lovenox 70 mg bid until her INR is therapeutic on her Coumadin at the above regimen. We recommend that an anti-factor 10A level be checked in three days and that her INR be checked weekly until stable.

3. Diabetes mellitus. On admission there was question of glucose tolerance but with persistent chem 6 in the 200s and 1 in the 300s, the diagnosis of diabetes was made. She was maintained on sliding scale insulin with fair control of her blood sugars throughout. On day of discharge, her sugars ranged in the 200s, and we recommend she begin Metformin 500 mg bid as an outpatient. She should have blood sugars checked daily and follow-up with her PCP for diabetes management and education.

4. Anemia. Patient was admitted with a mild anemia of 35% which remained stable. Postoperatively, her hematocrit was 29%. She had no hypotension or tachycardia. On postoperative day one, hematocrit was 24% and this was attributed to hemodilution. Repeat hematocrit was 25% and her vital signs remained stable without tachycardia, hypotension or orthostasis. Her physical examination was normal without any signs of internal or external bleeding and a clean wound check. We recommend that her wound be checked daily and that her stools be guaiaced to rule out occult GI bleed.

DISCHARGE MEDICATIONS
Resume previous meds as above with the addition of
1. Lovenox 70 mg subq bid until INR is therapeutic.
2. Oxycodone 5 mg q6h as needed.
3. Docusate 250 mg po bid.
4. Iron sulfate 325 mg q day with orange juice.
5. Potassium chloride 10 mg q day times one week.

DISPOSITION
The patient is to undergo acute rehab at Messenger House. She will be transported by cabulance today.

DISCHARGE INSTRUCTIONS
1. Daily PT and OT at Messenger House, weightbearing as tolerated.
2. Monitor INR q week until stable. Anti-factor 10A level in three days or until off Lovenox. Chemistry and CBC should be checked q week until followed up by PCP.
3. New medications as above.
4. Follow-up with Dr. Wahl in Sports Medicine Clinic in two weeks. We also recommend she follow-up with her PCP Dr. Neighbor in Family Medicine Clinic at the same time. Patient comprehension is good.

ATTENDING SURGEON
Christopher John Wahl, MD

FIRST ASSISTANT
Jason J Wilcox, MD, R3

PREOPERATIVE DIAGNOSIS
Right unstable intertrochanteric hip fracture

POSTOPERATIVE DIAGNOSIS
Right unstable intertrochanteric hip fracture

PROCEDURES
Open reduction, internal fixation, right hip, using a dynamic compression hip screw

ANESTHESIA
General by endotracheal tube

FLUIDS IN
1800 cc of crystalloid

ESTIMATED BLOOD LOSS
About 250 cc

URINE OUTPUT
250 cc

SPECIMENS
None

DRAINS
None

IMPLANTS
One four-hole 135-degree dynamic hip screw, four or five cortical screws, one 95 mm hip screw and one compression screw.

COMPLICATIONS
None

INDICATIONS/PRESENTING HISTORY

Ms. Hoffman is a delightful female who unfortunately has a seizure disorder and has had multiple falls in the past. Unfortunately the last time she fell prior to this admission she broke her right hip. She was seen in the emergency room where x-rays were obtained. These showed an intertrochanteric hip fracture with comminution at the greater trochanter and a large lesser tuberosity posteromedial fragment.

After a long discussion about the risks and benefits of surgery, she has decided she wanted to undergo an open reduction, internal fixation with a dynamic compression screw. Some thought was given to the thought of using an intramedullary device; however, because of the comminution at the greater trochanter it was felt that this would significantly disrupt the abductor mechanism.

DESCRIPTION OF PROCEDURE
Ms. Hoffman was brought to the operating room and placed upon an operating table where, according to the usual protocol, she was inducted into a successful general anesthesia by endotracheal tube. She was transferred onto a fracture table. Her left lower extremity was placed in a well-leg holder. Her right lower extremity was placed in traction after placement of a peroneal post which was well-padded.

OPERATIVE PROCEDURE
The right lower extremity was prepped and draped in the standard surgical fashion. A combination of traction, internal rotation and adduction was applied but it was found that the fracture was significantly markedly displaced with the proximal fragment flexed up and abducted and it could not be reduced to the more distal fragment.

Next a longitudinal incision was made from proximal to the greater trochanter, carried down through the skin and subcutaneous tissues using a knife and hemostasis was achieved using a Bovie cautery. This incision was taken down to the iliotibial band, bringing the vastus fascia into view. The vastus fascia was incised longitudinally.

Next an open reduction was carried out where reduction forceps and a bone hook were used to grasp the more proximal fragment, bringing it to a more extended position, and it was carefully reduced to the more distal fragment. When this was done, it was held in place provisionally using a guidepin for the DHS which was placed proximally in the neck and to lie purposely in the acetabulum to maintain the reduction.

Next the 135-degree guide was placed onto the lateral aspect of the femur, and then a screw placed on AP and lateral fluoroscopic guidance to lie centrally in the femoral head in both the AP and lateral planes. When an acceptable position and an excellent reduction were achieved, this was measured, drilled up to 95 mm to accommodate the screw, and then a dynamic compression screw was inserted using the appropriate instrumentation.

The 135-degree plate was placed over the screw, malleted into position on the lateral wall of the femur, and then four screws were drilled, measured, tapped and filled, according to standard AO technique. This gave an excellent reduction to the fracture, compression screw was applied, and then attention turned to the wound defects which were copiously irrigated. The vastus fascia was reapproximated using #0 Polysorb sutures in a running fashion.

The iliotibial band was closed using figure-of-eight sutures in an interrupted fashion. Skin edges were reapproximated using #2-0 Polysorb sutures in an interrupted buried fashion, and the skin edges were

closed definitively using a stapler. Xeroform and a dry sterile dressing were applied. She was transferred from the fracture table to the operating table and to the postanesthesia care unit, resting and in stable condition.

I, Christopher John Wahl, MD, was present for and completed all aspects of the procedure, from incision to closure.

EMERGENCY DEPARTMENT NOTE

TIME SEEN:
18:40

CHIEF COMPLAINT:
Right hip pain

HISTORY OF PRESENT ILLNESS:
This is an 82-year-old female who was standing in a line at a shelter for the food bank when she lost her balance and fell backward with her right leg up underneath her. She immediately had excruciating right hip pain and was unable to move the extremity without pain.

She denies hitting her head, having any lightheadedness, chest pain, shortness of breath, or palpitations during this episode. She had otherwise been well this morning with no fevers, chills, nausea, vomiting, diarrhea, or other abnormal symptoms. She denies any dizziness or numbness, or inability to move any part of her body, or difficulty speaking during the event. At no time was she confused. She has not had a headache, nausea, or vomiting since the fall.

She is on Coumadin for a history of DVT and PEs. She also has a history of epilepsy, but the paramedics report that she was never confused and did not have a postictal state.

REVIEW OF SYMPTOMS:
A 10-point review of systems is completely negative, except as noted above.

PAST MEDICAL HISTORY:
1. Hypertension.
2. Epilepsy.
3. Arthritis.
4. DVT.
5. PE.

CURRENT MEDICATIONS:
1. Lipitor.
2. Coumadin.
3. Carbamazepine.
4. Ammonium lactate.
5. Timolol.
6. Hydrochlorothiazide.
7. Ranitidine.
8. Pentoxifylline.

ALLERGIES:
1. SULFA.
2. PENICILLIN.

SOCIAL HISTORY:
The patient denies alcohol, smoking, or illicit drug use. She lives on Bainbridge Island. Her son, Doug, also lives on Bainbridge Island and his

phone number is #206-842-8360.

PHYSICAL EXAMINATION:
VITAL SIGNS: Blood pressure: 173/91. Temperature: 37.2. Pulse: 78. Respiratory rate: 18. Oxygen saturation: 100% on room air. CONSTITUTIONAL: Well-appearing elderly female. Hard-of-hearing. In mild distress to her right femur. HEENT: Head: Normocephalic and atraumatic. Eyes: Pupils are equal, round, and reactive to light. Extraocular movements are intact. Sclerae anicteric. Conjunctivae clear. Nose: Without discharge. Mouth: Moist mucus membranes. NECK: Supple, with no midline tenderness or step-offs. There is no C-collar in place on arrival and the patient was moving her head about, with absolutely no pain, and talking in full sentences throughout her transport and initial evaluation in the Emergency Department. Given this and her exam of her neck and history of not hitting her head, it was felt that no C-collar was necessary. RESPIRATORY: Clear to auscultation, bilaterally. CARDIOVASCULAR: Regular rate and rhythm, without murmurs, rubs, or gallops. CHEST: Without contusions or abrasions. GASTROINTESTINAL: Abdomen soft, nontender, and nondistended, with normal bowel sounds. GENITOURINARY: The pelvis is stable. There is no blood at the urethral meatus or coming from the vagina. SKIN: Without edema or erythema. NEUROLOGIC: Cranial nerves II-XII intact. Gross motor and sensory exam intact. PSYCHIATRIC: Alert and oriented times three. Is alert and appropriate. EXTREMITIES: There is shortening and external rotation of the right lower extremity. Obvious swelling in the right thigh superiorly. Other joints have full range of motion. There is faint but palpable DP and PT pulses, bilaterally. Sensation is intact in the right lower extremity.

DIAGNOSTIC TESTS:
A CBC and chemistry are unremarkable, with a hematocrit of 37. Coags show an INR of 1.9. LFTs, troponins, and urinalysis are unremarkable.

IMAGING STUDIES:
A portable chest x-ray is normal. A head CT showed no acute intracranial bleeding. There was microvascular ischemic disease and volume loss. A pelvis x-ray showed no fracture of the femur. X-rays showed an intertrochanteric fracture with a 1 cm lateral shaft displacement, and 1 cm medial displacement of the lesser trochanter.

ELECTROCARDIOGRAM DATA:
An EKG shows normal sinus rhythm and a rate of 73, with a right bundle branch block and no significant ST-T changes or cues, with no significant change since a previous EKG on 2/27/2007.

EMERGENCY DEPARTMENT COURSE AND MEDICAL DECISION MAKING:
This is an 82-year-old female who, based on exam, had a probable right femur fracture. Her blood pressure was initially stable greater than one hour since the accident at 173/91, and she was not tachycardic. Her pain was relieved with morphine. Her vital signs remained stable with a hematocrit of 37. Therefore a traction splint was not applied.

CONSULTATIONS:
She underwent evaluation by Orthopedics in the Emergency Department after her

x-rays had returned.

She was then admitted to the Medicine Service for medical management with an Orthopedic consult for hip fixation. There were no other apparent injuries. The neurovascular status of her right lower extremity was intact throughout her stay.

FINAL DIAGNOSIS:
Right hip fracture.

CONDITION ON ADMISSION:
Satisfactory.

Attending Statement:

I personally saw and evaluated the patient. I discussed the patient with Dr. Mazzoncini. I agree with the findings and plan as documented in his note.

EMERGENCY DEPARTMENT NOTE

TIME OF VISIT:
1414 hours

CHIEF COMPLAINT:
Leg swelling.

HISTORY OF PRESENT ILLNESS:
This is an 82-year-old female with a history of DVTs, on chronic Coumadin therapy, who had right lower extremity swelling, redness and warmth about a week ago that suddenly improved on its own; it was from the knee to the ankle. There was minimal discomfort associated with it, now she has no complaints. She spoke with some providers on the phone. She is not a terrific, but an adequate historian. It is unclear exactly who she spoke with, but she was told to come in and be evaluated, although she says she feels fine, like her usual self.

REVIEW OF SYSTEMS:
Full 10-point review of systems was asked and was negative except as per above. Of note, she is hard of hearing. She has a history of DVT, PE last in 1999. She has a history of hypertension, dyslipidemia, peripheral vascular disease, epilepsy, TIA, glaucoma, GERD.

MEDICINES:
Her medicines were reviewed and include:
1. Hydrochlorothiazide.
2. Lipitor.
3. Ranitidine.
4. Tegretol.
5. Warfarin.

SHE IS ALLERGIC TO SULFA AND PENICILLIN.

FAMILY HISTORY:
Clotting disorders. She has no alcohol, tobacco or illicit drug use. She lives in Bainbridge, not working.

OBJECTIVE:
VITAL SIGNS: Temperature 36, 102/78, pulse 78, respirations 20, 98% on room air. GENERAL: She is normocephalic, atraumatic, alert and oriented x3 female, pleasant, somewhat tangential. Not a particularly lucid historian, but directable. HEENT: She is anicteric. Oropharynx is clear. Mucous membranes are moist. NECK: Supple. CHEST: Clear to auscultation. No rales or wheezes.

HEART: Regular rhythm, S1 and S2. No murmurs, no gallops. ABDOMEN: Soft, nontender on deep palpation. No rebound, no guarding, no CVA tenderness. EXTREMITIES: She has no cyanosis, clubbing or edema. She has some chronic changes in her left calf region, not symptomatic side, with some brown skin changes, not asymmetric, not warm. DP and PT pulses 2+ in both extremities. She has full sensory normality in bilateral lower extremities. She is grossly nonfocal with a stable gait using her usual walking device.

EMERGENCY DEPARTMENT COURSE:
She had an INR of 1.5, completely normal chemistries and CBC. Liver functions were normal. This patient is already on Coumadin, but slightly subtherapeutic, and it was a holiday; there was no access to vascular lab studies during the day. I do not think that she needs one urgently, as she is known to have venous thromboembolic disease, and she is currently asymptomatic; thus, we had her double her dose of Coumadin this evening, and call her primary care provider tomorrow as soon as possible to follow up on her INR, and we fax requested a referral for an outpatient lower extremity noninvasive Doppler study to see if there is any acute clot.

She was discharged with a diagnosis of resolved lower extremity swelling and edema without evidence of active cellulitis, as well as subtherapeutic INR.

Bainbridge Island, WA 98110

Re: HOFFMAN, JEANNE LEONIE
U8170135

Dear Mrs. Hoffman:

The purpose of this letter is to support having your son, Louis Alloin, be an occupant in your apartment while he is in the Seattle for the next 2 to 3 months. Based upon our interviewer yesterday, he clearly has been helping you with cleaning, food planning, cooking, and clothing, as well as some improvements in your apartment and general living situation. Given your problems with balance and ambulation, I know this is helpful. I think this would qualify under the Americans with Disabilities Act. I advocate that he be listed as an occupant so that he may continue to reside with you during the time that he is in Seattle.

Please contact me if you have any questions.

Sincerely yours,

William E Neighbor Jr, MD

PROBLEM:
Activities of daily living.

SUBJECTIVE:
Patient is in with her son Louis Alloin. He has been visiting her from California for an extended stay as he is doing some work in the Seattle area in transportation and has been staying in the patient's apartment in order to assist her with cleaning, food arrangements, clothing and general reorganization of her apartment. He has also identified some problems with mold and structural problems in the apartment, and has contacted the appropriate people to make improvements. They are in today apparently because the patient lives in public housing. They need a strong letter supporting his role under ADA. He would live there as an occupant for the two to three months he will be in Seattle.

OBJECTIVE:
Observation of interactions between Mrs. Hoffman and her son shows positive interactions. She clearly appreciates the help that he has given her.

ASSESSMENT:
Activities of daily living.

PLAN:
I will write a letter more firmly supporting Louis living with the patient while he is in Seattle.

Electronically Reviewed/Signed On: 06/15/06 at 14:19

TD:06/14/06

24597

PROBLEM:
ANTICOAGULATION.

SUBJECTIVE:
In for INR check. No bleeding, no clots.

PROBLEM:
LEFT LOWER QUADRANT ABDOMINAL PAIN.

SUBJECTIVE:
Two-week history of left lower quadrant abdominal discomfort, particularly worsened by walking. She denies any fever or chills, night sweats. Denies change in urination or bowel movements. She has not had recent colorectal cancer screening.

PAST MEDICAL HISTORY:
1. Seizure disorder.
2. Recurrent phlebitis and DVT's.
3. Hypercholesteremia.
4. History of venous stasis ulcers.
5. Talonavicular arthritis.
6. Hypertension.
7. Glaucoma.

MEDICATIONS:
1. Lipitor 40 mg daily.
2. Trental 40 mg tid.
3. Hydrochlorothiazide 25 mg 1/2 tablet daily.
4. Tegretol 200 mg tid.
5. Warfarin 10 mg one tablet three days of the week and 1/2 tablet on four days of the week.

REVIEW OF SYSTEMS:
The arthritic pain in her hands, for which she was seen about a month ago, resolved.

OBJECTIVE:
Weight 154, blood pressure 158/79, however, previous blood pressures usually about 115 to 130 systolic. Pulse 72 and regular. No acute distress. Bowel sounds normally active. Abdomen is symmetrical. There is tenderness in the left mid quadrant. On contraction of her abdominal muscles, the tenderness persists and there seems to be a fullness in the area of the tenderness suggesting a hernia.

LABORATORY DATA:
INR 2.2 today. She previously had sed rate and anti-CCP both of which were normal. Ankle brachial index earlier this year was normal as well.

ASSESSMENT/PLAN:
1. Anticoagulation with adequate INR. Continue current dose, recheck in one month.

2. Left mid quadrant abdominal discomfort. Probably secondary to abdominal wall hernia. Will obtain CT scan to confirm this. Also check CBC to rule out chance of diverticulitis though she has had no fever, chills or change in bowel movements. She is also due to colorectal cancer screening.
3. Colorectal cancer screening. Hemoccult kit given. Her last sigmoidoscopy was in 2001 and was only to 30 cm. She would be due for coloscopy or sigmoidoscopy depending on the results of her Hemoccult testing.
4. Health maintenance. Also due for tetanus diphtheria.
5. Elevated blood pressure. Check pressures at home, return in one month for recheck blood pressures.

VASCULAR SURGERY OUTPATIENT CLINIC NOTE

SUBJECTIVE: This 81-year-old woman returns to the Vascular Surgery Clinic for ongoing followup of her lower extremity post-thrombotic syndrome. She was last seen in this clinic in September 2005. She is known to have had a previous episode of left leg deep venous thrombosis in the 1980s, following a surgical procedure. She has had problems with swelling and post-thrombotic changes in both legs over the years, and she has been on Coumadin for many years. However, she has had no recent episodes of ulceration, and she uses bilateral elastic stockings to control her swelling.

At the time of this clinic visit, she has no new complaints with regard to her lower extremities. She has had no recent episodes of ulceration, and her swelling appears to be well-controlled. She does have some complaints of pain in the left hip and both of her knees, which are most likely related to arthritis. She is able to walk without crampy muscular pain, and her limitations are primarily related to her joints.

PHYSICAL EXAMINATION: VITAL SIGNS: She has a blood pressure of 130/66, with pulse 82 and temperature 36.5. Oxygen saturation is 94%. Observation of her legs reveals minimal swelling with bilateral stockings in place.

Review of her most recent vascular laboratory tests indicates that her ankle brachial indices were normal at greater than 1.0 on April 11, 2006, as well as in September 2005. She had a carotid duplex examination in September 2005, showing minimal disease of the internal carotid arteries bilaterally. Her last lower extremity venous duplex scan was also in September 2005. This was significant for chronic appearing left external iliac vein occlusion with collaterals visible and incompetence of the distal deep veins in the left leg.

ASSESSMENT AND PLAN: In summary, this 81-year-old woman has significant lower extremity post-thrombotic syndrome. She has had symptoms on both sides, although the major abnormalities documented by ultrasound are on the left side. She has been taking Coumadin for many years, and by her report, she has not had any serious complications related to her anticoagulation. However, it is reasonable to at least consider whether she needs to remain on Coumadin indefinitely. Unfortunately, there is no scientific way to predict her risk of recurrent venous thromboembolism off of anticoagulation. Given the significant abnormalities documented on venous ultrasound, particularly on the left side, this risk would most likely be significant. Therefore, if she is not having any serious complications or contraindications to continuing anticoagulation, then I would recommend that this continue. However, it would be reasonable to lower the intensity of her anticoagulation to make it somewhat safer. A therapeutic range around an INR of 2.0 would be reasonable in this setting. In addition, if she needs to discontinue her Coumadin for short periods of time, such as for dental procedures, then she should not require any bridge therapy. These recommendations are based simply on experience with similar patients, and not on clinical trials. These issues were discussed with the patient. She was invited to return to this clinic or call with any questions related to her vascular surgery evaluation today.

PROBLEM: ANTICOAGULATION.

SUBJECTIVE: Current dose of Coumadin below. In for INR.

MEDICATIONS: Coumadin 10-mg tablet, one tablet on four days of the week and half tablet on three days of the week.

OBJECTIVE: INR 3.1. No signs of bleeding.

ASSESSMENT: Anticoagulation. Would prefer her INR to be close to 2 given her fall risk.

PLAN: New schedule will be Coumadin 10-mg tablets one tablet on three days of the week and half tablet on four days of the week. Recheck two weeks.

TELEPHONE NOTE

INR 3.4. Patient's home phone called. Spoke with her son. Told her to hold dose this evening and tomorrow evening and then continue her regular dose. Her total weekly dose is presently 55 mg per week, previously had been slightly higher and I suspect that the elevation of the INR she has today will quiet down if we just hold a couple of doses and the re-implement her usual 55 mg total weekly dose which gives her varying INRs but they are usually towards the low end of the 2 range.

Recheck 10 days with appointment and for blood test.

PROBLEM: ANTICOAGULATION.

SUBJECTIVE: In for INR. Increased her total weekly dose by 5 mg which was 10% dosage increase at her last visit. No bleeding.

PROBLEM: GLUTEAL STRAIN.

SUBJECTIVE: Patient complains of pain in the gluteal muscle. There has been no fall. This has been an intermittent problem for years.

PROBLEM: COLDNESS IN HER LOWER LEGS.

SUBJECTIVE: Has history of peripheral vascular disease. Is on medications as listed at her last visit with me. She notes that her extremities in the last six months seem to be colder than usual. There has been no acute changes. She was seen by Dr. Zierler in Vascular Clinic last fall with a question of whether to continue on Coumadin, but she did not follow up. Peripheral vascular disease was not a reason for that visit at that time.

MEDICATION: Coumadin 10 mg on five days of the week currently and 5 mg on two days of the week for a total weekly dose of 60 mg.

OBJECTIVE: Blood pressure 130/80. Pulse 82 and regular. Examination of her lower back shows no midline tenderness. There is tenderness over the gluteal muscle on the left. Hip has full range of motion and no pain on internal or external rotation. Her gait is pretty much baseline for her. Lower extremity peripheral vascular exam was not done today given she was in for a brief visit.

LABORATORY: INR 3.0.

ASSESSMENT AND PLAN:
1. Anticoagulation. I am concerned that the total dose of 60 mg weekly is too much for her. She reports today that Allan Ellsworth who has managed her in the past always aimed closer to 2. We will drop back to her regular dose of 55 mg weekly. Patient understands how to take this which would be 10 mg on four days of the week and 5 mg on three days of the week. INR in two weeks.

2. Gluteal strain. Advised stretching exercises and use of Tylenol which she has been doing and has worked in the past.

3. Peripheral vascular disease. Referred to Dr. Zierler after she has an ankle brachial index done at the Vascular Clinic for further recommendations. Also as followup to her visit with him in September with the question of whether she should continue on anticoagulation given that she is at some fall

risk. Of note the patient prefers to stay on anticoagulation with her INR about 2.0 and so this is probably what we will do at the present time. She has had no recent falls.

After conferring with pt's PCP, I spoke w/ her and her son about pursuing cognitive behavioral therapy for her delusional parasitosis. I have contacted Dr. Stacy Welch, and she has recommended that the pt have an intake eval by her colleague, Dr. Andrea Neal, who has expertise both in skin picking/body focused repetitive behaviors as well as delusional disorders. The pt appeared motivated at her last appt and her son said he would help her follow up and schedule an appointment with them, (ebtseattle.com, 206-374-0109). She may also require a second-generation antipsychotic, but this will be left up to her mental health providers or PCPs. She should continue to see us in derm q 3 mos.

CBT referral

PROBLEM: ANTICOAGULATION.

SUBJECTIVE: Current Coumadin dose is 10 mg 1 tablet on Sunday, Monday, Wednesday, Friday; 1/2 tablet on Tuesday, Thursday, Saturday. No bleeding.

PROBLEM: FORMS COMPLETION.

SUBJECTIVE: I dictated a letter to her apartment owner indicating that she was helped by having her son around to help her with her medications. They now give me paperwork to complete about disability.

PROBLEM: NEED FOR DENTAL ABSTRACTION.

SUBJECTIVE: Dental Clinic telephone 598-4079, asked that we complete preoperative examination. I did not receive a request for recommendations for managing her INR at the time of surgery but will speak with them.

PAST MEDICAL HISTORY:
1. History of seizure disorder.

2. Recurrent phlebitis and DVT since 1982.

3. Status post hysterectomy for fibroids with bilateral salpingo-oophorectomy in 1971.

4. Hypercholesterolemia.

5. Status post carpal tunnel release in 1989.

6. Status post cataract extraction right eye 1989.

7. Allergic rhinitis.

8. Talonavicular arthritis since 1994.

9. Right patellar fracture in 1994.

10. Hypertension.

11. Glaucoma.

MEDICATIONS:
1. Lipitor 40 mg daily.
2. Trental 400 mg tid.
3. Hydrochlorothiazide 25 mg 1/2 tablet daily.
4. Tegretol 200 mg tid.
5. Coumadin dose as above.

OBJECTIVE: VITAL SIGNS: Weight 156 lb, stable. Blood pressure 151/69, usual blood pressures run 120-130 systolic. Pulse 76 and regular. NECK: Without jugular venous distention. Thyroid normal. SPINE: Straight and nontender. CHEST: Clear. COR: S1 and S2 normal without murmurs, gallops or rubs. No carotid bruits. ABDOMEN: Soft and nontender. EXTREMITIES: She has TED stockings in place. There is no edema palpable.

STUDIES: EKG: Last EKG February 2006 showed stable right bundle branch block which was old. She is due for lipid panel, LFTs, basic metabolic panel, and CBC.

INR today 1.9.

ASSESSMENT AND PLAN:
1. Anticoagulation for recurrent DVTs. Adjust Coumadin dose such that on Thursdays she takes 10 mg instead of 5 mg; otherwise, no change. Card is given to her. We also gave her a pamphlet reminding her of dietary interactions with Coumadin. We will need to speak with Dental Clinic regarding preoperative planning.

2. Plan for dental surgery. Other than resolving issues of anticoagulation around the time of dental surgery she is approved for dental surgery from a cardiovascular standpoint.

3. Elevated blood pressure. Recheck in 10 days.

ADDENDUM: Recheck INR in 10 days and see me. We will also complete the forms she brings in from her apartment owner for disability.

DERMATOLOGY CLINIC NOTE
This is supplemental to the written record.

SUBJECTIVE: The patient is an 81-year-old woman with a history of glaucoma, peripheral vascular disease, venous thrombosis and seizure disorder, who returns for follow-up regarding possible delusional parasitosis. She was last seen in our clinic on 1/11/2006, at which time, she was given topical doxepin 5% cream, to be used bid, as well as ammonium lactate 12% lotion. The patient found the latter "too greasy," did not use it very often, but continues to use the topical doxepin on her area of concern of her upper chest and lower neck with some benefit. The patient continues to affirm that she describes a sensation of worms under her skin and is frequently able to "pop" these areas and to release the suspected organisms. Biopsy was done on 8/3/2005, which revealed only solar elastosis with slightly increased dermal histiocytes, which is not indicative of an active infection, and stepped sections were performed.

Please see written record dated 1/11/2006 regarding past medical, family and social history, and review of systems, which is unchanged.

OBJECTIVE: GENERAL: Pleasant, well-developed, well-nourished, in no acute distress. VITAL SIGNS: Blood pressure 155/74, weight 156 lb. HEENT: Head is normocephalic, atraumatic. Sclerae is nonicteric. Conjunctivae noninjected. Nose is normal without deformities. Mouth and oropharynx are normal without lesions or exudates. Mucous membranes are moist. NECK: Supple without lymphadenopathy. SKIN: (Including face, scalp, neck, back, chest and abdomen) Remarkable for: Patchy areas of hyperpigmentation of the upper V of the chest, including focal areas of superficial lichenification, but no identifiable papules, pustules, plaques, nodules, or other primary lesions.

ASSESSMENT AND PLAN: The patient is an 81-year-old woman with a long history of persistent belief of cutaneous infection by "worms" without any physical or objective evidence, including previous biopsy, which was nonspecific. Her cutaneous findings today do appear secondary to chronic manipulation and, given her focus on worms, it is likely that she does have delusions of parasitosis or simply a delusional ideation of parasitosis (different only in that the patient is minimally fixated on a particular perspective, but is not completely inflexible, such as the way that truly delusional patients are).

As Dr. Heath mentioned at her last visit with us on 1/11/2006, we are concerned that there may be a component of dementia and that typical medications that we might use, including pimozide, may have significant side effects, and she would likely be best managed by a psychiatrist or psychologist. There have been reports with success of these individuals using risperidone, and olanzapine.

I will try to coordinate this referral with Dr. William Neighbor, and Allan Ellsworth, PA, or they can contact me on my pager at (206) 559-1483. In the mean time, she will continue using the topical doxepin 5% bid and return as needed.

Patient was seen and discussed with Dr. Eli Levy. The attending of record is Dr. Melanie Kuechle.
